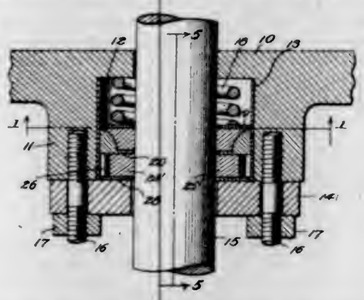
1. In a hydraulic scale, a body including a lower cylindrical portion closed at one end adapted to be partly filled with water, and an upper portion comprising two semi-cylindrical sections, a ring holding said sections together and associated with said cylindrical portion of the body, a piston operating in said body, a piston rod, a scale platform supported by the piston rod, the upper sections of the body constituting bearings for said piston rod, a casting arranged at one side of the body portion and having a bore therethrough, a pipe establishing communication between the casting and said cylindrical body portion, means for filling the body portion through said casting, and a graduated tube supported by the casting and communicating with said body portion.

1,782,256. AEROPLANE. FEDERICO GUILLERMO DIAGO, Habana, Cuba. Filed July 20, 1929. Serial No. 379,829. 3 Claims. (Cl. 244—25.)

2. The combination with an aeroplane having a straight line motor, clutch members fixed to the ends of the power shaft of the motor, cooperating clutch members slidable on the ends of the power shaft, a propeller mounted on the aeroplane at each side of the engine, an operative connection between each propeller and one of the slidable clutch members, parallel rack bars operatively connected with each of the slidable clutch members, a manually operable rotatable shaft mounted in the aeroplane, and a pinion on the shaft and engaging the rack bars and operable to shift the movable clutch members to operative and inoperative position.

1,782,257. REVOLVING DISPLAY STAND. CHARLES DUMLER, Canton, Okla. Filed Oct. 30, 1928. Serial No. 316,023. 2 Claims. (Cl. 211—131.)



1. In a revolving display stand, a hollow pedestal, a platform mounted on the upper end of said pedestal and having an opening registering with the bore of the pedestal, a spindle mounted in said pedestal and projecting above it, a hollow post loosely mounted to rotate on said spindle and detachably engaged with said platform to rotate therewith, said post having a plurality of longitudinally spaced collars to receive and support a plurality of shelves.

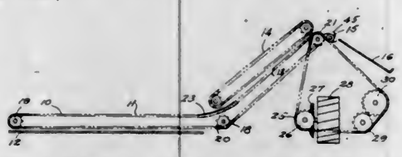
1,782,258. PACKING FOR PISTON RODS AND VALVE STEMS. SAMUEL E. DUNHAM, Augusta, Ga. Filed Nov. 24, 1928. Serial No. 321,723. 1 Claim. (Cl. 286—22.)

In a device of the class described, a packing ring comprising a plurality of segmental sections each having a flat edge portion, resilient means bearing on the outer edges of the sections, a disk adjacent to which the sections are

mounted, said disk and sections being adapted to surround a rod, and lugs carried by the disk and positioned at points opposite each other, for engaging the edge portions of

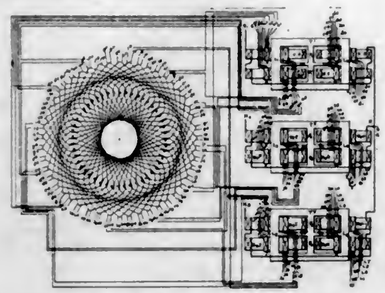
the sections, said lugs forming elongated lips remote from the center and constituting chord reinforcements of the edge portions of the disk.

1,782,259. LIGHT-SENSITIVE LAYER AND PROCESS OF MAKING PHOTOGRAPHIC IMAGES. JOHN EGGERT, Leipzig, and RICHARD SCHMIDT and BRUNO WENDT, Dessau-in-Anhalt, Germany, assignors to Agfa Ansco Corporation, Binghamton, N. Y., a Corporation of New York. Filed July 12, 1929, Serial No. 377,911, and in Germany July 17, 1928. 19 Claims. (Cl. 95—6.)



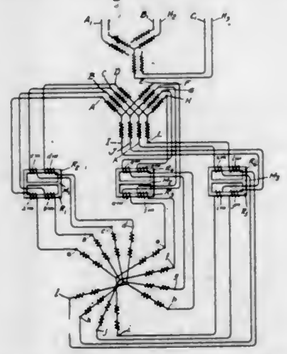
1. A light-sensitive layer containing an ethylene derivative forming cis-trans-isomerides.

1,782,260. REMOVALBE RADIATING DEVICE FOR THE COOLING OF SPARK PLUGS. JEAN FRANQUET, Chatillon-Sous-Bagneux, and NICOLAS DZIACOS, Paris, France. Filed June 10, 1929, Serial No. 369,801, and in Luxemburg June 16, 1928. 4 Claims. (Cl. 257—263.)



1. A radiator for spark plugs comprising two sections hinged together, each section including a semicircular band having a series of vertically disposed spaced apart flanges which extend above and below the band, and means for securing the ends of the sections together.

1,782,261. HARVESTING MACHINE. ERIK FRIIS-HANSEN, Fort Saskatchewan, Alberta, Canada. Filed Sept. 5, 1928. Serial No. 303,987. 6 Claims. (Cl. 56—185.)

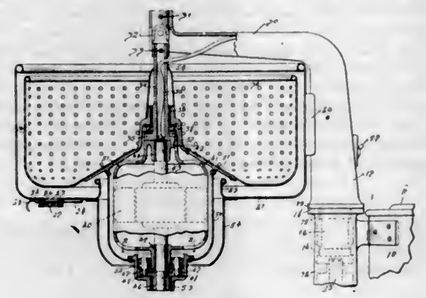


1. In a harvesting machine, a frame including side members, each of which consists of two legs disposed angularly with respect to each other, a transverse shaft at each end of the frame, a third transverse shaft mounted in the frame at the point of juncture of the legs, a curved guide rail on the inner side of each side member at the point of juncture of the legs, a sprocket wheel at each end of said shafts, an endless chain at each side of said frame, each of the chains comprising a plurality of links some of which have projections thereon, said chains operating over said sprocket wheels and being guided by said guide rails, and an endless conveyor belt secured to the projections on the links of the chains and adapted to travel in a path conforming to the shape of the frame.

1,782,262. MEANS AND METHOD OF CONNECTING ELECTRICAL MACHINES WITH TRANSFORMER BANKS. FRAZER W. GAY, Newark, N. J., assignor to General Electric Company, a Corporation of New York. Filed June 3, 1927, Serial No. 196,218. Renewed April 7, 1930. 7 Claims. (Cl. 172—237.)

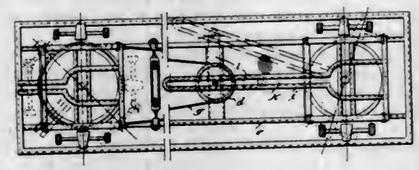
1. A multipole electrical machine having uniformly distributed alternating current windings comprising a predetermined number of coils per pole, in which every coil under one pole is segregated within said machine from every other similarly located coil under every other pole, and interconnecting means in segregated relation external of said machine coil circuits for interconnecting said coils in groups having generated voltages of the same time phase.

1,782,263. MEANS AND METHOD OF CONNECTING ELECTRICAL MACHINES WITH TRANSFORMER BANKS BY PHASE CHANGING AND VOLTAGE CHANGING. FRAZER W. GAY, Newark, N. J., assignor to General Electric Company, a Corporation of New York. Filed Feb. 15, 1928, Serial No. 254,560. Renewed June 18, 1930. 15 Claims. (Cl. 172—237.)



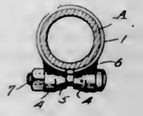
1. In combination, a multiple electrical machine having a multiplicity of separately insulated three phase windings each differing from the others in the time phase of its generated E. M. F., a three phase transformer bank having as many separately insulated three phase primaries as there are separately insulated three phase machine windings, and phase changing means for bringing to a common time phase the E. M. F. of predetermined generator windings which are connected to predetermined three phase primary windings.

2. In combination, a multipole electrical machine having a multiplicity of separately insulated three phase windings each differing from the others in the time phase of its generated E. M. F., a three phase transformer bank having separately insulated three phase primary windings mounted on magnetic cores so that in any phase a magnetic core has a winding thereon connected to a plurality of machine windings of the same generated time phase, and phase changing means for bringing to a common time phase the voltage of said plurality of generator windings of different generated time phase which are connected to the smaller number of said transformer primary windings.



6. In combination, a multipole electrical machine having a multiplicity of separately insulated three-phase windings each differing from the other in the time phase of its generated E. M. F., a three-phase power circuit connected to be energized from said machine windings, two of said machine windings having E. M. F.'s slightly lagging and slightly leading the E. M. F. of said power circuits respectively, and three-phase transformer time phase changing means having two equal turn coils per phase mounted on a common magnetic leg, one of said coils being connected in the corresponding phase of each of said two machine windings in such a manner that equal power currents fed by said machine phase windings to their connected power phase will produce M. M. F.'s in said phase changing coils equal and opposite.

1,782,264. CENTRIFUGAL DRIER. LEE B. GREEN, Lakewood, Ohio, assignor to The Borden Company, Warren, Ohio, a Corporation of Ohio. Filed Nov. 16, 1928. Serial No. 319,929. 7 Claims. (Cl. 210—72.)

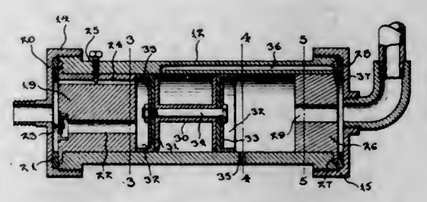


1. In a centrifugal clothes drier, a support, a non-rotatable hanger carried thereby, said hanger comprising a flexible joint, a drier basket rotatably suspended upon said hanger, a motor casing secured to said hanger below said basket, said motor having a vertical rotor with a shaft extending downwardly through said casing, and a driving connection extending from the lower end of said shaft upwardly around said motor casing and attached to said basket.

1,782,265. STEERING MECHANISM FOR VEHICLES. OTTO HAASE, Dresden-Altstadt, Germany. Filed Nov. 28, 1927, Serial No. 236,270, and in Germany Nov. 29, 1926. 1 Claim. (Cl. 280—100.)

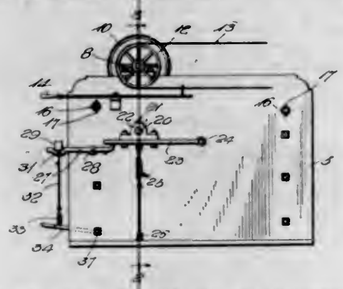
In a steering mechanism for vehicles, a front bogie, a pulley firmly secured thereto, a rear bogie, a second pulley which is smaller than the said first pulley mounted in front of the rear bogie, a rope transmitting the movement of the said first pulley to the said smaller pulley, an arm mounted on the said smaller pulley, a flat iron bar mounted on the rear bogie, a longitudinal slot in the said bar, and a bolt on the said arm engaging in the said slot, the arrangement being such that the movement of the said smaller pulley is transmitted in positive fashion to the rear bogie.

1,782,266. CLAMP AND METHOD OF MAKING THE SAME. JOHN WALLACE HARDING, Wheeling, W. Va. Filed Nov. 8, 1929. Serial No. 405,727. 1 Claim. (Cl. 24—19.)



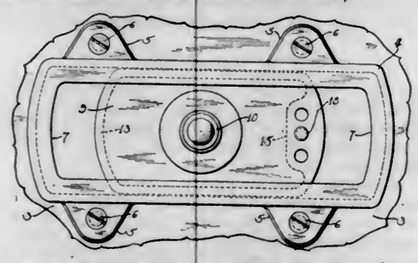
The herein described method of producing metal clamps which consists in slotting the ends of a metal band and bending the band to bring the ends adjacent to each other, thereafter applying to the slotted portions of the band a tubular member bridging the space between the ends of the band, subsequently joining the tubular member to the ends of the band by fusing, and finally dividing the tubular member at its center to form alining eyes.

1,782,267. REMOVING COLOR FROM ROSIN. WILLIAM BURNS LOGAN, De Quincy, La., assignor, by mesne assignments, to The Newport Company, a Corporation of Delaware. Filed Aug. 2, 1928. Serial No. 297,110. 11 Claims. (Cl. 87—2.)



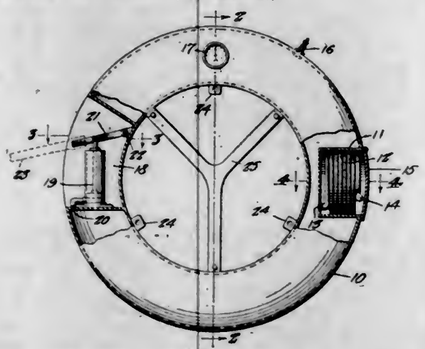
1. A process of improving the color of rosin which comprises the herein described steps of treating a solution of rosin with a light colored metal halide capable of forming an insoluble compound with the color bodies in the rosin and separating the precipitate from the solution of rosin.

1,782,268. AUTOMATIC AIR RELEASE FOR AIR BRAKES. PAUL A. MANNING, Madison, Ill., and JOSEPH W. GATES, St. Louis, Mo. Filed Oct. 10, 1928. Serial No. 311,670. 6 Claims. (Cl. 303—80.)



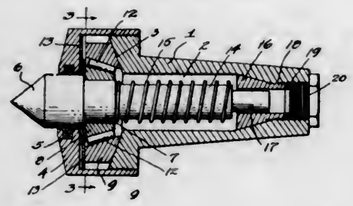
1. In combination with the train line and auxiliary reservoir and triple valve of an air brake mechanism, means connecting the auxiliary reservoir with the train line and automatically discharging the air from the reservoir upon reduction of the train line to atmospheric pressure, said means being adjustable to vary the time interval between the moment of the reduction of the train line to atmospheric pressure and the instant of discharge from the reservoir.

1,782,269. ABRADING MACHINE. PETER MARCHESINI, Peabody, Mass. Filed Sept. 17, 1928. Serial No. 306,400. 4 Claims. (Cl. 51—72.)



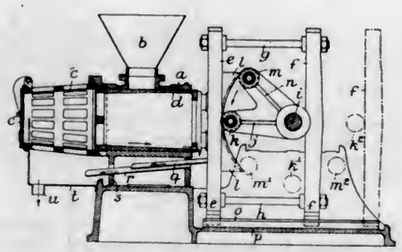
4. In a machine of the class described, a pressing roll, two vertically swingable arms having bearings supporting said roll, two levers separate from and operatively connected with said arms for upwardly swinging them, springs operatively connected with said arms for downwardly swinging them, a transverse bar operatively connected with said levers, a foot pedal under the center of said bar, and a vertical connection between said foot pedal and said center of said bar.

1,782,270. SEAT CONSTRUCTION. WILLIAM S. MENDENHALL, Aberdeen, Wash. Filed Oct. 12, 1928. Serial No. 312,128. 2 Claims. (Cl. 155—33.)



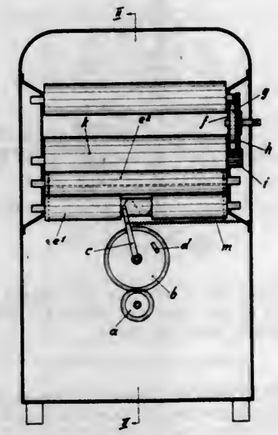
1. A seat construction comprising a seat, a guide casing secured to the seat and having an opening therein, a sliding member disposed within the guide casing and having a shank projecting through the opening in said guide casing, and a pin secured to said sliding member and adapted to be connected with a seat return.

1,782,271. AIR-STORAGE TANK. ELONZA A. PENNINGTON, Arkadelphia, Ark. Filed Oct. 17, 1928. Serial No. 313,084. 4 Claims. (Cl. 220—1.)



1. In an air storage tank, an annular hollow member of substantially the same size and configuration as an automobile tire, means whereby air under pressure may be introduced into the tank, a hose compartment arranged within the tank, a door for closing the compartment, and a hose within the compartment and having communication with the tank.

1,782,272. LATHE CENTER. LEWIS R. POWER, Lawton, Mich. Filed Jan. 12, 1929. Serial No. 332,103. 6 Claims. (Cl. 82—33.)

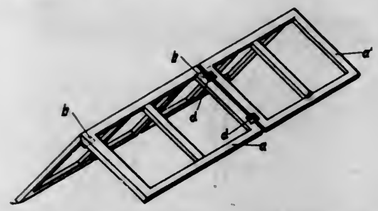


1. In a lathe center, a housing adapted to be secured in the tail stock of a lathe, the said housing being provided with a central bore and a flanged outer end having a conical face opening toward the central bore, a rotatable lathe center extending into the central bore of the housing, a bearing in the said central bore in which one end of the rotatable lathe center is rotatably mounted, an inner bearing race secured to the end of the rotatable lathe center opposite the said bearing and having a conical face, a series of bearing rollers positioned on the said face, an outer bearing race positioned about the said bearing rollers and having a conical face seating against the conical face of the housing, the outer bearing race being split through a portion of its circumference, a cap threaded onto the flanged end of the housing, a yieldable member carried by the cap, and adapted to engage the outer bearing race between the yieldable member and the conical face of the housing as the cap is threaded onto the housing.

1,782,273. PRESS. OTTO RIEMANN, Wellingsbuttel, Germany. Filed Sept. 11, 1928, Serial No. 305,224, and in Germany Mar. 22, 1928. 2 Claims. (Cl. 100—39.)

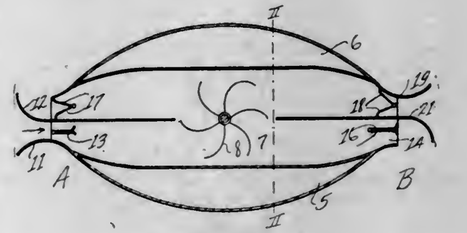
1. An apparatus for expressing juice or fluid from compressible substances, comprising a cylinder, a feed hopper communicating with said cylinder, a perforated, tapered discharge channel at one end of the cylinder, a piston in said cylinder, an open frame carried by the piston outside the cylinder, a rigidly supported shaft passing through the opening in said frame, a crank on said shaft co-operating with the frame members for reciprocating the piston within the cylinder, a cam element carried by said frame between the shaft and the piston, and an additional crank on the shaft adapted to engage said cam element so as to support the piston against the reaction of the compressed materials after the first crank has passed its dead centre position.

1,782,274. CLOCK-ACTUATED CALENDAR. EMIL SAHNER, Sackingen, Baden, Germany. Filed June 4, 1929, Serial No. 368,255, and in Germany June 4, 1928. 1 Claim. (Cl. 58—6.)



A releasing device for a clock actuated calendar, comprising in combination with an annular band driven by a spring motor, a guide roller over which said annular band passes having a helical groove terminating in a hole, a resilient locking lever actuated by the clock and having a pointed end adapted to normally engage in said hole, a wheel driven by the clock and having an aperture, a releasing element pivotally mounted on said wheel and in said aperture and adapted to lift said locking lever every twenty-four hours from said hole, and a spiral spring adapted to pull said locking lever away from said hole, whereby said spring motor is released to operate and the point of said locking lever falls into said helical groove of said guide roller to be guided back into the hole in said roller and to stop the said spring motor.

1,782,275. FASTENER. WILLIAM P. SAYLOR, Pittsburgh, Pa. Filed Feb. 23, 1929. Serial No. 342,157. 1 Claim. (Cl. 24—246.)

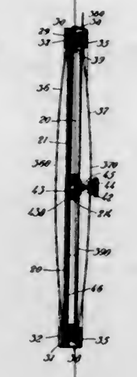


In a hose supporter, a plate to which the usual limb encircling strap may be secured, an arm pivotally secured at one end to said plate, the opposite end of said arm being provided with a pair of laterally disposed and converging spring fingers, a protuberance on the said plate, said protuberance being provided with a pair of pockets therein, into each of which one of the fingers is adapted to engage, said arm at the free end thereof being provided with an extension for engagement by a finger of the person operating the arm, said extension being curved in the direction of the plate.

1,782,276. BEDCOVER FRAME. ERNST THEODOR SEIFARTH, Leipzig, Germany. Filed Mar. 23, 1929, Serial No. 349,287, and in Germany Sept. 27, 1928. 1 Claim. (Cl. 5—319.)

A collapsible bed cover frame adapted to be arranged in inverted V-formation on a bed to support and hold the bed clothes elevated out of contact with the body of a person lying in bed, said frame comprising two pairs of oblong rectangular frame members arranged on opposite sides of the longitudinal center of the frame and each pair consisting of an upper member and a lower member, the upper members being hinged at their inner longitudinal edges for unfolding movement to an inverted V-formation and for a folding movement in parallel overlapping relation, and the lower members being free from connection at their inner longitudinal edges and hinged at their upper end edges to the lower end edges of the upper frame members so as to adapt said lower frame members to be unfolded to form with the upper frame members an elongated Λ-shaped support and to be folded over upon the outer faces of the upper frame members and collapsed in parallel relation to the latter.

1,782,277. POWER APPARATUS. RALSTON R. SMITH, Hayward, Calif. Filed Dec. 15, 1928. Serial No. 326,281. 1 Claim. (Cl. 170—101.)

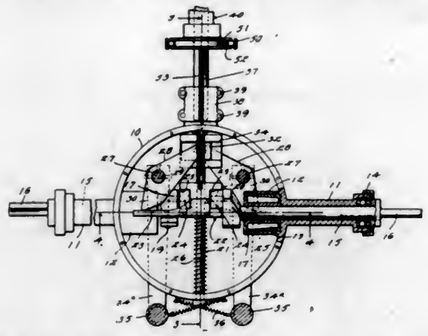


In a device of the character described, a body portion comprising a pair of pontoons, a chamber formed between said pontoons, a division plate positioned at each end of said chamber, a water wheel positioned within said chamber and at a point between the adjacent ends of said division plates, an inlet and outlet port formed at each end of said chamber and at opposite sides of said division plates, a valve positioned within each of said inlet and outlet ports, said valves comprising hinged vanes having flared ends, the flared ends of the inlet valves extending into said chamber, the flared ends of said outlet valves extending in a reverse direction from said inlet valves.

1,782,278. VIBRATING CONDENSER. HANS VOGT, Berlin-Wilmersdorf, Germany. Filed Sept. 6, 1927, Serial No. 217,838, and in Germany Apr. 28, 1926. 9 Claims. (Cl. 179—111.)

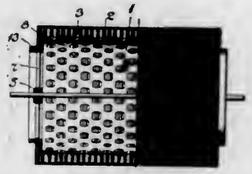
1. An electrostatic telephone comprising a rigid plate having a plurality of apertures and composed, at least partially, of a suitable metal, and a vibratile diaphragm mounted in spaced relationship and substantially parallel

to the said rigid plate, the said diaphragm consisting of a light metal alloy preferably aluminium alloyed with not more than 3.5 per cent of magnesium and having a tensile strength of more than 20 kg. per square millimeter and the said diaphragm further having a thickness of approximately .010 to .070 millimeters and a diameter of more than 20 centimeters and being wholly supported peripherally and maintained highly tensioned in radial direction.



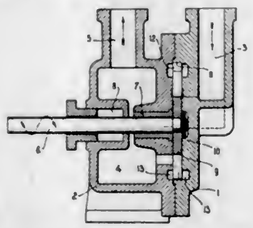
1,782,279. BUST SUPPORT. PAULINE WERNER, NÉE FRESENIUS, Stuttgart, Germany. Filed Sept. 21, 1927, Serial No. 220,980, and in Germany Nov. 2, 1926. 1 Claim. (Cl. 2—42.)

A bust support including a pair of breast pockets, each breast pocket having a cross brace attached at its upper end to the upper inner edge of one of said breast pockets and extending to the lower inner edge of the other breast pocket, and a belt section attached at one end to the lower outer corner of the pocket, the belt section of each pocket extending around the wearer under the other breast pocket and attached at its end to the lower end of the cross brace which is attached to the same pocket to which the other end of the belt section is attached.



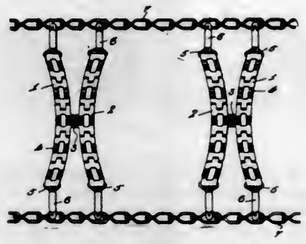
1,782,280. WINDMILL. ARNOLD B. WILLENBRING, Richmond, Minn. Filed Dec. 1, 1928. Serial No. 323,128. 3 Claims. (Cl. 170—68.)

1. In a wheel for windmills and the like, a hub casing, radially pivoted vanes carried thereby, an axially disposed guide within the casing, a yoke slidable upon the guides, slides mounted in the yoke, cranks carried by the inner



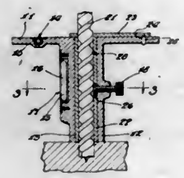
ends of the vanes, pins connecting said cranks and corresponding slides of the yoke, and means for shifting said yoke longitudinally upon the guide.

1,782,281. CYLINDER MOLD OF PAPER-MAKING MACHINES. TARIO YONEKURA, Takaoka, Fuji-Gun, Japan. Filed Feb. 23, 1929, Serial No. 342,179, and in Japan Sept. 18, 1928. 1 Claim. (Cl. 92—42.)



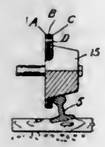
In a cylinder mold for paper making machines, a cylinder having a plurality of spaced annular flanges on its periphery defining liquid passage ways, the periphery of the cylinder being perforated for the entrance and exit of liquid, certain of the flanges having openings therein which are bevelled from the outer faces of such flanges and communicate with two adjacent perforations.

1,782,282. ROTARY PUMP. ADOLF BARGEBOER, The Hague, Netherlands. Filed May 14, 1929, Serial No. 362,989, and in Great Britain Apr. 4, 1929. 12 Claims. (Cl. 230—79.)



1. In a rotary pump, a casing enclosing a pumping space having two side walls, an impeller adapted for rotation within said space and fitting between said side walls, a channel formed between the circumferential portion of said impeller and the walls of said space, an inlet opening in one of said side walls and located within said channel, an outlet opening in one of said side walls, and a shoot of said channel extending inwardly and forming a recess in a side wall of said space.

1,782,283. ANTISKID CHAIN FOR AUTOMOBILES. DANTE BARTOLETTI, Pittsburgh, Pa., assignor of one-half to Marino Fredici, Monessen, Pa. Filed Apr. 21, 1928. Serial No. 271,886. 1 Claim. (Cl. 152—14.)

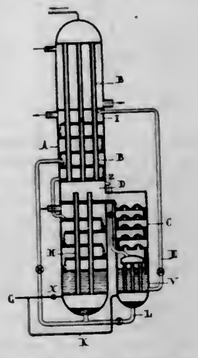


A cross unit for an anti-skid chain comprising a pair of arcuate members each consisting of a series of arcuate links, and an integral connection extending between the middle links of each series, the said members having their convex sides opposed.

1,782,284. BIT GAUGE AND POSITIONING OR LEVELING ATTACHMENT. MIGUEL BETANCOURT, Bronx, N. Y. Filed Dec. 3, 1928. Serial No. 323,550. 2 Claims. (Cl. 145—128.)

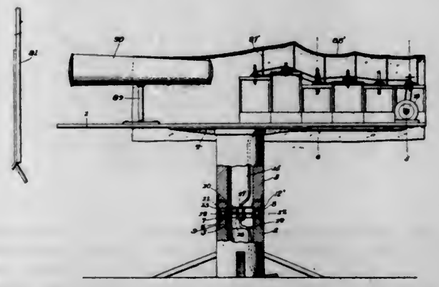
1. A bit gauge and positioning or leveling attachment comprising a tubular sleeve, a set screw threaded in said sleeve for clamping the same upon a bit, a disk at one end of said sleeve, and a spirit level mounted in said disk, a bore reducer element fitting into said tubular sleeve and having a bore extending therethrough, said reducer element having a hole therein for the passage of said set screw, and coacting means for preventing accidental turning of said bore reducer member with respect to said sleeve and for aligning said opening with respect to said set screw.

1,782,285. WHEEL FOR RAILROAD VEHICLES. PIERRE MARCEL BOURDON, Paris, France, assignor to Michelin & Cie., Clermont-Ferrand, France, a Corporation of France. Filed Sept. 15, 1930, Serial No. 482,032, and in France Oct. 28, 1929. 4 Claims. (Cl. 295—1.1.)



1. A flange for railroad vehicle wheels comprising a part secured to the wheel rim, a part adapted to rub against the rail-head and an elastic vibration-damping part interposed between the two first parts.

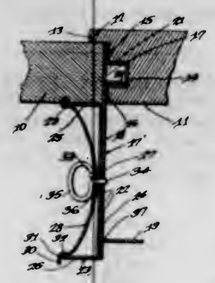
1,782,286. PLATE SPRING. ERNEST BURNAND, Paris, France. Filed Nov. 25, 1929, Serial No. 409,707, and in Germany Nov. 29, 1928. 4 Claims. (Cl. 267—48.)



1. A plate spring comprising an auxiliary plate connected to the end of the main plate, it being interposed in the set of spring plates and slidable with reference to said plates.

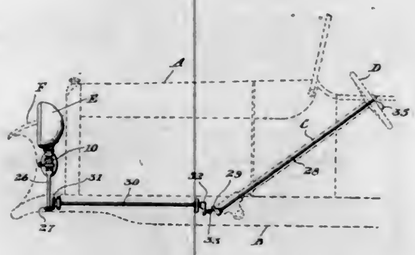
1,782,287. GAS-SEPARATION PROCESS. GEORGES CLAUDE, Paris, France, assignor to Société l'Air Liquide, Société Anonyme pour l'Etude et l'Exploitation des Procédés Georges Claude, Paris, France. Filed May 8, 1925, Serial No. 28,940, and in France June 3, 1924. 10 Claims. (Cl. 183—115.)

4. A process of manufacturing hydrogen, comprising the steps of partially liquefying a gaseous mixture containing hydrogen; extracting the nitrogen-containing liquid formed during the liquefaction operation; subjecting it to a progressive vaporization out of the path of the gaseous mixture undergoing liquefaction; and mixing the gas rich in nitrogen obtained from the vaporization operation with the gaseous mixture at the point where the nitrogen-containing liquid is collected.



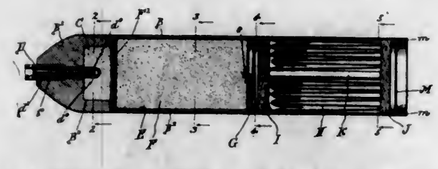
1,782,288. PROJECTING APPARATUS. ROHAN CLUFF, Nogales, Ariz. Filed Aug. 17, 1927. Serial No. 213,594. 10 Claims. (Cl. 88—24.)

1. A projecting apparatus comprising a set of shadow forming elements, a series of light receiving and reflecting elements, one spaced from the other and said elements arranged tandemwise rearwardly of said shadow forming elements, certain of said receiving and reflecting elements having light sources of different colors, means for revolving said elements approximately 1500 revolutions per minute, a telescope arranged adjacent to the inner one



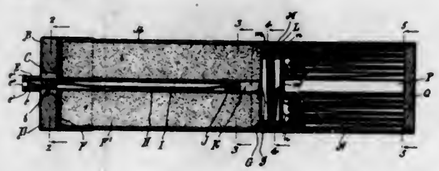
of said light receiving and reflecting elements, and a light confining means for said elements and extended upon the telescope at the entrance end of the latter.

1,782,289. DOOR LATCH. FREDERICK AVERY COX, Chicago, Ill. Filed Apr. 14, 1928. Serial No. 270,092. 2 Claims. (Cl. 292—295.)



1. A latching device including a substantially flat plate, said plate having projections extending from one face thereof in spaced relation with the ends and having a plurality of openings formed therein adjacent one of said projections, a substantially U-shaped member including an elongated bight portion, a spring member having portions connected to the limbs of said U-shaped member and having the intermediate portions thereof disposed toward said bight portion, a connecting member, means for attaching said connecting member to said spring member whereby when said plate and the bight portion of said U-shaped member are arranged in abutting relation said spring member will force said connecting member through a selected one of said openings.

1,782,290. OSCILLATING HEADLIGHT FOR AUTOMOBILES. HERBERT CRAGG, Ottawa, Ontario, Canada. Filed Sept. 26, 1929. Serial No. 395,428. 1 Claim. (Cl. 240—61.)



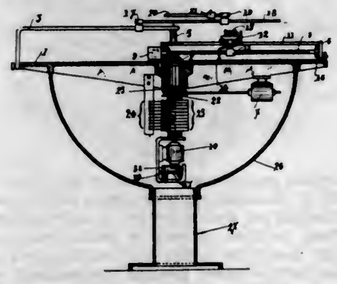
The combination with the headlights of an automobile, of spindles secured to the bottoms thereof, projections on said spindles and a tie rod joining said projections, an arm secured to and depending from one of said spindles and having a pinion secured at the bottom thereof, a shaft mounted on the chassis frame of the automobile and having a pinion secured at one end thereof meshing with said first mentioned pinion, said shaft having a crank connection with a shaft on the steering column of the automobile and means for permitting rotation of said last mentioned shaft to one side only of the position it assumes when said automobile headlights are at dead center.

1,782,291. PROJECTILE FOR SIGNALING OR ILLUMINATING PURPOSES. LOUIS L. DRIGGS, Jr., Tippecanoe City, Ohio, and HENRY B. FABER, New York, N. Y. Filed Nov. 12, 1929. Serial No. 406,670. 6 Claims. (Cl. 102—29.)

1. A projectile, comprising a hollow substantially cylindrical shell having its rear end closed by a heavy base, and its forward end closed by a separate cap, said base being provided with a chamber for the ejecting charge and an ejecting charge mounted in said chamber, and with a time fuse for igniting said charge, after a predetermined time interval, with a flare casing mounted in said shell in front of said chamber, and a parachute in front of said flare casing and connected thereto, whereby the center of gravity of said shell is brought near said base, causing said shell to turn end for end at the beginning of its flight and continue thereafter substantially base foremost.

1,782,292. FLARE. LOUIS L. DRIGGS, Jr., Tippecanoe City, Ohio, and HENRY B. FABER, New York, N. Y. Filed Nov. 12, 1929. Serial No. 406,671. 8 Claims. (Cl. 102—24.)

1. A projectile for signalling or illuminating purposes, comprising a cylindrical shell serving as a loading chamber, a cap closing the rear end of said shell, an igniting charge enclosed in said cap, and a time fuse mounted in said cap and projecting into said igniting charge, a transverse partition secured t the interior of said shell near the center thereof, a tube projecting rearwardly from said partition, and an ejecting charge and quick match contained in said tube, a flare composition and an igniting composition mounted in said shell and surrounding said tube, a gas check mounted in front of said partition, a plug closing the forward end of said shell, stiffening means interposed between said gas check and said plug, a parachute mounted in said shell with said stiffening means, the cable for said parachute having its one end secured to said shell and the other end secured to the parachute stays.

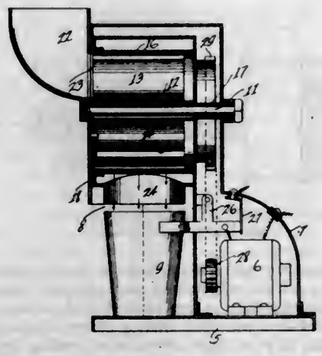


1,782,293. SNAP-FASTENER STUD. FRANK M. ELLIOTT, Detroit, Mich. Filed Mar. 28, 1930. Serial No. 439,621. 5 Claims. (Cl. 24—219.)

1. A stud for snap fasteners including a drive screw having a screwthread upon the shank portion thereof, a

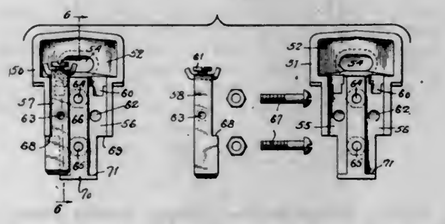
sleeve member formed of soft metal through which sleeve said drive screw is driven to cause said screw thread to cut into the soft metal of the sleeve and rigidly secure said sleeve and screw together, and a head on said sleeve member for separable snapping engngement with a socket member.

1,782,294. METHOD AND APPARATUS FOR TORPEDO-FIRING OPERATIONS. CHARLES LOUIS FLORISSON, Becon-les-Bruyeres, France, assignor to Societe de Condensation et d'Applications Mecaniques, Paris, France. Filed June 13, 1928, Serial No. 285,182, and in France June 28, 1927. 6 Claims. (Cl. 181—26.)



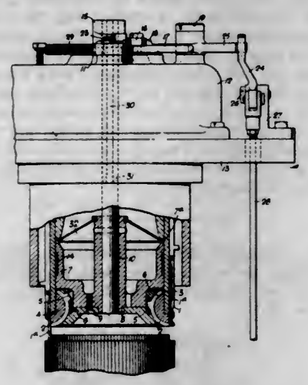
1. The process for conducting the firing of torpedoes which comprises sending, on board of the first vessel, towards the target vessel, elastic submarine waves, receiving the echo thereof, causing the course of said waves to be automatically recorded on a reduced scale, while they travel, repeating said successive operations at intervals whereby the relative disposition of both vessels is drawn on a reduced scale and the speed of the target vessel may be calculated therefrom for deducing the firing data for the torpedo.

1,782,295. MANUFACTURE OF CERAMIC PRODUCTS. VICTOR MORITZ GOLDSCHMIDT, Oslo, Norway. Filed Dec. 11, 1928, Serial No. 325,377, and in Germany Aug. 18, 1927. 12 Claims. (Cl. 25—156.)



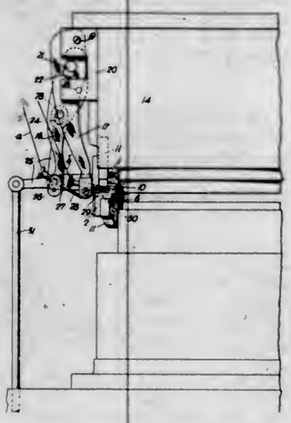
1. A process for the manufacture of ceramic products, in which mixtures of magnesium hydro-silicates, with the exception of talc, with substances rich in magnesium are used, then heating the mixtures to temperatures at which magnesium ortho-silicate is formed without fusion.

1,782,296. ICE-SHAVING DEVICE. ADOLPH O. GOLDSTEIN, Santa Cruz, Calif., assignor to Sno-Ko Inc., Santa Cruz, Calif., a Corporation of California. Filed Aug. 16, 1929. Serial No. 386,287. 1 Claim. (Cl. 83—62.)



In a device of the character described, a base, a housing positioned on said base, a drum rotatably supported in said housing, a motor supported on said base, said drum being adapted to be rotated by said motor, a recess formed in said housing, a hopper secured to said housing and adapted to feed ice to the interior of said drum, said drum being provided with slots, blades carried by said drum and positioned adjacent said slots, a discharge spout adapted to receive shaved ice from said drum and deposited in a glass positioned within said recess, and a baffle immovably held within said drum, said baffle having arms extending into close proximity with the knives carried by said drum.

1,782,297. ATTACHMENT PLUG AND RECEPTACLE. GILBERT W. GOODRIDGE, Fairfield, Conn., assignor to The Bryant Electric Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Mar. 16, 1925. Serial No. 16,008. 13 Claims. (Cl. 173—330.)

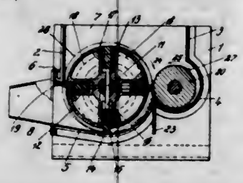


1. A plug receptacle comprising an insulating body recessed to form a well with contact chambers on opposite sides thereof, the top walls of said chambers and side walls thereof facing the well being apertured to accommodate entering plug blades.

1,782,298. CIRCULAR-KNITTING MACHINE. THOMAS SCOTT GRIEVE, Leicester, England. Filed Nov. 19, 1926, Serial No. 149,393, and in Great Britain Nov. 21, 1925. 10 Claims. (Cl. 66—106.)

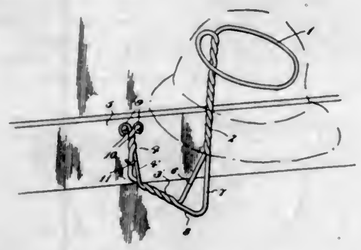
1. In a circular rib knitting machine, rib and plain needle cylinders co-axially opposed, needles operable in said cylinders for rib and plain knitting, said machine operating with rotary motion and also with reciprocating motion during which latter the knitting yarn slackens; a circular series of web holding elements arranged in the rib cylinder for projection outwards between the rib needles to hold the knitted web against the loop drawing action of said needles, and means whereby said elements can be withdrawn inwards to such extent as to avoid contact with the slack yarn during reciprocatory knitting action of the machine.

1,782,299. YARN-FEEDING MEANS FOR CIRCULAR-KNITTING MACHINES. THOMAS SCOTT GRIEVE, Leicester, England, assignor to T. Grieve & Co. Limited, Leicester, England. Filed Mar. 15, 1929, Serial No. 347,398, and in Great Britain Mar. 31, 1928. 10 Claims. (Cl. 66—137.)



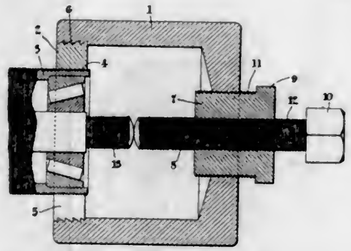
1. In a circular knitting machine, co-axial needle cylinders and cam boxes, a series of needles and means for feeding yarns in plating relation, comprising a pair of fingers pivoted on the rib cam box, the pivot for each finger being disposed so that upon operation of the fingers to change the positions of the yarns the ends which deliver the yarns move substantially radially towards and away from the needles, the path of movement being a substantially horizontal arc.

1,782,300. ALUMINUM ALLOY. HORACE CAMPBELL HALL and TENNYSON FRASER BRADBURY, Derby, England, assignors to Rolls-Royce Limited, Derby, England. Filed Oct. 23, 1929, Serial No. 401,970, and in Great Britain Dec. 18, 1928. 1 Claim. (Cl. 75—1.)



An aluminum alloy formed by compounding the elements, and that in relative quantities respectively within the ranges set out below:—copper 0.5 to 5.0 per cent of the whole, magnesium 0.1 to 1.7 per cent of the whole, nickel 0.2 to 1.5 per cent of the whole, iron 0.6 to 1.5 per cent of the whole, silican .55 to 2.8 per cent of the whole, titanium up to .3 per cent of the whole, manganese up to .3 per cent of the whole, aluminum the remainder, only traces of other elements.

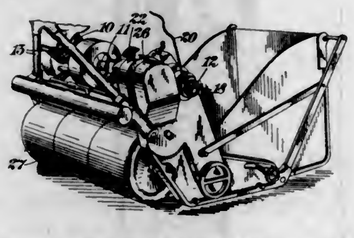
1,782,301. STRING MOLDING PRESS. KARL HÄNDLE, Muehlacker, Germany. Filed Sept. 12, 1929, Serial No. 392,141, and in Germany Sept. 29, 1928. 10 Claims. (Cl. 25—45.)



1. String molding press for pasty masses, especially brick-material, comprising a casing open on top with plane cross walls, partly curved side walls, a nozzle, a rotary drum nearly filling up the said casing, slides adapted to move in longitudinal slots of the said drum and being smaller than the width of the said slots, and guide paths provided on the cross walls of the casing and adapted to move the said slides during the rotation of the said drum out against the curved portion of the side walls and back again into the said drum.

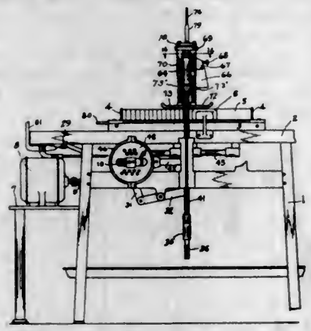
1,782,302. HAT HOLDER. JANE C. HARVEY, Miami, Fla. Filed Oct. 16, 1929. Serial No. 400,035. 1 Claim. (Cl. 211—32.)

A hat holder comprising a strand of wire bent to form a loop and a standard extending downwardly from said loop and having an arm at its lower end terminating in an attaching portion adapted to be secured against a support and mount the holder with the standard upright, the portions of the strand forming the standard, arm and attaching portion being twisted together below the loop and in spaced relation to the meeting ends of the arm and standard separated and one extended downwardly and then inwardly to form the lower portion of the standard and outer portion of the arm and the other extending downwardly at a rearward incline to form a brace for the standard extending diagonally between the arm and standard, the strands being then again twisted together to form the intermediate portion of the arm and again separated and one strand extending rearwardly and then upwardly to form the rear portion of the arm and lower portion of the attaching portion and the other strand extending rearwardly at an upward incline to form a brace extending between the arm and attaching portion, the strands being then twisted together to form the upper portion of the attaching portion and having their ends bent to form eyes disposed close to the attaching portion at opposite sides thereof and adapted to bear against the support and prevent the arm and standard from swinging about the attaching portion.



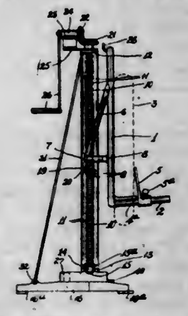
1,782,303. DEVICE FOR REMOVING WHEELS OR OTHER ELEMENTS FROM THEIR BEARINGS. JOHN STEVENSON IMLACH, Ottawa, Ontario, Canada. Filed Feb. 13, 1928. Serial No. 254,146. 1 Claim. (Cl. 29—85.)

A device for removing wheels or other elements, comprising a hollow cylindrical cap member, there being a screwthreaded hole at one end of said member, a screwthreaded sleeve provided with a central bore mounted in said hole, a bolt mounted in said central bore in said sleeve and having a screwthread of shorter pitch than the outer thread on the sleeve, and a split, annular



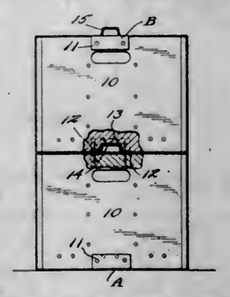
adapter member fitted in the opposite end of the cap member, there being means provided on said annular adapter member cooperating with the cap member to contract said adapter member to embrace an element to be removed.

1,782,304. STARTING DEVICE FOR MOTOR-DRIVEN MACHINES. ARTHUR ERNEST JERRAM, Leicester, England. Filed Nov. 21, 1927, Serial No. 234,863, and in Great Britain Dec. 22, 1926. 6 Claims. (Cl. 56—25.)



1. A motor-driven movable machine of the kind described comprising in combination, a low-lying shaft adapted, upon rotation, to start the motor of the machine, a flexible tie having one end wound on a part operatively connected with said shaft and adapted to be pulled to rotate the shaft, and a relatively fixed support for a foot of the operator so secured to the machine as to steady the latter whilst the operator is pulling the tie, and as to enable the operator to use his muscular strength to advantage.

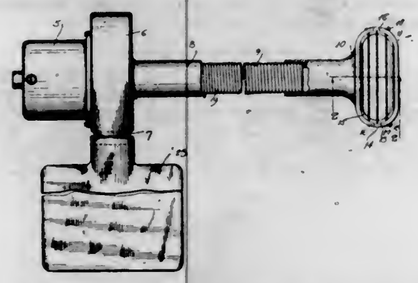
1,782,305. CUTTING MACHINE. WILLIAM E. KAY, Elyria, Ohio. Filed Sept. 4, 1925. Serial No. 54,472. 8 Claims. (Cl. 107—21.)



6. In a machine for cutting an elongated block of plastic material, such as ice cream or the like, into a plurality of equal sized cakes, the combination with a machine bed having a longitudinally extending guide, of a carriage longitudinally movable on the bed and adapted to support the material to be cut, an upright cutter support extending upwardly from the bed, and a cutter element journaled for vertical reciprocating in the support and comprising a transverse blade vertically reciprocable through the material, common driving means for the carriage and the reciprocating cutter comprising a ratcheting mechanism for advancing the carriage by a step by step movement on the guide and a rocker arm for operating the cutter, means for variably effecting the step by step movement of the carriage on the guide comprising a ratcheting device, an arm for operating the ratcheting device, and an adjustable connection between the common driving means and the arm, said adjustable connection comprising a pair of superposed plates, a plurality of separately alignable apertures through the plates, a pin insertable through any pair of aligned apertures, one of said plates adapted to be rotated by the common driving means, the other of said plates being joined to the end of the arm and forming an eccentric drive thereof by motion communicated from the rotatable plate, and controlling means for the common driving means comprising a trip mechanism, said trip mechanism comprising a lever arm, a spring therefor, a clutch interposed between the common driving means and the mechanism of the machine, connections adapted to communicate motion from the arm to the clutch to actuate it to disassociate the common driving means from the mechanism, said spring tending to move the clutch to open position and trip means comprising an element carried by the carriage and an element carried by the bed at an end thereof, adapted to release said arm from a clutch actuating position thereof, and manually restoring means for said mechanism, comprising a handle on the lever.

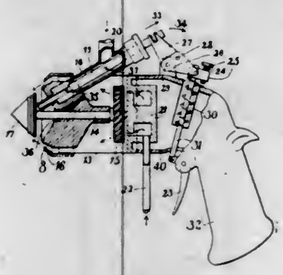
1,782,306. MEANS OR APPARATUS FOR LIFTING MOTOR VEHICLES AND THE LIKE THROUGH THE MEDIUM OF THEIR WHEELS. JOSEPH ADOLPH GEORGE KIRSTEN, East London, South Africa. Filed May 9, 1928, Serial No. 276,386, and in the Union of South Africa May 20, 1927. 5 Claims. (Cl. 214—1.)

4. Apparatus for lifting motor vehicles through the medium of their wheels, comprising a cradle for the wheel, and a lifting jack to which the cradle is pivotally connected and by which it can be raised and lowered, said jack being pivotal about its base and having a stay loosely connected at one end to the base and adapted detachably to engage the frame of the jack to render the jack structure rigid, the cradle including a frame to be placed against the outside of the wheel, having inwardly extending lower parts which project beneath the wheel, adjustable stops on said parts adapted to engage the inner side of the wheel, and bearings fixed to said frame for pivotally engaging with the part of the jack which is raised and lowered, as set forth.



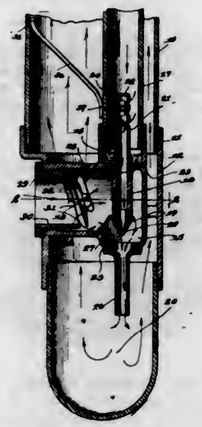
1,782,307. CRATE ATTACHMENT. DELPHIS A. LAGASSÉ, Fall River, Mass. Filed Mar. 28, 1927. Serial No. 179,040. 1 Claim. (Cl. 217—13.)

The combination with a container having recesses at opposite ends, plates secured to the ends of the container,



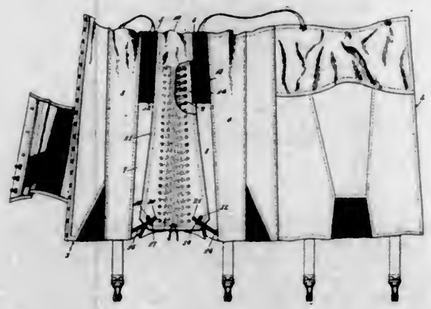
certain of said plates forming one wall of the recesses, flanges extending at right angles from the edges of the plates, and offset portions provided in the intermediate portions of the flanges, the offset portions of certain of the plate flanges extending into the recesses and the offset portions of the other plate flanges being adapted to be received within the offset portions of the first referred to flanges of another receptacle.

1,782,308. PNEUMATIC CLEANING TOOL. FREDERICK LUCKENSMEIER, Reedsburg, Wis. Filed Apr. 22, 1926. Serial No. 103,898. 1 Claim. (Cl. 119—84.)



In a vacuum cleaner, an attachment consisting of a head adapted to be connected to a vacuum creating instrumentality, the said head having a rim with seats formed therein in spaced relation to each other, a frame of the general contour of the inner surface of the rim having lugs fitting in the seats of the rim, means extending through portions of the rim and said lugs for securing the lugs to the rim, elements extending parallel to each other and spaced apart on and carried by the frame, and dust dislodging elements on said elements.

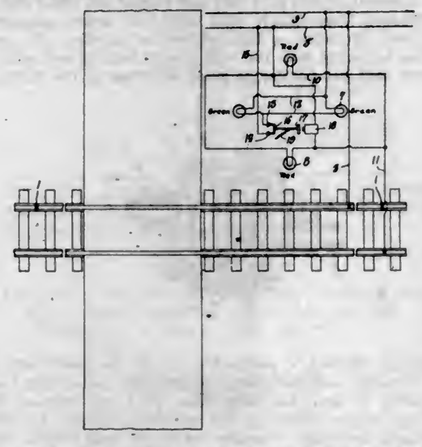
1,782,309. LIQUID-SPRAYING DEVICE. KARL LUDWIG, Hamburg, Germany, assignor to "Hundertfeuer" Gesellschaft für Moderne Hautentechnik mit beschrankter Haftung, Hamburg, Germany. Original application filed Aug. 31, 1927, Serial No. 216,637, and in Germany Aug. 31, 1926. Divided and this application filed Oct. 31, 1928. Serial No. 316,305. 10 Claims. (Cl. 91—45.)



1. A liquid spraying device of the air brush type comprising a closed hollow body, having an air exit at its front end, means for admitting air under pressure to said body, a rotary mechanical atomizer at the front end of said body adjacent said air exit, means for projecting material to be sprayed onto said rotary atomizer, and a rotor within said body and driven by the compressed air therein and having driving connection to said rotary atomizer.

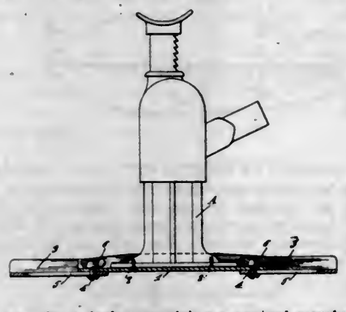
1,782,310. WELL PUMPING APPARATUS. JOHN T. OVERSTREET, San Antonio, Tex. Filed Nov. 19, 1926, Serial No. 149,430. Renewed May 13, 1930. 10 Claims. (Cl. 103—260.)

1. A device of the character described comprising a suction chamber having a depending portion in the bottom thereof of reduced size and an opening in said depending portion, a tube depending from the upper wall of said chamber in line with said opening and terminating at a point adjacent said opening, a tube connected to said depending tubular member for supplying liquid under high pressure so that it will be forced from the tubular member through the opening, a valve for permitting entrance of liquid in said chamber upon the creation of suction therein, and an outlet pipe in communication with said opening in said chamber.



1,782,311. CORSET. ISIDORE PANES, New York, N. Y. Filed Jan. 2, 1930. Serial No. 418,074. 3 Claims. (Cl. 2—40.)

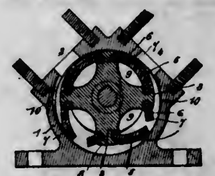
3. A corset comprising a body provided at the front with disengageable fastening means, a panel structure at the back, said panel structure including a pair of strips of non-elastic fabric extending from the bottom of the body to near the top thereof, each of said strips being connected along one edge to said body, lacing for drawing the other edges of said strips toward each other, a covering strip wider at the bottom than at the top and extending from the top to the bottom of said body positioned to cover said lacing, said covering strip being narrower than the combined width of said pair of strips, a panel of elastic fabric at each side of the upper part of said covering strip extending from the top of said body to a point below the top of said pair of strips, said elastic panels being connected respectively to said covering and



to said body, and a pair of disengageable elastic members for holding the lower part of said covering strip centrally of said pair of strips.

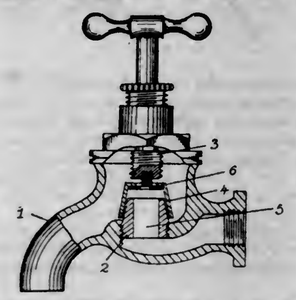
1,782,312. RAILROAD-CROSSING SIGNAL. FRANK PAYNE, Biltmore, N. C. Filed Apr. 9, 1930. Serial No. 442,873. 2 Claims. (Cl. 246—128.)

1. A railroad crossing signal system comprising a lamp casing having a pair of chambers therein, windows in the walls of each chamber visible to persons approaching the crossing, a red lens in each of the windows of one chamber, a green lens in each of the windows of the other chamber, a lamp in each chamber, circuits for the lamps, means whereby the circuit of the lamp in the chamber having the red lenses in its windows is closed by a train approaching the crossing and the circuit of the other lamp is opened and means for closing the last mentioned circuit and opening the other circuit when the train passes the crossing.



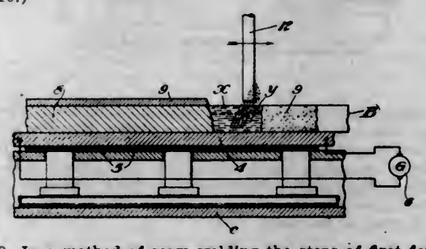
1,782,313. ADJUSTABLE BASE FOR AUTOMOBILE JACKS. ALFRED F. POEHLS, Algoma, Wis. Filed Oct. 30, 1929. Serial No. 403,562. 2 Claims. (Cl. 254—1.)

1. A base for a jack comprising a central member adapted to be fastened to the base of the jack, a side member at each end of the central member and means for slidably connecting the side members with the central member.



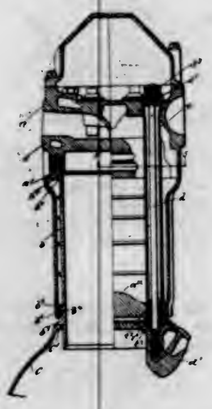
1,782,314. ROTARY PUMP OF THE OSCILLATING-BLADE TYPE. LOUIS ILDEVERT POIRMEUR, Meru, France. Filed Sept. 25, 1929, Serial No. 395,139, and in France Oct. 5, 1929. 6 Claims. (Cl. 103—140.)

1. A rotary machine comprising a bored stator, a rotor adapted to rotate eccentrically inside the stator bore and to remain in contact with the wall thereof along a predetermined generatrix, a fluid inlet and a fluid outlet on either side of said generatrix, a series of blades pivotally secured to the rotor and adapted to open in a given direction and to come into contact with the wall of the bore



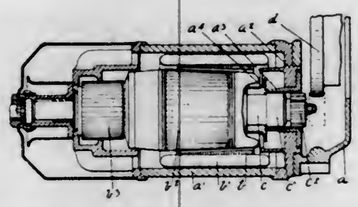
and a series of cylindrical shutters provided with a yielding cover at their outer edge pivotally secured to the rotor and adapted to rotate in the opposite direction and to come into fluid-tight engagement with the wall of the bore throughout the length thereof when they arrive near the generatrix of contact of the stator bore.

1,782,315. WATER TAP. JOHN POWELL, Salop, England. Filed Nov. 14, 1928, Serial No. 319,803, and in Great Britain Feb. 24, 1928. 2 Claims. (Cl. 251—159.)



1. In a water tap, in combination, a screw spindle, a thimble, a headed screw for mounting said thimble on said spindle independently of the rotation thereof the head of said screw being located within the thimble, a tapped hole in the end of said spindle for receiving said screw, a nipple screwed into the tap body, and an aperture in said nipple, said thimble being adapted for opening and closing said aperture.

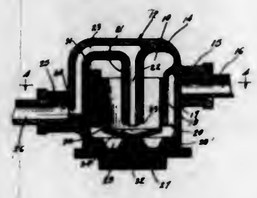
1,782,316. METHOD OF WELDING. BORIS S. ROBINOFF, Pittsburgh, and SUMNER E. PAINE and WRIGNOL E. QUILLEN, McKeesport, Pa., assignors to National Tube Company, a Corporation of New Jersey. Filed May 10, 1929. Serial No. 362,040. 8 Claims. (Cl. 219—10.)



8. In a method of seam welding the steps of first forming a groove along the seam to be welded, then depositing a body of flux in said groove, and then moving a metal electrode along said groove and drawing an arc causing said flux to melt and melting said electrode so as to deposit the molten metal from said electrode through said melted flux.

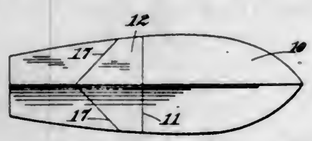
1,782,317. CYLINDER OF INTERNAL-COMBUSTION ENGINE. FREDERICK HENRY ROYCE, West Wittering, near Chichester, and ARTHUR JOHN ROWLEDGE, Ellerslie, Derby, and ALBERT GEORGE ELLIOTT, West Wittering, near Chichester, England. Filed Dec. 7, 1927, Serial No. 238,442, and in Great Britain Dec. 24, 1926. 2 Claims. (Cl. 123—173.)

1. In a multi-cylinder internal combustion water-cooled engine, a cylinder block having a single walled cooling jacket, and head and base portions all integrally cast of aluminum alloy, said head and base portions being recessed and having packing means associated therewith for seating steel cylinder liners therein, registering bolt holes formed in said head and base portions, fastening means passing through said bolt holes and connecting with a supporting crank-case, and aluminum tubes having gas and water-tight connections with said head and base portions surrounding said fastening means.



1,782,318. ELECTRICAL TURNING GEAR FOR STARTING INTERNAL-COMBUSTION ENGINES. FREDERICK HENRY ROYCE, West Wittering, near Chichester, England, assignor to Rolls Royce Limited, Derby, England. Filed Jan. 16, 1929, Serial No. 332,970, and in Great Britain Feb. 14, 1928. 2 Claims. (Cl. 74—7.)

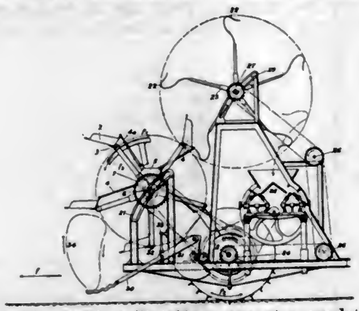
1. Electric turning gear for starting internal combustion engines of the type in which a pinion fixed for rotation on an extension of the armature shaft of a starting motor is caused to move axially into engagement with a toothed wheel geared to the engine shaft, characterized in that normally the pinion is within the hollow of the end bearing of the motor shaft.



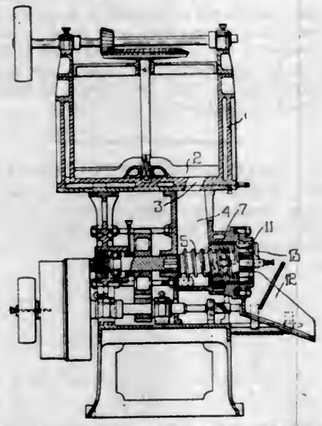
1,782,319. RADIATOR TRAP. ALBERT R. SCHOULTZ, Joliet, Ill. Filed May 3, 1929. Serial No. 360,206. 1 Claim. (Cl. 137—103.)

In a device of the class described, a housing providing a chamber interiorly thereof, a boss on said housing projecting downwardly into said chamber from the upper end thereof, said boss having a tapered end portion terminating in spaced relationship with the lower end of said chamber and having an outlet passage extending therethrough, means including a web portion providing an inlet passage terminating in spaced relationship to the lower end of said chamber, a substantially cup-shaped float having the upper end thereof open and including a body portion disposed around said boss and having the walls thereof disposed intermediate said inlet and outlet passages, said float including a tapered bottom portion, ribs extending inwardly from the wall of said housing and adapted with said web portion to guide said float in the vertical

movement thereof, a removable cap at the lower end of said housing and including an upwardly extending boss providing a seat for said float, said cap having an annular groove formed on the inner wall thereof adapted to collect sediment, whereby water of condensation entering said inlet passage will raise said float until the tapered bottom portion thereof engages the tapered end portion of said boss to prevent said water escaping through said outlet passage, and when the water in said chamber reaches the height of said float said float will be lowered onto said seat thereby causing a siphoning action in said outlet passage and permitting water to flow from said cup therethrough.



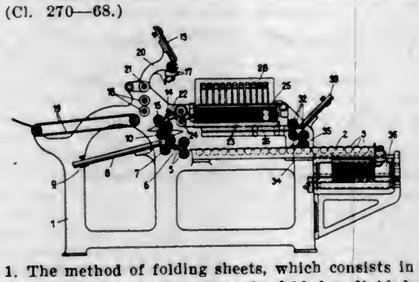
1,782,320. HULL OF WATER CRAFT. HUBERT SCOTT-PAINE, Southampton, England. Filed Oct. 15, 1929, Serial No. 399,813, and in Great Britain Nov. 30, 1928. 5 Claims. (Cl. 114—66.5.)



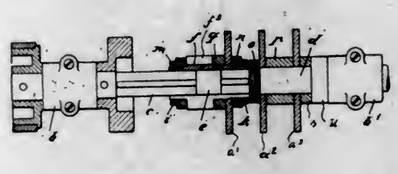
2. In watercraft of the type which has a stepped hull-bottom, a step-structure separately constructed as a box-like unit and shaped on the side coming into contact with the hull-bottom to the configuration of said hull-bottom and means whereby said unit can be detachably secured to said hull-bottom.

1,782,321. REAPING MACHINE. EUGENE EDMOND CHARLES SERRE, Paris, France. Filed Apr. 12, 1927, Serial No. 183,044, and in France May 1, 1926. 7 Claims. (Cl. 56—103.)

1. An agricultural machine for the automatic reaping of maize cobs from the stalks comprising a frame adapted to move over the ground, a spider member having a plurality of arms rotatably mounted on said frame, means for causing rotation of said spider member, bucket members carried by each of said arms and oscillatable means rotatably mounted in said bucket members for resiliently and positively gripping the said cobs and detaching the same from their stalks, means for rotating and for causing oscillation of said oscillatable member, and means for normally holding said oscillatable means at a pre-determined distance above the bucket members and for limiting the angle of movement toward the bucket.

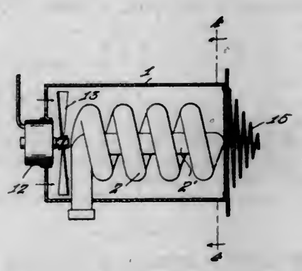


1,782,322. MOLDING MACHINE. ALBERT WILLIAM SIZER, Hessle, England. Filed Sept. 3, 1929. Serial No. 390,163. 1 Claim. (Cl. 18—12.)



A continuous molding machine for plastic material comprising in combination a compression chamber, a die plate closing said chamber, a feed worm body mounted to rotate within said chamber of lesser diameter than said chamber for the major proportion of its length, a shallow helical flange on said feed worm body merging at the delivery end into a flange of diameter equal to the internal diameter of said compression chamber.

1,782,323. CROSS-FOLDING MACHINE. GEORG SPIESS, Leipzig-Plagwitz, Germany. Filed Apr. 25, 1927, Serial No. 186,338, and in Germany May 7, 1926. 18 Claims. (Cl. 270—68.)

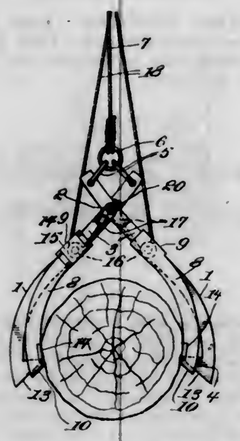


1. The method of folding sheets, which consists in folding an undivided sheet, cutting the folded undivided sheet transverse to the fold into smaller folded sheets, feeding the smaller folded sheets to a common cross-folder and cross-folding the same, and then feeding the sheets so cross-folded to another cross-folder and further cross-folding the same thereby.

1,782,324. SHAFT COUPLING. KARL TESSKY, Esslingen-on-the-Neckar, Germany. Filed June 30, 1925, Serial No. 40,650, and in Germany July 21, 1924. 4 Claims. (Cl. 287—110.)

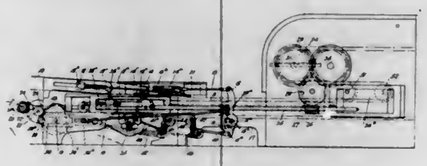
1. The combination with a pair of aligned shafts arranged in sufficiently spaced relation to enable attachment and removal of devices adapted to be operated by said shafts, of a split coupling device threaded at each end and provided intermediate its threads with an annular flange, a clamping nut for each end correspondingly threaded, the thread of the sleeve being formed at one side of its crest with a relatively wide face inclining upwardly away from the flange at a relatively small acute angle with relation to the longitudinal axis of the sleeve whereby to produce compressive action upon the sleeve when the clamping nut co-acts with the flange and at the other side with a narrower reaction face forming a relatively large acute angle.

1,782,325. VEHICLE HEATER. GEORGE N. THOMAS, Mankato, Minn. Filed Apr. 24, 1929. Serial No. 357,776. 2 Claims. (Cl. 257—241.)



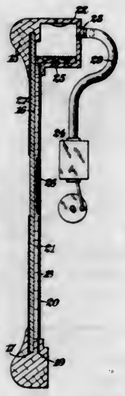
1. A device of the class described comprising a casing having one end entirely open and in direct communication with the interior of a vehicle, a coil in said casing, means for leading the exhaust gases from the engine of the vehicle through the coil, a valve for controlling such means, a fan at the other end of the casing for forcing the air from the casing into the interior of the vehicle, and a deflector at the outlet end of the casing for evenly distributing the air therefrom into the vehicle, said deflector being of spiral form and of conical shape.

1,782,326. HOISTING TONGS. WALTER E. TORNQUIST, Hoquiam, Wash. Filed Mar. 13, 1930. Serial No. 435,568. 4 Claims. (Cl. 294—112.)



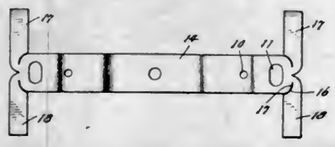
1. A hoisting tongs comprising a pair of crossed arms which are pivotally connected and which have their outer

ends arched inwardly and formed at their ends with inwardly projecting prongs, a pull line connected to the upper ends of the arms for swinging the prongs toward each other, a channeled member in which the arched and pointed ends of the prongs are received, each of said



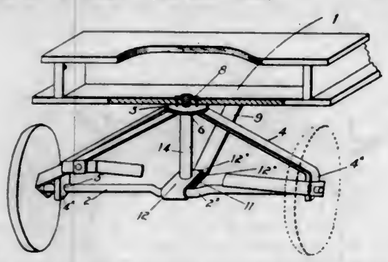
members having an opening in the inner face thereof for the passage of the prongs therethrough, each of said members having its opposite end closed, lines connected to the pivot for the arms of the prongs, sneave wheels on the sides of the closed ends of the members to which the lines are trained and a cable connected to the lines.

1,782,327. BISCUIT-MAKING AND THE LIKE MACHINE. EDWARD LYNTON VICARS, Earlestown, England, assignor to T. & T. Vicars Limited, Earlestown, England. Filed Dec. 11, 1925, Serial No. 74,725, and in Great Britain Dec. 17, 1924. 8 Claims. (Cl. 107—7.)



1. A biscuit making machine comprising an oven, an endless oven conveyor moving at a uniform rate of speed through the oven, three sets of guide wheels over which the conveyor runs at the feeding end whereby it is given a first reversal of direction at the first set, a second reversal at the second set and a third reversal at the third set, means to couple said first and second sets to move together in a direction parallel to the flight of the conveyor between them, a stationary bearing for the third set, a rotating shaft, and means operated by said shaft to move said first and second sets whereby to produce alternately apparently decreased and increased movements of the flight of conveyor between them, and including a cam, a lever, a link operated from said cam and pivotally connected to said lever to move the same, a device connected to said coupling means and including an actuator link pivotally connected to said lever for moving said first and second sets, and means provided on said lever to vary the point of pivoting of said actuator link thereon whereby to change the distance of movement of said first and second sets.

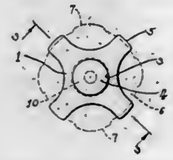
1,782,328. DISPLAY APPARATUS AND METHOD OF OPERATING THE SAME. GORDON AUGUSTUS WEARHAM, London, England. Filed May 21, 1929, Serial No. 364,854, and in Great Britain May 23, 1928. 21 Claims. (Cl. 40—28.)



3. Display apparatus comprising a container having one wall constituting a window, and liquid constituting a screen situated in the container so as to be visible through the window, in combination with means operating by fluid pressure arranged to vary the amount of liquid situated in the line of vision through the window.

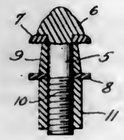
1,782,329. METHOD OF MAKING MOUNTING ELEMENTS WITH PLASTER EARS. BENJAMIN C. WEBSTER, Southport, Conn., assignor to The Bryant Electric Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Oct. 8, 1929. Serial No. 398,181. 4 Claims. (Cl. 113—119.)

1. The method of making a plaster ear on a mounting element which comprises forming a slit in the end of a piece of strap stock, notching the piece in its side edges in the region of the inner end of the slit and bending an end part, thus formed by the slit, outwardly substantially in the plane of the piece.



1,782,330. CHILD'S WAGON. JOHN WERLICH, Preston, Ontario, Canada. Filed May 18, 1929. Serial No. 364,133. 1 Claim. (Cl. 280—113.)

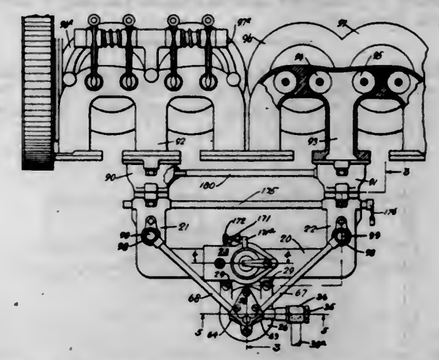
In a wagon, the combination with a wagon body having a fifth wheel member secured to the end face thereof, a



transverse bolster bar, a fifth wheel member secured to the bolster bar in contact with the aforesaid fifth wheel member said bolster bar having vertical ends, an axle extending diametrically of the fifth wheel and at its ends through the vertical portions of the bolster, and having a central portion offset, a bolt extending through the wagon body and members of the fifth wheel bolster and depending at its lower end in central alignment with the axle, a clip extending around the offset portion of the axle and through which the bolt also extends, a brace extending from the clip rearwardly to the body of the wagon, and a spacing sleeve extending between the fifth wheel and the clip.

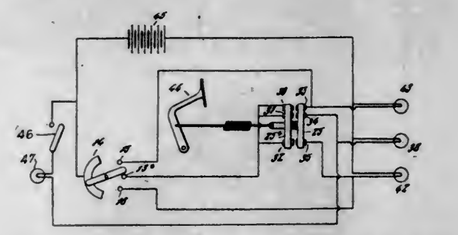
1,782,331. LENS ATTACHMENT FOR EYES. BENJAMIN L. WILHELM, Chicago, Ill. Filed June 8, 1928. Serial No. 283,844. 6 Claims. (Cl. 88—54.)

1. A device of the type described comprising a lens, and means for securing said lens to an eyeball, said securing means adapted to be disposed between the muscles of said eyeball.



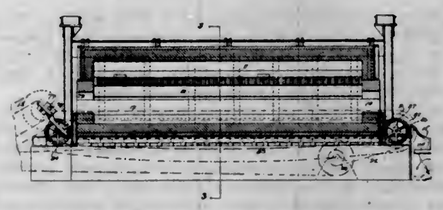
1,782,332. EMBALMER'S PLUG. CHARLES L. ARNOLD, Shelbyville, Ky. Filed Mar. 25, 1930. Serial No. 438,801. 1 Claim. (Cl. 27—1.)

In a device of the class described, a body portion comprising an inner section and an outer section, said inner section being constructed of hard rubber material, a head at one end of the inner section, said head presenting a shoulder, a soft rubber washer positioned against the shoulder, a sleeve engaging the soft rubber washer to hold the washer in position against the shoulder, a soft rubber washer engaging the opposite end of the sleeve, and a sleeve threaded on the inner section and engaging the last mentioned washer to hold the first mentioned sleeve and washer in position.



1,782,333. CHARGE-FORMING DEVICE FOR INTERNAL-COMBUSTION ENGINES. FRED E. ASELTINE, Dayton, Ohio, assignor, by mesne assignments, to Delco Products Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Jan. 26, 1925. Serial No. 4,665. 80 Claims. (Cl. 123—52.)

1. A charge forming device for an internal-combustion engine comprising, in combination: an air conduit having an air inlet and communicating with the intake port of an engine cylinder; a fuel-relay chamber adjacent the cylinder intake; means for delivering a charge of liquid fuel to said relay chamber; a venturi in the conduit having a constricted throat portion in communication with the relay chamber whereby fuel is directed from said chamber into the venturi at its constricted throat portion; and means for delivering a portion of the fuel



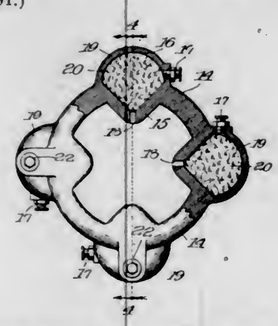
charge in the relay chamber into the venturi at a point between the constricted throat portion and the cylinder intake.

1,782,334. COMBINED LIGHT AND SIGNAL. OMER R. AURAND, Shamokin Dam, Pa. Filed Jan. 28, 1927. Serial No. 164,279. 1 Claim. (Cl. 177—337.)

In a vehicle signalling device, directional signal lamps, a stop lamp, a pilot lamp, a source of electrical energy in a circuit with the lamps, said pilot lamp being in a series circuit with the stop lamp to normally retain the latter partly illuminated, a switch for controlling the said series circuit to act as a tail lamp, a switch in the first mentioned circuit and carried by the steering wheel of a vehicle to selectively illuminate the directional signal lamps, and a vehicle controlling pedal operated switch in the first mentioned circuit to illuminate the stop lamp to full brilliancy and the directional signal lamps simultaneously therewith to indicate a stop.

1,782,335. FURNACE CONVEYER. GEORGE F. BEACH, Philadelphia, Pa., assignor, by mesne asignments, to Ryan, Scully & Company, Philadelphia, Pa., a Corporation of Delaware. Original application filed Apr. 8, 1926, Serial No. 100,681. Divided and this application filed June 1, 1927. Serial No. 195,766. 15 Claims. (Cl. 198—189.)

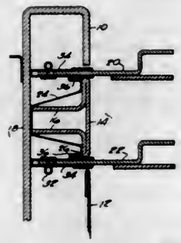
1. A furnace conveyer comprising a flexible belt, and a plurality of attachments therefor providing successive



overlapping blades, the upper edges of which are adapted to constitute supporting surfaces, said blades being twisted to present an inclined face to the line of movement of the belt.

1,782,336. SHIRT COLLAR. HUGO BEZNER, Grossingersheim, Germany. Filed Aug. 23, 1927, Serial No. 214,882, and in Germany June 30, 1927. 3 Claims. (Cl. 2—129.)

1. A turn-down starched collar including a body portion, a neckband portion, and a visible mark on one of said portions extending substantially the length of the collar and longitudinally thereof, said mark being formable into a straight line before the collar is ironed to indicate the proper position in which the portions of the collar are to be ironed in order to provide a space between said portions, after the folding thereof, through which a necktie is easily slidable.

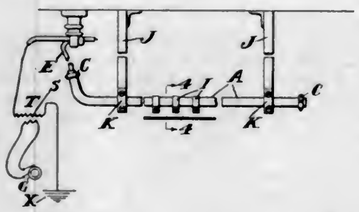


1,782,337. MEANS FOR LUBRICATING CONNECTERS. BENJAMIN S. BURRELL, East Chicago, Ind. Filed Apr. 14, 1928. Serial No. 270,070. 2 Claims. (Cl. 64—91.)

1. A wobbling coupler construction comprising a rotatable drive member, a rotatable member to be driven thereby, and a rotatable coupler member encircling at its ends the ends of the others of said members and having inwardly extending projections at which said coupler member has wobbling driving connection with each of said first and second-named members, said coupler member containing a lubricant chamber in radial alinement with one of said projections and opening into the joints between said coupler member and said first and second-named members for supplying lubricant to the driving and driven surfaces of said members.

1,782,338. SEALING MECHANISM FOR METAL WINDOWS. HARRY E. CAMPBELL, Baltimore, Md., assignor to Campbell Metal Window Corporation, Baltimore, Md., a Corporation of Maryland. Filed Aug. 3, 1929. Serial No. 383,190. 3 Claims. (Cl. 189—65.)

1. In a window of the type having jambs, openings through the inner walls of the jambs, a parting strip forming part of the inner jamb wall between such openings, separate enlarged chambers back of such openings and sashes having plates adapted to extend through such openings, members movable vertically with the sash plates and held substantially in contact with such plates in such a way as to permit relative transverse movement between the two, and members attached in the jamb adapted to contact with the rear wall of the parting strip and having a portion extending back into the

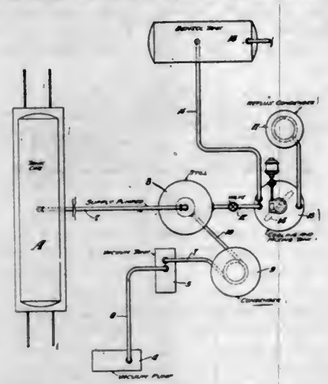


jamb substantially parallel with the sash plates and adapted to engage such movable sash members to make a seal between the sashes and the parting strip and also to draw the sashes towards the parting strip.

1,782,339. SHADE AND SCREEN FOR DOORS, WINDOWS, AND THE LIKE. ANTHONY CAMPOBASSO, Chicago, Ill. Filed Oct. 4, 1928. Serial No. 310,366. 4 Claims. (Cl. 156—10.)

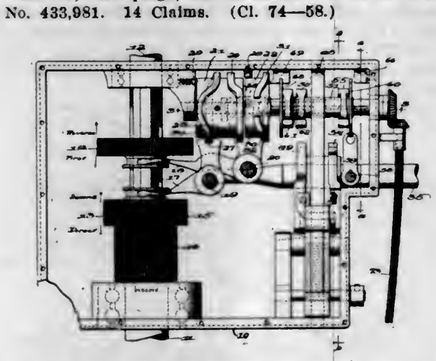
3. In a screen construction, a connecting link having looped ends, and a spirally formed tubular member having yielding, overlapping edges for receiving said link, the looped portions of said link being larger than the diameter of said spirally formed tubular member.

1,782,340. DISCHARGE BAR FOR NEUTRALIZING STATIC ELECTRICITY. WILLIAM HENRY CHAPMAN, Portland, Me., assignor to Chapman Electric Neutralizer Company, Portland, Me., a Corporation of Maine. Filed Apr. 6, 1929. Serial No. 353,219. 6 Claims. (Cl. 175—264.)



5. A discharge bar for neutralizing static electricity comprising a conductor bar, a compressible insulating sheath thereon, a capacitively coupled sleeve, means for clamping it about the bar, and a resiliently mounted discharge point connected to said sleeve and comprising a conic spirally coiled base and a tip member projecting therefrom.

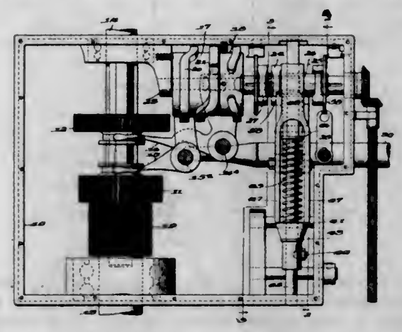
1,782,341. COATING COMPOUND. STANTON I. CHARLESWORTH and ARCH W. HARRIS, Cleveland, Ohio. Filed Feb. 4, 1927. Serial No. 165,870. 2 Claims. (Cl. 134—51.)



1. A coating compound adapted to form a hard resinous coating on metal or other surfaces, comprising a resin base consisting of the residue remaining after the distilling, up to 300 degrees centigrade under approximately

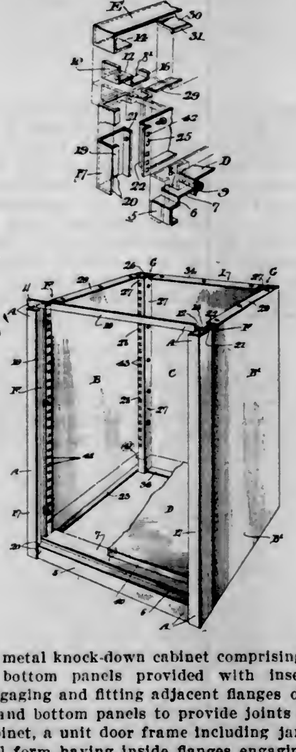
28 inches of vacuum, of the pure still residue remaining after the distillation of the light oils recovered from by-

product coke oven gas, said resin base being mixed while molten and hot with approximately 30 per cent. by weight of benzol or other light oil products.



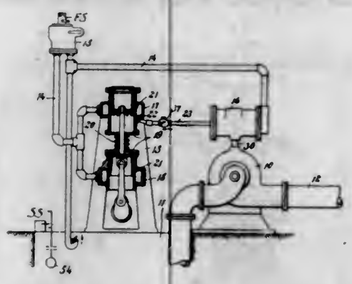
1,782,342. TRANSMISSION MECHANISM. DONALD C. DOBBINS, Champaign, Ill. Filed Mar. 7, 1930. Serial No. 433,981. 14 Claims. (Cl. 74—58.)

1. In combination with a shiftable change speed gearing, a clutch and a clutch control pedal therefor; of a gear shifting mechanism comprising an actuator operatively connected to said clutch pedal, means for automatically preselecting speed gear shifting for forward speed increasing drive, means for manually preselecting speed gear shifting for reverse and forward speed decreasing drive, means adapted for engagement by said actuator for progressively shifting said gearing in any preselected order or direction through a series of successive speeds to and from neutral position automatically upon successive depressions of said pedal, and means controlled by the initial movement of depression of said pedal for holding said clutch out of engagement, and upon final movement of depression of said pedal for causing said actuator to engage said shifting means.



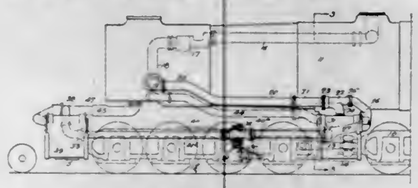
1,782,343. TRANSMISSION MECHANISM. DONALD C. DOBBINS, Champaign, Ill. Filed Apr. 21, 1930. Serial No. 446,007. 20 Claims. (Cl. 74—58.)

1. In a shiftable change speed gearing including shiftable gears, a clutch therefor, means for shifting said gears successively into engagement with different speed and direction gears, cam means for said shifting means, a foot pedal, and connections associated with said foot pedal for effecting disengagement of said clutch upon initial depression of said pedal and effecting shifting of said gears to neutral position upon final depression of said pedal, means for effecting shifting of said gears to the next progressive speed upon initial release of said pedal and engagement of said clutch upon final release



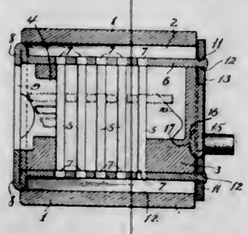
thereof and after engagement of said driving gears has been established, said last named means being operable to shift said gears through successive speeds automatically without manual preselection for forward drive.

1,782,344. KNOCKDOWN METAL CABINET. GLENN T. GOURLEY, Youngstown, Ohio, assignor to General Fireproofing Company, Youngstown, Ohio, a Corporation of Ohio. Filed July 12, 1926. Serial No. 121,970. 4 Claims. (Cl. 312—141.)



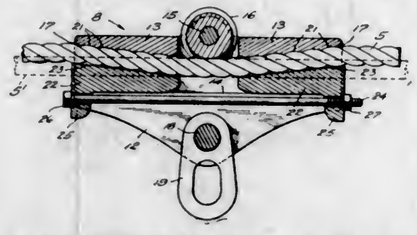
2. In a metal knock-down cabinet comprising back, side, top and bottom panels provided with inset marginal flanges engaging and fitting adjacent flanges of said back, side, top and bottom panels to provide joints lying inside of the cabinet, a unit door frame including jamb members of channel form having inside flanges engaging the front edge flanges of the sides, a lintel member having flanges engaging the flanges of the top, and a sill member having flanges engaging the flanges of the bottom.

1,782,345. CENTRIFUGAL-PUMP-PRIMING SYSTEM. OTTO HAENTJENS, Hasleton, Pa. Filed May 18, 1929. Serial No. 364,189. 3 Claims. (Cl. 103—113.)



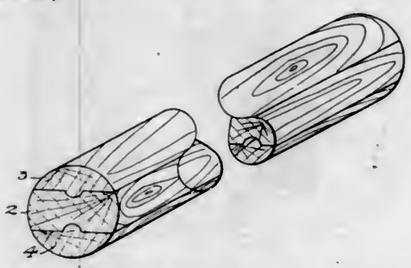
1. In combination, a centrifugal pump, suction priming means therefor including a conduit leading from the pump casing, a valve in said conduit adapted to be closed by pump pressure and suction-operated means tending to hold said valve open.

1,782,346. STEAM PIPE FOR LOCOMOTIVES. HENRY K. HARWICK, Darby, Pa. Filed May 10, 1929. Serial No. 362,089. 3 Claims. (Cl. 105—47.)



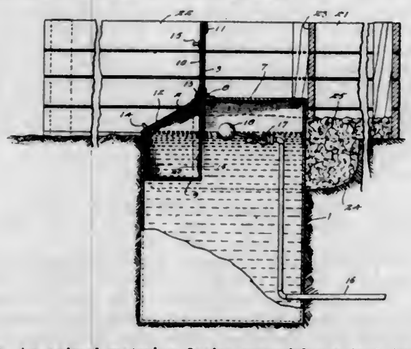
1. The combination in a high pressure simple "mallet" locomotive, of a front frame and a rear frame pivotally connected; a cylinder saddle on each frame; a cylinder secured to each side of each saddle; a live steam pipe extending from one cylinder saddle to the other; and two live steam pipes extending from the smoke-box end of the boiler to the cylinders on the rear frame, said pipe having an outside T coupling, one branch of the T being directly connected to the valve chest of a cylinder, the other branch of the T extending to the rear of the saddle and communicating with the pipe leading from the rear cylinder structure to the forward cylinder structure.

1,782,347. CYLINDER LOCK. FREDERIC K. HEYER, Stamford, Conn., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Filed Oct. 13, 1926. Serial No. 141,302. 12 Claims. (Cl. 70—46.)



1. A plug structure for a cylinder lock, comprising a core member, a reinforcing member surrounding the same, said reinforcing member being independent of said core member and a cam plate secured to said reinforcing member and having connection with the core member, whereby said members are rotatable together.

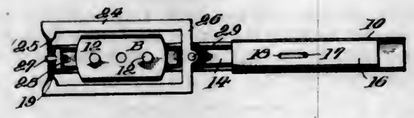
1,782,348. PULLEY CARRIER FOR GUY LINES. SEYMOUR W. HILLIER, Sultan, Wash., assignor of one-half to James Headrick, Sultan, Wash., and one-fourth to G. G. Startup, Sultan, Wash. Filed Sept. 17, 1928. Serial No. 306,453. 10 Claims. (Cl. 254—190.)



1. In a pulley carrier adapted to be secured to a supporting cable, said carrier comprising longitudinally spaced block elements having upwardly and outwardly diverging grooves in the lower face and plate elements depending in parallel relation from the sides thereof, cable engaging means carried between said plates at both ends of the carrier, said means being arranged for movement longitudinally of the carrier and adapted to cooperate with said block elements for deflecting the cable upwardly into angularly engaged relation with the carrier.

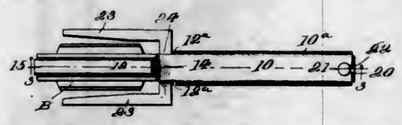
1,782,349. SPEAR POLE FOR REMOVING PAPER FROM THE ROLLERS OF PAPER-MAKING MACHINES. RAY B. HULL, near Dayton, Ohio. Filed Nov. 23, 1929. Serial No. 409,385. 3 Claims. (Cl. 93—38.)

1. A laminated soft wood spear pole for removing paper from the clogged up rollers of a paper making machine.



1,782,350. STOCK WATERER. FERDINAND M. HUPP, Clearwater, Nebr. Filed Dec. 28, 1929. Serial No. 417,158. 5 Claims. (Cl. 119—73.)

1. An animal watering device comprising a tank having a portion of the top thereof cut away at an inclination,

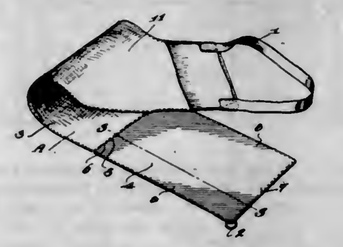


an upstanding partition wall secured in the upper part of the tank and projecting downwardly thereinto, a receptacle arranged in the tank at the side of the wall adjacent the inclined part thereof, said receptacle constituting a drinking trough and having a back wall extending upwardly and formed to provide a supporting flange engaging over the top edge of the first mentioned wall, means for permitting water to flow from the tank into the receptacle, means for controlling the flow of water into the tank, a hinged cover for the receptacle, and a cover for the remaining part of the tank.

1,782,351. RAZOR-BLADE STROPPER. ROBERT H. INGERSOLL, New York, N. Y.; Charles S. Smith, Lansing, Mich., and Frederic C. Leubuscher, Essex Fells, N. J., executors of said Robert H. Ingersoll, deceased, assignors to Robt. H. Ingersoll, Inc., New York, N. Y., a Corporation of New York. Filed Sept. 16, 1926. Serial No. 135,915. 4 Claims. (Cl. 51—218.)

1. In a razor blade stropping device, a handle having a blade holder connected therewith, said holder including elements to support the blade rigidly with regard to the handle for stropping, one of said elements having its end bent out of plane, a rocking guard comprising a rigid frame and guard rods spaced from and parallel to the edges of the blade when in stropping position, a pivot pin supported in said bent end, and supporting said guard, and a journal for said guard fastened to said bent element adjacent the opposite end thereof.

1,782,352. RAZOR STROPPER. ROBERT H. INGERSOLL, New York, N. Y., assignor to Robt. H. Ingersoll, Inc., New York, N. Y., a Corporation of New York. Filed July 26, 1927. Serial No. 208,484. 5 Claims. (Cl. 51—218.)



5. In a razor blade holder, a pair of members each constituting an integral handle and blade holder element, one of said members having blade receiving and retaining lugs secured thereto and directed toward the other member, said members being pivoted together to move toward and from one another for placing a razor blade on and removing the same from said lugs, said members when together constituting a blade holder device for securing the razor blade in position, means to clamp said members together in operative position, and a guard pivotally mounted on one of said members on the side thereof adjacent the other member so that the guard pivot mounting is located between the members when clamped together, said members being spaced apart so that said guard may project therethrough, the portions of said members so spaced apart constituting stops to limit the rocking movement of said guard.

1,782,353. ZEOLITE. ALPHONS O. JAEGER and JOHANN A. BERTSCH, St. Louis, Mo.; said Jaeger assignor to The Selden Company, Pittsburgh, Pa., a Corporation of Delaware. Filed Apr. 6, 1926. Serial No. 100,116. 40 Claims. (Cl. 23—234.)

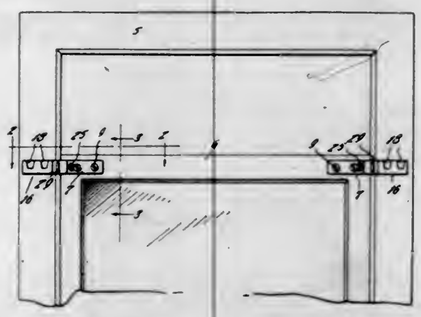
4. Zeolite bodies containing at least one catalytically active complex basic compound in non-exchangeable form and containing at least one nuclear acid component other than SiO_2.

22. The method of preparing zeolite bodies which comprises causing a complex compound of a base to react with nuclear acid forming components under conditions of zeolite formation, and decomposing at least a part of the complex compound by transforming it into a compound of lower degree of dissociation and eliminating this latter compound.

1,782,354. COTTON-PICKING SACK. WILLIAM R. KEENE, Ruleville, Miss. Filed June 12, 1928. Serial No. 284,828. 1 Claim. (Cl. 150—2.)

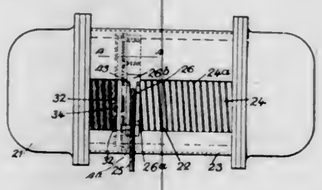
A cotton picking sack of canvas or like material whose lower end and bottom side is cut away and replaced with a corresponding strip of rubber which is stitched in place at its marginal edges.

1,782,355. FRUIT-PICKING BAG. PAUL V. KINNEY, Austin, Colo., assignor to MacIntyre-Fishback Mfg. Co., Pueblo, Colo., a Corporation of Colorado. Filed Nov. 17, 1928. Serial No. 320,160. 1 Claim. (Cl. 150—2.)



A fruit gathering garment including a body forming a blouse and provided with means for gathering the lower edge closely about the body of the wearer, a delivery tube extending from the lower front portion of the body and foldable forwardly and upwardly against the front of the body, buttons on the underside of said tube to lie in front of the tube upon the latter being folded upwardly, and tabs depending from the shoulder portions of the blouse and carrying loops engageable with said buttons.

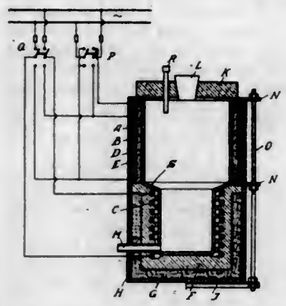
1,782,356. MANUFACTURE OF ACID DYESTUFFS OF THE PHENONAPHTHOSAFRANINE SERIES. PAUL LAEUGER, Basel, Switzerland, assignor to the Firm J. R. Geigy S. A., Basel, Switzerland. Filed Oct. 25, 1928, Serial No. 315,102, and in Germany Nov. 14, 1927. 5 Claims. (Cl. 260—29.)



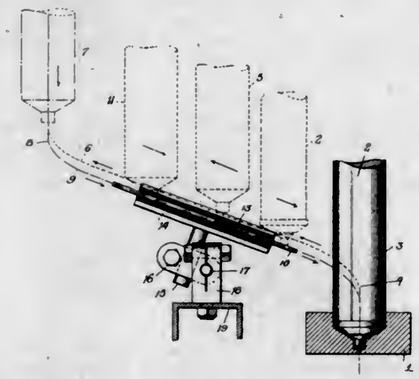
1. A process for the manufacture of acid dyestuffs fast to alkali of the phenonaphthosafranine series, consisting in condensing an unsymmetrical N-alkylated para-phenylene-diamine-sulphonic acid having a sulpho group in ortho-position with respect to the primary amino-group with a phenonaphthazonium sulphonic acid having an alkyl group attached to the mesoazine-nitrogen atom.

1,782,357. WINDOW-SHADE HOLDER. ARTHUR F. LAMOUREUX and PETER SELLAS, Norwich, Conn. Filed Dec. 18, 1928. Serial No. 326,737. 5 Claims. (Cl. 156—24.)

1. A device of the class described comprising a primary bracket member of L-shaped formation to provide an arm adapted to be secured to the upper rail of a sash and an arm projecting at right angles outwardly therefrom, and a secondary bracket member of L-shaped formation including one arm hollowed to telescope over said other arm of the primary bracket and another arm extending at right angles thereto and outwardly therefrom, means for supporting a window shade from the said other arm of the secondary bracket, said other arm of the secondary bracket including pockets, shanks having heads seated in the pockets, said shanks adapted to have curtain poles telescoped thereover, a screw threaded through said other arm of the primary bracket member for engaging a window frame frictionally.



1,782,358. WINCH DRUM. ANTON LANG, Feldkirchen, near Munich, Germany, assignor of one-half to Demag Aktiengeselischaft, Duisburg, Germany, and one-half to Maschinenfabrik Fr. Schülle & Co., Feldkirchen, near Munich, Germany. Filed Oct. 31, 1928, Serial No. 316,193, and in Germany Dec. 30, 1926. 2 Claims. (Cl. 242—158.)

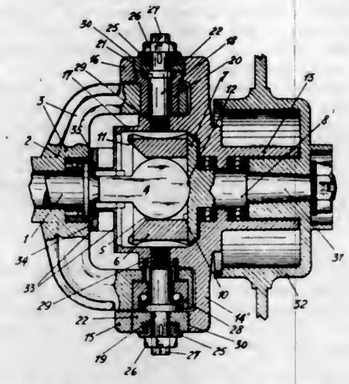


1. The combination with a winch drum having a groove in its periphery, of a rope guide having a part engaging said groove, said guide being movable axially of the drum as the latter rotates, means for preventing said guide from rotating with the drum, and a gripping ring bearing upon the rope coils adjacent the guide and rotatable with the drum, said ring being interlocked with the guide so as to move therewith axially of the drum.

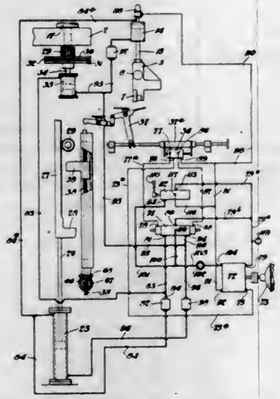
1,782,359. ELECTRIC MELTING FURNACE. FRANZ LINNHOFF, Eberswalde, Germany, assignor to Ajax Electrothermic Corporation, Ajax Park, Ewing Township, N. J., a Corporation of New Jersey. Filed Feb. 7, 1929, Serial No. 338,205, and in Germany Feb. 11, 1928. 7 Claims. (Cl. 266—1.5.)

6. In an electric furnace, a furnace shell having upper and lower charge receiving portions, heat insulation about the upper portions, a furnace inductor about the heat insulation, connections for supplying current to the inductor, a furnace resistor surrounding the lower portion of the furnace having relatively high resistance and correspondingly low inductive effect, heat insulation about the resistor confining the heat of the resistor against the furnace shell and connections for supplying electric current to the resistor.

1,782,360. AUTOMATIC STOP FOR EXTRUDING MACHINES. FRANK J. LYNCH, Hillside, N. J., assignor to The Sun Tube Corporation, Hillside, N. J., a Corporation of New Jersey. Filed Mar. 29, 1928. Serial No. 265,684. 7 Claims. (Cl. 192—125.)



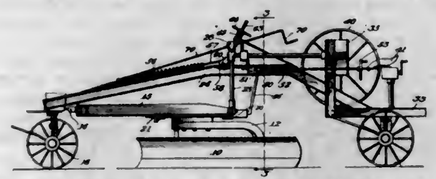
2. An automatic electrical stop for extruding machines provided with a plunger adapted to carry a metal object, including a switch interposed in the circuit of the motor of the extruding machine, an electro-magnetic structure for opening said switch and a circuit for said electro-magnetic structure, including a contact rail positioned near the path of movement of the plunger of the extruding machine whereby when a metallic object carried by the plunger contacts with said rail at any point said circuit will be closed.



1,782,361. FRONT-WHEEL-DRIVING JOINT WITH STEERING SWIVEL FOR MOTOR VEHICLES. CURT MATSCHEI, Wettingen, Switzerland. Filed Aug. 20, 1927, Serial No. 214,338, and in Switzerland Jan. 13, 1927. 2 Claims. (Cl. 180—43.)

1. In a motor vehicle a stub axle mount comprising in combination a steering swivel having a hub portion and a fork-shaped portion, threaded bores in the arms of the fork, hollow locking nuts positioned in said bores, pivot bolts arranged one in each of said nuts, teeth arranged in the inner portions of said nuts, a locking disk on each bolt having teeth in its outer circumference designed to engage with the teeth in its outer circumference designed to engage with the teeth of said nuts, a cylindrical casing on said swivel extending between said arms and provided with threaded openings in alinement with said threaded bores, said openings adapted to receive the free ends of said bolts.

CARNEGIE LIBRARY OF ATLANTA

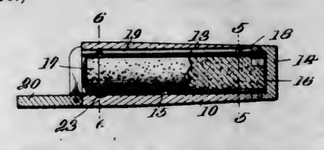


1,782,362. SHEARS. ARTHUR R. MCARTHUR, Gary, Ind.; Mattie Lee McArthur executrix of said Arthur R. McArthur, deceased. Filed Nov. 30, 1928. Serial No. 322,719. 5 Claims. (Cl. 164—56.)

1. An automatic cutting-up shear for shearing strips into a plurality of short lengths of equal weight, comprising a shear-head, hydraulic means for operating said shear-head, a plurality of feed-in rolls for feeding the strip to be sheared through said shear in a step-by-step manner, hydraulic means for operating said feed-in rolls, means operable by said feed-in roll operating means for releasing the fluid pressure to said feed-in roll operating means and for supplying fluid pressure to said shear-head operating means, and means operable by said shear-head for releasing the fluid pressure to said shear-head operating means and for supplying fluid pressure to said feed-in roll operating means.

1,782,363. LIFTING ATTACHMENT FOR ROAD GRADERS. ANDREW J. MONROE and GEORGE W. MONROE, Arthur, Ill. Filed Sept. 6, 1929. Serial No. 390,773. 1 Claim. (Cl. 37—156.)

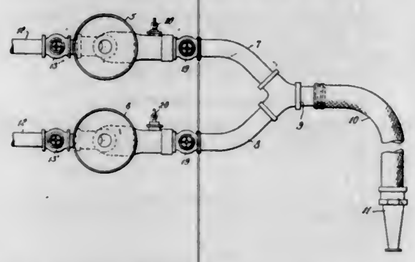
A lifting device for road graders including a main frame supported by wheels, an auxiliary frame movably mounted on the main frame, a blade carried by the auxiliary frame, means to raise and lower the blade, a spring secured to the main frame, a flexible element connecting the spring to the auxiliary frame, a bracket secured to the main frame and having an opening, an operating rod extending through said opening, a pulley carried by the rod and having the flexible element trained thereover, a hand wheel threaded to said rod and adapted to be adjusted towards and from the bracket, and tension means between the hand wheel and the bracket.



1,782,364. WRENCH. JOHN NATION, Highmore, S. Dak. Filed Oct. 26, 1928. Serial No. 315,243. 1 Claim. (Cl. 81—79.)

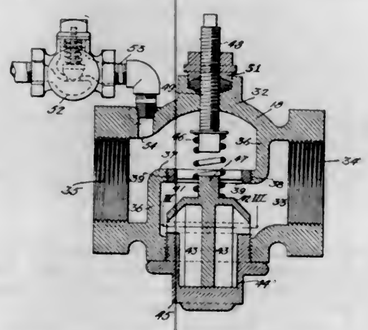
A wrench comprising, a pair of substantially parallel handle members having oppositely inclined anchor portions intersecting each other and pivotally connected together, one of said anchor portions merging at its forward end into a jaw member extending in a plane substantially parallel to the longitudinal plane of the handle member with which the anchor portion merging into the jaw member is formed, said jaw member being formed at its forward end with an upturned portion whereby the jaw member is provided with an angular gripping face disposed forwardly of and in spaced relation to the anchor portion merging thereinto, teeth provided on the upturned portion of said gripping face, the other of said anchor portions merging at its forward end into a jaw member extending in a plane substantially parallel to the longitudinal plane of the other handle member and having a flat face formed adjacent its forward end with an angular recess to provide an angular gripping face at the forward end of said last named jaw member and merging into the flat face thereof in spaced relation to the inclined anchor portion merging thereinto.

1,782,365. LIP-STICK HOLDER. GORDON W. NELSON and ALBERT F. CERES, Jr., Philadelphia, Pa. Filed Sept. 27, 1929. Serial No. 395,603. 8 Claims. (Cl. 206—56.)



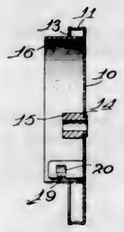
1. A holder for rouge stick or the like comprising a casing having an open end and a closure therefor hinged to said casing, a rouge stick carrier within said casing, said closure effective when opened to form a guide or guard projecting longitudinally from the open end.

1,782,366. METHOD OF AND APPARATUS FOR PRODUCING FIRE-EXTINGUISHING FOAM. WALTER PALMER, Chester, Pa., assignor to Amdyco Corporation, New York, N. Y., a Corporation of New York. Filed Oct. 7, 1925. Serial No. 61,004. 4 Claims. (Cl. 169—15.)



1. The method of producing and delivering fire-extinguishing foam which consists in establishing separate

streams of water in suitable conduits, continuously and simultaneously delivering from separate and external sources by the suction effect produced by the streams a dry material including as a reacting chemical only an acid reagent into one stream and a dry material including as a reacting chemical only a basic reagent into the other in proportions substantially constant with respect to each other and to the flow of water, one of the reagents including a foam-stabilizer, mingling the separate streams to permit initial reaction of the acid and basic reagents thereby producing foam, and conveying the mixture of foam and undissolved particles of the reagents through a conduit to the point of discharge of the foam.

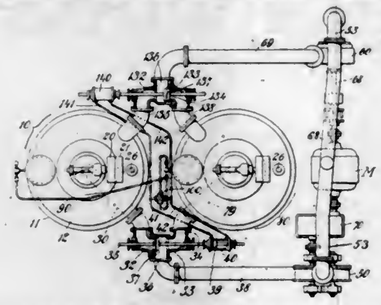


2. An apparatus for producing fire extinguishing foam, comprising at least two conduits communicating with a common source of water supply for conducting water toward a point of discharge, one of the conduits having a sole hopper from which a dry foam reagent is delivered directly into the flowing water in the conduit, an ejector for causing the dry reagent to be drawn into the water by suction, hopper means from which another dry foam reagent and a foam stabilizer are delivered directly into the flowing water in another of the conduits, and ejector means for causing said second dry reagent and the stabilizer to be drawn into the water in the conduit by suction, the hopper and ejector and the hopper means and ejector means including means to effect the delivery of the reagents in proportions substantially constant with respect to each other and to the flow of water, said conduits converging together and being joined into a single conduit at the side of the hoppers opposite to the water supply to permit the initial intermingling of the reagents in the presence of the foam stabilizer.

1,782,367. OVERFLOW VALVE FOR STEAM HYDRAULIC SYSTEMS. WILLIAM H. RIDGWAY, Coatesville, Pa., assignor to William H. Ridgway and Ellis B. Ridgway, Coatesville, Pa. Original application filed June 1, 1923, Serial No. 642,800. Divided and this application filed Jan. 20, 1927. Serial No. 162,386. 2 Claims. (Cl. 277—61.)

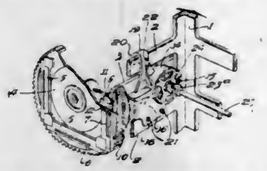
1. A valve comprising a valve casing having a passageway terminating in inlet and outlet openings, a partition having an opening therein intercepting said passageway, said partition being formed to constitute a valve seat, the portion of said casing beneath said opening being provided with a pocket, a valve element having one end slidably mounted in said pocket and the other end provided with a valve disk normally spaced from said valve seat, means for resiliently maintaining said valve disk in said last-mentioned position, the valve element being actuated to cause said valve disk to engage said valve seat only when the pressure of a fluid medium supplied to said valve inlet opening exceeds a predetermined value, and a check valve communicating with the atmosphere and having an operative connection with said casing immediately adjacent to said outlet opening for avoiding vacuum effects on the operation of said movable valve element.

1,782,368. RADIO TUNING MECHANISM. CHARLES SCHEIBEL, Chicago, Ill., assignor to Crowe Name Plate & Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed Aug. 13, 1930. Serial No. 475,025. 8 Claims. (Cl. 116—124.3.)



1. A radio drum tuning dial having a concaved peripheral edge.

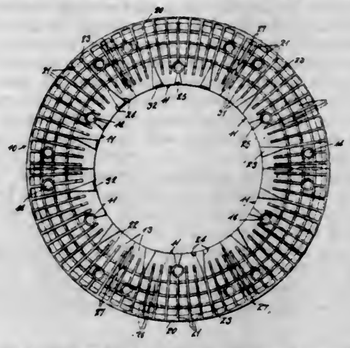
1,782,369. GARAGE-RAMP SYSTEM. HORACE L. SMITH, Jr., Richmond, Va., assignor, by mesne assignments, to Auto Ramps Corporation, Richmond, Va., a Corporation of Virginia. Filed Nov. 30, 1926. Serial No. 151,754. 3 Claims. (Cl. 20—1.13.)



1. In a garage building superimposed horizontal storage floors spaced to provide full head room between the successive floors, a ramp structure providing separate automobile driveways for ingress to and egress from the successive floors of the building, said ramp structure comprising two superimposed substantially continuous helical driveways having a common vertical axis, the outer radius of said driveways being just greater than the turning radius of greatest amplitude of the cars the building is designed to accommodate, the inner radius of said ramps being just less than said turning radius, and the middle lines of said driveways being throughout the length of the driveways at the same distance from the vertical axis, said distance being such that automobiles can traverse the length of the ramp without change in the position of their steering wheels.

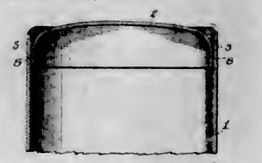
1,782,370. APPARATUS FOR PREPARING VISCOUS MIXTURES. WILLIAM LEIGH SMITH, Brandywine Summit, Pa., assignor to The Viscose Company, Marcus Hook, Pa., a Corporation of Pennsylvania. Filed Aug. 17, 1929. Serial No. 386,727. 9 Claims. (Cl. 259—1.)

1. In an apparatus for preparing viscous mixtures, the combination of a plurality of mixing tanks, an outlet valve adapted to let the mixtures flow out of any one of said tanks, outlet conduits leading from said tanks to said outlet valve, a pump, a conduit leading from said valve to said pump, a grinding mill, a reentry valve adapted to direct the mixtures back into any other of said tanks, a conduit leading from said pump to said mill and a conduit leading from said mill to said reentry valve, conduits leading from said reentry valve to said tanks, one of said tanks also having a valved discharge conduit, said conduits and valves being constructed and operable in such a way that the mixture may be lead through said apparatus as many times as desired.



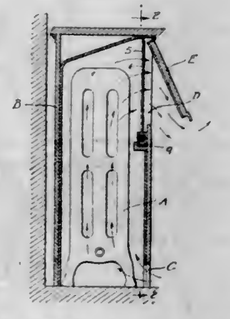
1,782,371. MOLD-COOLING DEVICE FOR LINE-CASTING MACHINES. SAMUEL E. SPERRY, Hollis, N. Y., assignor to Intertype Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Oct. 5, 1929. Serial No. 397,627. 9 Claims. (Cl. 199—56.)

1. In a line casting machine having a mold provided with a cavity for casting type bars therein, an air blower having a discharge mouth opposite to the rear face of the mold for directing a blast of air against the rear face of the mold substantially in the plane of the mold cavity.



1,782,372. BURR PLATE. WILLIAM M. TOMASHEK, Winona, Minn., assignor to Winona Attrition Mill Company, Winona, Minn., a Corporation of Minnesota. Filed Aug. 15, 1929. Serial No. 386,030. 5 Claims. (Cl. 83—3.)

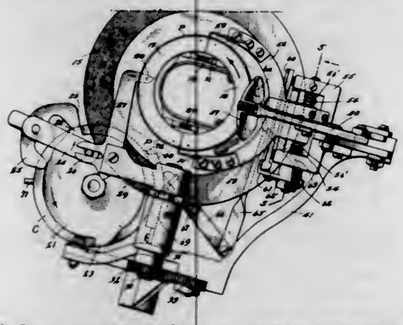
1. A burr plate comprising an annular member having a peripheral flange and a plurality of relatively closely spaced radial ribs flush with the edge of said flange, the surface of said member sloping outwardly to the outer edge of said flange, a plurality of circular ribs extending between said radial ribs, of less height than said



radial ribs and describing circles unbroken except by intersection by radial ribs, certain of said radial ribs having circumferentially widened inner ends.

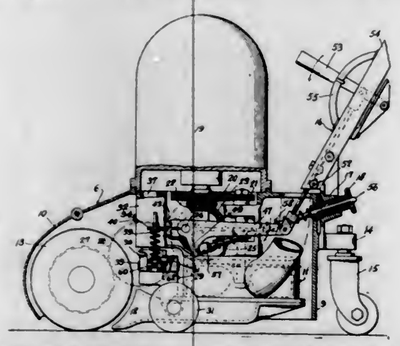
1,782,373. METHOD OF WELDING COPPER BOILER HEADS. ALBERT H. TRAGESER and LOUIS HASSINGER, New York, N. Y., assignors to John Trageser Steam Copper Works, Maspeth, N. Y., a Corporation of New York. Filed Oct. 29, 1929. Serial No. 403,333. 4 Claims. (Cl. 219—10.)

1. The method of welding and brazing the head on a copper boiler, consisting in fitting the head into the end portion of the shell and boiler, so that part of the shell of the boiler will project beyond the head, supplying a quantity of spelter solder in the pocket provided between the projecting portion of the shell and the head, and then applying heat by an electric torch to the portion of the shell projecting beyond the head, said torch being maintained in position until a large part of the projecting portion of the shell is melted and all of the solder melted and caused to merge into one substantially homogeneous mass with the edge portion of the shell and the edge portion of the head.



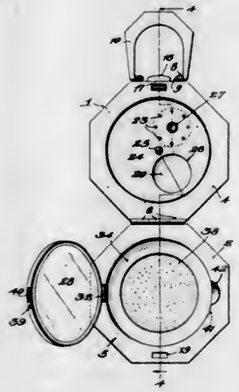
1,782,374. AIR-FILTERING DEVICE FOR HEATING APPARATUS. JOHN A. WALLS, Baltimore, Md. Filed Mar. 12, 1929. Serial No. 346,442. 1 Claim. (Cl. 183—51.)

In an apparatus of the character described and for the purpose set forth, a casing including front, rear and



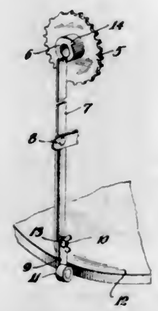
side walls, the front wall having a cold air intake opening adjacent its lower end and a heated air outlet opening adjacent its upper end and means arranged within one of said openings for filtering and treating the air circulated therethrough, said means comprising a foraminous absorbent filtering panel and a receptacle in which the lower end of the filtering panel is immersed for absorbing a liquid contained in the receptacle, means for removably supporting the filtering panel in juxtaposition to the heated air outlet opening and the receptacle consisting of a supporting frame for the panel formed at its upper end with laterally projecting trunnions, the said side walls of the casing adjacent the upper ends of the heated air outlet opening having inwardly extending grooves for receiving the trunnions and a closure element hinged to the casing adjacent the upper end of the opening for intersecting the grooved portions of the side walls when the closure element is in a normal position, whereby to retain the panel frame and panel against accidental displacement.

1,782,375. LOOP RETAINER AND MECHANISM THEREFOR. LOUIS N. D. WILLIAMS, Ogontz, Pa., and HARRY SWINGLEHURST, Jr., Brooklyn, N. Y., assignors to Scott & Williams, Incorporated, New York, N. Y., a Corporation of Massachusetts. Filed Sept. 11, 1928. Serial No. 305,206. 19 Claims. (Cl. 112—27.)



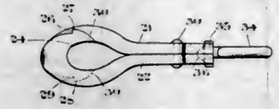
1. In a looping machine, a foldable segmental point carrier and a loop retainer adapted to extend transversely of said carrier between the end points of the carrier segments, said retainer comprising an end portion adapted to extend on the fabric side of the points above and below the level of the tips of the points.

1,782,376. ROTARY DRUM MACHINE. HARRY H. WOLFE and HARRY L. MYERS, Toledo, Ohio, assignors to The American Floor Surfacing Machine Company, Toledo, Ohio. Filed Jan. 12, 1928. Serial No. 246,198. 8 Claims. (Cl. 51—176.)



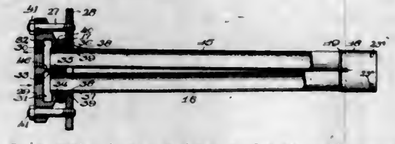
8. In a surfacing machine of the class described, a body, a horizontal rotary surface treating drum mounted on the forward end portion of the body, a guiding and supporting caster swivelly mounted on the rear end portion of the body, a motor supported on top of the body between the caster and drum, a handle fastened to the rear end portion of the body adjacent said caster, a wheeled truck, and mounting and adjusting means for the truck connected to the body and serving to permit the truck to be gradually adjusted in a step by step manner, together with spring means associated with the truck and said mounting means to aid in the adjustment of the truck and render the truck substantially self-leveling.

1,782,377. VANITY CASE. LOUIS A. ANDERSON, Attleboro, Mass., assignor to R. & G. Company, Attleboro, Mass. Filed May 8, 1929. Serial No. 361,323. 7 Claims. (Cl. 132—83.)



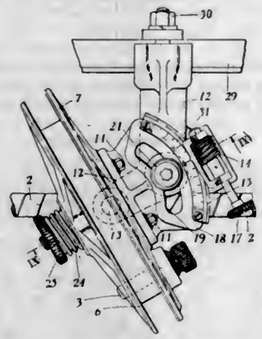
1. In a vanity case, a member having a mirror seat, and having spaced struck-out ears which extend upwardly from said member and which form an opening, a pin headed at its ends into engagement with the ears, and a mirror frame receivable on said seat and formed with an extension which is received in said opening and which is rolled about said pin in the space between the ears.

1,782,378. ALARM DEVICE. EMIL BAHR, Dean, Mont. Filed Oct. 18, 1927. Serial No. 226,876. 1 Claim. (Cl. 58—14.)



A releasing mechanism for a phonograph record by a clock at a predetermined time, comprising a friction roller normally serving as a brake to retard the movement of the record, a link to which said roller is attached, a lever, a wing nut for clamping said link, normally to said lever, allowing upon its release the normal playing of said record, a cam connected with the works of said clock having a shoulder formed therewith, adapted to be engaged by the upper end of said lever at a certain predetermined time, and a pivot for said lever intermediate its ends allowing a swinging of the lever thereabout to release the brake roller from said record upon engagement of its upper end with the cam shoulder to gradually wake a sleeper by the playing of said record.

1,782,379. SNAP HOOK. WILLIAM R. COOPER, Huntingdon, Quebec, Canada, and HERBERT QUICK, New York, N. Y. Filed Feb. 11, 1929, Serial No. 339,120. Renewed Oct. 16, 1930. 6 Claims. (Cl. 24—232.)



1. A snap hook comprising a pair of pivotally connected shank members each having an eye at one end and a hooked portion at the other end substantially at right angles to the transverse axis of the eyes, an eye bolt passing through recesses formed in the eye portion, and a nut having a curved surface fitting into a curved recess in the eye adapted to force the members together when load is applied to the hook portions.

1,782,380. UNRESTRICTED-RETURN WATER HEATER. WALTER A. DALEY, Chicago, Ill., assignor to Bell & Gossett Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 23, 1927. Serial No. 186,061. 6 Claims. (Cl. 257—248.)

1. In a water heater a heat exchange unit comprising a group of tubes one end of which tubes being united in a casing, comprising a deformed length of tubing with a closure for its rear end and the other ends of which tubes are united by a transverse plate.

1,782,381. MEANS FOR THE APPLICATION OF INSULATING MATERIAL IN THE FORM OF STRIPS TO ELECTRIC CONDUCTORS. PERCY DUNSHEATH, London, England, assignor to W. T. Henley's Telegraph Works Company, Limited, London, England, a British Company. Filed Apr. 22, 1930, Serial No. 446,368, and in Great Britain May 10, 1929. 5 Claims. (Cl. 117—41.)

1. Apparatus for applying material in the form of strip to an electric conductor, comprising a carrier for a flat coil of the material, a guide round which the strip passes from the coil to the conductor, means for supporting said carrier and guide in fixed relation to each other and rotatable about the conductor, said supporting means comprising a pivotal mounting of the coil and guide providing adjustment of their positions by turning about an axis which is radial to the conductor and which passes through a point at which the strip makes contact with the conductor as it comes from the guide.

1,782,382. PROCESS FOR THE MANUFACTURE OF PAPER FROM PLANT FIBER. HEINRICH EGGERS, Bremen-Weser, Germany, assignor of five per cent to Alexander Orgovan and five per cent to Otto S. Leszay, New York, and five per cent to Irving Matusoff, Brooklyn, N. Y. Filed Jan. 4, 1929, Serial No. 330,413. Renewed Oct. 17, 1930. 4 Claims. (Cl. 92—13.)

1. A process for making paper from the fibrous material of plants, which process consists of subjecting the said material, together with a mixture of waste paper and powdered chalk to the action of a solution of caustic soda in a closed converter and under a greater than atmospheric pressure.

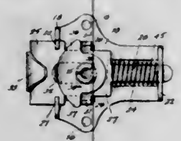
1,782,383. HEAT-INSULATING MATERIAL AND PROCESS OF MANUFACTURE. HAROLD W. GREIDER, Plymouth Meeting, Pa., assignor to The Philip Carey Manufacturing Company, a Corporation of Ohio. Filed Feb. 19, 1926. Serial No. 89,494. 16 Claims. (25—155.)

2. Heat insulation material molded under pressure with expulsion of water in filter-molds from a semi-fluid water mix before substantial setting of the ingredients of the mix by chemical reaction, comprising finely-divided solid ingredients thickly interspersed with minute dried bubbles of a gaseous emulsion, the material surrounding the multiplicity of voids created in said insulation by said dried bubbles containing minute quantities of a film-forming and stabilizing agent.

7. In a process of making heat insulation material wherein finely-divided solid ingredients are mixed with water to form a semi-fluid mix, air or other gas being introduced in water of the mix prior to molding the mix, the mix is molded in filter-molds under pressure with expulsion of water, and the molded forms are thereafter dried, the step comprising including in water of the mix a gas-emulsifying agent and emulsifying said gas when introduced in said water of the mix so as to form a stable gaseous emulsion of minute pressure-resisting bubbles in said mix prior to molding said mix, a multiplicity of said bubbles of emulsified gas being substantially retained during said molding under pressure in filter-molds and a multiplicity of thickly interspersed minute voids being created in the dried product by said retained bubbles of said gaseous emulsion.

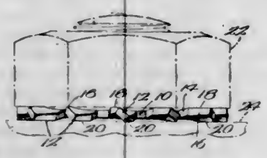
1,782,384. POROUS MATERIAL AND THE MANUFACTURING PROCESS THEREOF. HAROLD W. GREIDER, Plymouth Meeting, Pa., assignor to The Philip Carey Manufacturing Company, a Corporation of Ohio. Original application filed Apr. 18, 1928, Serial No. 271,108. Divided and this application filed June 27, 1929. Serial No. 374,273. 4 Claims. (Cl. 18—47.5.)

2. The process of making molded heat insulation material of high micro-porosity comprising mixing light finely-divided and/or fibrous inorganic materials with water to form a semi-fluid or plastic water mix, dissolving alkali in the water of mix, generating gas therein by incorporating finely-divided calcium carbide coated with an oily, resinous, waxy, or organic fatty acid substance, forming a relatively stable foam of minute bubbles containing said gas stabilized by the bubble-forming and stabilizing agent formed by the reaction of the oily, resinous, waxy, or organic fatty acid substance with the alkali of the mix, and molding the mass under pressure with expulsion of water from the mold.



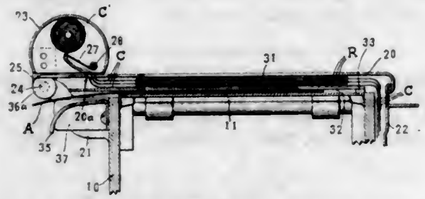
1,782,385. TOY AIRPLANE. WILLIAM KRAMER, Richmond Hill, N. Y., assignor to Ideal Aeroplane & Supply Co., Inc., New York, N. Y., a Corporation of New York. Filed June 26, 1929. Serial No. 373,732. 9 Claims. (Cl. 46—50.)

7. The combination, in a top airplane, of a fuselage composed of spaced side walls of stiff material, said walls having slots therein, and a series of sheet metallic bulkheads fitted between said walls, said bulkheads provided with flanges to lie against said walls, and tongues cut from said flanges to penetrate the slots through said walls, and to clamp against the outer surfaces of said walls.



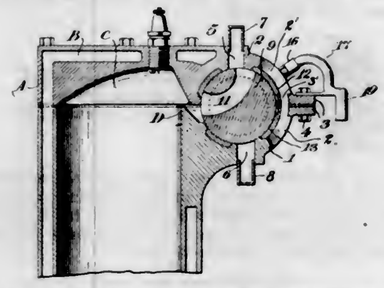
8. The combination in a top airplane having a fuselage, of landing gear therefor comprising resilient sheet material members engaging the fuselage in spaced relation, an axle carrying wheels, said axle penetrating bearing holes in said members, and shoulders on said axle to tensionally spread apart said members, thereby increasing the distance separating them at their lower portions.

1,782,386. CABINET LATCH. RAYMOND G. MOORE and ARTHUR CLAUD-MANTLE, Bridgeport, Conn., assignors to The Bassick Company, Bridgeport, Conn., a Corporation of Connecticut. Filed May 23, 1928. Serial No. 279,864. 4 Claims. (Cl. 292—169.)



1. In a latch for a movable closure or the like, an attaching plate, a tubular handle guide secured to said plate and adapted to be inserted in a hole in the closure, a reciprocating latch bolt mounted on said plate having an elongated longitudinal slot, a rotary handle member engaged in said guide and extending through said slot, and an oscillatory plate secured to said handle member and adapted upon movement in either direction to retract said bolt.

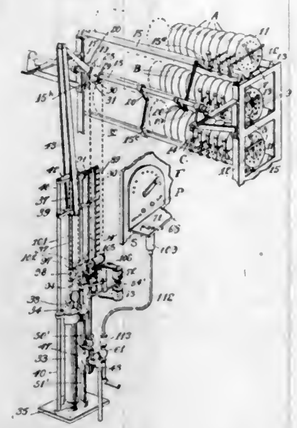
1,782,387. LOCK WASHER. CARL G. OLSON, Chicago, Ill., assignor to Shakeproof Lock Washer Company, Chicago, Ill., a Corporation of Delaware. Filed Dec. 5, 1928. Serial No. 323,838. 12 Claims. (Cl. 151—35.)



9. A lock washer having a body portion, a locking prong extending therefrom, the outer end of which is narrower than the root thereof, said prong being progressively twisted out of the plane of the washer stock.

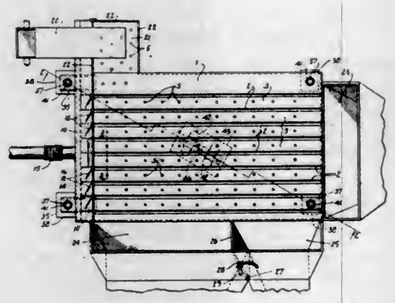
1,782,388. MANIFOLDING DEVICE. WILLIAM A. PRINGLE and LOUIS FRED HAGEMANN, Niagara Falls, N. Y., assignors to American Sales Book Company, Limited, Toronto, Canada, a Corporation of Ontario, Canada. Filed Dec. 13, 1927. Serial No. 239,648. 18 Claims. (Cl. 282—5.)

1. In a manifolding device, in combination, means for feeding a traveller record strip and supporting it in position for reception of an inscription, supporting means for supporting transfer material with parts thereof in transfer relation with the record strip, a support for supporting an auxiliary record card for independent insertion into manifolding relation with said traveller record strip and transfer material and for independent removal from manifolding position, and a passageway opening laterally at the outside of one side of the manifolding device for insertion or removal of said card to and from manifolding position on said support.



1,782,389. ROTARY VALVE. JOHN M. RAUHA, Jr., and ALEX MATTSON, Owen, Wis. Filed Dec. 24, 1927. Serial No. 242,448. 3 Claims. (Cl. 123—190.)

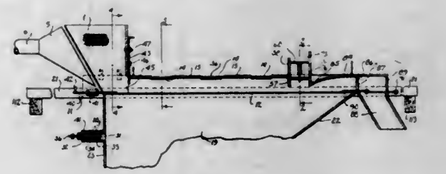
1. The combination with an internal combustion engine having a removable head, a valve casing including an upper section formed with the head, a lower section formed with the block of the engine, said valve casing being grooved to provide air spaces extending therethrough, a cylinder valve arranged in said casing, enlargements formed with said cylindrical valve and being provided with arcuate shape passages adapted to communicate with passages to the cylinders of the engine and passages to the exhaust and intake manifolds of the engine, and means for oiling the valve, flanges formed with the sections of the valve casing and having bores registering with the grooves, and said grooves, bores and oiling means being adapted to retain the valve in a cool condition.



1,782,390. ACTUATING MEANS FOR ELECTRIC-LIGHT DIMMERS. HARRY J. ATTICKS and JOSEPH G. SALTZMAN, New York, N. Y. Filed May 17, 1927. Serial No. 192,149. 2 Claims. (Cl. 175—312.)

1. In a mechanism of the character described, in combination with at least one electric light dimmer of the type including a plurality of stationary contacts and a movable contact member frictionally engaging the stationary contacts, means for operating said dimmer comprising a hydraulic fluid operated device, means for transmitting power from said device to the movable contact of said dimmer and means for variably controlling the rate of flow of motive fluid through said device whereby the rate of operation of said dimmer may be variably controlled and undesirable changes in the rate of operation of

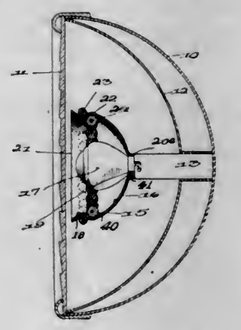
said dimmer due to variations in the friction between the movable contact and the stationary contacts of said dimmer are avoided.



1,782,391. PROCESS AND MECHANISM FOR SEPARATING INTERMIXED MATERIALS. KENNETH DAVIS, Ebensburg, Pa., assignor, by mesne assignments, to Peale-Davis Company, Wilmington, Del., a Corporation of Delaware. Filed Jan. 31, 1922, Serial No. 532,978. Renewed Dec. 20, 1928. 16 Claims. (Cl. 209—467.)

1. A mechanism for separating intermixed divided materials, comprising in combination an air pervious table having longitudinally extending partitions thereon, means for supporting the table in a diagonally inclined position so that the materials tend to travel across the partitions, said supporting means including resilient means, carrying the weight of the table, for resiliently supporting it, means for forcing air through the table, and means for vibrating the table in a direction substantially perpendicular thereto.

12. The process of separating intermixed divided materials which comprises maintaining a bed of materials in continuous progression along an air-pervious table, subjecting the materials to vibration and upwardly-directed, lifting air currents to stratify the materials according to their specific gravities, impelling a settled heavier material to discharge and permitting a flotant stratum of lighter material to progress unrestrictedly to discharge transversely of the settled heavier material, and regulating the air supplied to the bed of materials in independently controlled areas both laterally and longitudinally of the table.



1,782,392. PROCESS AND MECHANISM FOR SEPARATING INTERMIXED MATERIALS. KENNETH DAVIS, Ebensburg, Pa., assignor, by mesne assignments, to Peale-Davis Company, Wilmington, Del., a Corporation of Delaware. Filed Mar. 4, 1922, Serial No. 541,123. Renewed Dec. 17, 1928. 32 Claims. (Cl. 209—467.)

1. A mechanism for separating intermixed divided materials of different specific gravities, including in combination a bed bottom having sides for maintaining therebetween a bed of materials of substantial depth, means for separating the materials in the bed and for discharging a heavier material from the bottom of the bed, and means for discharging a lighter material from the upper part of the bed along the side edge thereof by the use of a laterally flowing current of air.

18. The process of separating intermixed divided materials which comprises vertically confining a bed of the material and subjecting it to a flow of air under pressure from beneath to separate and stratify the materials and then directing the air current laterally to discharge the lighter and superior separated material from the bed, and subjecting the forward part of said superior and lighter material to a backwardly moving current of air to insure complete separation and discharge of the lighter material.

1,782,393. ANTIGLARE DEVICE. FRANK A. TREIBER, Cumberland, Md. Filed June 21, 1930. Serial No. 462,900. 5 Claims. (Cl. 240—48.6.)

1. The combination with a light projector including a source of light, of a partially translucent shield fitted about said source and having an annular shoulder about its forward portion and an annular refractive device surrounding said shoulder.

THE

OFFICIAL GAZETTE

OF THE

United States Patent Office

Vol. 400—No. 4 TUESDAY, NOVEMBER 25, 1930 Price—$10 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $10.00 per annum; including annual indexes, $11.50; single numbers, 25 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Adjudicated Patents

(C. C. A. Mich.) Ward and Taylor patent, No. 1,104,589, for gear-grinding machine, *Held* infringed. *Reo Motor Car. Co.* v. *Gear Grinding Machine Co.* 42 F.(2d) 965.

(C. C. A. Mich.) Ward patent, No 1,155,532, for trimming mechanism for grinder wheels of shaft-grinding machines, *Held* infringed. *Id.*

(C. C. A. Mich.) Ward patent, No. 1,271,495, for method of grinding spline shafts and other interrupted cylindrical bodies, claims 3 and 5, *Held* infringed. *Id.*

(C. C. A. Pa.) Daily patent, No. 1,580,651, for radiator, claims 1, 2, and 3, *Held* valid and infringed. *James B. Clow and Sons* v. *Automatic Gas-Steam Radiator Company*, 42 F.(2d) 1016.

Communications to the Patent Office

Rule 8. A separate letter should in every case be written in relation to each distinct subject of inquiry or application. Assignments for record, final fees, and orders for copies or abstracts must be sent to the Office in separate letters.

Important Information

In ordering manuscript copies much time will be saved if the order states specifically what is desired, viz:

Application as originally filed. (Petition, specification, oath, and drawings as received.) Application as amended. (Petition, specification, oath, and drawings with amendments entered.)

Application as allowed. (Petition, specification, oath, and drawings as passed by the Examiner for issue.)

Original application. (Facsimile petition, specification, oath, and drawings at present time.)

Specification as originally filed. (As received in Office.)

Specification as amended. (With amendments entered.)

Specification as allowed. (As passed by the Examiner for issue.)

Original specification. (Facsimile at present time.)

File-wrapper. (File-wrapper only.)

File-wrapper and contents. (File-wrapper, contents of record, including photoprints of any tracings or of prints within file-wrapper. In patented-cases, printed copy of the specification and drawings of the patent is furnished.)

File-wrapper, contents, and drawings. (File-wrapper and all of the contents of record, including photoprints of any tracings, exhibits, or prints within the file-wrapper. In pending cases, photoprints of the pending drawings only, omitting any canceled. If patented, copy of the specification and drawings of the patent being furnished, photoprints are not made of the original drawings unless specially ordered. If canceled drawings are wanted, they must also be specially ordered.)

Assignment. (Give the liber and page of the record as well as the name of the inventor.)

Printed publications in possession of the Office. (Give title and date of publication, also page and exact portion to be copied.)

Orders for copies of any other records not mentioned above must state specifically the exact paper to be copied.

Notice Regarding Payment of Fees

All fees must be paid in advance. Payment of money required for Office fees *must* be made in specie, Treasury notes, national-bank notes, post-office money orders, or certified checks. Money orders and checks must be made payable to the "Commissioner of Patents." Money sent by mail to the Patent Office will be at the risk of the sender. (See Rule 194.)

Certified checks, bank drafts, express and foreign money orders must be immediately negotiable in this country and for the full amount of the fee required by the Patent Office. No allowance can be made by this Office for any charge for their collection or exchange. Postage stamps will not be accepted. Failure to comply with the above instructions will cause delay.

Notice—Attorney's Address

Many letters are being returned to this Office for lack of street address. The attorney's full post-office address should be given in every power of attorney. The prompt delivery of communications will thereby be facilitated.

Condition of Applications Under Examination at Close of Business November 14, 1930

Room No.	(Total number of applications awaiting action, excluding Trade-Mark Division, 111,894: Trade-Mark Division, 1,262. Oldest new case, Jan. 15, 1930; oldest amended, Jan. 16, 1930.) DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTIONS	Oldest new application and oldest action by applicant awaiting office action: New	Amended	No. of applications awaiting action
112	1. LOEFFLER, F. A., Closure Operators; Fences; Gates; Tillage; Scattering Unloaders; Handling and Hoist Line Implements.	Mar. 20	Apr. 4	1,155

DECISIONS IN PATENT AND TRADE-MARK CASES

Decisions of the Board of Appeals

EX PARTE DOSCH

Decided March 31, 1930

1. PATENTABILITY—ESTOPPEL.

After an award of priority in an interference involving two applications the successful party is not estopped to present claims reading upon the disclosure of the losing party merely because he did not present such claims, under the provisions of rule 109, during the pendency of the interference.

2. INTERFERENCE—DECLARATION—REPRESENTATIVE CLAIMS SELECTED.

"It is not only customary but it is highly desirable to select a few representative claims as counts in an interference proceeding. To adopt any other practice would result in needless multiplication of interference counts."

(This application has resulted in Patent No. 1,780,465.)

Application for Patent filed November 21, 1929, Serial No. 339,692.

OILING APPARATUS

Messrs. Williams, Bradbury, McCaleb & Hinkle for the applicant.

Before KINNAN, First Assistant Commissioner, and LANDERS and IDE, Examiners in Chief

LANDERS, *Examiner in Chief:*

This is an appeal from the action of the Examiner finally rejecting claims 1, 10, 11, 12, and 13. Claims 1 and 10 are illustrative and read as follows:

1. A lubricating system for the bearings of a machine, comprising a pipe leading to a bearing, a source of lubricant under variable pressure, a valve to control the flow of lubricant from said source into said pipe, hand-operated means to open said valve, and means, operated by the pressure of the lubricant, to close said valve.

10. A lubricating system, comprising a lubricant supply reservoir, a plurality of bearings to be lubricated from said reservoir, lubricant expelling means for forcing lubricant from said reservoir, a valve casing presenting a plurality of outlets, a plurality of conduits connecting said outlets and said bearings, a valve in said casing presenting a passage for conveying lubricant from said reservoir to one of said outlets, and valve actuating intermittently engaging mechanism operable by reciprocation of said lubricant expelling means.

The references relied upon are: Fitzgerald, 458,450, August 25, 1891; Medway, 535,953, March 19, 1895; Brown, 881,896, March 17, 1908.

The invention relates to a system for supplying the bearings of a machine, as an automobile, with lubricant. In the form shown in Figure 5 of the drawings the lubricant is forced by a reciprocating pump from a tank into a casing provided with a plurality of outlets. Each outlet is connected by a pipe to a bearing of the machine. A valve which has the general shape of a pan is provided with an orifice in its side, and this orifice is brought into alignment with a selected outlet, so that the bearing fed therefrom may be supplied with oil. The side of the valve member is also provided with a circular series of openings corresponding in number and spacing to the outlets. These openings are selectively positioned in alignment with an additional discharge opening in the side of the casing from which oil is conducted back to the source of supply during those periods when the first mentioned opening of the valve is not in register with any of the outlets connected to the bearings.

The claims have been rejected on the ground of estoppel, and some of them have also been refused on prior art patents.

This application was formerly involved in Interference No. 53,578 with certain other applications. The Examiner has held applicant estopped to patent the claims on appeal on the ground that they could have been presented by motion under rule 109 in the interferrence proceeding.

[1, 2] Interference No. 53,578 was terminated by an award of priority of invention to the applicant here. The claims in that interference were directed to the same subject matter as the claims on appeal. We believe there is no basis for holding that applicant is now estopped to patent these claims. Such a ruling would amount to a holding that when two applicants have been involved in an interference and priority has been awarded to one of them he may patent only such claims common to the two cases as actually constituted counts of the interference. It not only is customary but is highly desirable to select a few representative claims as counts in an interference proceeding. To adopt any other practice would result in needless multiplication of interference counts. No sound reason exists why the successful applicant in an interference proceeding may not thereafter present additional claims to the common subject matter.

The Examiner calls attention to the patent to Gleason, No. 1,590,823, granted on an application at one time involved in interference with a joint application of the instant applicant and another, said joint application and the instant application being assigned to a common assignee. The appealed claims, however, are clearly differentiated from the disclosure in the Gleason patent.

Claims 1, 12, and 13 were rejected on each of the patents to Medway and Brown. Medway does not disclose a source of lubricant which is under variable pressure. This patent also fails to disclose means operated by the pressure of the lubricant to close the valve. The first element is included in claim 1, and the second element is included in each of the claims of this group.

Brown discloses a hand-operated pump for elevating lubricant to a casing 29 from which it flows through a plurality of conduits to as many bearings. In our opinion it fails to disclose the construction set forth in each of claims 1, 12, and 13.

Claim 11 has been rejected on the patent to Fitzgerald. This patent discloses as many valve casings as there are bearings to be lubricated. It does not disclose a valve casing presenting a plu-

rality of outlets and a valve having a port adapted to register with said outlets, as required by this claim.

Claim 10 has been additionally rejected as not being patentable in addition to the counts of interference No. 53,578. This claim is a more limited claim than count 1 and a broader claim than count 2 of said interference. We believe it should be allowed in addition to the claims corresponding to the counts.

The decision of the Examiner is reversed.

U. S. Court of Customs and Patent Appeals

IN RE BRONSON

No. 2,336. Decided May 28, 1930

[40 F.(2d) 575]

PATENTABILITY—METHOD OF FORMING A WASHER UPON A VALVE MEMBER.

Certain claims for a process of forming a rubber washer upon a valve member *Held* unpatentable over the prior art.

APPEAL from the Patent Office. Affirmed.

Messrs. Kwiss, Hudson & Kent and *Mr. Watts T. Estabrook, Mr. William E. Williams*, and *Mr. A. J. Hudson* for Bronson.

Mr. T. A. Hostetler and *Mr. Howard S. Miller* for the Commissioner of Patents.

BLAND, *J.*:

This is an appeal from the decision of the Board of Appeals of the United States Patent Office which affirmed the decision of the Examiner, rejecting appellant's claims 1 to 4 and 10 to 13 for a method for forming an external washer upon a valve member. Claims 1, 4, and 13 are regarded as typical of all the claims rejected and are as follows:

1. The process of forming a rubber washer upon a valve member which comprises molding raw rubber into the form of a washer on said member, and vulcanizing said washer while in place on the said member.

4. The process of forming a rubber washer upon a valve member, which comprises applying a body of raw rubber to the valve member circumferentially thereof, molding said raw rubber into the form of a washer surrounding the valve member, and vulcanizing the washer so molded while in place on the valve member.

13. The process of forming rubber washers upon valve members which comprises simultaneously moulding raw rubber into the form of washers on a plurality of said members maintaining a pressure on the individual washers and vulcanizing the same on the valve members while under pressure.

The claims were rejected upon Schweinert et al., 1,177,902, April 4, 1916.

The rejected claims are for a process of forming a rubber washer upon a valve member which is ordinarily part of an automobile tire valve. The process is described in the decision of the Board of Appeals as follows:

In applicant's process he prepares a sheet of uncured rubber which is plastic like a sheet of flour dough. The sheet is perforated by being forced down over pointed pins projecting up from the top of a plate. This operation forms a thick ring of plastic rubber around the perforations in the sheet. The perforated sheet is then transferred to a bottom mold plate having valve barrel members inserted in perforations therein so that the top of the lower washer retaining collar on the barrel is flush with the upper surface of the collar. The raw or plastic rubber sheet is placed upon the lower mold plate and the openings are caused to slip over the projecting ends of the barrels of the valve inside members. The raw rubber then is in position so that the edge of the sheet is engaging with that portion of the barrel comprehended by the groove in the barrel within which groove the raw rubber is to be positioned and vulcanized. The upper mold plate of the mold having recesses in its bottom, shaped to conform to the outer finished form of the washer, is then brought down upon the lower mold plate with the recesses fitted over the projecting ends of the barrels in the lower mold plate and the plates are pressed together and heated to subject the rubber to vulcanizing action. The rubber between the meeting faces of the mold plates is squeezed laterally to fill the space between the barrel insides of the valve members and the mold cavity in the upper mold plate. When the rubber has become vulcanized sufficiently the valve members are removed from the molds and the vulcanized washers adhere to the valve barrel members.

Concerning the Schweinert disclosure the Board said:

The patent to Schweinert et al. describes a process of making and applying washers to valve barrels which involves two stages of operation. First, making a plurality of partially vulcanized washers which possess sufficient resiliency to retract closely to the barrel when stretched over the retaining collar on the barrel. Second, inserting the barrels with the washers in place within mold recesses in a plate, pressing the assembled barrels and washers into the mold apertures and vulcanizing the rubber.

The Board and the Examiner rejected the claims on the theory that they disclosed nothing not disclosed in the second stage of operation disclosed in Schweinert. Schweinert uses a partially vulcanized rubber to start with. After the rubber ring has been formed and put in place, it is then molded and vulcanized upon the valve member. The Board regarded it as immaterial, as far as patentability was concerned, whether the rubber was completely raw or partially vulcanized, since certain claims for appellant's invention were allowed and the claims which were rejected were only those which described the process shown in Schweinert's second process.

We agree with the conclusion reached by the Board of Appeals and its decision is affirmed.

Affirmed.

U. S. Court of Customs and Patent Appeals

IN RE ENGELHARDT

No. 2,753. Decided May 28, 1930

[40 F. (2d) 760]

1. PATENTABILITY—CLAIMS COPIED FROM A PATENT—RESOLUTION OF DOUBT.

Where an applicant copies claims from a patent, the Patent Office should, if it was clearly wrong in allowing the patented claims, not repeat the error in the application, but "we think that in such cases lack of patentability should very clearly appear to warrant rejection, and any doubt as to patentability should be more strongly resolved in favor of patentability than under circumstances where a patent had not been previously issued."

2. SAME—PROCESS OF SEPARATING GASES BY PASSING THE MIXTURE INTO ACTIVATED CARBON.

Certain claims for a process of separating gases including passing the mixture into activated carbon *Held* patentable over the prior art.

APPEAL from the Patent Office. Modified.

Mr. Drury W. Cooper, Mr. C. B. Townsend, Mr. H. F. Wiegand, and *Mr. R. L. Scheffler* for Engelhardt.

Mr. T. A. Hostetler and *Mr. Howard S. Miller* for the Commissioner of Patents.

LENROOT, *J.*:

This is an appeal from a decision of the Board of Appeals of the Patent Office rejecting claims 4 to 8 inclusive of appellant's application, for want of patentability over the prior art.

Upon oral argument appellant abandoned claims 4, 5 and 6, leaving only claims 7 and 8 in issue. These claims read as follows:

7. In a process of separating gases, passing a gaseous mixture into activated carbon and removing the adsorbable portion from said gaseous mixture by the activated carbon while allowing the unadsorbable portion to pass, expelling the adsorbed portion from the activated carbon by introducing steam into the carbon carrying the adsorbed gaseous material, cooling and collecting the gaseous matter thus expelled.

8. In a process of separating gases, passing a gaseous mixture into activated carbon and removing the adsorbable portion from said gaseous mixture by the activated carbon while allowing the unadsorbable portion to pass, expelling the adsorbed portion from the activated carbon by introducing steam into the carbon carrying the adsorbed gaseous material, and liquefying the gaseous matter thus expelled with the aid of cooling.

The references cited by the Patent Office are: Dewar (British) 7,808 of 1905; Dewar (British) 13,638 of 1904.

Said claims sufficiently describe the invention in issue.

The appellant is a chemist, a citizen of Germany. He filed his application in the United States Patent Office on August 11, 1921. On November 4, 1916, his assignee filed an application in Germany for a patent, making the following claim:

Separation of organic gas or of vaporized organic substances from their mixtures with air or other difficulty—or un-absorbable gases, such as hydrogen, consisting in treating such mixtures with especially porous charcoal, such as can be produced according to the process of Patent No. 290,656, and expelling the organic substances absorbed by the charcoal with the aid of steam in the heat.

It is conceded that the disclosure in said application describes the invention here in issue. Said application was allowed and patent thereon was granted by Germany and published on November 11, 1920, effective from November 4, 1916.

Upon application of appellant to the United States Patent Office, he was given the benefits of the act of March 3, 1921, known as the Nolan Act, which gave to him the benefit of the filing date of the said German patent, November 4, 1916.

On July 20, 1921, one Oscar L. Barnebey, an American citizen, filed in the United States Patent Office an application for a patent upon the same invention involved herein, and patent therefor was granted on August 14, 1928, No. 1,680,840. The claims 7 and 8 here in issue were copied from said Barnebey patent for the purpose of an interference proceeding, the said claims being numbered 15 and 20 in said Barnebey patent. Said patent was inadvertently issued, as appellant's application was pending at the date of its issue, and it is conceded that the subject matter of said claims is disclosed in appellant's application.

Appellant filed with the Commissioner of Patents a petition requesting that the claims here in issue, with the others which have now been abandoned, be entered, and an interference declared between his application and the said patent to Barnebey. Said amendments were finally entered, but the interference petitioned for was denied upon the ground that the claims were unpatentable, and in effect held that the Barnebey patent, inadvertently issued as aforesaid, was invalid. The Board stated that the British references here relied upon were not cited against the Barnebey application.

The appellant contends that from the foregoing state of facts an extraordinary situation is presented which should be considered in passing upon the claims here in issue. That contention may be stated as follows:

That appellant's legally effective filing date of application is November 4, 1916, being the date on which his assignee in Germany filed an application corresponding to the application here involved; that it is not disputed that the disclosure of said German application is the same as the disclosure of appellant's application here in issue; that appellant's application admittedly disclosed the invention defined in the claims copied from the Barnebey patent; that if appellant is permitted to enter an interference contest with Barnebey's patent, appellant will be entitled to his date of filing of the German application, and priority of invention will be awarded to him unless Barnebey is able to prove that he made his invention prior to November 4, 1916, which is almost four years before Barnebey filed his application.

Up to this point appellant's contention presents a situation not unusual in the case of an inadvertent issue of a patent upon a copending application; but appellant further contends in his brief as follows:

Engelhardt's *German* patent, standing alone, without the grant to him of a United States patent, was not granted or published until too late to defeat the Barnebey patent. Barnebey filed the application for his patent on July 20, 1920, and the Engelhardt German patent was not granted or published until after that date. In the absence of pending (not abandoned) or patented corresponding United States application filed within the provisions of 4887 R. S. (or as supplemented by the Nolan Act) a foreign patent speaks only as of its date of grant or publication and not as of its filing date (*Elizabeth v. Pavement Co.*, 97 U. S. 126, (130).

It is therefore beyond dispute that if the decision of the Patent Office refusing all claims to Engelhardt is made final, no one will ever be able to prove that Engelhardt and not Barnebey was in fact the first inventor.

In this contention appellant seems to be correct. If his application be rejected, and he is thereby denied an interference with Barnebey, should a suit against him for infringement be brought by Barnebey, and should the court hold the Barnebey patent was not anticipated by the British patents upon which the Board of Appeals relied in rejecting appellant's application, and therefore valid, judgment could be entered against appellant, although he may have been in fact the first inventor and had done everything that the law requires to protect his invention in the United States.

This is so because, with the rejection of appellant's application, there would be nothing pending in the Patent Office, and as conception and reduction to practice of an invention in a foreign country is not a defense to a United States patent, and as the German patent was issued subsequent to Barnebey's application, although applied for four years prior thereto, appellant would have no legal defense to an infringement suit, based upon the fact that he was the first inventor.

Appellant urges that the foregoing warrants us in resolving in his favor all doubts as to pat-

entability of his claims to a greater extent than would be proper under ordinary circumstances.

Of course we must find that the Board of Appeals erred in its decision before we can reverse it. The fact that strong equities may exist in favor of appellant does not justify us in finding error where none exists, but we think it is proper for us to consider these facts in determining the weight to be given to the fact that all of the tribunals of the Patent Office concurred in finding lack of patentability in appellant's claims. We have a right to consider that a patent has been issued by the Patent Office, a patent covering the very claims here in issue; that such patent is beyond recall by it, and that it will be considered in any court as presumptively valid.

[1] Of course the issue of the Barnebey patent did not preclude the Patent Office from finding that the claims here in issue lack patentability. If the Patent Office was clearly wrong in finding patentability of the Barnebey application, it should not repeat its error with regard to the claims here involved, but we think that in such cases lack of patentability should very clearly appear to warrant rejection, and any doubt as to patentability should be more strongly resolved in favor of patentability than under circumstances where a patent had not been previously issued.

With these observations we come to the consideration of the question of patentabilty of the claims here in issue.

The Board of Appeals held the claims here involved are anticipated by the British patent to Dewar, No. 7,808, of 1905, when taken in connection with the earlier British patent to him, No. 13,638 of 1904.

In its decision the Board of Appeals said:

> Furthermore, these claims and also claims 7 and 8 are anticipated by said Dewar patent when taken in connection with the earlier British patent to Dewar, No. 13,638, referred to in the later patent. The later patent substitutes an earthy oxide, or a mixture of such oxide with carbon, for the charcoal of the former. It fairly teaches the use of the charcoal of the earlier patent, as well as the earthy oxides to which it is particularly directed, in its disclosed processes.
>
> The earlier patent discloses pre-conditioning the charcoal by heating it to a red heat (525° to 850° C.) and exhausting it to free it from its naturally contained gas to render it more active in absorbing gases. Barnebey's original disclosure contained his method of preparing activated carbon only by reference to his earlier application, Serial No. 348,901, which has since matured into Patent No. 1,660,642. This method as disclosed in the earlier application consists in heating the carbon for an extended period of time at temperatures above 700° C. in the presence of steam. This treatment is comparable to that disclosed by Dewar. Each excludes air and both heat to substantially the same temperature. If Barnebey's carbon be more highly activated than is that of Dewar the difference is merely one of degree. We consider the earlier Dewar patent discloses "activated carbon" within the meaning of this expression as used in the Barnebey claims of which claims 7 and 8 on appeal are copies. * * *

The crucial question in the case is whether the earlier Dewar patent, 13638, discloses the use of activated carbon in the process there described. If it does not, it is conceded that neither British patent, singly or in connection with the other, constitutes an anticipation of appellant's claims.

The definition of "activated" given by lexicographers is not especially helpful in arriving at the meaning of the words "activated carbon".

Funk & Wagnalls New Standard Dictionary defines the word "activate" as follows:

> 1. *Physics:* To render radioactive, as a gas, by subjecting to the action of a radioactive substance; ionize.
> 2. *Archaic:* To make active.

We think it clear that the words "activated carbon", as used in the claims, have a technical meaning in the chemical art, and it must be so considered by us.

Following the decision of the Board of Appeals, from which this appeal is taken, appellant filed a petition for rehearing, which was denied. In support of that petition he filed two affidavits. The first was made by one Dr. Arthur B. Lamb, a professor of chemistry at Harvard University and director of chemistry at said university. He is also editor of the Journal of the American Chemical Society. He also made an earlier affidavit, not necessary to discuss here, but in the decision appealed from, Dr. Lamb is referred to by the Board of Appeals as "one highly skilled in the art".

In the affidavit filed with this petition for rehearing Dr. Lamb states:

> Dewar, by exhausting, excludes air and thus *excludes the oxygen* contained in it. Steam activation excludes *air*, but it does furnish *oxygen*, because at the temperatures employed steam is an oxidizing agent. It therefore burns some of the carbon and contained impurities to oxides of carbon. The very purpose of using steam is to utilize this *oxidizing* action to activate the carbon. Instead of steam, other oxidizing agents may be and are employed. For instance, carbon dioxide can be used, or even air, at suitable temperatures. In other words, while the Dewar process and the steam activation process appear superficially similar in that both exclude air, this very point of apparent similarity is the substantial point of difference between the two. By reason of his deliberate exclusion of air (which might, if present and properly used, have supplied the required oxygen) Dewar failed to secure a true *activated carbon*. (Last italics ours.)
>
> Claims 7 and 8 of the Engelhardt application recite a *dynamic* process of gas adsorption in which *activated carbon* is specified as the absorbent material. This process depends for its successful operation upon activated carbon as distinguished from the charcoal prepared according to the Dewar patent. Activated carbon such as can be prepared by the zinc chloride process, or by steam activation or equivalent process, and of an activity differing not in degree but in order of magnitude, is essential to the operation of the dynamic process of gas adsorption. With respect to dynamic adsorption the difference between Dewar's charcoal and such activated carbon is not one of mere degree—the two are not even comparable either as to properties or results obtained.

The second affidavit filed with the petition was made by one Walter Duisberg, a consulting chemist practicing his profession in New York city. In this affidavit, Dr. Duisberg states:

> The heating to red heat and exhaustion may serve the purpose of driving off undesired gas already contained in the charcoal, thereby rendering it able to adsorb that much more gas. Cooling the charcoal, as proposed by Dewar, also renders the charcoal capable of adsorbing more gas than it otherwise would. This process of preconditioning proposed by Dewar is not an activation process and does not produce activated carbon. Such preconditioning produces no effective change in physical structure or characteristics. It is erroneous to refer to Dewar's process as an "activation" process. The product produced by activation processes possesses changed physical characteristics and properties from those of either ordinary charcoal or the preconditioned charcoal of Dewar.
>
> (7) Dewar's charcoal cannot be used in the process defined by the Engelhardt claims here on appeal. This Engelhardt process depends for its operativeness upon the use of *activated carbon* whether prepared by steam activation, by the zinc chloride process, or otherwise.

In its denial of the petition for rehearing the Board said:

> Appellant petitions for a rehearing upon the question of patentability of the claims rejected to him and particularly claims numbered 7 and 8.
>
> The petition is accompanied by another affidavit of Dr. Lamb in view of which it is urged that Dewar in British Patent No. 13,638 is not using true activated carbon or carbon which may be considered as activated carbon within the meaning of this expression as used in claims 7 and 8. The affidavit states that when steam is used during the heat treatment, as in Barnebey, it acts as an oxidizing agent, whereas, in the Dewar process of preparation, air, and consequently oxygen, is excluded and therefore Dewar does not obtain activated carbon comparable to that used by Barnebey. It seems obvious that in the Dewar treatment the air cannot be entirely excluded and consequently the charcoal must be activated. Certainly it is rendered more active by the heat treatment and in the subsequent use of the charcoal the patent points out that recently ignited charcoal is employed. The additional affidavit of Druisberg does not change our views. After careful consideration of the petition and accompanying affidavits it does not appear that there is any probability that our decision would be reversed or modified if a rehearing were granted.
>
> *The petition is accordingly denied.*

Following the denial of the petition for rehearing, appellant filed with the Commissioner of Patents a petition for reconsideration of the rejection of said claims 7 and 8. Said request included an argument in support thereof. This petition was denied on February 21, 1930, in a written decision, again holding that the claims here in issue were anticipated by said Dewar patents.

In the second Dewar patent, No. 7,808, earthy oxides are substituted for the charcoal described in the first Dewar patent, No. 13,638, as the adsorbent material used. The Primary Examiner, in discussing the relative value of the two kinds of adsorbents, said:

> The claims were not rejected on the Dewar patent per se but on the ground that it involves no invention but only the obvious thing to do to substitute a superior adsorbent for an inferior one when the superior adsorbent one is available. All the affidavit shows is that activated carbon is superior to alumina as an adsorbent, *a thing that was conceded from the beginning.* (Italics ours.)

This naturally raises the inquiry, if the treatment given charcoal described in the first Dewar patent produced activated carbon, why did not Dewar use it in his later patent as the adsorbent material instead of an inferior material? Is there not some implication at least that the reason he did not was because the treatment of charcoal described in the first patent did not result in activated carbon, and hence was not suitable for use in carryng out the process covered by the second Dewar patent?

Standing alone this would not be determinative of the question, but it is a circumstance proper to be considered in connection with the other facts in the case.

We recognize that the questions here involved relate to an abstruse art requiring technical knowledge that can only be acquired through thorough training. We recognize, too, that the Patent Office tribunals possess this technical knowledge, while the members of this court lack it except to a very limited degree.

The record, however, presents a state of facts which we think justifies us in coming to a conclusion contrary to that of the experts of the Patent Office. They may be summarized as follows:

1. Affidavits of eminent chemists are found in the record positively stating that the treatment accorded charcoal described in the first Dewar patent does not produce activated carbon.

2. The second Dewar patent did not utilize charcoal treated as described in the first Dewar patent as an adsorbent material, but did use an absorbent material inferior to activated carbon. This would be explained if activated carbon was not produced by the treatment of charcoal described in the first Dewar patent.

3. The Patent Office has held these identical claims to be patentable and has issued a patent thereon to Barnebey, which patent is presumptively valid.

4. The references relied upon by the Board of Appeals are foreign patents, and are to be measured as anticipatory not by what might have been made out of them but by what is clearly and definitely expressed in them. *Carson* v. *American Smelting & Refining Co.*, 4 F. (2d) 463.

We think that considering all the facts in the case disclosed by the record, it is clear that the Board of Appeals should have held that the Dewar Patent 13,638 did not disclose a treatment of charcoal producing activated carbon or the use of activated carbon, and therefore said Dewar patents, singly or aggregated, neither anticipate nor negative appellant's invention covered by said claims 7 and 8. We hold that failure to so find was error.

No injustice can flow from the conclusion here reached. If, as a result of our action, an interference is declared with the Barnebey patent, and priority should be awarded to him, appellant will be eliminated. If priority should be awarded to appellant, a patent will issue to him and there will then be two patents outstanding upon the same invention. Under section 4918, Revised Statutes, the rights of the parties can be fully adjudicated in the Federal courts, where expert witnesses can be produced, subject to cross-examination; and if the court in such a proceeding should find that the process in issue is not patentable, both patents will be declared void, as the statute provides in such cases.

The decision of the Board of Appeals is affirmed as to claims 4, 5, and 6, and reversed as to claims 7 and 8.

Modified.

Patent Suits

[Notices under sec. 4921, R. S., as amended Feb. 18, 1922]

1,013,610, W. E. Pedley, Wall construction for dams, filed Sept. 13, 1930, D. C., S. D. Calif. (Los Angeles), Doc. E S-33-J, *L. Pedley* v. *The County of Los Angeles, Calif.*

1,089,405, W. S. Ferguson, Reenforced-concrete dock or pier, filed Sept. 10, 1930, D. C., E. D. Mo., E. Div., Doc. 9165, *W. S. Ferguson et al.* v. *The City of St. Louis, Mo.* Same, filed July 18, 1930, D. C. Md., Doc. E 1742, *The Dock & Terminal Engineering Co. et al.* v. *Bethlehem Shipbuilding Corp., Ltd.* Same, Doc. E 1743, *The Dock & Terminal Engineering Co. et al.* v. *Sanford & Brooks Co.*

1,148,483. (See 1,172,243.)

1,164,720, P. M. Hotchkin, Stand-lamp reflector, filed June 13, 1930, D. C., N. D. Ill., E. Div., Doc. 9862, *Curtis Lighting Inc. et al.* v. *Sandel Mfg. Co.*

1,172,243, R. W. Andrews, Boiler-feed-water regulator; 1,148,483, same, Feeding water to boilers, filed Sept. 15, 1930, D. C., W. D. Okla. (Oklahoma City), Doc. E 1155, *Northern Equipment Co.* v. *Oils, Inc.*

1,209,460, G. F. Lowe, Recovering means for machine-construction device, filed Sept. 23, 1930, D. C. R. I., Doc. 353, *G. F. Lowe* v. *National Collapsible Tube Co.*

1,209,843, H. C. Innes, Railway road crossing, filed Sept. 8, 1930, D. C., E. D. Mo., E. Div., Doc. 9160, *W. S. Moseley* v. *J. T. Ryerson & Son, Inc.*

1,212,840, F. J. Straub, Building block and method of making same, filed Sept. 16, 1930, D. C., N. D. Ohio, E. Div., Doc. 3485, *Crozier-Straub, Inc.*, v. *F. P. Lipp.*

1,221,389, A. E. Strippel, Stencil, appeal filed Sept. 18, 1930, C. C. A., 2d Cir., Doc. 11101, *Wallace Addressing Machine Co., Inc.*, v. *Rapid Addressing Machine Co.*

1,268,580, E. H. Kidder, Grain-car-door-opening mechanism, C. C. A. 8th Cir. (St. Louis), Doc. 8718, *Link-Belt Co. et al.* v. *The Quaker Oats Co.* Decree modified and affirmed Sept. 16, 1930.

1,303,968, 1,470,291, 1,531,881, J. Sawdon, Duplex envelope, filed June 6, 1930, D. C., N. D. Ill., E. Div., Doc. 9849, *Du-Plex Envelope Corp. et al.* v. *Central Envelope Co.*

1,307,284 (*a*), S. J. Wentworth, Heel-seat-forming machine, filed Sept. 20, 1930, D. C., S. D. Ohio, W. Div., Doc. E 703. *United Shoe Machinery Corp.* v. *The L. G. Freeman Co. et al.*

1,307,284 (*b*), S. J. Wentworth, Heel-seat-forming machine; 1,482,524, D. W. Bowie, Heel-seat-fitting machine, D. C., S. D. Ohio, W. Div., Doc. 570, *United Shoe Machinery Corp.* v. *The H. Gordon Co., Inc.* Dismissed for want of equity (notice Sept. 22, 1930).

1,356,178 (*a*), C. H. Thordarson, Machine for cutting magnetic-circuit laminæ, filed June 17, 1930, D. C., N. D. Ill., E. Div., Doc. 9866, *Thordarson Electric Mfg. Co.* v. *Nordendale Mfg. Co., Inc.*

1,356,178 (*b*), C. H. Thordarson, Machine for cutting magnetic-circuit laminæ; 1,482,591, same, Method of making polysided coils; 1,482,592, same, Machine for winding coils, filed June 17, 1930, D. C., N. D. Ill., E. Div., Doc. 9864, *Thordarson Electric Mfg. Co.* v. *Transformer Corp. of America.* Doc. 9865, *Thordarson Electric Mfg. Co.* v. *Chicago Transformer Corp.*

1,432,524. (See 1,307,284 (*b*).)

1,438,560, E. F. Slattery, Repair link for tire chains, filed Aug. 27, 1930, D. C. Dels., Doc. E 816, *E. F. Slattery et al.* v. *Eureka Auto Chain Co.*

1,470,291. (See 1,303,968.) 1,482,591. (See 1,356,178 (*b*).)

1,482,592. (See 1,356,178 (*b*).)

1,504,128, C. G. Lindbom, Cigarette case, D. C., S. D. N. Y., Doc. E 51/60, *W. Demuth & Co.* v. *Strauss Silver Co., Inc.* Consent decree for plaintiff Sept. 18, 1930.

1,507,016, L. de Forest, Radio signaling system; 1,507,017, same, Wireless telegraph and telephone system, D. C., E. D. Mich., S. Div., Doc. 4121, *De Forest Radio Co.* v. *Cardon Phonocraft Corp.* Consent decree dismissing bill Sept. 20, 1930.

1,507,017. (See 1,507,016.)

1,509,211, J. B. Kausal, Electric lamp; 1,575,690, same, Aisle chair, appeal filed May 26, 1930, C. C. A., 3d Cir., Doc. 4431, *J. B. Kausal* v. *American Seating Co.*

1,520,100, S. Zetlin, Reenforced detachable pocket, filed Aug. 19, 1930, D. C. Md., Doc. E 1772, *S. Zetlin (Uniform Pocket Co.)* v. *A. Hankin et al.*

1,531,881. (See 1,303,968.)

1,533,779, W. F. Washburn, Method of bleaching barytes, filed Aug. 19, 1930, D. C., E. D. Mo., E. Div., Doc. 9153, *National Pigments & Chemical Co.* v. *C. P. De Lore.*

1,575,690. (See 1,509,211.)

1,617,148, R. T. Chase, Can opener, filed Sept. 26, 1930, D. C., S. D. N. Y., Doc. E 55/286, *R. T. Chase et al.* v. *Lorraine Metal Mfg. Co.*

1,652,262, M. Walter, Dumping mechanism for semi-trailers, appeal filed Sept. 24, 1930, C. C. A., 2d Cir., Doc. —, *M. Walter* v. *The Heil Co.*

1,670,082, D. M. Solenberger, Piston ring, filed Aug. 5, 1930, D. C., E. D. Mo., E. Div., Doc. 9147, *The Simplex Piston Ring Co. of America, Inc.*, v. *Ramsey Accessories Mfg. Corp.*

1,687,323, H. S. Cook, Medicament cartridge and hypodermic syringe embodying the same, filed Sept. 24, 1930, D. C., S. D. N. Y., Doc. E 55/282, *Cook Laboratories, Inc.*, v. *D. Curtis (The De Ce Products Co.).*

1,697,024, A. J. Rubin, Electric toaster, filed Sept. 22, 1930, D. C., S. D. N. Y., Doc. E 55/257, *Domestic Mfg. Corp. et al.* v. *Knapp-Monarch Co.*

1,704,961, T. Birkenmaier, Disconnecting block; 1,731,775, W. A. Heinrich, Hanger; 1,743,942, E. Volkmann, Switch, filed Sept. 4, 1930, D. C., E. D. Mo., E. Div., Doc. 9161, *W. N. Matthews Corp.* v. *J. R. Kearney Corp.*

1,728,837, G. Slayter, Method of heat insulating, filed Sept. 2, 1930, D. C., E. D. Mich., S. Div., Doc. 4377, *Slayter & Co.* v. *Johns-Manville Co. et al.*

1,730,309, I. I. Tubbs, Inflated ball, filed Sept. 12, 1930, D. C., E. D. Mo., E. Div., Doc. 9167, *I. I. Tubbs et al.* v. *National Sporting Goods Mfg. Co.*

1,731,775. (See 1,704,961.)

1,735,436, S. Kauffman, Radiator inclosure, filed Sept. 23, 1930, D. C., E. D. Mo., E. Div., Doc. 9172, *American Metal Products Corp.* v. *Adler Metal Products Corp.*

1,740,048, R. H. Thayer, Key-retainer strip; 1,770,327, same, Key-filing cabinet, filed Sept. 16, 1930, D. C., S. D. N. Y., Doc. E 55/220, *Thayer Felker Corp.* v. *Davenport-Taylor Mfg. Co.*

1,743,942. (See 1,704,961.)

1,760,382, C. H. Teesdale, Controlling means for electric switches, filed June 26, 1930, D. C., N. D. Ill., E. Div., Doc. 9876, *Teesdale Mfg. Co.* v. *Cook Electric Co.*

1,770,827. (See 1,740,048.)

1,770,420, J. N. Meyers, Oil-gauge wiper, filed Sept. 24, 1930, D. C. Mass., Doc. E 333, *J. N. Meyers* v. *Apco Mossberg Corp.*

Re. 16,869, R. H. Goldman, Manicuring instrument, filed Aug. 2, 1930, D. C., E. D. Mo., E. Div., Doc. 9146, *H. L. Hughes Co., Inc.*, v. *Professional Products Co.*

Re. 17,131, O. S. Caesar, Heating apparatus for automotive vehicles, C. C. A., 8th Cir. (St. Louis), Doc. 8849, *Tropic-Aire, Inc.*, v. *Sears, Roebuck & Co.* Decree affirmed Sept. 16, 1930.

Re. 17,486, G. R. Luginbuhl, Railway guides, filed Sept. 19, 1930, D. C., S. D. N. Y., Doc. E 55/237, *G. R. Luginbuhl et al.* v. *Walworth Co. et al.*

Des. 63,464, D. Gerber, Ice-cream cone, filed July 8, 1930, D. C. Md., Doc. E 1736, *The Maryland Baking Co.* v. *M. Levinson (Mount Clare Candy & Tobacco Co.).*

T. M. 195,811, Portland Wire & Iron Works, Automatic coal burner; T. M. 248,719, T. M. 252,678, Iron Fireman Mfg. Co., same, filed Sept. 23, 1930, D. C., N. D. Ohio, E. Div., Doc. 3506, *Iron Fireman Mfg. Co.* v. *Mechanical Fireman Corp.*

T. M. 248,719. (See T. M. 195,811.)

T. M. 252,678. (See T. M. 195,811.)

TRADE-MARKS

OFFICIAL GAZETTE, NOVEMBER 25, 1930

[VOL. 400. No. 4]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for " under the ten-year proviso " are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 1 of said act, a fee of ten dollars must accompany each notice of opposition.

CLASS 1

Raw or Partly-Prepared Materials

Ser. No. 305,766. D IRENE SOULÉ, doing business as American Coal & Wood Co., Oakland, Calif. Filed Sept. 16, 1930.

The word "Sootless" is disclaimed apart from the mark.
For Coal.
Claims use since Aug. 28, 1930.

Ser. No. 305,926. DYAL PRODUCE CORPORATION, New York, N. Y. Filed Sept. 22, 1930.

Applicant disclaims the words "Papa de Semilla Certificada Red Bliss Triumph Cosechada y Envasada por en el Canada."
For Seed Potatoes.
Claims use since Aug. 15, 1928.

CLASS 2

Receptacles

Ser. No. 300,991. GLENN A. SMITH, Los Angeles, Calif. Filed May 21, 1930.

For Receptacles for Containing Merchandise—Namely, Barrels, Boxes, Tins, Cans, Cases, Casks, Kegs, Cartons, Tanks, Tubs, Pails, Bottles, Cylinders, Jugs, Tubes, and Drums, Made of Wood, Metal, or Fiber or Combinations Thereof.
Claims use since May 1, 1930.

Ser. No. 304,772. HYGIENIC WIRE WORKS LTD., London, England. Filed Aug. 19, 1930.

GENYKAGE

For Bird Cages of Ordinary Metal.
Claims use since Apr. 1, 1930.

CLASS 3

Baggage, Animal Equipments, Portfolios, and Pocketbooks

Ser. No. 291,818. COUCH BROS. MANUFACTURING CO., East Point, Ga. Filed Oct. 31, 1929. Under 10-year proviso.

LANKFORD

For Collars, Collar Pads, and Back Bands for Animals.
Claims use since 1892.

CLASS 4

Abrasive, Detergent, and Polishing Materials

Ser. No. 305,145. GEORGE SCHELCHER, doing business as The Polifina Products Co., Sacramento, Calif. Filed Aug. 29, 1930.

For Cleanser for Nickel, Silverware, Marble, Glass, and Duco, Enamel, or Lacquered Surfaces.
Claims use since June 1, 1930.

Ser. No. 305,756. INTERNATIONAL AGRICULTURAL CORPORATION, New York, N. Y. Filed Sept. 16, 1930.

IACO

For Cleansing Compound Having a Base of Trisodium Phosphate.
Claims use since Aug. 20, 1929.

Ser. No. 306,475. LOUISE BEATRICE STONE, Chicago, Ill. Filed Oct. 4, 1930.

The word "Shampoo" is disclaimed apart from the mark as shown. The portrait on drawing is based on picture of applicant's daughter, with some fanciful changes added.
For Lightweight Shampoo Soap for the Scalp and Hair.
Claims use since May, 1927.

Ser. No. 306,557. COLGATE-PALMOLIVE-PEET COMPANY, Chicago, Ill. Filed Oct. 9, 1930.

GYMSO

For Soap.
Claims use since Oct. 1, 1930.

Ser. No. 306,768. COMFORT MANUFACTURING CO., Chicago, Ill. Filed Oct. 15, 1930.

Ace

For Shaving Creams.
Claims use since Oct. 9, 1930.

Ser. No. 306,793. OTTO C. SOMMERFELD, Jr., doing business as Soprim Soap Co., Minneapolis, Minn. Filed Oct. 15, 1930.

SOPRIM

For Hand Soap.
Claims use since June 4, 1921.

CLASS 5

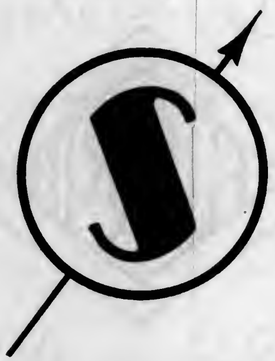
Adhesives

Ser. No. 305,030. THE BRITISH ISINGLASS COMPANY, LIMITED, Grimsby, England. Filed Aug. 26, 1930.

CERTOFIX

For Adhesives, Being Liquid Glue.
Claims use since September, 1924.

CLASS 6



Chemicals, Medicines, and Pharmaceutical Preparations

Ser. No. 290,519. GUY LIBURANCE OSTRANDER, doing business as Ethylizer Corp. of America, Dallas, Tex. Filed Oct. 2, 1929.

ETHYLIZER

For Liquid for the Purpose of Eliminating Detonation from Gases in Internal-Combustion Motors.
Claims use since Jan. 1, 1928.

Ser. No. 290,971. LEONARD QUARTETTI, doing business as Speer Products Company, Chicago, Ill. Filed Oct. 11, 1929.

For Candy Laxatives.
Claims use since Oct. 7, 1929.

Ser. No. 294,107. BERRIEN LABORATORIES, INC., St. Joseph, Mich. Filed Dec. 27, 1929.

℞ MERCUROGUM

The prescription symbol "R" in a circle, together with the short line intersecting the terminal of the letter "R" is disclaimed apart from the other features of the mark shown in the drawings.
For Medicated Chewing Gum Usable as an Aid in the Prevention and Treatment of Pyorrhea and Analogous Diseases of the Human Gums, as an Oral Antiseptic, as an Aid to Digestion, and for the Preservation of the Teeth.
Claims use since Dec. 15, 1929.

Ser. No. 298,191. DR. MARGARET LIVINGSTON CO., Chicago, Ill. Filed Mar. 31, 1930.

Dr Margaret Livingston

The facsimile signature shown in the drawing is that of Dr. Margaret Livingston and is used with her consent.
For Liver and Bowel Stimulant Tablets, Medicated Hygienic Wash Tablets, a Tablet Containing Vegetable Matter and Iron and Entitled Veg-Iron Compound, Complexion Cream, Pile Ointment, a Medicinal Healing Ointment, a Tampon Built on a Suppository Core, Astringent Medicinal Herb Hemorrhagic Tablets and Neutralizing Digestive Tablets.
Claims use since Mar. 1, 1930.

Ser. No. 299,693. ELLIS-FOSTER COMPANY, Montclair, N. J. Filed Apr. 30, 1930.

UNYTE

For Synthetic Resin Compositions for Molding Purposes.
Claims use since Apr. 17, 1930.

Ser. No. 299,732. JOHN W. SAUER, doing business as Secure-Lab., San Francisco, Calif. Filed Apr. 30, 1930.

SEKŪR

For Liquid Preparation Applied to Metal Surfaces to Prevent the Formation of Tarnish Thereon.
Claims use since Mar. 15, 1930.

Ser. No. 301,149. FRANK W. BARBER, doing business as Frank W. Barber Company, Stockton, Calif. Filed May 24, 1930.

SANATIF

For Antiseptic Liquids.
Claims use since May 1, 1930.

Ser. No. 303,806. FISK MANUFACTURING COMPANY, West Frankfort, Ill. Filed July 25, 1930.

Fisk's Liniment

No claim is made to the word "Liniment" except when used in the relation shown. The photograph is that of S. N. Fisk, one of the proprietors of the firm marketing said goods.
For Liniment for Use on Cuts, Bruises, Burns, Etc.
Claims use since Apr. 21, 1930.

Ser. No. 304,305. ANTI-EROZON LABORATORIES, INC., Miami, Fla. Filed Aug. 7, 1930.

Dr. Hall's
Anti-Frozon

For Tooth Paste.
Claims use since March, 1930.

Ser. No. 304,365. VINCENT CARRASCO, doing business as Tosfer Laboratory, New York, N. Y. Filed Aug. 8, 1930.

For Preparation for Use in the Treatment of Whooping Cough.
Claims use since Apr. 7, 1930.

Ser. No. 304,514. CHARLES M. ROSENBAUM, doing business as C. M. R. Mfg. Co., New York, N. Y. Filed Aug. 12, 1930.

CIMARIN TABLETS

The word "Tablets" is disclaimed apart from the mark shown on the drawing.
For Medical Preparation for the Treatment of Constipation and All Liver Irregularities.
Claims use since July 1, 1928.

Ser. No. 305,196. C. F. SIMMONS MEDICINE CO., INCORPORATED, New York, N. Y. Filed Aug. 30, 1930.

DR. M. A. SIMMONS

The trade-mark consists of the name and portrait of Dr. M. A. Simmons, deceased.
For Laxative Medicine.
Claims use since November, 1909.

Ser. No. 305,237. NATIONAL FLUXSITE CO., LTD., San Leandro, Calif. Filed Sept. 2, 1930.

FLUXRITE

For Metal-Fluxing Preparation.
Claims use since July 3, 1930.

Ser. No. 305,421. TENNESSEE PRODUCTS CORPORATION, Nashville, Tenn. Filed Sept. 6, 1930.

ROYAL PURPLE

For Antifreeze Mixtures—Namely, Methanol When Used for Such Mixtures.
Claims use since Aug. 19, 1930.

Ser. No. 305,729. A. O. SCHMIDT, doing business as A. O. Schmidt Co., San Francisco, Calif. Filed Sept. 15, 1930.

ANVITA

For Vaginal Suppositories.
Claims use since Sept. 5, 1930.

Ser. No. 305,805. THE DEANE PLASTER CO., Yonkers, N. Y. Filed Sept. 18, 1930.

'E-Z-BAC'
"BEST—
NEXT
TO YOU!"

No claim being made to the exclusive use of the word "Best" apart from the mark as shown in the drawing.
For Plasters for the Treatment of Coughs, Colds, Backache, Pleurisy, Rheumatism and Asthma.
Claims use since July 18, 1930.

Ser. No. 305,913. LARRY VERDI, Ossining, N. Y. Filed Sept. 20, 1930.

"IMPERIAL"

For Bleaching Solution for Straw Hats.
Claims use since May, 1928.

Ser. No. 306,288. RU-GO LABORATORIES, Charlotte, N. C. Filed Oct. 1, 1930.

Ru-So

For Preparation for Removing Hair.
Claims use since July 24, 1930.

Ser. No. 306,439. LOUISE H. GOLDSCHMIDT, Bellefontaine, Ohio. Filed Oct. 6, 1930.

SENGEL-GOLDSCHMIDT

For Salve and Ointment for External Use for Treating Human Ailments—Namely, Piles, Running Sores, Boils, and Carbuncles.
Claims use since Sept. 1, 1930.

Ser. No. 306,451. EDWARD E. MANSUR, doing business as The Man Chemical Co., Jefferson City, Mo. Filed Oct. 6, 1930.

PETIGO

For Ointment to be Applied Externally for the Treatment of Skin Diseases, Skin Infections, Ulcers, Wounds, Cuts, Scratches, Fever Blisters, and Which is Also Adapted for Use as a Skin Protective, Antiseptic, and Soothing Preparation.
Claims use since Mar. 15, 1929.

Ser. No. 306,539. PULVERAL COMPANY, INC., New York, N. Y. Filed Oct. 8, 1930.

Pulveral

For Medicinal Preparation for the Treatment of Indigestion and Constipation.
Claims use since Aug. 8, 1930.

Ser. No. 306,743. FRANK L. PALMER, Hartford, Conn. Filed Oct. 14, 1930.

(P-I-L-E-N-O-X)

For Hemorrhoidal Ointment.
Claims use since Feb. 1, 1915.

Ser. No. 306,778. JOHNSON & JOHNSON, New Brunswick, N. J. Filed Oct. 15, 1930.

CAMPHENOL

For Antiseptic Disinfectant.
Claims use since 1897.

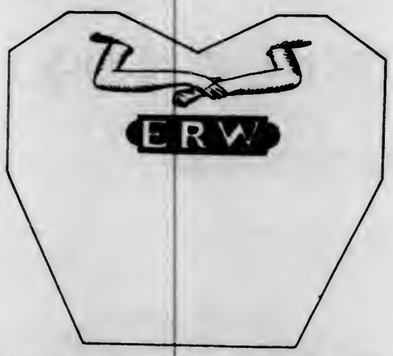
Ser. No. 306,838. C. A. OPPELT, Kane, Pa. Filed Oct. 16, 1930.

NUL-UFF

For Medicinal Preparation for Use in Treating Dyspepsia, Stomach, Liver, and Kidney Troubles, Impure Blood, Eczema, Salt Rheum, Nervous Conditions, Head Dizziness, Headache, Constipation, Asthma, Coughs, Colds, Bronchitis, Hay Fever, Rheumatism, Neuralgia, Catarrh, Quinsy, Burns, Cuts, Sprains, and Bruises.
Claims use since 1915.

Ser. No. 306,837. GIUSTINO SALLUSTO, doing business as The Sulphoradion Company, Brooklyn, N. Y. Filed Oct. 16, 1930.

Sulphoradion



For Scientific Preparation for High Blood Pressure.
Claims use since December, 1929.

Ser. No. 306,877. PIERRE PAUL PLACIDE ASTIER, Paris, France. Filed Oct. 18, 1930.

STALYSINE

For Antistaphylococcus Vaccine Used in Furonculosis, Anthrax, Acne, and All Diseases Having the Staphylococcus as Their Origin.
Claims use since December, 1927.

Ser. No. 306,909. EDGAR R. WILLIAMS, Washington, D. C. Filed Oct. 18, 1930.

For Salve for the Treatment of Neuritis and Rheumatism.
Claims use since Sept. 10, 1930.

Ser. No. 306,957. JAMES MARCUM, Alba, Mo. Filed Oct. 20, 1930.

VALIANTINE

80,266. CHILDREN'S UNDERCLOTHING. Registered November 29, 1910. BROWN DURRELL CO., Boston, Mass., a Corporation of Massachusetts. Renewed November 29, 1930.

80,268. LUBRICATING GREASE AND YARN GREASE. Registered November 29, 1910. CATARACT REFINING AND MANUFACTURING COMPANY, Buffalo, N. Y. Renewed November 29, 1930, to Swan-Finch Oil Corporation, New York, N. Y., a Corporation of New York, assignee.

80,277. HAIRDRESSING AND HAIR TONIC. Registered November 29, 1910. GIROUX MANUFACTURING COMPANY, Buffalo, New York, a Corporation of New York. Renewed November 29, 1930.

80,399. REFINED PETROLEUM. Registered December 20, 1910. THE ATLANTIC REFINING COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed December 20, 1930.

80,449. CIGARETTES, CIGARS, SMOKING TOBACCO, AND CHEWING TOBACCO. Registered December 20, 1910. TEOFANI & Co., LIMITED, London, England, a Corporation of Great Britain. Renewed December 20, 1930.

80,466. PAPER. Registered December 27, 1910. DISTRICT OF COLUMBIA PAPER MANUFACTURING COMPANY, Alexandria, Va., and Washington, D. C. Renewed December 27, 1930, to District of Columbia Paper Manufacturing Company, Washington, D. C., a Corporation of Virginia.

80,515. FIRE BRICKS AND TILES AND BLOCKS MADE OF FIRE-BRICK MATERIAL. Registered January 3, 1911. GREENPOINT FIRE BRICK CO., New York, N. Y. Renewed January 3, 1931, to Greenpoint Fire Brick Co., Long Island City, N. Y., a Corporation of New York.

80,563. CLOTH-CLEANING PADS. Registered January 3, 1911. BRADFORD L. WILLIAMS, Philadelphia, Pa. Renewed January 3, 1931, to Bradford L. Williams, Camden, N. J.

80,573. CHOCOLATE CANDIES. Registered January 10, 1911. CENTRAL CANDY COMPANY. Renewed January 10, 1931, to Walter Birk Candy Company, Chicago, Ill., a Corporation of Illinois, assignee.

80,636. STOCK FOOD. Registered January 17, 1911. THE BLISH MILLING COMPANY, Seymour, Ind., a Corporation of Indiana. Renewed January 17, 1931.

80,637. WHEAT FLOUR. Registered January 17, 1911. THE BLISH MILLING COMPANY, Seymour, Ind., a Corporation of Indiana. Renewed January 17, 1931.

80,740. CORSETS AND WOMEN'S AND CHILDREN'S UNDERWAISTS. Registered January 24, 1911. SEARS, ROEBUCK AND CO., Chicago, Ill., a Corporation of New York. Renewed January 24, 1931.

80,767. PAPER. Registered January 31, 1911. DISTRICT OF COLUMBIA PAPER MANUFACTURING COMPANY, Alexandria, Va., and Washington, D. C. Renewed January 31, 1931, to District of Columbia Paper Manufacturing Company, Washington, D. C., a Corporation of Virginia.

80,768. LEAD PENCILS. Registered January 31, 1911. EAGLE PENCIL COMPANY. Renewed January 31, 1931, to Eagle Pencil Company, New York, N. Y., a Corporation of Delaware, assignee.

80,797. CANNED VEGETABLES. Registered January 31, 1911. OLNEY & FLOYD. Renewed January 31, 1931, to Olney & Floyd, Inc., Westernville, N. Y., a Corporation of New York, assignee.

80,798. CANNED VEGETABLES. Registered January 31, 1911. OLNEY & FLOYD. Renewed January 31, 1931, to Olney & Floyd, Inc., Westernville, N. Y., a Corporation of New York, assignee.

80,803. CIGARS. Registered January 31, 1911. CUESTA, REY & Co., Tampa, Fla., a Corporation of Florida. Renewed January 31, 1931.

80,870. FLEXIBLE METALLIC TUBING. Registered February 7, 1911. PENNSYLVANIA FLEXIBLE METALLIC TUBING COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed February 7, 1931.

80,874. A CATHARTIC TABLET. Registered February 7, 1911. MAURICE F. SCHLESINGER. Renewed February 7, 1931, to Taps Products, Inc., New York, N. Y., a Corporation of New York, assignee by mesne assignments.

80,938. INTERLOCKING COMPOSITION FLOOR TILING. Registered February 14, 1911. DREADNOUGHT FLOORING COMPANY, as assignee of Axel W. Nilsson. Renewed February 14, 1931, to Dreadnought Flooring Co. Inc., New York, N. Y., a Corporation of New York, assignee by mesne assignments.

80,943. SILICATE OF SODA. Registered February 14, 1911. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed February 14, 1931.

80,944. SILICATE OF SODA. Registered February 14, 1911. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed February 14, 1931.

80,945. SILICATE OF SODA. Registered February 14, 1911. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed February 14, 1931.

80,946. SILICATE OF SODA. Registered February 14, 1911. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed February 14, 1931.

80,947. SILICATE OF SODA. Registered February 14, 1911. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed February 14, 1931.

80,948. SILICATE OF SODA. Registered February 14, 1911. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed February 14, 1931.

80,949. SILICATE OF SODA. Registered February 14, 1911. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed February 14, 1931.

80,950. SILICATE OF SODA. Registered February 14, 1911. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed February 14, 1931.

80,976. CARPET SWEEPERS. Registered February 21, 1911. BISSELL CARPET SWEEPER COMPANY. Renewed February 21, 1931, to Bissell Carpet Sweeper Company, Grand Rapids, Mich., a Corporation of Michigan, assignee.

80,977. CARPET SWEEPERS. Registered February 21, 1911. BISSELL CARPET SWEEPER COMPANY. Renewed February 21, 1931, to Bissell Carpet Sweeper Company, Grand Rapids, Mich., a Corporation of Michigan, assignee.

80,978. CARPET SWEEPERS. Registered February 21, 1911. BISSELL CARPET SWEEPER COMPANY. Renewed February 21, 1931, to Bissell Carpet Sweeper Company, Grand Rapids, Mich., a Corporation of Michigan, assignee.

80,979. CARPET SWEEPERS. Registered February 21, 1911. BISSELL CARPET SWEEPER COMPANY. Renewed February 21, 1931, to Bissell Carpet Sweeper Company, Grand Rapids, Mich., a Corporation of Michigan, assignee.

80,980. CARPET SWEEPERS. Registered February 21, 1911. BISSELL CARPET SWEEPER COMPANY. Renewed February 21, 1931, to Bissell Carpet Sweeper Company, Grand Rapids, Mich., a Corporation of Michigan, assignee.

80,981. CARPET SWEEPERS. Registered February 21, 1911. BISSELL CARPET SWEEPER COMPANY. Renewed February 21, 1931, to Bissell Carpet Sweeper Company, Grand Rapids, Mich., a Corporation of Michigan, assignee.

80,982. CARPET SWEEPERS. Registered February 21, 1911. BISSELL CARPET SWEEPER COMPANY. Renewed February 21, 1931, to Bissell Carpet Sweeper Company, Grand Rapids, Mich., a Corporation of Michigan, assignee.

81,092. STARCH FOR LAUNDRY AND GENERAL SIZING AND STIFFENING PURPOSES. Registered February 28, 1911. NATIONAL STARCH COMPANY, Jersey City, N. J., and New York, N. Y. Renewed February 28, 1931, to Corn Products Refining Company, New York, N. Y., a Corporation of New Jersey, assignee.

81,093. STARCH FOR EDIBLE PURPOSES. Registered February 28, 1911. NATIONAL STARCH COMPANY, Jersey City, N. J., and New York, N. Y. Renewed February 28, 1931, to Corn Products Refining Company, New York, N. Y., a Corporation of New Jersey, assignee.

81,099. SILICATE OF SODA. Registered February 28, 1911. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed February 28, 1931.

81,164. WHEAT FLOUR. Registered March 7, 1911. THE NORTHWESTERN CONSOLIDATED MILLING COMPANY, Minneapolis, Minn., a Corporation of Minnesota. Renewed March 7, 1931.

81,165. CANNED SALMON. Registered March 7, 1911. PACIFIC AMERICAN FISHERIES, Chicago, Ill. Renewed March 7, 1931, to Pacific American Fisheries, South Bellingham, Wash., a Corporation of Maine.

81,202. A COMPOUND OF CORN, MOLASSES, AND SORGHUM SYRUP. Registered March 14, 1911. CORN PRODUCTS REFINING COMPANY, Jersey City, N. J., and New York, N. Y. Renewed March 14, 1931, to Corn Products Refining Company, New York, N. Y., a Corporation of New Jersey.

81,213. BAKING POWDER AND LAUNDRY STARCH. Registered March 14, 1911. S. HAMILL COMPANY, Keokuk, Iowa, a Corporation of Iowa. Renewed March 14, 1931.

81,256. CANNED SALMON. Registered March 21, 1911. DEMING & GOULD COMPANY, Chicago, Ill. Renewed March 21, 1931, to Deming & Gould Co., South Bellingham, Wash., a Corporation of Illinois.

81,285. COTTON SHEETINGS. Registered March 21, 1911. NAUMKEAG STEAM COTTON CO., Salem, Mass., a Corporation of Massachusetts. Renewed March 21, 1931.

81,289. CERTAIN SPORTING GOODS. Registered March 21, 1911. NORVELL-SHAPLEIGH HARDWARE COMPANY. Renewed March 21, 1931, to Shapleigh Hardware Company, St. Louis, Mo., a Corporation of Missouri, by change of name.

81,290. CERTAIN HARDWARE. Registered March 21, 1911. NORVELL-SHAPLEIGH HARDWARE COMPANY. Renewed March 21, 1931, to Shapleigh Hardware Company, St. Louis, Mo., a Corporation of Missouri, by change of name.

81,305. CERTAIN FOODS. Registered March 21, 1911. THE SCUDDERS-GALE GROCER CO., St. Louis, Mo., a Corporation of Missouri. Renewed March 21, 1931.

81,353. SILICATE OF SODA. Registered March 28, 1911. PHILADELPHIA QUARTZ COMPANY, Philadelphia, Pa., a Corporation of Pennsylvania. Renewed March 28, 1931.

81,382. AN ANTISEPTIC. Registered April 4, 1911. SAMUEL CABOT INCORPORATED, Boston, Mass., a Corporation of Massachusetts. Renewed April 4, 1931.

81,411. CANNED SALMON. Registered April 4, 1911. PACIFIC AMERICAN FISHERIES, Chicago, Ill. Renewed April 4, 1931, to Pacific American Fisheries, South Bellingham, Wash., a Corporation of Maine.

81,438. WRITING AND PRINTING PAPER. Registered April 11, 1911. WILLIAM M. DONALDSON. Renewed April 11, 1931, to J. A. Donaldson, doing business as Donaldson Paper Company, Harrisburg, Pa., successor.

81,527. GLASS BOTTLES AND GLASS JARS. Registered April 18, 1911. HAZEL-ATLAS GLASS COMPANY, Wheeling, W. Va., a Corporation of West Virginia. Renewed April 18, 1931.

81,560. CERTAIN TOOLS AND MACHINERY. Registered April 18, 1911. VAN CAMP HARDWARE & IRON COMPANY, Indianapolis, Ind., a Corporation of Indiana. Renewed April 18, 1931.

81,563. ORANGES, LEMONS, GRAPEFRUIT, TANGERINES, AND LIMES. Registered April 18, 1911. WINTER GARDEN CITRUS GROWERS ASSOCIATION, Winter Garden, Fla., a Corporation of Florida. Renewed April 18, 1931.

LABELS

REGISTERED NOVEMBER 25, 1930

38,271.—*Title:* COMB HONEY WRAPPED IN CELLOPHANE. For Comb Honey. C. W. AEPPLER, doing business as C. W. Aeppler Company, Oconomowoc, Wis. Published April 26, 1930.

38,272.—*Title:* WRAPPED COMB HONEY. For Comb Honey. C. W. AEPPLER, doing business as C. W. Aeppler Company, Oconomowoc, Wis. Published April 26, 1930.

38,273.—*Title:* COMB HONEY INDIVIDUALLY PACKED. For Comb Honey. C. W. AEPPLER, doing business as C. W. Aeppler Company, Oconomowoc, Wis. Published April 26, 1930.

38,274.—*Title:* COMB HONEY SEPARATELY ENCLOSED. For Comb Honey. C. W. AEPPLER, doing business as C. W. Aeppler Company, Oconomowoc, Wis. Published April 26, 1930.

38,275.—*Title:* EVANGELINE FLOUR. For Flour. AMERICAN MAID FLOUR MILLS, Houston, Tex. Published March 3, 1929.

38,276.—*Title:* AMERICAN MAID FLOUR. For Flour. AMERICAN MAID FLOUR MILLS, Houston, Tex. Published September 2, 1929.

38,277.—*Title:* CHIEF FLOUR. For Flour. AMERICAN MAID FLOUR MILLS, Houston, Tex. Published November 1, 1929.

38,278.—*Title:* BARMON ART STYLED FROCKS. For Women's Frocks. BARMON BROTHERS COMPANY, INC., Buffalo, N. Y. Published October 17, 1930.

38,279.—*Title:* FOREST TREATS. For Pecans. D. CALAMARI COMPANY, Chicago, Ill. Published February 15, 1930.

38,280.—*Title:* MERCEDES HOSIERY DE LUXE. For Men's Hosiery. CHENANGO KNITTING COMPANY, INC., Sherburne, N. Y. Published July 2, 1929.

38,281.—*Title:* SHERBURNE HOSE. For Hosiery. CHENANGO KNITTING COMPANY, INC., Sherburne, N. Y. Published July 2, 1929.

38,282.—*Title:* INDEPENDENT MERCHANTS ARE THE BACKBONE OF OUR COUNTRY—TRADE WITH THEM. For Flour. CHEROKEE MILLS, also doing business as The Independent Flour Co., Nashville, Tenn. Published August 15, 1930.

38,283.—*Title:* SPRUCE BEER. For Spruce Beer. COURTOIS & BARIL, Chicago, Ill. Published January 1, 1929.

38,284.—*Title:* BEST—NEXT TO YOU. For Plasters. THE DEANE PLASTER CO., Yonkers, N. Y. Published July 18, 1930.

38,285.—*Title:* NO. 664 CREAMERY BUTTER. For Butter. W. W. DOANE, St. Louis, Mo. Published October 15, 1930.

38,286.—*Title:* NO. 662 CREAMERY BUTTER. For Butter. W. W. DOANE, St. Louis, Mo. Published October 15, 1930.

38,287.—*Title:* NO. 661 CREAMERY BUTTER. For Butter. W. W. DOANE, St. Louis, Mo. Published October 15, 1930.

38,288.—*Title:* NO. 663 CREAMERY BUTTER. FOR Butter. W. W. DOANE, St. Louis, Mo. Published October 15, 1930.

38,289.—*Title:* IMPERIAL BRAND SALTED IN THE SHELL. For Peanuts and Almonds. HELEN EMMA DOWNS, doing business as The Imperial Nut Products, Los Angeles, Calif. Published June 30, 1930.

38,290.—*Title:* OUR GANG. For Playthings. THE GRAY LITHOGRAPH COMPANY, New York, N. Y. Published November 20, 1928.

38,291.—*Title:* GRENNAN COOKIES. For Cookies. GRENNAN BAKERIES, INC., Chicago, Ill. Published September 15, 1930.

38,292.—*Title:* COLOR COMPARISON CARDS. For Booklet of Cards to Determine the Exact Shades of Butter. CHR. HANSEN'S LABORATORY INC., Little Falls, N. Y. Published September 29, 1930.

38,293.—*Title:* LEELANAU BRAND MICHIGAN NATURAL RED SOUR PITTED CHERRIES. For Canned Red Sour Pitted Cherries. THE HASEROT COMPANY, Cleveland, Ohio. Published July 1, 1929.

38,294.—*Title:* KRUEGER'S SARSAPARILLA. For Beverage. KRUEGER BEVERAGE COMPANY, Newark, N. J. Published May 22, 1930.

38,295.—*Title:* KRUEGER'S LIME DRY. For Beverage. KRUEGER BEVERAGE COMPANY, Newark, N. J. Published May 22, 1930.

38,296.—*Title:* KRUEGER'S CREAM SODA. For Beverage. KRUEGER BEVERAGE COMPANY, Newark, N. J. Published May 22, 1930.

38,297.—*Title:* LAFAYETTE AGUA CALIENTE HOT COFFEE BOTTLE. For Bottles Insulated with Cork and Asbestos for Holding Hot or Cold Beverages. O. J. LAFAYETTE & CO. LTD., Los Angeles, Calif. Published June 24, 1930.

38,298.—*Title:* SONNY SOUTH. For Buckwheat, Wheat and Corn Pancake Flour. LOUISVILLE MILLING COMPANY, Minneapolis, Minn. Published Sept. 16, 1930.

38,299.—*Title:* MILLER'S POP-PI-YA. For a Confection Composed of Blended Fruits. REINHOLD C. MILLER, Oakland, Calif. Published May 6, 1930.

38,300.—*Title:* NEIGHBORHOOD STORES. For Canned Pears. NEIGHBORHOOD STORES, INC., San Francisco, Calif. Published July 15, 1930.

38,301.—*Title:* PERFECTION DISTILLED WATER. For Distilled Water. PERFECTION EQUIPMENT CO., INC., St. Louis, Mo. Published September 15, 1930.

38,302.—*Title:* PURITAN PURE MALT EXTRACT. For Malt Extract. PURITAN MALT EXTRACT COMPANY, Milwaukee, Wis. Published July 1, 1930.

38,303.—*Title:* EDUCATIONAL LETTERS. For Letters of the Alphabet and Numerals. THE A. I. ROOT COMPANY, Medina, Ohio. Published June 5, 1930.

38,304.—*Title:* KEEP YOUR RUMIDOR LOADED WITH REFILLS. For Smoker's Article for Flavoring and Moistening Cigars, Cigarettes, and Pipe Tobacco. THE RUMIDOR CORPORATION, Weehawken, N. Y. Published August 22, 1930.

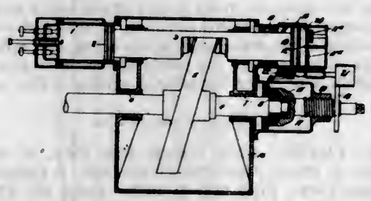
REISSUES

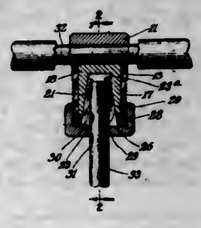
NOVEMBER 25, 1930

17,877. BUTTON. CHARLES M. BONDY, Cleveland, Ohio, assignor to The Bondy Auto Top Company, Cleveland, Ohio, a Corporation of Ohio. Filed Feb. 18, 1930. Serial No. 429,432. Original No. 1,688,520, dated Oct. 23, 1928, Serial No. 257,217, filed Feb. 27, 1928. 7 Claims. (24—103.)



1. The combination with a button of a plurality of separate pin members secured to said button, at least one of said pin members being readily detachable from said button.

17,878. RESINOUS CONDENSATION PRODUCT. ANDRÉ HENRI VICTOR DURR, Paris, France, assignor to Compagnie Nationale de Matieres Colorantes et Manufactures de Produits Chimiques du Nord Reunies, Etablissements Kuhlmann, Paris, France, a Corporation of France. Filed Aug. 19, 1930. Serial No. 476,446. Original No. 1,739,447, dated Dec. 10, 1929, Serial No. 329,940, filed Jan. 2, 1929, and in France Dec. 31, 1927. 6 Claims. (Cl. 260—8.)



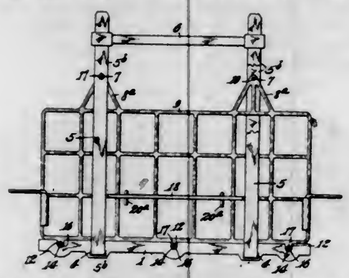
1. The method of preparing a resinous condensation product which consists in heating in an enclosed space under pressure a siccative oil and a synthetic resin having unesterified hydroxyl groups and formed by heating a polyhydric alcohol with a mixture of a polybasic acidic compound and at least one natural resin, the heating of said oil and resin being carried out at a temperature sufficiently high to produce a soluble reaction product in which the oil is chemically combined with said resin.

17,879. CONSTRUCTION OF OPERATING CRANKLESS INTERNAL COMBUSTION AND EXPLOSION ENGINES. ANTHONY GEORGE MALDON MICHELL, Melbourne, Australia, assignor, by mesne assignments, to Michell-Crankless Engines Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 16, 1930. Serial No. 482,346. Original No. 1,698,102, dated Jan. 8, 1929, Serial No. 202,897, filed July 1, 1927, and in Great Britain July 27, 1926. 22 Claims. (Cl. 123—58.)

4. In an internal combustion engine, a combustion cylinder, a swash plate having its axis of rotation parallel to the axis of the combustion cylinder, a power piston in the latter and arranged to coact with and rotate said swash plate, a compressor cylinder for supplying working fluid to the combustion cylinder having perforations in the wall thereof, a compressor piston in the compression cylinder overrunning said perforations to a variable extent according to the movement of the compressor piston and swash plate, and means for moving the swash plate and pistons in the direction of the axes of said cylinders, whereby the quantity of working fluid supplied to the combustion cylinder is varied simultaneously with the compressor volume therein.

17,880. CONNECTER. CHARLES L. STOELTZLEN, Erie, Pa., assignor to Penn-Union Electric Corporation, a Corporation of Pennsylvania. Filed July 29, 1930. Serial No. 471,516. Original No. 1,739,740, dated Dec. 17, 1929, Serial No. 332,810, filed Jan. 16, 1929. 5 Claims. (Cl. 173—303.)

1. In a cable connecter, a yoke member having a pair of legs for straddling a main cable and provided with threads on the external portion of the legs whereby the yoke member may be drawn against the cable with the same force on each leg, a body member positioned between said legs and having one end adapted to engage the main cable and the other end thereof provided with a tapered recess, a separate clamping sleeve for a branch cable positioned in said recess, and adapted to tighten on the branch cable by being forced into the recess and a nut engaging said threads for drawing the yoke member against one side of the main cable and having a surface for pressing the sleeve into the recess whereby the sleeve is clamped on the branch cable and the body member is simultaneously pressed against the main cable on the opposite side from the yoke, the surfaces of the sleeve and nut which transmit pressures therebetween lying substantially normal to the forces being transmitted between the nut and the main cable so that the friction between said surfaces is a minimum.



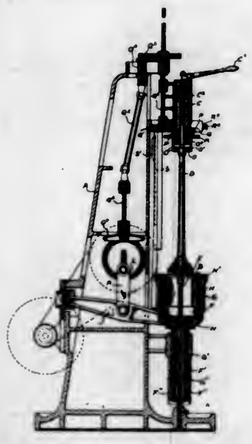
17,881. FASTENING FOR FABRICS AND THE LIKE. MARTIN WINTERHALTER, Halle-on-the-Saale, Germany, assignor, by mesne assignments, to Mishawaka Rubber & Woolen Manufacturing Company, Mishawaka, Ind., a Corporation of Indiana. Filed Oct. 7, 1926. Serial No. 140,186. Original No. 1,549,231, dated July 27, 1926, Serial No. 25,578, filed Apr. 24, 1925, and in Great Britain Dec. 31, 1924. 25 Claims. (Cl. 24—205.)

1. A device for connecting sheets of fabric or the like edge to edge, comprising a plurality of intermeshing

plates connected alternately to opposite edges of said sheets of fabric, each of the plates being provided at one side with a plurality of grooves carried at an angle to each other and at the other side with ribs adapted to interlock with the grooves of the adjacent plate so as to prevent displacement in the planes of the plates.

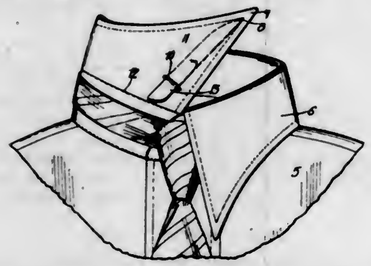
17,882. PICKLING CRATE. CHARLES W. HALLER, Wheeling, W. Va., assignor to Wheeling Bronze Casting Company, Wheeling, W. Va., a Corporation of West Virginia. Filed Mar. 26, 1930. Serial No. 439,232. Original No. 1,711,054, dated Apr. 30, 1929, Serial No. 308,782, filed Sept. 27, 1928. 9 Claims. (Cl. 266—7.)

1. A sheet pickling crate comprising a base, a plurality of integrally cast grids extending upwardly from said base, each of said grids comprising a plurality of horizontally disposed bars and a plurality of vertically disposed bars lying all in the same plane, said grids being attached to the base in mutually spaced arrangement to provide perforate sheet confining walls giving both vertical and lateral support to the faces of the sheets.



17,883. WOVEN-WIRE-CLOTH COVERING FOR PRESSING-MACHINE ELEMENTS. GEORGE F. SIMPSON, Boston, Mass., assignor to The Prosperity Company, Inc., Syracuse, N. Y., a Corporation of New York. Filed Oct. 15, 1930, Serial No. 488,955. Original No. 1,639,458, dated Aug. 16, 1927, Serial No. 139,732, filed Oct. 5, 1926. 4 Claims. (Cl. 68—9.)

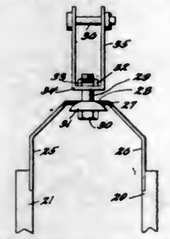
1. In a pressing machine, the combination of upper and lower pressing elements, one of which is movable toward and from the other and one being formed hollow for receiving a heating medium and provided with a line of jet openings through its pressing face for ejecting fluid, a metallic flexible sheet covering the pressing face of said element and spaced apart therefrom and formed with perforations throughout the greater part of the area thereof covering the pressing face forming a distributing chamber for the fluid ejected through said jet openings and said sheet having means in line with said jet openings for deflecting the fluid laterally through said chamber.



17,884. METHOD OF TRUING GEARS. ALEXANDER W. COPLAND, deceased, by Detroit & Security Trust Company, Detroit, Mich., assignee, and MAXWELL I. MATHEWSON, Providence, R. I., assignors to Detroit & Security Trust Company, Detroit, Mich. Filed Aug. 18, 1930. Serial No. 476,250. Continuation of original application Serial No. 551,141, filed Apr. 10, 1922, and in Great Britain Sept. 14, 1926. Original No. 1,683,867, dated Sept. 11, 1928. Filed Feb. 4, 1927, Serial No. 165,867. 18 Claims. (Cl. 51—278.)

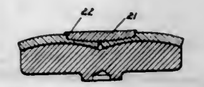
1. The method of grinding gears comprising registering the gear to be ground and a lap having a parallel tooth contour, axially reciprocating the one with respect to the other into and out of mutual engagement, maintaining substantially throughout the mutual overlapping rela-

tion of the two substantially uniform torque pressure per unit area of mutual engagement, and progressively changing the registration between the teeth of the lap and those of the gear.



17,885. SHIRT-COLLAR STIFFENER. JOSEPH H. JANOWITCH, Brooklyn, N. Y. Filed July 30, 1930. Serial No. 471,906. Original No. 1,741,311, dated Dec. 31, 1929, Serial No. 288,456, filed June 26, 1928. 5 Claims. (Cl. 2—132.)

1. The combination with a soft collar comprising a plurality of plies of material having extended front points and stitched together by lines of stitching meeting at an acute angle at the points, and slits in the inner ply of the collar material spaced from the front ends of the collar and also spaced from the folded edge thereof, of stiffening strip members insertible between the inner and outer plies of the collar material through said slits said strip members having their lower ends curved at one side to form a point for fitting into the pocket, formed by the meeting of lines of sewing at the front points of the collar and having the upper ends rounded to closely fit into and conform to the shape of the folded edge of the collar, and said strip members extending into the points of the collar and being disposed in a direction opposing a curling action of said points.

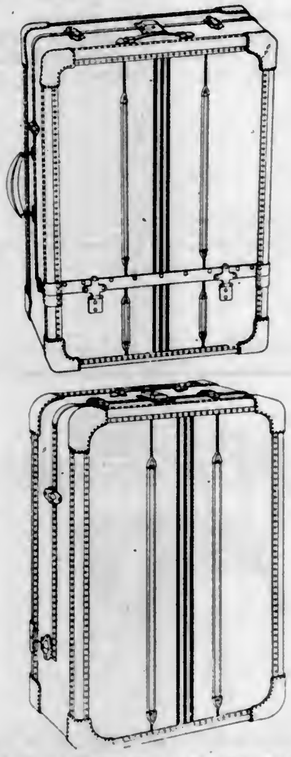


17,886. CRANE. LEON PIERCE, New York, N. Y., assignor to Pierce Steel Pile Corporation, a Corporation of New York. Filed May 5, 1928. Serial No. 275,532. Original No. 1,613,409, dated Jan. 4, 1927, Serial No. 89,034, filed Feb. 18, 1926. 2 Claims. (Cl. 61—74.)

1. In a crane, a boom, leads suspended from said boom, connecting means between said boom and leads permitting rotation of said leads and swinging of the same into a position parallel with the boom, said connecting means comprising a cradle pivoted to and suspended beneath said boom and an inverted U-shaped frame suspended beneath and rotatable relative to said cradle, a bolt connecting said frame and cradle, said frame having an opening permitting passage of said bolt, said opening being larger than said bolt, a block having a hemispherical upper sur-

face mounted on said bolt and upon which said frame is adapted to rest to permit movement of the frame in all directions and leads rigidly connected to the downwardly projecting arms of said frame, said leads being adapted to rest on the ground and to have their free ends located at various positions within the radius of the swing of said boom, substantially as described.

17,887. OPHTHALMIC LENS. EDGAR D. TILLYER, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Aug. 21, 1930. Serial No. 476,895. Original No. 1,544,612, dated July 7, 1925, Serial No. 528,563, filed Feb. 23, 1922. 8 Claims. (Cl. 88—54.)

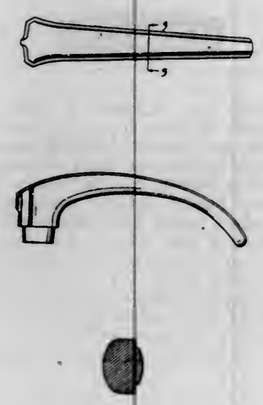


8. A multifocal lens comprising a major portion of glass of one index of refraction, and a minor portion of glass of a different index of refraction inserted in the major portion and both portions finished to one continuous curve, said minor portion tapering from a thick upper edge to a feather edge at its lowest point and the optical center of the minor portion being located near and below the thick edge at a point where a line drawn thru the center of curvature of the front and rear surfaces of the minor portion will, within the thickness of the minor portion be substantially coincident with a line drawn thru the centers of the inner surface of the minor portion and the inner surface of the major portion.

DESIGNS

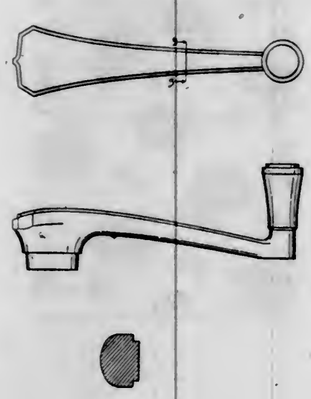
NOVEMBER 25, 1930

82,596. TRAVELING CASE. SAUL APTER, Cincinnati, Ohio. Filed July 10, 1930. Serial No. 36,320. Term of patent 7 years.



The ornamental design for a traveling case, as shown and described.

82,597. TEXTILE FABRIC. FRED W. BADER, Hillsdale, N. J., assignor to J. Kridel, Sons & Co., a Partnership of New York. Filed Sept. 24, 1930. Serial No. 37,062. Term of patent 3½ years.

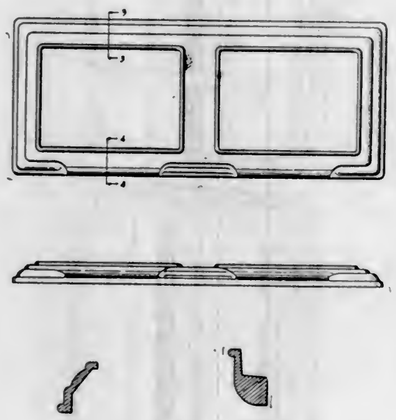


The ornamental design for a textile fabric as shown and described.

82,598. DOOR HANDLE. JAMES L. BROWNELL, Kalamazoo, Mich., assignor to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Filed Aug. 22, 1930. Serial No. 36,734. Term of patent 7 years.

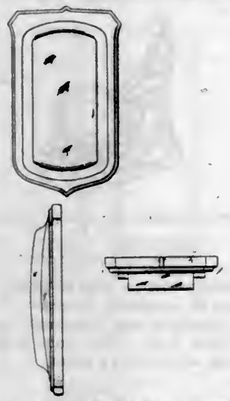
The ornamental design for a door handle as shown.

82,599. WINDOW-REGULATOR HANDLE. JAMES L. BROWNELL, Kalamazoo, Mich., assignor to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Filed Aug. 22, 1930. Serial No. 36,735. Term of patent 7 years.



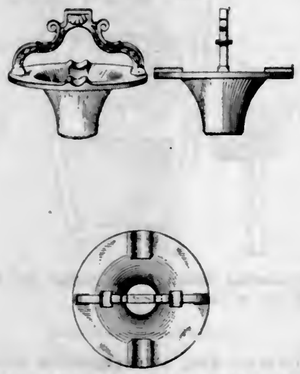
The ornamental design for a window regulator handle as shown.

82,600. HANDLE. JAMES L. BROWNELL, Kalamazoo, Mich., assignor to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Filed Aug. 22, 1930. Serial No. 36,737. Term of patent 7 years.



The ornamental design for a handle as shown.

82,601. PICTURE OR CARD HOLDER. JAMES L. BROWNELL, Kalamazoo, Mich., assignor to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Filed Aug. 22, 1930. Serial No. 36,740. Term of patent 7 years.

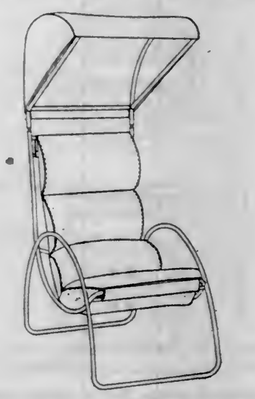


The ornamental design for a picture or card holder as shown.

82,602. LAMP HOUSING. JAMES L. BROWNELL, Kalamazoo, Mich., assignor to Checker Cab Manufacturing Corporation, Kalamazoo, Mich. Filed Aug. 22, 1930. Serial No. 36,741. Term of patent 7 years.

The ornamental design for a lamp housing as shown.

82,603. TOP FOR SMOKERS' STANDS. HUBERT DALTON, Stamford, Conn. Filed Aug. 12, 1930. Serial No. 36,639. Term of patent 14 years.

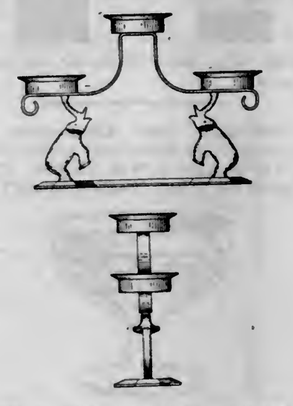


The ornamental design for a top for smokers' stands, as shown.

82,604. CHAIR OR SIMILAR ARTICLE. WILLIAM S. FERRIS, Elkhart, Ind. Filed May 9, 1930. Serial No. 35,558. Term of patent 14 years.

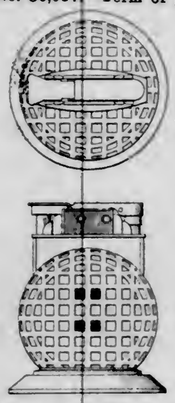
The ornamental design for a chair or similar article substantially as shown.

82,605. CHAIR. AVROM BAYAR GOODMAN, New York, N. Y., assignor to Ficks Reed Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Aug. 28, 1930. Serial No. 36,812. Term of patent 3½ years.



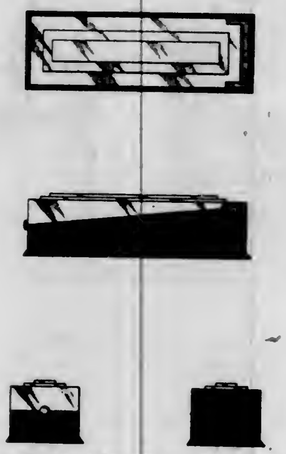
The ornamental design for a chair, as shown.

82,606. LAMP. FRANK GRITT, Indianapolis, Ind. Filed Sept. 12, 1930. Serial No. 36,948. Term of patent 3½ years.



The ornamental design for a lamp as shown.

82,607. FLOWERPOT STAND OR SIMILAR ARTICLE. GEORGE HOLZWORTH, Halifax, Mass. Filed Sept. 10, 1930. Serial No. 36,926. Term of patent 3½ years.



The ornamental design for a flowerpot stand or similar article as shown.

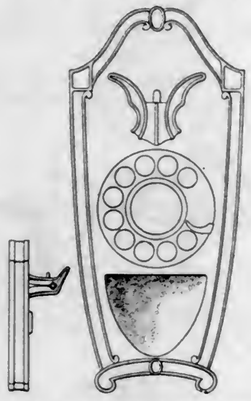
82,608. LIGHTER. JAMES W. JENNINGS, Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass., a Corporation of Massachusetts. Filed Sept. 13, 1930. Serial No. 36,957. Term of patent 7 years.

The ornamental design for a lighter substantially as shown.

82,609. CASING OR SIMILAR CONTAINER. ARCHDALE J. JONES, New York, N. Y., assignor to Bradford Darrach, Alan D. Marks, and Franklin J. Foster. Filed Dec. 12, 1929. Serial No. 33,760. Term of patent 7 years.

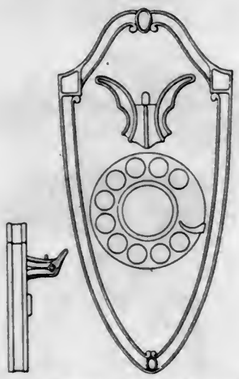
The design for a casing, or similar container substantially as shown.

82,610. SHERBET. JOHN KIRKPATRICK, Clarksburg, W. Va., assignor to Hazel-Atlas Glass Co., Wheeling, W. Va., a Corporation of West Virginia. Filed Dec. 27, 1929. Serial No. 33,945. Term of patent 7 years.



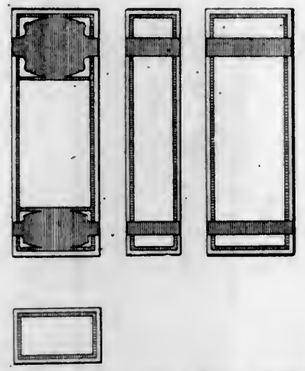
The ornamental design for a sherbet, as shown and described.

82,611. TABLE LAMP. MORRIS KORNBLUM, Brooklyn, N. Y., assignor to Metal Lamp Corporation, Brooklyn, N. Y., a Corporation of New York. Filed May 12, 1930. Serial No. 35,620. Term of patent 3½ years.



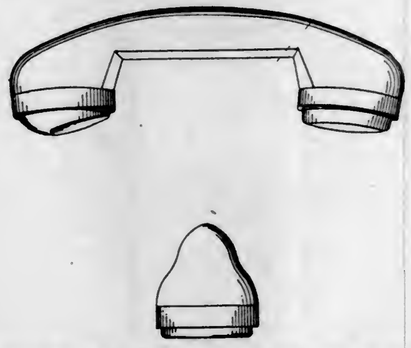
The ornamental design for a table lamp, as shown and described.

82,612. CASING FOR A TELEPHONE SUBSTATION SET. JAMES M. LABAUGH, Paterson, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed June 4, 1930. Serial No. 35,902. Term of patent 14 years.



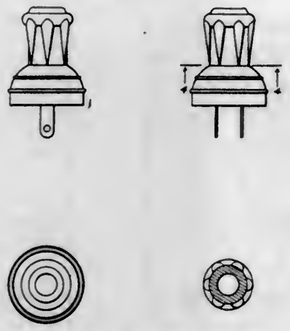
The ornamental design for a casing for a telephone substation set, as shown.

82,613. CASING FOR A TELEPHONE SUBSTATION SET. JAMES M. LABAUGH, Paterson, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed June 4, 1930. Serial No. 35,903. Term of patent 14 years.



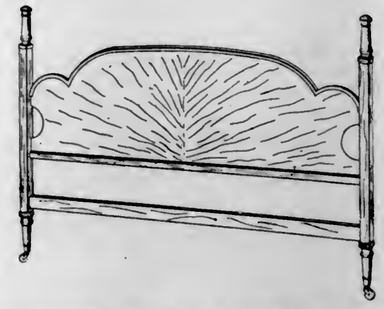
The ornamental design for a casing for a telephone substation set, as shown.

82,614. CARTON. MAX LIPPMANN, St. Louis, Mo., assignor to S. Pfeiffer Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed June 30, 1930. Serial No. 36,244. Term of patent 14 years.



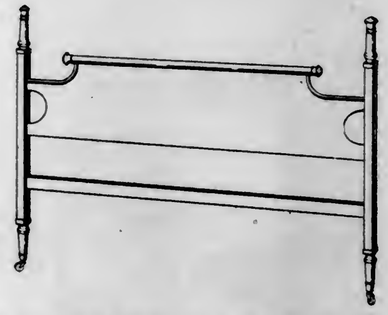
The ornamental design for a carton substantially as shown.

82,615. HAND TELEPHONE. LOUIS J. LOEFFLER, Stapleton, N. Y. Filed June 5, 1930. Serial No. 35,908. Term of patent 14 years.



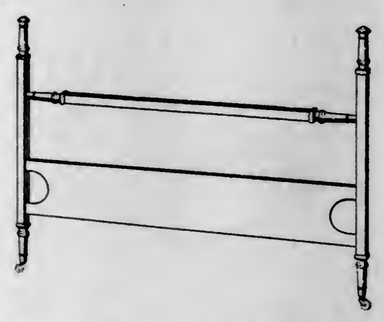
The ornamental design for a hand telephone as shown.

82,616. ATTACHMENT PLUG. LOUIS LUDWIG, Brooklyn, N. Y. Filed Sept. 12, 1930. Serial No. 36,955. Term of patent 7 years.



The ornamental design for an attachment plug, as shown.

82,617. BEDSTEAD END FRAME OR ANALOGOUS ARTICLE. JOHN MCKAY, Buffalo, N. Y., assignor to Hard Manufacturing Company, Buffalo, N. Y. Filed Sept. 9, 1930. Serial No. 36,912. Term of patent 7 years.

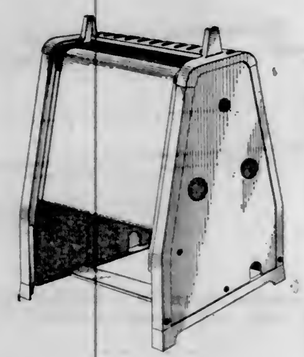


The ornamental design for a bedstead end frame or analogous article, substantially as shown and described.

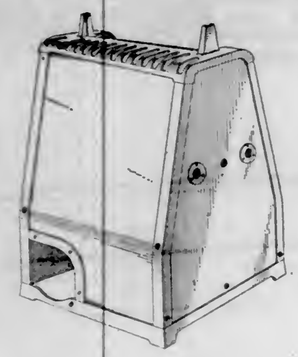
82,618. BEDSTEAD END FRAME OR ANALOGOUS ARTICLE. JOHN MCKAY, Buffalo, N. Y., assignor to Hard Manufacturing Company, Buffalo, N. Y. Filed Sept. 9, 1930. Serial No. 36,913. Term of patent 7 years.

The ornamental design for a bedstead end frame or analogous article, substantially as shown and described.

82,619. BEDSTEAD END FRAME OR ANALOGOUS ARTICLE. JOHN MCKAY, Buffalo, N. Y., assignor to Hard Manufacturing Company, Buffalo, N. Y. Filed Sept. 9, 1930. Serial No. 36,914. Term of patent 7 years.

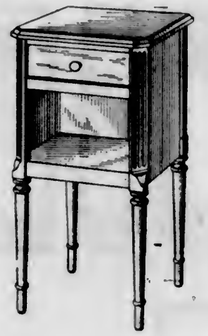


The ornamental design for a bedstead end frame or analogous article, substantially as shown and described.



82,620. BEDSTEAD END FRAME OR ANALOGOUS ARTICLE. JOHN MCKAY, Buffalo, N. Y., assignor to Hard Manufacturing Company, Buffalo, N. Y. Filed Sept. 9, 1930. Serial No. 36,915. Term of patent 7 years.

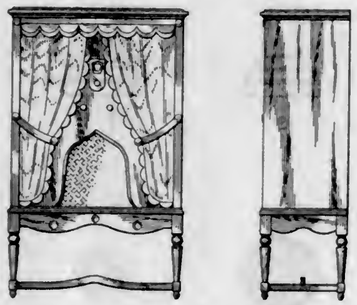
The ornamental design for a bedstead end frame or analogous article, substantially as shown and described.



82,621. TOASTING-MACHINE CASING. LESTER E. PADELFORD, Buffalo, N. Y., assignor to The Republic Metalware Company, Buffalo, N. Y., a Corporation of New York. Filed Feb. 11, 1930. Serial No. 34,482. Term of patent 14 years.

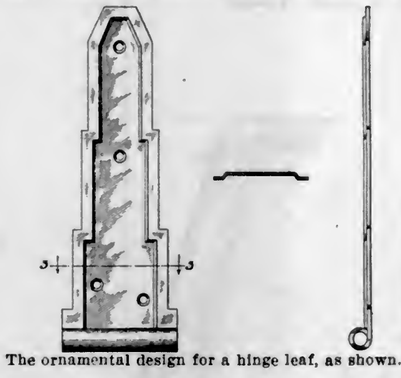
The ornamental design for a toasting machine casing as shown.

82,622. NIGHT TABLE OR THE LIKE. ERWIN J. PAULI, Brooklyn, N. Y., assignor to Doehler Furniture Co. Inc., a Corporation of New York. Filed Apr. 16, 1930. Serial No. 35,271. Term of patent 7 years.



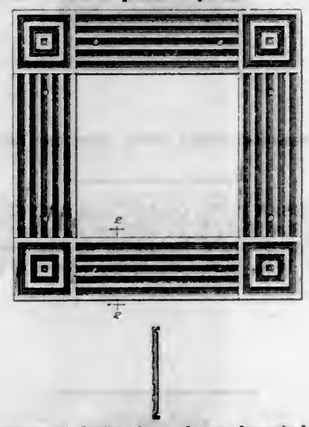
The ornamental design for a night table or the like, as shown.

82,623. CHEST OF DRAWERS OR THE LIKE. ERWIN J. PAULI, Brooklyn, N. Y., assignor to Doehler Furniture Co. Inc., a Corporation of New York. Filed Apr. 16, 1930. Serial No. 35,273. Term of patent 7 years.



The ornamental design for a chest of drawers or the like, as shown.

82,624. RADIO AND TELEVISION CABINET. JOSEPH PHILLIPS, Denver, Colo. Filed Sept. 15, 1930. Serial No. 36,971. Term of patent 7 years.



The ornamental design for a radio and television cabinet as shown.

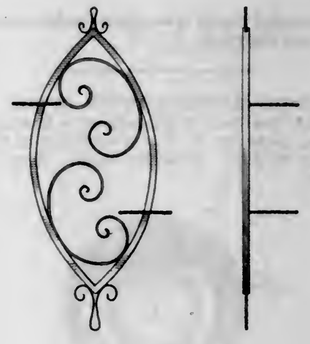
82,625. HINGE LEAF. HORACE H. RAYMOND, Berlin, Conn., assignor to The Stanley Works, New Britain, Conn., a Corporation of Connecticut. Filed Apr. 5, 1930. Serial No. 35,177. Term of patent 14 years.

The ornamental design for a hinge leaf, as shown.

82,626. FRAME FOR WINDOWS OR THE LIKE. HENRY C. REUTER, Chicago, Ill. Filed June 14, 1929. Serial No. 31,680. Term of patent 7 years.

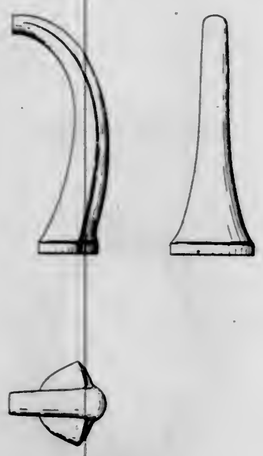
The ornamental design for a frame for windows or the like, as shown.

82,627. EMBOSSED GLASSINE PAPER. EDWIN H. SCHEELE, New York, N. Y., assignor to Westfield River Paper Company, Inc., Russell, Mass., a Corporation of Massachusetts. Filed July 10, 1930. Serial No. 36,317. Term of patent 14 years.



The ornamental design for embossed glassine paper as shown and described.

82,628. DOME LIGHT OR THE LIKE FOR AN AUTOMOTIVE VEHICLE. WILLIAM SCHNELL, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Oct. 22, 1929. Serial No. 33,138. Term of patent 7 years.



The ornamental design for a dome light or the like for an automotive vehicle substantially as shown.

82,629. WALL POT HOLDER. IRVING G. SCOTT and MAUD C. FOX, New York, N. Y. Filed July 24, 1930. Serial No. 36,462. Term of patent 7 years.

The ornamental design for a wall pot holder as shown.

82,630. DRAFT ARM FOR A SODA FOUNTAIN. DEAN C. SEITZ, Cleveland, Ohio, assignor to The Russ Manufacturing Company, a Corporation of Ohio. Filed July 12, 1930. Serial No. 36,338. Term of patent 7 years.

The ornamental design for a draft arm for a soda fountain, as shown.

82,631. PHOTOGRAPHIC-SHUTTER COVER. WALTER D. TEAGUE, New York, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed July 26, 1930. Serial No. 36,480. Term of patent 14 years.

The ornamental design for a photographic shutter cover as shown and described.

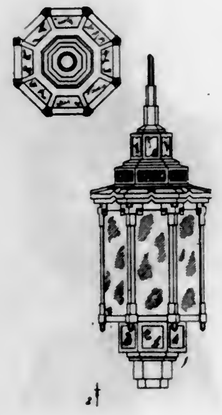
82,632. PHOTOGRAPHIC-SHUTTER COVER. WALTER D. TEAGUE, New York, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed July 26, 1930. Serial No. 36,481. Term of patent 14 years.

The ornamental design for a photographic shutter cover as shown and described.

82,633. PUSH BAR FOR DOORS. ERNEST L. TEICH, New Britain, Conn., assignor to The American Hardware Corporation, New Britain, Conn., a Corporation of Connecticut. Filed Jan. 10, 1930. Serial No. 34,093. Term of patent 14 years.

The ornamental design for a push bar for doors as shown.

82,634. SUGAR BOWL OR SIMILAR ARTICLE. HELEN UFFORD, New York, N. Y., assignor to Quaker Oats Company, Chicago, Ill., a Corporation of New Jersey. Filed June 28, 1930. Serial No. 36,218. Term of patent 3½ years.

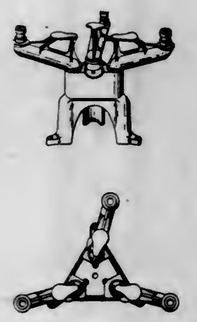


The ornamental design for a sugar bowl or similar article, as shown and described.

82,635. CUP OR SIMILAR ARTICLE. HELEN UFFORD, New York, N. Y., assignor to Quaker Oats Company, Chicago, Ill., a Corporation of New Jersey. Filed June 28, 1930. Serial No. 36,219. Term of patent 7 years.

The ornamental design for a cup or similar article, as shown and described.

82,636. STREET LAMP. WESTERN UNDERWOOD, Santa Monica, Calif. Filed Aug. 25, 1930. Serial No. 36,753. Term of patent 8½ years.



The ornamental design for a street lamp, as shown.

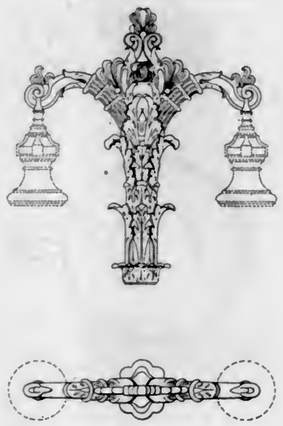
82,637. JUG. BEN H. WILSON, Toledo, Ohio, assignor to Owens-Illinois Glass Company, Toledo, Ohio, a Corporation of Ohio. Filed Mar. 29, 1930. Serial No. 35,070. Term of patent 14 years.

The ornamental design for a jug, substantially as shown and described.

82,638. BASE FOR A LAUNDRY APPLIANCE. JOHN G. FEHN, Des Moines, Iowa. Filed May 31, 1930. Serial No. 35,872. Term of patent 14 years.

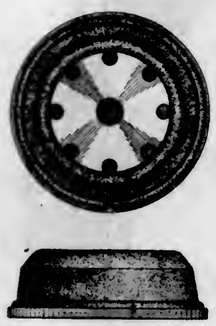
The ornamental design for a base for a laundry appliance, as shown.

82,639. COMBINED SUPPORT AND HOUSING FOR AN ELECTRIC DISCHARGE DEVICE. OTTO J. MOHLER, Bloomfield, N. J., assignor to General Electric Vapor Lamp Company, Hoboken, N. J., a Corporation of New Jersey. Filed Sept. 25, 1929. Serial No. 32,862. Term of patent 14 years.



The ornamental design for a combined support and housing for an electric discharge device substantially as shown and described.

82,640. COLLAPSIBLE TUBE. FRANK J. LYNCH, Hillside, N. J., assignor to Pinaud, Inc., New York, N. Y., a Corporation of New York. Filed Mar. 29, 1930. Serial No. 35,069. Term of patent 14 years.

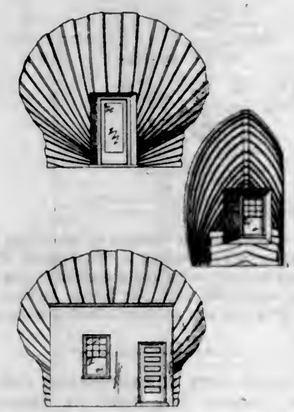


The ornamental design for collapsible tube substantially as shown and described.

82,641. LAMP SUPPORT. JOSEPH W. GOSLING, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Apr. 23, 1930. Serial No. 35,354. Term of patent 14 years.

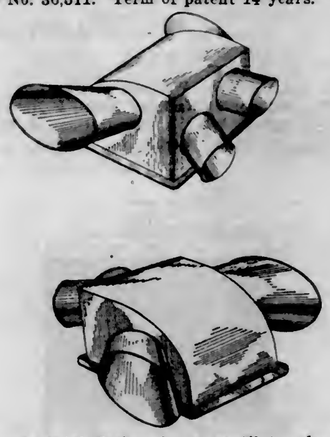
The ornamental design for a lamp support substantially as shown.

82,642. RADIO LEG REST. MILTON A. RUSH, San Francisco, Calif. Filed June 7, 1930. Serial No. 35,970. Term of patent 7 years.



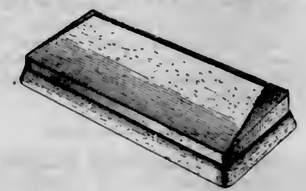
The ornamental design for a radio leg rest, as shown.

82,643. FURNITURE STAND. SUREN MATOSIAN, Los Angeles, Calif. Filed June 30, 1930. Serial No. 36,246. Term of patent 3½ years.

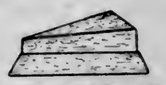


The ornamental design for a furniture stand as shown.

82,644. FILLING STATION. JOE H. GLENN, JR., and BERT L. BENNETT, Winston-Salem, N. C., assignors of one-third to Horace M. Du Bose, jr., and Robert C. Vaughn, Winston-Salem, N. C. Filed July 24, 1930. Serial No. 36,463. Term of patent 14 years.

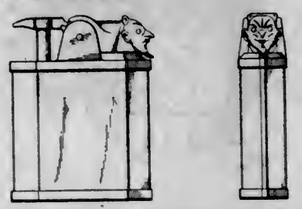


The ornamental design for a filling station as shown.



82,645. VENTILATOR FOR VEHICLES. CHARLES S. WARNOCK, Los Angeles, Calif. Filed July 29, 1930. Serial No. 36,511. Term of patent 14 years.

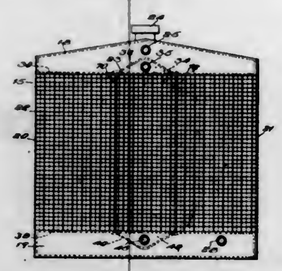
The ornamental design for a ventilator for vehicles, substantially as shown.



82,646. JEWELRY CONTAINER. JOHN M. SHIELDS, Chicago, Ill., assignor to F. H. Noble & Co., Chicago, Ill., a Corporation of Illinois. Filed June 20, 1929. Serial No. 31,772. Term of patent 14 years.

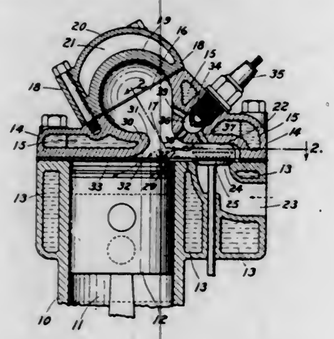
The ornamental design for a jewelry container, as shown.

82,647. CIGARETTE LIGHTER. IRVING FLORMAN, New York, N. Y. Filed Sept. 5, 1930. Serial No. 36,870. Term of patent 14 years.



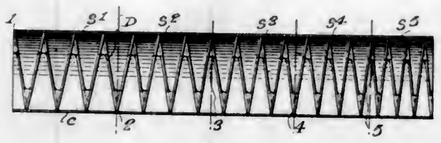
The ornamental design for a cigarette lighter as shown.

PATENTS



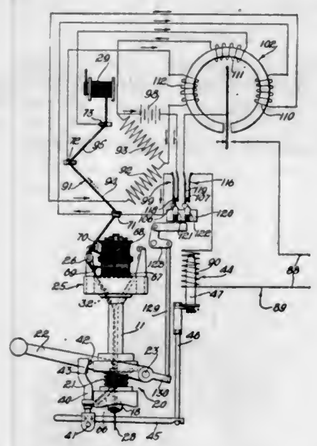
GRANTED NOVEMBER 25, 1930

1,782,394. RADIATOR. WILLIAM A. BEIMLING, Milwaukee, Wis., assignor to National Brake & Electric Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Aug. 16, 1926. Serial No. 129,303. 5 Claims. (Cl. 257—125.)



1. In a radiator, the combination of a pair of separate core structures, a single pair of headers common to both said core structures, said core structures having passages between said headers, said headers each having seaparate compartments connecting the passages of one core structure with each other, and the passages of the other core structure with each other, and separating the passages of the two core structures, a pair of inlet connections on one header for the two compartments thereof, and a pair of outlet connections on the other header, one for each of its compartments.

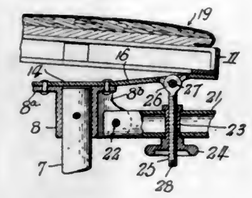
1,782,395. ENGINE COMBUSTION CHAMBER. FRANK A. BULLINGTON, Kansas City, Mo., assignor to Bullington Engine Heads, Kansas City, Mo., a Common-Law Trust consisting of Louis R. Ash, Howard P. Treadway, and Frank A. Bullington. Filed Mar. 10, 1927, Serial No. 174,285. Renewed Oct. 7, 1929. 20 Claims. (Cl. 123—191.)



1. In an internal combustion engine, a cylinder, a cylinder head having a combustion chamber therein having restricted communication with said cylinder and adapted to contain the greater portion of the compression space for said cylinder, valved inlet and exhaust means at the head end of said cylinder and at the side thereof independent of said combustion chamber, and deflector means associated with said inlet means comprising a flat wall portion on said cylinder head between said inlet means and said combustion chamber.

1,782,396. MUFFLER. ARTHUR HARRY AARON, Amityville, N. Y., assignor to Fairchild Aviation Corporation, New York, N. Y., a Corporation of Delaware. Filed Jan. 29, 1929. Serial No. 335,904. 9 Claims. (Cl. 137—160.)

1. In a muffler, a casing, baffling means of a substantially spiral form and of a pitch successively lessened in predetermined degrees at predetermined points throughout its length toward the outlet of said casing.

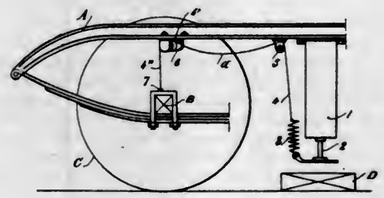


1,782,397. APPARATUS FOR TESTING ELECTRICAL CONDUCTORS. ARTHUR HERMAN ADAMS, La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 21, 1925. Serial No. 70,456. 10 Claims. (Cl. 175—183.)

1. In an apparatus for testing an electrical conductor, an electrical circuit including a Wheatstone bridge, said bridge having an arm including a section of the conductor, and a relay associated with the bridge having a winding included in said arm and another winding connected across the bridge.

1,782,398. BACK-REST ARRANGEMENT FOR CHAIRS. TORRIS H. ALFREDS, Park Ridge, Ill., assignor to William S. Ferris, now trading as Do/More Chair Company, Elkhart, Ind. Filed June 13, 1928. Serial No. 284,966. 7 Claims. (Cl. 55—157.)

1. A chair embodying therein, a seat frame including a plate and a seat frame post to which said plate is secured, a back rest post pivoted at one end with respect to said seat frame, a threaded member pivoted to said seat frame plate for a swinging movement about an axis parallel with that of the back rest post, a hand wheel

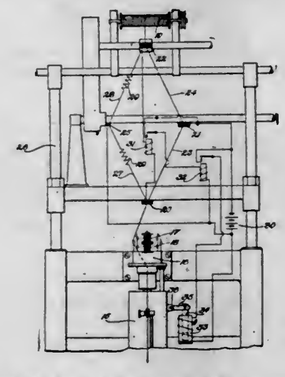


having a sleeve rotatively mounted with respect to said post and having operative engagement with said threaded member.

1,782,399. ABSORPTION OF SOUND. ERNEST V. AMY, New York, N. Y., assignor to Amy, Aceves & King, Inc., New York, N. Y., a Corporation of New York. Filed Oct. 5, 1929. Serial No. 397,487. 12 Claims. (Cl. 181—30.)

1. A structure pierced with a multiplicity of cells respectively of greater length than width and open to permit the entry of sound energy into the air within them, each of said cells having a component of its length parallel to that face of the structure to which comes sound to be absorbed, and there being such a number of cells per unit volume of the structure as to absorb a material amount of the sound reaching the said face of the structure.

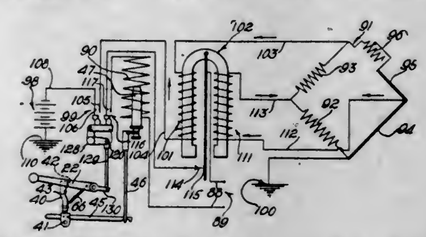
1,782,400. WHEEL-LIFTING DEVICE. ALFRED JEAN GUSTAVE BOLARD, Vernon, Eure, France, assignor to "Rusbol," Société à Responsabilité Limitée, Clichy, France, a Corporation of France. Filed June 21, 1928, Serial No. 287,192, and in France Mar. 29, 1928. 5 Claims. (Cl. 254—133.)



1. In a wheel lifting device for vehicles having a chassis, wheels and axles, the combination of a jack carried by said chassis, a cable attached to said axle, a fixed member on said chassis about which said cable is wrapped and a spring connecting said cable to one of the elements of said jack.

1,782,401. METHOD OF PRODUCING ROSIN OIL. JOSEPH N. BORGLIN, Kenvil, N. J., assignor to Hercules Powder Company, Wilmington, Del., a Corporation of Delaware. Filed Jan. 2, 1929, Serial No. 329,966. Renewed Mar. 29, 1930. 18 Claims. (Cl. 87—2.)

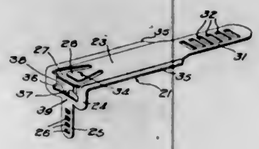
1. The step in the method of producing rosin oil which includes heating rosin in the presence of a boron compound.



9. The method of producing rosin oil which includes heating wood rosin in the presence of about .05%–1.0% of a boron compound and then subjecting the rosin to destructive distillation.

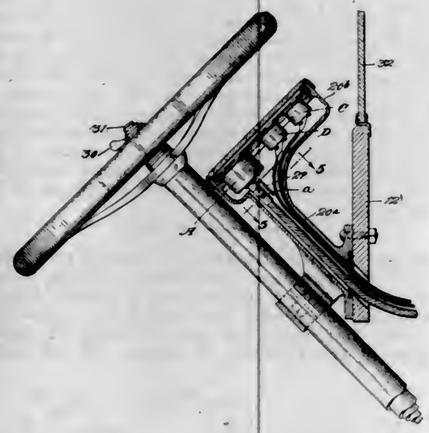
1,782,402. APPARATUS FOR TESTING ELECTRICAL CONDUCTORS. GEORGE ALFRED BOUVIER, Oak Park, and HARRY LEWIS CASE, Maywood, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 15, 1924. Serial No. 699,433. 1 Claim. (Cl. 175—183.)

In apparatus for testing electrical conductors during the process of their manufacture a plurality of relatively stationary contacting members making sliding engagement with a conductor to be tested, means associated with the contacting members for sending electrical currents of predetermined, relative values through predetermined lengths of the conductor, means for advancing the conductor through said contacting members, and means operative contemporaneously with the advancement of the conductor for indicating a failure of said first-mentioned means to send said currents of predetermined, relative values through said predetermined lengths of the conductor when the conductivity of one length varies from a value assigned with respect to the conductivity of the other length.



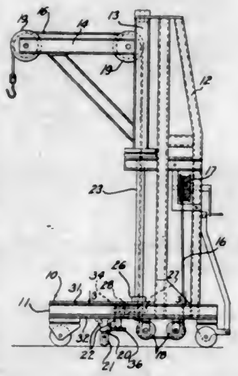
1,782,403. METHOD OF AND APPARATUS FOR TESTING ELECTRICAL CONDUCTORS. GEORGE ALFRED BOUVIER, Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 21, 1925, Serial No. 70,453. Renewed Apr. 17, 1930. 17 Claims. (Cl. 175—183.)

1. A method of testing electrical conductors during the process of their manufacture, which consists in indicating



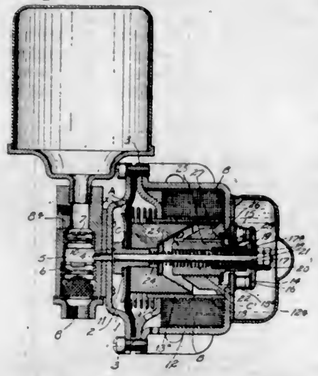
variations in conductivity between a predetermined length of a conductor and an element comprising a predetermined resistance and another portion of the conductor.

1,782,404. CLAMPING DEVICE. HEYWARD WIRGMAN BOWLY, Summit, and WILLIAM WINEBIDDLE MCWILLIAMS, South Orange, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 30, 1929. Serial No. 359,344. 16 Claims. (Cl. 24—17.)



1. A clamping device comprising a two sided member, one side having a depressed prong and a plurality of spaced transverse slots for adjustable interlocking engagement with the depressed prong of another member and the other side having a portion for attachment to a supporting member.

1,782,405. INSTRUMENT-BOARD MOUNTING. HARRISON HURLBERT BOYCE, Jericho, N. Y. Filed Apr. 29, 1927. Serial No. 187,615. 11 Claims. (Cl. 180—90.)

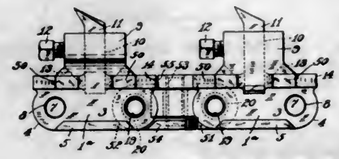


1. In a motor vehicle, in combination with a supporting dash and a steering column supported thereby, an intermediate bracket supporting said steering column comprising a hollow stem extending upwardly and parallel to said steering column, the upper part being enlarged to accommodate a plurality of instruments indicating various motor vehicle conditions.

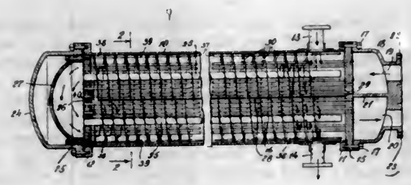
1,782,406. PORTABLE CRANE. ARTHUR ALFRED BUREAU, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Sept. 27, 1928. Serial No. 308,601. 7 Claims. (Cl. 212—145.)

1. In a crane, a supporting frame, a mast rotatably supported thereby, a gib carried by said mast and rotatable therewith, an auxiliary crane supporting member extendible horizontally from the frame, and means actuated by the rotation of the gib for extending the member from the frame.

1,782,407. SOLENOID MOTOR FOR FUEL PUMPS. WILLIAM C. CARTER, Flint, Mich. Original application filed Sept. 28, 1925, Serial No. 59,149. Divided and this application filed Nov. 14, 1928. Serial No. 319,241. 6 Claims. (Cl. 172—126.)



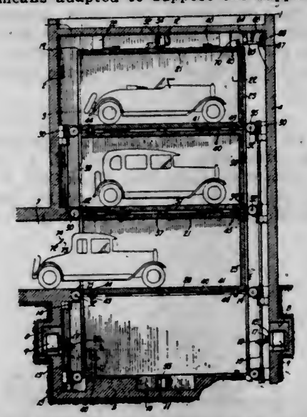
1. In a motor, a solenoid having a movable core, an intermittently operating switch for governing the energizing circuit of said solenoid, a spring for holding the contacts of said switch closed during the stroke of the core of the solenoid in one direction, and a separate means of greater force for holding said contacts open during the stroke of the core of the solenoid in the opposite direction.



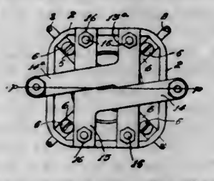
1,782,408. MINING-MACHINE CUTTER CHAIN. FRANK CARTLIDGE, Cincinnati, Ohio, assignor to Cincinnati Mine Machinery Co., Cincinnati, Ohio, a Corporation of Ohio. Filed July 11, 1924. Serial No. 725,371. 4 Claims. (Cl. 262—33.)

3. A cutter chain comprising a multiplicity of main links having guide ribs, and a multiplicity of interspersed

connector links, each connector link comprising two elements, each articulated with an adjacent main link and the axes of such articulations being substantially parallel and at right angles to the axis of articulation of the two elements, one of said connector link elements carrying guide ribs alignable with the guide ribs of the main link.



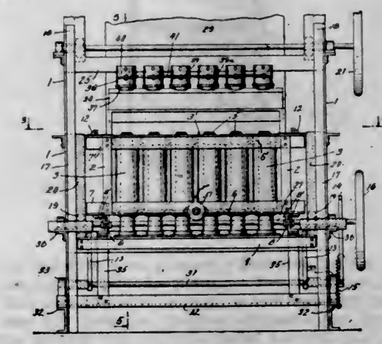
1,782,409. HEAT EXCHANGER. STANLEY J. CHUTE, Ridgewood, N. J., assignor to The Griscom-Russell Company, New York, N. Y., a Corporation of Delaware. Filed Dec. 19, 1927. Serial No. 240,957. 4 Claims. (Cl. 257—239.)



1. In an apparatus of the character described, a tubular shell forming a chamber for the fluid to be acted upon and having inlet and outlet passages for said fluid at one end of the shell, a plurality of tubes within the shell for the circulation of the working fluid, means for delivering and discharging the working fluid to and from said tubes, a flat longitudinal plate arranged diametrically across the interior of the shell and extending substantially from one end thereof to the other so as to cause the fluid to be acted upon to travel from the inlet to the opposite end of the shell and thence to return within the shell to the outlet, an elongated core member extending substantially centrally of the semi-circular chamber above said longitudinal plate, and a second similar core member positioned in the semi-circular chamber below the plate, a plurality of semi-circular sheets of thin metal each perforated centrally and arranged in spaced relation upon the core members in each of said semi-circular chambers, the bases of said baffle elements being placed against the flat surface of said longitudinal plate and arranged in substantially parallel relation at an angle to the axes of the core members, the baffle elements each being severed radially from the core member to their respective semi-circular edges, and the severed portions of each element being offset with respect to one another, the severed edge of one element being secured to the oppositely directed severed edge of its adjacent element thereby forming a continuous substantially helical passageway throughout the length of each of said semi-circular chambers.

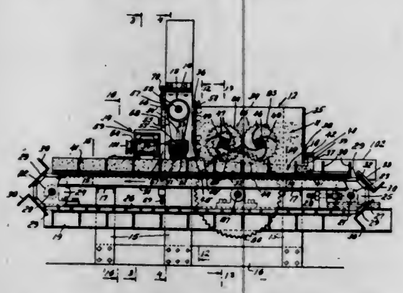
1,782,410. STORAGE GARAGE. L. D. COOK, Kansas City, Mo. Filed Feb. 1, 1928. Serial No. 251,042. 9 Claims. (Cl. 214—16.1.)

1. In a storage garage, supports for vehicles, linkage means on the supports for connecting the supports in tiers, means for moving the supports vertically in tiers including means adapted to support the supports during horizontal movement, means for effecting horizontal movement of the supports, and means for controlling said movements.



1,782,411. SOCKET. HIRAM D. CURRIER, Chicago, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 19, 1925. Serial No. 16,623. 3 Claims. (Cl. 248—30.)

1. A device of the character described comprising a tube socket, a baseboard, and a pair of flexible supporting members each having a main portion and an integrally formed flexible extension arm adapted to pass under the main portion of the other member and provided with orifices lying in the same vertical plane adapted to engage screws to balance the said tube socket and to non-rigidly support the said tube socket in mobile relation to the said baseboard.

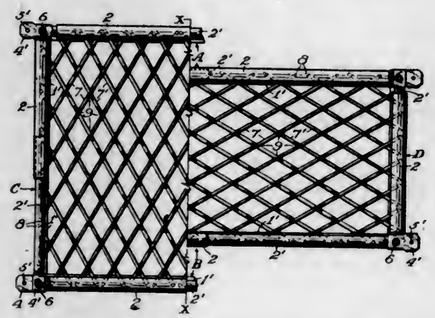


1,782,412. CONCRETE-PIPE MOLD. CHARLES DIETRICHS, Little Ferry, N. J., assignor to Walker Cement Products, Inc., Union City, N. J., a Corporation of New Jersey. Filed Apr. 23, 1926. Serial No. 104,046. 7 Claims. (Cl. 25—30.)

1. In a machine for molding a friable plastic material in a comparatively dry condition, a molding form com-

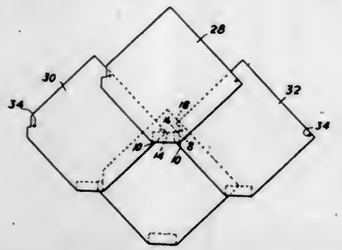
prising sections separable from one another to allow the molded material to be removed therefrom, one of said sections being perforated throughout substantially its entire surface so as to prevent portions of the molded material from adhering thereto when said section is removed from contact with the material while the material is still plastic.

1,782,413. CONCRETE-BRICK MANUFACTURE. CHARLES DIETRICHS, Little Ferry, N. J., assignor to Walker Cement Products, Inc., Union City, N. J., a Corporation of New Jersey. Filed Apr. 23, 1926. Serial No. 104,047. 11 Claims. (Cl. 25—99.)



1. A machine of the character described comprising a bed, mold-filling means and mold-packing means above the bed, an endless belt moving over the bed beneath the filling and packing means and carrying a plurality of pallet holders having upstanding rear walls provided with spaced slots, pallets supported on the holders and bridging the spaces between adjacent upstanding walls, a plurality of elongated stationary bars received within said slots and supported in contact with the pallets, said bars having upwardly extending shanks at their front ends the pallets and holders forming with said bars a plurality of molding forms extending both lengthwise and transversely of the apparatus, a slotted member extending crosswise in front of said mold filling means, the shanks of said stationary bars fitting within said slots, and means for retaining said shanks therein.

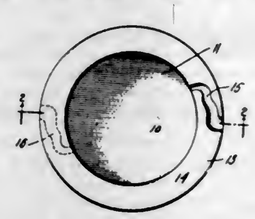
1,782,414. CABINET SUITCASE. CAROLINE K. DUER, New York, N. Y. Filed Feb. 18, 1928. Serial No. 255,310. 2 Claims. (Cl. 190—41.)



1. A cabinet suit-case consisting of a principal portion divided into a central compartment adapted for carrying a broad brimmed and a narrow brimmed hat and surrounding compartments severally adapted for carrying wearing apparel and toilet articles, said wearing apparel compartments having their bottoms parallel to the bottom of said suitcase, so that folded garments shall lie flat when packed and when carried therein, and a second portion having a form secured thereon for holding a hat in position, which portion is hinged to said principal portion for opening and closing said compartments, and spaced from said compartments to accommodate the brim of a broad brimmed hat between said two portions.

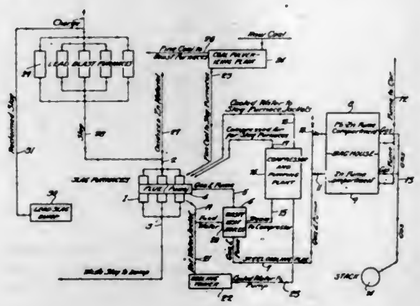
1,782,415. ADJUSTABLE GUARD FOR OPENINGS. JOHN F. FARMER, Indianapolis, Ind. Filed July 24, 1929. Serial No. 380,731. 3 Claims. (Cl. 20—71.)

1. An adjustable guard including a frame comprising two side rails and two end rails having each an outer hollow section and an inner hollow section shiftable therein, each section being open at one side thereof and having an inwardly extending guide bar on one side of the opening, one end of each outer section being connected to one end of an inner section, and offset interwoven wire lattice bars extending loosely into said openings and having each a crook shiftably guided on one of said guide bars.



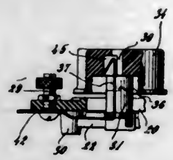
1,782,416. SURFACE COVERING AND METHOD OF MAKING THE SAME. WILLIAM FREEGARD, Elizabeth, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa., a Corporation of West Virginia. Filed Jan. 14, 1928. Serial No. 246,712. 4 Claims. (Cl. 108—7.)

3. A shingle comprising a body portion of substantially quadrilateral shape having a tab at one corner thereof adapted to be folded beneath the body portion of the shingle, an adjacent corner of the body portion being truncated to form a stepped edge, the part of said edge nearest the tab being extended farthest outwardly and outlining a projection on said body portion, the said projection being adapted to engage with the tab of a similar shingle of a superjacent course.



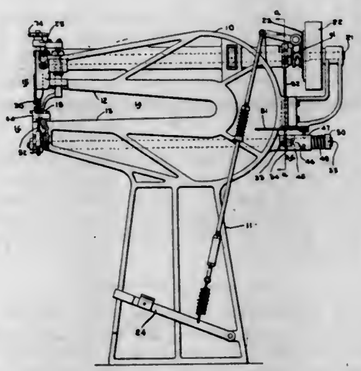
1,782,417. DEVICE FOR PREVENTING BOILING OVER OF MILK. EUGENE FRIED, Newark, N. J. Filed Jan. 20, 1930. Serial No. 422,121. 1 Claim. (Cl. 53—1.)

A device for preventing boiling over of milk comprising a disk provided with a concavity in one of its faces having a peripheral rim on said face of substantial width, said rim having a flat face adapted to contact with a vessel bottom, said rim being provided in its flat face with a



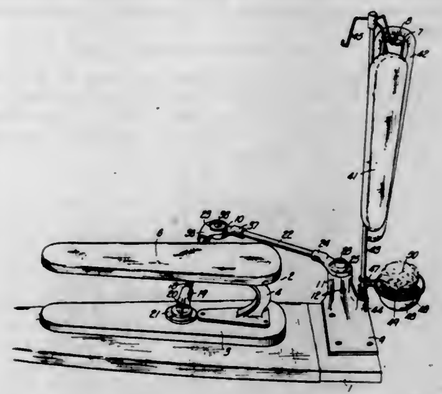
circuitous groove leading from said concavity to the disk periphery, said groove increasing gradually in width and depth from said concavity to the disk periphery.

1,782,418. RECOVERING METALS. ULYSSES A. GARRED, Jackson Heights, N. Y., assignor to Anaconda Copper Mining Company, a Corporation of Montana. Filed Apr. 8, 1927. Serial No. 181,979. 3 Claims. (Cl. 75—17.)



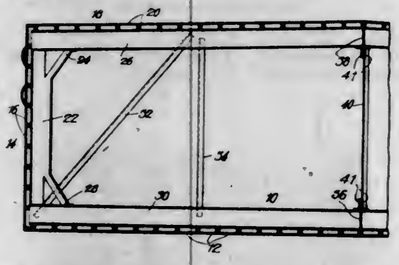
1. In the recovering of volatile metals from slag and the like, the method which consists in forcing through the molten slag finely divided fuel and air, introducing the fuel with air under high pressure and introducing air separately under low pressure and collecting the resulting fume.

1,782,419. TUBE SOCKET. JOHN GELOSO, New York, N. Y., assignor, by mesne assignments, to Pilot Radio & Tube Corporation, Brooklyn, N. Y., a Corporation of Delaware. Filed Mar. 21, 1927. Serial No. 176,862. 2 Claims. (Cl. 173—328.)



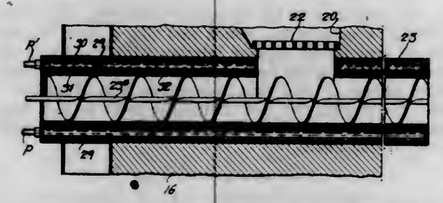
1. In a device of the class described, the combination with a supporting member, contact terminals on said supporting member, a head member having apertures therein for the passage of prongs therethrough, and flexible conductor members, having one extremity positioned within said head member, and the other extremity fastened to the contact terminals on said supporting member, said head member being thereby floatingly supported with respect to the supporting member, and means attachable to said head member, and through which said flexible conductor members pass, for limiting the movement of the head member with respect to the supporting member.

1,782,420. CUTTING MACHINE. CHARLES BAXTER GRAY, Millbourne, Pa. Filed Apr. 13, 1927. Serial No. 183,503. 15 Claims. (Cl. 164—50.)



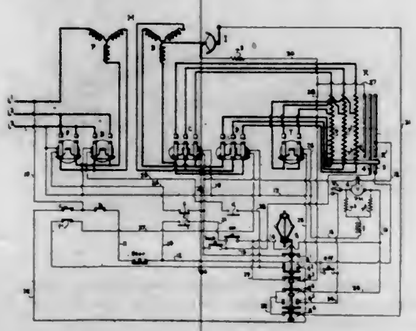
1. In apparatus of the character described the combination of a cooperating punch and die, a feed limiting member disposed in opposed relation with respect to the punch, mechanism for reciprocating the punch, and mechanism driven by the first mechanism and including a clutch for moving the feed limiting member in like directions simultaneously with and substantially to the same extent as the punch.

1,782,421. IRONING BOARD. ARO M. HARVEY, Kansas City, Mo. Filed Aug. 30, 1928. Serial No. 302,985. 5 Claims. (Cl. 68—10.)



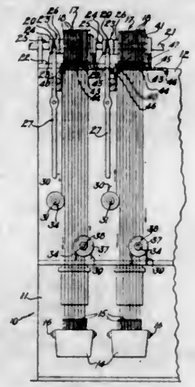
1. In a device of the character described, a support, an ironing board, and means supporting the ironing board from the support including a bracket fixed to the support, a bracket arm connected to the board, and a bracket arm having a rule joint connected with the first named arm and pivoted in the bracket.

1,782,422. STEEL HULL AND METHOD OF BUILDING THE SAME. GORDON G. HOLBROOK, Maplewood, N. J. Filed Mar. 8, 1928. Serial No. 260,029. 12 Claims. (Cl. 114—79.)



9. A vessel having a hull comprising a multiplicity of run-of-the-mill rolled steel sections having slightly varying widths, said sections being arranged alongside one another with spacing members of varying thicknesses between them and fused metal seams closing the spaces between said sections.

1,782,423. CONVEYER. JOHN WILLIAM HORNSEY, Summit, N. J., assignor to Granular Iron Company, a Corporation of Michigan. Original application filed Sept. 8, 1926, Serial No. 134,287. Divided and this application filed Mar. 18, 1929. Serial No. 348,066. 5 Claims. (Cl. 263—1.)

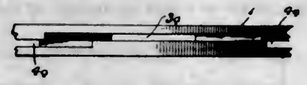


1. A conveyer for hot material having a central conveyer tube, an intermediate tube separated from the first and having an insulating medium between the two, and a third tube surrounding the intermediate tube with means for passing water between the intermediate tube and the third one.

1,782,424. MOTOR CONTROLLER. RICHARD B. HUNTER, Shorewood, Wis., assignor, by mesne assignments, to Cutler-Hammer Inc., Milwaukee, Wis., a Corporation of Delaware. Filed Aug. 24, 1928. Serial No. 301,795. 13 Claims. (Cl. 172—179.)

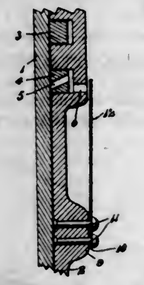
1. The combination with a motor, of starting and speed regulating means for said motor including a device responsive to the motor speed and a power operated regulating device operative automatically under control by the former device to maintain a substantially constant speed of said motor, said means affording regulation of said motor for a relatively slow speed or a relatively high speed as desired, and further including means rendering said devices effective for constant speed regulation of the motor when the latter operates at the aforementioned slow speed and ineffective therefor when said motor operates at the aforementioned high speed.

1,782,425. APPARATUS FOR COATING STRANDS. RICHARD DALE JESSUP, La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 24, 1926. Serial No. 104,360. 4 Claims. (Cl. 91—17.)



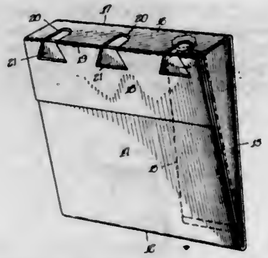
2. In a strand coating apparatus, a coating bath, an oven for baking successive coatings thereon, a plurality of independently rotatable idler pulleys in the bath, a capstan positioned above the pulleys and provided with a plurality of peripheral grooves of gradually increasing diameters for continuously advancing and stretching successive portions of a strand with a tension uniformly distributed among the successive portions thereof as the portions pass through the oven.

1,782,426. PISTON RING. CHARLES E. JOHNSON, Muskegon, Mich., assignor to The Piston Ring Company, Muskegon Heights, Mich., a Corporation of Michigan. Filed Aug. 27, 1928. Serial No. 302,166. 1 Claim. (Cl. 74—109.)



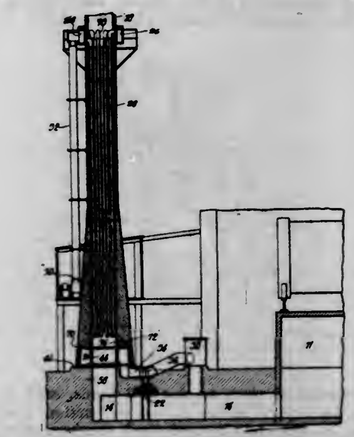
In combination with a piston having a ring groove therein and drainage openings extending from the ring groove to the interior of the piston, and a cylinder in which said piston is adapted to reciprocate, of a piston ring located within said ring groove, said ring being of metal and comprising upper and lower sections, the upper section having somewhat greater width than the lower section and bearing at its outer curved side against the inner walls of the cylinder, the outer curved side of the lower section being spaced from said inner walls of the cylinder, said lower section of the ring having slots therethrough connecting the space between the inner walls of the cylinder and the outer curved side of said lower section with said drainage openings, said upper section of the ring having a continuous groove, rectangular in cross section, formed therein in its outer curved side.

1,782,427. PISTON RING. CHARLES E. JOHNSON, Muskegon, Mich. Filed Sept. 4, 1928. Serial No. 303,796. 3 Claims. (Cl. 74—109.)



1. A piston ring having a series of spaced apart horizontal slots cut therethrough from its outer curved to its inner curved sides, all of the slots of said series lying in the same horizontal plane, a second series of horizontal slots similarly cut through said ring and lying below the first series, the slots of the second series being in staggered relation to those of the first series and having their ends overlapping the ends of the adjacent slots of said first series, the plane of the upper side of the slots of said second series being substantially coincident with the plane of the lower side of the slots of the first series.

1,782,428. OIL-CONSERVING PISTON. CHARLES E. JOHNSON, Muskegon, Mich. Filed May 12, 1930. Serial No. 451,801. 10 Claims. (Cl. 74—108.)



1. A piston provided with a groove around the same in which oil may enter and having oil drainage openings from said groove to the interior of the piston, and means attached to the inner side of the piston and extending over the inner ends of said oil drainage passages, automatically operated by the increase and decrease of air pressures within the piston over and under normal pressure, to move said means into closing engagement with the ends of said passages on increase of air pressure above normal pressure and away from the inner ends of said passages to open the same on decrease of air pressure below normal pressure.

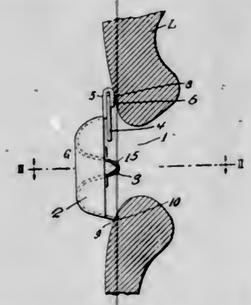
1,782,429. COLLAPSIBLE TUBE PROTECTOR. NORMAN O. JOHNSON, Chicago, Ill., assignor to Illinois Carton & Label Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 21, 1929. Serial No. 348,712. 5 Claims. (Cl. 206—65.)

1. A protector for collapsible tubes, comprising a sheet of relatively stiff material folded along a cross line to afford a pair of diverging side-walls, one of said walls having an end-wall integral therewith and at substantially right-angles thereto, said end-wall having a flap integral therewith and bent to overlap the other side-wall, said end-wall having a slot therethrough to accommodate the neck only of a collapsible tube, said flap having an enlarged extension of said slot of sufficient size to permit the passage of the cap of said neck therethrough whereby to allow the introduction of the tube into said protector.

1,782,430. RECUPERATOR. WALTER J. KELLY and MILTON P. BURNS, Fairfield, and ARCHIE BARR, Wylam, Ala. Filed Apr. 17, 1929. Serial No. 355,808. 6 Claims. (Cl. 263—20.)

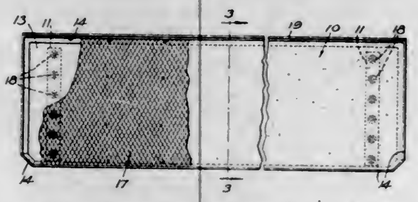
3. Recuperator apparatus comprising a stack of brick construction having an outer steel shell, an upper header secured to said shell at a great distance above the base, a lower header, tubes within the stack, fittings secured to and extending inwardly from said upper header, said tubes having heads with packing rings which make a sliding fit with said fittings.

1,782,431. HANDLE FOR WOODEN BASKETS. HENRY W. KRAMER, Kingston, N. Y., assignor to Ralph P. Young, Marlboro, N. Y. Filed May 14, 1926. Serial No. 109,029. 8 Claims. (Cl. 217—125.)



1. In a handle for wooden baskets, the combination with a pair of metallic attaching members adapted to be secured to the basket adjacent to its upper edge only, and provided with guiding and locking portions at different points vertically thereof, a separately formed metallic bail member having a hand engaging portion and downwardly extending arms, each provided with guiding and interlocking portion of said attaching members, and anchoring devices for connecting each of said attaching members with the bottom of the basket, to relieve the sides of the basket from the weight of the contents.

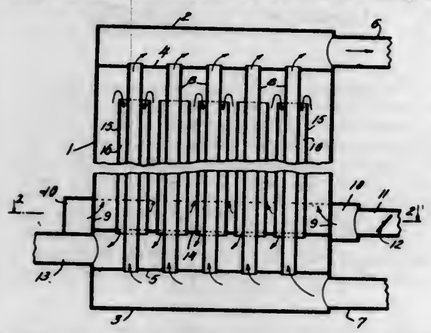
1,782,432. SYNTHESIS OF DIACETYL-3,3'-DIAMINO-4,4' - DIHYDROXY - 5,5' - DIIODOARSENOBENZENE. ALEXANDER DOUGLAS MACALLUM, Perth Amboy, N. J. Filed Mar. 30, 1928, Serial No. 266,120, and in Great Britain May 4, 1927. 2 Claims. (Cl. 260—15.)



2. As a new product, diacetyl-3,3'-diamino-4,4'-dihydroxy - 5,5' - diiodoarsenobenzene, said product being a lemon-yellow solid soluble in acetone, phenol, bencaldehyde and pyridine.

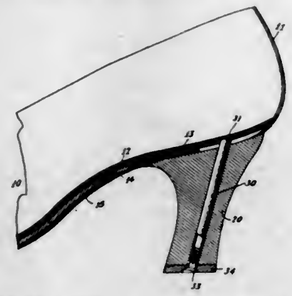
1,782,433. TONGUE AND TEETH SET FOR DOLLS AND THE LIKE. SAMUEL MARCUS, Brooklyn, N. Y., assignor to Markon Manufacturing Co., Inc., New York, N. Y., a Corporation of New York. Filed Oct. 4, 1927. Serial No. 223,942. 5 Claims. (Cl. 46—40.)

1. A tongue and teeth set for doll heads, said set comprising a base part having a tongue portion projecting therefrom, a separately formed teeth member, and clamp means comprised in the structure for gripping and frictionally retaining the teeth member connected in position.



1,782,434. TABLE CONSTRUCTION. LEE ROY MCGUIRE, Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Sept. 4, 1928. Serial No. 303,772. 8 Claims. (Cl. 45—31.)

1. In a table construction, a receptacle, means having a plurality of angularly disposed surfaces attached to and abutting the inner horizontal surface thereof, and a composition surrounding the angularly disposed surfaces of said means and substantially filling the receptacle.



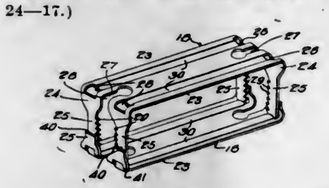
1,782,435. APPARATUS FOR COOLING FLUIDS. HENRY F. MERRIAM, West Orange, N. J., assignor to General Chemical Company, New York, N. Y., a Corporation of New York. Filed Nov. 9, 1926. Serial No. 147,245. 4 Claims. (Cl. 257—228.)

1. In a heat transferrer, the combination of a nest of tubes open for the passage of a fluid to be cooled, baffle tubes surrounding and spaced from the individual tubes of the tube nest and forming passageways therewith, means for passing a stream of cooling fluid over the outer surfaces of the baffle tubes and then through the passageways between the baffle tubes and the tubes of the tube nest, and an adjustable valve controlling the flow of the cooling fluid and set to admit an amount of cooling fluid

which will produce a predetermined temperature condition in the cooling fluid at the point where such cooling fluid first comes into direct contact with the tubes constituting the tube nest.

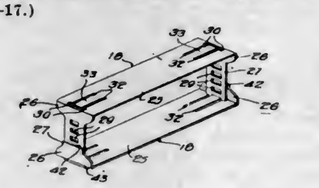
1,782,436. HEEL-ATTACHING MEANS. CHARLES MILLER, Long Island City, and MAX FEINSTEIN, Corona, N. Y.; said Feinstein assignor to said Miller. Filed Oct. 18, 1929. Serial No. 400,486. 1 Claim. (Cl. 36—42.)

A shoe having an upper, a shank member, a heel joined to said shoe, said heel being provided with a heel seat surface and a tread surface and having a hole extending at a substantial angle to said tread surface from said tread surface to said heel seat surface, a hollow cylindrical tube disposed within and coextensive with said hole, said tube having at its upper end an integral formed angularly disposed clamping head engaging the upper surface of said shank member, and screw threaded means carried by the lower end of said tube for securing the same in clamping position in the hole of said heel.



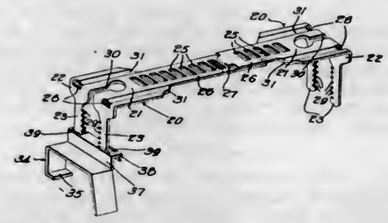
1,782,437. VACUUM-TUBE SOCKET. BEN ZION MOSKOWITZ, Brooklyn, N. Y., assignor, by mesne assignments, to Pilot Radio & Tube Corporation, Brooklyn, N. Y., a Corporation of Delaware. Filed Apr. 26, 1926. Serial No. 104,550. 5 Claims. (Cl. 248—30.)

1. A resilient supporting member for supporting vacuum tube sockets comprising a stamped metallic element



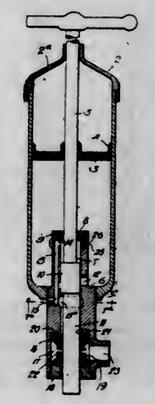
having a plurality of arms, extending from a central surface, a socket portion, and a fixed support, alternate arms being offset in the same direction and being fixed to the base of a socket portion, and the remaining arms being similarly offset in another direction and attachable to the fixed support, whereby movement of a socket member produces a flexing of said resilient support member.

1,782,438. CLAMPING DEVICE. FERDINAND OUDIN, Riverside, and BENJAMIN HARVEY SKINNER, Berwyn, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 30, 1929. Serial No. 359,341. 10 Claims. (Cl. 24—17.)



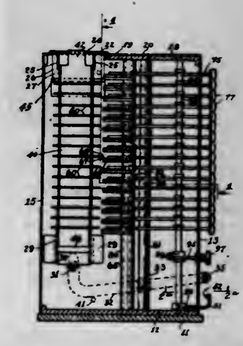
1. A clamping device comprising a substantially flat portion terminating in a bifurcated portion formed with a tooth means on a longitudinal edge thereof for adjustably engaging the edges of a support.

1,782,439. CLAMPING DEVICE. FERDINAND OUDIN, Riverside, and BENJAMIN HARVEY SKINNER, Berwyn, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 30, 1929. Serial No. 359,342. 8 Claims. (Cl. 24—17.)



1. A clamping device comprising a horizontal portion and an integral vertical portion, the horizontal portion having a slot and a flexible reed portion terminating therein for adjustable interlocking engagement with the vertical portion of another member.

1,782,440. CLAMPING DEVICE. FERDINAND OUDIN, Riverside, and BENJAMIN HARVEY SKINNER, Berwyn, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 30, 1929. Serial No. 359,343. 11 Claims. (Cl. 24—17.)

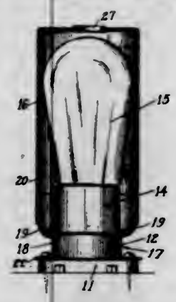


1. A clamping device comprising a two sided right angle member terminating in portions for adjustable interlocking engagement with cooperating portions of another right angle member.

1,782,441. LUBRICANT COMPRESSOR. EMILE PIQUEREZ, Paris, France, assignor to Alemite Corporation, Chicago, Ill., a Corporation of Delaware. Filed Apr. 15, 1925, Serial No. 23,284, and in France June 6, 1924. 16 Claims. (Cl. 221—47.3.)

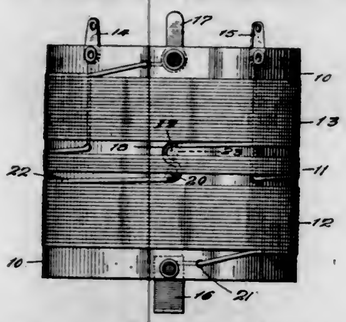
12. In a lubricating device, in combination, a chamber for containing a lubricant, a cylinder having two axially connected portions and communicating with said chamber, pistons operable in said cylinder portions, a bleed from one of said cylinder portions into said chamber, and a discharge nozzle connected with said cylinder.

1,782,442. SELECTING MACHINE. JAMES POWERS, Sierra Madre, Calif.; Sophie Powers executrix of said James Powers, deceased. Filed July 23, 1926. Serial No. 124,480. 20 Claims. (Cl. 129—16.1.)



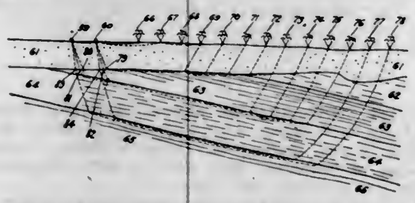
13. In combination, a case; a plurality of record units; means for movably and removably guiding the units in said case; interchangeable indicators connected to said units; and selectors engageable with the indicators when present to influence the movement of the units.

1,782,443. TUBE SHIELD. RUSSELL RAMSDELL, Poughkeepsie, N. Y., assignor, by mesne assignments, to Pilot Radio & Tube Corporation, Lawrence, Mass., a Corporation of Delaware. Filed Dec. 24, 1928. Serial No. 328,213. 1 Claim. (Cl. 250—27.5.)



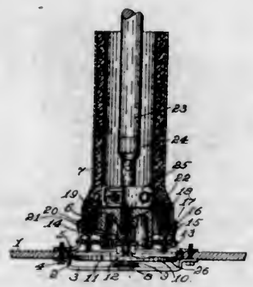
A vacuum tube shielding unit, comprising a plurality of telescoping sections, one of which has a body portion for surrounding the body portion of a tube socket, and a base

portion having projections for gripping the fastening means for said tube socket, whereby such section may be carried by said tube socket, and the other of which sections may surround the bulb portion of the vacuum tube, such other named section being slidable over the first-



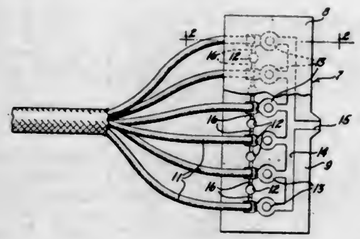
named section, to form a closure for the vacuum tube, and an aperture in said second-named section, having an insulating ring fixed to and surrounding the edges of said aperture, whereby to allow the introduction of and support a contact cap within the ring unit.

1,782,444. INDUCTANCE. RUSSELL RAMSDELL, Poughkeepsie, N. Y., assignor, by mesne assignments, to Pilot Radio & Tube Corporation, Lawrence, Mass., a Corporation of Delaware. Filed Mar. 13, 1929. Serial No. 346,568. 4 Claims. (Cl. 175—359.)



1. A tube of insulating material, adapted to have a primary and a split secondary wound thereon and having a slot extending across the zone designed to be occupied by the primary and abutments formed in said slot, serving to carry a portion of a loop of wire interconnecting the respective parts of the split secondary.

1,782,445. SYSTEM AND METHOD FOR GEOPHYSICAL EXPLORATION. FRANK RIEBER, San Francisco, Calif. Filed June 24, 1927. Serial No. 201,161. 3 Claims. (Cl. 181—0.5.)

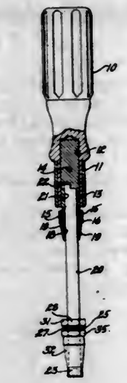


2. In a system for geophysical exploration, a pair of spaced receivers, these receivers being spaced a known distance apart, means for affecting said receivers by the aid of vibratory waves generated at any of a plurality of spaced points collinear with the receivers, and means associated with said receivers for measuring the difference in the times needed for the first arrivals of the waves to the receivers from any of said points.

1,782,446. MACHINE AND METHOD FOR CONSTRUCTING CONCRETE PIPE. ALFRED W. SCHULTZ, Waterloo, Iowa, assignor to The Zeidler Concrete Products Machinery Company, Waterloo, Iowa. Filed July 2, 1928. Serial No. 289,682. 7 Claims. (Cl. 25—30.)

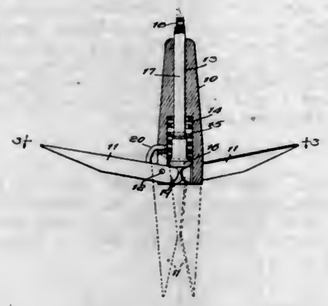
4. The combination with a molding device having a lower portion adapted to shape a termination of a hollow tile to be molded therein, of means for rapidly tapping said lower portion to differentially settle the mixed plastic ingredients of a mixture deposited in the device to produce a termination on the formed tile of harder and stronger consistency than the body of the tile.

1,782,447. METHOD OF FORMING ELECTRICAL TERMINAL MEMBERS. DE HART GRIDLEY SCRANTOM, Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 29, 1927. Serial No. 202,277. 3 Claims. (Cl. 22—202.)



1. A method of making a terminal member for an insulated conductor, which comprises forcing a molten metal longitudinally against the end of the insulated conductor to remove the insulating material therefrom, and forming the metal into a terminal member contacting with the conductor where the insulation is removed and overlapping a portion of the insulation.

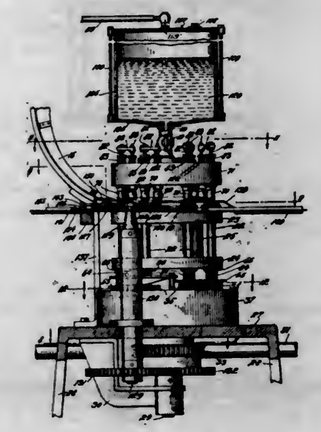
1,782,448. GUARDING AND GUIDING ATTACHMENT FOR TOOLS. SAMUEL FRANCIS SHORT, La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 15, 1926. Serial No. 148,393. 2 Claims. (Cl. 145—51.)



1. In combination with a screwdriver having a tang and a blade of constant cross-section, a threaded sleeve

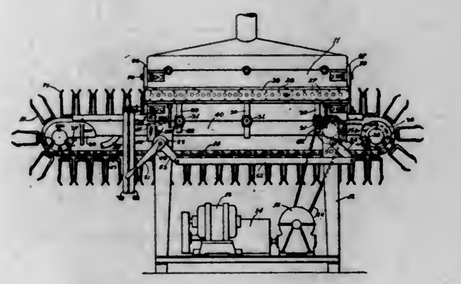
normally slidable on the blade and provided with a resilient extension positioned adjacent the blade, and a guard having an upper portion threadedly engaging the sleeve, a lower portion having its inner diameter substantially equal to the width of the tang and designed to surround the tang to provide a guard and guide therefor, and an

intermediate portion having a tapered inner surface designed to force the extension into fixed frictional engagement with the blade when the guard is moved longitudinally of the sleeve, said surface tapering to a smaller diameter than that of the blade of the screw-driver so as to bind on the end thereof and limit the upward adjustment of the guard.



1,782,449. ANCHOR. WILLIAM SIEBERT, Chicago, Ill., assignor of one-half to Hans Wigge, Chicago, Ill. Filed Oct. 16, 1929. Serial No. 399,957. 10 Claims. (Cl. 114—208.)

1. In an anchor, the combination of a holding arm, a member to which said arm is movably connected, means including an element reciprocable longitudinally of said member for maintaining said arm at an angle to said member, said means providing for movement of said arm from said position to thereby release the anchor upon the application of a predetermined resistance applied to said arm, and said means providing means for holding said arm in said released position.

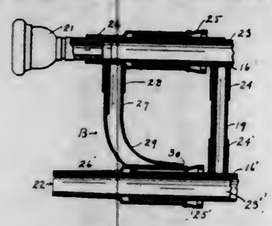


1,782,450. MACHINE FOR APPLYING CEMENT TO CAN TOPS. BURT E. TAYLOR, Mount Vernon, N. Y., assignor to The Borden Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 21, 1929. Serial No. 341,822. 16 Claims. (Cl. 113—80.)

1. In a machine for applying cement to can caps and having a rotary carriage, a plurality of vertically movable cap supporting spindles mounted on the carriage, and means for applying cement to properly positioned caps, an annular cam on which the lower ends of the spindles

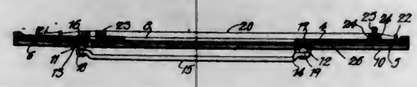
are adapted to travel to lift the caps on the spindles into cement receiving position, and means for lowering the cam for rendering the spindles inoperative.

1,782,451. HEAT-TREATING FURNACE. HORACE L. WAISNER, Rockford, Ill., assignor, by mesne assignments, to Mechanics Universal Joint Company, Rockford, Ill., a Corporation of Illinois. Filed Nov. 7, 1927. Serial No. 231,639. 14 Claims. (Cl. 268—8.)



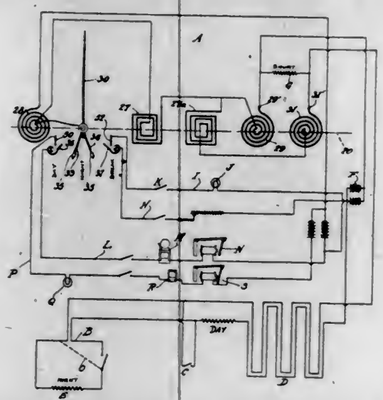
1. A heat treating furnace comprising, in combination, a casing providing an elongated heating chamber therein, an endless conveyor operating through said casing having means thereon for holding work to feed a portion of the same through the casing, means for directing flames onto the work from both sides as the same is fed through the casing, means so disposed as to shield a part of the work on both sides thereof from the action of said flames, comprising baffles arranged to direct the flame toward the part or parts of the work to be heat treated while at the same time serving to shield the rest of the work.

1,782,452. HAND-ADAPTED TROMBONE BRACE. EARL WILLIAMS, Los Angeles, Calif. Filed Jan. 4, 1928. Serial No. 244,435. 8 Claims. (Cl. 84—395.)



3. In a musical instrument of the trombone type, an intermediate section comprising: parallel tubular guides,

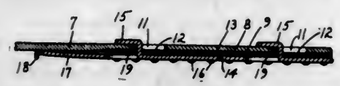
thimbles thereon; and interconnecting means therefor including a hand-adapted brace which joins the lower of



said thimbles at an acute angle,— said brace being curved only at its lower end and there attached to a relatively enlarged portion of the lower thimble.

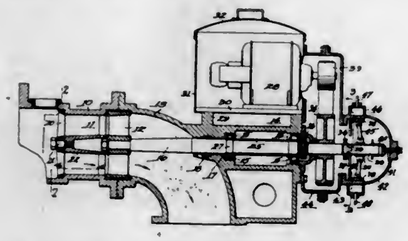
1,782,453. PIANO CONSTRUCTION. LUMAN B. WING, Brooklyn, N. Y. Filed July 9, 1927. Serial No. 204,500. 5 Claims. (Cl. 84—187.)

3. In a piano having strings, a piano plate and subjacent sound-board construction, and a plurality of crossbars for bracing the plate entirely beneath the sound board except at the margins of the plate beyond said strings.



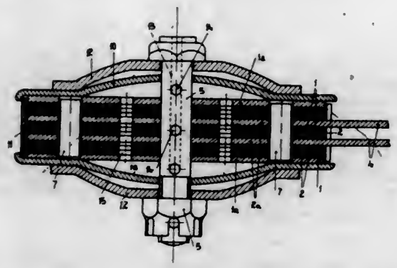
1,782,454. ELECTRICAL METER SWITCH. WILLIAM T. ARNOLD, Hempstead, N. Y. Filed June 3, 1929. Serial No. 368,084. 4 Claims. (Cl. 200—56.)

1. In an electrical governing instrument, a rotatable coil having a double winding of opposite polarity, an indicating needle fixed to said coil, and sets of contacts respectively disposed on opposite sides of the axis of said coil in the path of said needle, each set of contacts including a pair of spaced contact elements engageable with each other upon contacting engagement with one of said contact elements by said needle to successively close separate electric circuits in which said needle and said sets of contacts are arranged.



1,782,455. SAFETY RAZOR. RICHARD D. BAKER, Spokane, Wash. Filed Oct. 25, 1929. Serial No. 402,429. 1 Claim. (Cl. 30—12.)

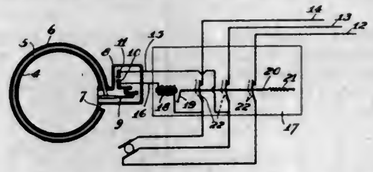
A safety razor comprising a handle, a shank member pivoted to fold within the handle, a relatively wide spring head for said shank member having a pair of spaced slots therethrough, a groove extending from each of said slots, a razor blade having a pair of spaced holes in registry with the slots, a guard member, a spring tongue for said



member, a lip on the end of said tongue, and a pair of clamp fingers spaced to pass through said holes and to resiliently clamp through said slots in engagement with either the outer face of the shank head or the grooves therein.

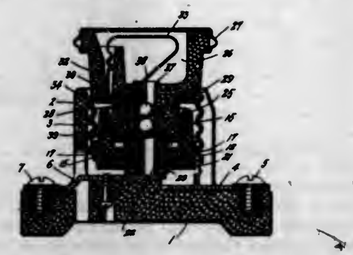
1,782,456. TURBINE-REGULATING DEVICE. GEORGE A. BIGGS, Orange, Mass., assignor to Rodney Hunt Machine Company, Orange, Mass., a Corporation of Massachusetts. Filed Feb. 13, 1929. Serial No. 339,717. 6 Claims. (Cl. 253—156.)

1. In a turbine, the combination of a casing having a straight inlet and a curved outlet, a turbine runner located in said casing, a shaft on the extreme end of which said runner is supported, said shaft extending through the curved part of the casing and the casing having bearings outside the said outlet which constitute the sole support of said shaft, a housing having passages therethrough for conducting the water directly to the runner, an oscillatable disc having openings adapted to be turned for controlling the amount of water delivered through said passages, and a stud concentric with the shaft beyond its end on which said disc is pivoted.



1,782,457. SHOCK ABSORBER. GIOVANNI BOELLA, Turin, Italy, assignor to Soc. An. Officine Di Villar Perosa, Turin, Italy. Filed July 11, 1928, Serial No. 291,974, and in Italy July 14, 1927. 1 Claim. (Cl. 188—130.)

A shock absorber comprising two end heads, each provided with two circular diametrically opposed holes, two diametrically opposed sector-shaped slots situated at 90° with respect to said holes and a central hole, an arm connected with each of said heads and having its outer

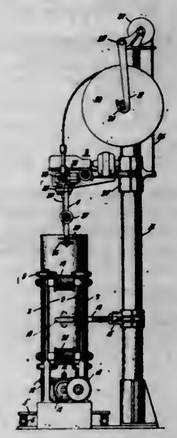


edge tangent to the corresponding head and the inner edge substantially in radial direction, two intermediate heads equally spaced from one another and from the end heads, arms connected with said intermediate heads and symmetrically arranged with respect to the arms of the end heads, the intermediate heads being provided with holes and diametrically opposed arcuate slots angularly displaced with respect to the holes and slots of the end heads, a set of disks arranged in the spaces between said heads and having holes and arcuated slots registering with the holes and slots of the end heads, a second set of disks alternating with the disks of the first set and having holes and arcuated slots registering with the holes and slots of the intermediate heads, pins located in the holes of one set and passing through the arcuated slots of the other set, a ring embracing the heads and disks and having slots through which said pins pass, removable covers to close the heads and disks in the ring and keep said pins in place, a central bolt to secure the covers in place and elastic members interposed between the covers and the head and nut of said bolt.

1,782,458. MOTOR PROTECTIVE DEVICE. WILLIAM J. BRENNEN, Scottdale, Pa. Filed Feb. 13, 1928. Serial No. 253,837. 4 Claims. (Cl. 172—36.)

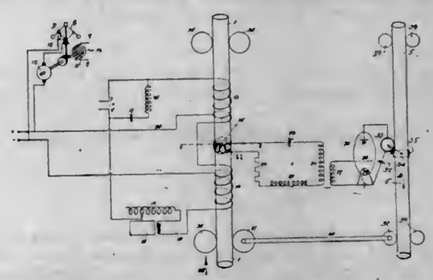
1. In combination with an electric motor, an elongate thermostat arranged inside and extended about the periphery of the motor, and a movable member operably coupled to said thermostat for movement in response to the temperature conditions prevailing at the various points about the motor.

1,782,459. THERMAL CUT-OUT AND GUARD. GEORGE R. BROWN, Bridgeport, Conn., assignor to General Electric Company, a Corporation of New York. Filed Aug. 29, 1927. Serial No. 216,003. 6 Claims. (Cl. 200—119.)



1. A guard for cut-out receptacles having standard center and screw shell contacts, comprising a cup-shaped base of insulation, a center contact extending axially therethrough, and means on said base whereby it may be screwed into and fixedly held within the screw shell of said receptacle.

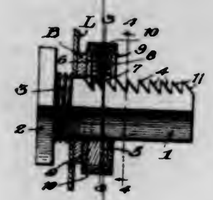
1,782,460. METHOD OF MANUFACTURING POROUS BUILDING MATERIALS. ALBIN VITALIS CARLSON, Degerhamn, Sweden. Filed Aug. 6, 1926, Serial No. 127,702, and in Sweden Aug. 19, 1925. 1 Claim. (Cl. 106—24.)



The method of manufacturing a porous building material, which consists in intimately mixing with a foundation mass containing at least one of the compositions Fe_2O_3, Al_2O_3 and SiO_2 an amount of unslaked lime sufficient to give to said foundation mass, when slaked therein, a porosity of small pores throughout the entire mass, adding to said mixture substances to intensify the pore generating process which are capable of giving off gas in reaction with lime and water, and moistening and hydrating the resulting mass so as to cause the pore generating process to take place.

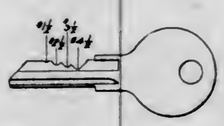
1,782,461. WELDING MACHINE. VERNI J. CHAPMAN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Jan. 24, 1928. Serial No. 249,131. 9 Claims. (Cl. 219—8.)

1. A machine for welding ends into tanks comprising a movable supporting means for the tank to be welded, a power driven roller mechanism for rotating the tank, means for clamping the tank against said roller mechanism, means for producing a weld, means for movably supporting said welding means and means attached to said movable supporting means for guiding said welding means along a seam at the end of the tank during the welding operation.



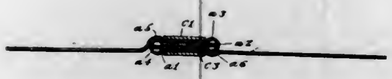
1,782,462. ARRANGEMENT FOR TESTING MAGNETIZABLE OBJECTS. HELMUT CHAPPUZEAU and OTTO EMERSLEBEN, Kiel, Germany, assignors to the Firm Neufeldt & Kuhnke Betriebsgesellschaft m. b. H., Kiel, Germany. Filed June 26, 1926, Serial No. 188,752, and in Germany July 6, 1925. 8 Claims. (Cl. 175—183.)

1. Arrangement for testing a magnetizable object, comprising magnetizing coils disposed on the object, means for supplying alternating current to said coils, a test coil system surrounding the body at the test point and consisting of a plurality of loops, each having its winding plane in parallel to the surface of the object at the test point, and



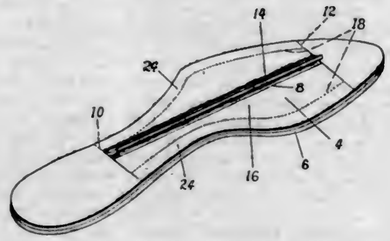
all loops being connected in series and a test circuit arrangement including said test coil for observing the currents induced in said test coil, due to faults in the structure of the body.

1,782,463. LOCK NUT. MAURO COLANTUONO, Pittston, and STEPHEN PINENO, Wyoming, Pa. Filed Sept. 18, 1928. Serial No. 305,701. 3 Claims. (Cl. 85—5.)



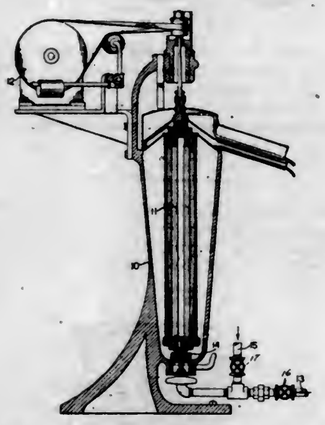
1. A lock nut comprising an apertured body having a recess therein communicating with the aperture, a pawl mounted in the recess, a spring engaging the pawl, and plates riveted to the body portion to form the completed lock nut.

1,782,464. MASTER KEY FOR CYLINDER LOCKS. MORRIS FALK, Fitchburg, Mass. Filed May 18, 1928. Serial No. 278,901. 2 Claims. (Cl. 70—9.)



1. In a lock system employing keys having notches or cuts varying from each other in depth by a standard increment, a master key therefor having its notches or cuts of a depth bearing a fractional relation to said standard increment.

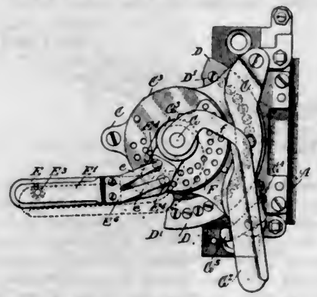
1,782,465. METHOD AND MEANS FOR FASTENING BANDS ABOUT BALES OR THE LIKE. CLARENCE B. FROST, Cambridge, Mass. Filed Nov. 1, 1929. Serial No. 404,086. 11 Claims. (Cl. 24—20.)



1. The method of fastening a band about a bale or the like which comprises placing the band about the bale with its ends overlapping; bending each end into hook-shape with the bend extending outside of the plane of the band; interlocking said hooked-shape ends together; placing over said interlocked end a seal with its flat top plate portion between the respective bends of the band ends, and with its depending flanges extending beside the hooked ends; followed by the pressing of said flanges under the hooked ends to clamp said ends together.

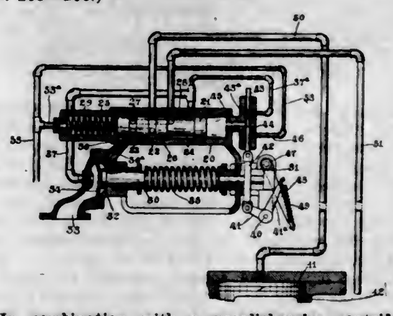
1,782,466. INSOLE. HENRY B. GORMAN, Lynchburg, Va., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Original application filed May 17, 1927, Serial No. 192,037. Divided and this application filed June 13, 1929. Serial No. 370,585. 5 Claims. (Cl. 36—22.)

1. An insole for shoes comprising a plurality of layers attached together at their margins, one of the layers being slit longitudinally of the sole to permit the insertion of a tool beneath said layer for clinching fastenings driven through the upper and the layer.



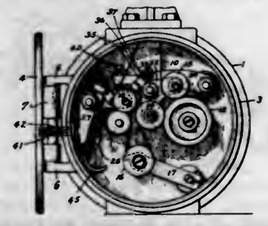
1,782,467. PROCESS FOR DEWAXING HYDROCARBON OILS. ARTHUR R. GREIG, Port Arthur, Tex., assignor to The Texas Company, New York, N. Y., a Corporation of Delaware. Filed Dec. 20, 1927. Serial No. 241,289. 3 Claims. (Cl. 233—11.)

1. The method of operating centrifugal apparatus engaged in the separation of wax from a chilled body of hydrocarbon oil which comprises introducing a heating medium into the centrifuge periodically during its operation at the point wherein the wax-bearing oil is normally introduced and continuing the introduction of the heating medium until accumulations of solidified wax and moisture are removed from the working surfaces of the apparatus.



1,782,468. TYPOGRAPHICAL CASTING MACHINE. ALFRED W. F. GUEST, Brooklyn, N. Y., assignor to Mergenthaler Linotype Company, a Corporation of New York. Filed May 23, 1929. Serial No. 365,321. 12 Claims. (Cl. 199—59.)

1. In a slug trimming mechanism, the combination of a knife slide, an adjustable gauge member, means for adjusting said member, locking means for the gauge member carried by the adjusting means, a spring for holding the knife slide in engagement with the gauge member, and means adapted to be operated independently of the adjusting and locking means for relieving the gauge member of spring pressure preparatory to its adjustment but

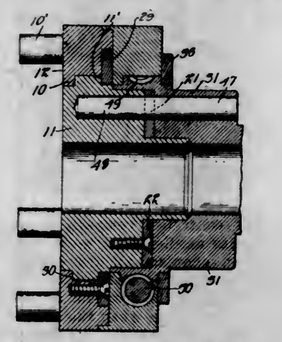


operable conjointly with the adjusting means to maintain the knife retracted as the adjustment of the gage member is effected.

1,782,469. PARALLEL-SERIES PUMP. HOMER M. HAVENS, Columbus, Ohio, assignor to The Seagrave Corporation, Columbus, Ohio, a Corporation of Michigan. Filed Mar. 5, 1929. Serial No. 344,502. 7 Claims. (Cl. 103—106.)

1. In combination with a parallel-series centrifugal pump, a valve for changing the pump from parallel to series operation and conversely, a reciprocable valve and cylinder therefor, a fluid conductor from the discharge of the pump connected with one end of said cylinder to actuate the valve therein in one direction and a spring for actuating said valve in the opposite direction, the said reciprocable valve having ports and passages and conductors cooperating therewith for actuating the first named valve for changing the pump from parallel to series operation and conversely according to the pressure in said discharge, a valve for controlling the admission to and exit of fluid pressure from said last named valve, and means actuated by the pressure in the pump discharge for controlling the position of the said last named valve.

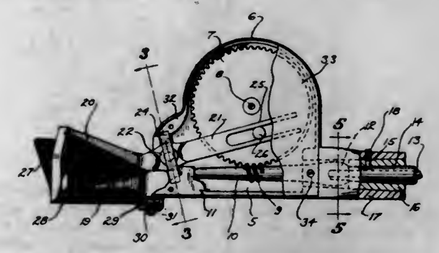
1,782,470. ROLL SPREADER. CHARLES L. HEISLER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Oct. 13, 1928. Serial No. 312,391. 7 Claims. (Cl. 271—2.1.)



1. Apparatus of the character described comprising an enclosing casing having a door, a plurality of pairs of

rolls therein between which a film is adapted to pass, adjustable supporting means for one roll of each pair and means controlled by the position of said door for moving said supporting means.

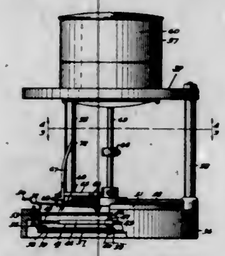
1,782,471. MEANS FOR AND PROCESS OF ACCELERATING THE HARDENING OF HYDRAULIC BINDING MEANS. WALTER KIRCHNER, Berlin-Grunau, Germany, assignor to Chemische Fabrik Grünau, Landshoff & Meyer Aktiengesellschaft, Berlin-Grunau, Germany. Filed Mar. 21, 1927, Serial No. 177,216, and in Germany Jan. 11, 1927. 8 Claims. (Cl. 106—27.)



6. A process of forming a cementitious composition which comprises forming a mix of Portland cement and adding thereto while working a mixture of calcium and aluminum chloride in substantially equal amounts, thereby accelerating the setting time of the composition.

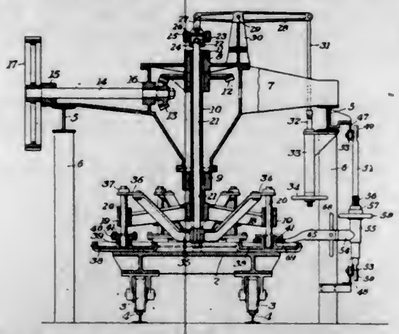
1,782,472. DIE HEAD. VICTOR R. KOONTZ, Waynesboro, Pa., assignor to Landis Machine Company, Waynesboro, Pa., a Corporation. Filed Aug. 25, 1927. Serial No. 215,429. 9 Claims. (Cl. 10—100.)

4. A die head consisting of front and rear units, the front unit comprising a front body member having chaser holders pivotally mounted therein, a closing ring mounted on the front body member and connected with the chaser holders, means for holding the said ring against axial displacement on the said head body member, means tending to rotate the ring to move the chaser holders to open position, and a rear unit comprising a rear body member and an adjusting ring mounted thereon and secured against axial movement on the body member, means for locking the body members together to hold them against relative rotary movement but to permit axial movement, comprising pins mounted on the rear body member adapted to engage bores in the front body member, substantially as set forth.



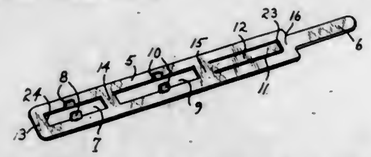
1,782,473. ELECTRIC SCISSORS. ANTON LUCICH, St. Louis, Mo. Filed Apr. 22, 1927. Serial No. 185,891. 1 Claim. (Cl. 30—1.)

In mechanical scissors, a body portion including a housing, a gear mounted in the housing, bearings in the



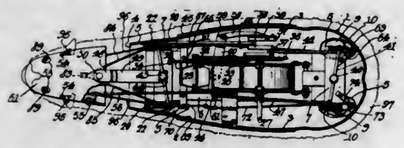
housing, a shaft having its ends mounted in the bearings and having a worm formed thereon, said worm meshing with the gear to rotate the gear, one end of the housing extending at an oblique angle and providing a stationary blade, a pivoted blade, a pivot pin on which the latter blade is mounted, one end of the pivoted blade extending into the housing, means for transmitting movement of the gear to the pivoted blade, a bowed spring member having its ends fitted in recesses in the housing, the bowed portion of the spring engaging the pivot pin to hold the pin in position, a cover plate for the housing and adapted to engage the spring member to hold the spring member under tension, and a flexible shaft positioned in one end of the first mentioned shaft to transmit movement thereto.

1,782,474. TIME-CONTROLLED COMPASS INDICATOR. WILLIAM I. MCLAUGHLIN, San Francisco, Calif., assignor, by mesne assignments, to Standard Oil Company of California, San Francisco, Calif., a Corporation of Delaware. Filed Feb. 16, 1926. Serial No. 88,540. 5 Claims. (Cl. 33—205.)



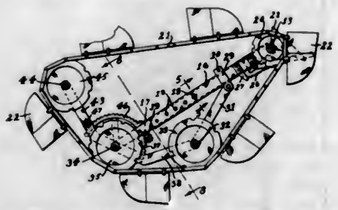
5. In a time controlled compass, a pivotally mounted magnetic compass needle, clock work mechanism, a shaft driven by said mechanism, an arm carried by said shaft, a leaf spring mounted to swing about a pivotal axis, a shoulder for engaging the free end of said spring, means engageable by said spring when the same is swung out of engagement with said shoulder for fixing the position of the needle, and a pivotally mounted lever having one end thereof extending into the path of movement of said arm and the other end thereof engageable with said leaf spring.

1,782,475. PLATE-GLASS-POLISHING APPARATUS. FREDERIC MERIAN and JAMES W. CRUIKSHANK, Pittsburgh, Pa., assignors, by mesne assignments, to Pilkington Brothers Limited, Lancashire, England, a British Company. Filed Aug. 6, 1925. Serial No. 48,530. 11 Claims. (Cl. 51—109.)



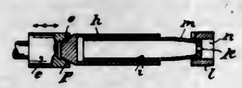
3. In a glass surfacing machine having a supporting structure carrying detachable surfacing elements, means for removing said surfacing elements when detached from the supporting structure, said means including a vertically adjustable arm movable horizontally into and out of engagement with said surfacing elements.

1,782,476. HOSE CLAMP. CHARLES A. PARKER, Haugan, Mont. Filed June 29, 1929. Serial No. 374,690. 2 Claims. (Cl. 24—19.)



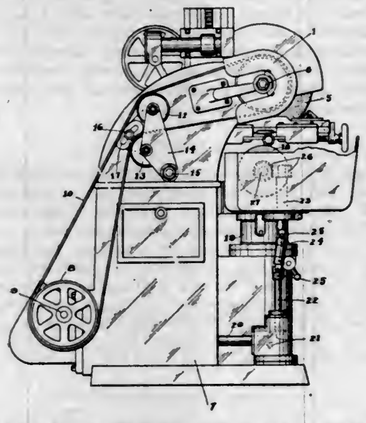
1. A hose clamp comprising a strap body, a tongue, said body having a middle slot and a slot at each end portion thereof, said tongue adapted to be received by the middle slot when the device is disposed in the instrlled position, a tongue within the slot nearest the tongue end portion of the body, and said last named tongue adapted to be received by the slot remotest therefrom when the device is in its installed position.

1,782,477. ANIMATED TOY. HERBERT EDWARD PRICE. Seattle, Wash. Filed Jan. 29, 1927. Serial No. 164,561. 3 Claims. (Cl. 46—40.)



1. An animated toy including a body portion, a spring motor therein, articulated legs pivotally connected to and extending from the body portion, each leg including an upper leg portion, a lower leg portion and a foot portion mounted for relative movement, means operated by the motor for simultaneously moving forwardly one front leg and the diagonally opposed rear leg and for moving rearwardly one front leg and the diametrically opposed rear leg, and means controlled by the motor for holding the lower leg portion against swinging movement relative to the upper leg portion during the last portion of its forward movement and the first portion of its rearward movement and for releasing said lower leg portion to swing relative to the upper leg portion during the remaining swinging movement of the legs, said means including an elastic strap connecting the upper leg portion to the lower leg portion at the front thereof, an actuating cord connected to the lower leg portion at the back thereof, and a motor operated lever connected to the cord for holding said cord taut during the latter portion of the forward movement and first portion of the rearward movement of the leg, thereby to stretch the strap of said leg, and for producing slack in the cord during the latter portion of the rearward movement and first portion of the forward movement of the leg.

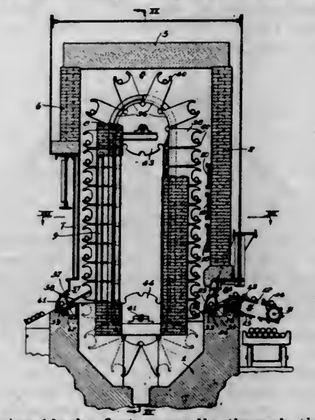
1,782,478. DITCH-DIGGING MACHINE. CHARLES H. RUTH, Huntington Park, Calif., assignor, by mesne assignments, to Ruth Dredger Manufacturing Corporation, Ltd., Los Angeles, Calif., a Corporation. Filed Aug. 16, 1928. Serial No. 300,038. 4 Claims. (Cl. 37—85.)



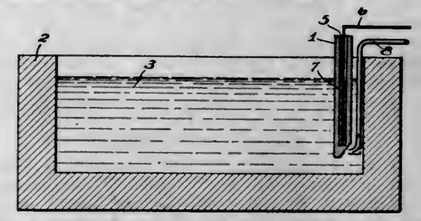
1. In a ditch digging machine, an extensible frame, shafts journaled at the ends thereof, sprocket wheels carried by said shafts, pairs of arms pivotally mounted on the shaft at one end of said extensible frame, rack and pinion connections between each pair of arms and said frame for adjusting the positions of said arms, shafts carried by said arms, sprocket wheels carried by said last mentioned shafts, sprocket chains operating on said sprocket wheels, and buckets carried by said sprocket chains.

1,782,479. TOY WEAPON. WILHELM SADTLER, Bad Homburg, Germany. Filed Nov. 14, 1927, Serial No. 233,150, and in Germany Dec. 1, 1926. 3 Claims. (Cl. 102—12.)

1. A toy weapon comprising a barrel, a firing mechanism, and a collapsible liquid containing cartridge having two telescoping parts one of which has a discharge orifice, whereby the cartridge is collapsed by the firing mechanism to propel the liquid from the cartridge through the barrel.



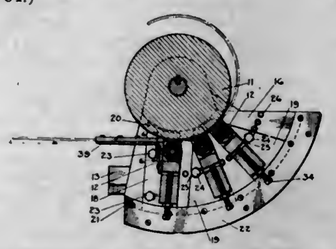
1,782,480. CENTERLESS GRINDING MACHINE. ERNEST R. SEWARD, Detroit, Mich., assignor, by mesne assignments, to Cincinnati Grinders Incorporated, Cincinnati, Ohio, a Corporation of Ohio. Filed Aug. 6, 1925. Serial No. 48,492. 23 Claims. (Cl. 51—103.)



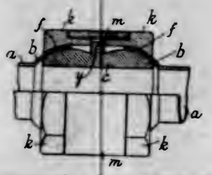
1. In a grinding machine including a grinding wheel, a regulating wheel peripherally opposed to the grinding wheel, and means for holding work between said wheels, means mounting said regulating wheel comprising in combination, a bearing within the regulating wheel, and a rigid support within said regulating wheel and upon which said bearing is rotatably mounted, said support being positioned in radial opposition to said grinding wheel, whereby the thrust of the grinding wheel transmitted through the work to the regulating wheel is received by said support directly and radially through said bearing.

1,782,481. ANNEALING FURNACE. GRANT B. SHIPLEY and HENRY ALINDER, Pittsburgh, Pa., assignors, by mesne assignments, to The International Nickel Company, Inc., New York, N. Y., a Corporation of Delaware. Filed Jan. 4, 1929. Serial No. 330,173. 8 Claims. (Cl. 263—8.)

6. The furnace for annealing elongate blanks, comprising front and rear walls provided respectively with horizontally disposed elongate inlet and discharge openings, a baffle forming with the front wall a vertical heating chamber and with the rear wall a vertical cooling chamber, and an endless conveyor within and provided with blank-engaging means extending through said baffle for progressively moving blanks first upwardly through the heating and then downwardly through the cooling chamber of the furnace.

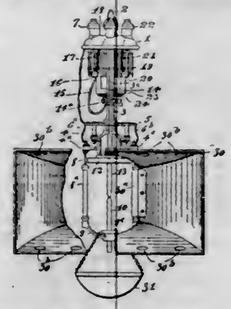


1,782,482. APPARATUS FOR HEATING A PICKLING SOLUTION. WILLIAM C. SIEFERT and GEORGE W. PAWEL, Clearfield, Pa., assignors, by mesne assignments, to The International Nickel Company, Inc., New York, N. Y., a Corporation of Delaware. Filed Aug. 28, 1928. Serial No. 302,530. 3 Claims. (Cl. 219—40.)



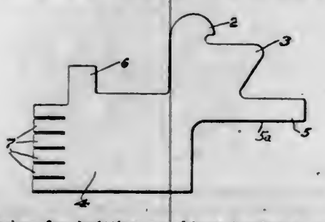
1. An internally heated pickling apparatus comprising in combination a vat containing pickling solution, insoluble electrodes partially immersed therein and spaced to prevent arcing between the electrodes, each electrode having a longitudinal bore inwardly from its outer end, and buses disposed in said bores making complete contact therewith only along the portion of the electrode in contact with the solution.

1,782,483. FORM-ROLLING MACHINE. FRANK L. SNYDER, Cleveland, Ohio, assignor to The White Motor Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 22, 1928. Serial No. 301,304. 8 Claims. (Cl. 153—54.)



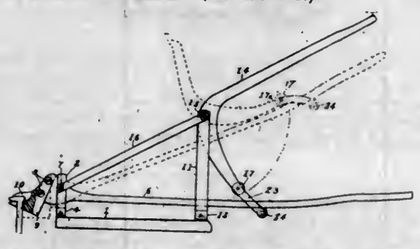
7. In a form-rolling machine, the combination of a plurality of cooperating forming rollers comprising a driven roller, an idler roller separately adjustable toward and away from said driven roller and about said driven roller.

1,782,484. PIPE JOINT. REGINALD WILLIAM SPENCER, South Kirkby, near Pontefract, and HARRY PERCY HARRIS, Sutton Coldfield, England. Filed Dec. 31, 1927, Serial No. 244,001, and in Great Britain Aug. 18, 1927. 1 Claim. (Cl. 285—92.)



A pipe joint comprising two spherically splayed pipe ends each spherically zoned interiorly and exteriorly in parallel and enclosing in opposing relation about centres spaced apart a spherically zoned inner hollow member having two adjoining exterior spherical surfaces whose largest spheres are less than the greatest diameter of said inner hollow member, said largest diameter being constituted by an annular flange of the inner hollow member, packing located in the grooved interior spherical zone of each pipe end and abutting the contacting spherical surface of the inner hollow member, an interiorly spherically zoned outer securing member of at least two parts, said parts having a screw thread engagement with one another, the outer securing member engaging the annular flange of the inner hollow member.

1,782,485. ELECTRIC-ARC LAMP. WILLIAM C. SPIETH, Geneva, Ohio. Filed Sept. 10, 1925. Serial No. 55,609. 1 Claim. (Cl. 176—115.)

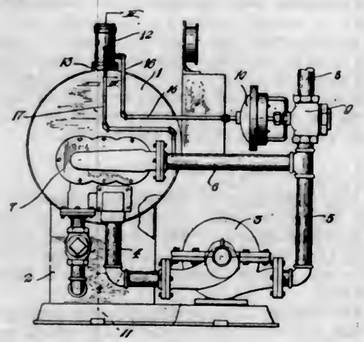


A reflector, for use with an arc lamp of a type having vertically extending members flanking the arc on the two sides of the arc, serving as conductors to the lower electrode, and surrounded by insulating sleeves, comprising a top, a base, and a lateral wall connecting said top and said base, and provided with means adapted to clamp said sleeves to hold said reflector supported on said lamp.

1,782,486. SINKER FOR KNITTING MACHINES. ALBERT E. STEWART, Franklin, N. H., assignor to Acme Knitting Machine & Needle Company, Franklin, N. H., a Corporation of New Hampshire. Filed Sept. 21, 1928. Serial No. 307,359. 2 Claims. (Cl. 66—107.)

1. A sinker for knitting machines having a web holding shoulder at its front end, a broad butt at its opposite end, a horizontal guiding surface on its lower edge, and a vertical series of frangible lugs projecting from the rear edge of said butt and extending below a lower guiding surface of the web holder, said lugs being integral with said butt and located side by side, each of said lugs being required in some form of sinker but one or more of them being superfluous in other forms, whereby different forms of sinkers may be made by breaking off the lug or lugs which are not required for any individual form.

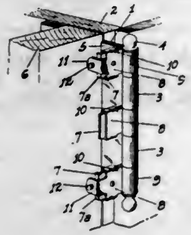
1,782,487. SPIKE-DRAWING DEVICE. JOHN F. STRAUBE, Elkhorn, Nebr., assignor of one-fourth to Nels Swanson, Fremont, Nebr. Filed Sept. 28, 1928. Serial No. 308,950. 1 Claim. (Cl. 254—21.)



A spike drawing device comprising a base, posts mounted upon the forward end of said base, a lever pivotally fulcrumed intermediate the posts, a jaw carried by said lever, posts mounted upon the rear end of said base, a second lever pivotally fulcrumed intermediate the second named posts, wheels rotatably mounted adjacent the lower end of and on said lever and oppositely disposed above and below the first lever and reinforcing bars connecting the fulcrumed pivots of both levers.

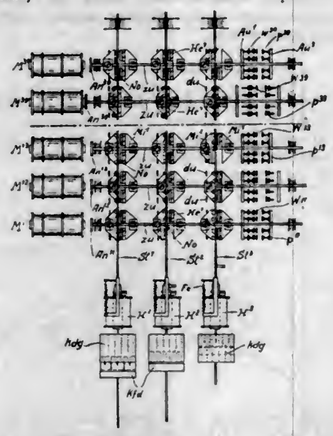
1,782,488. PROCESS OF PURIFYING ANTHRACENE. CHARLES J. THATCHER, New York, N. Y. Filed June 16, 1923. Serial No. 645,924. 10 Claims. (Cl. 260—168.)

1. The process of refining anthracene which includes grinding it in the presence of a solvent for impurities thereof in which the anthracene is relatively insoluble.



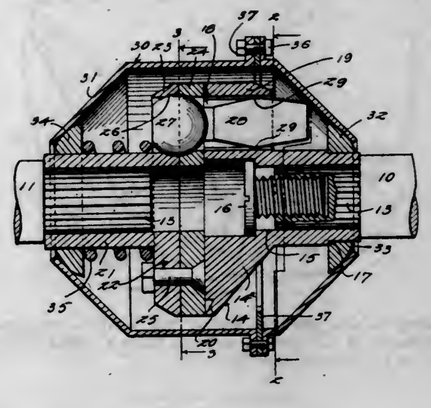
7. The process of refining anthracene which includes grinding it in the presence of a quantity of carbon tetrachloride insufficient to dissolve anthracene in proportions relatively large to the impurities dissolved, and removing the resultant solution.

1,782,489. AUTOMATIC CONTROL FOR HEATING PLANTS. LOUIS G. L. THOMAS, Chicago, Ill. Filed July 30, 1926. Serial No. 125,904. 9 Claims. (Cl. 103—5.)



1. A control apparatus for a heating plant, comprising a water circulating system having a pump, a water delivery pipe extending from said circulating system, a valve in said delivery pipe, a diaphragm connected to said valve, a connection from said pump to said diaphragm, a valve in said last named connection, and means regulated by said circulating system for controlling said last named valve.

1,782,490. ADJUSTABLE DOOR HINGE. THEODORE L. TORGERSON, Oroville, Calif. Filed Mar. 21, 1929. Serial No. 348,714. 1 Claim. (Cl. 16—131.)



A door hinge including a pair of plates adapted for separate attachment to a door and its casing in adjacent and facing relation to each other, spaced knuckles formed with one plate, other separate knuckles to cooperate with the first named knuckles, a hinge pin through all said knuckles, plates projecting from said separate knuckles, angled extensions on the other plate engaging and supporting said last named plates for sliding movement in a horizontal plane, lugs on the outer ends of certain ones of said last named plates extending in the direction of said other plate and parallel thereto, and horizontal adjustment screws between said lugs and said other plate.

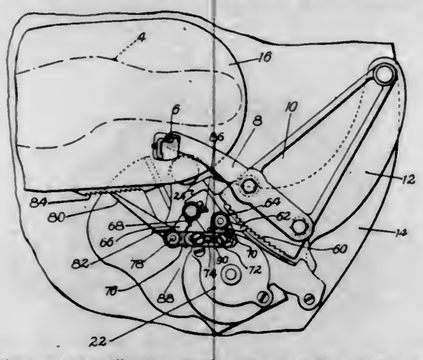
1,782,491. AUTOMATIC TELEPHONE EXCHANGE SYSTEM. FRITZ TRACHSEL, Berne, Switzerland, assignor to Chr. Gfeller Aktiengesellschaft, Bern-Bumpliz, Switzerland. Filed Apr. 12, 1926, Serial No. 101,516, and in Switzerland Apr. 15, 1925. 4 Claims. (Cl. 179—27.5.)

1. In a switch for an automatic telephone exchange, a plurality of spring contacts placed side by side, cams mounted adjacent said spring contacts, means adapted to effect a successive plural stage movement of said cams, comprising a slide bar under magnetic control, in combination with a plurality of magnetically controlled bars operating transversely to said slide bar to selectively effect a final movement of one of said cams with respect to an associated spring contact.

1,782,492. UNIVERSAL JOINT. GEORGE W. VAN DEREN, Elmira, N. Y. Filed Nov. 1, 1927. Serial No. 230,344. 4 Claims. (Cl. 64—91.)

1. In a universal joint, a body having means whereby it may be secured to a shaft and having longitudinally extending openings adapted to parallel the axis of the shaft, a head having a shank whereby it may be concentrically secured to a second shaft against rotation with relation thereto and drive connectors having shanks engaged in the openings of the body and spherical heads engaged in sockets in said head, each shank having coaction with the walls of the opening in which it engages permitting oscillation thereof in a plane intersecting the shank and radial to the axis of the body while preventing oscillation thereof at right angles to said plane.

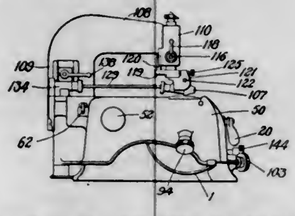
1,782,493. ACTIVE CARBON AND PROCESS FOR MAKING SAME. JOHANNES VAN LOON, Deventer, Netherlands. Filed Feb. 15, 1927, Serial No. 168,468, and in the Netherlands Mar. 5, 1926. 5 Claims. (Cl. 252—3.)



1. The process of manufacturing decolorizing carbon which comprises grinding carbon to a size not substantially greater than 2 to 9 μ in the presence of a liquid medium, but discontinuing the reduction in size at a point where the product is substantially non-colloidal, and separating the carbon and liquid medium after grinding.

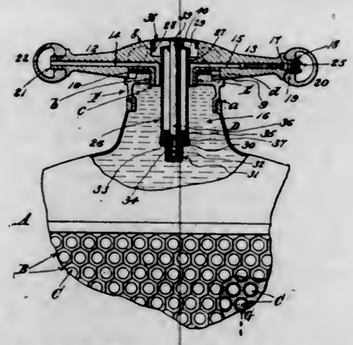
3. An adsorptive agent which consists of carbon which has been caused to acquire adsorptive properties by grinding to a size of about 2 to 9 μ.

1,782,494. SOLE-ROUNDING MACHINE. REGINALD BOYD WOODCOCK and THOMAS AUBREY KESTELL, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Feb. 19, 1926, Serial No. 89,415, and in Great Britain Mar. 13, 1925. 17 Claims. (Cl. 12—25.)



15. In a sole-rounding machine wherein a pattern and a knife are relatively moved to transfer the point of operation of the knife forwardly around the pattern and to a point beyond the starting point of operation of the knife and then have relative retrograde movement, a carrier, means for relatively moving the carrier and pattern toward and away from each other in accordance with variations in the peripheral contour of the pattern while the point of operation of the knife is being transferred, a knife support movably mounted on the carrier, means for moving the knife support relatively to the carrier to maintain the knife and pattern in engagement while the point of operation of the knife is being transferred, means for

locking the knife support to the carrier, and means carried by the means for effecting relative movement of the carrier and the pattern constructed and arranged to render the

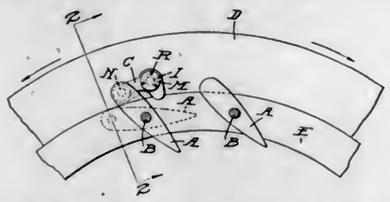


locking means effective during the relative retrograde movement of the pattern and the knife to effect separation of the pattern and the knife.

1,782,495. SKIVING MACHINE. REGINALD BOYD WOODCOCK and JOSHUA COOK, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Apr. 11, 1927, Serial No. 182,929, and in Great Britain Apr. 17, 1926. 7 Claims. (Cl. 69—9.5.)

1. A machine of the class described having, in combination, a rotatable knife, a sleeve to which the knife is fastened, a bushing in which the sleeve is rotatably mounted, a thrust bearing between the bushing and the sleeve, and means for adjusting the bushing in a path parallel to the axis of rotation of the knife.

1,782,496. LEAK-TESTER CAP FOR AUTOMOBILE RADIATORS. MAX ANCHELEVICH, Cincinnati, Ohio. Filed Dec. 16, 1929. Serial No. 414,361. 4 Claims. (Cl. 220—85.)

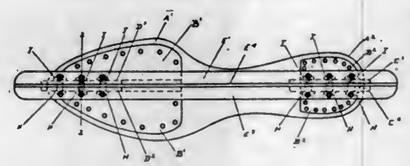


1. An air-controlling cap for automobile-radiators for use in detecting and spotting leaks, the same comprising a detachable cap-member proper, radially-extending handle-arms, passage-ways leading from the central core or body of said cap-member and the water-chamber along said handle-arms to capped inlet and outlet ends, and an air compression pump extending from said cap-member downwardly into the neck and water-chamber of the radiator, whereby, when a leak in any of the radiator tubes or walls is present, the operation of said pump serves to forcibly and noticeably expel a minute jet or stream of the leaking water at the exact location of the leak so that repairs can be immediately or promptly and intelligently made, substantially as shown and described.

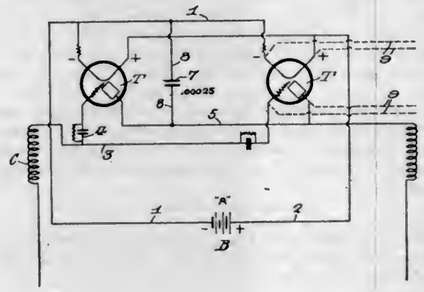
1,782,497. CLAM-CATCHING IMPLEMENT. HANS OLAF ANDERSON, Hampton Bays, N. Y. Filed Oct. 8, 1929. Serial No. 398,196. 1 Claim. (Cl. 37—119.)

A clam digging implement comprising a substantially circular member, a rigid handle attached thereto, a plurality of rigid teeth secured to said circular member at the side spaced with respect to said handle, a basket like structure having an open side adapted to conform in shape to said circular member, and means for securing said basket like member to said circular member with its open side conforming thereto.

1,782,498. LINK FOR HYDRAULIC TURBINES. GEORGE A. BIGGS, Orange, Mass., assignor to Rodney Hunt Machine Company, Orange, Mass., a Corporation of Massachusetts. Filed Feb. 13, 1929. Serial No. 339,716. 4 Claims. (Cl. 253—122.)



1. A link consisting of a body, and a stem combined with said body to form an integral member, said body having a hole therein with means for covering said hole, for the purpose set forth.

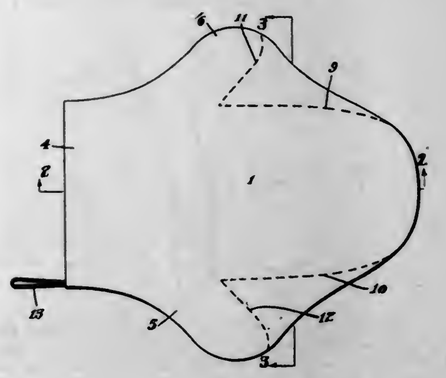


1,782,499. SKATE. GEORGE A. CARNEY, Dorchester, Mass. Filed Mar. 25, 1930. Serial No. 438,850. 4 Claims. (Cl. 208—167.)

1. A skate comprising a four runner blade, each runner angularly disposed to the others and having transverse

openings therein, a frame comprising sole and heel plate brackets formed with pressed out portions having transverse openings therein arranged to register with the transverse openings in any one of said runners, and clamping elements extending through said transverse openings.

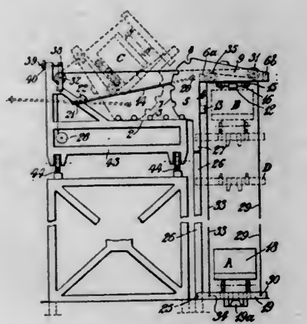
1,782,500. DETECTOR-TUBE CIRCUIT. ROBERT LESLIE CHILES, Knoxville, Tenn. Filed Sept. 1, 1928. Serial No. 303,499. 1 Claim. (Cl. 250—27.)



A radio receiving set comprising a number of detector tubes, means for connecting the filaments of the tubes with a source of supply, means for connecting the grid posts of the tubes with a coil, a grid condenser and leak arranged in the circuit between each grid post and coil, means for connecting the plate posts of the tubes with a transformer and a condenser connected with the plate post circuit and with the negative filament circuit.

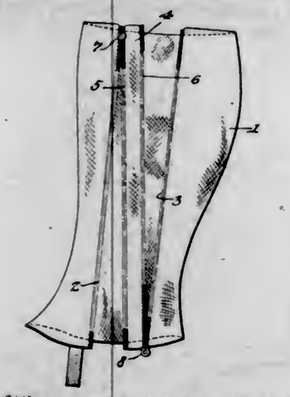
1,782,501. ENGINE LUBRICANT AND PROCESS OF MAKING. ROSCOE E. CLOUGH, Palo Alto, Calif., assignor to Castorlube Refining Co., San Francisco, Calif., a Corporation of California. Filed Apr. 13, 1927. Serial No. 183,614. 1 Claim. (Cl. 87—9.)

A lubricating compound comprising castor oil, heat treated at a temperature not to exceed 590 F. until no more than 4.2% of the total weight of the oil has been removed under atmospheric conditions, mixed with mineral oil.



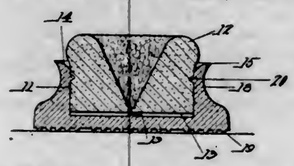
1,782,502. COMBINATION POLISH APPLYING AND FINISHING MITT. CHARLES ALLEN CRANE, Winthrop, Mass., assignor of one-half to Edwin G. Wurzburg, Quincy, Mass. Filed Sept. 7, 1929. Serial No. 391,075. 1 Claim. (Cl. 15—227.)

A reversible polishing mitt adapted to perform the dual function of a liquid polish applying medium and a dry rubbing and finishing medium, said mitt including a plurality of layers of fabric stitched together around the edges thereof except for one portion, to thereby leave an opening for the insertion of the hand within the mitt, one of the layers of fabric presenting an outer relatively absorbent surface for a semi-liquid polishing compound and a moisture proof backing for said layer, the outer surface of the other layer of fabric presenting a soft dry surface for rubbing and finishing the surface, a plurality of lines of stitching extending inwardly from the closed end of the mitt and being spaced from each other and from the



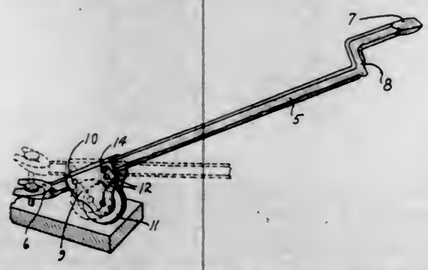
closed sides of the mitt and uniting the two layers so as to form a central pocket for the fingers of the hand, and a line of stitching extending outwardly from each of said last named lines of stitching at an angle to the side of the mitt so as to form a gripping web between said two lines of stitching so as to form two thumb pockets, one being arranged on each side of the central pocket, one of said last named thumb pockets being adapted to receive the thumb when the mitt is being used to apply the polish, and the second of said thumb pockets being adapted to receive the thumb when the mitt is reversed for rubbing and finishing with the relatively soft dry surface of the mitt.

1,782,503. APPARATUS FOR TIPPING AND DISCHARGING RAILWAY CARS. BERNARD EDMUND ELLSON, Walton-on-Thames, England. Filed Apr. 29, 1929. Serial No. 359,118. 8 Claims. (Cl. 214—51.)



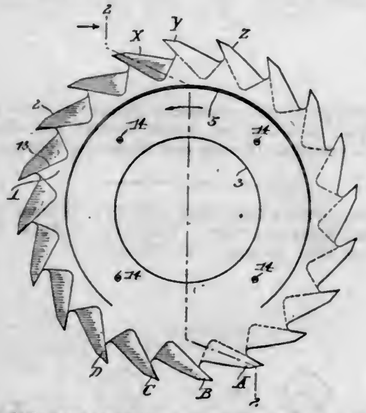
1. In a car tipping apparatus, a frame, a cradle mounted for rocking on the frame from a position to receive the car in an upright relation to a position to invert the car for dumping purposes, and means carried by and bodily movable with respect to the cradle for engaging with the top of the car, whereby to permit bodily movement of the car with respect to the cradle in the initiation of the cradle-rocking movement.

1,782,504. FASTENING FOR LEGGINGS AND BOOTS. FRED ERHARDT, Kansas City, Mo., assignor to Ethel A. Cooper, Kansas City, Mo. Filed Oct. 17, 1929. Serial No. 400,405. 3 Claims. (Cl. 36—2.)



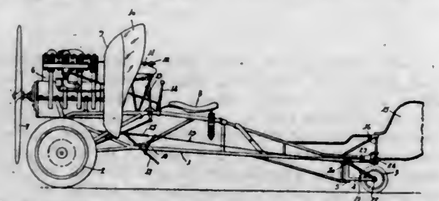
1. A form-fitting garment having an intermediate section interposed between the free edges of the main portion of the article, and slide fastener means for joining the adjacent edges of the intermediate section and of the main portion of the garment, the slides of said fastener means operating in opposite directions.

1,782,505. CUP FOR SPONGE MOISTENERS. CARL C. HARRIS, Orange, Mass. Filed Oct. 1, 1928. Serial No. 309,464. 2 Claims. (Cl. 91—54.4.)



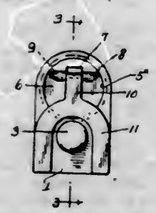
1. As an article of manufacture, a sponge cup moistener comprising a base having a recess in the top, a moistening sponge in said recess having a convex upper surface, the base being provided with an outwardly and upwardly projecting ledge around the top for receiving the fingers of the operator when brushed along the surface of the sponge and removing excess moisture therefrom, said lip having on the inside a gentle curve so that the water will drain back into the cup and the base having a groove entirely around it underneath and extending to the edge of said lip whereby it can be lifted and moved around.

1,782,506. WRECKER BAR. WILLIAM F. HENDERSON, Colfax, Wash. Filed Sept. 10, 1929. Serial No. 391,615. 1 Claim. (Cl. 254—27.)



A wrecker bar comprising a main body portion having a claw at one end and an offset shoulder adjacent its other end, a carriage member pivotally mounted on said bar adjacent the claw end thereof, a wheel for said carriage member, and means whereby said carriage member may be adjusted to different pivotal positions.

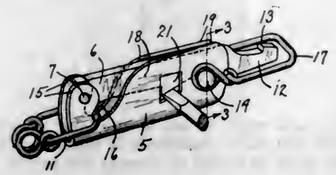
1,782,507. DADO SAW. WARREN B. HUTHER, Rochester, N. Y., assignor to Huther Bros. Saw Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Sept. 13, 1927. Serial No. 219,212. 11 Claims. (Cl. 144—238.)



1. A dado saw comprising a circular disk having a continuous series of peripheral teeth lying in a common plane, said disk having a recessed portion affording a lateral mounting face lying in a plane inclined to the plane of said teeth.

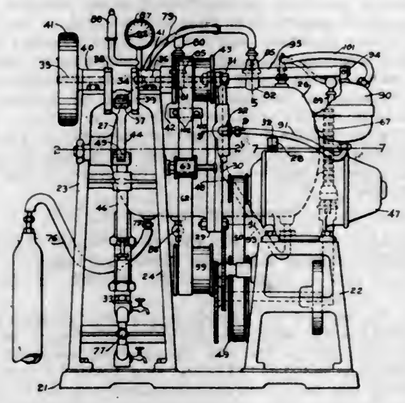
1,782,508. AEROVEHICLE. ALVIN ELMO JAMES, Waycross, Ga. Filed Nov. 14, 1929. Serial No. 407,176. 4 Claims. (Cl. 180—1.)

1. A vehicle of the character described comprising a frame, a pair of wheels supporting the forward end of the frame, a caster wheel connected to the rear end of the frame, an engine on the forward portion of the frame, a propeller driven by the engine, a rudder hingedly connected to the rear end of the frame, and steering gear connected to both the rudder and said caster wheel for simultaneously swinging them.



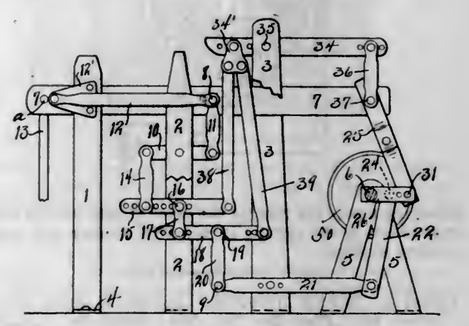
1,782,509. COLLAR BUTTON. GEORGE KRASNEY, Chicago, Ill. Filed May 26, 1930. Serial No. 455,762. 1 Claim. (Cl. 24—90.5.)

A collar button of the character described comprising a substantially flat plate having a recess in one end portion,



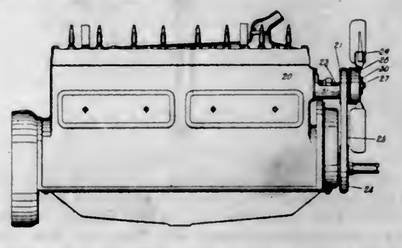
a membrane mounted in the recess in spaced opposed relation to the bottom wall thereof, a retaining flange extending into the recess for securing the membrane therein, a pintle of substantially oval cross section mounted for rotary movement on the inner side of the membrane and engageable with the bottom wall of the recess, an angular arm projecting outwardly from the pintle, a yoke depending from the arm, and a headed shank projecting from the plate below the recess and extending through the yoke.

1,782,510. TIRE-CHAIN LOCK. BERT E. LANG, Spokane, Wash. Filed Apr. 12, 1930. Serial No. 443,728. 1 Claim. (Cl. 24—69.)



A tire chain lock having in combination a casing, hooked jaws for one end of the casing, a body member, a hook formed on one end portion of said body, said body hook pivoted between said hooked casing jaws whereby the body is adapted to fold into the casing, said body hook and casing hooked jaws arranged to cooperatively form an opening in the folded position adapted to serve as a bearing for one end link of a tire chain, a pin through the other end of the casing adapted to form a connection for the other end link of the chain, a plurality of shoulders for the body member adapted to initially retain the first mentioned tire chain link, one of said shoulders arranged to fit over the pin when the body is in the closed position, opposing flanges for the casing adapted to hold the body in the locked position, said body having beveled edges whereby it may pry the flanges apart when being swung to the locked position, a shoulder on the outer end portion of the body member whereby said member may be securely grasped when closing same, and said casing having an opening therethrough whereby the body member may be pried loose from its locked position.

1,782,511. CARBONATING MACHINE. FREDERICK NEUSCHAFER, Jersey City, N. J., and HARRY BOTWIN, Brooklyn, N. Y. Filed Jan. 29, 1929. Serial No. 335,818. 3 Claims. (Cl. 261—93.)

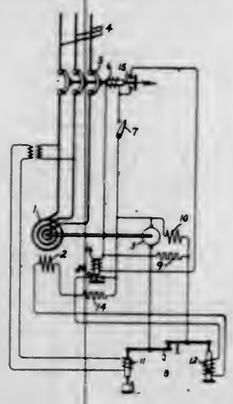


1. In a carbonating machine, a mixing tank, a pump, pump driving means, a rock lever, a balance weight at one end thereof, a hollow vessel on the opposite end of said lever, a rigid pipe connection between said hollow vessel and said tank, means in said pipe connection for permitting said vessel to freely move with said rock lever as the weight of the water in said hollow vessel increases and decreases according to the water level in said tank, and means automatically operable by said lever for controlling the actuation of said pump driving means.

1,782,512. POWER-SAVING JACK. SAMUEL D. RANDOLPH, Fort Worth, Tex. Filed Sept. 13, 1929. Serial No. 392,291. 5 Claims. (Cl. 74—14.)

1. A power saving jack comprising an upright frame consisting of a work end frame, a power end frame, a bearing frame, and a fulcrum frame, a walking beam operatively connected to said work end frame member and operatively connected with said power end frame member, and link bars and levers pivotally connecting the ends of said walking beam to said fulcrum frame member, and means operatively connected with said bearing frame for driving said walking beam.

1,782,513. INTERNAL-COMBUSTION ENGINE. DELMAR G. ROOS, South Bend, Ind., assignor to The Studebaker Corporation, South Bend, Ind., a Corporation of New Jersey. Filed Feb. 20, 1928. Serial No. 255,670. 8 Claims. (Cl. 123—171.)



1. In an internal combustion engine, a fan, a drum secured thereto, driving mechanism therefor, and a friction clutch comprising weighted arms supported by said driving means contacting with said drum to rotate said fan.

1,782,514. REGULATING SYSTEM. HAROLD T. SEELEY, Lansdowne, Pa., assignor to General Electric Company, a Corporation of New York. Filed Apr. 20, 1929. Serial No. 356,803. 6 Claims. (Cl. 171—119.)

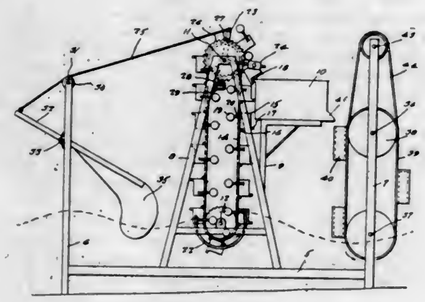
6. In combination, a synchronous dynamo-electric machine, an electric circuit, switching means for connecting said machine to said circuit, a source of current connected to the field winding of said machine, current limiting means in series with said source and field winding, a regulator for controlling the voltage of said source including

a winding connected in series with said current limiting means across said source, and means controlled by said

switching means for varying the effect of said current limiting means in the circuits of said field winding and anti-hunting winding.

1,782,515. SCREW DRIVER. JOSEPH A. SIGG, Pittsburgh, Pa. Filed Dec. 19, 1929. Serial No. 415,238. 3 Claims. (Cl. 145—50.)

1. A screw driver comprising a stem having a slotted end and a handle on its other end, said stem having a pair of radial lugs projecting in axially spaced relation, a sleeve nut disposed between said lugs and fixed against axial movement, an interchangeable bit disposed in the slotted end of said shank, and a sleeve adapted for screw thread engagement with said nut whereby it is subjected to axial movement on said shank to lock said bit in its operative position.

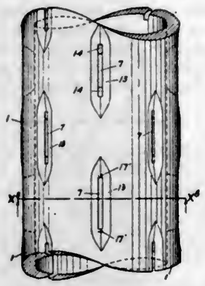


1,782,516. ELECTRIC SWITCH. SAMUEL L. SNEIERSON, Boston, and JAMES L. HILDEBRAND, Lynn, Mass., assignors, by direct and mesne assignments, to National Mfg. Co., Boston, Mass., a Corporation of Massachusetts. Filed Apr. 8, 1930. Serial No. 442,532. 10 Claims. (Cl. 240—123.)

1. In switch mechanism, a casing having a pull chain opening, a chain guide mounted in said opening and a pull chain attached at one end to the switch operating parts and passing through said guide, said guide comprising a tapered coil spring normally extending perpendicular to said casing to hold said chain in alinement with said open-

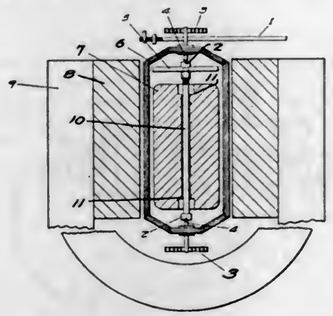
ing, while said chain is not in use, and movable angularly with said chain regardless of the direction of pull when the chain is pulled to operate the switch.

1,782,517. POWER GENERATOR. ROSARIO SOTO, Oxnard, Calif. Filed Dec. 27, 1929. Serial No. 416,859. 1 Claim. (Cl. 103—69.)



In a power generator of the class described, a frame, a rockable actuator mounted in the frame to ride on the waves so that the actuator will be rocked as the waves rise and fall, an endless bucket conveyor structure, means for operating the structure from the actuator, and a receptacle adapted to be filled with water from the endless bucket structure, said endless bucket structure comprising a pair of chain and sprocket mechanisms, buckets hingedly mounted across the chains, arms projecting from the buckets and terminating in weights for holding the buckets in upright positions as they move upwardly and in inverted position as they move downwardly, and guides associated with said arms to cause the buckets to move from inverted positions through the water to upright positions.

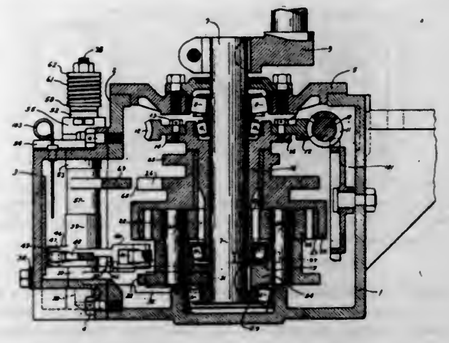
1,782,518. SCREEN PIPE AND METHOD OF MAKING SAME. ROBERT ALEXANDER STEPS, Los Angeles, Calif. Filed July 8, 1929. Serial No. 376,732. 4 Claims. (Cl. 29—163.5.)



1. The method of making screen pipe consisting of slotting the pipe with a circular cutter operating from the outside surface of the pipe inward, also removing the shoulders at the ends of the slot by a double acting reciprocating tool adapted to cut one shoulder on the forward stroke and the other shoulder on the return stroke, and also drawing a roller back and forth under pressure over the outside of the slot and lengthwise thereof, said roller

comprising two opposed frusto-conical portions with their large ends abutting so that when the center of said roller works at the extremities of said slot it presses into the unslotted part of said pipe at places beyond the ends of said slot and between the projected side walls thereof.

4. Screen pipe consisting of pipe having elongated slots the narrowest portion of each slot comprising a toughened mouth lying between the inner and outer surfaces of said pipe but nearer said outer surface, said pipe also having pressure-formed depressions in its outside surface one completely surrounding each of said toughened slot mouths respectively, the perimeter of each of said depressions lying in the outside surface of said pipe and being completely spaced apart from its slot and completely surrounding its slot, the said depression becoming deeper all around its slot from the perimeter of said depression toward the slot so that the entire mouth of the slot including its ends as well as its sides lies below the outside surface of said pipe.



1,782,519. ELECTRIC METER. CHARLES DAVID SUTTON, Waterbeach, England, assignor to Cambridge Instrument Company, Limited, London, England, a Corporation of Great Britain. Filed May 3, 1929, Serial No. 360,198, and in Great Britain Jan. 26, 1929. 3 Claims. (Cl. 171—95.)

3. An instrument of the class described comprising an indicator having a pivot, a bearing for the pivot, means for producing a magnetic field, a winding supported by the bearing and disposed in the magnetic field and adapted for the passage of an electric current to cause the pivoting of the indicator about the pivot on the bearing, and means controlled by the magnetic field for controlling the position of the bearing.

1,782,520. INTERMITTENT DRIVING MECHANISM. HARRY M. SWINDLER, Dayton, Ohio, assignor to The James Leffel & Company, Springfield, Ohio, a Corporation of Ohio. Filed Feb. 1, 1930. Serial No. 425,208. 42 Claims. (Cl. 74—34.)

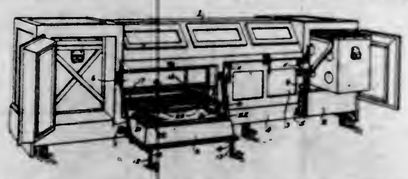
1. In combination, a driven means, a driving means, planetary gearing therebetween, means to render a portion of said planetary gearing stationary to establish a connection between the driven means and the driving

means, and means including a pawl and ratchet operated by a portion of the planetary gearing to time the period of holding said means stationary.

1,782,521. MAGNETIC CORE. PANFILO TROMBETTA, Milwaukee, Wis., assignor to General Electric Company, a Corporation of New York. Filed Nov. 26, 1929. Serial No. 409,971. 3 Claims. (Cl. 175—356.)

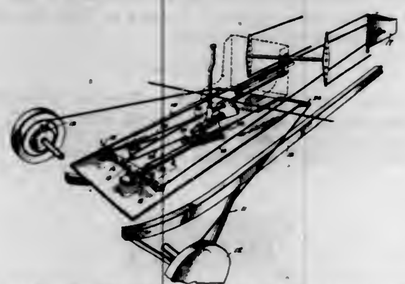
1. A magnetic core comprising a stack of laminations, means for tightly fastening said laminations into separate groups to prevent humming of the laminations in each group and means for tightly fastening said groups together to prevent humming of the stack.

1,782,522. FIG-STERILIZATION APPARATUS. JOHN G. TYLER, CHARLES C. TAYLOR, and WILLIAM S. JOHNSON, Fresno, Calif., assignors to California Peach & Fig Growers Association, Fresno, Calif., a Corporation of California. Filed Nov. 14, 1927. Serial No. 233,014. 4 Claims. (Cl. 99—2.)



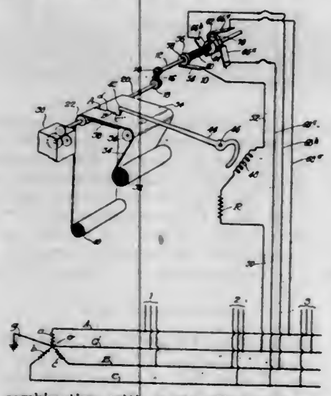
1. Apparatus for sterilizing dried fruit comprising an elongated heat insulated chamber, a foraminous belt conveyor therein adapted to convey fruit therethrough, means for feeding fruit to said conveyor and for discharging it from the conveyor and chamber, an auxiliary compartment extending along said chamber provided with spaced openings leading thereto, means for forcing hot air to said compartment, and means for reheating the hot air within said compartment as it passes through said openings.

1,782,523. REFRIGERATOR-DISPLAY-CASE CONSTRUCTION. VIRGIL P. WARREN, Atlanta, Ga. Filed Dec. 26, 1928. Serial No. 328,467. 2 Claims. (Cl. 62—37.)



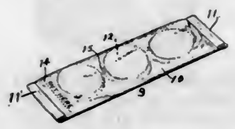
1. A casing having an opening in a side thereof, channel guideways horizontally supported parallel to each other

in said casing, a tray slidable in the channels of said channel guideways through said opening, a door for said opening hinged to said casing to swing about a horizontal axis,



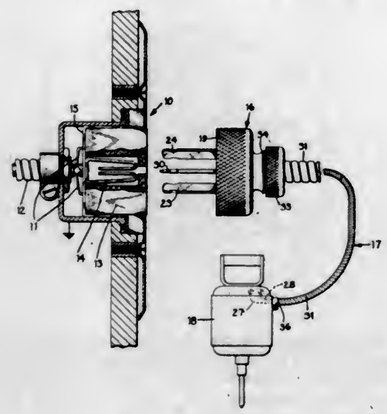
means for supporting said door, when opened, parallel to said guideways, and means for slidably supporting the outer end only of said tray on the inner face of said door when in open position.

1,782,524. RUDDER AND BRAKE CONTROL. EDGAR R. WEAVER, Dayton, Ohio. Filed May 21, 1929. Serial No. 364,867. 9 Claims. (Cl. 244—29.) (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.)



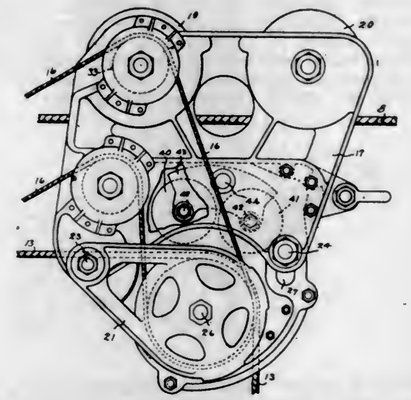
1. An aircraft having a rudder and landing wheel brakes, a pivoted rudder control bar, cables connecting said bar and said rudder, tiltable brake operating pedals on said bar, brake cables connecting said pedals and said brakes and means to retain said pedals in a neutral position when said bar is moved about its pivot, said means comprising a compensating cable trained over a fixed pulley and over a pair of pulleys on said rudder bar on either side of the pivot thereof and having its ends fast to said brake operating cables.

1,782,525. ELECTRICAL INSTRUMENT. ALBERT J. ALLEN, Brooklyn, N. Y., assignor to The Engineering Products Corporation, Inc., New York, N. Y., a Corporation of New York. Filed May 24, 1928. Serial No. 280,145. 2 Claims. (Cl. 234—505.)



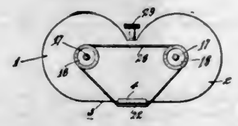
1. In combination with a recording volt-meter having a timing device and a chart moved at a constant rate thereby, a circuit changing mechanism driven at a rate commensurate with that of the chart, said circuit changing mechanism comprising a plurality of unequally spaced yielding contact members, a rotary circuit closing member mounted for coaction with said contact members, said contact members being arranged to normally oppose the movement of said rotary circuit closing member, spring means tending to turn said circuit closing member and means for periodically tripping said yielding contact members so as to successively release the rotary circuit closing member after a lapse of a predetermined time interval.

1,782,526. TUBULAR CONTAINER. ARTHUR L. BEARDSLEY, Elkhart, Ind. Filed Jan. 30, 1928. Serial No. 250,352. 2 Claims. (Cl. 206—46.)



2. In combination, a flattened sleeve of ductile metal, a plurality of medicinal tablets subject to deterioration by access of air or moisture in said sleeve, said sleeve having its end sealed by flattening and folding over, the removal of one or more of said tablets providing sufficient unoccupied space in the tube to permit the opened end thereof to be pinched together and folded upon itself to form a tight seal.

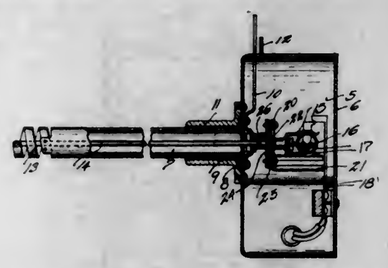
1,782,527. ELECTRIC WIRING DEVICE AND ACCESSORY. INSLEE A. BENNETT, Pittsburgh, Pa., assignor to National Electric Products Corporation, New York, N. Y., a Corporation of Delaware. Filed Sept. 14, 1928. Serial No. 306,044. 6 Claims. (Cl. 173—361.)



1. In electric wiring systems including a portable cord and an associated plug, said plug having a shell and three prongs therein, two for carrying current and the other for establishing a ground return, said ground return prong being in electrical connection with the shell, said portable cord including a flexible sheath and a two conductor cable and means for clamping the sheath directly to the shell of the plug and for thereby compelling the proper establishment of the ground circuit between the sheath and the ground return prong of the plug.

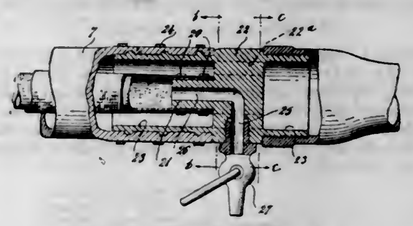
1,782,528. HOISTING AND HAULING CARRIAGE FOR USE ON ELEVATED TRACKWAYS. KNUTE BERGER, Seattle, Wash. Filed July 23, 1929. Serial No. 380,330. 8 Claims. (Cl. 212—89.)

1. In apparatus of the class described, a carriage having a plurality of sheaves therein, two of which are upon the same axis and are connected to rotate together, vertically-movable means for connecting said two last-named sheaves to the carriage to permit them to have a rising and falling movement, one of the other of said sheaves being located in a higher plane than the said last-named two, a hauling line, a tong line leading over one of said connected-together sheaves, a slack pulling line passing around the other of said connected-together sheaves and up and around said higher sheaves, said two last-named lines being connected to the hauling line at a point comparatively near said carriage, and movable means mounted in said carriage in position to be frictionally engaged by said tong line when said connected-together sheaves are moved toward said means.



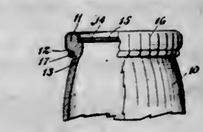
1,782,529. FILM-MAGAZINE-LOCKING DEVICE. CLYDE DE VINNA, Los Angeles, Calif., assignor to Metro-Goldwyn-Mayer Corporation, Culver City, Calif., a Corporation of New York. Filed Aug. 20, 1928. Serial No. 300,703. 4 Claims. (Cl. 242—71.)

1. A locking device for continuous film magazines comprising, a light proof closure member adapted to cover film apertures in the base plate of a film magazine, said closure member being provided with means for engaging the base plate, and means carried by said closure member adapted to operatively engage with spindles carried by such film magazine and substantially prevent rotation thereof when said closure is engaged with said base plate.



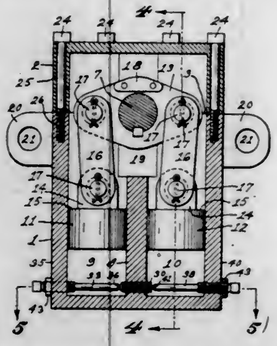
1,782,530. COMBINATION CONTROL SWITCH. CHARLES P. DOUGHERTY, Spokane, Wash. Filed Apr. 23, 1929, Serial No. 357,547. Renewed July 23, 1930. 10 Claims. (Cl. 200—137.)

1. A combination control switch comprising a disc loosely mounted on a thermostat torsion rod, a mercury tube loosely mounted on the torsion rod, an arm for said disc adapted to engage an end portion of the mercury tube, another disc mounted on the torsion rod in engagement with



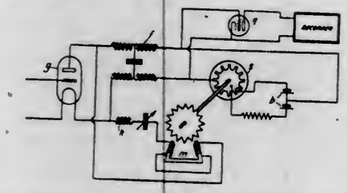
the first named disc, means for clamping said discs in frictional engagement with each other, said means secured to said torsion rod, and an arm for the second named disc arranged to engage an end portion of the mercury tube.

1,782,531. METHOD AND MEANS FOR FILTERING FLUIDS. ANTHONY H. G. FOKKER, Amsterdam, Netherlands. Filed Sept. 27, 1928. Serial No. 308,814. 3 Claims. (Cl. 210—164.)



1. A filtering device for liquid delivering mechanisms, including a hose, a fitting adapted to be connected in said hose said fitting embodying an internal wall having a longitudinal passage merging with an offset passage opening externally of said fitting a plurality of apertures in said wall radially spaced from said longitudinal passage, a filtering element of an elongated configuration connected at one end to said fitting in connection with said bore, a non-stretchable perforate covering conforming to said element, a coupling for removably securing the other end of said element and said covering within the hose at a point adjacent the delivery mechanism and at an appreciable distance from said fitting whereby filtration of the liquid delivered to said hose will be effected substantially throughout its entire length, the liquid passing through said apertures for discharge from the hose.

1,782,532. CONTAINER COVER. WILLOUGHBY F. HILL, New York N. Y. Filed Mar. 17, 1926. Serial No. 95,244. 3 Claims. (Cl. 215—38.)

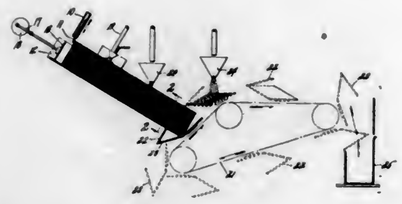


1. A container cover comprising a hood formed of resilient sheet material, having a central portion for covering the container mouth, an integral expansive pleated flange depending from said central portion for closely embracing a container neck, the edge portions of said flange being rolled back upon themselves into pleat clamping relation.

1,782,533. SHOCK ABSORBER. WILLIAM B. HITE, Jr., Webster Groves, Mo. Filed Jan. 14, 1929. Serial No. 332,332. 3 Claims. (Cl. 188—88.)

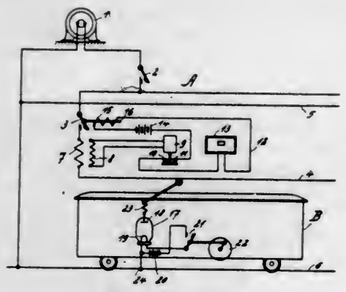
3. In a shock absorber, a casing presenting chambers adapted to contain a fluid and arranged to define an intermediate wall having a pair of independent ports in its lower portion to effect communication between said chambers and means associated with each port whereby the passage of the fluid therethrough may be controlled independently of one another and in opposite directions.

1,782,534. METHOD OF AND MEANS FOR RECEIVING TELEGRAPHIC SIGNALS. AUGUST JIPP, Berlin-Spandau, Germany, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany, a Corporation of Germany. Filed Nov. 30, 1928, Serial No. 322,624, and in Germany Aug. 6, 1927. 4 Claims. (Cl. 250—8.)



1. The method of receiving signals which includes filtering out from the incoming signal currents dot frequency and stray frequency currents, and combining the remainder of the incoming signal currents with a locally generated alternating current of dot frequency and predetermined shape whose frequency is made to depend upon the dot frequency of the incoming signal.

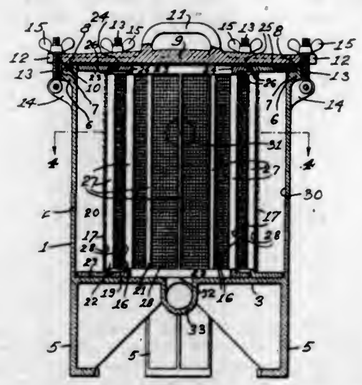
1,782,535. METHOD OF EDGE FINISHING FABRICATED ROOFING ELEMENTS. LESTER KIRSCHBRAUN, Leonia, N. J., assignor, by mesne assignments, to The Patent and Licensing Corporation, Boston, Mass., a Corporation of Massachusetts. Filed July 31, 1926. Serial No. 126,277. 7 Claims. (Cl. 91—68.)



7. A method of edge-finishing strip shingles, which comprises bundling a plurality of shingles together in face-to-face relation with edges flush and butt edges down, advancing said bundled shingles in an edgewise direction, applying molten asphalt to said butt edges, depositing the bundle on a moving body of loose grit, and tilting the shingles while moving in contact with the grit to separate their butt edges.

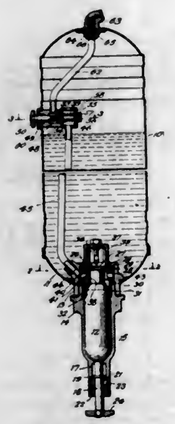
1,782,536. METHOD OF EDGE FINISHING FABRICATED ROOFING ELEMENTS. LESTER KIRSCHBRAUN, Leonia, N. J., assignor, by mesne assignments, to The Patent and Licensing Corporation, Boston, Mass., a Corporation of Massachusetts. Filed July 31, 1926. Serial No. 126,278. 9 Claims. (Cl. 91—68.)

2. A method of edge-coating fabricated roofing elements, which comprises assembling a plurality of said elements in face-to-face relation, applying to the butt edges an aqueous dispersion of heat-liquefiable waterproofing material containing a colloidal powder, and separating the edges of said elements before the emulsion thereon is set.



1,782,537. DIRECT CURRENT RAILWAY SYSTEM. ULRICH KLOSS, Berlin, Germany. Filed Apr. 5, 1929, Serial No. 352,771, and in Germany Feb. 15, 1929. 9 Claims. (Cl. 191—8.)

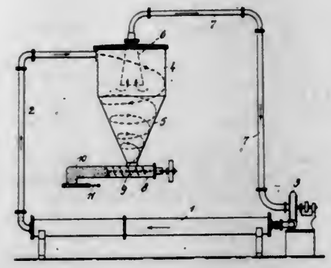
1. An apparatus for disconnecting the feed circuit of track zones of direct current railways from a moving train or block section at a distance, comprising an automatic switching device in said feed circuit, a control circuit reactively coupled to said feed circuit, a local circuit closed by said control circuit and electro-magnetically actuating said automatic switching device, and electronic tube means making and breaking the feed circuit thereby indirectly causing said automatic switching device to open.



1,782,538. STRAINER. DAVID LARKIN, Kirkwood, Mo. Filed May 27, 1929. Serial No. 366,431. 2 Claims. (Cl. 210—183.)

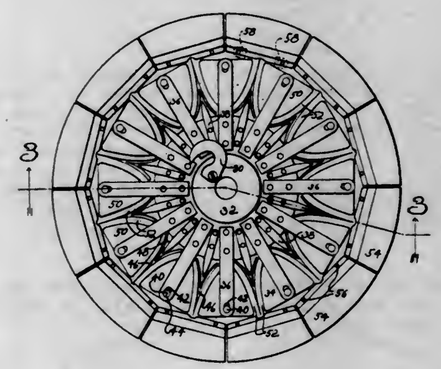
1. In a strainer, a straining unit comprising a pair of annular end plates of the same shape and dimensions, said plates having arcuate inner and outer edges, the plates having opposed shoulders at their inner faces, the inner edges of said shoulders being arcuate and flush with the inner edges of the plates, the outer edges of the shoulders being polygonal in plan, bars connected with the vertices of the shoulders and bridging the space between the plates

and straining material surrounding the series of bars and attached at its edges to the polygonal edges of the shoulders.



1,782,539. FIRE EXTINGUISHER. PETER GRAHAM MACGREGOR, Pequanock, N. J., assignor to Pyrene Manufacturing Company, Newark, N. J., a Corporation of Delaware. Filed Jan. 18, 1929. Serial No. 333,416. 9 Claims. (Cl. 169—31.)

1. A fire extinguisher comprising a liquid receptacle having an outlet, a seal normally closing said outlet, a sealed cartridge containing a compressed gas to be released and directed into said receptacle, a seal fracturing device in cooperative relation to said seal, and cartridge puncturing means separate from seal-fracturing means and rendered effective upon operation of said seal fracturing device to release the contents of said cartridge.

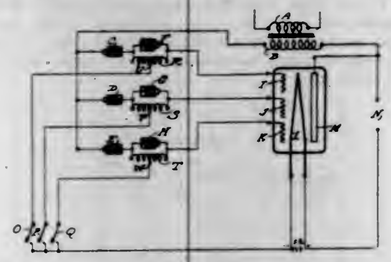


3. A fire extinguisher comprising a liquid receptacle having an outlet, a seal normally closing said outlet, a sealed cartridge containing a compressed gas to be released and directed into said receptacle, a seal fracturing device located on one side of said seal and in cooperative relation to said seal, and cartridge puncturing means located on the other side of said seal and rendered effective upon operation of said seal fracturing device to release the contents of said cartridge.

1,782,540. PROCESS OF AND SYSTEM FOR SPLITTING HYDROCARBONS SUCH AS ACETYLENE OR THE LIKE. JOSEF MACHTOLF, Celle, Germany, assignor to the Firm Chr. Hostmann-Steinberg'sche Farbenfabriken G. m. b. H., Celle, Germany. Filed Dec. 9, 1926, Serial No. 153,645, and in Germany Sept. 20, 1924 (abandoned); also in Germany Dec. 11, 1925. 5 Claims. (Cl. 134—60.)

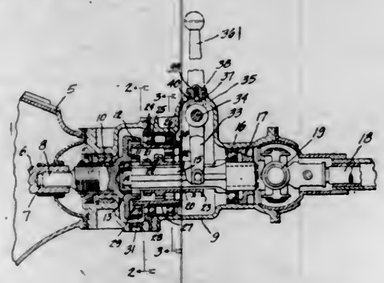
1. In the process of splitting hydrocarbons in receptacles, the step which consists in separating a portion of the split solid matter from the gaseous matter, and blowing said gaseous matter containing the remainder of the solid matter through the splitting receptacle.

1,782,541. METHOD OF STENCILING. HARRY SHERWOOD MCCLELLAN, Detroit, Mich., assignor to Chrysler Corporation, Detroit, Mich., a Corporation of Delaware. Filed Sept. 16, 1927. Serial No. 220,026. 13 Claims. (Cl. 101—126.)



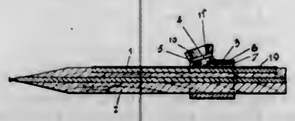
1. The method of striping spoked wheels which consists in applying a resilient stencil to the surface thereof, forcing the stencil against said surface to cause the edges of the openings in said stencil to slide on said surface, and spraying paint thru said openings.

1,782,542. ELECTRICAL TONE PRODUCER WITH UNIVERSAL AUDION. FRANK E. MILLER, New York, N. Y. Filed June 18, 1925. Serial No. 37,984. 7 Claims. (Cl. 84—1.)



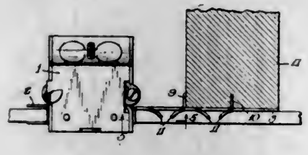
4. An electrical tone producer of the type described comprising an audion; said audion containing a predetermined number of grids, each grid connected to a separate circuit, means for automatically adjusting the im-

pedance of each of said circuits, said audion having a single plate, a source of electrical energy and means for



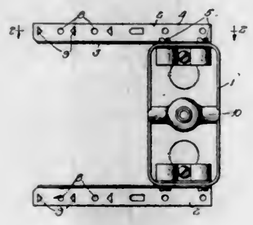
operating said automatic impedance adjuster to produce sounds of ascending or descending frequencies above, within and below the range of audibility.

1,782,543. POWER-TRANSMITTING MECHANISM. GUY MORGAN, New York, N. Y., assignor to The Warford Corporation, New York, N. Y., a Corporation of New York. Filed Oct. 19, 1925. Serial No. 63,531. 4 Claims. (Cl. 74—58.)



2. In combination, a casing having aligned end openings, shafts extended through said openings into the said casing, clutch members on the shafts for joining them, a portion of the casing between the ends thereof being eccentric of the said shafts, a plate secured at said eccentric portion, gears on said shafts and a member supported and positioned by said eccentric portion and said plate and having external and internal gearing adapted to operably connect the gears on said shafts.

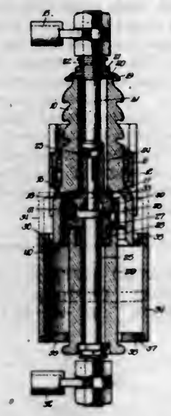
1,782,544. LIGHTER. HUBERT A. MYERS, Toledo, Ohio. Filed Apr. 17, 1929. Serial No. 355,723. 4 Claims. (Cl. 67—7.1.)



3. In a lighter, an elongated holder member, a pyrophoric strip, the pyrophoric strip being secured to one side of the holder member, the pyrophoric strip having a groove, a collar substantially fitting around the holder member and pyrophoric strip, a steel blade located within the collar, the steel blade having an end portion inclined toward the surface of the pyrophoric strip, the edge of the blade being located in the groove for maintaining the collar and strip in position as the collar and the stip are moved one relative to the other, the collar having a boss, the boss having a recess for receiving the article to be ignited and located at the end of the steel blade.

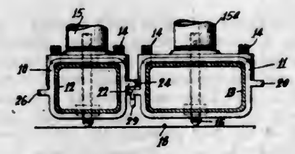
1,782,545. SWITCH BOX. CHARLES NEWMAN, New York, N. Y., and ERNST G. APPLETON, Chicago, Ill., assignors to Roach-Appleton Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed July 23, 1926. Serial No. 124,327. 6 Claims. (Cl. 247—21.)

1. A switch box including a receptacle, an attaching plate secured to said receptacle on a side thereof, said attaching plate having a pair of tines struck rearwardly from said plate, said tines being equi-spaced from said receptacle and adapted to serve alternatively as temporary attaching means or as gauges, and a second pair of tines struck rearwardly from said plate, said second pair of tines being equi-spaced from said receptacle.



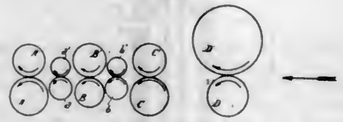
1,782,546. BOX-SUPPORTING EAR. CHARLES NEWMAN, New York, N. Y., and ERNST G. APPLETON, Chicago, Ill., assignors to Roach-Appleton Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 12, 1927. Serial No. 218,932. 5 Claims. (Cl. 247—21.)

1. In combination, a switch box and a pair of elongated ears, each comprising an integral member having two flanges in right-angular relationship with one another, said two flanges extending throughout substantially the whole length of said ear, one of said flanges comprising a box attaching portion, the other of said flanges having a portion struck therefrom and extending in a direction opposite to said one flange, said struck out portion being adapted to operate as a gauge against a wall stud, said other flange being provided with prongs struck therefrom in the same direction as said struck out portion, certain of said prongs being adapted to operate either as a securing means or as a gauge in connection with said wall stud.



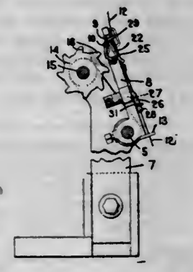
1,782,547. CONDUCTOR DISCONNECTER ARRANGEMENT. JOSEPH RAH, Chicago, Ill., assignor to G. & W. Electric Specialty Co., Chicago, Ill., a Corporation of Illinois. Filed May 20, 1925. Serial No. 31,539. 15 Claims. (Cl. 200—163.)

1. In a device of the class described, the combination of a plurality of electrical conductors adapted to be electrically connected and disconnected, two protecting members for covering said conductors when connected, and a



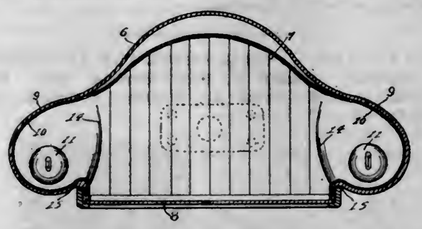
third protecting member associated with both of said conductors for covering at least one of said conductors when said conductors are disconnected.

1,782,548. DUCT-END OUTLET-ALIGNING MEANS. L. ALAN SHARP, Avalon, Pa., assignor to National Electric Products Corporation, New York, N. Y., a Corporation of Delaware. Filed May 14, 1929. Serial No. 362,906. 6 Claims. (Cl. 247—27.)



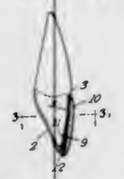
1. In an electrical conduit system having apertured fittings which are to be aligned and connected and interrelated to other apertured fittings, means integral with and upon the fittings to provide for a variable mating inter-relation of an adjacent pair of fittings with respect to each other, and means cooperating with the aforesaid mating means for connecting the adjacent fittings together.

1,782,549. DRAWING FRAME. EMILIO STANSFIELD, Bergamo, and EMILIO BRUNNER, Milan, Italy. Filed Feb. 19, 1929, Serial No. 341,198, and in Italy Mar. 1, 1928. 1 Claim. (Cl. 19—130.)



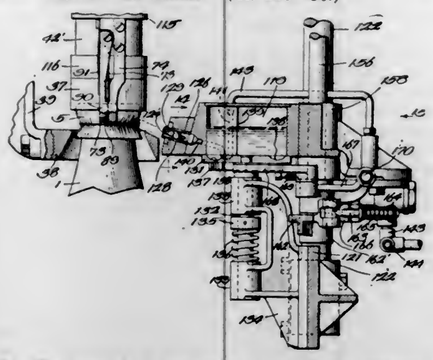
A cotton drawing machine comprising a pair of feeding rolls, a pair of drawing rolls spaced from said feeding rolls by a distance considerably greater than the fibre length of the cotton to be treated and having a peripheral speed slightly greater than said feeding rolls, other pairs of drawing rolls beyond said first pair of drawing rolls spaced from adjoining pairs of drawing rolls by distances slightly greater than the fibre length of the cotton to be treated, the peripheral speeds of said pairs of drawing rolls increasing progressively, and pairs of auxiliary rolls between the adjacent pairs of drawing rolls beyond the first pair of drawing rolls, the lower rolls of each of said pairs of auxiliary rolls being driven at the same peripheral speed as the preceding pair of drawing rolls, the upper rolls of each of said pairs of auxiliary rolls being held in position against the lower rolls by gravity only, said pairs of auxiliary rolls being closely adjacent to the succeeding pairs of drawing rolls.

1,782,550. STOP MOTION FOR KNITTING MACHINES. DANIEL F. SULLIVAN, Lowell, Mass., assignor of one-half to John P. Furey, Lowell, Mass. Filed July 13, 1929. Serial No. 377,999. 5 Claims. (Cl. 66—162.)



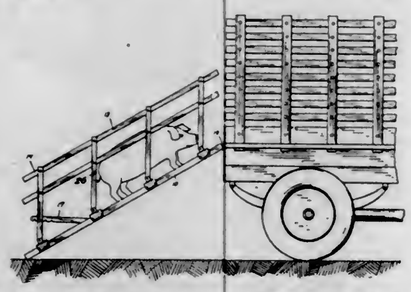
1. In a stop motion for knitting machines, the combination with a rock shaft adapted by its turning movement to operate a stopping mechanism, a slotted arm fast on the rock shaft, the yarn leading to the knitting point passing across said slot, a drop member pivoted to the arm and normally supported by the portion of the yarn spanning the slot, whereby when the yarn breaks or becomes unduly slack the drop member will gravitate through the slot into abnormal position, a constantly-rotating toothed wheel, the teeth of which move in a path traversed by the drop member when it gravitates into abnormal position, whereby engagement of the teeth with the drop member will swing the arm forwardly and turn the rock shaft thereby to operate the stopping mechanism, and means to apply a clamping action to the thread between the drop member and the source of supply when said drop member begins to gravitate into abnormal position.

1,782,551. AUTOMOBILE LAMP. JAMES A. SULLIVAN, Jersey City, N. J. Filed Nov. 26, 1928. Serial No. 321,978. 1 Claim. (Cl. 240—41.)



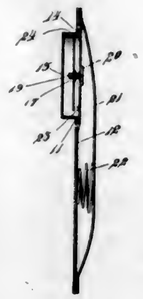
In combination with an automobile head lamp including a casing, reflector and lens, an offset lamp house forming a continuation of said casing, a reflector lining the inside of said lamp house, said lamp house and casing having a substantially triangular opening between the same with a substantially vertical front wall and with upper and lower walls rearwardly converging and meeting at a central apex in the rear portion of the opening, said front wall in combination with the front part of the casing providing a light abutment, and a source of illumination offset forwardly and outwardly from the central portion of the lamp house behind said abutment.

1,782,552. PORCELAIN-FACED CROWN. SAMUEL G. SUPPLEE, West Orange, N. J. Filed Oct. 20, 1928. Serial No. 313,668. 2 Claims. (Cl. 32—29.)



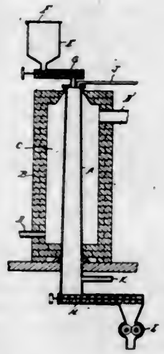
1. A tooth crown comprising a metal crown body shaped to substantially fit on the rear and side walls of the prepared exposed end of a tooth the side and rear walls of the crown being of substantially the same thickness, a front wall of thinner metal secured at its edges to the edges of the side walls, a porcelain facing, a backing plate secured to the rear side of said facing, and a layer of solder between the relatively thin front wall of the crown and the rear wall of said backing plate.

1,782,553. MACHINE AND METHOD FOR APPLYING CLOSURES. OLOF N. TEVANDER, Chicago, Ill., assignor to Standard Cap & Seal Corporation, Chicago, Ill., a Corporation of Virginia. Filed July 21, 1926. Serial No. 123,938. 12 Claims. (Cl. 226—80.)



11. The method of sealing a bottle which consists in placing a skirted cap over the mouth of the bottle, contracting a strand about the cap skirt, connecting the ends of the strand by applying a patch of cementitious material thereupon, and applying a second patch of cementitious material upon the first patch applied after the latter has "set" or hardened.

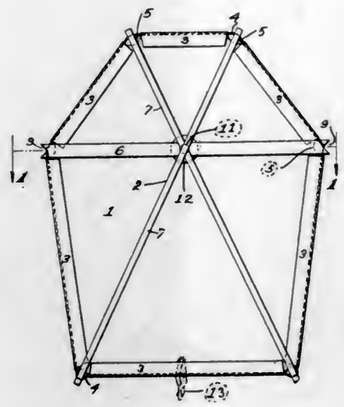
1,782,554. ANIMAL CHUTE FOR AUTOMOBILE TRUCKS. HAROLD W. TOOL, Murdock, Nebr. Filed July 5, 1929. Serial No. 375,994. 2 Claims. (Cl. 119—82.)



1. In combination, an animal chute comprising a floor and a pair of collapsible side walls foldable into parallelism with said floor, said floor having a rectangular frame of a pair each of end and side rails, each of said side rails having a releasable brace pivotally secured to the inner side thereof, pins projecting from said side walls into the paths of said braces, said braces being each provided with a plurality of notches for engaging said pins for holding said side walls rigidly in upright and adjusted position, stop hinges connecting the walls to the floor and limiting the outward movement of the side walls away from each other, said hinges also having pintles positioned transversely of said chute and engaging the side walls to admit endwise movement of said side walls, and a second set of braces at the inner sides of the side walls and engaging the floor of the chute for preventing the side walls from collapsing.

1,782,555. ANIMATED DEVICE. ALFRED WEINSTEIN, Hamburg, Germany. Filed Apr. 23, 1929. Serial No. 357,509. 3 Claims. (Cl. 46—37.)

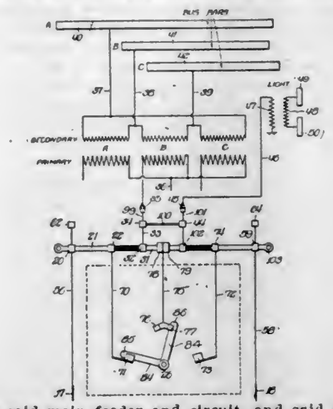
2. In an animated device, a plate bearing a representation thereon, a pivot pin fixed on said plate, a member rotatably mounted on said pin and having vanes, a nozzle opening in said plate adjacent said vanes, a transparent cup secured to said plate and covering said member and the nozzle and having an opening, a second plate secured at its edges to the first plate at the rear thereof, and a resilient member normally displacing said second plate from said first plate.



1,782,556. COKE AND PROCESS OF PRODUCING THE SAME. ALFRED H. WHITE, Ann Arbor, Mich., assignor to The Regents of The University of Michigan, a Corporation of Michigan. Filed Oct. 26, 1925. Serial No. 64,935. 11 Claims. (Cl. 202—8.)

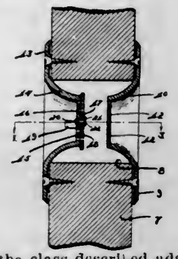
1. The process of producing coke which comprises showering particles of finely crushed solid carbonizable material through a retort whose walls are heated to a temperature substantially above 700° C. while maintaining said particles out of contact with an appreciable amount of air thereby subjecting the particles to destructive distillation so as to completely carbonize the finest particles and leave the larger particles partially carbonized, and removing the solid residue from said retort while it is in a finely divided state and still contains a substantial amount of volatile matter.

8. A new product of manufacture comprising finely divided particles of puffed, porous coke containing a substantial amount of volatile matter and made by showering particles of finely crushed solid carbonizable material through a retort whose walls are heated to a temperature substantially above 700° C. while maintaining said particles out of contact with an appreciable amount of air thereby subjecting the particles to a destructive distillation so as to completely carbonize the finest particles and leave the larger particles partially carbonized and removing the solid residue from said retort while it is in a finely divided state and still contains a substantial amount of volatile matter.



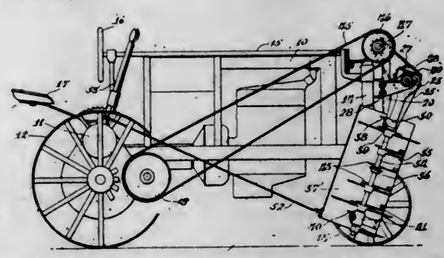
1,782,557. KITE. EDWARD B. WILDER, St. Louis, Mo. Filed Nov. 5, 1927. Serial No. 231,282. 6 Claims. (Cl. 244—22.)

1. A kite comprising a sail sheet and a frame consisting of crossed struts of which one is more flexible transversely of the kite than the others, and said sail sheet being attached to the ends of all of the struts.



1,782,558. SYSTEM OF ELECTRICAL DISTRIBUTION AND CONTROL MEANS THEREFOR. PAUL F. WILLIAMS, Chicago, Ill., assignor to G. & W. Electric Specialty Co., Chicago, Ill., a Corporation of Illinois. Filed Feb. 26, 1925. Serial No. 11,717. 10 Claims. (Cl. 171—97.)

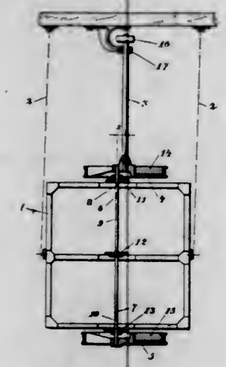
10. In a system of electrical distribution, the combination of a main feeder, an auxiliary feeder and a service circuit, and a self-contained unit connected to said main feeder, auxiliary feeder and service circuit and having means thereon interposed between said main and auxiliary feeders and said service circuit to selectively control connection between said main feeder and service circuit, and said auxiliary feeder and service circuit, said means including a member operable to selectively connect said main feeder and circuit, and said auxiliary feeder and circuit, means for rendering said member operative, and means for selectively effecting independent connections



between said main feeder and circuit, and said auxiliary feeder and circuit upon said last named means being rendered inoperative.

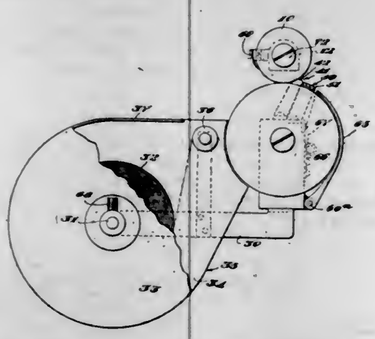
1,782,559. MOUTHPIECE. JAMES P. WOODSIDE, Detroit, Mich. Filed Aug. 27, 1927. Serial No. 215,817. 3 Claims. (Cl. 181—22.)

1. A device of the class described adapted for use with a supporting structure having an opening formed therein, comprising: a cup-shaped member mounted on one side of said supporting structure and positioned in said opening and provided with a plurality of openings in its base; a cup-shaped member mounted on the opposite side of said supporting structure and positioned in said opening and provided with a plurality of openings in its base, said bases being faced toward each other, disconnected from each other and in spaced relation, and the openings thereof being in alignment; and means for closing the openings in one of said bases.



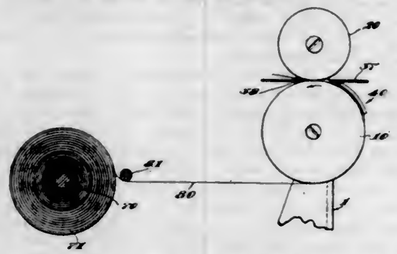
1,782,560. TRACTOR STALK CHOPPER. BERT R. BENJAMIN, Oak Park, Ill., assignor to International Harvester Company, a Corporation of New Jersey. Filed Mar. 1, 1929. Serial No. 343,578. 8 Claims. (Cl. 56—60.)

8. A stalk chopping attachment for tractors comprising upright supporting means adapted to be secured to the



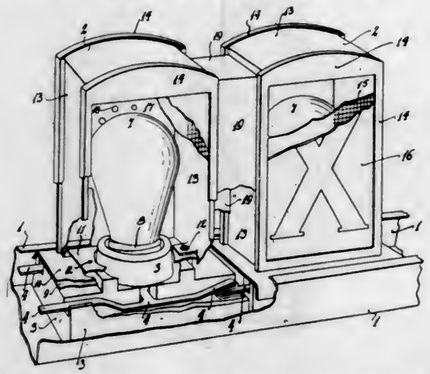
front end of a tractor, a supporting shaft having its central portion journaled on said supports and its ends extending from either side thereof, a housing pivotally mounted on each end of the supporting shaft and formed with a depending bearing sleeve, a depending cutter, shaft journaled in each sleeve, gearing within the housings connecting the supporting shaft and the cutter shafts, and means on the upright supporting means for driving the supporting shaft by power derived from the tractor.

1,782,561. SELF-BALANCING PLANSIFTER. FRANK BOLDIZSÁR, Rakospalota, Hungary. Filed Sept. 4, 1929, Serial No. 390,255, and in Hungary Jan. 14, 1929. 6 Claims. (Cl. 209—366.)



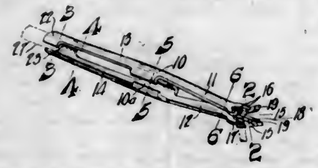
1. Arrangement for self balancing plansifters comprising a sieve case, a three part linked shaft passing through said case, self adjusting bearings mounted in said case and carrying said shaft, arms rigidly connected with the ends of said shaft, balance masses arranged on said arms and a rigid driving shaft connected with one of said arms.

1,782,562. TAPE-APPLYING MACHINE. LELAND K. BUTLER, Manchester, N. H., assignor, by mesne assignments, to Excel Taping Machine Co., Lynn, Mass., a Corporation of Massachusetts. Filed Apr. 5, 1928. Serial No. 267,714. 14 Claims. (Cl. 154—42.)



13. A machine of the class described comprising a pair of juxtaposed rolls, means for driving the rolls, a tape supplying means arranged to supply tape to a peripheral portion of one of said rolls which is disposed substantially 270° in a direction counter to that of the movement of that roll from the bite of the juxtaposed rolls, whereby the tape run may be in engagement with a considerable peripheral portion of said roll.

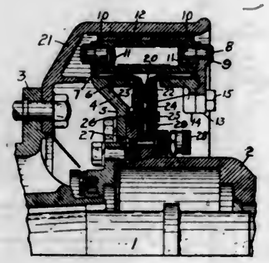
1,782,563. TAPE-APPLYING MACHINE. JEROME P. BYRON, Lynn, Mass., assignor, by mesne assignments, to Excel Taping Machine Co., Lynn, Mass., a Corporation of Massachusetts. Filed Aug. 31, 1927. Serial No. 216,702. 13 Claims. (Cl. 154—42.)



9. In a machine of the class described, a pair of juxtaposed rolls, a tape support positioned to supply a run of tape to a peripheral portion of one of said rolls that is remote from the bite of the rolls, means to receive the tape from said peripheral portion of the roll and to hold the tape run out of contact with a peripheral portion of that roll between the first-named portion and the portion which is juxtaposed to the other roll, whereby tape may be fed between the rolls substantially free from tension.

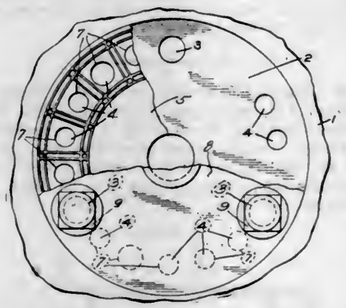
1,782,564. ELECTRIC SIGN. JOSEPH F. COUFAL and HARRY A. SMITH, New York, N. Y. Filed May 21, 1927. Serial No. 193,214. 4 Claims. (Cl. 40—130.)

1. In combination in a sign unit, an insulated base, a plurality of conducting members positioned therein, inwardly extending projections on said members co-acting to make contact with the terminals of an electric light bulb, and a container surrounding the bulb and having a replaceable sign element, the contact elements projecting from one end of the base, and recessed into its other end, and adapted to form electrical contact with adjoining units by their mere juxta-positioning.



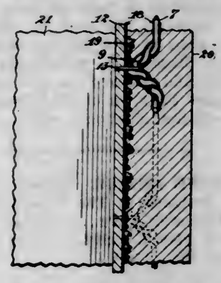
1,782,565. SCREW HOLDER. FRANK DOHNAL, Euclid, Ohio. Filed July 25, 1928. Serial No. 295,135. 7 Claims. (Cl. 145—52.)

1. A screw holder including means adapted to automatically hold the holder onto a screw driver and two



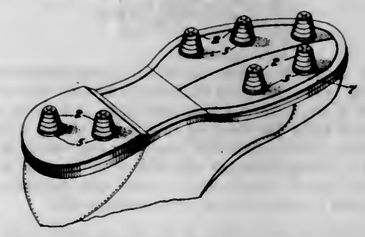
resilient prongs normally contracted at the outer end thereof, each of said prongs having a slot in the outer end thereof longitudinally of the prong for insertion of the head of a screw sidewise in between said prongs and longitudinally of the prongs and to form jaws on the ends of said prongs; each of said jaws having a notch therein to engage the head of the screw when the screw is swiveled from the sidewise inserted position thereof into an aligning position with the holder.

1,782,566. AUTOMOTIVE BRAKE. SIDNEY G. DOWN, Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Mar. 12, 1927. Serial No. 174,929. 14 Claims. (Cl. 188—152.)



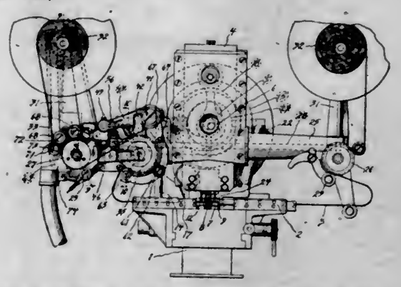
1. In an automotive vehicle brake, the combination with a brake drum therefor, of a support for a portion of said brake, brake shoes mounted on said support and movable into and out of engagement with said drum, and means removable from said support for rendering said shoes removable from said support without removing said brake drum.

1,782,567. GASKET. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed July 7, 1925. Serial No. 42,011. 2 Claims. (Cl. 303—1.)



1. The combination with a member having a gasket face provided with openings having their centers on the same circle, some of the openings being symmetrically disposed bolt openings and the other openings being unsymmetrically disposed fluid pressure openings, and a cover plate of a gasket interposed between said member and said plate and having symmetrically disposed bolt openings adapted to register with the bolt openings in the gasket face and symmetrically disposed openings, some of which will register with the unsymmetrically disposed fluid pressure openings in the gasket face, whenever the bolt openings in the gasket register with the bolt openings in said member.

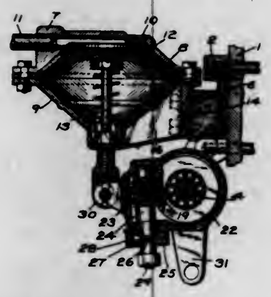
1,782,568. LATH. WILLIAM D. HICKS, Inglewood, Calif., assignor, by mesne assignments, to Master Wire Lath Company, Los Angeles, Calif., a Corporation of California. Filed July 14, 1923, Serial No. 651,673. Renewed June 8, 1928. 10 Claims. (Cl. 72—120.)



8. A latch comprising a wire netting of open mesh having projecting loop portions spaced longitudinally and transversely from each other extending from one side thereof, a fibrous backing sheet in contact with said projecting loop portions, and means for fastening said backing sheet and netting together at said points of contact.

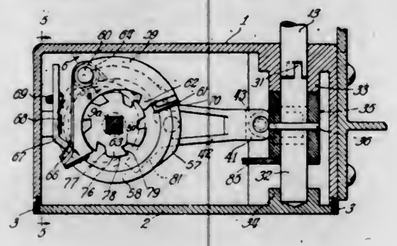
1,782,569. ATHLETIC SHOE AND CLEAT THEREFOR. EMORY GUY HOWARD, Dudley, Mass., assignor to Koehler Manufacturing Company, Marlboro, Mass., a Corporation of Massachusetts. Filed Mar. 1, 1929. Serial No. 343,688. 2 Claims. (Cl. 36—59.)

1. A detachable football cleat comprising a tapered cleat body of approximately circular sectional form and composed essentially of superposed lifts of leather, a circular metal disk on which said body is mounted, said disk having a screw threaded edge and metal fastening means extending through said disk and body from one end of the body to the other and securing said body rigidly to said disk.



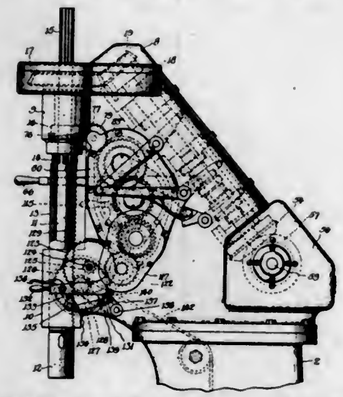
1,782,570. STRIP-PERFORATING MACHINE. ALBERT S. HOWELL, Chicago, Ill., assignor to The Bell & Howell Company, Chicago, Ill., a Corporation of Illinois. Filed July 6, 1927. Serial No. 203,789. 6 Claims. (Cl. 164—65.)

1. In a machine of the character described the combination with a revoluble roller, of spaced circumferential



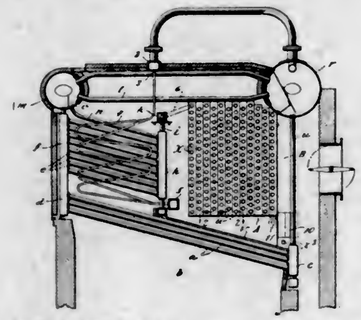
flanges on said roller, resilient means yieldably urging one of said flanges toward the other flange, a revoluble slitting wheel disposed on an axis parallel to that of the roller and adapted for slitting a strip on the roller between said flanges, a driven revoluble sprocket engageable with perforations in both sections of the strip for longitudinally drawing the strip on the roller for the slitting of the strip by said slitting wheel, and a second revoluble roller disposed in parallelism with said first mentioned roller and spaced from said slitting wheel and adapted to engage the strip on said first mentioned roller as it feeds to said first mentioned roller.

1,782,571. BRAKE DEVICE. HENRY D. HUKILL, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed May 9, 1927. Serial No. 189,752. 4 Claims. (Cl. 188—152.)



1. In a motor vehicle brake, the combination with a rotatable brake applying shaft, of a bracket for supporting said shaft, a worm wheel secured to said shaft, collars projecting from the sides of said worm wheel, a member mounted on said collars and enclosing said worm wheel, a rotatable worm mounted in said member and meshing with said worm wheel, and a lever arm through which said member is operated to rotate said shaft.

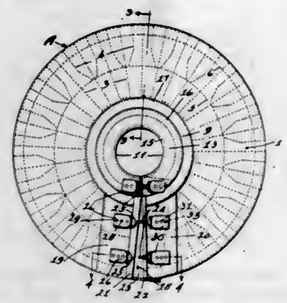
1,782,572. CLUTCH. RUDOLPH W. JANDA, Berwyn, Ill., assignor to Conlon Corporation, Cicero, Ill., a Corporation of Illinois. Filed June 25, 1928. Serial No. 288,154. 8 Claims. (Cl. 192—28.)



1. In combination, a driving shaft, a clutch member mounted on the shaft for rotation therewith and having outwardly projecting teeth, an eccentric mounted about the shaft and normally free therefrom, an operating arm having a strap fitting about the eccentric, mechanisms connected to said arm and reacting thereon in the direction of movement of the arm in the operation thereof, a pawl rockably mounted on the eccentric and having a clutch tooth adapted for cooperation with the teeth of said clutch member, yielding means urging the pawl into operative relation to the clutch member, and means for moving the pawl into inoperative position and holding it in such position, the following faces of the teeth of the clutch member being inclined outwardly thereof toward the tooth of the pawl and acting to prevent disengagement therefrom of the pawl tooth by the reaction pressure exerted on the arm when said eccentric is moved beyond dead center relative to said arm.

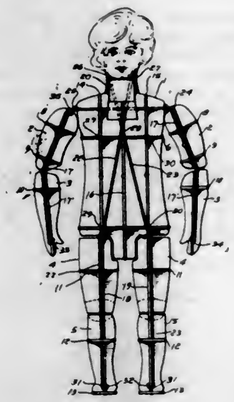
1,782,573. MACHINE TOOL. ALBERT M. JOHNSON, Rockford, Ill., assignor to Barnes Drill Company, Rockford, Ill., a Corporation of Illinois. Filed July 23, 1927. Serial No. 207,862. 6 Claims. (Cl. 77—5.)

1. In a machine tool, the combination of a closed casing substantially in the form of a right isosceles triangle positioned with one of its sides vertical, a pair of spindle bearings positioned one at the upper and lower extremities respectively of said side, a spindle in said bearings, change-speed mechanism geared to said spindle, said mechanism including a pair of shafts mounted in said casing in horizontally spaced relation and substantially parallel to the sloping upper side wall of said casing so as to provide a relatively large space between said shafts and the vertical forward wall of said casing, and gear mechanism operable to feed said spindle including feed-change gearing providing a plurality of feeding speeds, said gear mechanism being positioned as a removable unit within said casing between said change-speed mechanism and said vertical forward wall.



1,782,574. HEAT-TRANSFER DEVICE. EDWIN WALTER JONES, Lincoln, England, assignor to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Original application filed Nov. 13, 1924, Serial No. 749,578, and in Great Britain Nov. 23, 1923. Divided and this application filed Oct. 28, 1927. Serial No. 229,448. 5 Claims. (Cl. 257—248.)

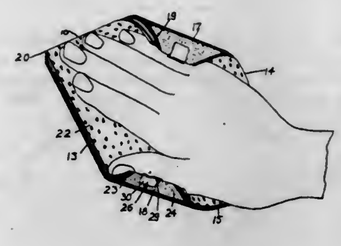
1. A heat transfer device comprising two sets of headers connected by tubes, the headers of each set being



arranged side by side, the headers at one end of said device being substantially rectangular in cross section, and the headers at the opposite end of said device being generally L shaped in cross section and arranged back to back thereby forming inwardly opening pockets, said pockets being of sufficient width to receive the ends of said tubes.

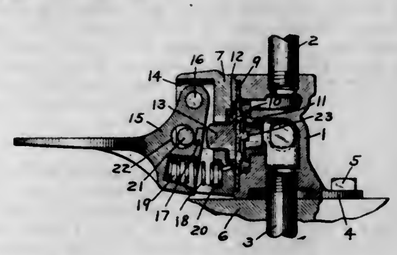
1,782,575. EXTRACTOR COVER. JOHN P. LYNCH, Los Angeles, Calif. Filed Feb. 4, 1929. Serial No. 337,402. 12 Claims. (Cl. 210—63.)

1. A device of the character described comprising a flexible fabric cover of circular form and having a radial split and a central opening therein, means for reinforcing the margin of the cover at said opening, and means for detachably connecting the edges of the cover adjacent said split.



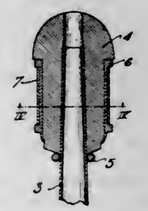
1,782,576. CONSTRUCTION OF SMALL ORNAMENTAL FIGURES OR DOLLS. CORÂNNE MACGREGOR, Cleveland Heights, Ohio. Filed July 13, 1929. Serial No. 378,075. 4 Claims. (Cl. 46—40.)

1. An ornamental figure comprising an internal frame consisting of pieces crossed to form spaces therebtween, pads in said spaces between the pieces, said pads cooperating with the periphery of said pieces to define the shape of said figure, and an extenal covering applied thereto.



1,782,577. HAND SANDPAPER HOLDER. RALPH W. MARIS, Long Beach, Calif. Filed Aug. 8, 1928. Serial No. 298,175. 10 Claims. (Cl. 51—187.)

1. A sand paper holder having a flat metal plate with the opposite marginal edges having an upward and an inward curl, sand paper fitted over the bottom of the plate and over the curled marginal edges, said paper being



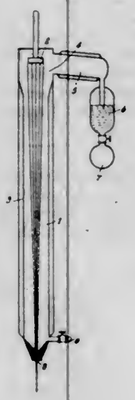
turned under the opposite edges of the curl of the plate and clamps fitting in the curled portion of the plate and over the marginal edges of the paper.

1,782,578. FOOT-VALVE DEVICE. JOSEPH C. MCCUNE, Edgewood, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Feb. 11, 1929. Serial No. 339,054. 4 Claims. (Cl. 251—24.)

3. A foot valve device for a safety car control equipment having a control pipe comprising a casing interposed between sections of said pipe, a member having a cavity, a diaphragm valve mounted between said member and casing for controlling communication through said pipe, a stem engaging said valve, a pedal pivotally mounted in said cavity for operating said stem, and a spring disposed in said cavity and interposed between said pedal and said member for urging said pedal away from said stem.

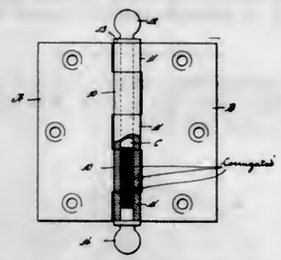
1,782,579. ATTACHMENT FOR OIL CANS. EMMET H. MORROW, Chicago, Ill., assignor to Automatic Oilingseal Corporation, a Corporation of Illinois. Filed May 3, 1928. Serial No. 274,700. 3 Claims. (Cl. 221—56.)

1. An oil can attachment comprising a resilient sleeve having a hemispherical outer end, a metallic band there-



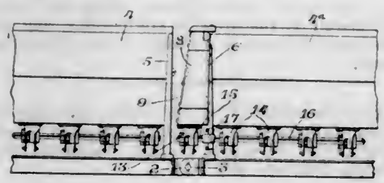
around to prevent spreading of said attachment, said sleeve being adapted to engage the spout of an oil can with the hemispherical end projecting beyond the tip of said spout.

1,782,580. VALVE FOR PNEUMATIC TIRES OR THE LIKE. EUGENE V. MYERS, East Orange, N. J., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y., a Corporation of New York. Filed Apr. 7, 1923. Serial No. 630,480. 10 Claims. (Cl. 152—12.)



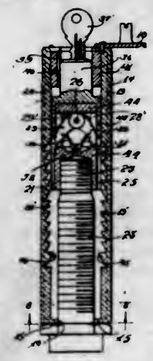
1. A valve for tires or the like, comprising a casing having an integral seat, a check adapted to be passed through the top of said valve to a point below said seat, means for preventing blowing out of said check, and a shoulder below said seat past which said check may be forced to a non-working position with relation to said seat.

1,782,581. APPARATUS FOR THE MANUFACTURE OF ARTIFICIAL SILK. HENRI FRANÇOIS NIOGRET, Lyon, France, assignor, by mesne assignments, to Du Pont Rayon Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 14, 1928, Serial No. 270,104, and in France Apr. 14, 1927. 2 Claims. (Cl. 18—8.)



1. An apparatus for the manufacture of artificial filaments by dry spinning of solutions of cellulose derivatives in volatile solvents comprising a closed cell, means for heating said cell, a condenser directly connected to the cell by a single large aperture, and means for cooling said condenser.

1,782,582. HINGE. HORACE H. RAYMOND, Berlin, Conn., assignor to The Stanley Works, New Britain, Conn., a Corporation of Connecticut. Filed May 5, 1928. Serial No. 275,376. 3 Claims. (Cl. 16—169.)

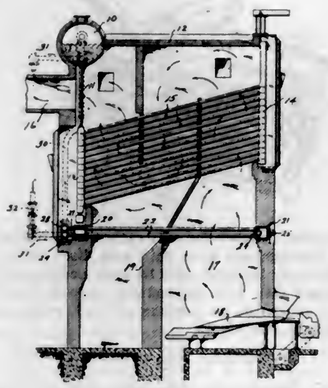


1. A hinge having a pair of leaves with interfitting knuckles, a removable pin engaging in said knuckles, and complementary corrugations on the pin and a knuckle, the greatest diameter of the corrugations of said pin being less than the smallest internal diameter of the complementary corrugations on said knuckle.

1,782,583. GRAIN DRILL. CHARLES W. ROBINSON, Hamilton, Ontario, Canada, assignor, by mesne assignments, to International Harvester Company, Chicago, Ill., a Corporation of New Jersey. Filed July 8, 1929. Serial No. 376,638. 5 Claims. (Cl. 111—53.)

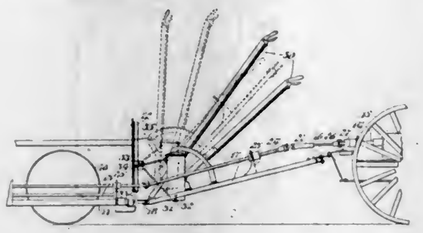
1. An extension drill adapted to fill in between the ends of two grain drills pivotally joined end to end to form a duplex drill which comprises a feed box positioned between the adjacent ends of said drills and secured to the end of one drill, a seed cup attached to the feed box, and means for operating said seed cup.

1,782,584. TIRE-VALVE DUST CAP AND LOCKING MECHANISM THEREFOR. JOHN T. RYAN, Detroit, Mich. Filed Dec. 27, 1926. Serial No. 157,116. 6 Claims. (Cl. 152—12.)



1. A device of the class described adapted for mounting on a tire valve stem, comprising: a head for threading

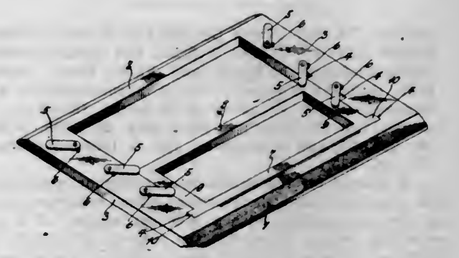
CARNEGIE LIBRARY OF ATLANTA



on said stem; a casing movable axially of said head for covering said stem after the threading of said head thereon; locking means for preventing the movement of said casing in the opposite direction; and means for releasing said locking means.

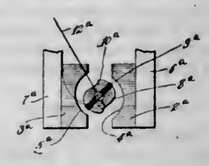
1,782,585. SUPERHEATER. CHARLES ULYSSE SAVOYE, Hackensack, N. J., assignor to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Nov. 4, 1924. Serial No. 747,708. 10 Claims. (Cl. 122—481.)

3. A steam boiler, a furnace therefor, a superheater having a portion thereof located in proximity to said furnace and having its tubes directly exposed to the radiant heat of the furnace and a water-cooled core in each of said tubes.



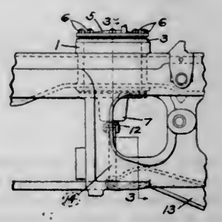
1,782,586. BINDER HITCH. DANIEL W. SMITH, Oak Park, and WILLIAM WEBBER, La Grange, Ill., assignors to International Harvester Company, a Corporation of New Jersey. Filed May 18, 1927. Serial No. 192,193. 9 Claims. (Cl. 56—22.)

1. The combination with a binder having a main frame, of a hitch therefor, said hitch comprising a draw frame pivotally connected to the binder main frame on horizontal pivots and adapted for detachable connection on a vertical pivot to the drawbar of a tractor, and a twine can pivotally connected to and carried by the draw frame.



1,782,587. PRINTER'S CHASE FOR CHECKS AND THE LIKE. EDWARD H. STADLER, St. Louis, and GEORGE E. DILLINGHAM, Richmond Heights, Mo. Filed Feb. 27, 1929. Serial No. 343,068. 2 Claims. (Cl. 101—394.)

1. A printer's chase comprising a main frame having notches in the inner edges of its ends, a secondary frame arranged to be supported in different adjusted positions in the main frame, projections from the ends of the secondary frame arranged to seat in said notches respectively and to support said secondary frame in different



adjusted positions in the main frame, and pivoted holders on the main frame movable to position to overlap adjacent portions of the secondary frame.

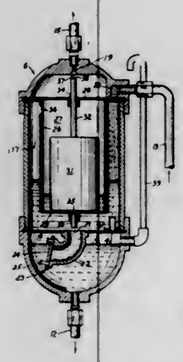
1,782,588. ELECTRICAL MEASURING INSTRUMENT. FREDERICK EMMONS TERMAN, Stanford University, Calif. Filed Feb. 13, 1928. Serial No. 253,952. 3 Claims. (Cl. 171—95.)

1. A galvanometer comprising, pole pieces, a rotor coil mounted to rotate between the pole pieces and carrying a needle, said pole pieces being shaped to effect a change in the magnetic flux passing through the rotor coil as the same rotates from the position of zero deflection to full deflection whereby the deflection of the needle increases in proportion to the square root of the current applied to the galvanometer.

1,782,589. BRAKE CYLINDER. HENRY A. WAHLERT, St. Louis, Mo., assignor to The American Brake Company, St. Louis, Mo., a Corporation of Missouri. Filed Sept. 3, 1929. Serial No. 389,915. 4 Claims. (Cl. 105—230.)

1. The combination with a vehicle frame having an opening therein, of a brake cylinder device comprising a

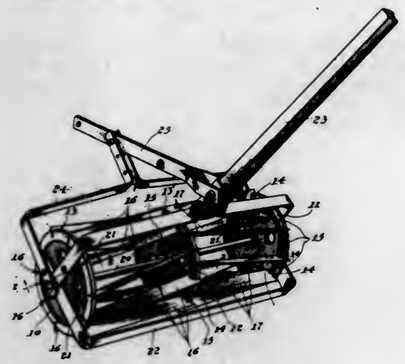
cylindrical portion insertable in said opening, a flange on said cylindrical portion in supporting engagement with said frame, a pressure head clamped against said flange, and a non-pressure head clamped against said cylindrical portion.



1,782,590. ELIMINATION OF SULPHUR COMPOUNDS FROM GASES. GUSTAV WIETZEL and JOSEF JANNEK, Ludwigshafen-on-the-Rhine, and FRITZ FRIED, Mannheim, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Mar. 29, 1928, Serial No. 265,811, and in Germany Apr. 8, 1927. 7 Claims. (Cl. 23—225.)

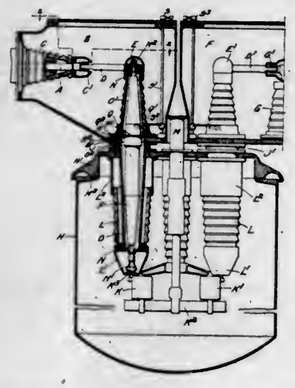
1. A process for the elimination of sulphur compounds from gases by a catalytic treatment, which comprises passing the gas, together with a sufficient amount of a gas containing oxygen to oxidize the sulphur compounds to oxygen compounds of sulphur, over an active catalyst comprising a metal other than an alkali metal and a metalloid from groups 5 and 6 of the periodic system other than oxygen at an elevated temperature and combining the sulphur oxids with the requisite amount of ammonia to form the corresponding ammonium salt and separating the latter.

1,782,591. MANUFACTURE OF ALKYL FORMATES. RUDOLF WIETZEL, Ludwigshafen-on-the-Rhine, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Feb. 9, 1926, Serial No. 87,170, and in Germany Feb. 13, 1925. 4 Claims. (Cl. 260—106.)



1. The process of manufacturing alkyl formates which comprises acting on a liquid aliphatic alcohol with a gas comprising carbon monoxid and a substantial amount of an inert gas selected from the group consisting of hydrogen and nitrogen.

1,782,592. FUEL-FEEDING DEVICE. DWEN R. YOUNGER, Woodland, Calif., assignor of one-half to Earl L. Younger, Woodland, Calif. Filed Mar. 10, 1928. Serial No. 260,556. 5 Claims. (Cl. 103—236.)

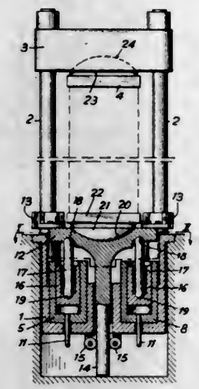


1. In a fuel feeding system, a tank providing a vacuum chamber having a one-way pressure controlled discharge valve therefor, means for producing a partial vacuum in said chamber for drawing liquid thereinto from an external source, means periodically operative to render said vacuum producing means inoperative with respect to said chamber, and means providing for a restricted and constant communication of said chamber with the atmosphere through the liquid in said chamber.

1,782,593. CULTIVATOR. JOHN F. ZEILINGER, David City, Nebr., assignor to The Barker Manufacturing Company Inc., David City, Nebr., a Corporation of Nebraska. Filed Mar. 20, 1929. Serial No. 348,377. 3 Claims. (Cl. 97—52.)

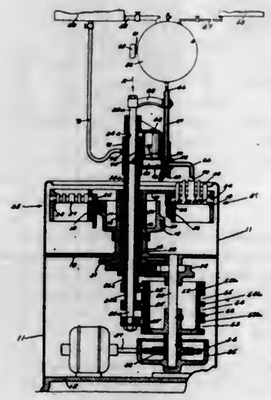
1. A rotary member for cultivators comprising end discs and an intermediate disc, said end discs being provided with oppositely inclined slots in their peripheries and said intermediate disc with alternating oppositely inclined cooperating slots in its periphery; and cultivator blades positioned in said slots.

1,782,594. ELECTRIC SWITCH GEAR. ARCHIBALD ALLAN, Tynemouth, England assignor to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England, a Company of Great Britain. Filed Jan. 10, 1930, Serial No. 419,984, and in Great Britain Feb. 11, 1929. 9 Claims. (Cl. 200—150.)



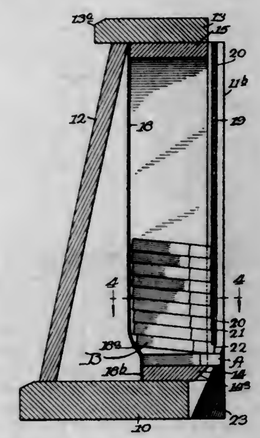
1. Oil-immersing electric switch gear including in combination, a main oil tank, a cover for the tank, a circuit-breaker in the tank, at least one terminal passing through the cover and leading to the circuit-breaker, an isolating switch mounted on the end of the terminal outside the tank, and means for rotating at least a part of the terminal so as to operate the isolating switch.

1,782,595. HYDRAULIC PRESS PARTICULARLY FOR TESTING MATERIALS. ALFRED J. AMSLER, Schaffhausen, Switzerland. Filed July 5, 1929, Serial No. 376,234, and in Germany May 14, 1929. 3 Claims. (Cl. 138—17.)



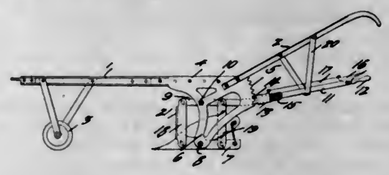
1. In a hydraulic press, particularly for testing the strength of materials and in which the liquid pressure

serves for measuring the load exerted, in combination, a plurality of presspots arranged around the central axis of the press in such a manner as to cooperate in groups each group exerting a resultant force which acts in the central axis, each presspot consisting of a cylinder and a ram, a frame, a table movable along said frame and adapted to



bear against the specimen to be pressed, and a stud interposed between every ram and said table and provided with spherical surfaces cooperating with similar shaped surfaces provided on the ram and on said table to prevent eccentric pressure on said table being transmitted to said rams.

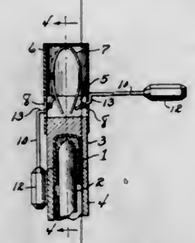
1,782,596. AUTOMATIC FOOD-UNIT-FILLING MACHINE. HARVEY A. BEILGARD, Hollywood, Calif. Filed June 1, 1926. Serial No. 112,858. 40 Claims. (Cl. 107—28.)



1. An organization for the production of edible units comprising: a filling nozzle; means for holding a pastry shell, or the like, relatively to said nozzle; means producing relative movements of insertion and withdrawal between said nozzle and said shells; and means for ejecting a filling material, through said nozzle, during a withdrawal movement thereof, said nozzle being provided with a cutting edge, and said holding means being movable between an open position and a closed position and so shaped as to permit said relative movement of insertion and withdrawal while closed.

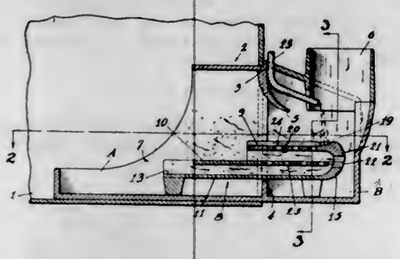
1,782,597. DISPENSING CABINET. HORACE L. BLACKMAN, Janesville, Wis., assignor to The Parker Pen Company, Janesville, Wis., a Corporation of Wisconsin. Filed May 24, 1928. Serial No. 280,141. 15 Claims. (Cl. 312—42.)

1. In a dispensing cabinet, means for forming a plurality of vertical compartments each adapted to receive articles stacked upon each other, said compartments having horizontally discharging openings in their bottoms, each of said openings permitting the delivery of one article only, and means for feeding said articles toward said openings and projecting them in part therethrough where they may be readily grasped for removal comprising a back wall having an upper vertical surface terminating in a forwardly and downwardly sloping wall surface which joins a forwardly offset vertical wall surface leading to said bottom whereby, as the lowermost articles are removed, the upper articles are fed downwardly and then projected forwardly in part through said openings and are finally dropped upon said bottom in a position offset forwardly of the articles above.



1,782,598. PLOW. CÉSAR BORDAS DE LA FÉ, Habana, Cuba. Filed Oct. 8, 1929. Serial No. 398,206. 6 Claims. (Cl. 97—110.)

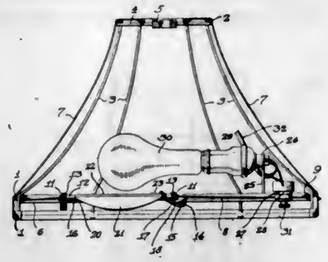
1. A plow including a beam, a frame secured thereto, a plowshare and moldboard unit pivotally mounted on the frame, a manually operable lever pivotally mounted on the frame, and links connecting the lever and said units on opposite sides of the respective pivots, the forward link being sharpened to form a cutting edge.



2. A plow including a beam, a frame secured thereto, a plowshare and moldboard unit pivotally mounted on the frame, a manually operable lever pivotally mounted on the frame, links connecting the lever and said unit on opposite sides of the respective pivots, the front edge of the forward link being sharpened to form a cutting edge, said frame being formed with a plurality of teeth, and a manually controlled dog on the lever for co-operating with the teeth to lock the lever in a plurality of positions.

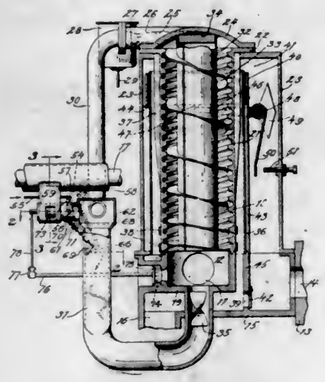
1,782,599. CLINICAL THERMOMETER. JOSEPH ARTHUR BOUTIN, Phoenix, Ariz. Filed Jan. 10, 1930. Serial No. 419,955. 2 Claims. (Cl. 73—52.)

2. In combination with a thermometer, a cap connected with one end thereof, a socketed member in which the cap fits, with one end of the cap projecting from the member, whereby a closure member for the thermometer can be placed over the projecting end of the cap and frictionally held thereby, a large cap fitting over the upper end of the member and having oppositely arranged openings therein, an arm having one end portion offset extending through each opening, trunnions on said end portions engaging portions of the inner walls of the cap for hingedly connecting the arm with the cap, a looped spring in the cap engaging the inner ends of the arms for holding said arms in either a horizontal position or a vertical position and knobs on the outer ends of the arms whereby said knobs can be rolled between the fingers and thumbs to cause a swinging movement of the thermometer to cause the mercury therein to descend.



1,782,600. BURNER. GEORGE THOMAS BRADO, Reno, Nev. Filed Jan. 28, 1929. Serial No. 335,612. 3 Claims. (Cl. 158—91.)

1. A vaporizer comprising a bottom plate having a shallow trough, an intermediate plate supported by the side walls of the trough and terminating short of one end of the trough, and a top plate having a recess in each of its top and bottom surfaces and terminating short of the intermediate plate on the end nearest the foregoing end of the trough, the opposite end of the top plate and the adjacent end of the bottom plate abutting each other and having recesses which coact to provide an opening for the passage of air above and below the intermediate plate, said top and intermediate plates having openings staggered with respect to each other.

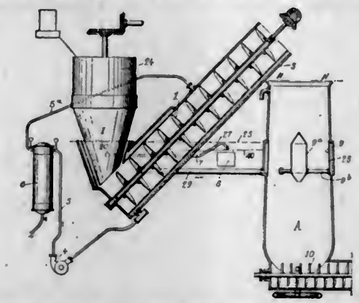


1,782,601. LAMP SHADE. CHARLES T. BRADY, Detroit, Mich. Filed Nov. 19, 1928. Serial No. 320,309. 5 Claims. (Cl. 240—1.)

2. In combination with a lamp shade including a ring member of spring material at the light-emitting end thereof, a closure member consisting of a frame member of spring material and of substantially the same dimensions as said ring member, substantially opaque material covering said last named frame member, said material

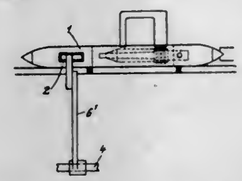
having an opening, a shutter hinged to the closure member and adapted to cover said opening, and a light-modifying device in said shutter.

1,782,602. METHOD OF AND APPARATUS FOR VAPORISING LIQUID FUELS. FREDERICK F. BRUSH, Chicago, Ill., assignor to Paragon Vaporizer Corporation, Chicago, Ill., a Corporation of Illinois. Filed July 15, 1929. Serial No. 378,362. 11 Claims. (Cl. 123—133.)



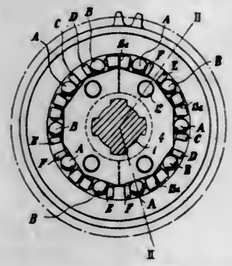
1. In a vaporizer for hydrocarbon fuels for use in internal combustion engines, a pair of air stream conduits, means whereby fuel in liquid form is supplied to one of said pair of conduits, means for heating the mixture in said conduit to vaporize the fuel, means for combining the two streams after said heating is accomplished, and means whereby the air stream in the first mentioned conduit is preliminarily heated in accordance with temperature conditions of the combined streams.

1,782,603. DIFFUSION PLANT. CHARLES CAMUSET, Bretigny-sur-Orge, France. Filed Aug. 30, 1926, Serial No. 132,572, and in France Sept. 25, 1925. 7 Claims. (Cl. 127—6.)



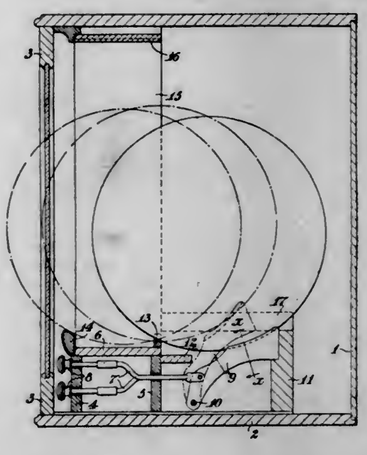
1. In a diffusion plant, a receptacle for the material to be exhausted, a number of substantially vertical diffusers, means whereby the said material is circulated through said receptacle and said diffusers in a continuous manner and in one direction from said receptacle to the last diffuser, means for feeding exhausting liquid in the last diffuser at the exit end of said material, connecting means

between the diffusers and between the first diffuser and said receptacle adapted to allow said exhausting liquid to flow successively in a continuous manner from the



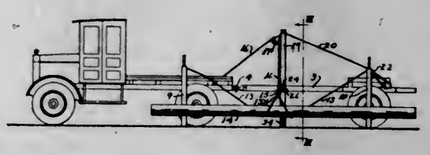
last diffuser to said receptacle and in an opposite direction to that of said material in each diffuser and in said receptacle, and means for regulating the level of said liquid in said last diffuser.

1,782,604. SHUTTLE-GUARD DEVICE FOR SHUTTLES WITHOUT THREADING DEVICES FOR AUTOMATIC LOOMS. ERNST EGLI, Ruti, Switzerland, assignor to Maschinenfabrik Rüti vormals Caspar Honegger, Ruti, Switzerland. Filed Aug. 14, 1929, Serial No. 385,701, and in Switzerland Feb. 2, 1929. 3 Claims. (Cl. 139—252.)



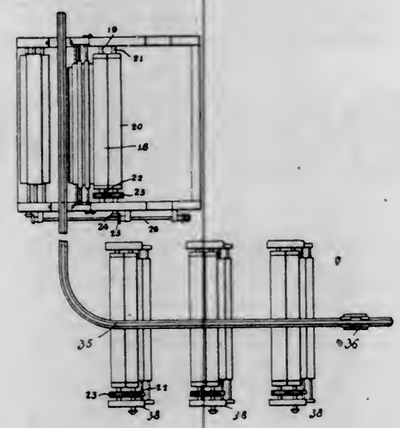
1. In a shuttle-guard device for shuttles without threading device, for automatic looms, the combination comprising a shuttle having a transverse-opening, a wedge-piece capable of entering into the said opening when the shuttle is in its correct position and of automatically correcting an error of position of the shuttle of about 1 cm. to the left or right, means connected to the weft-feeler to move the wedge-piece against the shuttle in the moment of changing the bobbin and means interposed between the said wedge-piece and the bobbin changing hammer to prevent changing of the bobbins in the event of a greater error of position of the shuttle.

1,782,605. TRANSMISSION MECHANISM. JAMES FARLEY, Hertford, England. Filed Apr. 14, 1927, Serial No. 183,867, and in Great Britain Apr. 23, 1926. 8 Claims. (Cl. 192—47.)



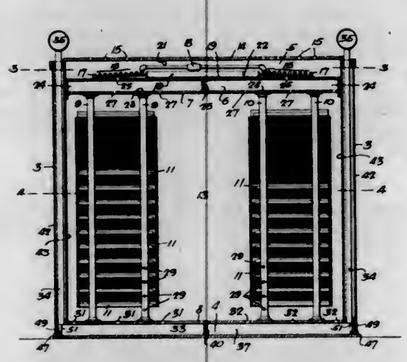
1. In clutch mechanism including wedging members disposed between a polygonal member and a coaxial cylindrical face, a free composite cage for the wedging members whereby transmission may be effected whether the polygonal or the coaxial cylindrical face is operating as a driver, said composite cage including two parts angularly movable relative to each other, a series of wedging members mounted in each part, and registering means rotatable with said polygonal member for securing the cage parts with the wedging members free of the said cylindrical face whereby transmission is interrupted.

1,782,606. CABINET FOR THE STORAGE OF GRAMOPHONE DISK RECORDS AND THE LIKE. VIRGILIO FRASCHETTI, London, England. Filed Apr. 25, 1929, Serial No. 358,086, and in Great Britain May 17, 1928. 2 Claims. (Cl. 312—15.)



2. In a record storage cabinet front and rear uprights, front and rear strips supported by said uprights forming a record cradle, a pivoted tipping member located behind the rear upright cooperating with the rear strip to form a record seat, said tipping member having a groove to receive an edge portion of a record and the base of said groove being curved to conform substantially to the curvature of the edge of the record.

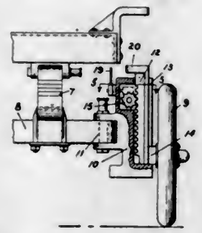
1,782,607. LOADING DEVICE. WALTER A. FREEMAN, Augusta, Kans. Filed Feb. 1, 1928. Serial No. 251,134. 1 Claim. (Cl. 214—94.)



The combination with a motor driven truck, of a two wheeled extension truck having a tongue connection to the main truck; a boom pole adapted for support by the ground and intermediate the two truck elements; a spacer rigid to and outwardly extending from the tongue connection and towards the boom pole and terminating in a forked element; a tongue element rigid to an intermediate part of the boom pole; and an adjustable hinged connection of said forked spacer element with the tongue element on said boom pole.

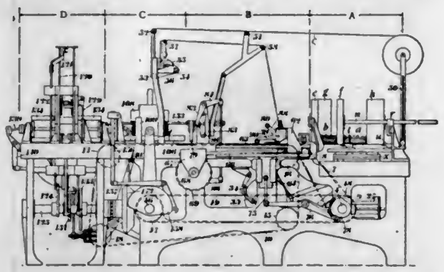
1,782,608. PRINTING PRESS. GEORGE L. FULK, Cleveland, Ohio, assignor, by mesne assignments, to Bonnar-Vawter Fanform Company, Inc., Cleveland, Ohio, a Corporation of Delaware. Filed Apr. 13, 1926. Serial No. 101,633. 17 Claims. (Cl. 101—180.)

1. A printing press having a supporting frame provided at opposite sides of the press with aligned sockets open at one side, a block slidably mounted in each socket, and a pair of cylinders journaled at opposite ends in said blocks, said blocks and cylinders being removable from the press as a unit.



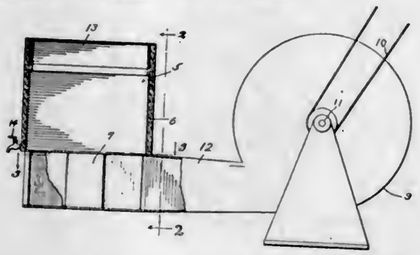
1,782,609. INCUBATOR. WILLIAM R. GASKILL, Frenchtown, N. J., assignor to Richard W. Kerr, Frenchtown, N. J. Filed Nov. 3, 1924. Serial No. 747,661. 1 Claim. (Cl. 119—35.)

In an incubator, the combination of an incubating chamber, of a plurality of tray-supporting standards within said chamber, at least one of said standards being hollow, a port communicating with the top of said hollow standard, ports in said standard at a point below the top, and means for creating a circulation of air through the standard and out of said ports into the said chamber.



1,782,610. GUN CARRIAGE. SAMUEL G. GREEN, Jones, Ga. Filed Aug. 9, 1929. Serial No. 384,745. 2 Claims. (Cl. 280—6.) (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757).

1. A gun carriage including front and rear axles, a jack pedestal on each extremity of the axle, the pedestals provided with a foot, and the pedestals on at least one axle being pivoted for steering, a rack bar in each pedestal, means for actuating the rack bar, a stub axle on the lower portion of the rack bar, a wheel on the stub axle, and a



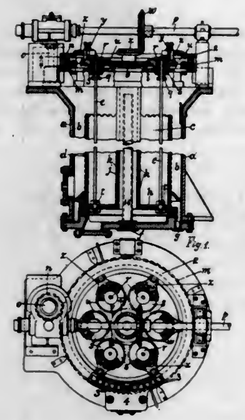
platform suspended on the axles, having portions overlying the rack bar in position to be engaged by the rack bar in position to be engaged by the rack bar when the foot of the pedestal contacts the ground to support the platform independently of the wheels.

1,782,611. MANUFACTURE OF CARDBOARD BOXES. HENRY HACKETT, Selly Oak, Birmingham, and ARTHUR WHITTAKER, Northfield, Birmingham, England. Filed Sept. 16, 1929, Serial No. 393,055, and in Great Britain Dec. 31, 1928. 8 Claims. (Cl. 93—41.)

1. In a machine for the manufacture of boxes from a main piece and two shorter side pieces of cardboard or like material, means whereby the said pieces are correlated on a horizontal table so that the side pieces lie centrally with respect to opposite sides of the main piece, means whereby two adhesive flexible strips are attached to the said pieces, leaving overhanging portions, and means whereby the side pieces and the ends of the main piece are folded and the said overhanging portions of the adhesive strips are caused to secure the folded portions, substantially as described.

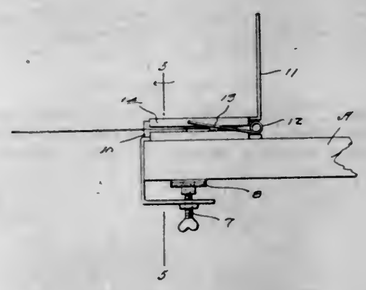
1,782,612. AIR-COOLING DEVICE. ROBERT H. HARDIN, Bakersfield, Calif. Filed Feb. 15, 1930. Serial No. 428,799. 2 Claims. (Cl. 257—202.)

1. In a device of the character described, a body portion for the reception of water and ice, said body portion



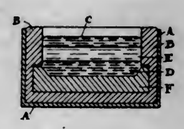
having a transversely disposed passageway, a plurality of hollow members arranged within the passageway, said hollow members having offset end portions to cause air forced between the hollow members to take an irregular path, means for forcing air between the hollow members, and means for causing the water in the body portion to enter from the top to the bottom of the hollow members.

1,782,613. FISHING TOOL. EARL A. HAZEN, Joplin, Mo., assignor to Keystone Driller Company, Beaver Falls, Pa., a Corporation of Pennsylvania. Filed May 8, 1926. Serial No. 107,722. 7 Claims. (Cl. 294—86.)



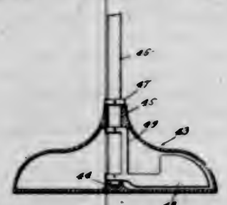
1. A fishing tool having a tubular horn socket portion terminating in an inclined edge, and formed with a slot in its wall extending upwardly from the region of the highest part of said edge, and having opposed helical sides; the slot having smooth and unbroken walls to serve as a guide.

1,782,614. ELECTRODEPOSITION OF METALS. JACK HOLLINS, Rosemount, Middlewich, England, assignor to Imperial Chemical Industries Limited, London, England, a British Company. Filed Jan. 22, 1929, Serial No. 334,256, and in Great Britain Feb. 25, 1928. 7 Claims. (Cl. 204—11.)



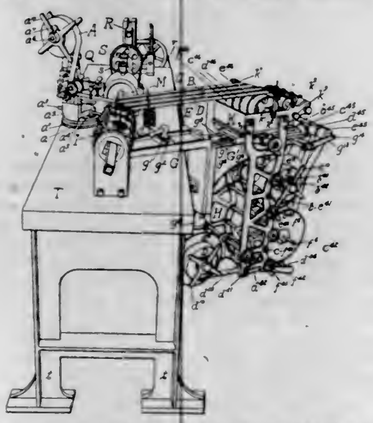
1. A vat for the electro-deposition of metals comprising, in combination, an anode compartment, a cathode compartment, a filter diaphragm between the said compartments, a rotating head above the cathode compartment, mandrels constituting cathodes suspended from said head and extending into the cathode compartment, means for rotating said mandrels about their axes, a vertical perforated tube extending up through the cathode compartment, connected to the rotating head at its upper end and providing a steady for the lower ends of the mandrels, and means delivering electrolyte within said perforated tube through which it diffuses into the cathode compartment to overflow the filter diaphragm into the anode compartment.

1,782,615. WORKHOLDER. CARRIE S. HOPWOOD, Hinsdale, Mont. Filed June 18, 1928. Serial No. 286,233. 1 Claim. (Cl. 223—54.)



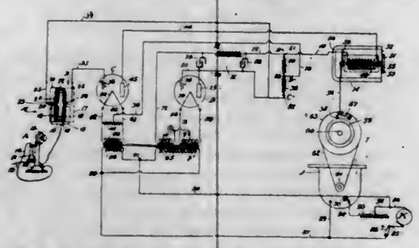
A work clamp comprising a pair of superposed flat jaw members, an upstanding arm formed on the rear end of the upper jaw member, a depending arm formed on the forward end of the lower jaw member, an inwardly extending leg on said arm arranged in parallel relation to the lower jaw, a clamp bolt carried by said leg, longitudinally extending flanges formed on the side edges of the jaw members, a transversely extending coil spring arranged between said jaw members having arms formed on the opposite ends thereof anchored in the opposite flanges of said members, and flat cushion jaw faces carried by the jaw members and confined between said flanges.

1,782,616. ELECTROLYTIC APPARATUS FOR REFINING ALUMINUM AND FOR LIKE PROCESSES. PAUL LÉON HULIN, Grenoble, France, assignor to Societe Anonyme Compagnie de Produits Chimiques et Electrometallurgiques Alais, Froges et Camarque, Paris, France. Filed June 19, 1928, Serial No. 286,588, and in Germany July 4, 1927. 7 Claims. (Cl. 204—20.)



1. An electrolytic apparatus for refining aluminum, extracting other metals, and similar operations, comprising a shell containing three superimposed layers in a state of fusion consisting of an anode of a dense alloy of the metal to be extracted, a halogenated bath forming the electrolyte, and a light metal forming the floating cathode, and an inner lining composed of a horizontal frame, of refractory material or carbon, surrounding the anode, a horizontal frame of insulating material containing the electrolyte, and a frame composed substantially of carbon, surrounding the cathode and insulated from the metal shell.

1,782,617. ADJUSTABLE STAND AND RACK. FREDERICK C. HUONKER, Dayton, Ohio. Filed Nov. 27, 1928. Serial No. 322,278. 1 Claim. (Cl. 248—91.)



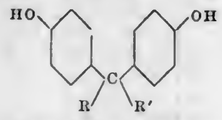
In an adjustable stand and rack structure of the class described, a standard, and supporting means for said standard comprising a hollow flat bottom base provided with vertically alined bearings, said standard being rotatable in said bearings, and a counterweight in said base attached to said standard.

1,782,618. PAPER-STRIP-CONTROLLING MECHANISM. ROBERT J. JAUCH, Fort Wayne, Ind. Filed Apr. 6, 1927. Serial No. 181,408. 2 Claims. (Cl. 271—2.1.)

1. In combination with a paper tube-making machine adapted to form paper tubes polygonal in cross section from strips of paper by drawing said strips onto a polygonal mandrel, said machine having such mandrel, an element from which such a strip is supplied to said mandrel and means for vertically adjusting said element.

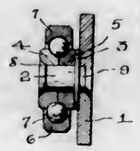
1,782,619. DEVICE FOR ELECTRICALLY-RECORDING TELEPHONIC SOUNDS AND CONVERSATIONS AND SYSTEM THEREFOR. MANFRED J. JOHNSON, Bridgeport, Conn., assignor to Dictaphone Corporation, Bridgeport, Conn., a Corporation of New York. Filed May 25, 1927. Serial No. 194,039. 7 Claims. (Cl. 179—6.)

1. The step in the method of recording telephone signals which consists in mechanically attaching a core and winding in magnetic and inductive relation to the core and winding of a service receiver of a service telephone system to provide a transformer for picking up sound produced currents.



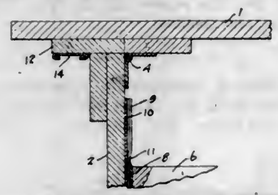
1,782,620. FOOTWEAR. WYATT J. JONES, Niles Center, Ill., assignor of one-half to Glenn S. Noble, Chicago, Ill. Filed Feb. 25, 1929. Serial No. 342,470. 1 Claim. (Cl. 36—1.)

The combination with a shoe, of a flexible shoe horn comprising a strip of leather having one end widened so as to form a heel portion disposed over the rear portion of the insole area of the shoe and substantially co-extensive therewith and having its forward portion secured in the bottom of the shoe, the strip being tapered gradually toward the other end to form a tongue adapted to extend up to the top of the heel, said tongue and adjacent portion being free from the shoe.



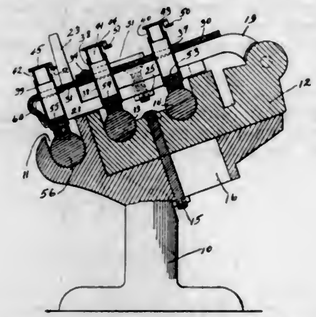
1,782,621. METHOD OF PRODUCING PRODUCTS OF HYDROGENATION OF ALKYLATED PHENOLS. HANS JORDAN, Berlin-Steglitz, Germany, assignor to Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Filed July 12, 1926, Serial No. 122,032, and in Germany July 4, 1925. 4 Claims. (Cl. 260—154.)

1. The method of producing products of hydrogenation of alkylated phenols, comprising subjecting a product of condensation of a ketone and a phenol having the formula



wherein R and R' are alkyl or aryl radicals to treatment at a temperature of at least 170° C. with hydrogen in the presence of a mixed hydrogenation catalyst in such manner that the molecule of the compound is split up at the point where the ketone connects the phenol radicals, and simultaneously hydrogenating the split products further.

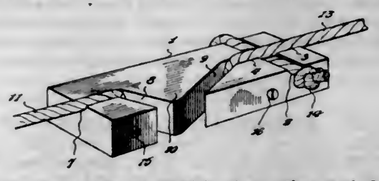
1,782,622. ANTIFRICTION ROLLER. FREDERICK K. KILIAN, Syracuse, N. Y. Filed Feb. 19, 1929. Serial No. 341,146. 5 Claims. (Cl. 308—203.)



1. A ball bearing roller structure comprising a stud having a collar between its ends, inner and outer raceways, the inner raceway comprising separable sections mounted on the stud on one side of the collar, one section abutting agains tthe collar, and the outer end of the stud being provided with means coacting with the other section to hold the sections together against the collar, balls between the inner and outer raceways, the outer raceway serving as a roller, the portion of the stud on the other side of the collar to that on which the raceways are mounted, serving as a stem to attach the roller to a support with the collar abutting against the support, said collar serving to locate the raceways on the stud and to locate the stud relatively to the support, whereby the outer raceway serving as a roller is accurately positioned relatively to the support.

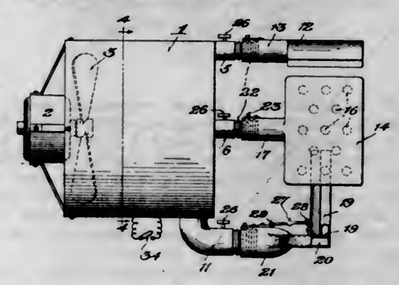
1,782,623. FOLDING TABLE. CLIFFORD HARROD MCCASLIN, Oakland, Calif. Filed Mar. 19, 1928. Serial No. 262,864. 5 Claims. (Cl. 45—11.)

1. A folding table comprising a top, a pair of legs hinged thereto, guide channels carried by the inner surfaces of said legs, a bracing member and guide strips carried by said member and receivable in said guide channels, an auxiliary guide channel carried by said legs for receiving said guide strips when said legs are swung into closed position.



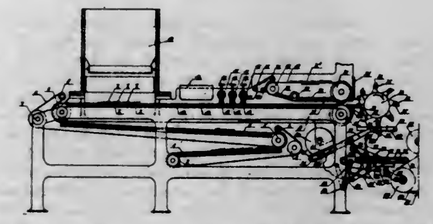
1,782,624. GRAVITY OILING MECHANISM FOR SPINNING FRAMES AND THE LIKE. WILLIAM C. MCGEE, Gastonia, N. C., assignor to Bennett A. Smith, Kings Mountain, N. C. Filed June 27, 1929. Serial No. 374,194. 7 Claims. (Cl. 19—138.)

1. In a lubricating device for roll stands and the like, a plate member adapted to fit on top of the roll stand, said plate member being in two sections and adjustable as to length, a plurality of tubular members mounted in said plate member in a slidable manner, said tubular members being adapted to receive a lubricating material, vegetable plug members mounted in the lower ends of said tubular members and being adapted to press against the bearing portion of the journals mounted in said roll stand.



1,782,625. CLOTHESLINE FASTENER. FRANKLIN H. NEUBERGER, Endicott, N. Y., assignor of one-tenth to Edwin James Brand, Jeffersonville, N. Y. Filed June 18, 1929. Serial No. 371,802. 4 Claims. (Cl. 24—129.)

1. A line fastener comprising a block having a slot formed therein, a pulley rotatably mounted in the slot, said block having a longitudinal groove alined with the slot and a transverse groove intersecting the slot and longitudinal groove, and a line terminal passable through

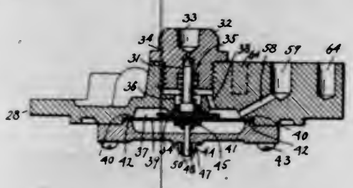


the slot for engagement with the pulley and having stretches thereof engaged in the respective grooves and in contact with each other.

1,782,626. HAIR-DRYING APPARATUS. VINCENT N. NICOSIA, Houston, Tex. Filed Aug. 8, 1930. Serial No. 473,946. 5 Claims. (Cl. 34—26.)

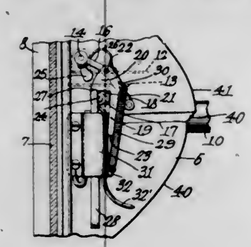
2. In a hair drying apparatus, a casing, means to supply air to the casing, a tubular member connected to the casing and having a vertical outlet, a nozzle slidable on said member and having an inlet at its lower end for registry with the outlet of said member, said nozzle having outlets for directing air horizontally, and means having connection with the nozzle and with the tubular member to adjustably mount the nozzle on said member whereby the nozzle can be moved into and out of registry with the outlet of the member.

1,782,627. CIGAR-MAKING MACHINE. RICHARD CARL JULIUS ADOLF OHMSEN, Dresden, Germany, assignor to Firm Johann Carl Muller, Dresden, Germany. Filed Oct. 17, 1927, Serial No. 226,754, and in Germany Oct. 20, 1926. 33 Claims. (Cl. 131—5.)



1. The method of manufacturing cigars comprising forming a continuous web of tobacco having upper and lower similar rectangular cut leaves of tobacco overlapping each other in the same direction in each layer and an intermediate layer of filler tobaccos, comprising such web, cutting a strip from the end of said web an amount equal to a filler for a cigar, forming said strip into the shape of a cigar by rolling and pressing and providing said shaped filler with a wrapper in the usual manner.

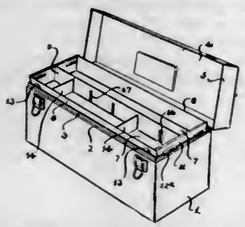
2. In an apparatus for making cigars comprising means for conveying cut leaves of tobacco in overlapping relation, means for depositing cut tobaco on said cut



leaves, means for evenly distributing said tobacco, means for compressing said cut tobacco and cut leaves, means for depositing a layer of cut leaves arranged similar to the cut leaves first mentioned on top of said cut tobacco, whereby a web of tobacco is formed, means for compressing the web so formed and means for cutting strips from said web while so compressed to form a filler for a cigar.

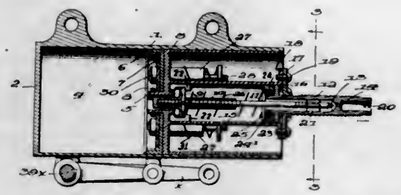
1,782,628. REFRIGERATING APPARATUS. OLAF C. OLSEN, Dayton, Ohio, assignor of two-thirds to The Borden Company, Warren, Ohio, a Corporation of Ohio. Filed Aug. 30, 1927. Serial No. 216,392. 3 Claims. (Cl. 62—95.)

3. In a refrigerating system, embodying means for circulating refrigerant, a casing comprising a float chamber for the reception of refrigerant, a float in said chamber, a closure for one end of said chamber, a diaphragm in said closure, an expansion valve mounted upon said closure outside of said diaphragm, and operative connections mounted on said closure for actuating said valve from said float through the intermediacy of said diaphragm.



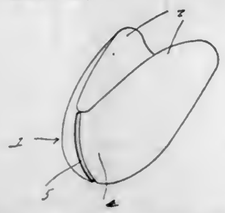
1,782,629. SHIELD FOR MOTOR-VEHICLE HEADLIGHTS. FLOYD N. PAPE, Clinton, Iowa. Filed Jan. 29, 1929. Serial No. 335,820. 2 Claims. (Cl. 240—45.)

1. In combination with a headlight, a dimmer including pivoted blades, shafts extending through the side of the headlight, said blades being mounted on the shafts, an extension forming a part of one of the shafts, pivoted links connecting the blades, an arm connected with the links and having a shoulder at its upper end, a solenoid mounted near the arm, the core of said solenoid adapted to move to engage the shoulder to move the arm and links upwardly to operate the blades, said arm having a shoulder at its lower end to engage the extension to hold the arm and blades in their active positions, and means controlled by the action of the solenoid for moving the arm out of engagement with the extension to release the blades.



1,782,630. RECEPTACLE PROVIDED WITH TRAYS. SEELY F. PRATT, Rochester, N. Y., assignor, by mesne assignments, to Union Chest and Cabinet Corporation, Rochester, N. Y., a Corporation of New York. Filed Jan. 21, 1928. Serial No. 248,493. 4 Claims. (Cl. 206—16.)

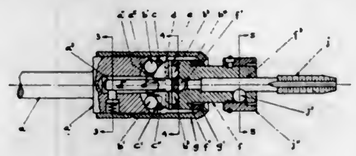
2. In a receptacle, the combination with a bottom member and a hinged closure therefor, of a tray received within the upper portion of the bottom member and having vertical end walls and two opposite side walls diverging upwardly, bosses pressed outwardly from the vertical side walls and cooperating with the side walls of the



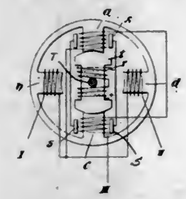
bottom member to prevent the sidewise movement of the tray, and supporting means carried by the vertical end walls of the tray for supporting the tray from the end walls of the bottom member.

1,782,631. SHOCK ABSORBER. FREDERICK R. REIFSNYDER, Pittsburgh, Pa. Filed Nov. 6, 1928. Serial No. 317,565. 10 Claims. (Cl. 188—88.)

10. A shock absorber comprising a cylinder having a compression chamber, a plunger adapted for reciprocation within said chamber and carrying a second compression chamber on its rear face, both chambers being in communication through a port in said plunger, a restricted exhaust port in said second chamber, means controlling the passage of air through both ports, and means for connecting said cylinder to a relatively fixed support and for connecting the plunger to a relatively movable support.



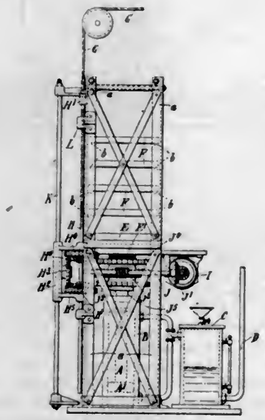
1,782,632. SHOE COUNTER. NELSON J. ROBERT, Lynchburg, Va. Filed Oct. 23, 1929. Serial No. 401,775. 3 Claims. (Cl. 36—68.)



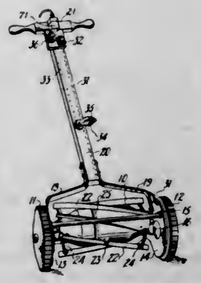
1. A shoe counter of the character described comprising a pair of forwardly extending opposed side portions, an inturned lower portion and a rear connecting portion, all of said portions being formed integral with each other and the rear portion being provided with a vertical groove adapted to receive the quarter seam of the shoe.

1,782,633. FLEXIBLE DRIVING CONNECTION FOR TOOL HOLDERS. BERNARD P. SCHILTZ, Cleveland, Ohio. Filed Apr. 27, 1926. Serial No. 104,902. 3 Claims. (Cl. 279—16.)

1. In a device of the class described, the combination with a driving and an associated driven member, of interposed connecting means comprising members having coacting convex and concave spherical faces adapted freely to turn concentrically upon one another, and interconnecting balls associated therewith for rotatably uniting said members, together with plane-faced connecting members and interconnecting balls permitting offset rotatable movement of the parts, substantially as set forth.

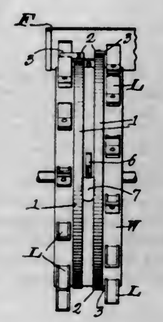


1,782,634. THREE-PHASE ONE-PHASE CONVERTER, ESPECIALLY FOR ELECTRIC RESISTANCE HEATING AND WELDING MACHINES. EDMUND SCHRÖDER, Berlin, Germany. Filed June 13, 1927, Serial No. 198,610, and in Germany July 6, 1925. 5 Claims. (Cl. 172—238.)



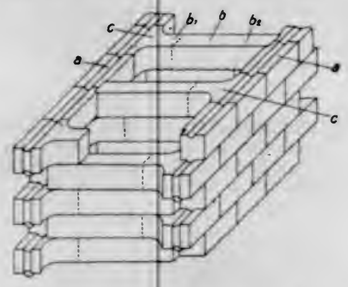
1. In an alternating current converter, the combination with a rotor, a two phase Scott-connected stator primary winding, a secondary stator winding in inductive relation with one phase only of the primary winding, whereby voltage is induced in said secondary winding by the rotor and by transformer actions, the secondary winding being connected to a load circuit.

1,782,635. BOILER AND FURNACE. CECIL WHEATLEY STANCLIFFE, Aldwych, London, England. Filed Apr. 13, 1928, Serial No. 269,859, and in Great Britain Apr. 22, 1927. 10 Claims. (Cl. 236—28.)



1. Apparatus for controlling boilers and furnaces comprising a plunger subjected to a pressure which is a function of the steam pressure or other controlling quantity, a series of weights at spaced intervals each normally resting against abutments, means for causing said weights successively to resist the movement of said plunger, a power driven shaft, a supplementary shaft having gearing connection with said shaft, means for throwing said connection out of operation when the plunger is stationary, and means for communicating the movement of said supplementary shaft to the fuel control means.

1,782,636. ELECTRICALLY-OPERATED LAWN MOWER. DOUGLAS HENRY STOKES, Cremorne, near Sydney, New South Wales, Australia. Filed Sept. 7, 1927, Serial No. 218,068, and in Australia Sept. 20, 1926. 2 Claims. (Cl. 56—26.)



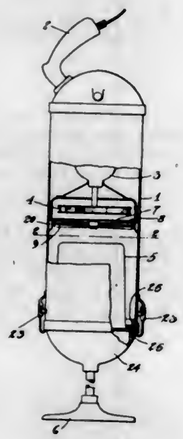
1. A mower comprising a wheeled frame having a shear knife adjustably fixed across the lower part of it and a horizontal shaft fixed across it above said shear knife, a carrier mounted for rotation on said shaft, an electric motor housed within said carrier with its fixed element secured to said shaft and its rotative element geared to said carrier, a plurality of helically twisted cutter blades fixed on said carrier and adapted to coact with said shear knife, a handle pivotally connected to said frame, insulated flexible wires led out from the motor through an end of said shaft and thence to a switch, and means for connecting said wires to a flexible twin cable.

1,782,637. WHEEL-LUG CLEANER. JOHN THIES and FRANK THIES, Hutchinson, Kans. Filed May 24, 1928. Serial No. 280,330. 5 Claims. (Cl. 280—158.)

1. The combination with a tractor wheel having spaced annular series of lugs, of a ring mounted on the wheel between the lugs, the internal diameter of the ring being greater than the external diameter of the wheel, any point on said ring being shiftable radially relative to the wheel, and laterally extending fingers on the ring extending between the lugs.

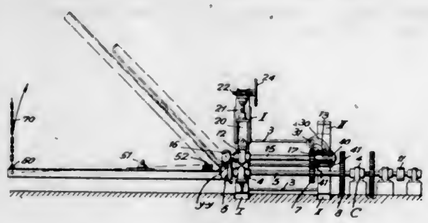
1,782,638. COKE-OVEN-WALL STRUCTURE. FRITZ TOTZEK, Stoppenberg, near Essen-on-the-Ruhr, Germany. Filed Mar. 29, 1928, Serial No. 265,588, and in Germany Feb. 13, 1926. 3 Claims. (72—102.)

1. A gas or coke oven wall having flues therein, said wall comprising courses of stretcher bricks certain of which have recesses on their inner sides at their meeting ends, said courses being spaced apart and said wall also comprising header bricks connecting said spaced courses, each header brick being of less length than the space between the outer surfaces of the courses having a symmetrical end arranged between the opposing ends of two stretcher bricks and extending to the outer surface thereof and also having a symmetrical opposite end engaged in the said recesses in the inner surface of two stretcher bricks of the opposite course and terminating short of the outer surface of the last named stretcher bricks, the contiguous header bricks of each course being reversely arranged so that one such header brick extends to the outer surface of one course and the next such header brick of the same course extends to the outer surface of the opposite course.



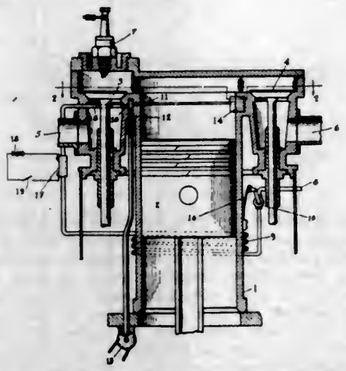
1,782,639. BARBECUING MACHINE. CLIFFORD VAN ALLEN, Canton, Ohio. Filed Nov. 25, 1929. Serial No. 409,727. 1 Claim. (Cl. 53—5.)

The combination in a barbecuing machine, of an annular base provided with an annular supporting surface at its upper end, an annular member provided with a series of equally spaced upwardly and inwardly inclined recesses, said annular member being non-rotatably supported by said supporting surface, a plurality of spits one of which is supported in each of said recesses whereby the spits project upwardly and inwardly toward a common point, a ring shaped member rotatably supported on said annular member, and means on said spits engaging said ring shaped member whereby said spits are rotated when said ring shaped member is rotated.



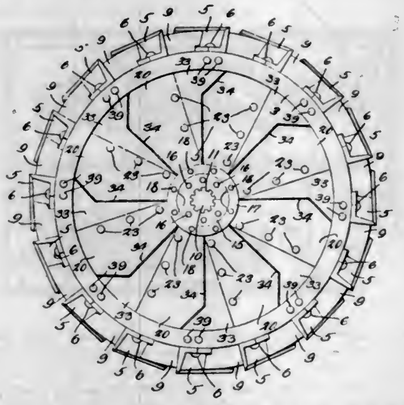
1,782,640. VACUUM CLEANER. AXEL LEONARD WENNER-GREN, Stockholm, Sweden, assignor to Inventia Patent-Verwertungs-Gesellschaft, Schaffhausen, Switzerland, a Corporation of Switzerland. Filed Apr. 9, 1924, Serial No. 705,371, and in Sweden Mar. 15, 1924. Renewed Oct. 26, 1929. 24 Claims. (Cl. 183—74.)

1. A filtering device for vacuum cleaners comprising a plurality of disks each having a central portion and an annular outer portion, a series of wings extending between said central portion and said annular portion forming a series of perforations between them, locking members on the central portions adapted to coact to clamp



said disks together and flanges on said disk having edges directed toward each other and serving to retain fibrous filtering material between the disks when the disks are clamped together.

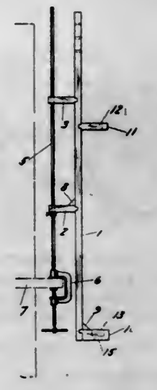
1,782,641. MACHINE FOR FLANGING PLATE DISKS. OTTO WILD and LOUIS WILD, Muri, Switzerland. Filed July 30, 1928, Serial No. 296,173, and in Germany June 20, 1928. 4 Claims. (Cl. 153—54.)



1. In a machine for flanging plate disks, in combination, two flanging rollers adapted to be adjusted in their distance from each other, one of said rollers having the shape of a bulb and a profile corresponding to the inside of the curved portion and of the cylindrical wall of the flange, the opposite roller having the profile of the outside of the cylindrical wall and of one half of the outside of the curved portion of the depending flange, the second mentioned roller consisting of a part which acts in the manner of a driving roller and another part which acts in the manner of an idler, supporting means for rotatably holding the center portion of the plate disk, and means for angularly displacing said supporting means along an arc having its center between said rollers.

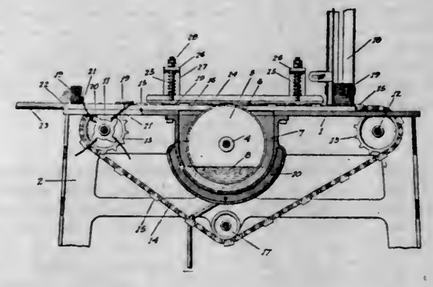
1,782,642. INTERNAL-COMBUSTION ENGINE. HUGH WILEY, Los Altos, Calif. Filed Mar. 13, 1928. Serial No. 261,308. 4 Claims. (Cl. 123—25.)

1. An internal combustion engine comprising a cylinder, a piston mounted therein, means for directing water into said cylinder just after the explosion takes place, and prior to the completion of the exploded stroke, and a hot plate disposed in said cylinder for changing the water into steam.



1,782,643. TRACTOR WHEEL. CHARLES H. WILKS, Marche, Ark. Filed Aug. 1, 1928. Serial No. 296,782. 2 Claims. (Cl. 301—5.)

1. A wheel comprising a tread, a hub, a plurality of approximately triangular body-forming members, having extensions, the extension of one body-forming member overlapping the next-adjoining body-forming member, means for securing said extensions to the adjoining aforesaid members to form a conical body, that edge of each body-forming member which is opposite to the extension being provided with a wing extended from one side of the wheel toward the other, the wing being supplied along one edge with a flange extended transversely of the wheel in engagement with the inner surface of the tread, means for securing the wing to the tread, and means for securing the body to the hub.

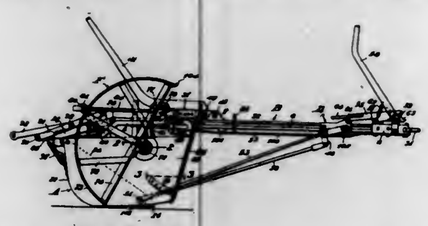


1,782,644. PHYSICS LABORATORY APPARATUS. MILTON B. BRENNEMAN, Davenport, Iowa. Filed Dec. 26, 1929. Serial No. 416,354. 3 Claims. (Cl. 23—292.)

1. A support for laboratory apparatus comprising a flat bar having pairs of brackets or shelves extending from opposite faces thereof, one of said pairs having aligned openings therein for the reception of a supporting rod

and the other pair having aligned openings therein for the reception of tubular apparatus used in performing experiments.

1,782,645. SLAT WAXING AND STACKING MACHINE. OSCAR F. CHICHESTER and JOHN J. SYLVA, Stockton, Calif., assignors to California Cedar Products Company, Stockton, Calif., a Corporation. Filed June 29, 1927. Serial No. 202,270. 6 Claims. (Cl. 91—51.)



1. A slat waxing and stacking machine including a waxing means, means for conveying the slats successively past the waxing means so that one face of each slat is waxed, horizontal slat conveying means including transversely spaced endless elements and upstanding lugs thereon at intervals to engage the edges of the slats, slat supporting bars extending beyond and disposed parallel to said elements, a rotatable spider member having radial arms, spaced proportionate to the spacing between the conveyor-lugs, disposed between the conveyor elements beyond the waxing means for engaging the under faces of the slats successively, and causing them to be raised on edge and then shifted clear of the conveying means and onto said supporting bars.

1,782,646. GROUND SCRAPER AND LEVELER. JAMES T. COMPTON, Los Angeles, Calif. Filed Apr. 25, 1928, Serial No. 272,741. Renewed Aug. 4, 1930. 10 Claims. (Cl. 37—140.)

1. In a ground working mechanism of the character described, a scraper body, a tongue, a connection between the tongue and the upper portion of the scraper body, a

carriage slidable longitudinally of the tongue, connections between said carriage and the lower forward portion of the scraper body, trip controlled means for releasably holding the carriage in an advanced position on the

tongue, means for limiting retractive movement of the carriage, and means on said scraped body engageable with the ground for automatically effecting advance of said carriage from its retracted to its advanced position.

1,782,647. LOOSE-LEAF BINDER. JAMES C. DAWSON, Webster Groves, Mo., assignor to Elma N. Dawson, Webster Groves, Mo. Filed May 7, 1929. Serial No. 361,132. 1 Claim. (Cl. 129—24.)

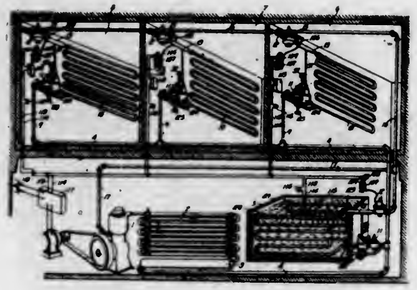
In a loose leaf binder, duplicate prong-carrying rods of circular cross-section, each rod having two similar arch bends curved longitudinally, each pair of corresponding arches being in mutual cooperative toggle-joint relation, the crown of one arch of each rod having a recess therein, said recess conforming to the original curves of the crown of the cooperating arch of the other rod and receiving the same in said recess to form the toggle-joint between said arches.

1,782,648. PROCESS OF COLORING SLATE GRANULES. HARRY C. FISHER, Cincinnati, Ohio, assignor, by mesne assignments, to The Philip Carey Manufacturing Company, a Corporation of Ohio. Filed Apr. 29, 1925. Serial No. 26,828. 11 Claims. (Cl. 91—70.)

8. A process for coloring granulated permeable mineral matter which will withstand a roasting treatment which consists in treating the mineral matter with penetrative colloidal metallic compounds, and dehydrating the colloid in the presence of a peptizing agent.

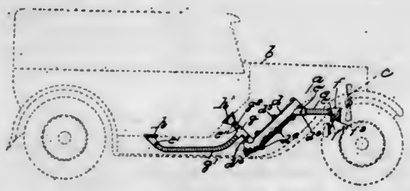
11. A process for coloring granulated slate which consists in wetting the slate with a solution of an alkaline dichromate in the presence of a metallic salt which will react with the dichromate to form a jell and then heating the materials to dehydrate the jell, forming oxides thereof at least in part.

1,782,649. PROCESS FOR FORMING GRAYISH-BLACK SLATE GRANULES. HARRY C. FISHER, Cincinnati, Ohio, assignor, by mesne assignments, to The Philip Carey Manufacturing Company, a Corporation of Ohio. Filed June 20, 1925. Serial No. 38,568. 4 Claims. (Cl. 91—70.)



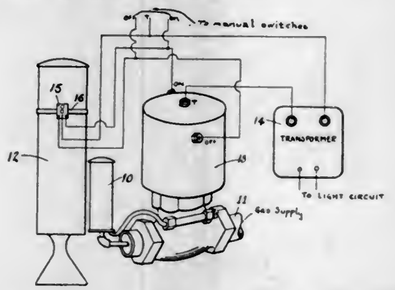
2. That process of coloring granular slate, which consists in wetting it with a solution of alkali dichromate and iron sulphate, and a third compound which will decompose with heat to form a pigment, heating the slate to a degree which will produce a dry product impregnated with the oxides of the dehydrated substances and the decomposed third compound.

1,782,650. DOUBLE HAIR WAVER. ABRAHAM GOODMAN and JACOB GOODMAN, Brooklyn, N. Y. Filed Dec. 26, 1929. Serial No. 416,311. 2 Claims. (Cl. 132—41.)



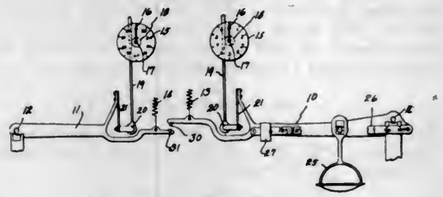
1. An article of the class described comprising a pair of members each of a wire like element bent to form a loop with parallel portions terminating in adjacent coiled ends, a second loop member having parallel portions terminating in coiled ends positioned between the coiled ends of each of the pair of members, a rivet extending through all of said coiled ends for maintaining the same attached as in service and providing a pivot, said members being adapted for relative pivotal movement on said rivet so that end portions of the second member may be moved between the parallel portions of the first members, and cooperative locking portions on said members in engagement with each of said pair of members.

1,782,651. REFRIGERATING SYSTEM. JOHN F. HOFFMAN, Omaha, Nebr., assignor to Baker Ice Machine Co. Inc., Omaha, Nebr., a Corporation of Nebraska. Filed Mar. 7, 1927. Serial No. 173,440. 7 Claims. (Cl. 62—4.)



1. In a refrigerating system, a cooling unit, valve mechanism controlling return flow from said unit, thermostatic means controlling said valve mechanism, and an electrical heater controlling said thermostatic means and automatically controlled by temperature of a compartment served by said unit.

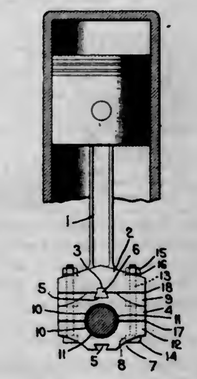
1,782,652. HEATER FOR VEHICLES. FRANK C. HOWARD, Chicago, Ill. Filed Oct. 19, 1927. Serial No. 227,076. 4 Claims. (Cl. 257—241.)



1. In a heater for a vehicle having an internal combustion motor, the combination of a tubular heater member adapted to extend around the exhaust pipe of the motor, an integral helical rib on the inner periphery of said member, to direct air helically around the exhaust pipe, means to hold the member so that, the rib is spaced from the pipe to permit some of the air to pass between the rib and the pipe, means to direct air from the motor fan into one end of said member, and means connected to the other end of the member to convey the heated air into the body of the vehicle.

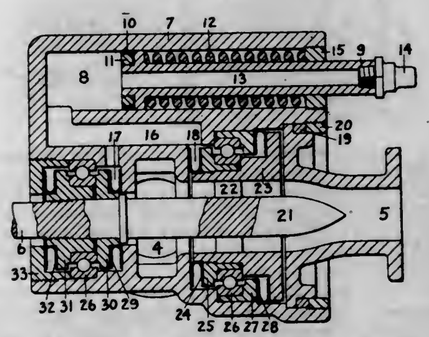
1,782,653. CONTROL DEVICE FOR HEATING SYSTEMS. GEORGE C. HUNT, Rochester, N. Y., assignor to The Savutime Devices, Inc., Rochester, N. Y., a Corporation of New York. Filed Nov. 4, 1927. Serial No. 231,054. 2 Claims. (Cl. 200—138.)

1. In a device of the class described, a flat casing open at the back, a sheet of insulating material mounted within and in spaced relation to the front of said casing, manually controlled contact springs mounted in the space between said casing and said sheet of insulating material, a thermally controlled spring mounted on the opposite side of said sheet of insulating material, terminals mounted in one side of said casing, and electrical connections between said contact springs, said thermal spring and said terminals.



1,782,654. WEIGHING SCALE. LOUIS JAENICHEN, Springfield Township, Oakland County, Mich., assignor to The Standard Computing Scale Company, a Corporation of Michigan. Filed Nov. 27, 1928. Serial No. 322,261. 4 Claims. (Cl. 265—69.)

1. In a scale, a pair of levers, one of which is provided with a load receiver and a sensitive load resisting element and the other of which is provided with a load resisting element adapted to resist heavier loads than the first, said first lever adapted to act independently to weight small loads and adapted to act upon said second lever as a load thereon when the loading in the load receiver exceeds a predetermined amount.

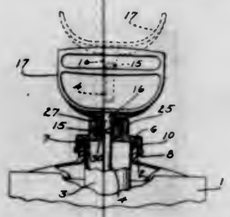


1,782,655. PITMAN OR CONNECTING-ROD CONSTRUCTION. PETER JAMESON, West Quincy, Mass. Filed Feb. 29, 1928. Serial No. 257,842. 4 Claims. (Cl. 74—47.)

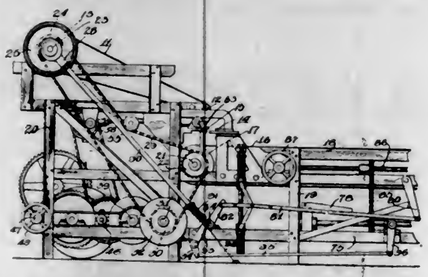
1. A pitman, for connecting the piston to the crank shaft of an internal combustion engine and the like, comprising an enlarged head having a flat face, complementary bearing blocks of like construction and interchangeable, each having a central flat face adapted to engage the central portion of the flat face of the head and provided with recesses extending from said central

portion to the ends of said bearing sections, a shim or shims interposed between the bearing block and the head, filler blocks in said recesses, a shim or shims interposed between said bearing blocks, and means clamping said bearing blocks together and to said head.

1,782,656. PACKING. BRYAN P. JOYCE, Davenport, Iowa. Filed Sept. 23, 1927. Serial No. 221,549. 5 Claims. (Cl. 103—112.)



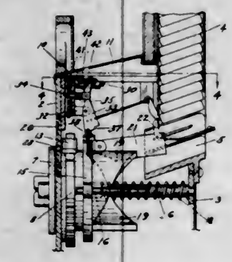
1. A packing between relatively movable parts of a pressure fluid machine, said packing comprising a chamber formed between said parts by metal packing rings and full of fluid under greater pressure than the machine fluid, a bearing within said chamber, means securing the bearing in position within the chamber and between the machine parts, and one of the machine parts exposing a greater aren to the pressure of the packing fluid in one direction than in the opposite direction, to relieve said bearing of load when the machine is in operation.



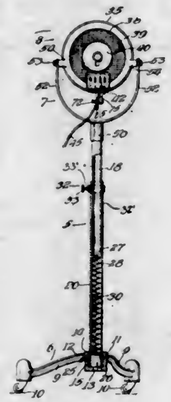
1,782,657. PRESSURE TANK CAP. ANTON W. KEGLER, Minneapolis, Minn., assignor to Hudson Manufacturing Co., Minneapolis, Minn., a Corporation of Minnesota. Filed Apr. 13, 1927. Serial No. 183,461. 3 Claims. (Cl. 221—77.)

3. A device of the class described comprising a tank having a filling extension in its top, a cylinder passing

loosely through the extension and having a tap flange engaging the extension as a stop, and a cap detachably secured to the extension and acting to clamp the flange against the extension said cap having a slot and further having a pocket angularly related to the slot, said cylinder having a piston rod traversing the slot and having lugs adapted to pass through the slot when in one angular position, and adapted when disposed in another angular position to enter the pocket after a partial withdrawal of the rod during a lifting action.

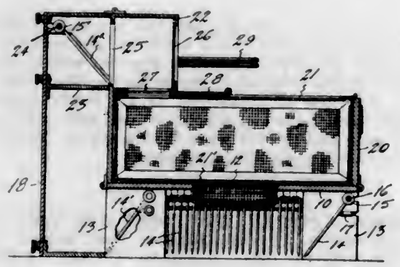


1,782,658. TUBE-STOCK FEEDING, MEASURING, AND CUTTING MACHINE. ARNOLD R. KRAUSE and ALFRED C. HIRSCH, Eau Claire, Wis., assignors to Gillette Rubber Company, Eau Claire, Wis., a Corporation of Wisconsin. Filed June 22, 1927. Serial No. 200,563. 14 Claims. (Cl. 164—48.)



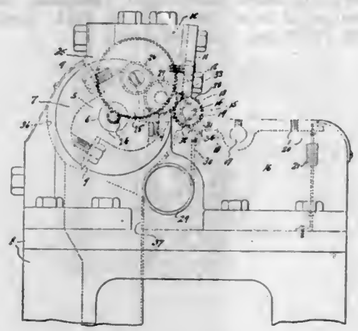
1. A stock measuring, cutting and conveying mechanism comprising measuring and receiving conveyors, a cut off mechanism interposed between said conveyors, and intermittent driving mechanisms therefor including a reciprocating rack, and means associated with said rack adapted to control the operation of said intermitten driving mechanisms.

1,782,659. COIN-OPERATED VENDING MACHINE. CHARLES F. KURTZ, Rock Island, Ill., assignor, by mesne assignments, to L. J. Shields, St. Paul, Minn. Filed Oct. 21, 1929. Serial No. 401,170. 8 Claims. (Cl. 194—97.)



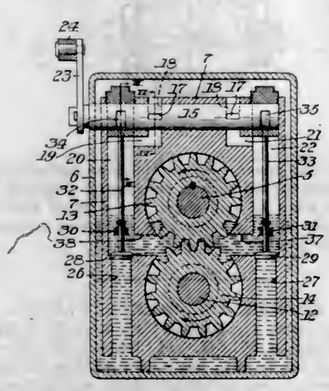
1. A vending machine, comprising a casing provided with a coin entrance, a coin handling mechanism in said casing having a coin receiving space in line with said entrance, means for arresting a coin in its movement from the entrance to said receiving space, means for engagement with a spurious coin while arrested, and means for operation of said last-named means coincidently with the operation of said coin handling mechanism.

1,782,660. STAND AND MOUNTING. WILLIAM MEYER, Chicago, Ill. Filed Dec. 26, 1925. Serial No. 77,888. 1 Claim. (Cl. 248—41.)



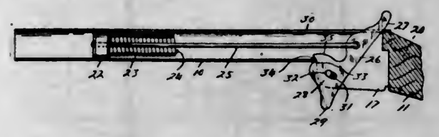
In combination, a socketed base, an upright stand comprising a pair of telescoping members, one extending from the other to increase the height of the stand beyond the length of either member, one telescoping member being mounted in the socketed base, a device mounted on the other telescoping member, a coiled spring confined in the telescoping member mounted in the base and acting in compression on the device carrying member, said members having a great vertical adjustment relative their diameters and being tubular and with their interiors in communication to permit a tight fit between said members without interfering with the relative movement therebetween, the lower telescoping member having its upper end slit longitudinally, and means comprising a ring member surrounding the slit end of said lower telescoping member and a thumb screw carried by said ring and cooperable with said slit end for locking the device supporting member against movement relative to the member mounted in the base, said spring acting only upon release of said locking means to hold the weight of the device and facilitate vertical adjustment of said carrying member.

1,782,661. ANIMAL TRAP. PENELTON G. MIDGETT, Dallas, Tex. Filed Aug. 17, 1928. Serial No. 300,233. 7 Claims. (Cl. 43—66.)



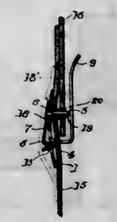
1. In an animal trap, an elevated platform, a bait basket depending from the platform, gates having points at their lower ends hinged under the platform, an outlet from under the platform, a gate closing said outlet, and a trap cage removably supported upon the top of the platform and having an opening and closure connected with the outlet.

1,782,662. PELT-DEHAIRING MACHINE. ROBERT H. PLASS, Montclair, N. J., assignor to The Chapal Donner Corporation, Newark, N. J., a Corporation of New Jersey. Filed Jan. 8, 1930. Serial No. 419,227. 3 Claims. (Cl. 19—2.)



1. In a machine of the kind described, a cutting mechanism, a rotatable pelt feed roller in front of said cutting mechanism, a series of independently yieldable pelt supporting fingers arranged side by side in substantially horizontal plane and having guide portions opposed to said feed-roller and extending to the cutting mechanism, and an air suction conveyer means having an intake mouth coextensive with and adjacent to cutting point of the machine so as to receive and carry away hair or fur filaments severed from a pelt, said guide portion being of less width than the main bodies of said fingers to provide openings therebetween giving access to said conveyer means intake mouth.

1,782,663. HYDRAULIC BRAKING APPARATUS. WILLIAM G. PRICE, Yakima, Wash.; Mary Kelley Price executrix of said William G. Price, deceased. Original application filed Feb. 26, 1927, Serial No. 171,187. Divided and this application filed Oct. 7, 1927. Serial No. 224,601. 5 Claims. (Cl. 188—92.)

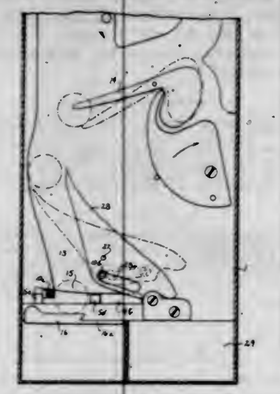


1. Hydraulic braking apparatus, comprising a liquid reservoir, a pump casing having two oppositely disposed ports, a liquid duct adjacent to each port and extending to a point below the liquid level, a check valve for each duct, a conduit extending from the outer end of each of said ports, pumping mechanism within the casing for effecting a flow of liquid through said ports, means for controlling flow through said conduits, and means actuated by the last-named means for controlling movement of the check valves.

1,782,664. AIR GUN. ERNEST S. ROE, Plymouth, Mich., assignor to The King Manufacturing Company, Plymouth, Mich., a Corporation of Michigan. Filed Mar. 21, 1927. Serial No. 177,081. 9 Claims. (Cl. 124—10.)

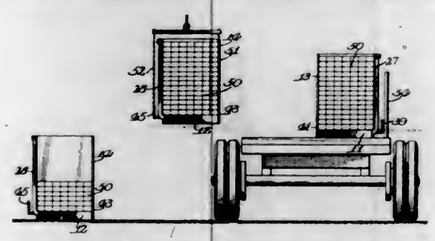
1. In an air gun, the combination with a barrel and a plunger and spring therein, of an element constituting a spring compressing lever and trigger, means for loosely pivotally mounting said element and a notch in said element engageable with the barrel for holding the parts in cocked position.

1,782,665. CLASP FOR POCKETBOOKS AND THE LIKE. ALBERT ROSENBAND, Newark, N. J., assignor to The Rosenband Manufacturing Co., Newark, N. J., a Corporation of New Jersey. Filed Nov. 6, 1928. Serial No. 317,576. 3 Claims. (Cl. 24—210.)



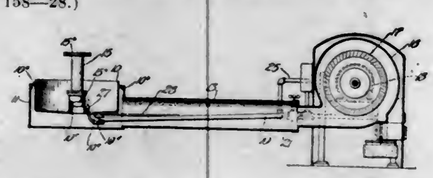
1. In combination, in a pocketbook clasp, a back plate arranged to be positioned within a pocketbook, said back plate having an opening rearwardly of an opening in the body portion of the pocketbook, and aligned loops formed one on each side of said back plate opening; a front plate arranged to be positioned exteriorly of a pocketbook and having an offset tongue extending through the pocketbook opening and through said opening in the back plate, the front plate having a pair of aligned, laterally extending ears, each engaging in a respective one of said loops and forming therewithin a pivotal connection; said tongue being extended in an eccentric lug extending backwardly from said loops; and a stud riveted to said back plate and extending from the front face thereof through a conforming aperture in the body portion of the pocketbook toward said front plate for engagement in an eyelet provided in the flap of the pocketbook; and a flat pressure spring mounted on said riveted stud rearwardly of said back plate and extending into pressure applying contact with said eccentric lug, said pressure spring overlying said back plate opening and being turnably mounted on said stud, whereby said spring may be turned from said opening for inserting or removing off-set tongue.

1,782,666. MONEY CHANGER. ALBERT S. ROSS, Dallas, Tex. Filed Aug. 6, 1928. Serial No. 297,786. 1 Claim. (Cl. 194—1.)



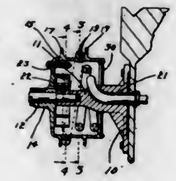
A money changer having a coin passageway, a gate for said passageway, a manually movable coin actuator oper-

atively connected to said gate, a change coin magazine, a lever pivoted adjacent said magazine and extending into said magazine to be supported in an inactive position by



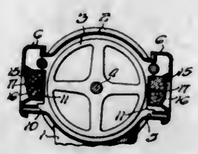
the coins therein, said lever moving into an active position to lock said actuator to hold said gate closed when the number of coins in said magazine is insufficient to make change.

1,782,667. TRUCK-LOAD SECTIONS OR TRAYS. LESTER W. SHELHAMER, Oak Park, Ill. Filed Dec. 19, 1928. Serial No. 326,991. 6 Claims. (Cl. 296—1.)



1. A material handling device comprising a pair of independently movable truck load sections each of which is constructed with a bottom wall, one end wall and one side wall, so that each section will support an independent load, said sections being arranged side by side and having open sides disposed adjacent to each other, so that the sections provide a single material containing enclosure open at one end, the end walls of said sections being in approximate alignment, so that the loads carried by the sections may be simultaneously discharged through the said open end by tilting said sections.

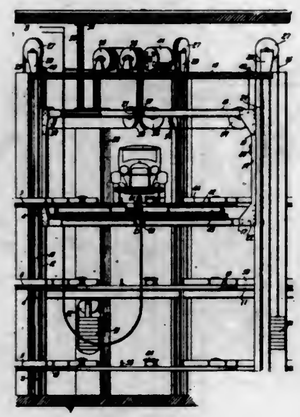
1,782,668. OIL BURNER. WILLIAM W. STUART, Des Moines, Iowa, assignor to Franklin Oil Heating Incorporated, Columbus, Ohio, a Corporation of Ohio. Filed Sept. 21, 1929. Serial No. 394,281. 4 Claims. (Cl. 158—28.)



1. Apparatus of the class described comprising a pot, means to supply oil thereto comprising a duct, a valve therefor, air supply means communicating with said pot and including a fan, a motor actuating said fan, means connecting said air supply means and said oil duct at a point between the discharge end of the latter and said valve, and means to continue said motor in operation for a desired period of time after the closure of said valve, whereby oil in said duct between said valve and said pot will be discharged into said pot.

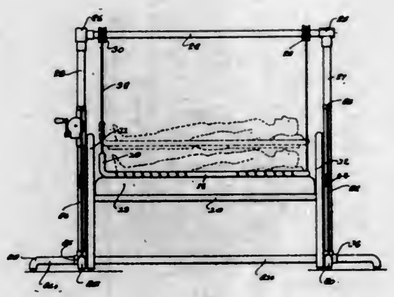
1,782,669. GRINDING MACHINERY. ALBERT TURNER, Cincinnati, Ohio, assignor, by mesne assignments, to Cincinnati Grinders Incorporated, Cincinnati, Ohio, a Corporation of Ohio. Filed Oct. 24, 1924. Serial No. 745,673. 6 Claims. (Cl. 242—107.)

6. In the device of the class described the combination of a hollow drum mounted for rotation, a support therefor having an opening therein, a lead wire extending through the opening into the interior of the drum where it is coiled, then passing to the exterior of the drum where it is again coiled, and resilient means for rotating the drum in one direction to recoil the lead wire after it has been uncoiled.



1,782,670. INDICATING MEANS FOR WEIGHING APPARATUS. ADRIANUS VAN DUYN, Rotterdam, Netherlands, assignor to Naamlooze Vennootschap Maatschappij tot Veraardiging van Snijmachines Volgens van Berkel's Patent en van Andere Werktingen, Rotterdam, Netherlands, a Limited-Liability Company of the Netherlands. Filed Jan. 15, 1930, Serial No. 420,843, and in Great Britain Jan. 19, 1929. 9 Claims. (Cl. 116—129.)

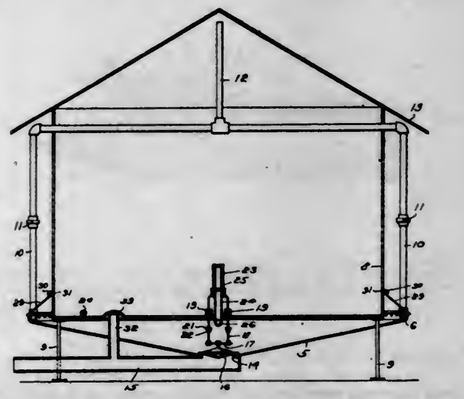
1. A weighing apparatus comprising an indicating chart and a transparent member of substantial thickness being arranged in front of said chart, one edge of said transparent member itself serving as a datum or reading line for the indications on said chart.



1,782,671. STORAGE AND PARKING GARAGE. WILLIAM P. ALLRED, Jr., Kansas City, Mo. Filed May 13, 1929. Serial No. 362,647. 14 Claims. (Cl. 187—1.)

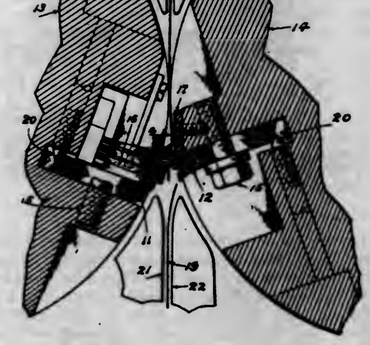
9. In combination with floors of a building having registering circular openings constituting an elevator shaft and having aligning radial openings leading from the circular openings, vertical rails in said radial openings constituting stationary guide and thrust receiving members, an elevator movable in said shaft, including a frame having radial arms projected for travel in the radial

floor openings in guiding and thrust relation with said vertical rails, and a circular platform rotatably mounted on the frame.



1,782,672. APPLIANCE FOR INVALIDS. ROBERT A. AUSTIN, Chicago, Ill. Filed Apr. 5, 1928. Serial No. 267,550. 1 Claim. (Cl. 5—89.)

In an invalid's appliance, an auxiliary bed frame adapted to rest upon a bed, said frame having head, foot and side members, said foot member being offset upwardly above the plane of the remaining bed members to afford clearance for the feet of the patient, and supporting means for the invalid disposed below the plane of the foot member and in the plane of the head and side members.

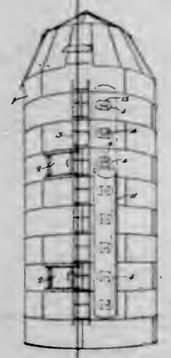


1,782,673. DRINKING FOUNTAIN FOR POULTRY OR SMALL ANIMALS. SHERMAN BARTHOLOMEW, Guerneville, Calif., assignor of one-half to Harry Harris, Rionide, Calif. Filed Nov. 7, 1928. Serial No. 317,721. 10 Claims. (Cl. 119—77.)

1. A device of the character described comprising a tank and a pan, a drain outlet from the pan, a drain valve controlling said outlet, a water supply pipe and a water pressure operated valve operated by the water from said

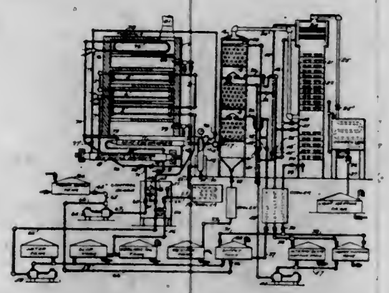
pipe, which controls said drain valve and the passage of water to said tank and an overflow pipe having its mouth disposed in said tank and discharging into said pan.

1,782,674. WEB-CUTTING MECHANISM. AUGUST BAUMGARTNER, Hollis, N. Y., assignor to R. Hoe & Co., Inc., New York, N. Y., a Corporation of New York. Filed June 30, 1928. Serial No. 289,562. 3 Claims. (Cl. 164—66.)



1. In a mechanism for cutting a web into sheets, a rotary cutting device, comprising a cutting cylinder carrying a leading knife and a cutting cylinder carrying a trailing knife, which cutting cylinders co-act to cut the web, sheet guides, means to disengage the end of the web from the leading knife, and a projecting member associated with the trailing knife having openings arranged to pass the sheet guides, said projecting member being adapted to disengage the end of the web from the trailing knife and direct it between the sheet guides.

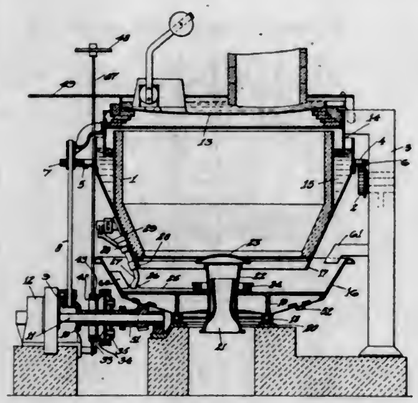
1,782,675. SILO. WILLIAM D. BAYLEY, Springfield, Ohio. Filed May 28, 1928. Serial No. 281,040. 18 Claims. (Cl. 189—3.)



1. A silo structure having an access door, and having an ensilage discharge opening independent of said door,

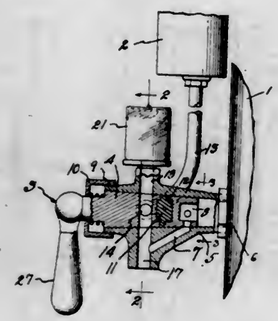
a hopper located interiorly of the silo coincident with said discharge opening and directing ensilage therethrough

and a chute exteriorly of the silo with which said discharge opening communicates, said chute being removed from said access door.



1,782,676. METHOD OF CRACKING AND PROCESSING PETROLEUM HYDROCARBONS. JOHN C. BLACK, Wilmington, Calif., assignor, by mesne assignments, to Gasoline Products Company, Inc., Wilmington, Del., a Corporation of Delaware. Filed May 17, 1924, Serial No. 714,070. Renewed Apr. 17, 1930. 7 Claims. (Cl. 196—58.)

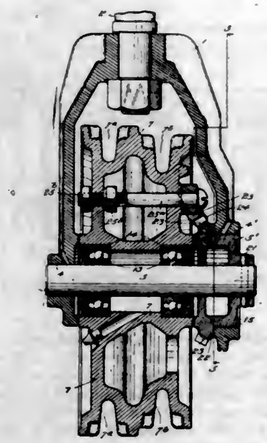
1. The process of cracking hydrocarbons in substantially the liquid phase comprising heating a primary supply of hydrocarbons in a heating furnace to a degree sufficient to crack them, then discharging them into a carbon precipitating and reaction chamber and maintaining throughout the cracking system a pressure sufficient to prevent material vaporization of the hydrocarbons, and simultaneously heating in a tubular heating element a secondary supply of hydrocarbons in the terminal combustion spaces of the primary heating furnace and maintaining thereon, to the point of pressure release and discharge, sufficient pressure to prevent material vaporization thereof.



1,782,677. GAS PRODUCER. ANSON K. BRADLEY, Worcester, Mass., assignor to Morgan Construction Company, Worcester, Mass., a Corporation of Massachusetts. Filed June 7, 1928. Serial No. 283,562. 3 Claims. (Cl. 48—85.1.)

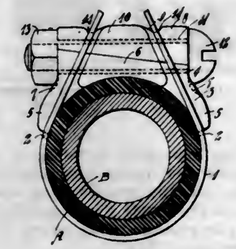
1. In a gas producer, a rotary fuel shell and a rotary ash pan, a common actuating means for said parts, gearing connecting said actuating means to said shell, for rotation of the latter at a constant speed, differential gearing connecting said actuating means to said pan, means for braking one of the members of said gearing, to vary the speed of the pan-driving member of said gearing, thereby to procure rotation of said pan at varying speeds,

higher than the speed of said shell, an ash plow rotatably mounted in said pan, and means operable selectively to connect said ash plow to, or to disconnect it from, said shell.



1,782,678. METHOD AND APPARATUS FOR DISPENSING LIQUIDS. EK GILBERT BRONSON, Detroit, Mich., and JOSEPH W. RUSSELL, East Orange, N. J., assignors to Automatic Coffee Creamer Incorporation, Detroit, Mich., a Corporation of Michigan. Filed Dec. 24, 1927. Serial No. 242,384. 2 Claims. (Cl. 225—26.)

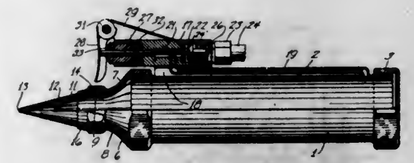
1. Apparatus for dispensing a plurality of liquids, comprising a single valve plug, separate chambers in said valve plug for receiving and dispensing two different kinds of liquid, and insulating means forming a part of said plug for separating said two separate receiving chambers.



1,782,679. HOIST. ARTHUR H. CHAPPELKA, Lakeline, Ohio. Filed Dec. 21, 1928. Serial No. 327,676. 10 Claims. (Cl. 254—169.)

3. In a hoist, the combination of a support having spaced arms formed with bearing openings, one being relatively large, a shaft having fixed to it at one end a collar rotatably fitting said relatively large opening in one of said arms and rotatably mounted at its opposite end in the opening in the other arm, a rotatable element adapted to be engaged by a flexible member, anti-friction bearings for rotatably supporting said element on said shaft, and means between said element and said collar for locking

them together when a force is applied to rotate said element in one direction, said locking means being ineffective when said element rotates in the opposite direction.

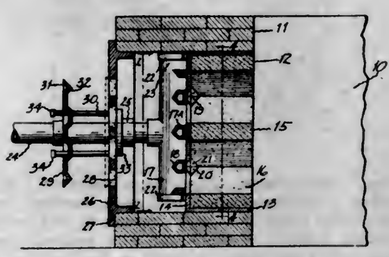


1,782,680. HOSE OR PIPE CLAMP. ALPHEUS FAY and JOHN L. ZEHNDER, Louisville, Ky. Filed Oct. 24, 1927. Serial No. 228,418. 13 Claims. (Cl. 24—19.)

1. In a hose or pipe clamp, a loop member to extend around the hose or pipe, having engaging means near its ends at one side of the hose or pipe, threaded means, and wedging members wedged between said engaging means and the hose or pipe by operation of said threaded means.

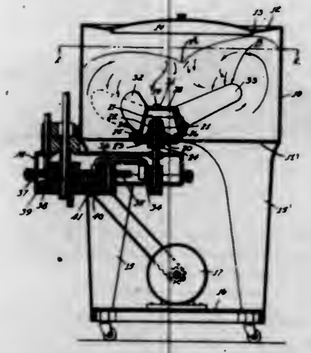
1,782,681. FEED GUN. LEONARD R. FOSS and RUBY FOSS, Oakland, Calif. Filed Jan. 12, 1927. Serial No. 160,760. 8 Claims. (Cl. 91—62.6.)

3. A writing instrument for heavy liquids comprising a tubular container having a conical feed point at one end thereof, a closure for the opposite end thereof, said feed point being provided with a restricted aperture at the end thereof, a control valve attached to said tubular member adjacent said conical feed point, a pneumatic pressure supply for said control valve, a tube for transmitting said pneumatic pressure from said control valve to said tubular container adjacent said closure, and means for



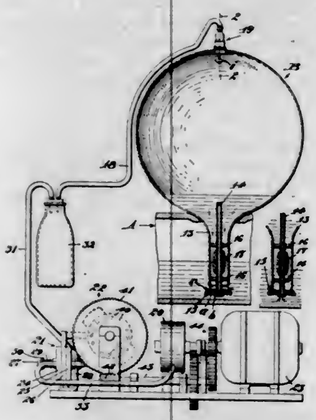
operating said control valve by one of the fingers of the operator when said device is held in the hand as a writing instrument.

1,782,682. DISAZO DYE CONTAINING A DIPHENYLUREA NUCLEUS. LEON W. GELLER, Hamburg, N. Y., assignor to National Aniline & Chemical Co. Inc., New York, N. Y., a Corporation of New York. Filed Apr. 28, 1924. Serial No. 709,684. 13 Claims. (Cl. 260—85.)



1. As a new disazo dyestuff, the product consisting of a mixture of the one asymmetrical and the two symmetrical disazo compounds containing a diphenylurea nucleus obtained by subjecting a mixture of 4-hydroxy-4'-aminoazobenzene-5-carboxylic acid and 2.2'-dimethyl-5-alkoxy-4-aminoazobenzene-5'-sulfonic acid in the presence of sodium carbonate to the action of phosgene, said dyestuffs, in the dried and pulverized state and in the shape of their sodium salt, being reddish brown powders soluble in water with a yellow color and soluble in concentrated sulfuric acid with a yellow red color; yielding upon reduction with stannous chloride and hydrochloric acid, 2-hydroxy-5-amino-benzoic acid, 4-methyl-3-amino-benzene sulfonic acid, and 4.4'-diaminodiphenylurea bodies which upon hydrolysis decompose into amino bodies of the benzene series and carbonic acid; and dyeing unmordanted cotton reddish yellow to greenish yellow shades which are capable of being discharged to a white with discharging agents.

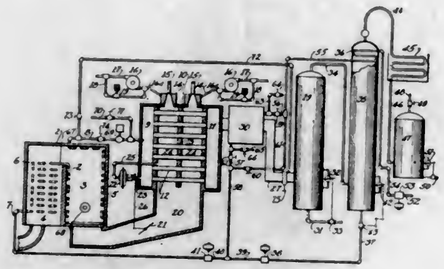
1,782,683. GAS BURNER. JOSEPH L. GIACOMINO, New Orleans, La., assignor of one hundred per cent to Carl W. Gibson, Parish of Orleans, La. Filed Nov. 22, 1928. Serial No. 321,120. 8 Claims. (Cl. 158—99.)



1. In a gas burner, a refractory baffle formed with a plurality of angular ports, a burner head having lateral branches provided with gas discharge means located substantially centrally within the ports and having angularly disposed orificed faces to project a gas jet into contact with the walls of said ports, and means for supplying air to said discharge means.

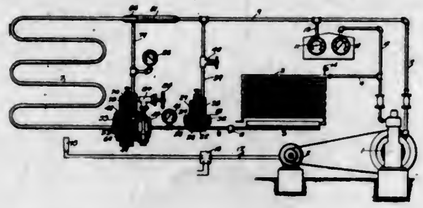
1,782,684. WASHING MACHINE. GEORGE M. GIBSON, Pella, Iowa, assignor to Woodrow Washing Machine Company, Pella, Iowa, a Corporation of Iowa. Filed Aug. 6, 1928. Serial No. 297,825. 13 Claims. (Cl. 259—101.)

1. A washing machine comprising a tub, an agitator adapted to oscillate above a vertical axis mounted eccentrically within said tub, said agitator comprising a hub portion having radial upright blades, one of said blades being longer than the others, and means for imparting oscillatory rotary movement to said agitator.



1,782,685. BEVERAGE-DISPLAY FOUNTAIN. HERBERT L. GLAZE, South Pasadena, and FORREST G. STANFORD, Los Angeles, Calif.; said Glaze assignor to George H. Hyland, Los Angeles, Calif. Filed Dec. 3, 1927. Serial No. 237,415. 14 Claims. (Cl. 40—126.)

1. In a liquid display apparatus, a reservoir, a display container in communication with said reservoir, means for delivering liquid from said reservoir to said container by suction induced in the latter, and automatic means for controlling the intake of liquid to the container operable to effect discharge of liquid therefrom.

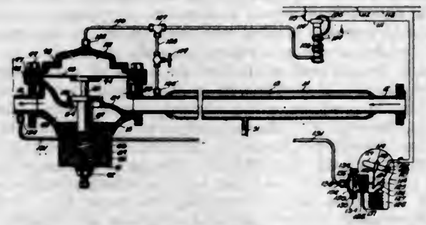


1,782,686. PROCESS FOR CRACKING HYDROCARBON OIL. JOSEPH G. HAWTHORNE, Kansas City, Mo., assignor to Walter Martin Cross. Filed July 9, 1927. Serial No. 204,599. 5 Claims. (Cl. 196—60.)

1. A method of cracking hydrocarbon material which consists in raising the oil to a conversion and vaporizing temperature in a primary heating zone, reheating and superheating the vaporized products under reduced pressure in conduits in a separate zone, cooling the vapors to a predetermined temperature selected to effect separation of the heavier liquid and lighter vapor constituents in a separating stage, subjecting the vapor constituents to

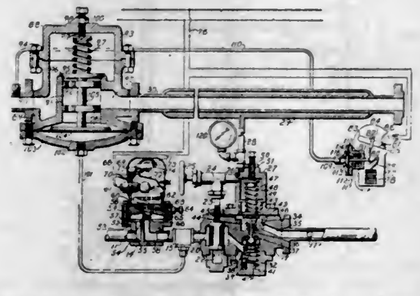
a reflux condensing action, finally condensing vapors not condensed during said reflux condensing step and diverting the heavier liquid divided out in the separating stage from the system, maintaining a balanced pressure between the hydrocarbon vapors within the conduits in the superheating zone and the combustion gases in the enclosure surrounding said conduits.

1,782,687. REFRIGERATING APPARATUS. JOHN F. HOFFMAN, Omaha, Nebr., assignor to Baker Ice Machine Co. Inc., Omaha, Nebr., a Corporation of Nebraska. Filed Aug. 1, 1927. Serial No. 209,690. 4 Claims. (Cl. 62—115.)



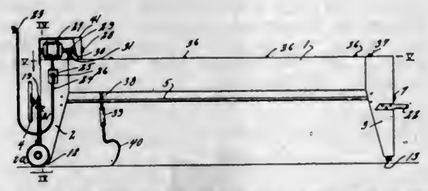
1. Refrigerating apparatus, including a compressor, a cooling coil, supply and return lines connecting the compressor with the coil, and synchronizing means including separate valves in the supply line, respectively responsive to temperature and pressure in the return line controlling flow through the supply line.

4. Refrigerating apparatus including a compressor, a cooling coil, a valve housing having separate chambers, one communicating with the return line, the other having a valve seat and communicating with the compressor and coil at opposite sides of said seat, a diaphragm separating said chambers and cooperative with said seat to close the line of communication from the compressor to the coil, and a spring yieldingly urging the diaphragm to said seat, the diaphragm being responsive to change in pressure in the chamber communicating with the return line to open and close the valve.



1,782,688. REFRIGERATING SYSTEM. JOHN F. HOFFMAN, Omaha, Nebr., assignor to Baker Ice Machine Co. Inc., Omaha, Nebr., a Corporation of Nebraska. Filed Aug. 1, 1927. Serial No. 209,691. 12 Claims. (Cl. 62—3.)

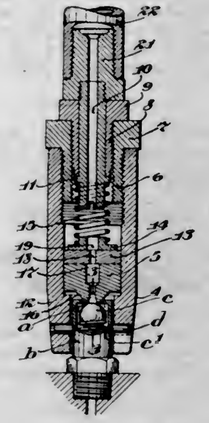
1. In a refrigerating system, a plurality of independent cooling units, each adapted for serving a separate compartment, single supply and return lines having branches to said units, means controlling flow of refrigerant through



the units, including thermostats respectively operable at different temperatures, and means responsive to pressure in the return line controlling some of said thermostats.

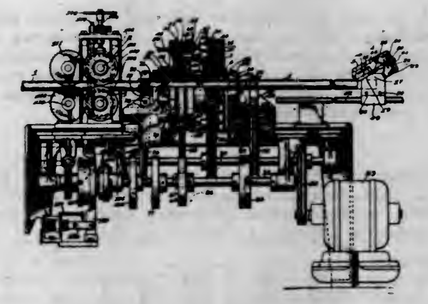
1,782,689. REFRIGERATING APPARATUS. JOHN F. HOFFMAN, Omaha, Nebr., assignor to Baker Ice Machine Co. Inc., Omaha, Nebr., a Corporation of Nebraska. Filed Apr. 16, 1928. Serial No. 270,252. 11 Claims. (Cl. 62—3.)

1. In a refrigerating system including a plurality of coils, a supply line, and a return line, an inlet valve and an outlet valve serving each coil, and means operable by pressure in the supply end of the coil controlling the outlet valve.



1,782,690. AGRICULTURAL TOOL. FRANKLIN H. KERR, Toledo, Ohio. Filed Apr. 28, 1927. Serial No. 187,210. 8 Claims. (Cl. 97—46.)

1. A pair of supports, a connecting frame therebetween, a tool depending from the frame, and means for traversing the tool between the supports including an endless belt and vertical axis wheels for the belt.



1,782,691. GREASE-GUN COUPLING HEAD. STEVEN J. KRANNAK, Minneapolis, Minn. Filed Aug. 3, 1929. Serial No. 383,262. 1 Claim. (Cl. 285—176.)

A coupling head for grease delivery systems comprising a cylindrical casing having means for interlocking engagement with a receiving nipple equipped with outstanding lugs, a plunger-acting nozzle working in said casing and provided with a substantially conical axially perforated seating surface adapted to enter the receiving port of the grease-receiving nipple, a centrally perforated pliable gasket seated against the inner face of said nozzle and forming a tight joint with the bore of said casing, a sleeve structure applied in the receiving end of said casing, a

grease delivery tube swiveled in said sleeve structure and having an annular shoulder forming a tight joint therewith, and a spring applied to the inner end of said grease delivery tube and reacting against and pressing said nozzle yieldingly outward.

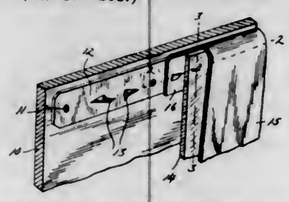
1,782,692. CUTTING MACHINE. JOHN F. LAWSON, Brooklyn, N. Y., assignor, by mesne assignments, to Steel and Tubes, Inc., a Corporation of Ohio. Filed June 13, 1927. Serial No. 198,570. 25 Claims. (Cl. 82—20.)

1. In machine of the kind indicated, the combination of a cutting tool, a cam shaft to direct the operations of the machine, constantly operating power means for driving the cam shaft and also for driving the cutting tool to make the cut, and means to couple the cam shaft to said power means to initiate the cutting of the work and disconnect the cam shaft from the power means at the completion of each cut.

21. In a machine of the kind indicated, a rotating cutter head, a tool thereon movable toward and from the axis of rotation of the cutter head, means to move the tool on the head to make the cuts while the head is rotating, two work clamps close to the tool, one at each side of the tool, means for feeding the work to cutting position, and a control element to direct the action of the tool-moving means, and to direct the action of the clamps and the feeding of the work by said feeding means.

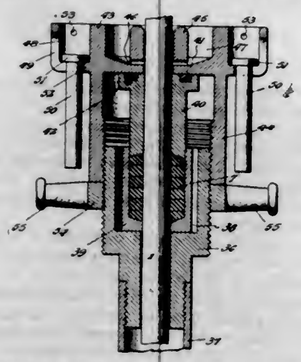
1,782,693. SULPHUR AND RESIN COMPOUND. STUART P. MILLER, Philadelphia, Pa., assignor to The Barrett Company, a Corporation of New Jersey. Filed Dec. 2, 1924. Serial No. 753,476. 7 Claims. (Cl. 106—23.)

1. A composition of matter for compounding rubber which comprises paracoumaron resin having a melting point between 78° C. and 95° C. and sulphur.



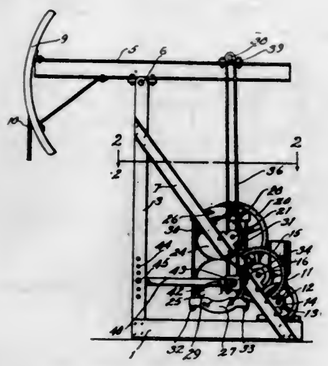
4. The process of rubber compounding which comprises melting paracoumaron resin adding sulphur thereto and mixing the resulting solution with rubber.

1,782,694. KEYBOARD CAM ROLL. ANTON H. NARROW, Memphis, Tenn. Filed July 19, 1929. Serial No. 379,448. 4 Claims. (Cl. 199—25.)



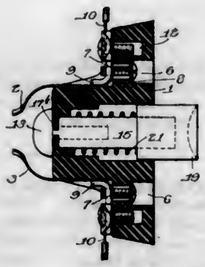
1. In a type-setting machine, a series of cams, a keyboard camroll cooperating therewith, said camroll comprising a non-circular shaft, and a series of rings of non-metallic material fitting on said shaft and located to contact with said cams.

1,782,695. FASTENER FOR TRIMMING MATERIAL. ROBERT M. PREZ, Lansing, Mich., assignor to Reo Motor Car Company, Lansing, Mich., a Corporation of Michigan. Filed Feb. 28, 1927. Serial No. 171,708. 10 Claims. (Cl. 45—138.)



7. In a fastener of the class described, a trimming panel comprising a backing and trimming material covering the same and a fastener supported adjacent to the backing and provided with means adapted to pass through and clinch the trimming material upon the forceful engagement of the panel and fastener.

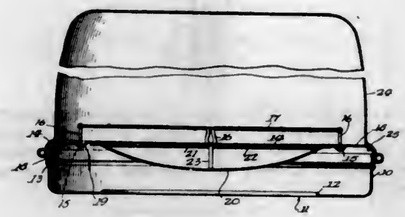
1,782,696. STUFFING BOX. WILLIAM H. PUCKETT, Tulsa, Okla., assignor to Peerless Supply Company, Tulsa, Okla., a Corporation of Oklahoma. Filed Jan. 26, 1927. Serial No. 163,827. 1 Claim. (Cl. 286—16.)



In a stuffing box for polish rods, a box having a chamber in its upper portion and a depending screw threaded portion for mounting the box upon a support, a sleeve adjustably threaded upon the exterior of the box and formed with a transverse head having an enlarged axial bore with a surrounding hub and radial oil passages therethrough, a single packing retainer mounted in the chamber and being of less diameter than the chamber so as to permit free lateral sliding of the head of the retainer upon the base of the chamber, a plurality of packing rings within the retainer, and an elongated gland of less transverse diameter than the box and mounted in contact with the rod throughout its length for lateral movement therewith, said gland extending from the packing rings within the retainer to the head and being provided at said head with a packing slidably engaging the inner face of the head, whereby the retainer and its gland are slidable as a packing unit laterally of the head and box chamber.

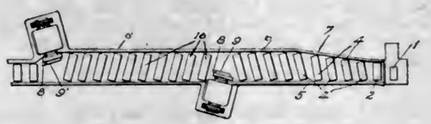
1,782,697. MECHANICAL MOVEMENT. WILLIAM F. RESCHKE, Wichita, Kans. Filed Aug. 19, 1929. Serial No. 386,808. 10 Claims. (Cl. 74—14.)

1. A mechanical movement comprising two meshing eccentric gears, one of which is a driving gear and the other a driven gear, a yoke in which the gears are loosely mounted, a link connected to the eccentric of the driven gear and adjustable anchoring means for the opposite end of the link.



1,782,698. SWITCH FOR DEVICES FOR SUPPLYING PAPER TO PRINTING PRESSES. JAMES E. RUST, Park Ridge, Ill., assignor to Gustavus A. E. Kohler, Chicago, Ill. Filed July 28, 1927. Serial No. 209,030. 5 Claims. (Cl. 200—159.)

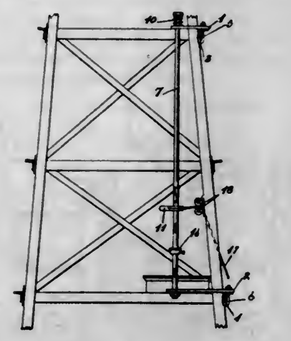
5. A device of the kind described comprising a base having an opening extending therethrough, two separated



shoulders on the interior of said base at different points along said opening, a push rod in said opening, a spring surrounding said push rod and engaging one of said shoulders, a push button larger in diameter than said rod and connected with the end thereof, said push button adapted to engage the other shoulder when pushed inwardly to limit the inward movement of the rod in one direction, a contact connected with the end of said push rod and located outside of the base and engaging the same when the push button is released to limit the movement of the rod in the other direction, and separated spring conductors adapted to be engaged by said contact when it is moved to a predetermined position.

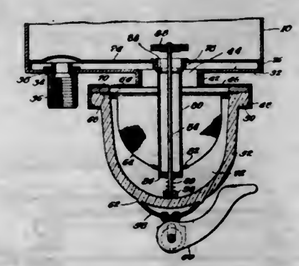
1,782,699. HEAT DISTRIBUTOR OR PLATE. STANLEY SAUVAGE, Chicago, Ill. Filed Aug. 26, 1929. Serial No. 388,351. 3 Claims. (Cl. 126—214.)

1. A heat distributor plate embodying a body portion having a depending peripheral flange and provided with apertures therethrough adjacent its periphery and inside of the flange, said body portion having a groove extending therearound adjacent and encompassed by the said openings, and a deflector depending from the lower face of said body portion, the periphery of the deflector being disposed adjacent the inner wall of said groove, there being openings through the said inner wall of the groove and the adjacent portion only of the bottom of the groove.



1,782,700. METHOD AND APPARATUS FOR THE MANUFACTURE AND CONDITIONING OF SKELP BAR. JOHN W. SHEPERDSON, Worcester, Mass., assignor to Morgan Construction Company, Worcester, Mass., a Corporation of Massachusetts. Filed Aug. 22, 1927. Serial No. 214,703. 21 Claims. (Cl. 153—2.)

2. In the manufacture of skelp bar, the improvement which consists in imparting longitudinal movement to successively cut-off pieces of the hot rolled product of a skelp bar mill, and during said movement cutting off first one corner and then the other corner of the front end of each piece.

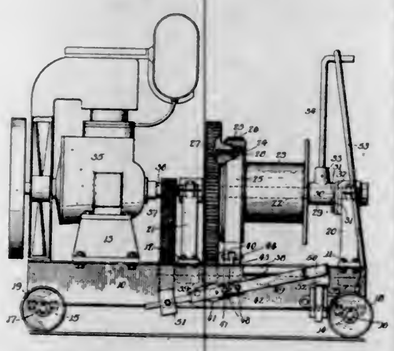


10. In apparatus of the class described, the combination with means for continuing the forward longitudinal movement of successively cut-off pieces of the hot rolled product of a skelp bar mill, of a set of skewed cutting rollers on either side of the path of said pieces, for operation successively on the opposite front corners of each piece, to remove said corners and thereby "point" the front end of the piece.

1,782,701. DERRICK SAFETY APPLIANCE. RUSSELL F. TUCK, Long Beach, Calif. Filed Apr. 30, 1928. Serial No. 274,109. 8 Claims. (Cl. 304—1.)

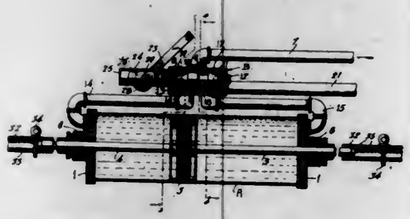
1. A safety derrick appliance comprising a post, means slidably mounting said post on the derrick, yieldable means against which said post rests, and a rider slidably mounted on the post to which the derrick man is secured, and means on the rider adapted to grip said post.

1,782,702. LIQUID-HANDLING DEVICE. LEONARD H. WHEELER, Chicago, Ill., assignor, by mesne assignments, to Stewart-Warner Corporation, Chicago, Ill., a Corporation of Virginia. Filed Apr. 1, 1926. Serial No. 99,054. 18 Claims. (Cl. 210—166.)



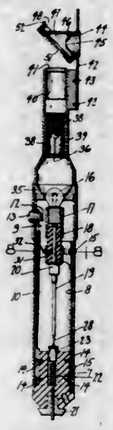
1. The combination with a vacuum fuel feed tank having a bottom and an opening therein, of a false bottom spaced above said bottom, an outlet tube carried by said false bottom and projecting downwardly through said opening, an annular filter element telescoped over said tube, an upwardly opening cup forming a closed space below said filter element, a downwardly opening cup fastened to said bottom and encircling said opening, detachable means for clamping said cups together to form a closed space above said filter element in open communication with the space between said bottoms, an outlet connection for the space between said bottoms, and a check valve in said tube unseated by clamping said cup in place.

1,782,703. PORTABLE HOISTING MACHINE. ALEXANDER H. WILSON, Oak Park, Ill., assignor to Thomas Elevator Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 18, 1927. Serial No. 234,179. 1 Claim. (Cl. 254—166.)



In a portable hoisting machine, the combination of a platform mounted on wheels, a pair of spaced frames

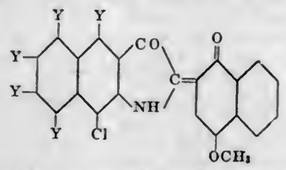
mounted on and crosswise of said platform, a drum shaft journaled in and between said frames in the median vertical longitudinal plane of said platform, a gear keyed to said drum shaft, a hoisting drum loose on said shaft, a motor mounted on said platform in rear of said frames



with its shaft axially alined with said drum shaft, a transmission shaft journaled in said platform beneath said drum, a drive from said motor shaft to said transmission shaft, a pinion on said transmission shaft meshing with said gear, cooperating male and female clutch members on said gear and drum respectively, and manually operable means for engaging said clutch members.

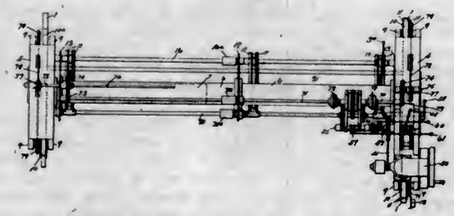
1,782,704. OIL-MEASURING APPARATUS. JOSEPH W. WOODRUFF, Elizabeth, N. J. Filed Mar. 27, 1928. Serial No. 265,129. 3 Claims. (Cl. 221—103.)

1. Fluid dispensing apparatus comprising a measuring cylinder, a piston therein, a supply pipe for material under pressure to be measured, a valve mechanism including a casing having an inlet connected to said supply pipe and communicating with a valve cylinder having an open end and four ports leading from said valve cylinder, means for establishing communication between each of two of said ports and one end of said measuring cylinder, a reciprocable piston valve in said valve cylinder having two spaced stop portions with a reduced neck therebetween and another reduced portion at one end of one stop portion for simultaneously controlling communication between said inlet and one of the first-mentioned two ports and between the other of the first-mentioned two ports and one of the otner two ports, packing means at the end of said valve beyond the last-mentioned reduced portion, and means connected to said end of the valve for reciprocating the valve.



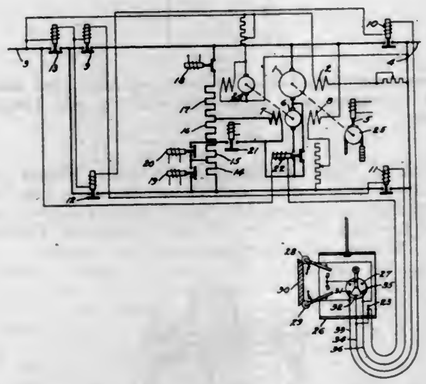
1,782,705. DIAGNOSTIC INSTRUMENT. CHARLES E. H. ARMBRUSTER, Denver, Colo. Filed Feb. 1, 1927. Serial No. 165,140. 9 Claims. (Cl. 88—20.)

1. In a diagnostic instrument of the character described, a casing, a diaphragm in the casing, composed of spaced disks having central apertures, and a light-condensing sphere clamped between the disks and in the apertures thereof.



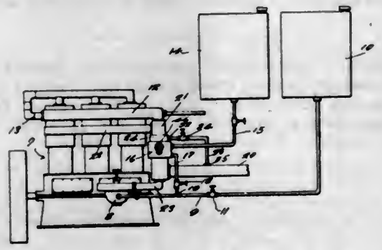
1,782,706. NEW INDIGOID DYESTUFFS. WILHELM BAUER, Wiesdorf-on-the-Rhine, and WILHELM NEELMEIER and THEODOR NOCKEN, Leverkusen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed May 9, 1927, Serial No. 190,132, and in Germany June 11, 1926. 4 Claims. (Cl. 260—49.)

1. As new products indigoid dyestuffs of the general formula :—



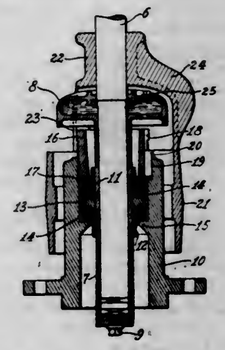
where Y stands for hydrogen or any other substituent, which dyestuffs are generally dark bluish-green crystalline powders soluble with difficulty in cold concentrated sulfuric acid with a green coloration, dyeing the textile fibre from a reddish-brown hydrosulfite vat fast green shades, and which may be obtained by condensing the 4-methoxy-1-naphthol with a reactive α-derivative of an 1-chloro-2.3-naphthisatin.

1,782,707. ROAD-BUILDING APPARATUS. WILLIAM BAYLEY, Springfield, Ohio. Filed May 11, 1925. Serial No. 29,514. 75 Claims. (Cl. 94—48.)



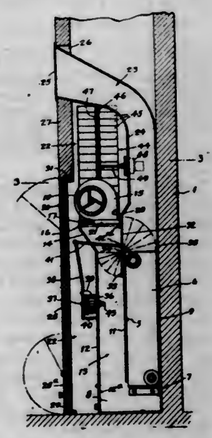
4. In a road making machine of the character described, a traveling main frame adapted to span a deposit of concrete or the like, and a strike off beam capable of intermittent downward and forward thrust movement carried by the main frame extending transversely across the deposit of material and inclined upwardly and forwardly therefrom, throughout the forward portion of the beam, a movable support for the beam guiding the beam into engagement with the road surface at an angle of approximately 45 degrees, and toggle link means for actuating the beam, the rearward position of the beam being extended in approximate parallel relation with the plane of travel of the machine.

1,782,708. ELEVATOR-CONTROL SYSTEM. EDGAR M. BOUTON, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 28, 1925, Serial No. 26,343. Renewed Aug. 12, 1927. 17 Claims. (Cl. 172—152.)



1. The combination with an elevator and a hoisting motor therefor, of means for controlling the speed of said motor, and an auxiliary source of energy for modifying the effect of said controlling means, manually operable means for controlling the motor circuit, and means controlled by the movement of the elevator for controlling said auxiliary source of energy.

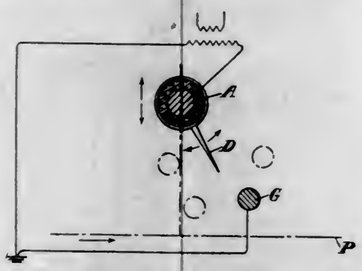
1,782,709. CHARGE-TREATING DEVICE FOR INTERNAL-COMBUSTION ENGINES. ADOLF BREITLING, Tampico, Mexico, assignor of eighteen per cent to Guillermo Leon Zarate and seven per cent to John E. Palmer. Filed June 6, 1929. Serial No. 368,867. 2 Claims. (Cl. 123—127.)



1. In combination with an internal combustion engine adapted for using light hydrocarbon fuels, and having a carbureter and a water cooled exhaust manifold, a selectively controlled fuel line leading to the carbureter for conveying light-carbon fuels thereto, a closed drum for receiving heavy hydro-carbon fuels supported on the exhaust pipe having an inlet conductor connected therewith for conducting an independent and heavier fuel than the first mentioned light fuel, and further having a selectively controlled outlet conductor leading from said drum to the carbureter and selectively controlled means for conducting water from the exhaust manifold for cooling said heavier fuels in the drum in the event the temperature reaches a point beyond that required for efficient operation of the internal combustion engine.

1,782,710. BEARING CONSTRUCTION. PETER C. BRUCKMANN, St. Louis, Mo., assignor, by mesne assignments, to Vorclone Company, a Corporation of Wisconsin. Filed Feb. 25, 1926. Serial No. 90,462. 1 Claim. (Cl. 308—145.)

In a device of the character described, the combination of a vertical shaft, a bearing enclosing the lower end of the shaft and having an oil reservoir vertically above the end of the shaft, a pulley encircling the bearing below said reservoir, arms extending from the pulley across said reservoir and secured to said shaft above said reservoir, and air propelling fins on said arms, whereby air will be caused to circulate past the reservoir.

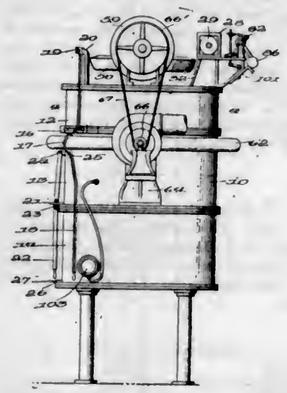


1,782,711. CONCEALED UNIT FOR HEATING AND VENTILATING. MICHAEL J. CALLAHAN, New York, N. Y. Filed Feb. 20, 1925. Serial No. 10,715. 30 Claims. (Cl. 257—137.)

8. A heating and ventilating unit having, in combination, a casing having a chamber at its bottom containing

a heating element, and a discharge chamber at the top, and a motor and blower between said element and discharge chamber, a single pivotally mounted mixing damper positioned to swing so as to control the exit of the heating chamber and the entrance of the discharge chamber, and means for actuating the damper to shift the same between extremes to any one of a plurality of positions, whereby air of predetermined temperature may be delivered from the unit.

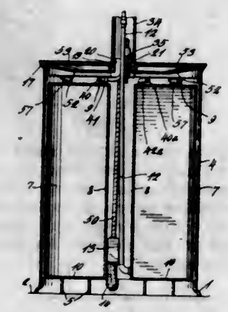
1,782,712. METHOD OF CONTROLLING ELECTROSTATIC CHARGES ON MOVING SURFACES. WILLIAM HENRY CHAPMAN, Portland, Me., assignor to Chapman Electric Neutralizer Company, Portland, Me., a Corporation of Maine. Filed Jan. 11, 1930. Serial No. 420,058. 6 Claims. (Cl. 175—264.)



1. That method of attaining predetermined degrees and polarities in the neutralization of electric charges on moving surfaces which consists in directing neutralizing discharges at a predetermined angle to the surface in the direction of its movement and in maintaining a ground laid transversely on one side or the other of the line of discharge to effect the desired polarity and at a predetermined distance from the surface to control the degree.

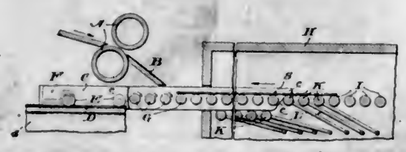
1,782,713. VULCANIZATION OF RUBBER. HARRY O. CHUTE, New York, N. Y. Original application filed Dec. 21, 1922, Serial No. 608,355. Divided and this application filed May 29, 1926. Serial No. 112,693. 11 Claims. (18—53.)

1. In the vulcanization of rubber the process which comprises vulcanizing such rubber in the presence of the reaction product of a cyanamid, formaldehyde and an amine.



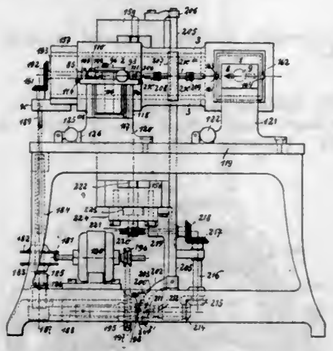
1,782,714. APPARATUS FOR TREATING OLEAGINOUS MATERIAL. JOSEPH DAVIDSON, Atlanta, Ga., assignor to Davidson-Kennedy Company, Atlanta, Ga., a Corporation of Georgia. Original application filed Apr. 10, 1928, Serial No. 268,917. Divided and this application filed Apr. 15, 1929. Serial No. 355,304. 9 Claims. (Cl. 87—6.)

1. A cooking apparatus for oleaginous material comprising a receptacle separated into a measuring compartment, a cooking compartment, and a receiving compartment, said compartments having communicating openings, manually operable means for controlling the supply through said openings, a supply trough positioned above said measuring compartment and having a passage communicating therewith, a slidable gate valve for controlling the supply through said passage, means normally maintaining said gate valve in its open position, a paddle extending through the top of said measuring kettle and operatively connected to said gate valve to automatically close the same when the material reaches a predetermined depth in the measuring kettle, a tubular shaft extending axially through said kettle, stirrer blades clamped to said shaft adjacent the bottom of the measuring and cooking compartments, means delivering steam through said tubular shaft to the bottom of said measuring and cooking compartments, means associated with the cooking



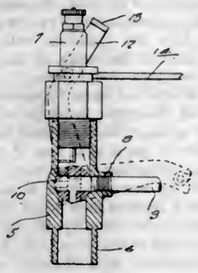
compartment for drawing off the excess steam and moisture therefrom, and means for revolving said tubular shaft.

1,782,715. OIL-DISPENSING DEVICE. HAROLD G. DAVIS, Denver, Colo., assignor to The Davis and Son Manufacturing Company, Denver, Colo., a Corporation of Colorado. Filed Apr. 20, 1928. Serial No. 271,503. 11 Claims. (Cl. 221—74.)



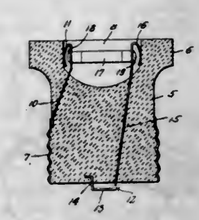
1. An oil dispensing device having a hollow base, a plurality of oil storage tanks located in the base, some of said tanks having their adjacent surfaces spaced apart so as to form a chamber, oil discharge pipes in said chamber, said pipes being connected with the lower ends of said tanks and means for heating said chamber so as to maintain the oil in flowable condition during cold weather.

1,782,716. SHEET-GLASS-HANDLING MECHANISM. VERNON M. DORSEY, Chevy Chase, Md., assignor to The American Bicheroux Company, Wilmington, Del., a Corporation of Delaware. Filed Apr. 13, 1929. Serial No. 354,880. 6 Claims. (Cl. 198—127.)



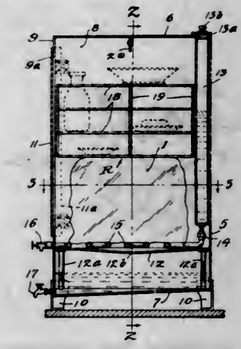
1. In a device of the character described, the combination with a travelling carriage having a glass receiving and feeding bed, of a lehr conveyor comprising glass feeding devices mounted for movement out of and into the path of the carriage, and means for moving the devices successively substantially into line with the glass receiving and feeding surface of the carriage as the latter recedes.

1,782,717. MEANS FOR AUTOMATICALLY COPYING PICTURES AND MAKING PRINTING PLATES FOR PRINTING PICTURES, ETC. HEINRICH DREWELL, Berlin-Charlottenburg, Germany. Filed Sept. 4, 1928, Serial No. 303,765, and in Germany Apr. 3, 1926. 11 Claims. (Cl. 178—11.)



1. In means for automatically making copies from an original picture, the combination of light-controlled electric means adapted to be controlled by the light acting on them, as oscillating string carrying a printing member adapted to make impressions of different size on a printing surface the intensity of its oscillations being controlled by said light-controlled electric means, and means for bringing in succession all the points of an original picture one after another into position to control the light acting on said light-controlled electric means and for simultaneously presenting corresponding points of a printing surface to said oscillating member to receive impressions therefrom.

1,782,718. AIR-COMPRESSING COUPLING FOR ENGINE CYLINDERS. JOHN EDGREN, Thayne, Wyo. Filed June 27, 1928. Serial No. 288,741. 3 Claims. (Cl. 123—198.)

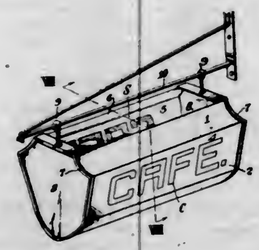


1. An attachment for engine cylinders comprising a hollow body having a threaded nipple formed on one end adapted for threaded engagement with the spark plug opening of the cylinder and having its opposite end arranged for threadably receiving the spark plug whereby to provide communication between the cylinder and the spark plug through the body, a feed pipe extending laterally from one side of the body, and a valve operatively arranged in the body and adapted for selectively controlling communication with the cylinder of either the spark plug or the feed pipe.

1,782,719. FUSE PLUG. EDWARD BERGER EKSTRAND, West Somerville, Mass. Filed Sept. 16, 1929. Serial No. 392,850. 2 Claims. (Cl. 200—130.)

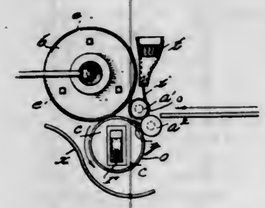
1. A fuse plug having a recessed cylindrical body, a metallic sleeve disposed about said body, said sleeve being screw threaded, a pair of spring contact members imbedded within said body, said contact members having one end thereof extending into the recess, one of said contact members having an intermediate portion thereof extending exteriorly of the body at a point remote from the recess, and the ends of said contact members within said recess being provided with oppositely disposed pockets, and a fuse in said recess, the ends of said fuse being received in the pockets of said contact members.

1,782,720. REFRIGERATOR. RALPH E. FRANKLIN, Minneapolis, Minn., assignor of one-half to Tilliferd P. Knutson, Minneapolis, Minn. Filed Jan. 23, 1928. Serial No. 248,698. 2 Claims. (Cl. 62—43.)



1. In refrigerator structure, a box-like casing having vertical sides, a top and a door in one of said sides, a vertically disposed water reservoir of narrow cross section extending into said casing and supported from the top thereof disposed substantially flush against one side of said casing, a removable horizontal support mounted in the bottom of said casing, a flat coil upon said support, said coil being connected with said water reservoir and being adapted to support a chunk of ice and a food supporting rack telescoped within said casing and adapted to be supported upon a chunk of ice, said rack having vertical sides adapted to slidably engage the vertical sides of said casing and the inner vertical side of said water reservoir.

1,782,721. ADVERTISING OR LIKE SIGN OR DEVICE. GENNADY FRENKEL, Kingston-on-Thames, England. Filed Nov. 19, 1928. Serial No. 320,484, and in Great Britain May 14, 1928. 10 Claims. (Cl. 40—130.)

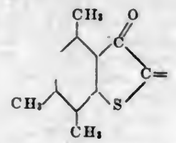


9. An advertising or like sign adapted to be illuminated by daylight, comprising a glass tube including a translucent top wall and side walls, said side walls being

converted into a mirror for internal reflection and having translucent portions carrying advertising characters

whereby advertisements on the side walls may be exhibited at one and the same time in opposite directions by illumination by daylight entering through the top wall.

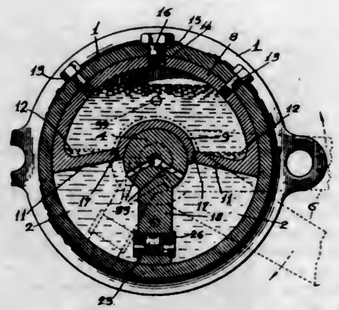
1,782,722. MACHINE FOR IRONING FURS. FROMMER GÉZA, Ujpest, Hungary, assignor to Messrs. Diamant Samu És Fiai, Budapest, Hungary. Filed Jan. 17, 1929. Serial No. 333,213, and in Hungary Jan. 23, 1928. 4 Claims. (Cl. 149—24.)



3. A machine for ironing furs, comprising an ironing roller, means for heating said roller, parallel ribs on said ironing roller, a pressure roller, means for resiliently pressing said pressure roller against said ironing roller, a pair of feed rollers arranged adjacent the ironing roller and the pressure roller, the upper of said feed rollers being covered with water absorbing substance, a container for water mounted above the feed rollers, an opening in the bottom of said container, water-absorbing means depending from said opening for conducting water from the container to the upper feed roller, and a guide plate for returning the ironed fur, said guide plate being arranged under the pressure roller.

1,782,723. MANUFACTURE OF UREA. HARRY C. HETHERINGTON, Washington, D. C., and HERBERT J. KRASE, Clarendon, Va., assignors to Arthur B. Lamb, Trustee. Filed Mar. 2, 1926. Serial No. 91,831. 3 Claims. (Cl. 260—125.)

1. The method of continuously producing urea by heating ammonia and carbon dioxide under pressure, including separating from each other the ammonia and carbon dioxide unconverted to urea, and returning them separately to the urea-forming system.

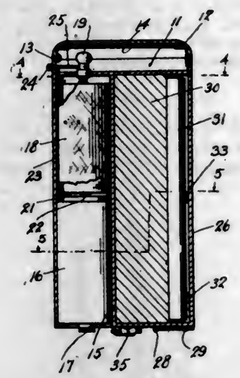


1,782,724. TRIMETHYLTHIONAPHTHENE VAT DYESTUFFS. ERWIN HOFFA and HANS HEYNA, Hochst-on-the-Main, Germany, assignors to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed Mar. 30, 1928, Serial No. 266,106, and in Germany Apr. 11, 1927. 5 Claims. (Cl. 260—53.)

1. As new products, vat dyestuffs containing the following atomic grouping:

the said dyestuffs yielding dyeings of excellent fastness properties.

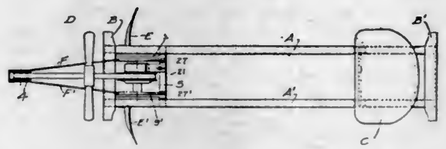
1,782,725. SHOCK ABSORBER. ULYSSES A. INMAN, Long Beach, Calif. Filed Aug. 17, 1929. Serial No. 386,704. 7 Claims. (Cl. 188—89.)



1. A shock absorber comprising a body adapted for attachment upon the chassis of an automobile and having an oil chamber therein; a shaft mounted upon the body and extending into the chamber, said shaft being provided with an actuating arm adapted for attachment to the automobile at a point movable relative to the chassis when the springs of the automobile are flexed; a reservoir member mounted within the upper portion of the chamber above the shaft and having a bearing portion engaging the shaft, said member having restricted passages communicating with the chamber upon opposite sides of the shaft; a vane carried by the shaft and extending downwardly into the chamber, said vane forming a close sliding fit against the walls of the chamber and dividing said chamber into compartments; a balanced check valve mounted within the vane to normally permit a restricted flow of oil therepast in either direction when the vane is moved by a slight movement of the arm and shaft, and being movable to check said flow if the vane is moved rapidly in either direction; auxiliary passages formed through the shaft to communicate between the compartments and permit a limited flow of oil from one compartment to the other independently of the check valve; an oiling channel formed within the body around the shaft; and passages connecting said channel with the chamber and with the reservoir whereby oil may be circulated through said channel to lubricate the shaft.

1,782,726. VANITY CASE. HENRY B. IVEY, Goldsboro, N. C. Filed Feb. 13, 1929. Serial No. 339,697. 1 Claim. (Cl. 206—38.)

A special article carrier of the character described comprising a cylindrical casing having an open side, said casing closed at its opposite end, a cylinder extending longitudinally through the casing adjacent one side thereof adapted to contain a storage battery, a hinged



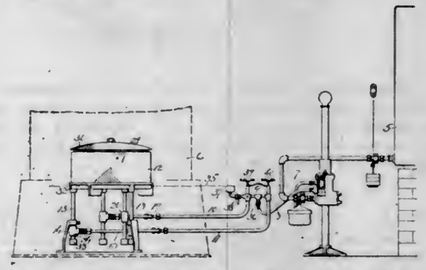
closure for the opening mounted on the casing, a cigarette carrier mounted in the casing and comprising a body portion which is co-extensive with the interior of the casing and provided with a longitudinally extending recess in one side for the reception of the cylinder and having parallel vertical channels in its periphery at a point substantially diametrically opposite from the recess and communicating with the opening in the side of the casing, said body portion being further provided, at its lower side, with a series of sockets communicating with the adjacent ends of the channels for the reception of the ends of the cigarettes and an arcuate resilient retaining arm mounted on the body portion and extending transversely across the channels intermediate their ends for retaining the cigarettes therein.

1,782,727. BASIC NITRO DERIVATIVES OF 9 AMINOACRIDINE AND PROCESS OF PREPARING THE SAME. HEINRICH JENSCH, Hochst-on-the-Main, and OTTO EISLEB, Hofheim-on-the-Taunus, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed Jan. 6, 1928, Serial No. 245,046, and in Germany Jan. 11, 1927. 4 Claims. (Cl. 260—36.)

1. The process for preparing therapeutically active basic nitro derivatives of 9-amino-acridine, which consists in causing compounds of the formula: NH_2R wherein R stands for hydrogen or alkyl to act upon nitroacridines substituted in 9-position by halogen and substituted at another C-atom of the acridine ring by a radical containing at least one aliphatically bound N-atom.

1,782,728. EXERCISING APPARATUS. KARL KIEFER, Cincinnati, Ohio. Filed June 28, 1928. Serial No. 288,823. 3 Claims. (Cl. 272—72.)

2. In a rowing apparatus, a combination of a pair of hollow rails, a movable seat on rollers, the rollers moving within said rails and protected thereby, a pair of supports at the end of these rails and connecting them, an extending and folding arm hinged near the end of the rails so as to extend beyond the rails when in use and thereby lengthen the stroke beyond the rails and folding within the rails when not in use, an idler journaled in the said arm at the extremities thereof, a friction apparatus fastened to the frame, a flexible member associated with the friction apparatus, said member passing over the said idler, and a handle bar fixed to the end of said flexible member, means associated with the friction apparatus adapted to frictionally resist movement thereof when a pulling force is applied to said flexible member and automatically relieve the friction when the pulling force is released.

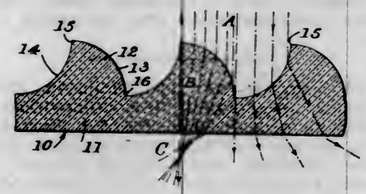


1,782,729. PROCESS OF CATALYTICALLY HYDROGENATING AROMATIC AMINO COMPOUNDS AND PRODUCTS PRODUCED THEREBY. FELIX KLINGEMANN, Mainkur, near Frankfort-on-the-Main, WILHELM LOMMEL, Wiesdorf, near Cologne-on-the-Rhine, ERNST KORTEN, Fechenheim, near Frankfort-on-the-Main, and THEODOR GOOST, Leverkusen, near Cologne-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, a Corporation of Germany. Filed Oct. 2, 1926, Serial No. 139,226, and in Germany Oct. 10, 1925. 5 Claims. (Cl. 260—127.)

1. A new process of catalytically reducing aromatic amino compounds comprising treating aromatic amino compounds of the general formula:

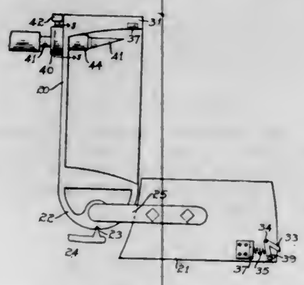
(wherein R means an aryl residue, X_1 means hydrogen, which may be replaced by alkyl, aralkyl and aryl X_2 means alkyl, which may be replaced by aralkyl, or acyl) with hydrogen under pressure in a liquid phase in the presence of a base metal hydrogenation catalyst.

1,782,730. OIL BURNER. ALBERT A. LAPOINTE, West Hartford, Conn., assignor to The Silent Glow Oil Burner Corporation, Hartford, Conn., a Corporation of Connecticut. Filed Apr. 20, 1925. Serial No. 24,348. 8 Claims. (Cl. 158—87.)



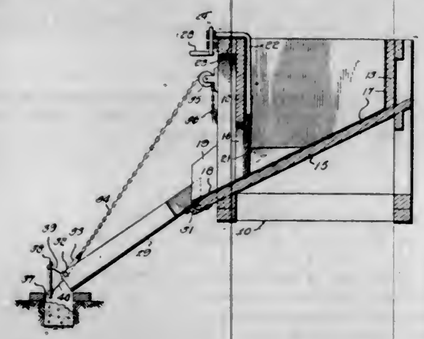
1. A burner comprising a trough with an enclosed burner flue rising therefrom and opening at its upper end, an air flue enclosed within the burner flue, a damper to regulate flow of air through said air flue, and a deflector overlying the burner flue and connected with said damper for operation thereof.

1,782,731. MILK-BOTTLE CAP. VICTOR JOSEPH LARAMIE, Detroit, Mich. Filed Mar. 6, 1929. Serial No. 344,784. 1 Claim. (Cl. 215—51.)



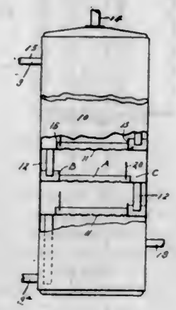
A bottle cap of the character described, comprising a thin, rigid, metallic disc adapted to seat in the mouth of a milk bottle, and an upwardly, inwardly and downwardly curved rigid metallic finger formed integral with the marginal portion of the disc and extending rearwardly thereover and terminating in spaced opposed relation to the inner portion of said disc.

1,782,732. COVER GLASS. STATES LEE LEBBY, Corning, N. Y., assignor to Corning Glass Works, Corning, N. Y., a Corporation of New York. Filed Mar. 13, 1929. Serial No. 346,755. 4 Claims. (Cl. 240—106.)



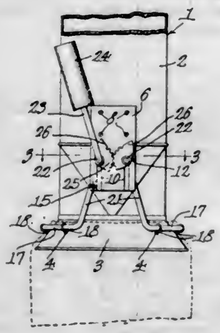
1. A cover glass comprising a transparent plate, and parallel light refracting members on said plate, each of said light refracting members being divided midway of its width into parallel light refracting surfaces of opposite curvature.

1,782,733. BAG-FILLING METHOD AND APPARATUS. SCOTT H. LILLY, Toledo, Ohio. Filed June 14, 1928. Serial No. 285,433. 18 Claims. (Cl. 226—48.)



1. The method of filling a bag, which comprises enclosing the bag in a casing, evacuating air from the casing outside of the bag and thereby expanding the bag into contact with the casing, and filling material into the expanded bag within the casing.

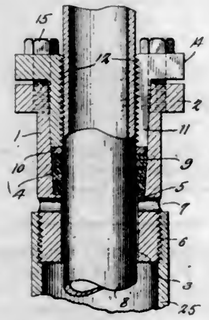
1,782,734. CONCRETE-DISTRIBUTING APPARATUS. ALEXANDER MACDOUGALD, Atlanta, Ga., assignor to MacDougald Construction Company, Atlanta, Ga., a Corporation of Georgia. Filed Nov. 28, 1927. Serial No. 236,337. 1 Claim. (Cl. 193—17.)



Apparatus of the character described comprising a hopper having an opening in the bottom of the front wall thereof and a bottom sloping downwardly toward said opening, guides mounted against the inner face of the front wall of said hopper on opposite sides of said opening, a gate vertically slidable in said guides, a vertically extending rod carried by said gate and having a transverse extension carried by its upper end and projecting across the front wall of said hopper, a lever pivotally connected intermediate its ends to the outer face of the front wall of said hopper and adapted to swing in a plane parallel to the movement of said gate, said lever being provided in one end portion thereof with a longitudinal slot slidably receiving said transverse extension..

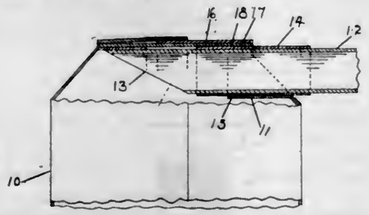
1,782,735. FLUID-TREATING APPARATUS. JOHN ALEXANDER MACKENZIE, Los Angeles, Calif. Filed Mar. 21, 1927. Serial No. 177,028. 3 Claims. (Cl. 261—113.)

1. A tower of the character described including a vertically disposed body, horizontally disposed trays in the body, two spaced upwardly extending weirs on each tray each extending completely across the tray, the partitions forming a central circulating chamber, a receiving chamber and a discharge chamber at each tray, a down flow pipe connected with each tray in communication with the discharge chamber, the trays being related so that the down flow pipes connect the discharge chambers and receiving chambers of adjacent trays, and means for circulating gas upward through the trays including a plurality of upwardly inclined tongues extending over openings in the trays, the tongues and openings being arranged in pairs with the tongues facing each other.



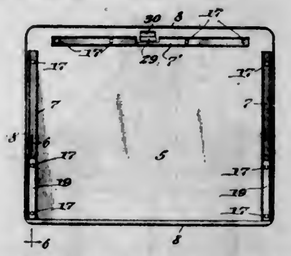
1,782,736. BAG HOLDER. DWIGHT W. MAHAFFEY, Moral, Ohio. Filed Mar. 16, 1928. Serial No. 262,115. 2 Claims. (Cl. 83—26.)

1. In a bag holding device, a spout having a downwardly flared bag receiving portion provided with aper-



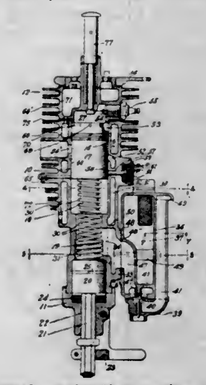
tures, and a retaining device comprising a member extending transversely to said spout, shaped to conform substantially to the contour of the adjacent part of said flared portion of said spout and having prongs arranged to extend substantially perpendicular to the surface of said flared portion of said spout when said transverse member is located adjacent thereto, and arms extending upwardly from the respective ends of said transverse member and pivotally mounted on the respective sides of said spout, said arms being so arranged with relation to said spout and said transverse member that when they are moved downwardly said transverse member will be moved toward the flared portion of said spout in substantially the direction of the length of said prongs.

1,782,737. CASING SUSPENSION HEAD. LEE H. MAHON, Norphlet, Ark. Filed Jan. 19, 1927. Serial No. 162,164. 1 Claim. (Cl. 285—22.)



A device of the class described, characterized by the provision of individually adjustable and individually removable pressure members, said device comprising a body having an internal shoulder, a packing means in the body and engaging the shoulder, the aforesaid pressure members being wedge-shaped, each pressure member operating independently of the other pressure members, the pressure members engaging the packing means and being movable longitudinally within the body, the pressure members having separate outstanding arms overhanging the outer surface of one end of the body, whereby all of the pressure members may be removed, leaving the body in ing through and engaging each of the outstanding arms of the pressure members, the fastening devices being mounted adjustably at their inner ends in said end of the body, place. and an individually operable fastening device passwhereby each pressure member may be removed independently of the others while pressure is upon said other pressure members.

1,782,738. VALVE BAG. CHESTER C. MARTIN, Luckey, Ohio, assignor, by mesne assignments, to St. Regis Paper Company, New York, N. Y., a Corporation of New York. Filed Sept. 3, 1926. Serial No. 133,336. 3 Claims. (Cl. 150—9.)

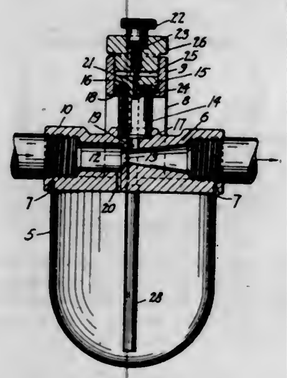


1. A bag ready for filling and having a valve opening, a valve-sealing tube open at both ends and having its inner end affixed in the valve opening and having its outer end extending outward from said opening and designed to form a sealing closure at said outer end.

1,782,739. OVEN DOOR. WALTER MOLL, Evansville, Ind., assignor to Hoosier Lamp and Stamping Corporation, Evansville, Ind. Filed June 6, 1928. Serial No. 283,418. 4 Claims. (Cl. 126—190.)

1. The combination with an oven door provided with a lining or backing, said door and backing collectively being provided with a channel located between them which extends from side to side thereof, of a removable rod lying in said channel, and a frame which carries said rod.

1,782,740. INTERNAL-COMBUSTION ENGINE. JAMES A. MOULD, Milwaukee, Wis. Original application filed Oct. 21, 1927, Serial No. 227,656. Divided and this application filed Sept. 18, 1928. Serial No. 306,770. 11 Claims. (Cl. 123—74.)



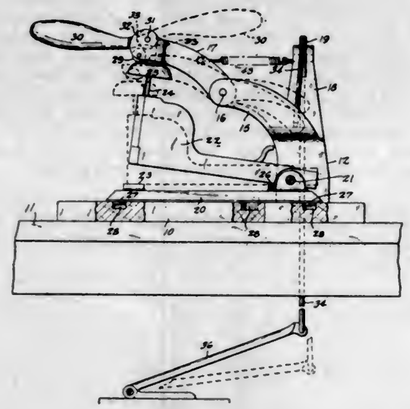
10. In an internal combustion engine, the combination with a cylinder having a combustion chamber and compression chamber and a wall provided with laterally adjacent ports communicating with the respective chambers, of a carburetion unit affording the sole means of communication between said ports and connected with said cylinder around said ports, said unit comprising a pair of passages terminating in registry with the respective ports, a carburetion chamber affording communication between said passages and provided with an air admission port immediately adjacent the point of communication aforesaid, a valve controlling flow through said air admission port, and means for supplying a hydrocarbon to said carburetion chamber.

1,782,741. LUBRICATING DEVICE FOR PNEUMATICALLY-OPERATED TOOLS. CARL A. NORGREN, Denver, Colo. Filed Aug. 2, 1927. Serial No. 210,114. 7 Claims. (Cl. 184—56.)

3. A lubricator of the character described comprising a reservoir, a head for the reservoir formed with a bored

standard and an annular screw threaded boss on the standard interiorly connected with the bore thereof, the body portion of the head having a passage adapted for connection in an air line and having a point of reduced area to produce a partial vacuum by the flow of air through the air line, and the head having furthermore, a duct connecting the passage with the reservoir above its liquid level and a second duct to connect the passage

with a siphon line of which the bore in the standard is a part, a packed sight tube between the boss and the head in connection with the second duct, a gland in the boss, having a bore connecting the interior of the boss with the sight tube, a plug in the boss, spaced from the gland, a valve on the plug, controlling the bore of the gland, and a pipe extending from the bore of the standard to the bottom portion of the reservoir.

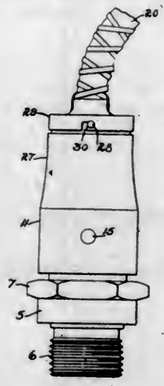


1,782,742. BODY SUSPENSION FOR BABY CARRIAGES. HARRY PERLMUTTER, Brooklyn, N. Y. Filed July 25, 1927. Serial No. 208,199. 1 Claim. (Cl. 296—35.)

In a baby carriage, a body, a running gear, a body bracket at each end of the body, a running gear bracket at each end of the running gear, a body-supporting bolt at each end of the carriage having universal pivotal relation with both brackets, being slidably engaged through one bracket, the other bracket having an aperture sperical bearing at the outer side, said bolt being engaged therethrough and having a spherical head set in the bearing, and a load-sustaining helical spring encircling the bolt under compression between one bracket and the bolt.

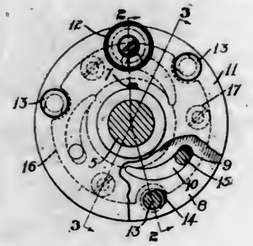
1,782,743. OPERATING DEVICE FOR STAPLING MACHINES, TAG-AFFIXING MACHINES, AND SIMILAR DEVICES. FEIDOLIN PÖLZER, Norwalk, Conn., assignor to The E. H. Hotchkiss Company, Norwalk, Conn., a Corporation of Connecticut. Filed Sept. 20, 1927. Serial No. 220,706. 5 Claims. (Cl. 74—81.)

1. In a device for operating machines having independent operating means comprising a movable hand knob forming a part of said machine, a support for the machine to be operated to which the machine may be applied and from which it may be removed as a whole, a bracket associated with said support, a lever pivoted to the bracket, a



roller carried by the lever adapted to rest on the hand knob for functioning the operating means of the machine, and means for operating the lever to operate the machine.

1,782,744. PROCESS FOR RECOVERING WASTE CLAYS. WIRT D. RIAL, Wilmington, and WHITFORD R. BARRATT, Palos Verdes Estates, Calif., assignors, by mesne assignments, to Richfield Oil Company of California, Los Angeles, Calif., a Corporation of Delaware. Filed Jan. 5, 1927. Serial No. 159,236. 4 Claims. (Cl. 252—2.)



1. A process of revivifying spent clays used in decolorizing and clarifying petroleum oils consisting in washing the spent clays with a solvent to remove petroleum oil constituents, then extracting the coloring matter from the clays with a solvent obtained from acid sludge by separating the water-soluble constituents therefrom, and then hydrating the clays thus treated.

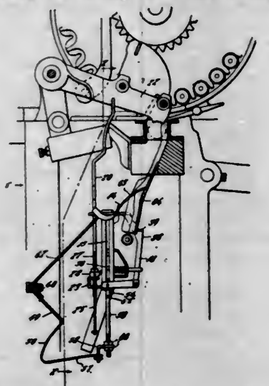
1,782,745. SHIELDED SPARK PLUG. OTTO C. ROHDE, Toledo, Ohio, assignor to Champion Spark Plug Company, Toledo, Ohio, a Corporation of Delaware. Filed Feb. 28, 1929. Serial No. 343,283. 2 Claims. (Cl. 123—169.)

1. A spark plug comprising a metallic shell, an insulating core seated therein and having a recess in its outer end, an electrode secured in said core and terminating at its outer end within said recess, a detachable metallic housing constituting a continuation of said shell, a conductor, a metallic cap having a bayonet slot connection with said housing for securing said conductor in contact with said electrode, a flexible casing of insulating material for said conductor, and flexible metallic strands wrapped about said casing and electrically connected to said cap.

1,782,746. CRANK DISK. LAURENCE ROBERTSON, Toledo, Ohio. Filed Dec. 16, 1929. Serial No. 414,440. 4 Claims. (Cl. 74—20.)

1. The combination with a rotatable shaft and a disk secured thereon, of a second disk coaxial with the first disk, a wrist pin secured to the second disk, and a driving connection between the two disks comprising tumblers pinned to one disk, the other disk having slots receiving said tumblers, the slots being longer than the tumblers in a circumferential direction to allow a lost motion between the disks.

1,782,747. PROCESS OF SPLITTING OFF SULPHO-GROUPS FROM ANTHRAQUINONE SULPHONIC ACID DERIVATIVES. ROBERT EMANUEL SCHMIDT, Elberfeld, Germany, assignor to General Aniline Works, Inc., New York, N. Y., a Corporation of Delaware. Filed Apr. 13, 1926, Serial No. 101,780, and in Germany Apr. 17, 1925. 7 Claims. (Cl. 260—59.)



1. The process of splitting off a sulpho group from an anthraquinone sulphonic acid derivative which comprises treating the anthraquinone sulphonic acid derivative in a substantially neutral solution with sodium hydrosulfite whereby there is formed a hydrocompound of said anthraquinone sulphonic acid derivative, and treating the said hydrocompound with an alkaline agent.

1,782,748. ARTIFICIAL STONE AND METHOD OF MAKING THE SAME. IRVING J. SMITH, Baltimore, Md. Filed Feb. 26, 1927. Serial No. 171,372. 2 Claims. (Cl. 106—24.)

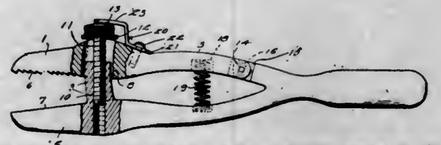
1. As an article of manufacture, a building block, which consists of the hardened product resulting from the mixture of water saturated cinders, of a uniform size, an inert filler, the main ingredient of which is calcium carbonate, cement and water.

1,782,749. "JERKED-IN" FILLING ELIMINATOR. ROBERT BELTON STANCILL, Dalton, Ga. Filed June 13, 1929. Serial No. 370,657. 2 Claims. (Cl. 139—261.)

1. A machine for looms comprising a filling engageable arm, a trip mechanism, means interposed between the trip mechanism and the usual transferrer arm of the bobbin replenisher, and a connection between the trip mechanism and the said filling engageable arm whereby the arm may be moved to engage the trailing filling and be released by said trip mechanism after a time interval sufficient to break the filling, said trip mechanism con-

sisting of a spring projected plunger, and means for engaging the plunger to retract the same when the same is being moved in a predetermined position.

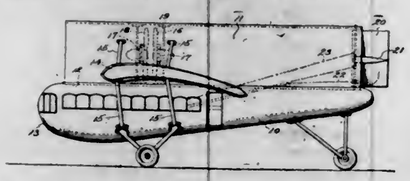
1,782,750. AIRPLANE CONTROL. WILLIAM STELZER, Chicago, Ill., assignor to Bendix Aviation Corporation, New York, N. Y., a Corporation of Delaware. Filed Feb. 18, 1929. Serial No. 340,762. 1 Claim. (Cl. 244—29.)



An airplane comprising a main carrying plane, a body supported thereby having a portion extending well forward of the main carrying plane, a plurality of elements each combining the function of an elevator, aileron and a strut connecting the carrying plane to the forward end of the extended body portion, an operating lever positioned on the body portion and linkage connecting each of the elements to the operating lever.

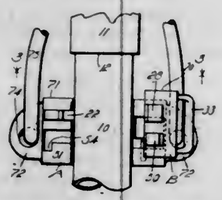
1,782,751. CELLULOSE PRODUCT. EUGENIO ANTONIO VAZQUEZ, Habana, Cuba, assignor to Vazcane Process, Inc., a Corporation of Delaware. Original application filed Aug. 30, 1927, Serial No. 216,348, and in Cuba June 2, 1927. Divided and this application filed Apr. 3, 1928. Serial No. 267,037. 10 Claims. (Cl. 92—3.)

1. The cellulosic product comprising abraded sugarcane from which substantially all sugar has been removed.



1,782,752. WRENCH. AUGUST WEISLER, Perryville, Mo., assignor of one-half to F. J. Hagerling, St. Louis, Mo. Filed Feb. 26, 1929. Serial No. 342,762. 3 Claims. (Cl. 81—118.)

1. A wrench comprising a jaw, a shank carried by the jaw and a handle connected to the shank, a shiftable jaw,

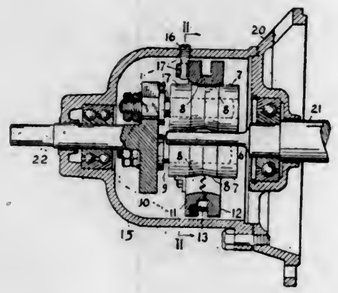


a shank carrying the shiftable jaw, a pivotal connection between said last shank and the first mentioned shank, said shiftable jaw having a passage therethrough from the front to the back face, a post rigid with the first mentioned jaw in position to extend into said passage, a headed screw member extended into said post through the outer end of said passage and having the head thereof acting upon the back of the shiftable jaw, and resilient means normally forcing said shiftable jaw outwardly against said screw head.

1,782,753. AERO AUXILIARY CYLINDER. JOHN H. WHEELER, deceased, Columbus, Ohio, by Grace P. Wheeler, administratrix, Columbus, Ohio. Filed Oct. 21, 1929. Serial No. 401,266. 1 Claim. (Cl. 244—18.)

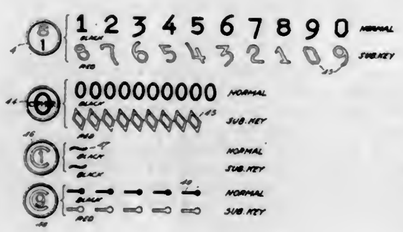
A device of the character set forth comprising a fuselage tapering from the forward end toward the rear end and having a longitudinally extending groove formed in the top wall thereof, a hollow stabilizing cylinder having each end fully open and secured in the recess of the fuselage and extending substantially the full length of the latter, wings secured to the fuselage, struts secured to the wings and to the fuselage and cylinder, brackets arranged in the cylinder inwardly of the forward end thereof, motors carried by the brackets, propellers driven by said motors and located in the cylinder in close proximity to each other and one of said propellers of the suction type and the other propeller of the type to cause the air to be rapidly forced through the cylinder along with the exhaust from the motors in a rearward direction relative to the fuselage, and steering means located at the rear end of the cylinder.

1,782,754. ELEVATOR. CHARLES E. WILCOX, Long Beach, Calif. Filed Mar. 28, 1929. Serial No. 350,580. 18 Claims. (Cl. 294—91.)



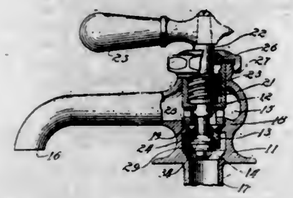
1. An elevator including, two pivotally connected sections adapted to engage around a casing, a latch for holding the sections in casing engaging position, the sections being shiftable relative to each other when in casing engaging position and having cooperating locking parts engageable by shifting of the sections, and means yieldingly holding the sections in position where said parts are disengaged.

1,782,755. METHOD OF TREATING BAGASSE FOR THE MANUFACTURE OF WALL BOARD AND THE LIKE. WILLIAM L. S. WILLIAMS, Hilo, Territory of Hawaii, assignor to Hawaiian Cane Products, Limited, Hilo, Hawaii, a Corporation of the Territory of Hawaii. Filed Aug. 9, 1929. Serial No. 384,803. 6 Claims. (Cl. 92—14.)



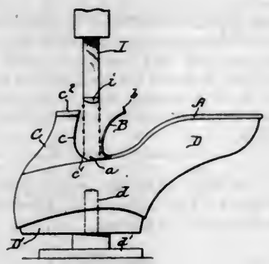
1. The method of treating bagasse for the manufacture of wall board and the like, which comprises separating the fibrous from the pith portions, digesting the fibrous portion to produce a clear fibre, cooking the pith portion with water to effect the desired degree of hydration, and admixing the resultant stocks.

1,782,756. CHANGE-SPEED GEAR. HOWARD MAURICE EDMUNDS, New York, N. Y., and EDWARD HILEMAN WARING, Essex Fells, N. J., assignors to Crocker-Wheeler Electric Manufacturing Company, Ampere, N. J., a Corporation of New Jersey. Filed Apr. 27, 1929. Serial No. 358,448. 2 Claims. (Cl. 74—34.)



1. Friction gearing of the type set forth with a central roller; satellite rollers having beveled surfaces, arranged in opposed pairs, in frictional engagement with the central roller; an outer race in two parts one of which is in engagement with one of the beveled surfaces and the other of which is in engagement with the other beveled surface of each of the satellite rollers; connections between the parts of the outer race by which they have relative rotative adjustment and concurrent relative adjustment in the direction of their axis; and means for restraining one of the parts of the outer race from rotation and holding it in a plane at right angles to the axis of the mechanism while permitting parallel displacement of its axis.

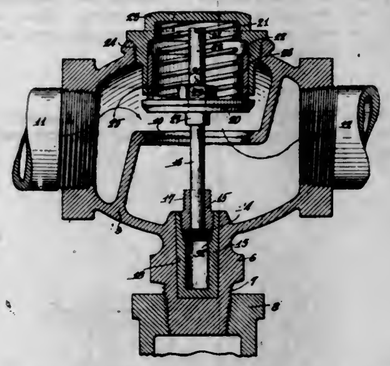
1,782,757. COMPUTING MACHINE. HARRY ARTHUR FOOTHORAP, Harrisburg, Pa., assignor to Elliott-Fisher Company, a Corporation of Delaware. Filed Aug. 24, 1921. Serial No. 494,942. 25 Claims. (Cl. 235—59.)



1. In a machine of the character described, the combination with an adding mechanism, of recording mechanism including keys operating said mechanisms to record and accumulate the value of a minuend, and to record a subtrahend and accumulate the value of the complement thereof, said mechanisms including means for eliminating the excess value incident to such accumulation and for recording the fact of such elimination, and also including means for accumulating the amount of the deficit incidental to subtraction by addition and for recording the fact of such accumulation.

1,782,758. FAUCET SCREEN. JOHN H. GAVIN, Chicago, Ill., assignor to The Chicago Faucet Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 20, 1926. Serial No. 89,554. 10 Claims. (Cl. 251—167.)

1. A valve comprising a body having inlet and outlet chambers, an apertured wall separating said inlet and outlet chambers, and formed to provide a valve seat support, a valve stem housing positioned in said body and having a lower end extending adjacent the apertured wall, means for securing said housing in operative position, and devices positioned in the seat support in said wall and clamped thereagainst by the housing formed to provide a flanged valve seat and a baffle to strain the fluid passing to valve seat.

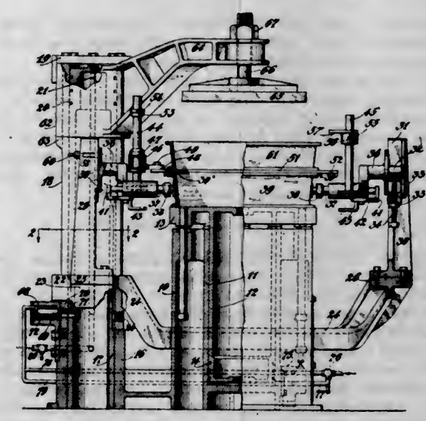


1,782,759. ART OF MAKING SHOES. JOHN A. KELLY, Brooklyn, N. Y., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Apr. 7, 1925. Serial No. 21,270. 7 Claims. (Cl. 12—142.)

1. That improvement in the art of making shoes which consists in cutting into one side of the heel portion of a sole to a depth less than the thickness of the sole and to a desired configuration, and then splitting the heel portion of the sole crosswise of the depth cut to produce a flap integral with the sole.

1,782,760. EMERGENCY CARTRIDGE-TYPE SHUT-OFF VALVE. LUTHER D. LOVEKIN, Ardmore, Pa., assignor to Kitson Company, Philadelphia, Pa., a Corporation of West Virginia. Filed Oct. 13, 1927. Serial No. 225,943. 11 Claims. (Cl. 137—162.)

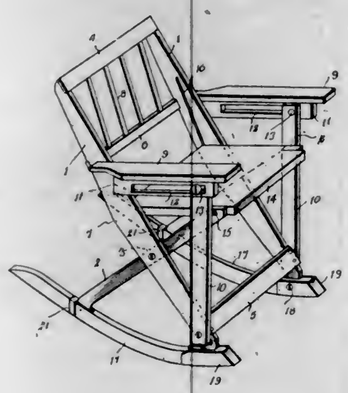
1. In a fuel cut-off valve for insertion in the fuel supply line to a boiler, a globe valve body, an extension integral therewith, a disc valve in the body, spring-pressed toward closure, a fusible element inside the extension supporting the disc valve from closure and connections between the boiler and the element adapting the element to heat by



conduction from the heat of the water in the boiler and to soften for operation of the cut-off when the boiler temperature becomes undesirably high.

1,782,761. METHOD OF CANNING PINEAPPLE AND PRODUCT THEREOF. JOHN T. MCCROSSON, Port Au Prince, Haiti. Filed Feb. 8, 1929. Serial No. 338,622. 3 Claims. (Cl. 99—8.)

2. The method of canning pineapple which consists in covering the pineapple slices with syrup in a closed container, removing air from the slices by exhausting the container in a relatively high vacuum, then admitting air to the container to force the syrup into and to saturate the evacuated cells of the fruit, then draining the fruit to remove substantially all but the saturating syrup, then placing the saturated fruit slices into containers without additional syrup or moisture and sealing the latter under vacuum, and then heating the fruit while in said vacuum thus producing steam in the container and thereby sterilizing the interior of the fruit penetrated by the syrup.



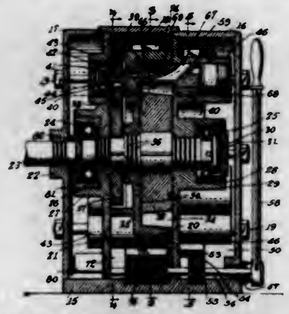
1,782,762. MOLDING MACHINE. THOMAS O. MORRIS, Harrisburg, Pa., and JOHN J. LAWLOR, Plainfield, N. J., assignors, by mesne assignments, to Automatic Molding Machine Corporation, Dover, Del., a Corporation of Delaware. Filed June 1, 1927, Serial No. 195,718. Renewed Feb. 8, 1930. 15 Claims. (Cl. 22—25.)

1. In a molding machine, a table, a frame adjacent the table and having an arm at one end of the table and a

second arm extending back of and to the opposite end of the table, trunnion jaws carried by said arms above the level of the table, and means for raising and lowering the frame, said second arm being downwardly offset intermediate its ends so as not to rise above the level of the table when the frame is raised.

1,782,763. CHAIR. FLOYD M. OVERBEY, Leavenworth, Kans. Filed Jan. 25, 1929. Serial No. 335,066. 1 Claim. (Cl. 155—75.)

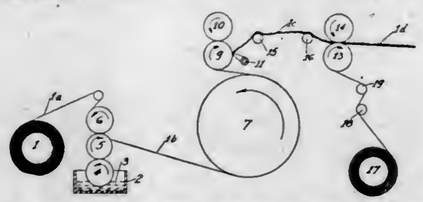
A chair or analogous article of furniture comprising side members crossing and pivotally connected at the point of crossing, the rear members being extended to form supporting elements for the back and having longitudinally disposed grooves in their inner sides, a seat pivotally connected to the upper ends of the front members and slidably connected with the upper portion of the rear members through the instrumentality of the grooves thereof, arms pivoted at their rear ends to the upper portions of the rear members, longitudinally slotted strips depending from the arms and braces pivoted at their lower ends to the lower ends of the rear members and slidably connected at their upper ends to the strips depending from the arms.



1,782,764. ART OF FELTING. CHARLES D. PARKS, Danbury, Conn. Filed Apr. 9, 1925, Serial No. 21,998. Renewed Feb. 14, 1930. 11 Claims. (Cl. 28—5.)

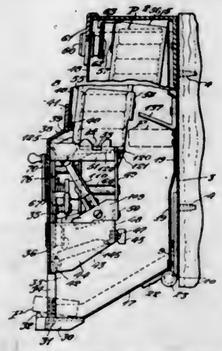
1. The herein described art of felting which consists in treating fur or the like with an alkaline solution of an oxidizing agent adapted to attack the wax on the fibers thereof, drying the fur, forming a bat out of the fur, treating the resultant bat with an acidic aqueous solution, and felting the fibers of the bat together while applying thereto an acidic aqueous solution.

1,782,765. ART OF FELTING. CHARLES D. PARKS, Danbury, Conn. Filed Apr. 9, 1925, Serial No. 21,999. Renewed Feb. 14, 1930. 11 Claims. (Cl. 28—5.)



1. The herein described art of felting which consists in treating fur or the like with a solution of a hydroxide of an alkali metal adapted to react with the wax on the fibers thereof and give the latter felting tendencies, drying the fur, forming a fabric out of the fur, felting the fibers of the fabric together, and in treating the fibers of the fabric during the felting operation with a solution having an acid reaction to complete the preparation of the fibers for felting.

1,782,766. ROTARY ENGINE. LEONARD M. RANDOLPH, Newark, N. J. Filed May 15, 1926, Serial No. 109,264. Renewed Aug. 9, 1929. 4 Claims. (Cl. 121—71.)



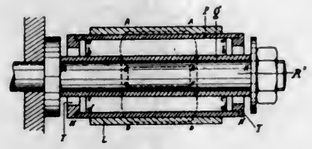
2. A rotary engine comprising a casing, a conical rotor, a plurality of rotary valves actuated in timed relation to said rotor, a ring having openings controlling the inlet to said valves, a second ring having openings controlling the outlet from said valves, and means for actuating said rings simultaneously.

1,782,767. CREPING PROCESS. WILLIAM WALLACE ROWE, Cincinnati, Ohio, assignor to The Paper Service Company, Lockland, Ohio, a Corporation of Ohio. Filed Mar. 5, 1929. Serial No. 344,311. 20 Claims. (Cl. 154—33.)

1. In a creping process the steps of applying a water repellant heat plastic adhesive to a paper web, and then creping said web through the use of said substance to bind it to the creping roll, said substance being tempered between the coating step and the creping step and the proper adhesiveness for the creping step being effected at least in part by temperature control separately of the coating instrumentality.

1,782,768. COIN-OPERATED VENDING MACHINE. FRANK J. ROWSE, Pawtucket, R. I. Filed Nov. 23, 1926. Serial No. 150,360. 15 Claims. (Cl. 194—1.)

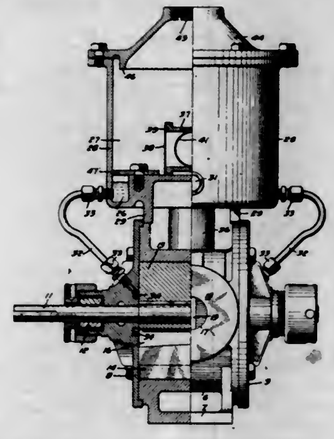
15. In a vending machine, the combination of a casing having a delivery-opening in its front wall, coin-operated mechanism for delivering articles from the casing through its delivery-opening, a coin-receiving till hinged to the front wall of the casing at the top of the delivery-opening, and means to lock the till in raised position to adapt it to collect the coins discharged from the operating-mechanism of the machine, said till having its bottom portion arranged to swing down across the rim of the delivery-opening to serve as a closure therefor to indicate that the money has been removed from the machine.



CARNEGIE LIBRARY OF ATLANTA

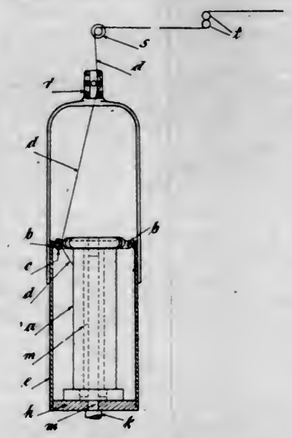
1,782,769. ROTARY WELL-DRILLING MACHINE. JOHN D. SPALDING, Crafton, Pa., assignor, by mesne assignments, to The National Supply Company, Toledo, Ohio, a Corporation of Ohio. Filed Feb. 18, 1926. Serial No. 89,058. 8 Claims. (Cl. 255—23.)

1. A rotary well drilling machine comprising a table base, a rotary table mounted on the base and provided with a central bore, a spider positioned in the bore and having a single set of lugs, said lugs being adapted to be engaged either with the table or with the base, the engaging of the lugs with the base or table being accomplished solely by movement of the spider.



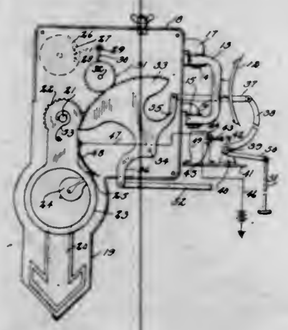
1,782,770. OSCILLATING JOINT. LEON THIRY, Brussels, Belgium. Filed Oct. 26, 1925, Serial No. 64,961, and in Belgium Nov. 25, 1924. 4 Claims. (Cl. 267—54.)

1. An oscillatory pivotal joint for vehicles comprising inner and outer relatively oscillatory coaxial cylindrical elements forming between them an annular space, and an annular rubber cylinder of which in its original unstressed condition, the radial thickness is greater than the width of the annular space between said cylindrical elements, said rubber cylinder being held between said cylindrical elements under radial compressive tension and being in freely deformed state axially in compensation for the radial compression thereof, whereby substantial uniformity in the shortening of the radial element of said rubber cylinder is produced, the opposite ends of said rubber cylinder being free from contact with any end structure.



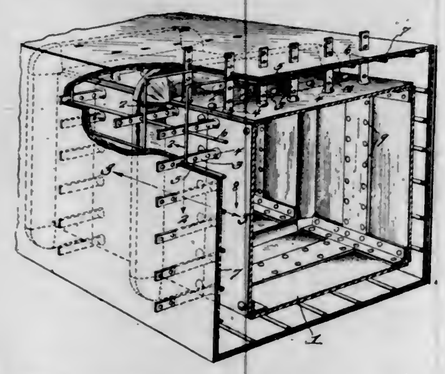
1,782,771. ROTARY PUMP. DEXTER C. BAKER, Oakland, Calif., assignor to Baker-Hansen Manufacturing Co., Alameda, Calif., a Corporation of California. Filed Dec. 7, 1926. Serial No. 153,060. 1 Claim. (Cl. 230—205.)

A rotary pump comprising a cylindrical casing, a substantially solid cylindrical rotor mounted eccentrically in said casing; said rotor having longitudinal radially extending channels cut therein and said channels being closed at one end, vanes in each of said channels adapted to be radially displaced upon rotation of said rotor so as to bear upon the inner contour of said casing; said vanes being tapered at their inner ends, an entrance port in said casing for fluid to be pumped, an exit port for said fluid, annular grooves in said casing in communi-



cation with said channels radially inward from said vanes, and means for causing lubricating fluid to flow in said grooves and in said channels.

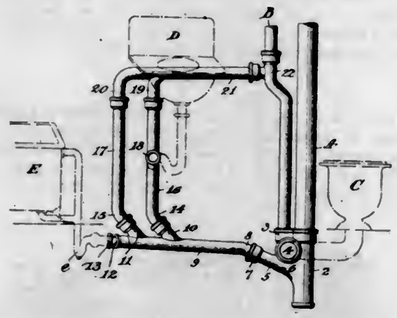
1,782,772. RING FOR THE UNWINDING OF YARN FROM YARN CONTAINERS IN CABLE-CORD FRAMES OR OTHER TWISTING OR DOUBLING FRAMES. JOHN HENRY BLACKBURN, Preston, and WILLIAM EDWIN BANCROFT, Accrington, England, assignors to Howard & Bullough Limited, Accrington, England. Filed Nov. 8, 1929, Serial No. 405,682, and in Great Britain Dec. 12, 1928. 2 Claims. (Cl. 117—23.)



1. In cable cord frames and other like twisting or doubling frames, a revoluble ring, a movable traveller on said ring, a yarn-container within said ring, from which yarn passes to and through said traveller, a mount about said yarn-container to which said ring is connected, a spindle passing through said yarn-container with which said mount is revolved, an extension of said mount, yarn guides in said extension through which yarn from the traveller and container passes, whereby a positive twist is put into the yarn between said guides and a determinable point beyond, and whereby the traveller named operates merely to unwind the yarn from the container aforesaid.

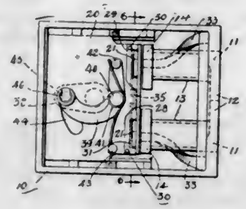
1,782,773. VEHICLE DIRECTION INDICATOR. ANTHONY CHISLOCK, Stamford, Conn. Filed July 22, 1920. Serial No. 379,946. 5 Claims. (Cl. 116—47.)

1. Vehicle direction signal comprising a casing adapted to be attached to a vehicle, an extension for said casing, a signal arm in shape of an arrow having transparent side walls pivotally arranged in said casing, a lamp in said arm, a plurality of teeth formed at the upper rounded end of said arm near its pivot point, a toothed segment movably arranged in said casing in mesh with the teeth on said arm, an acoustic signal, means for operating said signal upon the operation of said segment, mechanically operated means for operating said segment from the driver's seat, and a means for returning said arm into its normal position of rest after each operation.



1,782,774. WALL COVERING AND SUPPORT THEREFOR. WILLIAM M. CONNERY, Philadelphia, Pa. Filed May 18, 1928. Serial No. 278,879. 7 Claims. (Cl. 137—75.)

1. The combination with a flue or other wall comprising metal plates, of fastening means having heads for securing the several plates together, a covering, and means carried by the heads to support the covering.

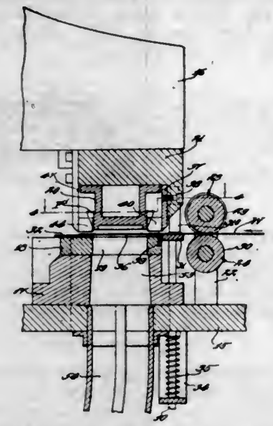


1,782,775. WASTE AND VENT FITTING. JOSEPH J. CROTTY, New York, N. Y., assignor to The Central Foundry Company, New York, N. Y., a Corporation of Maine. Filed Sept. 28, 1928. Serial No. 308,034. 2 Claims. (Cl. 4—211.)

1. In a waste and vent system a unitary horizontal fitting having an angled end adapted to cooperate with an angled extension of a vertical waste stack, a bell at its opposite end in communication with the discharge from a plumbing fixture and a plurality of intermediate branches extending throughout their lengths at an acute angle to the axis of the fitting and having their end faces at a complementary angle to said axis, and vertically disposed vent and waste pipes having angled lower ends and adapted to co-

operate with said branches, the arrangement being such that water discharged into said waste pipe and air drawn through said vent flow freely without abrupt changes in direction into said waste stack.

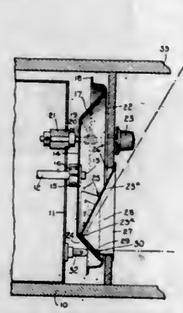
1,782,776. ROTARY BOLT LOCK. FRANCIS J. DOWLING, New York, N. Y., assignor to Francis Keil & Son, Inc., New York, N. Y., a Corporation of New York. Filed June 17, 1925, Serial No. 37,658. Renewed Nov. 15, 1927. 31 Claims. (Cl. 70—46.)



1. In a lock, the combination with a rotatable bolt having a follower, of means for causing the operation of the bolt comprising a carrier movable with the bolt endwise along the lock said bolt being rotatable with respect to the carrier, and a cam which cooperates with said follower to cause rotation of the follower as a result of the endwise movement thereof and the carrier, the cam being dissociated from the bolt.

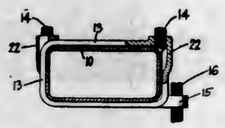
30. In lock construction, in combination, a casing, a bolt having at its outer end means projecting therefrom adapted to enter and interengage with a strike, means for moving said bolt out of said casing and for rotating said bolt, said bolt having adjacent its inner end means responsive to said actuating means for coaction in effecting rotation of said bolt, and a rotatable sleeve journaled upon said bolt intermediate of said projecting means and said responsive means.

1,782,777. MACHINE FOR FORMING ARTICLES FROM SHEET MATERIAL. BERNARD M. FINE, Philadelphia, Pa., assignor to Sanitary Products Corporation of America, Philadelphia, Pa., a Corporation of Virginia. Filed Jan. 19, 1927. Serial No. 162,083. 5 Claims. (Cl. 93—47.)



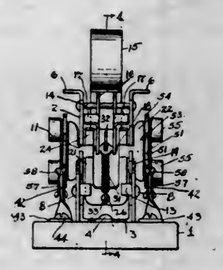
1. In a machine for forming articles from blanks of sheet material, the combination with means for slitting a web of material longitudinally, of means for cross-cutting

said web, said slitting and cross-cutting means cooperating to divide said web into individual blanks, and dies



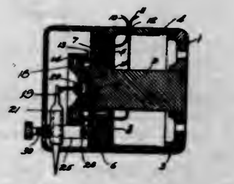
moving simultaneously with said cross-cutting means for forming said blanks into articles, said cross-cutting means being carried by one of said dies.

1,782,778. RADIO DIALING DEVICE. JOSEPH A. FLANZER, Brooklyn, N. Y., assignor to Technidyne Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 14, 1928. Serial No. 305,877. 18 Claims. (Cl. 116—124.4.)



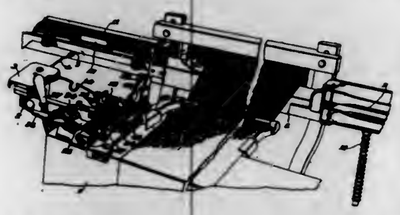
1. In a radio broadcast receiver, in combination with a rotatable control member thereof, of an indicator dial including an outwardly dished portion carrying a continuous series of dialing markings, said portion being located below the axis of the dial and angularly disposed to the normal line of observation whereby said markings may be viewed over a wide angle above said normal line.

1,782,779. FITTING FOR ELECTRICAL-CONDUIT SYSTEMS. JAMES M. G. FULLMAN, Sewickley, Pa., assignor to National Electric Products Corporation, New York, N. Y., a Corporation of Delaware. Filed May 15, 1929. Serial No. 363,121. 9 Claims. (Cl. 247—27.)



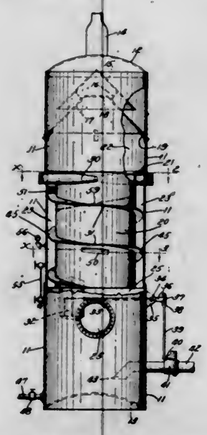
1. In a conduit system for electrical distribution having fittings adapted for association with the conduits, each fitting comprising in combination, means for receiving and holding a conduit, and means for variably adjusting and suporting the fitting at desirable variable heights above a supporting floor slab.

1,782,780. SAFETY SNAP SWITCH. FRED F. HAFEMEISTER, Cleveland, Ohio, assignor to The Cleveland Switchboard Company, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 19, 1924. Serial No. 750,928. 2 Claims. (Cl. 200—67.)



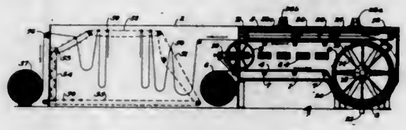
1. An electric switch comprising a base, parallel switch supports extending upwardly from said base, a U-shaped member the upper ends providing lever arms, and having lateral extensions at intermediate positions on its side members, detachably engaged within journals formed centrally in the midportions of said parallel supports, a movable switch contact member supported on one of said extensions, stationary contact members adapted to be engaged by said movable member, a switch operating lever pivoted in said supports above said U-shaped member formed of parallel arms each having outwardly projecting spaced ears, a collar pivotally supported on the free end of said lever, a guide rod extending throug said collar and adapted to seat upon the base of said U-shaped member, and a compression spring surrounding said guide member between said U-shaped member and said collar and adapted to move said U-shaped member and operating lever in opposite directions when the upper end of said spring is moved past dead center by said operating lever and when the upper end of the U-shaped member is also moved by the outwardly projecting ears on said operating lever.

1,782,781. REPRODUCING DEVICE. JURJEN S. HIGH, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 24, 1927. Serial No. 201,049. 4 Claims. (Cl. 179—100.41.)



1. In a pick-up device, the combination between a closed-circuit primary coil mounted for motion in a magnetic field, a secondary coil in operative relation thereto, means comprising an actuable needle holder for moving said primary coil in said field, and adjustable damping means independent of said needle holder for controlling said movement.

1,782,782. WEFT STOP MECHANISM FOR LOOMS. JOSEPH B. JACKSON, Milford, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Mar. 14, 1930. Serial No. 435,906. 14 Claims. (Cl. 139—371.)

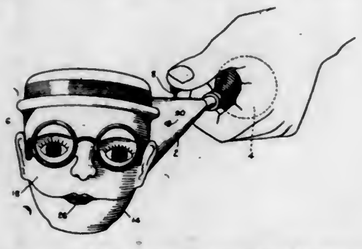


1. A weft stop motion for looms employing two shifting shuttle boxes at one end of the lay and a single detecting shuttle box at the other end of the lay and two shuttles for laying two single picks of filling alternately in the sheds, the combination of a filling feeler mounted to enter the single detecting shuttle box and detect the condition of the filling on the detecting beats, a single stop controller moved to stopping position by the feeler on detection of substantial exhaustion of filling in either one of the shuttles when it is in the single shuttle box and remaining in said position during the succeeding detecting beat when the second shuttle is in the single shuttle box, and means rendered operative to effect loom stoppage when the shuttle containing the substantially exhausted filling has been returned to the single detecting shuttle box.

1,782,783. CRUDE-OIL AND NATURAL-GAS SEPARATOR. MEINHARD H. KOTZEBUE, Tulsa, Okla., assignor to Trumble Gas Trap Company, a Copartnership consisting of Francis M. Townsend, Milton J. Trumble, and A. J. Gutzler. Filed Sept. 22, 1924. Serial No. 739,169. 3 Claims. (Cl. 183—2.7.)

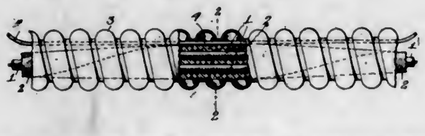
3. In an oil and natural gas separator, a cylindrical outer shell, an inner shell of shorter dimensions than the outer shell spaced apart from the outer shell forming a separating chamber therebetween, a division wall at the upper end of the inner shell extending outwardly therefrom to the outer shell, a spiral flange on said inner shell extending outwardly therefrom to form said separating chamber into a spiral passage for the gas therein, the outer edge of said flange being spaced apart from the outer shell, means for introducing an oil and gas mixture tangentially into the upper portion of the separating chamber, gas outlet means in the upper end of said outer shell, and float-operated means for discharging oil from the lower portion of the outer shell.

1,782,784. REENFORCED FILTER PAPER AND PROCESS OF MAKING SAME. FRED W. MANNING, Berkeley, Calif., assignor, by mesne assignments, to Filter Fabrics, Inc., Boston, Mass., a Corporation of Massachusetts. Filed Apr. 11, 1927. Serial No. 182,926. 19 Claims. (Cl. 92—40.)



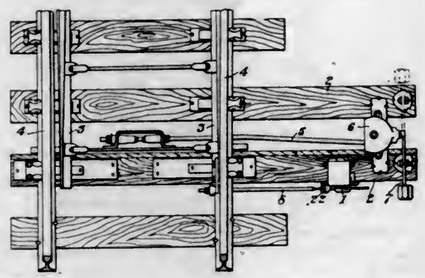
1. The method of making a filter sheet, which comprises precipitating a treating material upon a fabric by passing a conveying fluid containing the treating material through the fabric and thereafter passing a treating fluid through the filter sheet thus formed.

1,782,785. PROCESS OF MAKING FILTER PAPERS AND FILTER FABRICS. FRED W. MANNING, Beverley Hills, Calif., assignor, by mesne assignments, to Filter Fabrics, Inc., Boston, Mass., a Corporation of Massachusetts. Filed Nov. 29, 1927, Serial No. 236,579. Renewed Sept. 30, 1930. 17 Claims. (Cl. 92—39.)



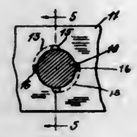
1. In a method of preparing a filter paper, a step consisting of dispersing cellulose fibres in an inert liquid of sufficiently high surface tension to completely separate the fibres for filtration purposes.

1,782,786. TOY. LOUIS MARX, New York, N. Y. Filed Feb. 27, 1929. Serial No. 343,029. 4 Claims. (Cl. 46—40.)



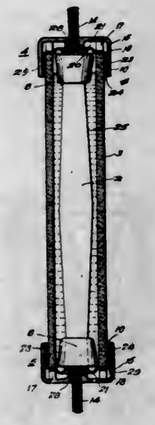
1. A toy comprising a horn, a compressible rubber bulb at one end of the horn, a facial figure having movable features affixed to the other end of said horn, mechanical means for actuating the movable features extending within the horn and including an actuating button located externally of but so situated relative to the compressible bulb that the bulb and the button may both be directly operated by one hand with a single movement thereof in order to simultaneously blow the horn and move the features of the face.

1,782,787. ARMORED CONDUCTOR. JOHN E. MCAULIFFE, Brooklyn, N. Y., assignor to Triangle Conduit Company, Brooklyn, N. Y., a Corporation of New York. Filed May 1, 1928. Serial No. 274,343. 3 Claims. (Cl. 173—267.)



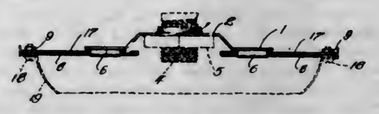
1. The combination with an insulated conductor and a spirally wound metal armor around the insulation of the conductor composed of interlocking turns, of a safety conductor constituting an electric bridge located inside of the armor, insulated from the first-mentioned conductor, and contacting with substantially all of the turns of the armor, said armor tightly embracing said insulated conductor and said safety conductor.

1,782,788. ELECTRIC LOCK. WILLIAM C. MCWHIATER, Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Jan. 8, 1930. Serial No. 419,289. 14 Claims. (Cl. 246—160.)



1. A locking device for railway traffic controlling apparatus comprising a locking dog, yieldable means for maintaining said dog in locking engagement with a member movable with said apparatus, manually operable means for moving said dog out of engagement with said member against the action of said yieldable means, a latch for controlling the operation of said manually operable means, electromagnetic means for actuating said latch to release said manually operable means, means actuated by said yieldable means for controlling the energization of said electromagnetic means, and manually operable means for rendering said yieldable means ineffective.

1,782,789. GRATING. NATHAN MICHELMAN, Brooklyn, N. Y. Filed Nov. 30, 1928. Serial No. 322,651. 2 Claims. (Cl. 189—10.)



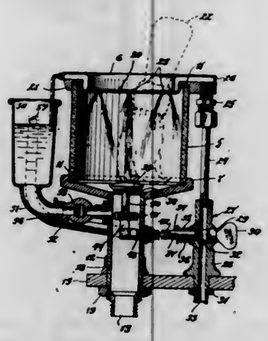
1. A grating comprising a plurality of horizontal bars, each having a plurality of openings in spaced relation, an inner groove formed in said openings, and a peripheral recess formed in the wall of each opening in communication with said groove, a series of vertical bars, a plurality of protuberances on each of said vertical bars adapted to be entered into the recesses of said horizontal bar openings and to be rotated in the groove thereof, and a wire entered into said recess to lock the vertical and horizontal bars at their points of intersection.

1,782,790. INSULATOR. FREDERIC H. MILLER, Wilkinsburg, Pa., and RAY P. JACKSON, Berkeley, Calif., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed June 16, 1928. Serial No. 285,938. 4 Claims. (Cl. 173—318.)

2. A suspension insulator comprising a tubular structure, an insulating tension element therein, terminal means secured to said element including an end cap element for the tube movably related thereto and yieldable sealing means between and secured to the tube and one of said elements.

1,782,791. ADJUSTABLE FIXTURE STRAP. KARL K. NIELSEN, Chicago, Ill., assignor to Alcor Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 12, 1929. Serial No. 385,232. 7 Claims. (Cl. 240—85.)

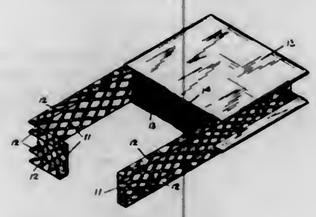
1. A fixture supporting strap comprising a central member, two longitudinally alined extension members slidably guided by the central member for movement toward or away from each other, two friction members each interposed between the main member and one of the extension members, and means associated with each friction member to prevent bodily movement of the latter with respect to the central member, each extension member having a stop formation disposed for engaging the adjacent friction member to limit the sliding of the extension member in one direction with respect to the central member.



1,782,792. ROTARY BLOTTER. CHARLES HAMILTON PAJEAU, Glencoe, Ill., assignor to The Toy Tinkers, Inc., Evanston, Ill., a Corporation of Illinois. Filed June 7, 1929. Serial No. 369,048. 11 Claims. (Cl. 120—26.)

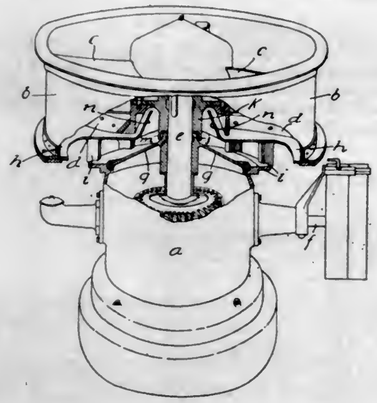
1. A rotary blotter comprising a carrier having a cylindrical outer wall, a plurality of blotters successively

wrapped around the said carrier wall, each blotter presenting a cylindrical outer face and having its ends in abutting relation to each other, and retaining strips each extending across the abutting end portions of one of the blotters interiorly of that blotter and secured only to that blotter.



1,782,793. STATIONARY SHAVING CUP. ANGELO PICCIONE, Buffalo, N. Y. Filed May 14, 1928. Serial No. 277,641. 9 Claims. (Cl. 45—136.)

1. A shaving cup of the character described, comprising a cup, a drain for said cup, a drain valve in said drain, a water supply pipe for said cup, a valve in said water pipe, and means operatively connecting said supply valve and drain valve whereby said drain valve is opened when said supply valve is opened and vice versa, said means being adapted to close said supply valve slightly in advance of said drain valve, thereby to permit of completely draining said cup after the flow of supply water has been cut off.

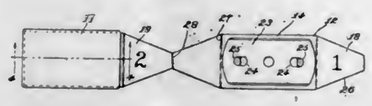


7. A shaving cup including a cup having a drain, means for flushing said cup, a water supply pipe for said flushing means, a valve in said water supply pipe, an auxiliary reservoir arranged adjacent said cup, a drain for said auxiliary reservoir and a pipe connected with said flushing means and discharging into said auxiliary reservoir whereby water is supplied to said auxiliary reservoir when said cup is flushed.

1,782,794. WALL AND PARTITION CONSTRUCTION FOR INSULATING PURPOSES. RYAN SADWITH, Newark, N. J., assignor to Nichols Products Corp., New York, N. Y., a Corporation of New Jersey. Filed Oct. 31, 1928. Serial No. 316,189. 7 Claims. (Cl. 72—16.)

1. An insulating structure comprising a plurality of enclosing sheets, a continuous border band of expanded metal in combination with said sheets, the band being formed to be slidably positioned within the sheets and insulating material confined within said sheets and border band.

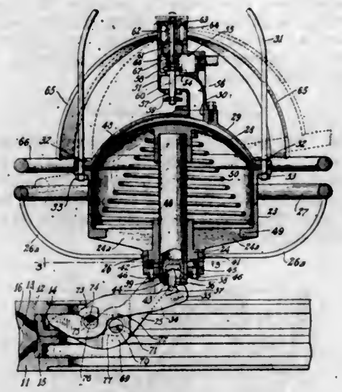
1,782,795. MIXING APPARATUS. ALFRED BARTLETT SMITH and CLIFFORD ROSS SMITH, Wolverhampton, England. Filed Sept. 7, 1929, Serial No. 390,913, and in Great Britain Mar. 22, 1929. 4 Claims. (Cl. 259—108.)



1. Apparatus for treating finely divided materials comprising in combination a pan or container, a shaft rotatable about a vertical axis therein and carrying means for treating the materials on the pan, driving means for the shaft, an upstanding inner wall on the pan around the shaft, a protecting surface surrounding the shaft below said upstanding inner wall of said pan, and means for spacing the base of the pan away from said protecting surface to form discharge passages for leading outside of the machine any materials which may overflow the inner wall of said pan.

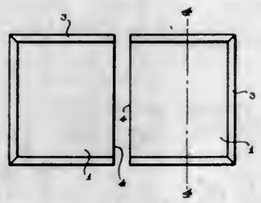
1,782,796. PROCESS FOR THE PRODUCTION OF PARTIALLY-HYDROLIZED CELLULOSE ACETATES. SAMUEL ISIDOOR VLES, Arnhem, Netherlands. Filed Oct. 25, 1927, Serial No. 228,696, and in the Netherlands July 20, 1927. 4 Claims. (Cl. 260—102.)

2. A process for the production of partly hydrolyzed cellulose acetate which comprises treating a solution of cellulose triacetate with diluted sulphuric acid at temperatures of about 20° C., for a period of about 6 days.



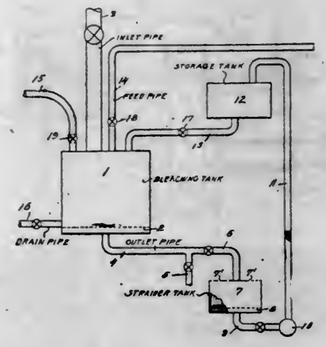
1,782,797. PACKING FOR SAFETY-RAZOR BLADES. DAVID C. WILLIAMS, Medfield, Mass., assignor to Henry F. Huriburt, Jr., Wellesley, Mass. Filed June 13, 1928. Serial No. 285,041. 2 Claims. (Cl. 206—46.)

2. A package for safety razor blades, comprising a closed container having a slot in one end thereof, a strip of paper folded transversely of its length to form alternate blade receiving sections and tab sections of equal length positioned within the container, said tab sections being of reduced width to facilitate detaching a balde and its receiving and supporting section from the strip remaining in the container and certain of said tabs being numbered consectively whereby the user is apprised of the number of blades remaining in the package, blades carried by said strips and supported by said blade receiving sections longitudinally of said strip with the edges thereof adjacent the edges of the strip, said blade receiving section having



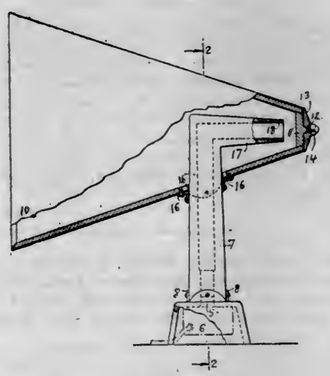
a width in excess of the width of the blade to protect the edges thereof and the hands of the user after removal from the remained of the strip and a length substantially equal to the length of the blade, means for detachably securing a blade to said blade receiving sections, and a tab protruding through said slot to facilitate withdrawal of said strip and supported blades as desired.

1,782,798. SPREADER DEVICE FOR OPENING VULCANIZING MOLDS OR THE LIKE. GEORGE F. WILSON and HARRY E. WANER, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Nov. 25, 1927. Serial No. 235,446. 8 Claims. (Cl. 18—2.)



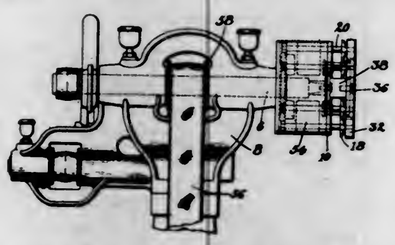
1. Apparatus of the character described comprising a pair of jaw members, coacting fulcrum means on the two jaw members having their fulcrum axis relatively close to the work-engaging portions of the jaw members for high mechanical advantage and coacting fulcrum means on the two jaw members having their fulcrum axis farther from the said work-engaging portions for actuating the latter at relatively high speed and with a relatively wide range.

1,782,799. METHOD OF FORMING LIDS FOR CIGAR BOXES. ALLAN A. ADAMSON, Rochester, N. Y., assignor, by mesne assignments, to Autokraft Box Corporation, Lima, Ohio, a Corporation of Delaware. Filed July 17, 1928. Serial No. 293,402. 2 Claims. (Cl. 93—54.)



2. The method of forming lids for cigar boxes which comprises providing a rigid blank of the size sufficient to form two lids, providing a thin flexible blank to project around the outer edges of said first mentioned blank, applying the thin blank to the rigid blank to cover one face of the latter and edge portions of the other face, and dividing the article thus obtained into two covers.

1,782,800. METHOD OF BLEACHING PULP. DENNIS CUSHMAN ANDREWS, Cloquet, Minn., assignor to The Northwest Paper Company, Cloquet, Minn., a Corporation of Minnesota. Filed June 23, 1926. Serial No. 117,974. 24 Claims. (Cl. 8—2.)

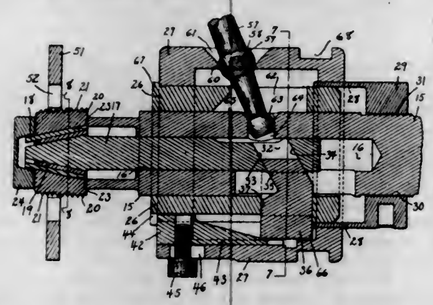


1. The method of bleaching vegetable fiber pulp which comprises flowing bleach liquor through a relatively quiescent thick slurry of said pulp at normal pressure and temperature and keeping said bleach liquor in contact with said pulp until said pulp reaches the desired color.

1,782,801. RADIO LOUD-SPEAKER. FREDERICK BAEHN, Jersey City, N. J. Filed Feb. 16, 1929. Serial No. 340,508. 2 Claims. (Cl. 181—27.)

1. In a radio loud speaker, the combination of a chambered base adapted to carry a speaker unit, and provided with an opening at the top, a leader tube extending upward from the base to lead the sound waves upward, a horn of conical shape with the smaller end closed by a hard baffle plate, the horn having an opening at one side, through which the leader tube extends, a bracket securing the leader tube and horn together at said opening whereby the horn is supported on the leader tube, the leader tube having an extension at its upper end that projects rearward in the axis of the horn and ends a short distance in front of the said baffle plate whereby the sound waves are deflected to pass forward and out of the horn, said baffle plate comprising a disk with a beveled edge inserted in the horn end with a threaded stem extending outward from the disk, a collar on the stem that engages the end of the horn, and a nut on the stem that presses on the collar to draw the disk against the inner wall of the horn.

1,782,802. BURNISHING MACHINE. LEWIS J. BAZZONI, Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 29, 1929. Serial No. 335,772. 30 Claims. (Cl. 12—77.)

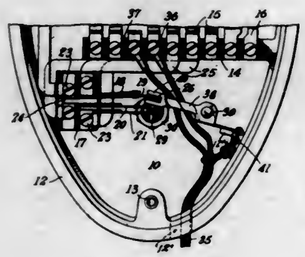


1. In a heel burnishing machine, a rotating burnishing tool comprising concave and convex work-engaging elements having the same direction of rotation but constructed and arranged to burnish a piece of work alternately in opposite directions.

1,782,803. PRESSURE INDICATOR. JULIUS H. BECKER, San Francisco, Calif. Filed Feb. 18, 1929. Serial No. 340,678. 6 Claims. (Cl. 152—11.5.)

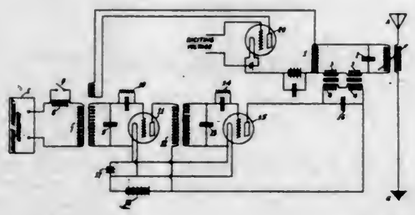
2. In a fluid pressure indicating device, a body member formed with a fluid pressure chamber, a pressure responsive element coacting with the chamber and movable in one direction by fluid pressure, resilient means urging the pressure responsive element in the opposite direction, a fitting on the body member adapted to be applied to the article containing fluid pressure to be indicated, a passage leading from the fluid pressure chamber to the fitting, and means for continuously diverting fluid from the fluid pressure chamber.

1,782,804. COLLAPSING TAPER-THREAD TAP. ALBERT F. BREITENSTEIN, New Haven, Conn., assignor to The Geometric Tool Co., New Haven, Conn, a Corporation. Filed May 7, 1928. Serial No. 275,661. 10 Claims. (Cl. 10—145.)



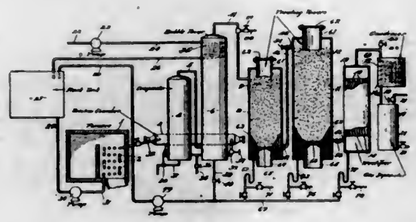
1. In a collapsing taper-thread tap, the combination with a tap-body, radially-movable chasers mounted therein, a plunger located axially within the tap-body for operating the chasers and having two inclined parallel cam-surfaces, an axially-movable dog-carrying sleeve mounted upon the tap-body, an axially-movable tripping-sleeve bearing upon the said dog-carrying sleeve, a combined locking and taper-controlling dog carried by the said dog-carrying sleeve and having two parallel forwardly-inclined operating-faces co-acting with the cam-surfaces of the said plunger for operating the same, a taper-controlling cam carried by the said tripping-sleeve and co-acting with the dog for positively moving the same bodily inward, and a locking-abutment co-acting with the dog for maintaining the chasers in their thread-cutting positions.

1,782,805. CLEANING POWDER. FRANK C. BROEMAN, Cincinnati, Ohio, assignor to Arthur Silbersack, Cincinnati, Ohio. Filed May 11, 1928. Serial No. 277,104. 1 Claim. (Cl. 87—5.)



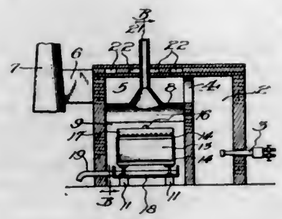
A composition containing a mixture of ingredients substantially as follows: 15% finely divided particles of wood, such as sawdust or wood flour, 2% bleaching powder, such as chlorinated lime, 20% potassium chloride and 63% sodium acid sulphate.

1,782,806. TELEPHONE-INSTRUMENT SWITCHING. JOSEPH O. CADIEUX, Meriden, Conn., assignor, by mesne assignments, to Connecticut Telephone & Electric Company, Inc., Meriden, Conn., a Corporation of Delaware. Filed Apr. 29, 1929. Serial No. 359,124. 14 Claims. (Cl. 179—159.)



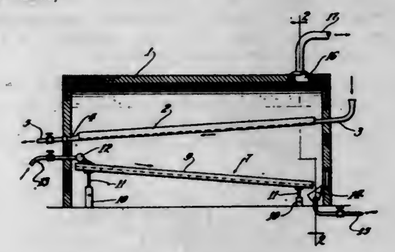
1. In a telephone, an insulating casing having a projecting boss, a number of switch springs supported thereon, a pivoted hook lever projecting through the casing, a jack lever pivoted within the casing and having one arm coacting with said hook lever, a receiver adapted to be supported on said hook lever, and having a cord connected to said jack lever.

1,782,807. FREQUENCY-REGULATING SYSTEM. HENRI CHIREIX, Paris, France. Filed Sept. 8, 1925, Serial No. 55,086, and in France Sept. 10, 1924. 8 Claims. (Cl. 250—36.)



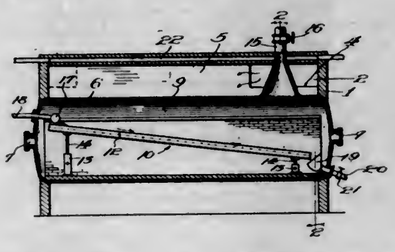
1. A constant frequency generating system, comprising an oscillation generator and a constant frequency heterodyne arranged to beat therewith for producing a beat frequency, an oscillatory circuit tuned to said beat frequency, rectifying means associated with said beat frequency circuit, and frequency compensating means included in the generator output circuit controlled by the rectified beat frequency currents for affecting a constant relationship between the heterodyne constant frequency and the generator frequency.

1,782,808. PROCESS FOR TREATING HYDROCARBONS. ROY CROSS, Kansas City, Mo., assignor to Cross Development Corporation, Wilmington, Del., a Corporation of Delaware. Filed Jan. 20, 1926. Serial No. 82,465. 4 Claims. (Cl. 196—28.)



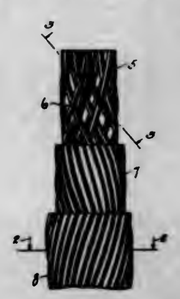
1. A process of refining hydrocarbon vapors or gases, comprising the steps of directing the fractionated vaporous material from the refluxing stage of a cracking system through a bed of metal compound having an affinity for the sulphur compounds of the hydrocarbon vapors, passing the vapors thence through a bed of highly adsorbent material having a purifying effect on the vapors and effecting insubstantial desulphurization relative to that effected by said metal compound.

1,782,809. PROCESS AND APPARATUS FOR TREATING OIL. JEAN DELATTRE-SEGUY, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed June 28, 1926. Serial No. 118,980. 4 Claims. (Cl. 196—128.)



1. A process for distilling hydrocarbon oils which comprises continuously flowing the oil by gravity in a relatively thin film over an unheated inclined surface, applying a distilling heat solely to the upper surface of said film without heating the film from below, and removing and condensing the evolved vapors.

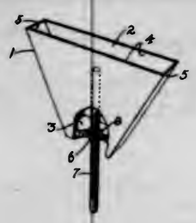
1,782,810. PROCESS AND APPARATUS FOR DISTILLING LIQUIDS. JEAN DELATTRE-SEGUY, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed June 28, 1926. Serial No. 118,981. 5 Claims. (Cl. 196—128.)



1. A process of distilling hydrocarbon oil, consisting in passing the liquid to be distilled in a relatively wide shallow stream over an inclined plate and simultaneously heating the upper surface of such film by heat radiated from a hot molten bath.

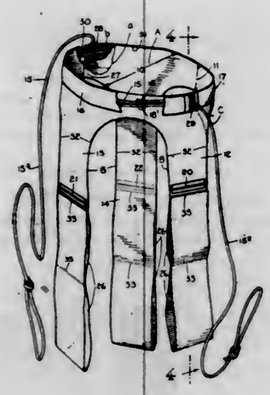
1,782,811. PROCESS OF TREATING HYDROCARBONS. JEAN DELATTRE-SEGUY, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed June 28, 1926. Serial No. 118,982. 7 Claims. (Cl. 196—128.)

2. The method of cracking hydrocarbon oils which comprises flowing the oil in a relatively thin film through a cracking zone maintained under superatmospheric pressure and applying to the flowing film a cracking heat radiated from a heating surface spaced away from the film whereby carbon deposition within the cracking zone will not interfere with the transfer of heat to the film.



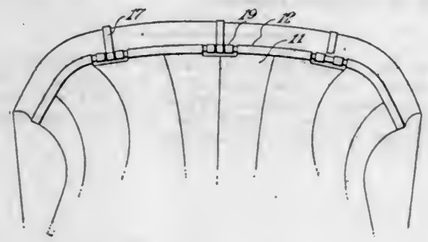
1,782,812. ELECTRICAL CONDUCTOR. ABRAHAM BERNARD DIBNER, Peekskill, N. Y. Filed Jan. 21, 1927. Serial No. 162,479. 2 Claims. (Cl. 173—13.)

1. A conducting cable, comprising a core formed of a plurality of wire strands interlaced with one an-



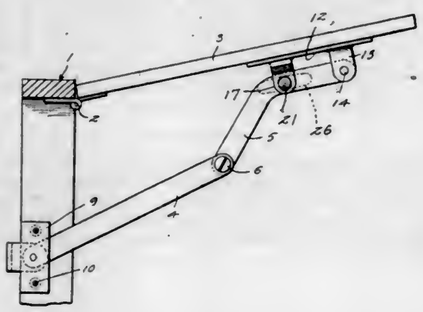
other to form an open work structure having uniform strength and maximum resistance to crushing, and an outer layer comprising a plurality of wire strands wound about said core in the direction of its longitudinal axis.

1,782,813. MOLD. ANGELO S. FERREIRA, San Jose, Calif. Filed July 24, 1929. Serial No. 380,607. 1 Claim. (Cl. 107—19.)



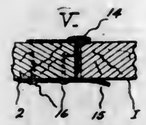
A mold of the character described comprising a body portion or receptacle open at one end and having inner surfaces inclined inwardly toward the other end, and means formed in the last mentioned end for releasably holding a supporting element intermediate its ends whereby a liquid or plastic mass may be solidified on the supporting element within the body portion and then the element and mass removed as a unit through the open end of the body portion.

1,782,814. OBSTETRICAL EXTRACTOR. EUGENE FROEHLICH, New York, N. Y. Filed Jan. 3, 1927. Serial No. 158,490. 11 Claims. (Cl. 128—361.)



1. An obstetrical extractor comprising a flexible envelope structure adapted to be applied over the child's entire head and chin, said envelope structure including a section contractible about the base of the child's head and forming an enveloping receptacle for said head, and a tractor section connected to and depending from said head receiving section.

1,782,815. SEAT COVER. WALTER L. FRY, Scarsdale, N. Y., assignor, by mesne assignments, to Wil-Fry Corporation, New York, N. Y., a Corporation of Delaware. Filed Nov. 12, 1928. Serial No. 318,649. 6 Claims. (Cl. 155—182.)

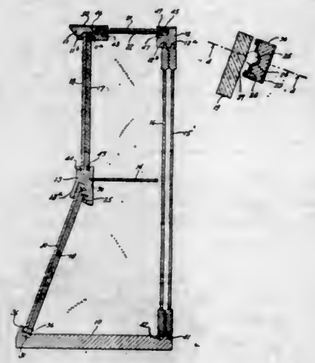


1. A cover for the back rest of a seat of a shape and size to lie on and cover the front of said back rest, a strain distributing member of separable sections connected by couplings associated with the upper part of the cover for substantially its full width, and clips connected to the said couplings and adapted to be secured to a support.

1,782,816. DOOR-HOLDING DEVICE. JOHN P. GRIMLEY, Harrison, N. J., assignor to Samuel J. Rawlings, Kearny, N. J. Filed Nov. 26, 1929. Serial No. 409,904. 2 Claims. (Cl. 292—263.)

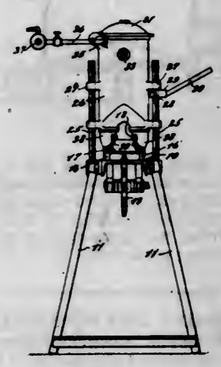
2. A door holder comprising a pair of pivotally connected links, one thereof being bent intermediate its ends forming an obtuse angle, means for pivotally securing the free end of the angled link to a door, means for pivotally securing the free end of the other link to a door frame, said angled link being so disposed with relation to said door as to bring the angled portion adjacent thereto into substantially parallel relation therewith when the door is opened, said last mentioned portion of the angled link having an aperture formed therethrough adjacent the angle in the link, a transversely slotted sleeve mounted vertically on the door adjacent the point of connection therewith of the angled link designed to receive in the slot thereof the apertured portion of the angled link, a bolt slidable in said sleeve and having a head with an inclined top surface adapted to extend into the slotted portion of the sleeve, a spring housed in the sleeve and surrounding the bolt and normally urging the bolt upwardly, and a pin member carried by the bolt for maintaining the same in a desired position.

1,782,817. COMBINATION FLOOR BOARD. GEORGE E. GRIMM, Toledo, Ohio, assignor to The Willys-Overland Company, Toledo, Ohio, a Corporation of Ohio. Filed Jan. 12, 1926. Serial No. 80,770. 1 Claim. (Cl. 296—1.)



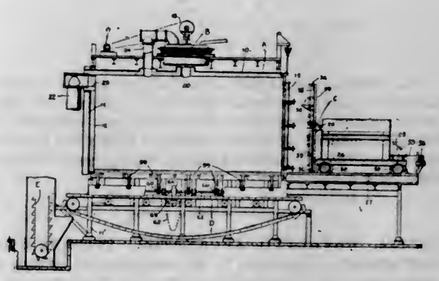
In a motor vehicle having a battery, a floor board above the battery, said floor-board being formed in two independent sections, one of which is immediately above the battery and readily removable, a flange on one of said sections for engaging the upper edge of the adjacent section, and spring means independent of the flange on one of said sections for urging the other section against said flange.

1,782,818. ARTIFICIAL EYE AND METHOD OF APPLYING EYELASHES THERETO. LEO J. GRUBMAN, Belle Harbor, N. Y., assignor to Markon Manufacturing Co. Inc., New York, N. Y., a Corporation of New York. Filed Feb. 7, 1927. Serial No. 166,871. 14 Claims. (Cl. 46—40.)



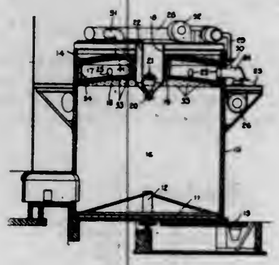
1. In an artificial eye, an eye shell of resilient material having a closed slit in its wall, and eyelashes having parts engaged through said slit and fixedly clamped between the opposed edges thereof by the inherent resiliency of the wall structure tending to close said slit.

1,782,819. CONSTRUCTION FOR DISPLAY CASES. HERMAN HANSEN, New York, N. Y., assignor to Francis Keil & Son, Inc., a Corporation of New York. Filed Dec. 29, 1925. Serial No. 78,079. 5 Claims. (Cl. 312—138.)



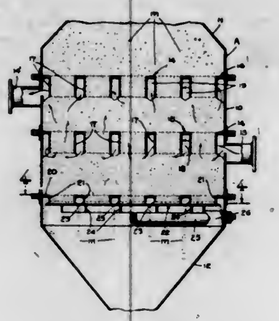
4. In construction for display cases and the like, in combination, a case having an opening therein adapted to be closed by at least two inclined panels adapted to slide into overlapping relation, the uppermost of said panels having an upper edge portion extending beyond the upper edge portion of the lower of said panels, an elongated member carried by said case adjacent the upper edge of the lower panel and arranged in substantial alinement with the latter, said member having a longitudinally extending groove for guiding a plurality of balls, a plurality of balls in said groove and interposed between said member and the lower face of the upper edge portion of said upper panel, means comprising an elongated strip for holding said balls in spaced relation, means associated with said groove member for holding said strip so that its plane extends substantially parallel to the plane of the upper panel, and anti-friction means for engagement with an upper portion of said lower panel.

1,782,820. CEMENT SPREADER. RALPH M. HARDGROVE, Allentown, Pa., assignor to Fuller Lehigh Company, Fullerton, Pa., a Corporation of Delaware. Filed July 1, 1927. Serial No. 202,827. 8 Claims. (Cl. 25—1.)



6. In a device for applying a layer of plastic material to objects, a horizontal guide for said objects having means to prevent lateral or vertical movement of said objects, a container for plastic material mounted in proximity to said guide, guides for said container to permit only vertical movement thereof, an exit opening from said container, a portion of which is substantially vertical and located below the tops of said objects as they pass along their guide, and means to cause said objects to pass transversely across said exit opening.

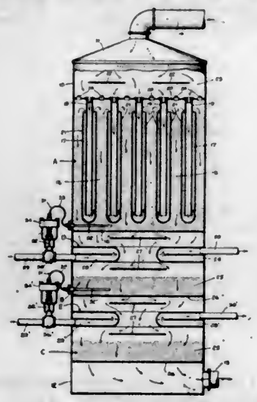
1,782,821. ACID-PHOSPHATE PLANT. INGENUIN HECHENBLEIKNER, Charlotte, N. C., assignor, by mesne assignments, to Chemical Construction Corporation, a Corporation of Delaware. Filed Apr. 14, 1927. Serial No. 183,687. 16 Claims. (Cl. 71—1.)



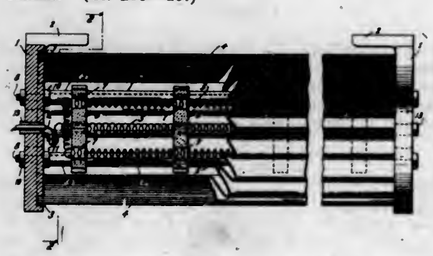
5. In an excavator plant, a den for containing the material to be excavated, a rotary cutter movable into and from said den comprising a disc, and a plurality of cutters mounted on the operative face of the disc, the disc having openings disposed therein whereby the rotation of the disc causes a suction of air from the outer face of the disc towards the operating face thereof.

1,782,822. COMBINED SPRAY DRIER AND BURNER. INGENUIN HECHENBLEIKNER, Charlotte, N. C., assignor, by mesne assignments, to Chemical Construction Corporation, a Corporation of Delaware. Filed May 18, 1927. Serial No. 192,403. 9 Claims. (Cl. 159—4.)

1. A combined spray drying and gas combustion apparatus built into a unitary structure comprising a spray drying chamber having an apertured upper wall, and a combustion chamber disposed immediately thereover for generating and supplying hot gases to said drying chamber through said apertured upper wall.



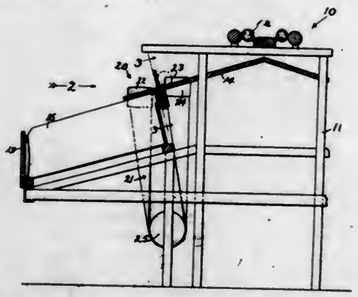
1,782,823. FILTERING AND DUST-COLLECTING APPARATUS. INGENUIN HECHENBLEIKNER, Charlotte, N. C., assignor, by mesne assignments, to Chemical Construction Corporation, a Corporation of Delaware. Filed Apr. 17, 1928. Serial No. 270,602. 11 Claims. (Cl. 183—46.)



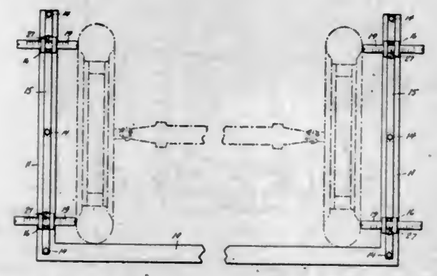
1. A filtering apparatus comprising a holder substantially filled with a granular filter mass, and a grid structure extending across said holder, said grid structure including an orificed plate the orifices of which are provided with means therein adjacent which free spaces are formed in the filter mass.

1,782,824. CATALYTIC APPARATUS. INGENUIN HECHENBLEIKNER, Charlotte, N. C., assignor, by mesne assignments, to Chemical Construction Corporation, a Corporation of Delaware. Filed May 18, 1928. Serial No. 278,867. 11 Claims. (Cl. 23—288.)

1. A converter system comprising a first converter of large heat generating capacity provided with a catalyst and with automatic cooling means for controlling the converter temperatures, a second converter of lower heat generating capacity connected in cascade to the exit end of the first converter, gas cooling means interposed between two converters, and means controlled by the temperature in said first converter for governing the operation of the said gas cooling means so as to regulate the temperature of the gases leaving the first converter and entering the said second converter.

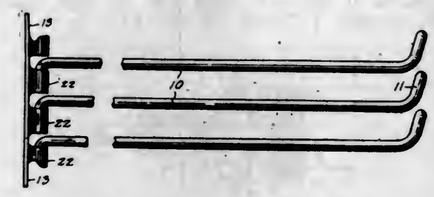


1,782,825. ELECTRIC HEATER. EMIL F. HOLINGER, New York, N. Y., assignor to Hudson Electrical Heating Corporation, New York, N. Y., a Corporation of New York. Filed Dec. 1, 1928. Serial No. 323,149. 2 Claims. (Cl. 219—19.)



1. The combination, in an electric heater, of end plates correspondingly grooved on their inner faces, a corrugated casing element bent to conform to the outline of said grooves and having its ends nested therein, means for holding said end plates and said casing element in assembled relation, and a resistance element supported in the casing thus formed, but out of electrical contact therewith.

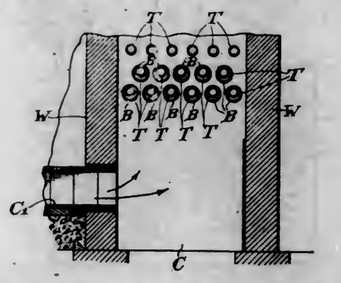
1,782,826. FRUIT DISTRIBUTOR. DANA E. KEECH, Glendale, Calif. Filed Oct. 1, 1929. Serial No. 396,459. 6 Claims. (Cl. 209—73.)



1. In a fruit sizer, the combination of: means for sizing fruit; a bin for receiving the sized fruit; a laterally inclined belt running longitudinally between said sizing means and said bin; a wall disposed alongside a lower edge of said inclined belt, said wall being divided into sections; means upon which said sections are mounted which prevents longitudinal movement of said sections and permits vertical movement thereof so that individual sections may be disposed out of contact with fruit carried on said belt; and means for temporarily retaining said individual sections in such inactive positions.

1,782,827. WHEEL ALIGNER. MARCUS A. LAHR, Tulsa, Okla. Filed Mar. 15, 1929. Serial No. 347,212. 14 Claims. (Cl. 33—203.)

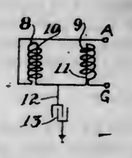
1. A wheel aligner comprising parallel arms, means securing said arms together, scale mounting members slidably secured to one of said arms to move longitudinally therealong, a scale slidably received in each mounting member for longitudinal movement therethrough at right angles to said arm, resilient means for yieldingly holding said scale mounting member in adjusted position on said arm and the scale in adjusted position in said mounting.



1,782,828. SWINGING-ARM TOWEL RACK. CHARLES A. MOSGROVE, Waterbury, Conn., assignor to The Autoyre Company, Oakville, Conn., a Corporation of Connecticut. Filed Aug. 3, 1929. Serial No. 383,241. 8 Claims. (Cl. 211—96.)

1. A towel rack comprising a plurality of swinging towel supporting arms and a wall plate for pivotally supporting said arms, said wall plate comprising a piece of stamped sheet metal having a plurality of spaced joining strips forming the central portion thereof, and a pair of spaced complementary semi-circular indentations above and below said strips in the side portions, said piece having its central portion rolled outwardly of the plane of the side portions so that said spaced strips form arm supporting bearings and said complementary indentations together form receiving holes for securing means.

1,782,829. HEAT-TRANSFER SYSTEM. ARTHUR E. NASH, Philadelphia, and JAMES S. ALCORN, Cynwyd, Pa., assignors to Alcorn Combustion Company, Philadelphia, Pa., a Corporation of Delaware. Filed Jan. 3, 1927. Serial No. 158,549. 12 Claims. (Cl. 196—116.)

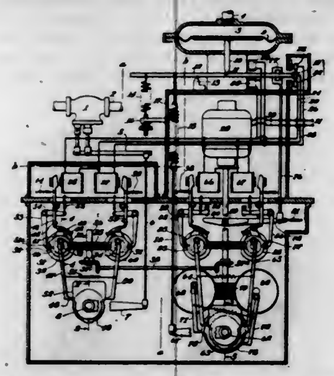


8. In the art of transferring heat to fluid contained in tubes in a zone in which there are hot gaseous products of combustion and in which there exists heat radiated from a primary source heated by said products of combustion, the method of diminishing the rate of application of heat to said fluid which comprises heating each of some of said tubes directly and substantially solely by radiation from an adjacent secondary source heated by convection by the hot gaseous products of combustion and by heat radiated from said primary source, by said secondary source substantially completely shielding each of said last named tubes from absorption of heat directly from the hot gaseous products of combustion throughout substantially the entire longitudinal extent of each of said last named tubes heated by said secondary source, and heating others of the tubes by convection by passing the hot gaseous products of combustion between and beyond said secondary sources.

1,782,830. MANUFACTURE OF STRONTIUM OXIDE. JAMES B. PIERCE, Jr., Charleston, W. Va., assignor to Barium Reduction Corporation, Charleston, W. Va., a Corporation of Delaware. Filed Jan. 29, 1927. Serial No. 164,659. 4 Claims. (Cl. 23—186.)

3. Strontium oxide in the form of flakes.

1,782,831. RADIOSIGNALING. ACE W. SLAGHT, near San Jose, Calif. Filed May 8, 1928. Serial No. 276,027. 1 Claim. (Cl. 250—20.)

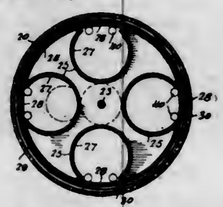


In a radio receiver, a radiant energy collector unit comprising a pair of permanently fixed coils having a predetermined fixed spaced relation, one of said coils having one of its ends connected to the ground terminal of the receiver and its opposite end connected to a conductor extending axially through said coil and connected to ground, the other of said coils having one of its ends connected to the aerial terminal of the receiver and its opposite end connected to a conductor extending axially through the last named coil and connected to the said ground.

1,782,832. REGULATOR. CHARLES H. SMOOT, Maplewood, N. J. Filed Mar. 14, 1929. Serial No. 346,917. 7 Claims. (Cl. 172—239.)

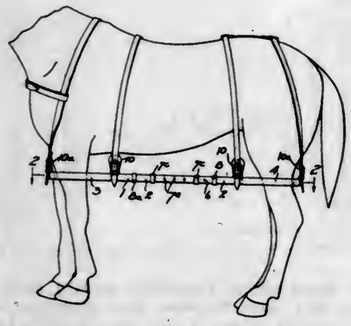
7. In a regulating system adapted to control the position of an element, a regulating device including a balancing member acted upon by controlling forces and by a force varying as a function of the position of said element, a second regulating device including a balancing member acted upon by controlling forces and by a force varying as a function of the position of said element but

delayed with respect thereto, means controlled by said last mentioned device in response to an unbalance of the balancing member thereof for causing a related variation



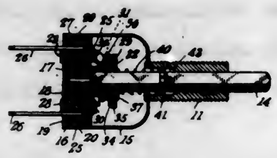
in one of the controlling forces acting upon the balancing member of the first mentioned device, and means for positioning said element upon an unbalance of the balancing member of said first mentioned device.

1,782,833. EYE SET FOR DOLLS. JOHN H. WILHELM, Rockaway Beach, N. Y., assignor to Markon Manufacturing Co. Inc., New York, N. Y., a Corporation of New York. Filed Jan. 19, 1928. Serial No. 247,764. 17 Claims. (Cl. 46—40.)



1. An eye set for a doll's head comprising a carrier, eye members movably mounted on the carrier, means connected to the eye members for moving the same between open and closed positions, and means on said carrier for normally checking the closing movement of said eye members and for permitting free closing movement of said eye members when the head has been turned to one side.

1,782,834. APPARATUS FOR RENDERING DISPLAYS VISIBLE FROM ALL SIDES. FRANCISZEK WLODARSKI, Poznan, Poland. Filed Aug. 10, 1928, Serial No. 298,813, and in Poland Oct. 31, 1927. 11 Claims. (Cl. 40—77.)

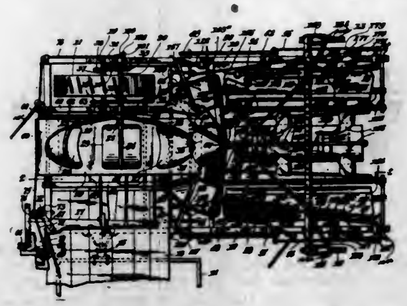


1. A display device for displaying in sequence a plurality of display cards so that each will be simultaneously visible from all sides of the device, comprising a plurality of cylinder segments fixed relatively to each other about an axis, each segment being adapted to support a display card upon its inner surface, means for illuminating the interiors of said segments, another cylinder segment rigidly connected to each of the first-named segments and having a black external surface, said other segments being each provided with a narrow slit, means for rotating all of said cylinder segments about said axis at high speed, a shutter adapted to expose one of said slits at a time, and mechanism for shifting said shutter relatively to said cylinder segments and to said slits whereby said slits are exposed one after the other and said cards become visible in sequence for predetermined intervals.

1,782,835. HOBBLE. WILHELM WÜNSCHE, Detroit, Mich. Filed Jan. 15, 1929. Serial No. 332,659. 1 Claim. (Cl. 54—71.)

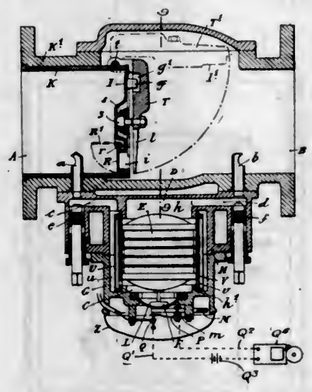
A hobble comprising two straps each having a loop formed at one end to encircle a horse's leg, each strap consisting of a single piece at its opposite end, in combination with a coupling member to which the single ends of both straps are so attached that the distance of either or both looped ends from said member may be varied.

1,782,836. ELECTRIC SNAP SWITCH. FRANK A. YOUNG and RAYMOND H. BOARDMAN, Meriden, Conn., assignors, by mesne assignments, to Connecticut Telephone & Electric Corporation, Meriden, Conn., a Corporation of Delaware. Filed Nov. 27, 1928. Serial No. 322,135. 7 Claims. (Cl. 200—63.)



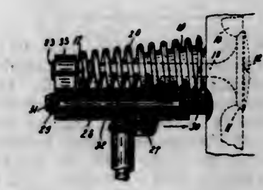
1. A snap switch comprising a supporting sleeve, a housing carried thereby, an insulating disc closing the rear end of said housing contacts carried by said disc, an operating shaft rotatably supported at the rear in said disc and near the front supported in said sleeve, a rotatable switch member mounted on said shaft but insulated therefrom and a spring pressed ratchet member insulated from said abaft and co-acting with said switch member.

1,782,837. SHEAF-SHOCKING MACHINE. NICHOLAS PAUL BOYCHUK and JOHN PAUL BOYCHUK, Edmonton, Alberta, Canada. Filed Apr. 5, 1926. Serial No. 99,915. 57 Claims. (Cl. 56—415.)



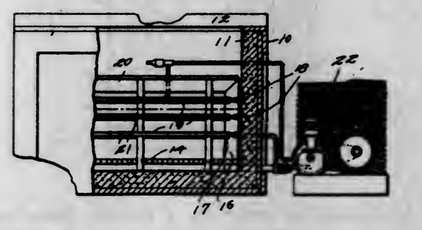
1. The combination with a binder having an arm carried by the binder knotter wheel shaft, of a shocking machine equipped with a conveyor mechanism including

a rotatable shaft carrying a plurality of radially disposed pans adapted to receive the sheaves discharged from the binder, a drive shaft, a normally disengaged clutch for establishing a drive connection between the



first mentioned shaft and the drive shaft, means controlled by said arm for engaging said clutch concurrently with delivery of a sheaf to one of said pans and means for automatically disengaging said clutch after a predetermined operation of the shaft carrying said pans.

1,782,838. APPARATUS FOR SIGNALING CONDITION OF FLUID IN CONDUITS. EUGENE BRILLIÉ, Paris, France. Filed Feb. 17, 1928, Serial No. 255,141, and in France Mar. 21, 1927. 5 Claims. (Cl. 169—23.)

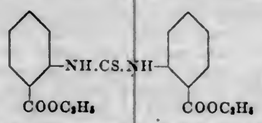


1. In apparatus for indicating the change of condition of a fluid from rest to flow, the combination of: a conduit; a fluid-operated member; a casing containing said fluid-operated member; means for connecting one side of said fluid-operated member with one point in the said conduit so as to transmit the fluid pressure occurring at said point to said side of the member; means for connecting the other side of said member to another point of the conduit lying in front of the first mentioned point in the direction of the flow of the fluid so as to transmit the fluid pressure occurring at said second point to said other side of the said member; a pressure reducing means arranged within the said conduit between the said two points for the purpose of increasing the pressure drop; a control member arranged outside the casing of the fluid operated member; and magnetic means for operatively connecting said control member with the said movable fluid-controlled member, substantially as described.

1,782,839. VALVE ACTION FOR INTERNAL-COMBUSTION ENGINES. EVERETT S. CAMERON, Tottenville, N. Y. Filed Mar. 17, 1928. Serial No. 262,456. 1 Claim. (Cl. 123—90.)

The combination with a valve cage provided with two valve seats, of two spring-controlled valves co-operating with said seats, said valves being normally maintained in their closed positions by the springs co-operating therewith, a stationary hollow guide spindle arranged in parallel relation to the stems of said valves, said spindle being adapted to contain lubricating material, a sleeve reciprocably mounted on said spindle, said spindle being provided with openings leading from its interior to that face of said sleeve which contacts with said spindle, whereby the lubricating material finds its way to the inner face of said sleeve, two prongs on to said sleeve in engagement with said valves, an anti-friction roller on said sleeve, and a rocker-shaft provided with a lever in engagement with said anti-friction roller for longitudinally shifting said sleeve, whereby said valves are simultaneously moved toward open positions in relation to their valve seats against the action of their springs when said rocker-shaft is actuated.

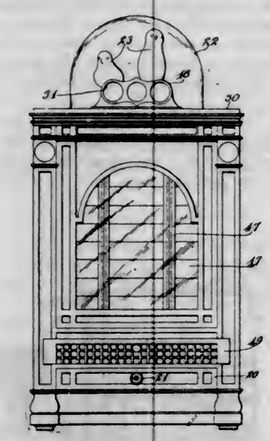
1,782,840. MILK COOLER. HARRY E. CANN, West Chester, Pa. Filed Mar. 24, 1928. Serial No. 264,405. 2 Claims. (Cl. 62—95.)



2. A cooling device comprising a cabinet having a cover, a heat absorbing liquid within the cabinet adapted to receive receptacles to be cooled, the surface of said liquid being exposed to incoming air when said cover is raised, and a refrigerating coil mounted in said liquid, said coil being completely submerged in said liquid when receptacles are therein and partly exposed above said liquid when said receptacles are removed, whereby said incoming air will be cooled by said exposed portion of said coil when a receptacle is removed.

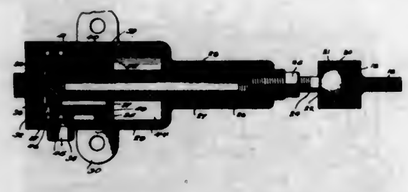
1,782,841. TREATING COPPER ORES PREPARATORY TO LEACHING. CARL E. CARSTENS, Anaconda, Mont., assignor to Anaconda Copper Mining Company, Anaconda, Mont., a Corporation of Montana. Filed Aug. 17, 1925. Serial No. 50,873. 2 Claims. (Cl. 23—268.)

1. In the art of percolation-leaching of crushed oxid ores of copper containing fines, the step which comprises adding about four to five percent by weight of moisture to the ore prior to the introduction of the ore into the leaching vat.



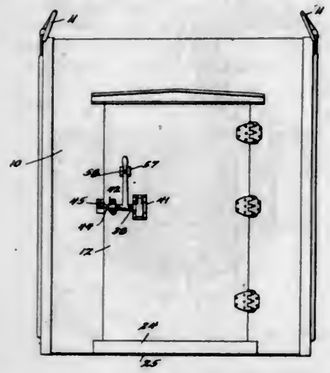
1,782,842. USE OF THE MONO- AND DI-CARBALKOXY-DIARYLTHIOUREAS AS ACCELERATORS IN THE VULCANIZATION OF RUBBER. CECIL JOHN TURRELL CRONSHAW and WILLIAM JOHNSON SMITH NAUNTON, Blackley, Manchester, England, assignors to British Dyestuffs Corporation Limited, Manchester, England. Filed Oct. 27, 1926, Serial No. 144,643, and in Great Britain Mar. 1, 1926. 2 Claims. (Cl. 18—53.)

1. The method of vulcanizing rubber which comprises admixing rubber with vulcanizing agents and an ortho carbalkoxyaryl thiourea having the formula



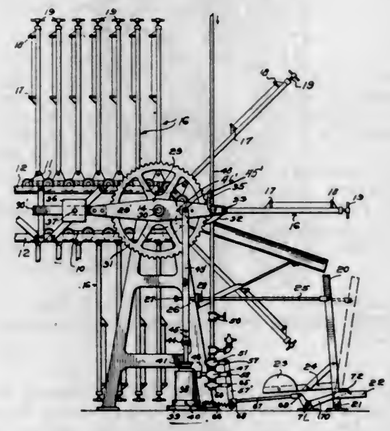
and subjecting the mixture to vulcanizing influences.

1,782,843. MECHANICALLY-OPERATED FIGURE TOY. ALBERT E. DERUS, Chicago, Ill. Filed May 12, 1926, Serial No. 108,614. Renewed Mar. 22, 1930. 1 Claim. (Cl. 46—40.)



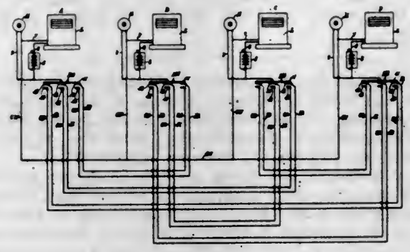
A sounding toy comprising a songbird figure having stationary and movable bill sections, a lever to vibrate the movable bill section, a spring attached to said movable bill section to normally urge the same towards said stationary bill section, a cam controlling said movable bill operating lever whereby to impart predetermined characteristics to the vibrations of said bill section, a sounding device, an actuator for the latter, an actuator control operated by said cam and synchronized with the vibrations of the movable bill section, a modulator for the sounding device, and a cam to operate the modulator with a predetermined order of movements to secure variable desired pitch characteristics from the sounding device.

1,782,844. LOCOMOTIVE BELL RINGER. DANIEL SAYER ELLIS, Hackensack, N. J., and CHARLES JAMES ZUSY, Yonkers, N. Y., assignors, by mesne assignments, to Ardco Manufacturing Company, Hoboken, N. J., a Corporation of Delaware. Filed May 5, 1928. Serial No. 275,385. 3 Claims. (Cl. 121—2.)



1. An improved locomotive bell ringer comprising a cylinder having an inlet at the central portion thereof, and an exhaust near one end thereof longitudinally and angularly offset from the inlet, a hollow slidable valve mounted in said cylinder and having inlet, exhaust, and venting annular channels in the periphery thereof, said inlet channel being located to the forward portion of the valve and said venting and exhaust channels being located to the rear portion of the valve, a piston connected to the bell and movably mounted within said valve, said valve having passages setting up communication between the inlet and exhaust channels and the space behind the piston, said valve also having passages connecting the forward portion of the cylinder with the venting channel of the valve.

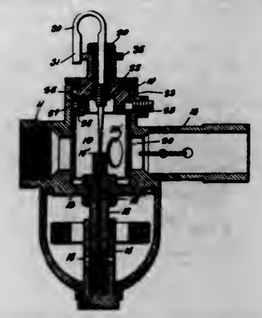
1,782,845. CLOSURE OPERATING AND LOCKING MECHANISM. FREDERICK K. FILDES, Altoona, Pa. Filed May 23, 1928. Serial No. 280,056. 6 Claims. (Cl. 292—5.)



1. A door locking and operating mechanism comprising in combination, a shaft journaled in transversely aligned bearings secured to the outside of the door and having a crank portion projecting beyond the edge of the door, a keeper secured to the door frame adjacent the door opening and comprising a hook portion adapted to be engaged by the crank when the shaft has been rotated from locking position through a predetermined angle, a slidable bolt mounted on the inside of the door operatively connected to said shaft, the outer end of said bolt being adapted to engage the door frame and lock the door, rotation of said shaft through said predetermined angle being sufficient to withdraw said bolt from the frame, whereby further rotation of said shaft by engaging said crank with said abutment loosens the door, and a handle operatively connected to said shaft.

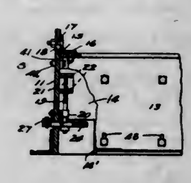
1,782,846. CLAMP MACHINE. STONEWALL J. GARDNER, New Albany, Ind. Filed July 24, 1930. Serial No. 470,518. 5 Claims. (Cl. 144—289.)

1. In a machine of the character described a traveling clamp support, a toothed wheel to drive the same, a pivoted lever arranged near the wheel, a pawl carried by the lever to engage the toothed wheel, and fluid pressure operated means to move the lever.



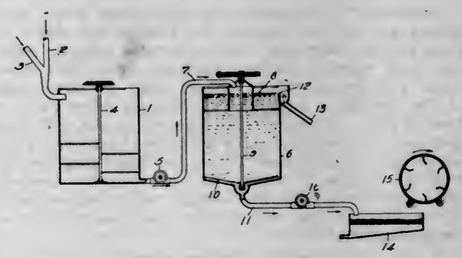
1,782,847. TELEPHONE SYSTEM. LOUIS M. GRANDIN, New York, N. Y. Filed Mar. 12, 1928. Serial No. 261,030. 10 Claims. (Cl. 179—37.)

1. In a telephone system, a plurality of stations, each including a transmitter and a loud speaking receiver, and a source of current, a common conductor for all of said transmitters, receivers, and sources of current, and switching means provided at each station to selectively connect said station in full inter-communicative relation with any one or more of the other stations, said switching means at each station being operable to exclude from inter-communicative relation all of such stations which previously have not been inter-connected with that station.



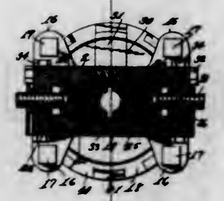
1,782,848. CARBURETOR. BENJAMIN F. GRAVELY, Dunbar, W. Va. Filed Jan. 18, 1930. Serial No. 421,851. 1 Claim. (Cl. 261—44.)

A carburetor including a casing, a nozzle for discharging gasoline into the casing, a rotatable throttle valve in the casing longitudinally split whereby to flex into contact with the walls of the casing, a portion of the valve being flexibly adjustable and peripherally grooved, means on the casing engaged in said groove whereby to cause longitudinal movement of the valve upon rotation



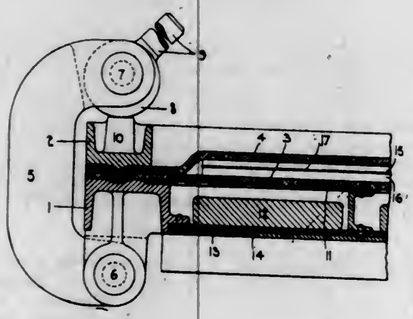
thereof, and a needle valve carried by the throttle valve movable with the throttle valve into and out of said nozzle.

1,782,849. BOWLING ALLEY. WALTER SCOTT HARTMAN, Calumet City, Ill. Filed Nov. 22, 1927. Serial No. 235,014. 2 Claims. (Cl. 273—51.)



1. A bowling alley construction including a pair of substantially wide spaced stationary side bars having elongated openings and forming the sides of the alley, an alley base including wide vertically movable transverse supporting bars to which the alley planks are secured, angle bars connecting the movable supporting bars, bolts extending through the angle bars and elongated openings to adjustably connect the alley base to the stationary side bars, and means for moving the alley base vertically.

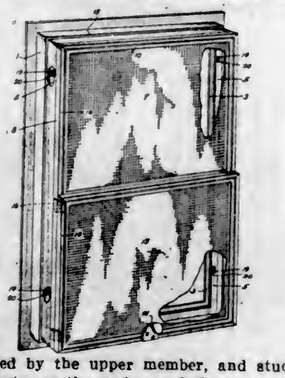
1,782,850. METHOD OF PURIFYING WATER AND APPARATUS THEREFOR. ROY LINDEN HILL, Tamaqua, Pa., assignor to Darco Corporation, Wilmington, Del., a Corporation of Delaware. Filed May 8, 1926. Serial No. 107,687. 4 Claims. (Cl. 210—9.)



1. In the purification of water, the process which comprises mixing a natural water with a very small amount of activated carbon and afterwards giving the water containing suspended carbon a slow rotational velocity of the order of one or two turns per hour about the axis of a cylindrical tank to produce an accelerated settling of said carbon.

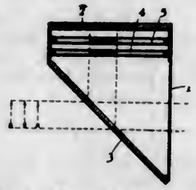
1,782,851. OIL SAVER. BENJAMIN P. HOFFMAN and AYERS M. HOFFMAN, Tulsa, Okla., assignors to The Pierce Development Company, Tulsa, Okla., a Corporation of Oklahoma. Filed Dec. 18, 1926. Serial No. 155,673. 2 Claims. (Cl. 286—16.)

1. An oil saver comprising a box-like body, packer blocks fitted in the body at opposite sides of the center thereof, means for adjusting the packers to compensate for wear, the body being slotted vertically in one side with the packer blocks extending partially across the slot from opposite sides thereof, and a closing bar removably secured in the slot in break-joint relation to the packers, and bridging the space between the inner ends of the packer blocks.



1,782,852. MANUFACTURE OF SPLINTERLESS GLASS. JOHN JEFFRAY, Ealing, London, England. Filed Dec. 4, 1929, Serial No. 411,442, and in Great Britain Nov. 12, 1928. 1 Claim. (Cl. 49—81.5.)

Apparatus for manufacturing splinterless glass, comprising an air-tight chamber for holding two sheets of glass and an interposed layer of suitable adhesive material, said chamber having collapsible upper and lower sides, a perforated plate secured under the lower side of the chamber, a compartment arranged below the perforated plate, heating devices inclosed in the said compartment and adapted to render the interposed layer adequately adhesive, and means for exhausting the air from the chamber to collapse its walls upon the sheets of glass and thereby effect the complete and permanent union of the sheets of glass at a pressure not exceeding that of the atmosphere.

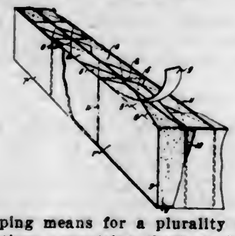


1,782,853. WINDOW-SCREEN STRUCTURE. KARL F. JONAS, Washington, D. C., assignor to Crittall Casement Window Company, Detroit, Mich., a Corporation of Michigan. Filed Apr. 8, 1929. Serial No. 353,579. 5 Claims. (Cl. 156—38.)

4. The combination with a window casing, of a screen supporting frame of channel members conforming to the contour of the casing, upper and lower screen members, the former fixed to the frame and the lower member slid-

ably supported by the upper member, and stud and slot connections between the casing and the screen supporting frame.

1,782,854. ADVERTISEMENT SIGN. THOMAS LAMB, Woodlea, and WILLIAM REID SHARP, Glenesk, England. Filed Oct. 5, 1929, Serial No. 397,644, and in Great Britain Oct. 10, 1928. 6 Claims. (Cl. 40—130.)



1. An animated reflector sign comprising a casing, a sign proper in said casing, two laterally spaced and stationary grids adjacent said sign proper and an angled mirror in said casing adapted to reflect the images of the said sign proper and grids through an opening in said casing.

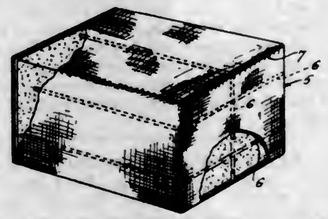
1,782,855. FELTED FIBROUS PRODUCTS AND METHOD OF MANUFACTURE. HAROLD L. LEVIN, Nutley, N. J., assignor to The Flintkote Company, Boston, Mass., a Corporation of Massachusetts. Filed Feb. 11, 1928. Serial No. 253,796. 15 Claims. (Cl. 92—21.)

1. A method of producing waterproof fibrous articles which comprises forming an aqueous fibrous stock, adding a waterproofing substance in aqueous dispersed form to said stock, causing a fixation of dispersed waterproofing particles upon the fibers by means of a fixing agent formed in situ in the mixture, at the iso-electric point of said agent, and thereafter forcing the aqueous mixture of fibers and waterproofing substance against a foraminous mould.

1,782,856. CONFECTION WRAPPER. HERBERT AUGUST MEYER, Buffalo, N. Y. Filed May 2, 1928. Serial No. 274,629. 3 Claims. (Cl. 229—87.)

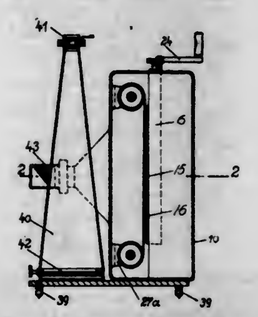
1. A wrapping means for a plurality of aligned individual confections comprising sheets each adapted to extend around the sides and bottom of a confection, a unitary flexible strip adapted to lie along the tops of the confections, and flaps provided upon the upper edges of the sheet and extending over the top of the strip, such flaps being unsecured to the strip so that an upward movement of the strip will readily lift the flaps.

1,782,857. PROCESS FOR OBTAINING A CATALYTIC GEL. ERNEST B. MILLER and GERALD C. CONNOLLY, Baltimore, Md., assignors to The Silica Gel Corporation, Baltimore, Md., a Corporation of Maryland. Filed Nov. 19, 1926. Serial No. 149,523. 8 Claims. (Cl. 23—233.)



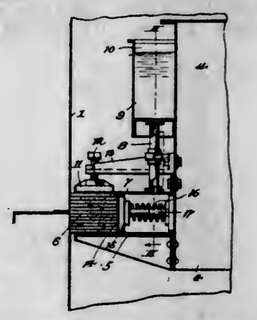
1. The process of preparing a catalytic agent consisting in contacting a hydrogel with a solution of a substance capable of being converted by heat into a catalytic agent, converting the impregnated hydrogel into a hard, porous gel, and heating the gel to decompose the substance into a catalytic agent.

1,782,858. KITE. CHARLES NAGY, Hillside, N. J. Filed July 5, 1928. Serial No. 290,509. 1 Claim. (Cl. 244—22.)



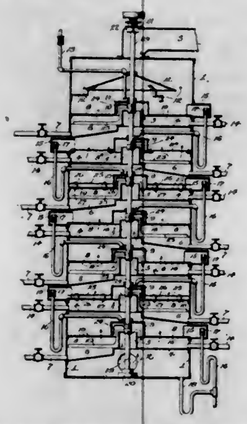
A kite comprising a frame having radial ribs rigidly secured together at their intersections, a cord attached to the ends of the ribs and providing loops between the ribs, and a cord attached to the loops midway of the ribs and forming a floating element of polygonal shape located between the ends of the ribs and their intersecting points and drawing inwardly the loops to define a star-shaped skeleton frame, said frame being covered with a sheet of suitable material, tail elements being attached to a plurality of ribs, and a flying cord having branches leading from its principal length to a plurality of ribs.

1,782,859. AUXILIARY SOAP-CAKE COVER. JAMES A. PEREGO, Elizabeth, La. Filed Oct. 22, 1929. Serial No. 401,456. 1 Claim. (Cl. 15—122.)



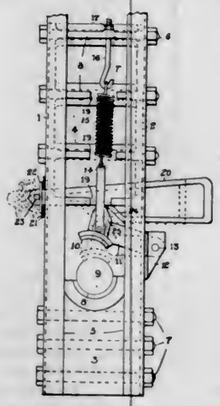
In combination with a cake of soap, a covering of cloth shaped to snugly receive the cake and having the same exterior shape as the cake, and resilient contractile bands connected with the interior of the covering and passing around the cake for holding the covering in close contact with the cake after the cake has been reduced in size.

1,782,860. APPARATUS FOR MAKING EXPOSURES OF THE PATH OR ROUTE OF FLYING MACHINES OR THE LIKE. ERNST REIPERT, Nowawes, near Potsdam, Germany, assignor to Askania-Werke Aktiengesellschaft vormals Centralwerkstatt Dessau und Carl Bamberg-Friedenau, Berlin-Friedenau, Germany. Filed Feb. 16, 1928, Serial No. 254,830, and in Germany Sept. 15, 1926. 8 Claims. (Cl. 95—12.5.)



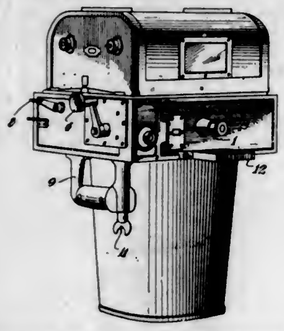
1. An apparatus for making exposures of the path or route of a flying machine or the like, comprising a photographic camera; a searcher camera arranged adjacent to the first-mentioned camera and through which the object is observed; a pair of common diaphragms for the cameras, each having a pair of openings of the diaphragms therein, the openings of each camera overlapping and the openings of the diaphragms of the photographic camera forming a restricted opening; and means for moving said diaphragms to adjust the openings of the diaphragms in the searcher camera to maintain the object to be photographed within the restricted opening of the diaphragms of the photographic camera.

1,782,861. GAS HOLDER. FREDERICK H. WAGNER, Baltimore, Md., assignor to The Bartlett Hayward Co., Baltimore, Md., a Corporation of Maryland. Filed Oct. 23, 1926. Serial No. 143,766. 3 Claims. (Cl. 48—176.)



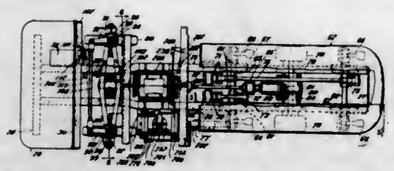
1. In a waterless gas holder, the combination of a shell; a piston-like closure therefor; a shelf secured to the circumference of the closure and extending around the same, the outer edge of said shelf stopping short of the wall of the shell; a body of felt mounted upon the shelf; a plate overlying the felt extending inwardly and connected to the closure thereby forming a pocket; means for constantly urging the felt outwardly into contact with the wall of the shell; and a reservoir for liquid communicating with the pocket aforesaid.

1,782,862. LIQUID AND GAS CONTACT APPARATUS. FREDERICK H. WAGNER, Baltimore, Md., assignor to The Bartlett Hayward Company, Baltimore, Md., a Corporation of Maryland. Filed Mar. 14, 1928. Serial No. 261,625. 4 Claims. (Cl. 261—114.)



1. In a gas and liquid contact apparatus the combination of a casing having a gas inlet and a gas outlet; a series of chambers formed therein by a series of transversely extending plates, each plate having a passage for the upflow of gas associated therewith; means for introducing a liquid into the chambers; a reticular element extending transversely of each chamber and closing said chamber against upward passage of gas other than through such reticular element; means associated with the gas passages aforesaid for causing the gas as it is forced upwardly through the casing to flow against and to carry a portion at least of the liquid from the lower part of each chamber upwardly through the reticular element located therein, such liquid being retained upon said element by the upflowing gas stream; a trapped overflow for liquid extending from a point above the reticular element to a point within the chamber next below; and means for introducing liquid directly into said chambers independently of each other.

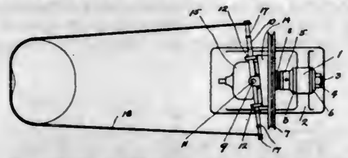
1,782,863. PITMAN. CLYDE S. WRIGHT, Toledo, Ohio, assignor to The National Supply Company, Toledo, Ohio, a Corporation of Ohio. Filed Nov. 8, 1926. Serial No. 146,980. 1 Claim. (Cl. 287—93.)



In a metallic pitman, a pair of individual channel bars extending longitudinally of the pitman, a block distinct from the bars and seated in the channels of both bars, a wrist-pin bearing member carried by the block, a second block seated in the said channels of the bars and spaced from the first block, means for clamping the blocks to the bars, a bearing movable in the said space for engaging a wrist-pin opposite the portion thereof engageable by the first bearing member, and means cooperating with the second block and the movable bearing for holding the movable bearing in operative position.

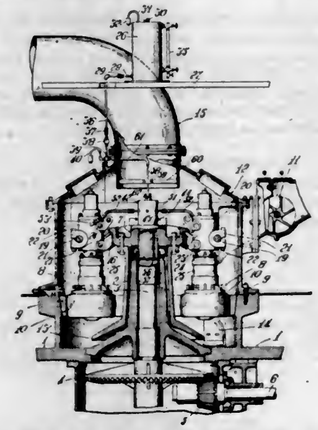
1,782,864. AERIAL CAMERA. AMBROSIUS BRIECHLE, New York, N. Y., assignor to Fairchild Aerial Camera Corporation, New York, N. Y., a Corporation of New York. Filed Dec. 10, 1929. Serial No. 412,980. 4 Claims. (Cl. 95—12.5.)

1. In combination with an aerial camera, a plurality of attachments for manual film-winding control handles and a plurality of shutter tripping devices.



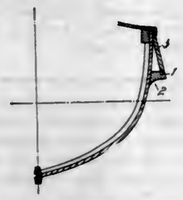
1,782,865. AUTOMOBILE LIFT TRUCK. ROBERT J. BURROWS, Buchanan, Mich., assignor to Clark Tructractor Company, Buchanan, Mich., a Corporation of Michigan. Filed May 1, 1922. Serial No. 557,646. 21 Claims. (Cl. 254—10.)

1. A lift truck comprising a main frame, a lifting platform supported at one end portion thereof, lifting means supporting said platform on said frame and operable to move the same upwardly meanwhile maintaining its horizontal position, propelling wheels supporting said frame and located under said platform, an operator's platform at the other end of said frame, dirigible wheels supporting the latter end of said frame, a motor mounted on said frame between said platforms, a unidirectional drive shaft disposed longitudinally of said frame and driven by said motor, a shaft extending longitudinally of said frame and connected with said drive shaft and with said propelling wheels for propelling the truck, means driven by said drive shaft and operatively connected with said lifting means for moving the lifting platform upwardly, and devices operable from the operator's platform for controlling the propulsion of the truck and the operation of said lifting means, respectively.



1,782,866. EXERCISING AND MASSAGING MACHINE. WILLIAM C. CARR, Richmond, Va. Filed Mar. 13, 1930. Serial No. 435,389. 12 Claims. (Cl. 128—63.)

5. An exercising machine comprising a support; an arbor mounted on the support; an oscillating bar pivoted on the arbor; rollers mounted on the bar on either side of the pivot; annular shoes of non-metallic material mounted on the rollers; a cam rotatably mounted on the arbor and



adapted to engage the said rollers to oscillate the bar; means for adjusting the contact between the rollers and the cam; and means for rotating the cam.

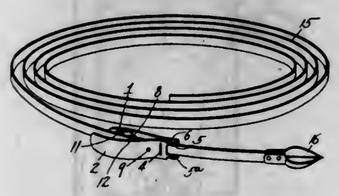
1,782,867. CENTRAL LUBRICATION SYSTEM FOR ROLLER-MILL ROLLERS. PHILIP DAVIDSON, New York, N. Y., assignor to International Combustion Engineering Corporation, New York, N. Y., a Corporation of Delaware. Filed Nov. 8, 1928. Serial No. 318,070. 14 Claims. (Cl. 184—6.)

1. In an oiling system for pulverizing mills, a distributing head adapted to rotate about its central vertical axis, said head comprising an enclosed chamber divided in its lower portion by a plurality of radial partitions into a plurality of distributing chambers arranged symmetrically about the axis of rotation, a conduit leading from each distributing chamber, a relatively stationary reservoir for lubricant, a conduit leading from the reservoir and projecting into the distributing head along the axis of rotation of the head, this conduit having a lateral extension at its lower end for discharging lubricant successively into the rotating distributing chambers.

1,782,868. HIGH-SPEED VESSEL. RICHARD DEETJEN, Berlin-Wilmersdorf, Germany, assignor to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany, a Corporation of Germany. Filed Jan. 4, 1929, Serial No. 330,353, and in Germany Aug. 2, 1926. 3 Claims. (Cl. 114—66.5.)

3. In a high-speed vessel with convex hull, a ledge concave at its underside and extending along each side of the vessel from near the middle of the hull to the bow, said ledges being so spaced above the water line that they are within reach of the bow-wave developed when going full speed ahead.

1,782,869. METHOD FOR RECOVERING THE FIBROUS MATERIAL FROM SUGAR CANE. JOAQUIN JULIO DE LA ROZA, Sr., Brooklyn, N. Y., assignor to Bagasse Products Corporation, New York, N. Y., a Corporation of New York. Filed Mar. 25, 1926. Serial No. 97,452. 4 Claims. (Cl. 92—9.)

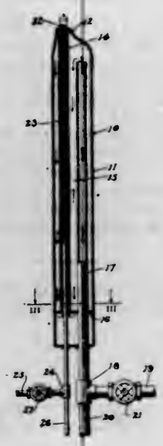


1. A method for recovering the fibrous material from sugar cane, which includes the step of treating the fibrous part of the cane with substantially neutral water at a temperature sufficient to remove or transform most of the substances combined with the fibrous part, said treatment being carried out in the substantial absence of air.

1,782,870. GASKET. JAMES G. DICKSON, Glencoe, Ill. Filed Sept. 10, 1928. Serial No. 305,077. 1 Claim. (Cl. 288—1.)

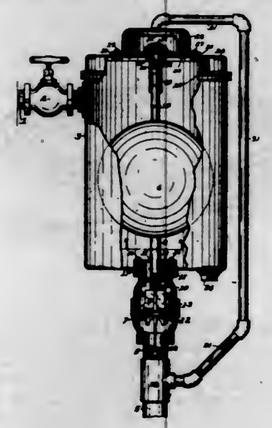
A gasket comprising a binding shell of ductile metal and a filling formed entirely of a plurality of thin pliable laminæ of ductile metal arranged in flatwise contact one with the other, said laminæ being sufficient in number and having a degree of tenuity to provide for adjustment by compression to irregularities of surfaces between which used, while at the same time providing for variation in thickness of the uncompressed portions sufficient to effect a tight joint.

1,782,871. HANDLE FOR PIPE CLEANERS. CHARLES FISCHER, New York, N. Y. Filed May 19, 1927. Serial No. 192,639. 5 Claims. (Cl. 81—5.1.)



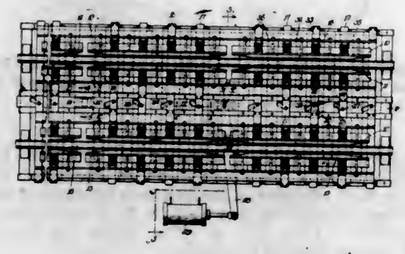
1. A gripping handle for sewer pipe cleaners or the like comprising, a pair of coacting metal gripping handles, each provided with a transverse gripping jaw, one of said handles provided with a pair of laterally spaced hooks, the other handle provided with laterally spaced eyes, with which said hooks separately and loosely engage, the lateral spacing between the hooks permitting the ribbon attached to a pipe cleaner to pass between them, and a spring secured to one of said handles and engaging the other handle so as to normally press said handles and said gripping jaws apart.

1,782,872. TORCH. PERCY M. FORSTER, Berkeley, Calif. Filed Nov. 26, 1929. Serial No. 409,837. 7 Claims. (Cl. 158—27.4.)



6. A torch including a casing, a tube arranged therein and terminating at one end in a nozzle, a mixing chamber surrounding the tube and communicating therewith at the other end thereof, means for delivering gas and

air to the mixing chamber at a point where the gas and air must reverse its direction of flow before passing through



the tube to the nozzle, and a pipe arranged to extend through said tube for delivering oxygen and compressed air at the nozzle.

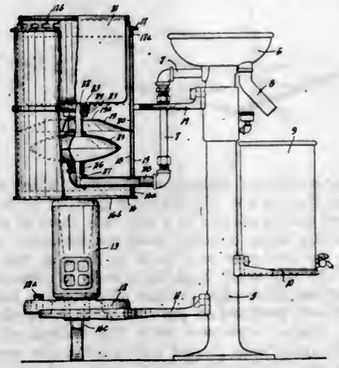
1,782,873. CIRCULATION REGULATOR FOR HEATING SYSTEMS. ESTELLE M. GURNEY, New York, N. Y. Filed Oct. 1, 1929. Serial No. 396,551. 4 Claims. (Cl. 137—103.)

1. An automatic trap comprising a casing having an inlet, an outlet for water provided with a valve, a steam and air outlet at the top of said casing, a gravity valve controlling the steam outlet, a perforate sleeve on the gravity valve open to the casing permitting excessive pressure to raise the valve, means for limiting the raising of the valve, a cap over the valve connected with said outlet below the valve therein, a float operable in said casing, said float having a lower stem engaged with outlet valve, and an upper stem slidable in said sleeve to raise the gravity valve simultaneously with said outlet valve.

1,782,874. TRACK-BRAKE MECHANISM. GEORGE HANNAUER, Calumet City, Ill., and EDGAR M. WILCOX, Hammond, Ind., assignors to Hannauer Car Retarder Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 29, 1926. Serial No. 98,123. 2 Claims. (Cl. 188—62.)

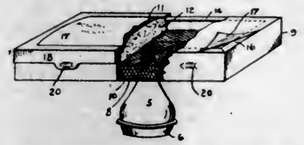
1. In a device of the character described, the combination of rails, resiliently mounted brakes on both sides of each rail, means connecting alternate brakes longitudinal operating means disposed between the rails and having slots disposed angularly with respect to said rails, and pins on said first named means extending in said slots for moving said brakes into braking position.

1,782,875. ANTI-INDUCTION SHIELD. ALFRED HERZ, Chicago, Ill. Filed Feb. 16, 1928. Serial No. 254,706. 4 Claims. (Cl. 171—91.)



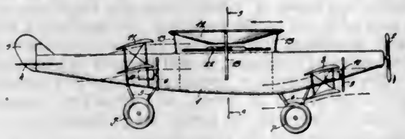
1. A system of the class described, comprising in combination an A. C. power transmitting line comprising aerial conductors insulated from ground except through a grounded neutral connection, an insulated signaling conductor paralleling the power line for a sufficient distance that when it is subjected to the inductive effect of current flow in the power line a potential will tend to be induced upon said signaling conductor in excess of the insulation value of said signaling conductor, a shielding wire of substantially the conductivity of the aerial conductors of the power line interposed between the power line and the signaling conductor, and a series of highly conductive grounded taps connected to said shielding wire, said shielding wire being of sufficient capacity to conduct therethrough the return flow of current in case of a ground fault of one of the conductors of the transmission line, and by the induced current flow caused by the ungrounded flow of current in the power line, or the conducted flow of fault current in the power line, reducing the induced voltage on the signaling conductor to a safe value within the insulation value of the same.

1,782,876. CAN-CLEANING-MACHINE HEATER. DEDRICK A. MAANUM, Minneapolis, Minn., assignor, by mesne assignments, to Cherry-Burrell Corporation, Wilmington, Del., a Corporation of Delaware. Filed Mar. 28, 1927. Serial No. 178,990. 1 Claim. (Cl. 126—350.)



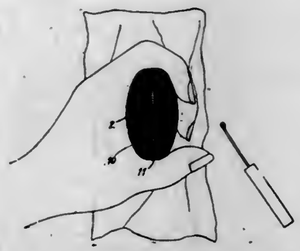
A water heater comprising a burner, a top annular plate and a bottom annular plate having opposing flanges,

an outer casing arranged between said plates and on the outside of said flanges above the heater, a lower inner casing spaced from the outer casing and supported on the bottom plate inside of its flange, an upper inner casing supported in engagement with the top plate on the inside of its flange, a main water container supported within the upper inner casing, an outlet pipe passing through the



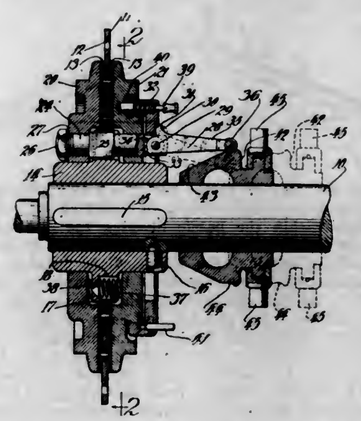
lower inner casing and the outer casing, a lenticular container connected with and supported by said outlet pipe, a pipe connecting the top of the lenticular container with the bottom of the main container, and a frusto-conical deflector arranged between the lenticular container and the main container with its peripheral margin located between the lower and upper inner casings.

1,782,877. INKED STAMP. THOMAS E. MADDEN, Newark, N. J. Filed Aug. 17, 1928. Serial No. 300,270. 5 Claims. (Cl. 101—125.)



1. In a hand stamp of the class described, a housing having an inturned flange extending around said housing, a pad within said housing adapted to rest upon said flange, an open walled five-sided chamber between said housing and said pad, an outer frame adapted to be secured over said housing, a stencil between said outer frame and housing and over said pad, and means for supplying ink to said pad through said housing.

1,782,878. AEROPLANE. RICHARD H. O'MASSEY, Denver, Colo., assignor of one-half to Eloy Padia, Denver, Colo. Filed Aug. 15, 1929. Serial No. 386,014. 6 Claims. (Cl. 244—15.)

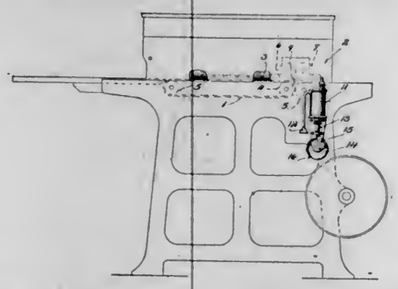


1. A tandem plane having an elongated fuselage, oppositely extending planes secured to the fuselage and spaced longitudinally thereof, the fuselage having a vertical opening located between the first two sets of planes, an elevating propeller located above the opening and rotatable about a vertical axis, and an elevating surface located above the elevating propeller, said surface having an opening concentric with the propeller.

1,782,879. HOLDER FOR REKNITTING FABRICS. ALEXANDER C. PARLINI, Woodside, N. Y., assignor to Gotham Knitbac Machine Corporation, a Corporation of Delaware. Filed June 22, 1929. Serial No. 372,919. 11 Claims. (Cl. 66—1.)

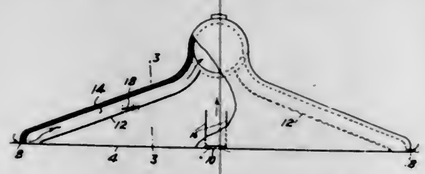
1. A holder for supporting a fabric having a run therein to be re-knitted comprising, a portion having an ellipsoidal shape in cross-sections at right angles to each other and a substantially rectangular recess therein extending parallel with the longest axis of said portion and across which the fabric may be stretched with a greater tension longitudinally of the run than laterally thereof.

1,782,880. FRICTION CLUTCH. WILLIAM J. PEARMAIN, Racine, Wis., assignor to Twin Disc Clutch Company, Racine, Wis., a Corporation of Wisconsin. Filed Apr. 22, 1929. Serial No. 356,961. 10 Claims. (Cl. 192—68.)



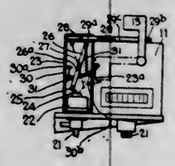
4. The combination with a clutch including a friction plate and a hub adapted for attachment, respectively, to separate rotating elements and held against relative axial movement, of a pair of gripping members engageable with the opposite sides of said plate and arranged for axial movement on said hub, driving pins engaging one of said members and connecting both of said members for rotatory motion with the hub, levers pivotally mounted on the unengaged ends of said pins, a plate adjustably carried by one of said gripping members for coacting with the adjacent ends of said levers, and means for actuating said levers to force said gripping members against said friction plate.

1,782,881. ATTACHMENT FOR BRONZING MACHINES. ERWIN E. RADLOFF and AUGUST W. JANKE, Milwaukee, Wis., assignors to C. B. Henschel Mfg. Co., Milwaukee, Wis. Filed Aug. 25, 1928. Serial No. 302,116. 1 Claim. (Cl. 271—74.)



In combination with a plurality of rollers arranged in intimate contact and in opposed pairs with the pairs ex-

tending both vertically and horizontally, of a feeding belt passing around one of said rollers and in intimate contact with a vertically opposed roller for receiving sheets thereon, and an air pipe extending longitudinally of the

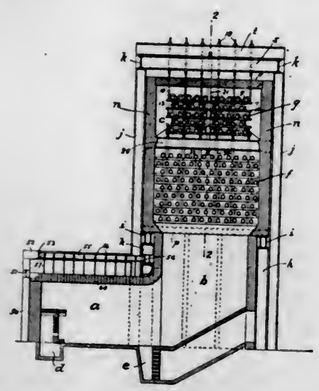


roller around which the belt passes and having a plurality of apertures directed in an upwardly inclined plane toward said belt, and means for directing a pulsating blast of air through said apertures to free the sheets from said belt.

1,782,882. VACUUM-CLEANER NOZZLE. SAMUEL HOWARD RIPPEY, Philadelphia, Pa. Filed Dec. 13, 1927. Serial No. 239,652. 1 Claim. (Cl. 15—155.)

A vacuum cleaner nozzle having an exit arranged for connection to a suction means, an elongated entrance, and partitions within the nozzle dividing the elongated entrance to form two end intake openings and at least one intermediate opening, the intermediate opening having its bounding walls substantially in one plane and arranged to contact substantially throughout their extent with a surface being cleaned, and each of the end openings being substantially in said plane and opening in the direction of said plane above said plane to draw a current of air across the surface being cleaned, the partitions acting to lead air currents from said openings independently towards the exit to prevent interference with each other.

1,782,883. CONTROL FOR ELECTRIC ADVERTISING SIGNS. EDWARD M. ROSENFIELD, New York, N. Y. Filed Sept. 11, 1929. Serial No. 391,749. 9 Claims. (Cl. 40—52.)

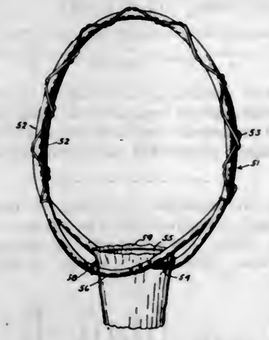


1. In a motor vehicle equipped with a manually controlled taximeter, an electric sign, of a switch for controlling the operation of said sign, and manually operated means detached from and interlocking with the manual control of said taximeter for actuating the switch.

1,782,884. METHOD OF MAKING PAPER BAGS. THOMAS M. ROYAL, Philadelphia, Pa. Filed Feb. 7, 1929. Serial No. 338,075. 6 Claims. (Cl. 93—35.)

1. The method of making a paper bag, which comprises as steps therein the placing of a coating of a selected substance upon a portion of a side of a sheet of paper, the said coating being omitted from one marginal edge portion of the said side and from portions at the opposite ends of the said sheet, applying a strip of adhesive to the uncoated marginal edge surface of said side, folding the opposite side portions of the said sheet inwardly to produce a tubular structure with the waterproof coating upon the inner side thereof and uniting the overlapping edges of the said side by means of the said strip of adhesive, and thereafter closing one end of the said tubular structure.

1,782,885. TUBE STILL FURNACE. HENRY THOMAS, Ridley Park, Pa., assignor to Sun Oil Company, Philadelphia, Pa., a Corporation of New Jersey. Filed July 6, 1927. Serial No. 203,702. 9 Claims. (Cl. 122—510.)

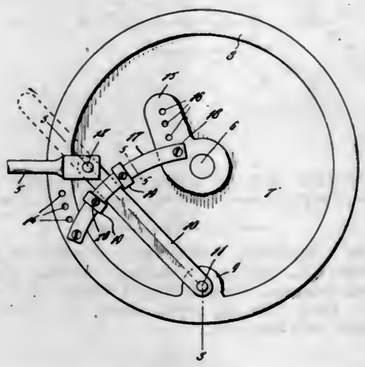


1. A furnace comprising walls and a roof enclosing a chamber, two banks of tubes therein one above the other, two sets of metal beams overlying the chamber, a set of hangers depending from one set of beams, crossbars connected with and supported by said hangers and supporting the tubes of one bank, a second set of hangers depending from the other set of beams, and cross-bars connected with and supported by the second set of hangers and supporting the tubes of the other bank.

1,782,886. ATTACHMENT FOR CONTAINERS. FRED H. AXELL, Oakland, Calif. Filed Jan. 29, 1929. Serial No. 335,940. 9 Claims. (Cl. 215—100.)

8. In a handle member for mounting on a generally cylindrical object, a pair of generally like and planar loop elements formed of resiliently flexible rod material

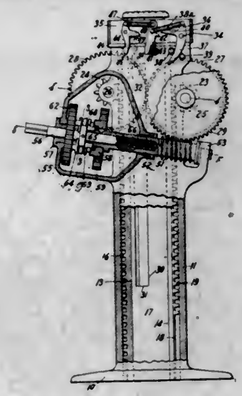
and fixed together in generally parallel relation at spaced points along their length and having mutually opposed portions between a pair of said points separable axially of



the loops to provide an opening for receiving the object, and spring means operative between said portions to resist said separation thereof.

1,782,887. PROCESS OF PRODUCING COMPOSITIONS CONTAINING COMPOUNDS OF ALGINIC ACID AND PRODUCT THEREOF. LAURIE LORNE BURGESS, Cambridge, Mass., assignor to Plastic, Inc., Keene, N. H., a Corporation of New Hampshire. Filed July 14, 1928. Serial No. 292,905. 24 Claims. (Cl. 260—2.)

1. The process which comprises forming an insoluble product by the reaction of alginic acid upon a hydrocarbon and then plasticizing the product by the addition of an alkali.



24. A product comprising a reaction product of alginic acid and paraffin wax from which soluble constituents have been partly removed, the same having been combined with a metal base, and containing a finely divided metal.

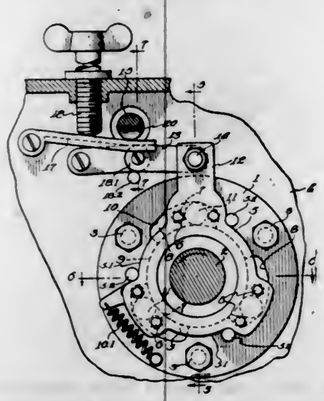
1,782,888. MECHANICAL MOVEMENT. WILLIAM C. DENHAM, Keensburg, Ill. Filed Jan. 18, 1929. Serial No. 333,438. 2 Claims. (Cl. 74—20.)

1. A mechanical movement including a rotary member, a pitman, a bar pivotally engaged at one end to an off center point of the rotary member and extending tangentially thereto, a pitman, a wrist pin connecting the pitman with the other end of the bar, an arcuate member, means for mounting an arcuate member on the rotary member across the bar, stop collars on the arcuate member one to each side of the bar to limit the movement thereof, means for adjusting the arcuate member.

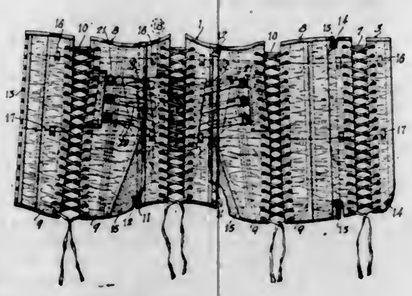
1,782,889. LIFTING MECHANISM. JOHN DOLAN, Dayton, Ohio. Filed Oct. 17, 1927. Serial No. 226,600 17 Claims. (Cl. 254—97.)

1. In a lifting mechanism, a hollow standard, an outer lifting member mounted for vertical movement in said standard, having teeth on one side thereof and having a longitudinal guideway opening through the other side thereof, an inner lifting member slidably mounted in said guideway and having a part extending beyond said guideway and overlapping the edges of said outer member at the sides of said guideway, said part of said inner lifting member having teeth on the outer side thereof, separate pinions to engage the teeth on the respective lifting members, and means to actuate said pinions.

1,782,890. VENTILATING APPARATUS. HENRY L. ELLIOTT and ROBERT A. CARROLL, Claysville, Pa., assignors of one-third to Thomas W. Henderson, Washington, Pa. Filed Apr. 13, 1929. Serial No. 354,781. 2 Claims. (Cl. 261—11.)



1. In a ventilating apparatus of the character described, a closed receptacle, a partition wall dividing said receptacle into a primary chamber and a secondary chamber, said chambers communicating with each other at the upper end of said partition wall, a primary cooling element mounted in said primary chamber, a secondary cooling element mounted in said secondary chamber, liquid stored in said primary chamber and partially submerging said primary element, means for forcing air under pressure through the liquid in said primary chamber and through said secondary chamber, a plurality of baffle plates fixed in said receptacle for directing the air against said cooling elements on its passage through said chambers, and means communicating with said secondary chamber and with the heat distributing ducts of a hot air furnace for distributing the air from said receptacle through said ducts.

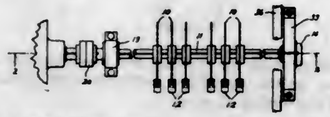


1,782,891. AUTOMOBILE BRAKE. REMI J. GITS, Chicago, Ill. Filed July 13, 1929. Serial No. 378,141. 7 Claims. (Cl. 192—4.)

1. In an automobile braking device of the class described, a propeller shaft provided with an annular brak-

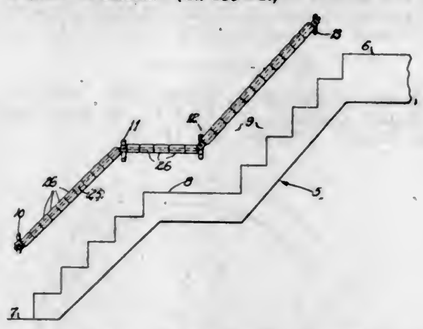
ing surface, a fixed braking ring surrounding said braking surface and having inclined surfaces facing said braking surface, gripping rollers located between said braking ring and said braking surface, control means for positioning said rollers between the braking surface and braking ring into wedging relation therewith for one direction of rotation of the shaft, and means for manually adjusting said control means to hold the rollers in inoperative position.

1,782,892. CORSETIERE'S FITTING APPARATUS. ETTA GRAY, New Haven, Conn., assignor to Barclay Corset Company, a Corporation of New Jersey. Filed June 29, 1928. Serial No. 289,114. 1 Claim. (Cl. 2—27.)



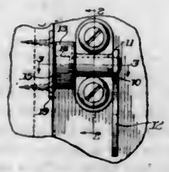
A corsetiere's fitting apparatus comprising a front section, a back section and side sections, said sections extending from top to bottom of the apparatus, and each section being composed of a plurality of parts each extending from top to bottom of the respective section, means for connecting the side edges of said parts of each section for relative adjustment of said parts and quick-detachable fastener elements on both side edges of each of said sections to cooperate with the fastener elements on another section for separably connecting the side edges of said sections together so that a corsetiere may connect said sections together and apply said apparatus girthwise to the body of a person to be fitted for a corset, relatively adjust said parts of the sections by the first-mentioned means to modify the figure as desired, and take measurements for a corset to be made to maintain such modified figure.

1,782,893. BOAT-HULL CONSTRUCTION. HERALD B. GREENING, Hamilton, Ontario, Canada, assignor to Galloway Engineering Company Limited, Hamilton, Ontario, Canada. Filed Dec. 14, 1929. Serial No. 414,080. 10 Claims. (Cl. 114—66.5.)



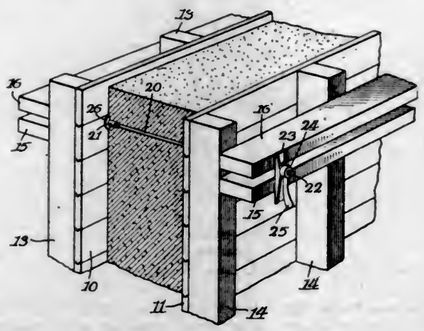
1. A boat hull comprising longitudinal members spaced apart, a flexible bottom supported by said longitudinal members, and transverse members arranged clear of the bottom and rigidly supporting said longitudinal members.

1,782,984. GANG EDGER. WILLIAM B. GRUETER, Menominee, Mich., assignor to The Prescott Company, Menominee, Mich., a Corporation of Michigan. Filed June 14, 1926. Serial No. 115,761. 6 Claims. (Cl. 143—37.)



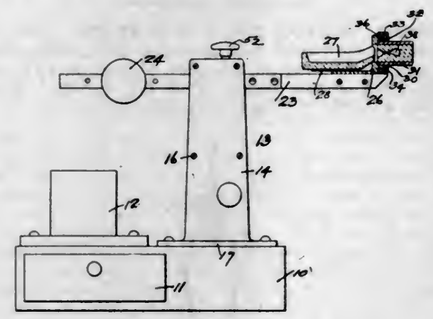
1. In a gang edger having an arbor, saws splined thereon and a bridge tree adjacent one end of the arbor, a bearing slidably mounted in said bridge tree, said bearing including cooperable rotating and supporting parts, and means for detachably connecting said bearing to said arbor whereby the bearing may be removed as a unit to permit removal of the saws from said arbor.

1,782,895. FLEXIBLE HANDRAIL AND SUPPORT THEREFOR. WILLIAM O. HARTMAN, St. Louis, Mo., assignor to Welsh-Hartman Co., St. Louis, Mo., a Corporation of Missouri. Filed Mar. 29, 1929. Serial No. 350,958. 2 Claims. (Cl. 189—1.)



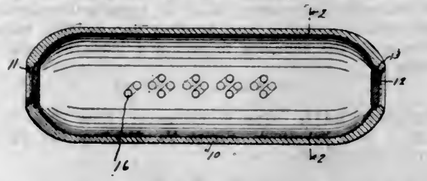
1. A flexible hand rail having buttons slidably secured thereon, a support, said hand rail secured in said support.

1,782,896. WINDOW FASTENER. ANDREW HOFFMAN, Chicago, Ill., assignor to Andrew Hoffman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed July 15, 1927. Serial No. 205,922. 8 Claims. (Cl. 292—241.)



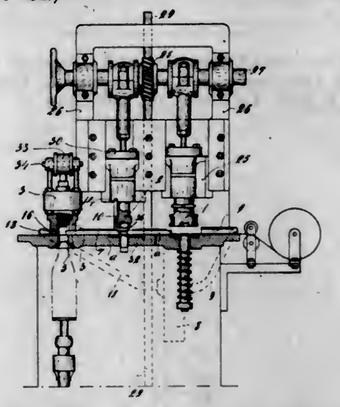
1. In a latch, a strike which is adapted to be mounted on one of two relatively movable members, a bracket which is adapted to be mounted on the other of said members, a stem rotatably mounted in the bracket, a head secured to the stem for coaction with the strike, and a handle for turning the head, said head having a flange which is generally parallel to the axis of the stem and is curved on a radius passing through such axis about a center on the opposite side of the same.

1,782,897. FORM CLAMP. CHARLES E. HUDGIN, Chicago, Ill., assignor to Samuel E. Lingle, Evanston, Ill. Filed May 31, 1929. Serial No. 367,421. 4 Claims. (Cl. 25—131.)



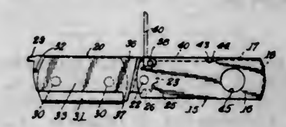
4. A form clamp for holding in spaced relation forms having side walls provided with vertical members and horizontal whalers, comprising a center tie rod, and rods removably secured to said tie rod and adapted to extend outside the side walls and between the whalers, flanged sleeves mounted loosely on said end rods with the flanges abutting the inner sides of the side walls, fastening devices for fastening the sleeves to the end rods on the outside of the side walls to prevent longitudinal movement of the sleeves relative to the end rods, and clamping devices on the outer ends of the end rods for bearing against the whalers.

1,782,898. CASTING MACHINE. CARL E. HUNTER and DE L. LUTZ, Memphis, Tenn. Filed Apr. 30, 1930. Serial No. 448,693. 6 Claims. (Cl. 22—65.)



1. In a centrifugal casting machine, a throwing arm revolvable in a vertical plane, a pinion secured to and revolvable with said arm, a slide movable in a path tangential to said pinion, a rack having one end pivotally attached to said slide, said rack meshing with said pinion, and longitudinally movable with said slide to actuate said pinion, and being laterally shiftable to disengage it from said pinion to allow said throwing arm to be positioned, or said rack to be shifted.

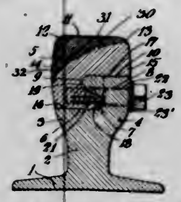
1,782,899. METHOD OF MAKING DRUMS. WILLIAM A. JONES, West New Brighton, N. Y., assignor to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Mar. 19, 1926. Serial No. 96,110. 3 Claims. (Cl. 29—148.2.)



1. The method of forming a continuous walled drum having a hole in one end thereof which comprises forming a shell with a wall of uniform thickness, forcing the end of the shell inwardly toward the axis of the shell until the end edge of the shell reaches the diameter of said hole, thickening the shell around said hole by forcing said end of the shell toward the opposite end thereof, and forming a cover seat around the hole inside the drum.

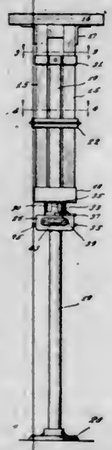
1,782,900. MACHINE FOR MAKING AND APPLYING CAPS TO BOTTLES AND THE LIKE. ANDERS JOSEF JONSSON, Linkoping, Sweden. Filed Feb. 17, 1926, Serial No. 88,975, and in Sweden Nov. 6, 1925. 4 Claims. (Cl. 226—84.)

1. A capping device of the character described, comprising a tool for stamping and bending a blank, a packing inlaying tool and a tool for applying the cap to a bottle, a guide running from one tool to another, pneumatic means to remove the cap from the stamping and bending tool, thereafter project the formed cap into the guide and transmit it to the inlaying tool, and means to stop the formed cap at the inlaying tool and release the same from said tool, said pneumatic means being further effective to transmit said cap within the guide to the applying tool.



1,782,901. CUTTING DEVICE. MORRIS B. KASSEL, Brooklyn, N. Y. Filed Feb. 27, 1925. Serial No. 11,997. 5 Claims. (Cl. 30—10.)

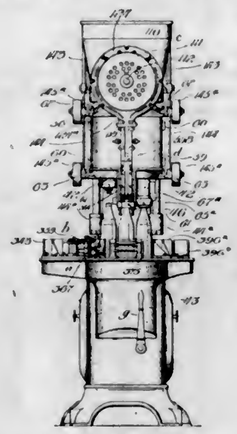
1. In a blade holder for receiving and retaining a removable blade with one edge exposed, a main plate, a



thickened extension formed on the inner end of the plate, the shoulder formed at the juncture of the plate with the extension being disposed at an angle and being under-cut, a blade clamping plate pivoted at its outer end on the outer end portion of the main plate, the inner end of the clamping plate being cut at an angle coincident with the angular shoulder and bevelled for wedging engagement with the shoulder to secure a blade between the plates.

1,782,902. RAIL. GUY F. KOTRBATY, New York, N. Y. Filed July 27, 1928. Serial No. 295,706. 11 Claims. (Cl. 238—144.)

1. A rail construction comprising a base web member, a detachable tread portion abutting and overlying the entire upper surface of the web member, said web member and tread portion having centrally disposed laterally extending, respectively abutting tapering portions, whereby they are substantially locked against relative vertical movement.



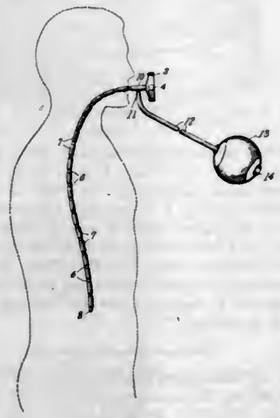
1,782,903. ADJUSTABLE SHORE. CHARLES M. MARKHAM, Indianapolis, Ind. Filed July 27, 1925. Serial No. 46,246. 4 Claims. (Cl. 248—2.)

1. An adjustable shore comprising an upper part and a lower part, said upper part being formed of two laterally spaced members provided at their lower ends with a cap, said cap being provided with a central opening, a head including an upward extension slidably received within the opening in said cap, means on said head for locking it to said lower shore-part, and means for holding said head in different longitudinal positions relative to said upper shore-part.

1,782,904. BOTTLE-CROWNING MACHINE. VALENTINE J. MOHLER, Wheaton, Ill., assignor, by mesne assignments, to The Liquid Carbonic Corporation, Chicago, Ill., a Corporation of Delaware. Filed Jan. 8, 1923. Serial No. 611,326. 19 Claims. (Cl. 226—84.)

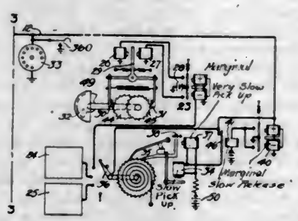
1. In a bottle crowning machine, a rotary carrier, a series of crowning heads reciprocable on said carrier, a normally stationary cam for reciprocating said crowning heads as they are revolved, a housing to which said cam is secured, a standard, a pair of guide rods on said standard, eyes on the housing sliding on said guide rod and means for vertically adjusting and locking the housing on said guide rods.

2. In a bottle crowning machine, a rotary bottle support, a rotary carrier, a series of crowning heads reciprocable vertically in said carrier, a stationary cam for reciprocating said crowning heads as they are revolved, a cam support vertically adjustable for bottles of different sizes and a gauge arm on said cam support removable into and out of the path of the bottles and adapted to cooperate with a bottle to gauge the vertical adjustment of the cam support.



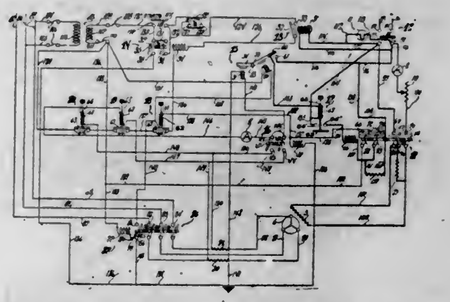
11. In a machine of the class described a movable bottle support, a bottle crowner in vertical alignment and movable therewith, a crown presenting head having a channel in the bottom thereof in the line of movement of the bottle support to receive the mouth of a bottle to be crowned, said device having a channel intersecting the above-described channel at an acute angle to the horizontal and adapted to convey crowns into a position to be engaged by bottles passing beneath said head, and means for yieldingly holding the crowns in position to be engaged by the bottle heads.

1,782,905. BOTTOM BAR FOR CURTAINS. JOHN L. MOHUN and HENRY PIESCH, Omaha, Nebr., assignors to National Lock Washer Company, Newark, N. J., a Corporation of New Jersey. Filed Dec. 9, 1929. Serial No. 412,627. 7 Claims. (Cl. 156—31.)



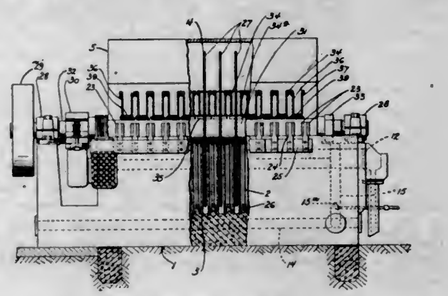
3. A bottom bar structure for curtains consisting of a hollow bottom bar made of sheet metal having its edges at the top, between which edges the lower portion of the curtain is held, means to assist in frictionally holding said curtain in contact with the bottom bar, and a clamping strip for holding the edges of the bottom bar from spreading.

1,782,906. DEVICE FOR TREATING THE STOMACH WITH ULTRA-VIOLET RAYS. MORRIS S. NEWMAN, Newark, N. J. Filed Oct. 10, 1929. Serial No. 398,609. 3 Claims. (Cl. 174—177.)



1. A device for treating the stomach with ultra-violet rays comprising a plurality of spaced quartz cylinders, flexible rubber tubing connecting said cylinders, a hood connected to the uppermost cylinder, means for attaching the hood to a source of ultra-violet rays, and a lens in said hood to direct ultra-violet rays to the cylinders.

1,782,907. REMOTE CONTROL SYSTEM. JOHN F. NIELSEN, Long Island City, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Jan. 26, 1925. Serial No. 4,982. 10 Claims. (Cl. 177—353.)

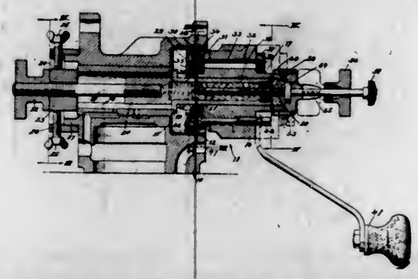


1. A remote control system comprising a station, a plurality of devices thereat movable in opposite directions to a plurality of positions, polarized relay means associated with each device for moving it in opposite directions depending upon the polarity of the impulses supplied to the relay means and to an extent depending upon the number of such impulses, a remote station, a line connecting the remote station with the first mentioned station, selecting means at the first mentioned station for selectively associating said polarized relay means with said line, means for controlling said selecting means in response to impulses transmitted over said line, said means for controlling said selecting means being operated by impulses of less strength than that required to effectively operate the polarized relay means, means at the remote station for sending impulses over said line of a strength to operate only the selector controlling means, means at the remote station for transmitting impulses of positive or negative polarity of increased strength over said line, and means associated with said line and responsive to the increased strength impulses of either polarity to disassociate the means for controlling the selector from said line while said increased strength impulses are being transmitted.

1,782,908. STARTING DEVICE FOR SYNCHRONOUS MOTORS. WALTER S. PFEIFER, Shorewood, Wis., assignor, by mesne assignments, to The Reliance Company, Wilmington, Del., a Corporation of Delaware. Filed Dec. 14, 1923. Serial No. 680,642. 24 Claims. (Cl. 172—289.)

18. In a starting system for synchronous motors, electro-responsive switch mechanism for connecting the field of the motor to a direct current supply circuit for running, and means for controlling said switch mechanism including a relay operated responsively to the variation of starting current in the motor, said relay connecting the direct current supply circuit to the motor field when the acceleration of the motor decreases to synchronous speed.

1,782,909. APPARATUS FOR THE ELECTRO DEPOSITION OF IRON. ROBERT D. PIKE, Piedmont, Calif. Filed July 20, 1926. Serial No. 123,626. 5 Claims. (Cl. 204—5.)

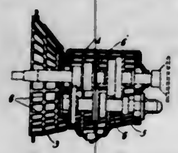


1. A cell for electrolytic deposition of iron comprising a plurality of alternating anode and cathode compartments separated from each other by porous diaphragms, insoluble anodes suspended in the anode compartments, rotating disc cathodes mounted on a shaft and dipping into the electrolyte in the cathode compartments, the upper part of said disc being above the level of the electrolyte, means for introducing fresh electrolyte into the cathode compartment, and an overflow wier for keeping a substantially constant level of catholyte, means for causing a downward circulation of anolyte in the anode compartment, means for heating the anolyte during such circulation, and means for withdrawing the net flow of anolyte from the cell and maintaining its level slightly below that of the catholyte.

1,782,910. TRIPLE-VALVE REAMER. JAMES R. RICKETTS, Richmond, Calif., assignor to National Air Brake Service, Inc., Reno, Nev., a Corporation of Nevada. Filed July 1, 1926. Serial No. 119,907. 4 Claims. (Cl. 77—2.)

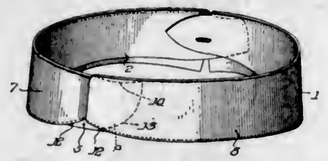
1. A triple valve reaming tool comprising a mandrel adapted to extend axially through a triple valve body and

be clamped thereto, a tool head mounted on said mandrel and capable of rotary and axial movement thereon, said head adapted to be inserted within the cylinder bushing of the valve body for operation therein, indicating means carried by the tool head and adapted to constantly engage the bore of the cylinder bushing when the head is positioned therein, said indicating means including a calibrated scale and a cooperating indicator hand arranged on the tool head at a visible point to indicate the differ-



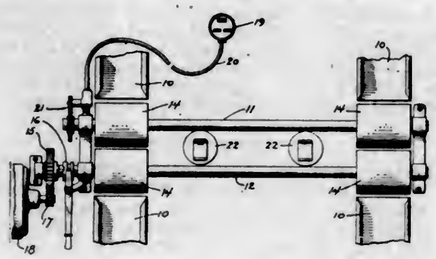
ences in diameter of the bore of the bushing at different points therealong or the amount of eccentricity of the head with relation to the bore when the head is revolved and moved axially of the bushing, a cutting tool carried by the head and normally held in an inoperative position during the operation of the indicating means, means for positioning and maintaining said tool in an operative position without removing the head from the bushing after the head has been centered and the low spot located in the bushing.

1,782,911. LIP-STICK DEVICE. JOHN SCRIMGEOUR, Toronto, Ontario, Canada. Filed May 16, 1930. Serial No. 452,964. 6 Claims. (Cl. 132—1.)



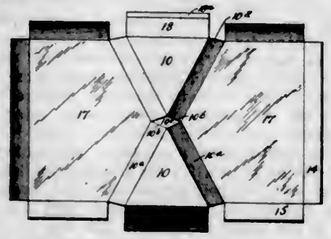
1. A device of the class described comprising a casing shaped in simulation of the human lips, a follower plate in the casing shaped similar to the casing, means for moving the follower plate, a divider plate across the casing at the open front end thereof and extending longitudinally.

1,782,912. METHOD FOR ELIMINATING NOISE IN MACHINERY. HOMER C. SNOOK, South Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a Corporation of New York. Continuation of application Serial No. 47,299, filed July 31, 1925. This application filed June 15, 1927. Serial No. 199,017. 3 Claims. (Cl. 74—56.)



1. The method of designing housing walls for machinery, which consists in ascertaining the tone most readily transmitted by such walls, ascertaining the energy transmitted to such walls under the normal operation of such machinery and changing the stiffness of such walls to a point where the tone most readily transmitted requires an amount of energy greater than that available.

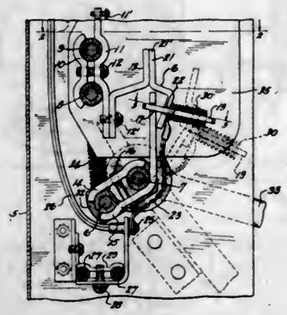
1,782,913. FOLD COLLAR. ROBERT J. THOMPSON, Paris, France. Filed Jan. 12, 1926. Serial No. 80,820. 3 Claims. (Cl. 2—138.)



1. A collar of the type described, comprising an inner member which is continuous from end to end, the free ends thereof being located at the front of the collar, an outer member having a transverse separation therein at the back of the collar forming spaced ends of said outer member at said back, and means on one of the ends of said outer member extending therefrom and underlying the adjacent end portion thereof for releasing the tension thereof against a cravat to permit the same to slide between said members.

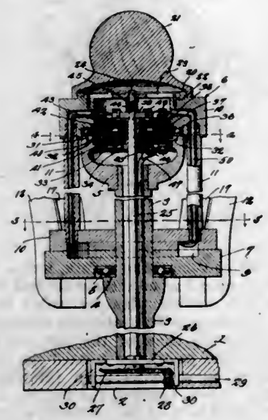
1,782,914. SPEEDOMETER-TESTING MACHINE. ELVIN E. TOWNSEND, Watsonville, Calif. Filed July 18, 1928. Serial No. 293,698. 2 Claims. (Cl. 72—51.)

2. A speedometer testing device including a master speedometer drive shaft provided with a pair of rollers, a master speedometer gearing connecting the master speedometer with the said drive shaft, a transmission shaft spaced from the drive shaft and provided with a pair of rollers cooperating with the rollers of the drive shaft to support the wheels of an automobile, the said drive shaft being actuated solely through contact with the said automobile wheels, a motor, gearing for communicating motion from the motor to the transmission shaft, and a clutch for connecting and disconnecting the motor from the transmission shaft, whereby the device may be actuated either by the said motor or by the motor of an automobile.



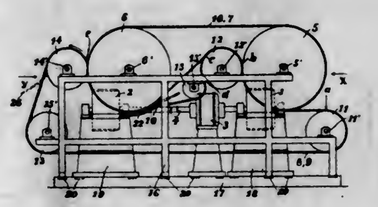
1,782,915. BOX INSERT. JOHN RUSSELL WEIDNER, Reading, Pa., assignor to The Nolde and Horst Company, Reading, Pa., a Corporation of Pennsylvania. Filed Mar. 8, 1929. Serial No. 345,268. 4 Claims. (Cl. 229—15.)

1. A sheet-material box-fitting insert consisting of a supplementary box bottom having portions thereof ele-



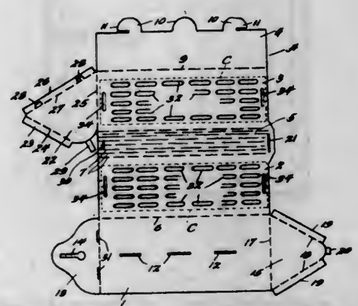
vated to form V-shaped platforms converging laterally at a point intermediate the length thereof; each of said platform portions having vertical marginal supports formed by bent-up connecting portions of the bottom.

1,782,916. ELECTRIC SWITCH. HARRY E. CAMPBELL and EARL F. MEKELBURG, Milwaukee, Wis., assignors, by mesne assignments, to Cutler-Hammer, Inc., a Corporation of Delaware. Original application filed Sept. 8, 1927, Serial No. 218,267. Divided and this application filed Jan. 21, 1929. Serial No. 333,825. 7 Claims. (Cl. 200—164.)



1. An electric switch, comprising a fixed contact member, a movable arm having opposite edge recesses, a retainer member having a central opening through which the movable arm extends and the recessed portions thereof are entered by portions of the retainer member, a movable contact member extending through the retainer member and having recessed edge portions which are entered by portions of the retainer member, and a yielding means extending into the opening of the retainer member and engaging and holding the movable contact member in position on the movable arm and also permitting a yielding movement of the movable contact member when said member engages the fixed contact member.

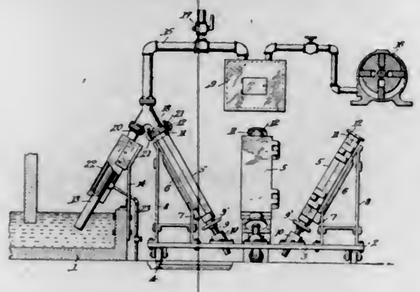
1,782,917. LAMP. HARVEY CARLSON, Cheboygan, Mich. Filed June 17, 1929. Serial No. 371,488. 4 Claims. (Cl. 240—49.)



4. In a device of the class described, a pedestal having a head at its upper end and provided with a shoulder located below the head, a lantern including a base, a top, posts connecting the base with the top, and arms extended upwardly from the base, lamps on the arms, the base being supported on the shoulder, and a circuit including the lamps, the circuit being located partly on the lantern and partly on the pedestal, and mechanism interposed in said circuit for maintaining the continuity thereof when the lantern is rotated on the pedestal, a portion of said mechanism being carried by the head of the pedestal, and a cooperating part of the mechanism being carried by the top part of the lantern.

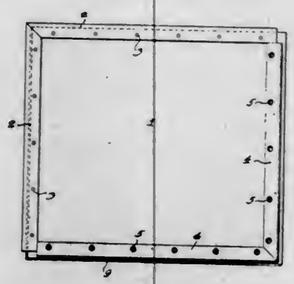
1,782,918. DECORTICATING AND DEPULPING MACHINE. KARL ERB, Frankfort-on-the-Main-Griesheim, Germany. Filed Apr. 6, 1929, Serial No. 358,133, and in Germany Sept. 17, 1927. 9 Claims. (Cl. 19—12.)

1. In a leaf decorticating machine of the type having two scraping drums arranged one beyond the other in the direction in which the leaves are carried past said drums by a conveyer, comprising an upper set and a lower set of endless ropes, the combination with said scraping drums and conveying ropes of means for protracting the leaves under treatment in their longitudinal direction transversely to the conveying ropes after having been decorticated by the first scraping drum, and of guiding means cooperatively associated with the endless conveying ropes so as to deflect the depending ends of the protracted leaves into working contact with the second scraping drum.



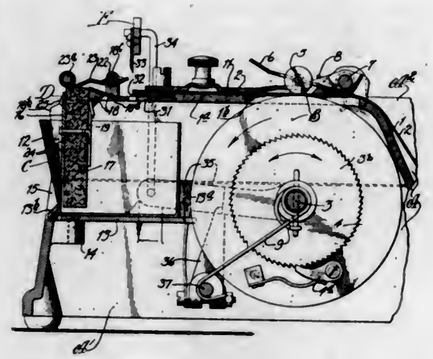
1,782,919. DISINFECTING CONTAINER. ABRAM L. FELDMAN, Atlanta, Ga. Filed Aug. 31, 1929. Serial No. 389,815. 7 Claims. (Cl. 299—24.)

2. A foldable container comprising a blank divided into sections, the sections being foldable relatively to provide



a structure triangular in configuration, certain of the sections being apertured for the passage of air, adjustable means coacting with said apertured sections to effect opening and closing of said apertures, and means to effect interlocking engagement of the sections to retain them in the form of a container.

1,782,920. APPARATUS FOR CASTING ZINC SLABS AND THE LIKE. DANIEL M. GRAY and JOHN J. WILLIAMS, Wheeling, W. Va., assignors to Hazel-Atlas Glass Co., Wheeling, W. Va., a Corporation of West Virginia. Filed Oct. 27, 1928. Serial No. 315,516. 7 Claims. (Cl. 22—73.)

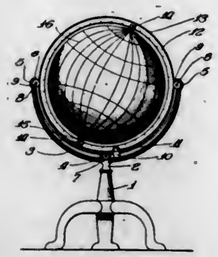


1. Casting apparatus for metal slabs, including a furnace for the molten metal, a substantially air-tight mold adjacent said furnace, a source of vacuum, communicating conduits leading from the source of vacuum to said furnace and mold, and a heater associated with one of said conduits.

1,782,921. PANEL FOR MOLD WALLS. FRANK J. GREMEL, Detroit, Mich.; Caroline Gremel executrix of said Frank J. Gremel, deceased. Filed Jan. 26, 1929. Serial No. 335,212. 6 Claims. (Cl. 25—131.)

4. In a panel for a mold wall, strips secured to said panel at two adjacent edges thereof, receiving strips secured by means of spacers at the remaining edges of said panel, said spacers being spaced from each other, said first named strips projecting beyond the edges at which they are secured, and said receiving strips being set back from the edges at which they are secured.

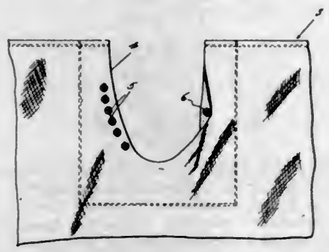
1,782,922. STRIP-SERVING MACHINE. WOLFGANG HERMANN, Chicago, Ill., assignor to Metal Specialties Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed May 31, 1928. Serial No. 281,802. 9 Claims. (Cl. 91—38.)



2. In a machine of the character set forth, the combination of a frame, a water font removably-supported in the front portion thereof, a holder detachably supported on said water font, a capillary moistener-element mounted in said holder, and a presser-member movably mounted on said holder and co-acting with said moistener-element.

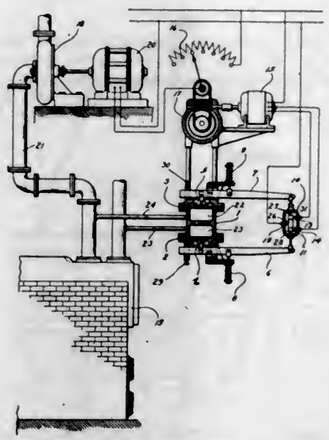
1,782,923. PURIFYING PIG IRON. KONRAD HOFMANN, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Filed May 9, 1929, Serial No. 361,831, and in Germany May 25, 1928. 3 Claims. (Cl. 75—27.)

1. The process consisting in purifying pig iron by means of a dephosphorizing and desulphurizing slag to which carbon has been added.



1,782,924. MOVABLE MERIDIAN FOR GLOBES. JOHN F. JOHNSON, Chicago Heights, Ill., assignor to Weber Costello Company, Chicago Heights, Ill., a Corporation of Illinois. Filed Jan. 9, 1930. Serial No. 419,487. 4 Claims. (Cl. 35—5.)

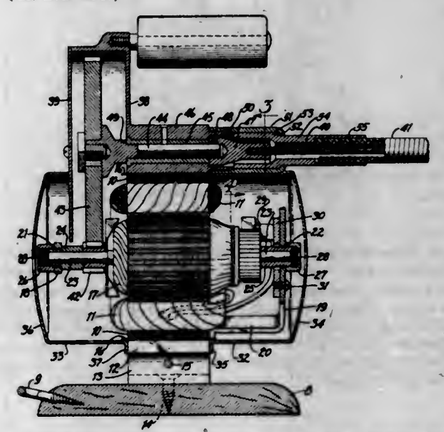
1. A globe device comprising a fork, means for supporting the same, a plurality of sockets formed on said fork, partitions in said sockets, pins journalled in said partitions, a pair of flanged rollers rotatably engaged on each of said pins on opposite sides of the partitions, with said flanges of the rollers positioned toward the outside, a peripherally flanged movable meridian rotatably supported on said pairs of rollers between the flanges of the respective pairs of rollers to hold the meridian against sidewise movement, a bracket supported on said fork, a set-screw adjustably engaged through said bracket and projecting to the inside of the peripheral flange of the meridian to permit rotation of the meridian with respect to the fork and



acting to hold the meridian against removal from said rollers, said set-screw adapted to be adjusted to lockingly engage the movable meridian to hold the same set in a predetermined position of adjustment, an axis journalled in said meridian, and a globe ball rotatably supported on said axis within the meridian.

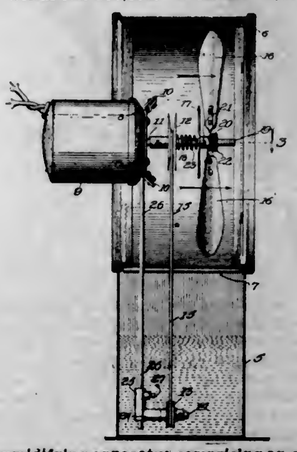
1,782,925. HAIRCLOTH. PAUL JUNAS, Jr., Lansford, Pa. Filed June 20, 1929. Serial No. 372,450. 1 Claim. (Cl. 2—50.)

As a new article of manufacture, a barber's accessory comprising a combined hair cloth and shampoo apron composed of a single length of rubberized cloth having a gloss finish to render it susceptible of readily shedding the clipped hair, said cover having a cut-out neck yoke portion, cut inwardly from one end thereof defining a neck accommodating opening, a plurality of fastener members secured to the cloth adjacent one edge of the opening, and a single fastener element secured to the cloth adjacent an opposite edge of the opening and adapted to engage selectively the first mentioned fastener members.



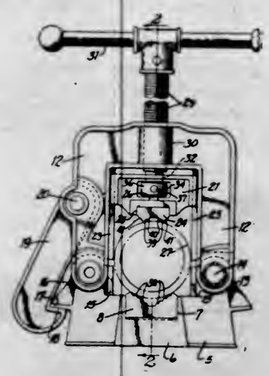
1,782,926. METHOD OF AND APPARATUS FOR CONTROLLING BOILER FEED WATER. JAMES LEWIS KIMBALL, Beverly, Mass., assignor to Ruggles-Klingemann Mfg. Co., Salem, Mass. Filed May 21, 1927. Serial No. 193,362. 13 Claims. (Cl. 122—452.)

1. The method of controlling boiler feed-water which consists in automatically maintaining the feed line pressure a predetermined value in excess of the steam pressure in the boiler for a mean average boiler pressure, and automatically increasing the feed line pressure on a decrease in boiler pressure, and automatically decreasing the feed line pressure on an increase in boiler pressure.



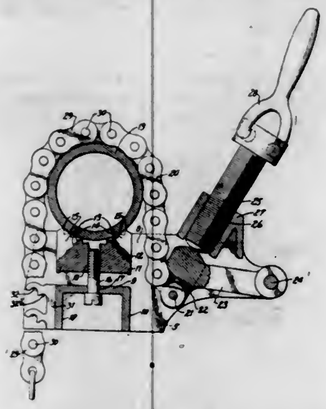
3. In a regulating system for maintaining a boiler feed line pressure differential for feeding the boiler with water, governing means for maintaining a predetermined feed line pressure in excess of the steam pressure in the boiler for a mean average boiler pressure, and governing means for increasing the feed line pressure on a decrease in steam pressure, said governing means likewise decreasing the feed line pressure on an increase in steam pressure.

1,782,927. ELECTRIC POWER DEVICE. JAMES S. KNOWLSON, Hinsdale, Ill., assignor to Speedway Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 5, 1928. Serial No. 310,664. 3 Claims. (Cl. 172—36.)



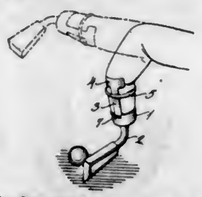
1. An electric power device comprising a stator and rotor and forming a unit, a casing of current-conducting material for said stator and rotor, means insulating said casing from said stator and rotor, a driven shaft journalled on said casing, and gearing connecting said rotor with said shaft, one of the gears thereof comprising current-insulating material.

1,782,928. HUMIDIFIER. JAMES S. KNOWLSON, Hinsdale, Ill., assignor to Speedway Manufacturing Company, Cicero, Ill., a Corporation of Illinois. Filed Nov. 11, 1929. Serial No. 406,354. 3 Claims. (Cl. 261—80.)



1. A humidifying apparatus comprising an endless traveling element formed of a coil spring, means for driving said element, means for contacting said element with the liquid to be discharged from the apparatus, and means for subjecting the liquid, carried by said element, to a blast of air.

1,782,929. VISE. TIDEMAN M. LILLEBERG, Chicago, Ill., assignor to Nye Tool & Machine Works, Chicago, Ill., a Corporation of Illinois. Filed Feb. 4, 1929. Serial No. 337,338. 6 Claims. (Cl. 81—39.)

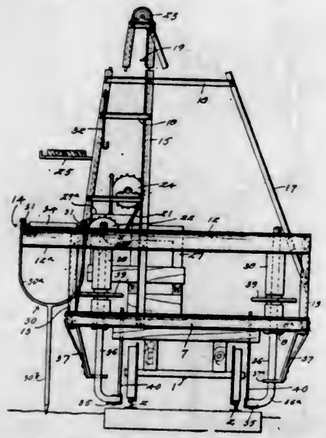


1. In a vise, the combination of teeth-equipped, directly opposed, jaws relatively movable toward and away from each other, the teeth on one of said jaws being arranged in series which diverge upwardly toward the other of said jaws, and certain of the teeth on the other of said jaws being so shaped as to extend into the valleys between certain of adjacent teeth on said first-named jaw in one position of the jaws.

1,782,930. VISE. TIDEMAN M. LILLEBERG, Chicago, Ill., assignor to Nye Tool & Machine Works, Chicago, Ill., a Corporation of Illinois. Filed Feb. 4, 1929. Serial No. 337,339. 2 Claims. (Cl. 81—19.)

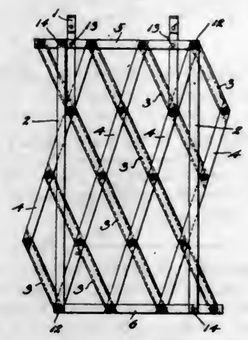
2. A vise comprising an attaching plate having an upstanding wall at one edge thereof, said wall being elongated and projecting at one side beyond the plate, an upstanding wall parallel to and substantially coextensive with said first-mentioned wall, a hollow web means integral with said walls, said walls above said web means having cutaway portions, a jaw disposed over the web means and engaging said cutaway portions, a fastening extending through the web means and engaging the jaw to hold the same in place, a fulcrum member connecting said walls and disposed remote to the plate, a lever operable between said walls and pivoted on said fulcrum member, a flexible clamping element secured to the lever, means whereby said clamping element may be anchored relatively to said walls, said jaw at opposite sides thereof being cutaway to accommodate the flexible element when engaged with relatively small work, and adjusting means mounted on one of said walls and operable against said lever.

1,782,931. GOLF CLUB. DANIEL G. LILLEY, Denver, Colo. Filed Oct. 22, 1928. Serial No. 314,096. 4 Claims. (Cl. 273—87.)



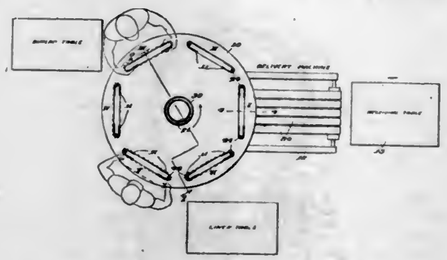
1. A finger attachment for securing an implement to a finger comprising a cup-shaped member adapted to receive the tip of a finger, diametrically placed narrow resilient clamping members extending upwardly from the open end of the cup-like member, each of said members being provided at its free end with an inwardly concave gripping surface adapted to engage the sides of a finger, directly above the first joint, and resilient means for urging the gripping surfaces against the finger.

1,782,932. LUTE. ROBERT B. MCCARTY, Port Arthur, Tex., assignor to Gulf Refining Company, Pittsburgh, Pa., a Corporation of Texas. Filed Sept. 6, 1927. Serial No. 217,882. 2 Claims (Cl. 106—8.)



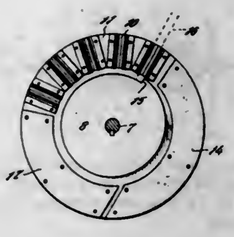
1. As a new luting material a mixture of fine ground burnt clay and strong caustic solution in about the proportions of 65 per cent ground burnt clay and 35 per cent 40° Bé. caustic soda solution.

1,782,933. ELEVATOR. FINLEY MONROE, Emmett, Idaho. Filed Nov. 14, 1929. Serial No. 407,191. 2 Claims. (Cl. 198—126.)



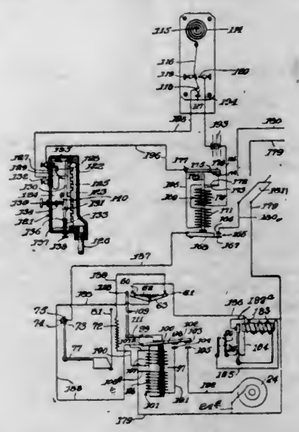
1. In combination, a flat car, an elevator having a base resting upon the car, straps secured to the base near the corners thereof and provided with openings, brackets extending downwardly from the corners of the base and provided with inturned lower ends having openings alining with the openings in the straps, vertical jack screws slidably mounted in the openings of the straps and brackets, nuts rotatably mounted on the base and engaging the jack screws, foot bars secured to the lower ends of the jack screws, and braces secured to the base and brackets.

1,782,934. COMBINED CULTIVATOR HARROW. ALFRED OLSSON, Guytasa, Sweden. Filed Oct. 23, 1929, Serial No. 401,813, and in Sweden Oct. 24, 1928. 1 Claim. (Cl. 55—3.)



A combined cultivator-harrow of the class described, comprising a frame composed of a plurality of diagonally arranged channel bars, a plurality of flat bars diagonally arranged and extending in opposite direction to the channel bars, end bars connecting said diagonal bars together, side bars connecting said end bars together, said side bars constituting skids when the implement is inverted, drafthooks secured to one of said end bars and to the diagonal bars, pin members slidably carried by said drafthooks to close the same, said pin members having stop nuts intermediate the ends thereof to prevent displacement of said pin members from the drafthooks, a plurality of teeth arranged in rows and carried by said diagonal bars, the teeth of certain of said rows being curved and the teeth of certain other rows being straight, said teeth having shank portions formed to seat in the channels of the said channel bars to interlock the teeth and prevent shifting of the same with respect to the bars, and clamping means threadably engaging the extremity of the teeth for securing the said teeth and bars together.

1,782,935. BAG-TURNING MACHINE. HERBERT W. ORNDOFF, New Orleans, La., assignor to The E. V. Benjamin Co., Inc., New Orleans, La., a Corporation of Louisiana. Filed May 8, 1928. Serial No. 276,118. 14 Claims. (Cl. 223—20.)

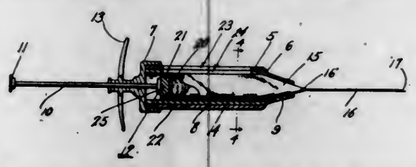


1. In a bag turning machine, a moving support, a bag holding member located on said support, a bag turning element carried on and guided by said support for movement with respect to the bag holder whereby to reverse a bag located on the latter, and means to move the bag turning element in one direction during one part of the movement of the support, and to return it during another part of such movement, said bag turning element being held against movement during a part of the movement of the support while the said element is free of the bag holding means.

1,782,936. ORDER CRANE. BRAYTON M. PERKINS, Mounds, Utah. Filed Apr. 16, 1929. Serial No. 355,444. 3 Claims. (Cl. 258—2.)

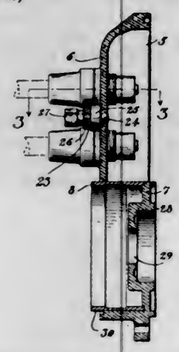
1. A device of the class described comprising a supporting structure, a shaft on the supporting structure, a pair of plates rotatable on the shaft and means urging said plates to rotate in one direction, clips fixed between the peripheral portions of the plates and arranged in spaced pairs to receive shanks of order hoops, a disk fixed on said shaft with a shoulder formed on said disk with which the extremities of the order hoop shanks may engage.

1,782,937. CONTROLLING MECHANISM FOR OIL BURNERS. STANLEY PERRY, Chicago, Ill., assignor to Automatic Burner Corporation, Chicago, Ill., a Corporation of Illinois. Filed Apr. 21, 1928. Serial No. 271,837. 8 Claims. (Cl. 158—28.)



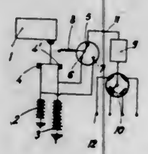
1. The combination of a furnace, a burner therefor, fuel-supplying means for the burner, ignition means for the burner, electrical means controlled by the heat generated by the burner for controlling said fuel-supplying means and said ignition means and comprising a switch which, when closed, causes said ignition means to be energized and means for opening said switch after the igniting of the fuel at said burner, and releasable means comprising a movable member forming a stop for locking said switch against return to closed position following extinguishment of the flame at said burner.

1,782,938. HYPODERMIC SYRINGE. DELMER I. FLETCHER, Long Beach, Calif. Filed May 11, 1928. Serial No. 276,962. 3 Claims. (Cl. 128—218.)



1. In combination with a syringe having a plunger rod and a barrel formed with an inwardly tapered outer end,

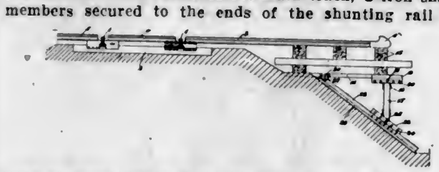
a sleeve-like adapter in the barrel having a tapered outer end which conformably engages said tapered end of the barrel and projects therebeyond, and a cartridge within and



engaged with the inner circumference of the adapter and having a tapered end provided with a needle, said cartridge having a piston at its inner end to engage with the plunger rod of the syringe.

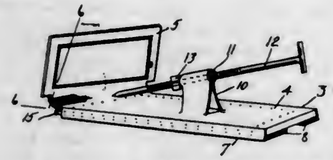
1,782,939. MAGNETO. CURT FREDERICK REIS, Chicago, Ill., assignor to Excel Magneto Company, Chicago, Ill. Filed Nov. 16, 1929. Serial No. 407,787. 8 Claims. (Cl. 171—209.)

1. In a magneto a combined end-plate, distributor housing and breaker housing constructed of molded insulating material.



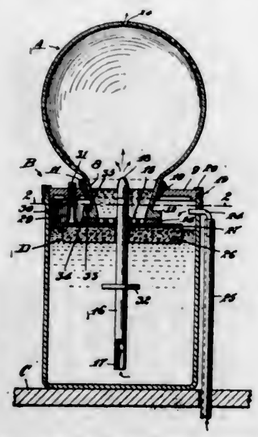
1,782,940. APPARATUS FOR IGNITING INTERNAL-COMBUSTION ENGINES. LEON SAIVES, Billancourt, France, assignor to Louis Renault, Billancourt, France. Filed Oct. 1, 1927, Serial No. 223,461, and in France Oct. 13, 1926. 2 Claims. (Cl. 123—179.)

1. An ignition system for internal combustion engines comprising an electric generator, a main battery and an auxiliary battery included in separate circuits with said generator, a double circuit breaker controlling said circuits, and a two-way switch adapted to connect the batteries selectively with the ignition apparatus.



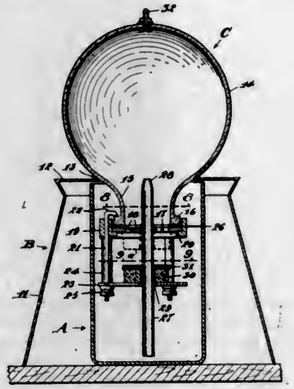
1,782,941. DEVICE FOR SHUNTING VEHICLES OFF A MAIN LINE OF TRACK. AUGUSTE SCHEUCHZER, Renens, Switzerland. Filed Nov. 19, 1929, Serial No. 408,200, and in France Dec. 26, 1928. 4 Claims. (Cl. 238—10.)

1. A device of the class described, comprising, in combination with a main line of track, a shunting track adapted to be placed transversely to the main track, each rail of said shunting track being divided into a first rail section placed outside the main track and a second rail section placed between the rails of the main track, U-iron shaped members secured to the ends of the shunting rail sec-



tions adjacent the rails of the main track, and a channel iron secured to the U-iron member of the first rail section and adapted to extend below the rail of the main track for connection with the U-iron member of said second shunting rail section.

1,782,942. RECORD-CARRYING DEVICE FOR AUTOMOBILES. EUGENE H. SOUTER, Independence, Mo., assignor to The Car-Record Company, Kansas City, Mo., a Corporation. Filed June 27, 1929. Serial No. 374,233. 3 Claims. (Cl. 40—10.)



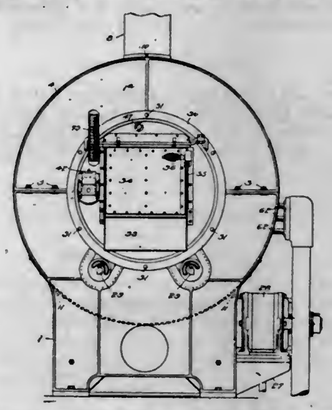
1. A record carrying device for automobiles comprising a flat elongated case having edge portions terminating in flanges projecting inwardly of the case and adapted to support thereon a writing plate and an upwardly extending transverse frame portion at one end and adapted to bear upon the front side of the instrument board, an upwardly extending lug mounted on the upper side of the case and having an obliquely disposed screw threaded head portion, and a supporting and adjusting screw rod operably mounted in the oblique head on said lug, and adapted to engage the inner side of the angle portion of an automobile instrument board to supportingly adjust the case on the same.

1,782,943. LIQUID-DISPLAY APPARATUS. FORREST G. STANFORD and GUY BAKER, Los Angeles, Calif.; said Baker assignor to George H. Hyland, Los Angeles, Calif. Filed Sept. 9, 1929. Serial No. 391,444. 8 Claims. (Cl. 40—126.)

1. In a liquid display apparatus, a reservoir adapted to contain a liquid, a display container invertedly communicable with said reservoir, float valve controlled means operable by liquid in said reservoir for causing intermittent flow of a liquid from said reservoir to said container when fluid pressure is developed in said reservoir, and means controlled by said valve for developing fluid pressure in said reservoir.

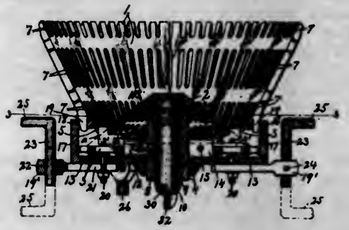
1,782,944. LIQUID-DISPLAY FOUNTAIN. FORREST G. STANFORD and GUY BAKER, Los Angeles, Calif.; said Baker assignor to George H. Hyland, Los Angeles, Calif. Filed Sept. 10, 1929. Serial No. 391,612. 10 Claims. (Cl. 40—126.)

1. In a liquid display apparatus, a liquid reservoir, a display container having a downwardly opening neck projecting into said reservoir, means for maintaining air pressure in said container less than air pressure externally thereof, a tube leading from said reservoir into said container, a valve seat on the end of said neck surrounding said tube, a float valve guided on said tube, and a stop limiting downward movement of said float valve carried on said container.



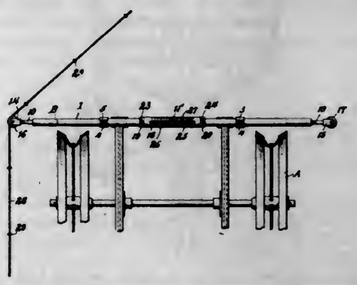
1,782,945. ELECTRICALLY-DRIVEN LOOM. EDWIN W. STONE, Longmeadow, Mass., and EUGENE MARTIN, Suffield, Conn., assignors to Bigelow-Sanford Carpet Co., Inc., Thompsonville, Conn., a Corporation of Massachusetts. Filed June 28, 1929. Serial No. 374,375. 14 Claims. (Cl. 139—336.)

1. In a loom, in combination, a lay provided with shuttle boxes, a crank shaft for moving the lay towards and from the front of the loom, an electric motor, gearing connection between the motor and loom for driving the crank shaft, an electrically controlled brake for the motor, a pair of electrically operable switches one for starting and stopping the motor and the other for controlling the application and release of the brake, an electric circuit for actuating said switches, and manually operable switch mechanism in said circuit and adapted to shift either a single control switch to actuate the brake, or both of said switches simultaneously to control the brake and motor.



1,782,946. ROASTING APPARATUS. ROBERT H. TALBUTT, deceased, Baltimore, Md., by Ralph Robinson, administrator, and FREDERICK A. ALLNER, Baltimore, Md. Filed Apr. 18, 1929. Serial No. 356,071. 18 Claims. (Cl. 34—5.)

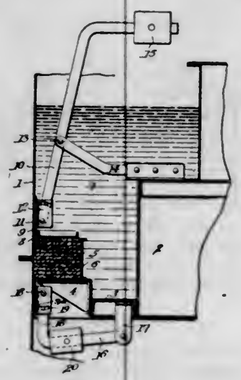
1. In a roasting apparatus, the combination of an electrical heating unit mounted within a roasting chamber, means for moving the material to be roasted through said chamber, a large area of said unit being directly exposed to the material passing through the chamber to roast the material primarily by radiation, a baffle only partially



surrounding said unit for preventing the material contacting with the unit, and means comprising a conduit for supplying heated air directly between said baffle and unit for augmenting roasting of the material by convection.

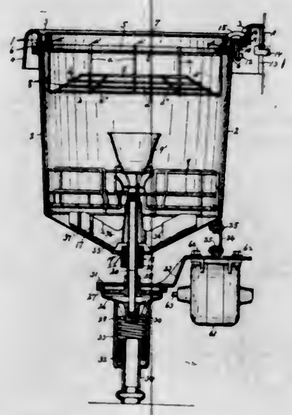
1,782,947. HEATER. GEORGE F. VASEY, Scranton, Pa., assignor to Ridgely Heater Company, Scranton, Pa., a Corporation of New Jersey. Filed May 18, 1927, Serial No. 192,260. Renewed Oct. 3, 1930. 11 Claims. (Cl. 126—152.)

1. In a coal burner, coaxial circular grates extending entirely around a central vertical axis having opposed downwardly converging fuel engaging surfaces in spaced relation at the bottom, the vertex of convergence of said surfaces being in vertical alinement with the intervening space and a horizontal grate underlying said space.



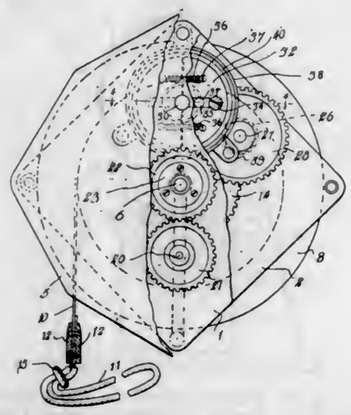
1,782,948. CHECK-WIRE GAUGE FOR CORN PLANTERS. ERNEST A. VERNIA, Odebolt, Iowa. Filed June 26, 1929. Serial No. 373,854. 6 Claims. (Cl. 111—47.)

1. A device of the character described comprising a sleeve for detachable connection with a planter, a rod



slidable in the sleeve and carrying rollers at opposite ends thereof, a pointer on said rod movable therewith upon contact of one of said rollers with a check wire, an indicia carrying sleeve having a scale thereon cooperating with said pointer, and means for maintaining said pointer intermediate the ends of said indicia carrying sleeve.

1,782,949. GAS HOLDER. FREDERICK HENRY WAGNER, Baltimore, Md., assignor to The Bartlett Hayward Company, Baltimore, Md., a Corporation of Maryland. Filed Nov. 3, 1927. Serial No. 230,868. 6 Claims. (Cl. 48—176.)



6. In a waterless gas holder the combination of a shell; a movable piston-like closure located therein; an absorptive sealing medium extending around the closure, the outer face of said medium contacting the inner face of the shell; means for holding a body of liquid in contact with said sealing medium; and means cooperative with said medium at its outer edge to prevent displacement or curling thereof during movement of the closure.

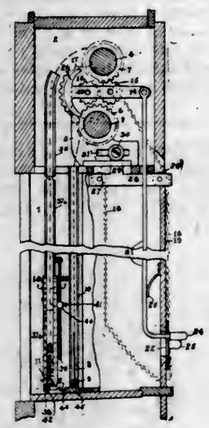
1,782,950. MECHANICAL DISHWASHER. FORREST A. WALKER, Syracuse, N. Y., assignor to Walker Dishwasher Corporation, Syracuse, N. Y., a Corporation of New York. Original application filed July 24, 1926, Serial No. 124,640. Divided and this application filed July 2, 1928. Serial No. 289,999. 1 Claim. (Cl. 141—9.)

In a mechanical dishwasher, a horizontal frame-section having a circular opening therethrough, a circular vat having its upper end engaging the frame-section around the opening, means for supporting the frame-section independently of the vat, separate means for securing the vat to the frame-section, and a circular openwork dish-supporting tray supported on said frame section within the opening independently of the vat.

1,782,951. FIRE ESCAPE. CECIL CORNELIUS ABBOTT, Harbor Springs, and WILLARD EARL BASSETT, BERT LESLIE BASSETT, and IRVIN LOUIS BASSETT, Detroit, Mich. Filed Sept. 20, 1928. Serial No. 307,153. 1 Claim. (Cl. 227—22.)

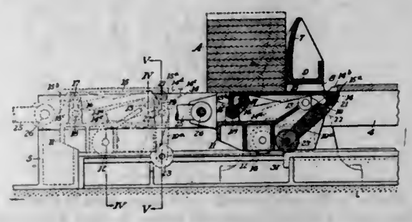
A fire escape comprising a frame including a pair of side walls and a partition between and parallel with the side walls, a main shaft extending through the frame, a drum secured on said shaft between one side wall and the partition, a gear disposed between the partition and the other side wall of the frame and fixed to the shaft, a governor arranged adjacent the last-mentioned side wall of the frame, a train of gearing connecting the shaft with the governor and including a gear loose upon the shaft, a ratchet rigid with the side of said loose gear, a mating ratchet slidably mounted on the shaft and constrained to rotate therewith, expansion springs between the fixed gear and slidably mounted ratchet and tending constantly to hold the two ratchets in engagement, a winding handle loosely fitted on the shaft, a pinion rigid with said handle and held against movement endwise of the shaft, and gearing connecting said pinion with the gear which is fixed to the main shaft.

1,782,952. BURNING-IN TOOL. CARL F. ALLGAIER, Joliet, Ill. Filed July 22, 1929. Serial No. 380,186. 2 Claims. (Cl. 219—21.)



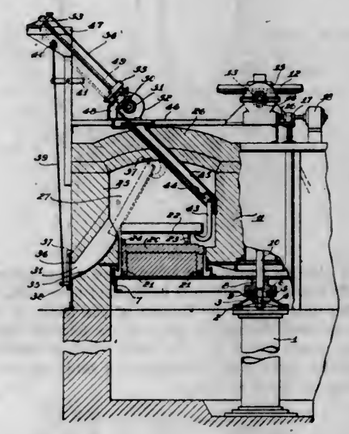
1. A tool for repairing and finishing varnished surfaces comprising a manipulating handle, a varnish and furniture engaging implement detachably connected with the handle, a shell secured to one face of the implement, a heating coil in said shell, feed and return wires extending into the shell and connected with the heating coil, an inclined extension formed on the implement arranged beyond the shell, and a guard plate formed on said handle and overlying said shell.

1,782,953. SCREEN FOR DISINTEGRATING MACHINES. ARNO ANDREAS, Munster, Germany. Filed Feb. 23, 1928, Serial No. 256,297, and in Germany Apr. 1, 1927. 2 Claims. (Cl. 83—9.)



1. Separator comprising a cylindrical outer shell, a boss fixed in the center of said shell, a pair of rings fixed to said shell in spaced relation and a plurality of individual bars radially juxtaposed in spaced relation with their outer ends loosely inserted between said rings, the inner ends resting loosely on said boss.

1,782,954. VENETIAN BLIND. CONRAD BAUER, Mount Oliver, Pa. Filed Oct. 21, 1927. Serial No. 227,746. 6 Claims. (Cl. 156—16.)

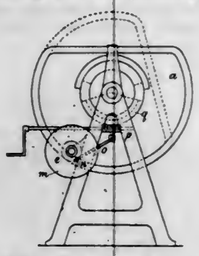


1. For use in connection with a window frame provided with a flexible blind, a flexible screen, means for rolling up and unrolling the blind, means for rolling up and unrolling the screen, and selective means comprising a rocking member for bringing either of said rolling up and unrolling means into operative relation; means for locking said rocking member against accidental movement.

1,782,955. APPARATUS FOR CHARGING FURNACES AND THE LIKE. FLORENCE C. BIGGERT, Jr., Crafton, Pa., assignor to United Engineering & Foundry Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 7, 1927. Serial No. 159,559. 10 Claims. (Cl. 214—28.)

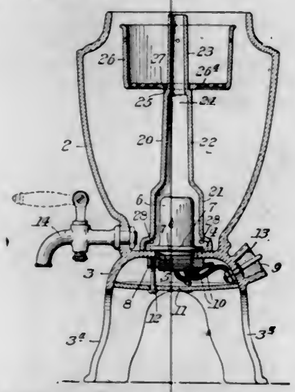
1. Apparatus for charging articles into a furnace, including means for supporting a pile of articles, a pusher for removing the lowermost article from the pile, and vertically movable means for holding the pile against downward movement while the lowermost article is being pushed out from under the pile.

1,782,956. ROTARY-HEARTH FURNACE. ALAN D. DAUCH, Pittsburgh, Pa., assignor to George J. Hagan Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Mar. 20, 1926. Serial No. 96,192. 18 Claims. (Cl. 263—7.)



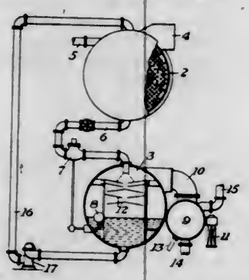
1. In an industrial heating furnace the combination with a movable hearth of a plurality of work carrying members supported thereon, said furnace being provided with passages communicating with the furnace chamber, and means independent of the movement of said hearth for actuating said carrying members to discharge the work through one of said passages.

1,782,957. STIRRER MECHANISM. WILHELM DIERKS, Osnabruck, Germany. Filed Feb. 25, 1930, Serial No. 431,223, and in Germany Mar. 23, 1929. 2 Claims. (Cl. 259—109.)



1. The combination of a trough of substantially half-round section tiltable about its axis on a hollow shaft, of a stirrer mounted for rocking movement about said axis, a stirrer shaft aligned with said axis for actuating said stirrer, and stirrer shaft actuating mechanism including an actuating pinion, and differential gearing co-operative

with said pinion and interposed between said shafts, said gearing comprising a gear member freely rotatable about said axis and meshing with said pinion, a gear member fixed

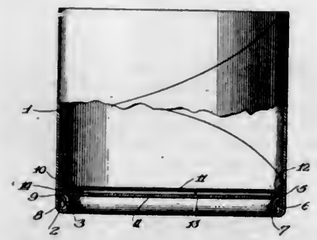


to rotate with said trough and also meshing with said pinion, and a pinion rotatable about a fixed axis and engaged with both said gear members.

1,782,958. COFFEE PERCOLATOR. JACOB DYM, East Liverpool, Ohio, assignor to Porcelier Manufacturing Company, East Liverpool, Ohio, a Corporation of Pennsylvania. Filed Nov. 8, 1928. Serial No. 317,944. 4 Claims. (Cl. 219—43.)

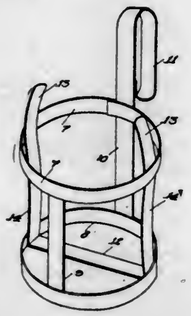
1. An electric percolator comprising a one piece porcelain body having an integral base, said base being hollow, a heating unit set in the bottom of the body, a clamping nut in the base forming a part of the heating unit, a removable cover plate in the base, and screws passing through the cover plate and entering said nut for retaining the cover plate in place.

1,782,959. DISTILLING APPARATUS. WILLIAM S. ELLIOTT, Pittsburgh, Pa. Filed Mar. 27, 1923. Serial No. 628,151. 15 Claims. (Cl. 202—173.)



1. An evaporating system, comprising a heater having a water space and having steam and water connections, a series of evaporating chambers communicating with each other and with the water space of the heater, means for maintaining in said chambers definite temperature and pressure conditions progressively lower than the temperature and pressure conditions maintained in the heater, means for admitting the heated water successively to said chambers whereby it will flash therein, and means for returning the unevaporated water to the heater.

1,782,960. METHOD OF MAKING FOOD PRODUCT. HARRY ADRIAN ERYSIN, Malden, and KRIKOR B. CHICKERING, Brockton, Mass. Filed Nov. 17, 1927. Serial No. 234,029. 1 Claim. (Cl. 99—10.)



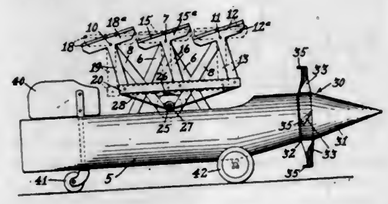
The method of making a food product which consists in roasting ears of corn when in the milk stage until the kernels are thoroughly dry, shelling the roasted kernels from the cob and then grinding the shelled kernels into meal.

1,782,961. PAPER CONTAINER. GEORGE HERETH GARDNER, Chicago, Ill., assignor to The Menasha Products Company, Chicago, Ill., a Corporation of Wisconsin. Filed Dec. 7, 1928. Serial No. 324,367. 5 Claims. (Cl. 229—5.5.)

1. A paper container, comprising a tubular body portion, a lower flanged disk having an annular raised portion adapted to lie adjacent to the wall of the container, the wall of said body portion and the flange of said lower disk together forming a lower edge for the container and an inner plane sealing disk of a diameter equal to the inner diameter of said tubular body portion adapted to fit snugly into said tubular body portion above said lower disk and to rest upon said annular raised portion.

1,782,962. BOTTLE HOLDER. SAMUEL T. HOBBS, Worcester, Mass., assignor to The Washburn Company, Worcester, Mass., a Corporation of Massachusetts. Filed Aug. 22, 1927. Serial No. 214,721. 2 Claims. (Cl. 215—100.)

1. A bottle holder comprising a pair of rings made from strip metal, uprights at the front and back of said holder joining said rings together, one upright being provided with a handle portion, and yieldable fingers carried by said lower ring for holding said bottle in said rings with its bottom just above the plane of the bottom of the lower ring.

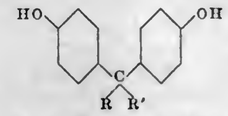


1,782,963. MANUFACTURE OF SOLVENTS. JOSEPH HIDY JAMES, Pittsburgh, Pa., assignor to Clarence P. Byrnes, trustee, Sewickley, Pa. Filed Jan. 26, 1923. Serial No. 615,150. 11 Claims. (Cl. 260—106.)

1. In the method of treating a liquid partial oxidation product from hydrocarbons, which product contains oxidized bodies in the range from alcohols to organic acids, the steps consisting of fractioning up to about 300° to 325° C. the product and separating one or more sets of bodies thereof from other sets of bodies contained therein.

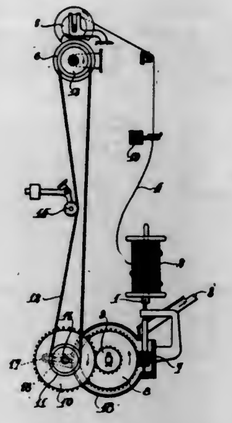
1,782,964. SOLVENT AND METHOD OF MAKING THE SAME. JOSEPH HIDY JAMES, Pittsburgh, Pa., assignor to Clarence P. Byrnes, trustee, Sewickley, Pa. Filed Oct. 21, 1924. Serial No. 745,024. 11 Claims. (Cl. 260—106.)

1. In the treatment of an oily partial oxidation product mixture of aliphatic hydrocarbon derivatives of different degrees of oxidation and which already contain artificially-introduced chemically-combined oxygen, the step consisting of dissolving and separating portions thereof by a selective solvent other than water.



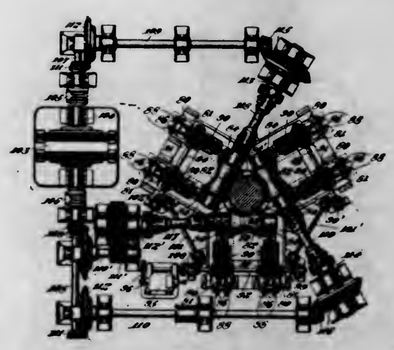
1,782,965. AEROPLANE. LAWRENCE L. JOHNSON, Los Angeles, Calif. Filed Oct. 29, 1929. Serial No. 403,239. 3 Claims. (Cl. 244—12.)

1. In an aeroplane, a frame consisting of a pair of upwardly converging trusses and a pair of upwardly diverging trusses, said trusses being secured to the fuselage and extending upwardly therefrom in fixed relation to each other thus forming three shaft supports spaced apart from each other with respect to the length of the craft, a wing extending crosswise of the shaft and pivotally secured to each of said supports, and means for adjusting in unison the angle of incidence of said wings.



1,782,966. PRODUCTION OF ALKYLATED PHENOLS. HANS JORDAN, Berlin-Steglitz, Germany, assignor to Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Filed July 12, 1926, Serial No. 122,031, and in Germany July 4, 1925. 6 Claims. (Cl. 260—154.)

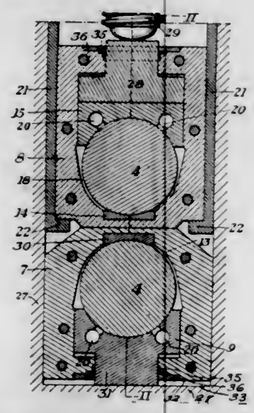
1. The method of producing alkylated phenols comprising subjecting a dihydroxydiphenyl methane derivative having the formula



wherein R and R′ are alkyl or aryl radicals at a temperature not materially exceeding 160° C. to treatment with hydrogen in the presence of a slow acting hydrogenation catalyst whereby the molecule of the compound is split up at the point where the carbon atom connects the two phenol radicals.

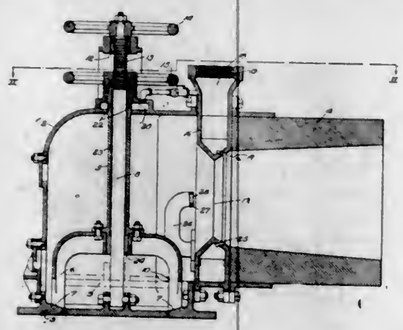
1,782,967. SILK-TWISTING MILL AND LIKE MACHINE. LOUIS CASIMIR JUNILLON, Valence, and HENRI FRANÇOIS GILLOT, Lyon, France. Filed Apr. 25, 1929, Serial No. 358,100, and in France May 7, 1928. 1 Claim. (Cl. 117—23.)

A silk twisting mill comprising a spindle to support a bobbin of untwisted yarn, a reel on which the yarn in the twisted state is wound, means for driving said reel from said spindle comprising a friction wheel contacting on the cylinder formed by the yarn already wound on the reel, a pulley fixedly carried by said friction wheel, a worm screw carried by said spindle, a worm wheel meshing with said worm screw, a pinion fixed to said worm wheel, a shaft, a gear wheel loose on said shaft meshing with said pinion, a pulley fixedly carried by said gear wheel and a tensioned belt passing round said two pulleys.



1,782,968. MEANS FOR ROLLING TUBES. ALBERT T. KELLER, Bethlehem, Pa., assignor to Bethlehem Steel Company. Filed Feb. 4, 1927. Serial No. 165,788. 1 Claim. (Cl. 80—11.)

In a mill for rolling tubing longitudinally, the combination of three or more concave rolls arranged in circumferential series with their axes in a plane normal to the axis of rolling, each roll having journals at the ends

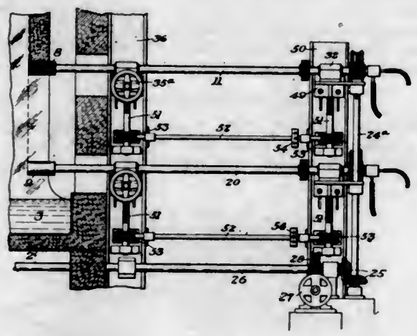


thereof, bearings for the journals, screw mechanisms for moving the bearings of each roll simultaneously and uniformly inwardly and outwardly, means for actuating the screw mechanisms of the bearings of all the rolls simultaneously, a driving member disposed approximately oppositely to one journal of each of the rolls, a wobbler coupling between a journal end of each roll and its opposed driving member, a prime mover, and transmission mechanisms for driving each of the driving members simultaneously.

1,782,969. BEARING. CLARENCE J. KLEIN, Bellevue, Pa., assignor to United Engineering and Foundry Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Oct. 15, 1927. Serial No. 226,323. 6 Claims. (Cl. 308—60.)

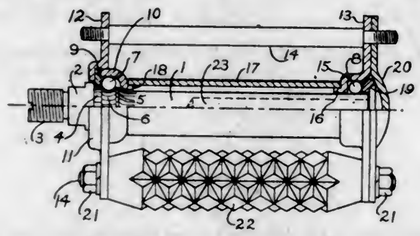
1. A composite roll bearing for rolling mills, comprising an oil tight casing, a main and an auxiliary brass within the casing, said main brass extending beyond the casing, whereby the load on it can be transferred to a support independent of the casing.

1,782,970. VALVE. STRICKLAND KNEASS, Jr., Sewickley, Pa., assignor to Costello Engineering Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Dec. 5, 1928. Serial No. 232,947. 12 Claims. (Cl. 251—29.)



6. The combination with a valve casing having a seat, of a valve adapted to cooperate therewith, a valve stem secured to said valve and projecting upwardly therefrom, a sleeve surrounding said stem, cleaning means operatively connected to said sleeve, and means for effecting operation at will of either said stem or said sleeve, said means comprising a hand-wheel for each of said parts.

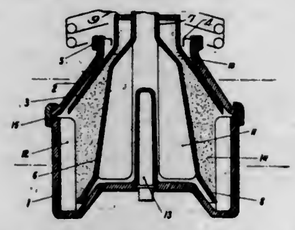
1,782,971. TWINE DISPENSING AND CUTTING DEVICE. JOSEPH E. KROEMER, St. Paul, Minn. Filed Apr. 2, 1928. Serial No. 266,860. 11 Claims. (Cl. 30—14.)



1. A twine guiding and cutting device comprising a resilient member, guiding means for twine attached to said member, a cutter teathered to said resilient member, and means in said cutter for guiding twine therethrough, said cutter being adapted to sever the protruding end of the twine drawn by said cutter.

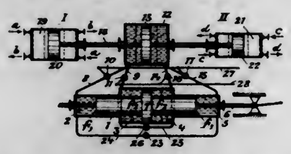
1,782,972. METHOD AND APPARATUS FOR MAKING SHEET GLASS. WILLIAM L. MONRO, Pittsburgh, Pa., assignor to Window Glass Machine Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Feb. 16, 1924. Serial No. 693,235. 13 Claims. (Cl. 49—17.)

13. Sheet glass drawing apparatus, including a molten bath, knurled rolls for engaging the edge portions of a glass sheet and assisting in drawing it upwardly from the bath, smooth rolls between the knurled rolls and the bath for frictionally engaging the sheet to resist its upward movement and stretch the same, means for driving the smooth rolls in a reverse direction to the direction of travel of the glass, and means for adjusting the position of the smooth rolls and the knurled rolls, substantially as described.



1,782,973. BALL-BEARING PEDAL FOR BICYCLES, ETC. CHARLES A. PERSONS, Worcester, Mass., assignor to Persons-Majestic Manufacturing Company, Worcester, Mass., a Corporation of Massachusetts. Filed Feb. 1, 1929. Serial No. 336,700. 4 Claims. (Cl. 208—70.)

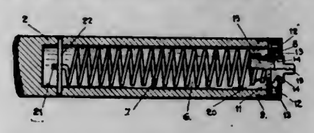
1. In a bicycle pedal, the combination with a spindle providing a cylindrical portion and a concave seat formed



at one end having its smallest diameter substantially the same as the diameter of said cylindrical spindle portion, of two series of balls, all of the same diameter, one series contacting with the seat on said spindle at one end and the other series contacting with the cylindrical surface of said spindle at its other end, a tube encircling said spindle and annular race members located at the opposite ends of said tube for retaining said balls, said race members each providing a cylindrical surface in contact with said balls.

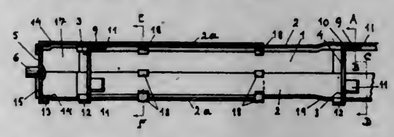
1,782,974. APPARATUS FOR RECOVERING FATS FROM EMULSIONS CONTAINING SOLID PARTICLES. JEAN ALFRED LOUIS ROZIÈRES, Paris, France, assignor of one-half to Societe Française de Centrifugation, Paris, France, a French Company. Filed July 16, 1928, Serial No. 293,088, and in France Oct. 11, 1927. 8 Claims. (Cl. 233—14.)

1. A plant for recovering fats contained in emulsions such as wash waters of wools, solvent heavier than water and solid particles; comprising several groups of apparatus, each group including a mixer and a centrifugal apparatus, means for introducing simultaneously in the mixer of each group the partly exhausted emulsion coming from the centrifugal apparatus of the former group and the solvent heavier than water, in which the proportion of dissolved fat has been increased and coming from the centrifugal apparatus of the following group, and means for transferring the emulsion formed inside the mixer into the centrifugal apparatus of the same group.



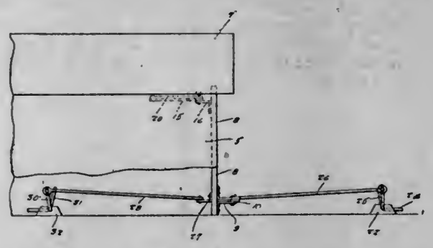
1,782,975. HIGH-PRESSURE RECIPROCATING COMPRESSOR. CHARLES SCHAER, Langenthal, Switzerland, assignor to the Firm of Sulzer Frères Société Anonyme Winterthur, Switzerland. Filed Sept. 29, 1928, Serial No. 309,266, and in Switzerland Nov. 8, 1927. 8 Claims. (Cl. 230—49.)

1. A compressor-plant, comprising a reciprocating-piston compressor, a driving engine having a cylinder and a reciprocating piston, another piston intermediate the engine and the compressor and structurally connected to the compressor piston, a cylinder therefor, a fluid-conduit between the piston of the driving engine and the intermediate piston, said connection having a liquid colum therein, and means for rendering inoperative a portion of the said liquid column on occasion.



1,782,976. SPRING-OPERATED SHADE ROLLER. WILLIAM OSKAR NICOLAUS SÖDERQVIST, Lidköping, Sweden. Filed Oct. 29, 1929, Serial No. 403,230, and in Sweden Nov. 6, 1928. 3 Claims. (Cl. 156—36.)

2. A shade roller having a bore in one end, a coil spring in the bore, means for fixing the inner end of the spring to the roller, a cap closing the end of the bore and having an aperture therein, a sleeve rotatably engaged in the aperture and fixed to the outer end of the spring, said sleeve having spaced tongues upon its outer end and

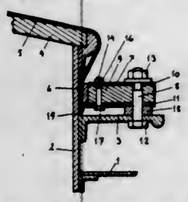


notches adjacent the tongues, dogs pivotally carried by the cap and engageable in the notches to retain the roller in adjusted position, said tongues being engageable with a bracket to retain the sleeve against rotation during winding of the roller.

1,782,977. METALLIC SHADE ROLLER. WILLIAM OSKAR NICOLAUS SÖDERQVIST, Lidköping, Sweden. Filed Oct. 29, 1929, Serial No. 403,231, and in Sweden Oct. 3, 1929. 2 Claims. (Cl. 156—29.)

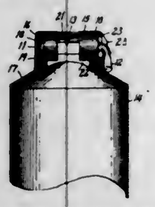
1. A shade roller comprising a plurality of circularly alined strips, said strips having formed therein apertures and adjacent recesses, said recesses being below the plane of the strips, circular brackets confined by the strips and having peripheral projecting lugs passable through said apertures and bendable into said recesses, brackets upon the ends of the roller, and means carried by the latter brackets for rotatably supporting the roller.

1,782,978. CLOSURE OPERATOR. JOSEPH D. SWARNER, Kansas City, Kans. Filed Aug. 2, 1929. Serial No. 382,886. 2 Claims. (Cl. 268—35.)



1. An operating mechanism for swinging doors comprising a rocker arm, a linked connection between one end of the rocker arm and the door, a crank shaft at each side of the door, a connecting rod between the opposite end of the rocker arm and one of the crank shafts, and a connecting rod pivoted at one end to the said door and having its opposite end connected to the other crank shaft.

1,782,979. CLAMPING MEANS. EDWARD ELIAS VON TELL, Gottenborg, Sweden. Filed Sept. 18, 1929, Serial No. 393,499, and in Sweden July 8, 1929. 8 Claims. (Cl. 114—203.)

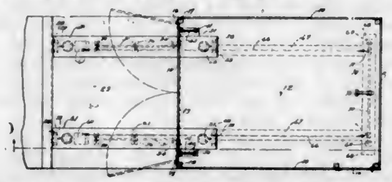


1. A mechanical clamping device comprising a stationary base member, a pivot rigidly connected to said base member somewhat remote therefrom, an object provided to be clamped to said base member, an eccentric rotatable about said pivot so as to be swung against said object to clamp same against the base member, a lug on said

eccentric spaced from said pivot, a lever provided to turn about said pivot, and to cooperate at some distance from

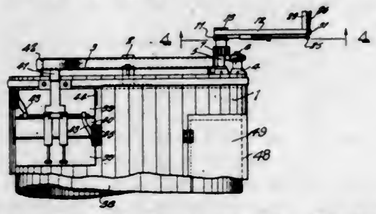
its turning point with said lug on the eccentric so as to forcibly turn the eccentric to clamp said object against the base member.

1,782,980. COLLAPSIBLE TUBE. WILLIAM C. UDE, East Haven, Conn. Filed Aug. 10, 1929. Serial No. 384,865. 2 Claims. (Cl. 221—60.)



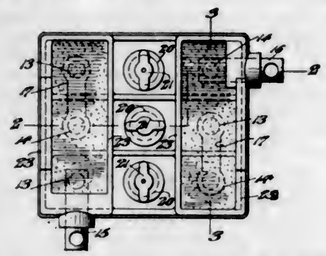
1. A collapsible tube having a cylindrical oscillatable closure formed with a transverse passage and mounted in a cylindrical socket in the outer end of the said tube, the said socket being open at one end and formed with a seat at its opposite end for engaging the adjacent end of the said closure and having the metal surrounding this open end forced inward after the insertion of the said closure to partly close the said opening of the socket and retain the closure in place therein against endwise displacement.

1,782,981. SCREW DRIVER. JOHN A. ANDERSON, Bridgeport, Conn., assignor to The Bridgeport Hardware Manufacturing Corporation, Bridgeport, Conn., a Corporation of Connecticut. Filed Dec. 24, 1929, Serial No. 416,227, and in Great Britain Nov. 29, 1929. 2 Claims. (Cl. 145—50.)



1. A screw driver comprising a shank provided with a screw driving bit having two opposite side faces, one of said faces being provided with a rib extending tranvsersely of said face closely adjacent the free end of the bit and extending laterally outward, said face also having ribs extending from a centrol longitudinal line of the shank at an oblique angle to the shank toward said first rib, said oblique ribs and the transverse rib blending into each other so that they form continuations of each other and are adapted to engage a wall of a screw head kerf to resist both longitudinal and transverse slipping of the bit in the kerf during the turning movement of the screw driver.

1,782,982. DOOR-OPERATING MECHANISM. HARVEY T. BLACK, Lexington, N. C. Filed Jan. 10, 1930. Serial No. 419,871. 3 Claims. (Cl. 268—35.)



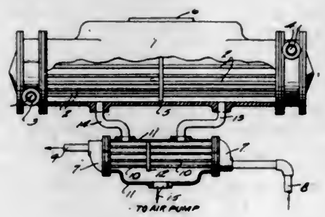
1. Means for automatically opening and closing a door and locking the same in position when in closed position comprising a depressible platform, resilient means mounted beneath the platform adapted to normally press the same upwardly, means for limiting the upward movement of the platform, a lever pivotally mounted at one end to a fixed object, a transversely disposed shaft, a bell crank lever mounted on said first named transversely disposed shaft, the other end of said lever being slidably and pivotally conected with the said bell crank lever, said lever being pivotally connected intermediate its ends to the said platform, a second bell crank lever mounted on said transversely disposed shaft, a link connecting said second bell crank lever with the said door, all of said means being adapted to automatically open the door when the platform is depressed and to close the door when the platform returns to normal position.

1,782,983. POSITIONING DEVICE FOR LAUNDRY MACHINES. PETER C. BRUCKMANN, St. Louis, Mo., assignor, by mesne assignments, to Vorclone Company, a Corporation of Wisconsin. Filed June 20, 1924. Serial No. 721,279. 10 Claims. (Cl. 74—7.)

1. In a power driven laundry machine of the character described having a tub provided with a door and a drum rotatable in the tub and having a door and adapted to be selectively positioned by hand, an engageable driving element, an operating handle, a pawl on said handle adapted to effect driving engagement between said handle and said element in one direction, means for latching said pawl in driving engagement, and a centering device operating upon release of said handle to disengage said pawl.

1,782,984. BATTERY COVER. FRANK S. CARLILE, Abington, Pa. Filed Dec. 6, 1928. Serial No. 324,207. 4 Claims. Cl. 136—170.)

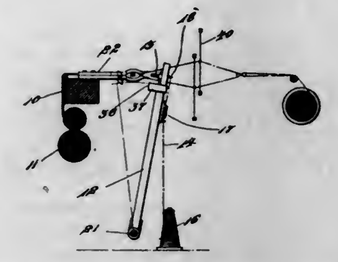
1. A battery cover having projecting cell posts and filling openings therethrough, certain of said posts being inter-



connected by a link, a continuous wall formed integral with said cover and having one portion between said posts and filling openings, said wall enclosing all of said posts to form a relatively deep receptacle, and a sealing compound in said receptacle embedding and concealing said posts and link.

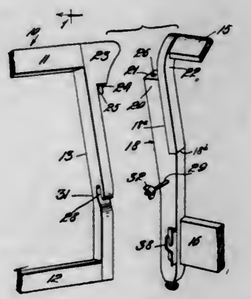
1,782,985. DESK CALENDAR. KEITH CLARK, Ridgewood, N. J. Filed June 1, 1929. Serial No. 367,676. 3 Claims. (Cl. 40—120.)

1. In a pad calendar the combination of a base having apertures and a stack of sheets supported on said base, legs for holding one end of said base in an elevated position on a support, said legs extending through said base and having portions engaging the inner and outer surfaces of said base around said apertures to sure the legs to the base, said legs having longitudinal bores and screws for extending through the stack of sheets and threaded into said legs for the purpose of securing the stack of sheets to said base.



1,782,986. APPARATUS FOR CONDENSING STEAM. DION K. DEAN, Rahway, N. J., assignor to Foster Wheeler Corporation, New York, N. Y., a Corporation of New York. Filed Sept. 19, 1928. Serial No. 306,983. 6 Claims. (Cl. 257—43.)

1. In condensing apparatus comprising a main condenser having a plurality of compartments in each of which the condensing capacity is different, the combination therewith of means for equalizing the depth of steam penetration in said condenser compartments comprising an auxiliary condenser and air cooler provided with a plurality of cooling sections, each of such cooling sections having a different cooling capacity, means for connecting the cooling section having the greatest cooling capacity with that condenser compartment in which the steam penetration is deepest, means for connecting the cooling section having lesser cooling capacity with a condenser compartment in which the steam penetration is not so deep, and an evacuating apparatus connected to said cooler.

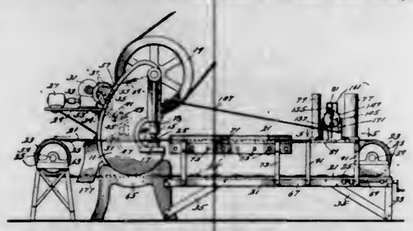


1,782,987. LOOM. JOHN HENRY DODGE, Shannock, R. I., assignor of one-half to George P. Clark, Shannock, R. I. Filed July 13, 1929. Serial No. 378,068. 19 Claims. (Cl. 139—125.)

1. In a loom, a lay, a shuttle on the lay, means for leading the weft thread thru the shuttle from an extraneous source of supply, means for supporting a selvage thread supply adjacent the edge of the fabric and leading the selvage thread therefrom to the fabric being formed,

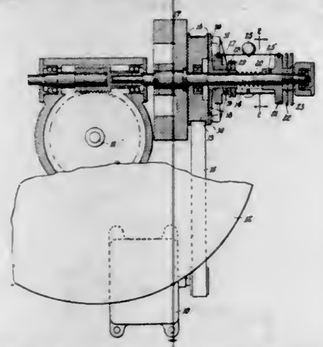
and means in said selvage thread support affected by action of the lay for guiding the weft thread around said selvage thread.

1,782,988. BED FRAME. BENJAMIN M. FRANK, New York, N. Y., assignor to Greenpoint Metallic Bed Co., Inc., Brooklyn, N. Y., a Corporation of New York. Filed Aug. 8, 1929. Serial No. 384,281. 2 Claims. (Cl. 5—285.)



1. In a supporting frame for bed structures, the combination of two frame ends each having at its rear edge a post of which the front part extends to substantially the full height of the end and of which the rear part terminates in an upwardly facing supporting shoulder at a lower level and is provided with a socket extending downwardly from said shoulder, a bolt extending through each of said posts below the level of the shoulder thereof and with its threaded end projecting towards the other end of the frame, a frame back including at each end an upright having at the upper part thereof an outwardly projecting portion of which the bottom constitutes a downwardly facing shoulder to rest on the upwardly facing shoulder of the adjacent post and a dowel projecting downwardly from the downwardly facing shoulder to enter said socket and hold the corresponding parts against lateral displacement, each of said uprights having a slot extending longitudinally thereof and open at its lower end to receive the corresponding bolt when the back is lowered into position to place the dowels in the sockets, and means including a nut on each of said bolts for clamping the frame back and the frame ends together in assembled relation.

1,782,989. METHOD AND APPARATUS FOR FEEDING DISKS TO A CLOSING MOLD. LOUIS T. FREDERICK, Valparaiso, Ind., assignor, by mesne assignments, to Continental Diamond Fibre Company, Newark, Del., a Corporation of Delaware. Filed Jan. 18, 1928. Serial No. 247,671. 40 Claims. (Cl. 18—1.)

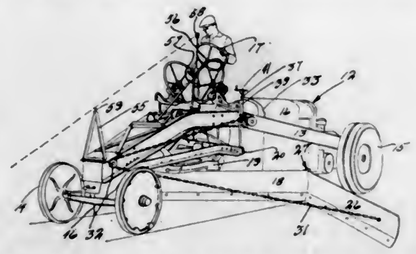


1. In a device of the class described, a pair of forming dies, a conveyor adapted to receive material, means for

moving said conveyor between the dies, means interrupting said movement whereby the material carried by the conveyor may be held stationary between said dies, and

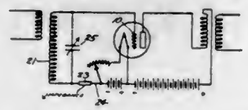
means for closing the dies while the material is so positioned whereby to configurate the material directly between the dies.

1,782,990. SPEED-CONTROL APPARATUS. CLARENCE G. GARRIGUS, Bristol, Conn., assignor, by mesne assignments, to Wm. H. Bristol Talking Picture Corporation, Waterbury, Conn., a Corporation of Connecticut. Filed July 21, 1928. Serial No. 294,334. 2 Claims. (Cl. 192—147.



1. In velocity transmission apparatus, a driven shaft, a driving element embodying a pulley member loosely mounted on the driven shaft and capable of movement axially thereof, a sleeve member axially movable on said shaft and having a flange carrying friction means for clutching the pulley to the shaft, resilient means urging said sleeve toward the pulley, means to adjust the degree of pressure exerted by said resilient means, centrifugal governor means operating to move said sleeve in a direction opposed to the action of the resilient means thereon, braking means embodying a fork having friction shoes adapted for engagement with the flange of the said sleeve member, a rock shaft, a collar secured thereto and to which said fork is swivelled, said shaft having an arm extending therefrom, and an adjustable screw cooperating with said arm for turning the said rock shaft to determine the degree of the braking effect.

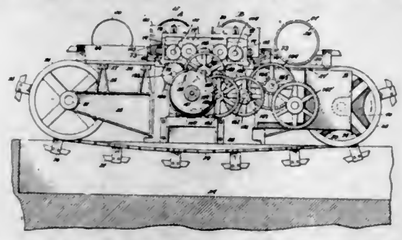
1,782,991. ELECTRIC CONNECTER FOR TOY TRAIN TRACKS. HARRY C. IVES, Bridgeport, Conn., assignor, by mesne assignments, to The Ives Corporation, Bridgeport, Conn., a Corporation of Connecticut. Filed July 5, 1927. Serial No. 203,366. 8 Claims. (Cl. 191—29.)



1. An electrical connecter for toy railway tracks comprising a base, two attachment means carried thereby and adapted to engage the outside rails, terminal means carried by said base and electrically connected to one of said attachment means, a spring contact member carried by said base adapted to engage a center rail under spring pressure in the attached relation of the base, and terminal means electrically connected to said spring contact means.

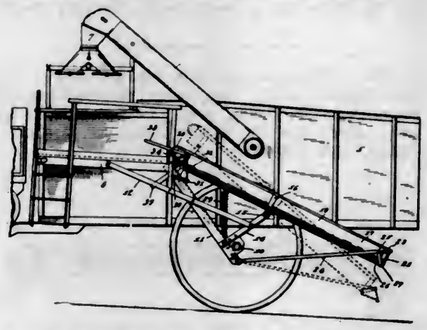
1,782,992. ROAD GRADER. ALGOT F. JOHNSON, Minneapolis, Minn. Filed Aug. 13, 1928. Serial No. 299,225. 1 Claim. (Cl. 37—156.)

The combination with a grader including a carriage, and a leveling scraper blade supported from the carriage at an angle oblique to the longitudinal center line thereof and adapted to substantially level the top of a road shoulder, of a beveling scraper blade pivotally connected to one end of a leveling scraper blade and normally projecting outward and downward therefrom and adapted to bevel or slope the side of a road shoulder simultaneously with the leveling of the top thereof by the leveling blade, the axis of the pivotal connection between the leveling scraper blade and the declined beveling scraper blade being at substantially right angles to the beveling blade so that pivotal movements of the beveling blade in respect to the leveling blade will not materially change the angle of the slope cut by said beveling blade, and means for holding said beveling blade against accidental pivotal movements caused by scraping action.



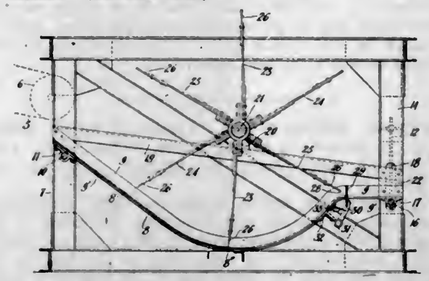
1,782,993. NONREGENERATIVE RADIO CIRCUITS. OCTAVIUS KNIGHT, Westfield, N. J. Filed Apr. 17, 1924. Serial No. 707,150. 1 Claim. (Cl. 179—171.)

A radio frequency amplifier circuit comprising an audion with input and output circuits tending to produce regeneration through the plate-grid capacity of the audion, said input circuit having connected between grid and filament a variable radio frequency tuning circuit comprising an inductance element shunted by a condenser, for imparting at variable radio frequencies a voltage between grid and filament, and a choke coil interposed in the connection of the filament to said tuning circuit, the inductive reactance of said choke coil sufficiently predominating, at the radio frequencies to which said tuning circuit may be tuned, to substantially check the feed back of radio frequency energy from the output circuit to the input circuit through the plate grid capacity.



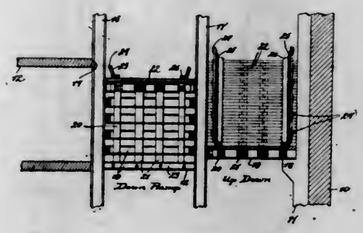
1,782,994. MACHINE FOR BEADING AND FLANGING METAL BARRELS. BROR J. LINDGREN, Buffalo, N. Y., assignor to Niagara Machine and Tool Works, Buffalo, N. Y., a Corporation of New York. Filed May 25, 1929. Serial No. 365,993. 26 Claims. (Cl. 153—2.)

1. In a machine of the character described, two forming rolls, means for moving said rolls relative to one another, an endless conveyer belt adapted to receive barrel shells, step-by-step means moving said belt to bring the barrel shells successively into position between said rolls, a second pair of forming rolls arranged on the opposite



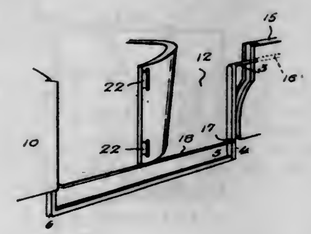
side of said barrel from said first mentioned rolls, and means synchronized with said step-by-step means for moving said last named pair of rolls toward said first named pair of rolls to form that portion of the barrel shell disposed therebetween.

1,782,995. SACK CHUTE FOR HARVESTER THRASHERS. WALLACE F. MACGREGOR and NORMAN R. KRAUSE, Racine, Wis., assignors to J. I. Case Company, Racine, Wis., a Corporation of Wisconsin. Filed May 3, 1927. Serial No. 188,577. 10 Claims. (Cl. 193—15.)



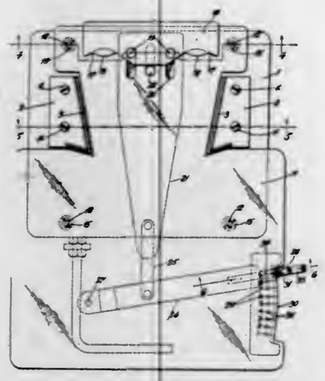
4. In a sack-chute, an end-gate hinged thereto, means for releasing the chute whereby it may be swung in one direction, means for automatically opening the end-gate outwardly and downwardly during the swinging movement of the chute and for closing the gate when the chute is swung in the opposite direction, and a spring associated with the chute for returning the latter to sack receiving position.

1,782,996. APPARATUS FOR STACKING ORE AND SIMILAR MATERIAL. GILBERT D. MOODY, Weyauwega, Wis. Filed Mar. 27, 1929. Serial No. 350,199. 6 Claims. (Cl. 198—128.)



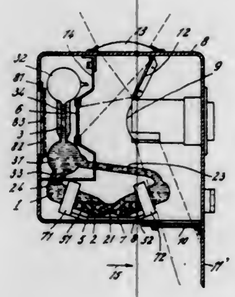
1. In an apparatus of the character described, a trough adapted to receive ore from a conveyor, means comprising a series of rotatable paddle members for ejecting the ore from said trough, and baffle means providing for compression of the ore by said paddle members.

1,782,997. BUILDING. ERIC P. MUNTZ, Buffalo, N. Y. Filed Dec. 30, 1927. Serial No. 243,591. 2 Claims. (Cl. 20—1.13.)



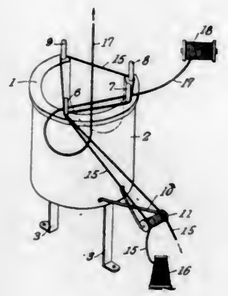
1. A building including a series of spaced horizontal floors each of which has an opening provided therein, said openings being arranged in vertical alinement and forming a vertical shaft and a ramp structure arranged in said shaft, said ramp structure including parallel rows of metal columns arranged in said shaft and mainly supported at their bases, and a plurality of fabricated inclined ramps removably secured to said columns between said rows and mainly supported thereby, said ramps removably abutting the said floors adjacent the ends of said openings whereby a continuous system of ramps is provided between the several floors, and the ramp structure is substantially independent of the building and said ramps consisting of two series, the ramps of each series being parallel with one another and arranged at an angle to the ramps of the other series.

1,782,998. TRANSFORMABLE MOTOR-CAR BODY. FÉLIX LÓPEZ-OSORIO, Buenos Aires, Argentina. Filed Sept. 28, 1928. Serial No. 308,973. 2 Claims. (Cl. 296—1.)



1. In a convertible automobile body comprising a side wall having an opening therein and a floor board provided with an opening, the combination therewith of a roof supporting device comprising an extensible and contractible beam designed to be moved into and out of the opening in the floor board and a supporting frame for said beam having a member movably mounted in the opening in the side wall, whereby said beam may be swung upwardly into roof supporting position or downwardly out of such position.

1,782,999. DIE. JOHN A. PARKER, St. Louis, Mo., assignor to International Shoe Company, St. Louis, Mo., a Corporation of Delaware. Filed Jan. 25, 1929. Serial No. 335,001. 21 Claims. (Cl. 12—17.)



1. A die comprising a base, a work supporting plate, springs for supporting the work supporting plate above the base, cutters rigid with the base, and spaced gage parts supported by said supporting plate for gaging the work in one position with one edge toward one of said cutters and in another position with the opposite edge toward another cutter.

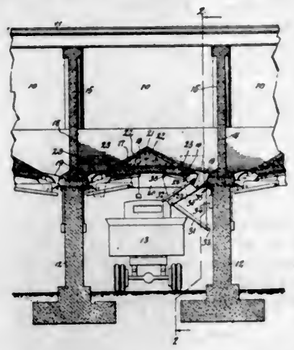
1,783,000. APPARATUS FOR INDICATING SPEED VARIATIONS. PAUL PASCHEN and WILHELM GEBHARDT, Nuremberg, Germany, assignors to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany, a Corporation of Germany. Filed Mar. 27, 1930, Serial No. 439,402, and in Germany Apr. 23, 1929. 23 Claims. (Cl. 116—37.)

1. In a device for indicating speed variations of traveling vehicles, more particularly motor cars, communicating vessels comprising a yoke member located substantially in the direction of the longitudinal axis of the vehicle, rising tubes connected to said yoke member, an indicating liquid within said rising tubes, and means adapted to render the level of said indicating liquid in said rising tubes visible from a distance.

1,783,001. APPARATUS FOR MAKING WEAVING KNOTS. GUGLIELMO RAETZ, Cordenons, Italy. Filed Oct. 9, 1928, Serial No. 311,293, and in Italy Jan. 26, 1928. 2 Claims. (Cl. 289—3.)

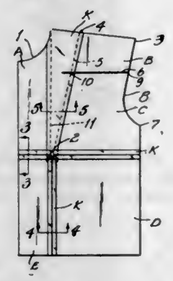
1. In an apparatus for making weavers' knots, a support comprising a U-shaped base provided on its upper end with an open ring, pins mounted thereon for the guidance of the threads to be knotted and the ends of which are to be cut a predetermined distance from the knot.

1,783,002. CURTAIN ROLLER. EMORY GLENN SIMPSON, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Dec. 26, 1929. Serial No. 416,393. 6 Claims. (Cl. 156—36.)



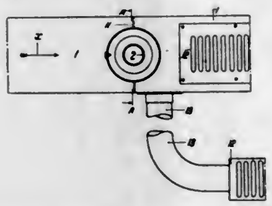
4. A curtain roller comprising in combination a shaft, support means for non-rotatively supporting the said shaft, a tubular curtain roller having one end closed by a centrally apertured disc, spring torque producing means connected to the said roller and the said shaft, a clutch drum rotatively mounted on the said shaft and secured to the said disc in the said aperture, a clutch spring having a plurality of convolutions mounted on the said drum in clutching relation therewith and with one end fixed to the said shaft support, a trigger rotatively mounted on the said drum and having one end operatively connected to the other end of the clutch spring whereby the trigger may be pivoted about the said clutch drum to expand the said clutch spring to permit the said spring means to rotate the said roller.

1,783,003. STORAGE BIN. ARTHUR P. SKAER, Buffalo, N. Y., assignor to Eric P. Muntz, Buffalo, N. Y. Filed Apr. 15, 1929. Serial No. 355,046. 1 Claim. (Cl. 72—6.)



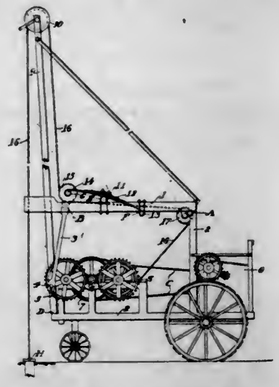
A storage bin having transverse walls, longitudinal side walls connecting said transverse walls, and a bottom connecting the lower ends of said walls and including a longitudinal arch connecting at its opposite depressed ends with the lower ends of the transverse walls, and provided adjacent to its depressed end with outlets for the material stored in the bin, said arch being provided

on its upper side on opposite sides of its elevated central part with shoulders which face each other, and a deflector



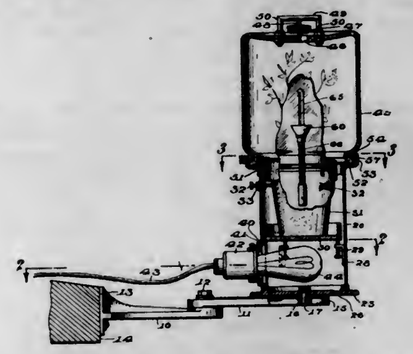
arranged above the central part of said arch and engaging its opposite ends against said shoulders and having opposite inclines which slope toward said outlets.

1,783,004. PATTERN. HELEN HALL SMITH, St. Louis, Mo. Filed Mar. 28, 1929. Serial No. 350,530. 8 Claims. (Cl. 33—14.)



8. A waist pattern made according to the measurements of an individual and having a plurality of tapering adjustable dart portions extending from the point indicating the bust.

1,783,005. VENTILATING APPARATUS. ALEXANDER WILLIAM STEWART, Glasgow, Scotland. Filed May 13, 1929, Serial No. 362,739, and in Great Britain May 29, 1928. 5 Claims. (Cl. 98—38.)



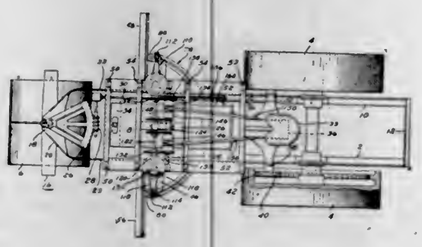
1. Ventilating apparatus comprising in combination with separate passages for hot air and cold air, respectively, a ventilator adapted to discharge a current of hot or cold air in any desired direction in communication with said passages, means controlling the proportions of hot and cold air passing from said passages through said ventilator, and a louvre for discharging air cut off from said ventilator by said means.

1,783,006. SPUDDING CUSHION FOR DRILLING MACHINERY. THOMAS WILLIAMS, Topeka, Kans. Filed Dec. 9, 1929. Serial No. 412,787. 6 Claims. (Cl. 255—16.)

2. In a spudding device to be used in connection with wire lines on drilling rigs, two semi-elliptical leaf springs, a sheave, cross members, the springs positioned on a walking beam by means of the cross members and the sheave rotatably positioned on the springs, and transmitting the motion of the walking beam to a cable.

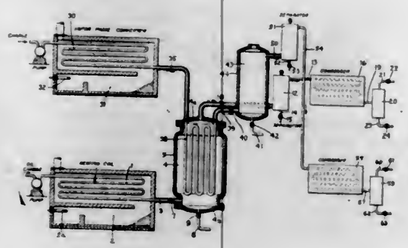
1,783,007. PLANT-PROPAGATING DEVICE. MAURICE ALLAND, Atlantic City, N. J. Filed Oct. 11, 1928. Serial No. 311,830. 15 Claims. (Cl. 47—38.)

3. A plant-propagating device, comprising a hollow casing section adapted to contain a plant pot, an adjustable partition within said section to support a pot, and means to operatively support a heating element within said section beneath said partition, a light-admitting dome removably carried by said section, and means to detachably lock said dome to said section.



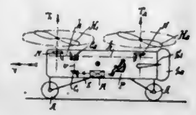
1,783,008. TICKER-TAPE CONTROL. JOHN HARTFORD CHIDESTER, Chatham, N. J. Filed July 23, 1927. Serial No. 208,035. 3 Claims. (Cl. 242—75.)

1. A ticker tape feed control comprising a member having a groove therein to receive a tape for endwise slid-



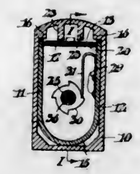
ing movement, two gravity actuated strips hinged to said member at opposite sides respectively of said groove, a flange on each strip arranged to retain said tape against the bottom of said groove to prevent vibration of said tape while traveling through said groove, and means to adjust the pressure of said flanges upon said tape.

1,783,009. ROAD MACHINERY. DAVID B. COOK, Frankfort, N. Y., assignor to Acme Road Machinery Company, Frankfort, N. Y., a Corporation of New York. Filed Jan. 28, 1926. Serial No. 84,299. 2 Claims. (Cl. 37—146.)



1. A road vehicle having, in combination, a frame, a road grading device mounted beneath and extending transversely of the frame, blocks mounted for up and down movement adjacent the sides of the frame, a shaft, means for driving the shaft, and connections between said blocks and shaft for raising and lowering the blocks independently of each other at the will of the operator, and connections between said blocks and the ends of said device for raising and lowering said ends.

1,783,010. METHOD AND APPARATUS FOR CRACKING HYDROCARBON OILS. RICHARD J. DEARBORN, Summit, N. J., assignor to The Texas Company, New York, N. Y., a Corporation of Delaware. Filed Jan. 19, 1928. Serial No. 247,832. 4 Claims. (Cl. 196—60.)



1. A process of converting higher boiling point hydrocarbon oil into lower boiling point products which comprises passing the oil through a heating coil of restricted cross section, heating the oil in transit to substantially a cracking temperature, delivering the heated oil into a cracking drum where a body of oil collects, simultaneously cracking oil in the vapor-phase at a relatively high cracking temperature, and passing the cracked vapors and gaseous products thereof in indirect contact with said body of oil to maintain a cracking temperature therein and effect cracking of the oil in the liquid phase.

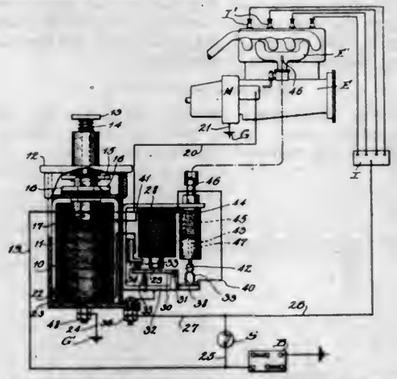
1,783,011. HELICOPTER. NICOLAS FLORINE, Brussels, Belgium, assignor of ten per cent to Societe Nationale pour l'Etude des Transports Aeriens, Societe Anonyme, Brussels, Belgium. Filed Nov. 26, 1927, Serial No. 235,789, and in Belgium Dec. 3, 1926. 7 Claims. (Cl. 244—19.)

4. In a helicopter, a plurality of propellers, means for causing all of the propellers to revolve in the same direction, and means for causing the helicopter to be inclined forwardly and for suppressing the lateral upsetting couple to secure horizontal flight.

1,783,012. MAGNETIC RAZOR CONDITIONING AND DEVICE THEREFOR. JOHN S. FORBES, Philadelphia, Pa., assignor, by mesne assignments, to Yates & Grant, Inc., Detroit, Mich., a Corporation of Michigan. Filed Mar. 17, 1927. Serial No. 176,197. 10 Claims. (Cl. 175—265.)

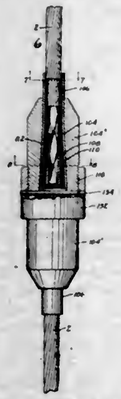
1. The method of magnetic blade-edge treatment which comprises subjecting the edge concurrently to a straightening magnetic influence and to vibration.

1,783,013. ROD FOR USE IN ARC WELDING OR CUTTING. J BIRCHARD GREEN, Chicago, Ill., assignor to Franklin M. Warden, Chicago, Ill. Filed Feb. 10, 1927. Serial No. 167,377. 8 Claims. (Cl. 148—23.)



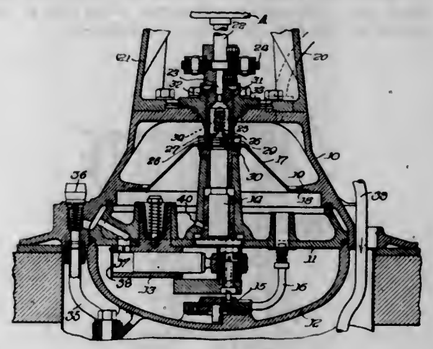
1. In a coating for filler material as used in fusion welding and cutting, a tungsten oxide compound and a uranium oxide compound.

1,783,014. SEMIRIGID CRYSTAL MOUNTING. CLARENCE W. HANSELL, Rocky Point, N. Y., assignor to Radio Corporation of America, a Corporation of Delawhre. Filed Jan. 21, 1927. Serial No. 162,433. 6 Claims. (Cl. 171—327.)



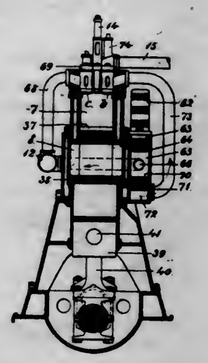
1. A mounting for a piezo-electric cryatal oscillator comprising an outer annular casing, a pair of insulating disks mounted within said casing, electrodes detachably mounted through said disks, and clamping means carried by each of said electrodes, said means being adjustable lengthwise of the electrodes, whereby to clamp each of said electrodes in fixed relationship with respect to the disc through which it is mounted.

1,783,015. STARTER FOR INTERNAL-COMBUSTION ENGINES. JOHN HASSELBRING, Jr., Woodhaven, N. Y., assignor to Royalty Holding Corporation, Brooklyn, N. Y., a Corporation of New York. Filed July 22, 1925. Serial No. 45,310. 8 Claims. (Cl. 290—37.)



1. In a starter for internal combustion engines of the class in which power from an electric source is temporarily applied by an electric motor to an engine having an intake manifold, and an ignition system drawing its supply from said source, a normally open primary magnetic switch having a winding and contacts, said contacts being in circuit from said source to said starting motor, a normally open secondary magnetic switch having a winding and contacts, said contacts being in circuit from said source to the winding of said primary magnetic switch, a normally closed make and break mechanism having a movable contact, said contact being in circuit from said source to the winding of said secondary magnetic switch, pneumatically actuated means operative upon said movable contact, connections between said means and said engine manifold, whereby said movable contact will be actuated to deenergize the winding of said secondary magnetic switch when the engine is operating under its own power, means operative upon said movable contact normally tending to close said make and break mechanism, and a manually operative switch in circuit between said source of power, the ignition system, and the windings of said primary and said secondary magnetic switches respectively.

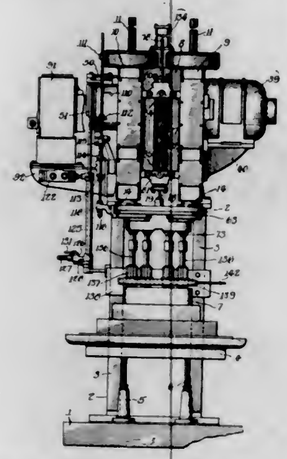
1,783,016. CABLE AND CONNECTER THEREFOR. IRA THOMAS HOOK, New Haven, Conn., assignor to The American Brass Company, Waterbury, Conn., a Corporation of Connecticut. Filed Oct. 21, 1924. Serial No. 744,870. 3 Claims. (Cl. 173—303.)



1. A cable connecter comprising a cable having an expanded end, a sleeve thereon having a conical bore portion adjacent to the expanded end of the cable and a tubular portion of uniform internal diameter extending along an unexpanded portion of the cable and securing material within both said conical and tubular portions adhering to said cable and sleeve and connecting the same together, said adhering material within the tubular portion gradually transferring the stress of the cable to the sleeve.

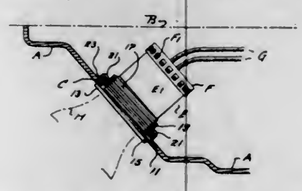
1,783,017. COMPRESSOR CONSTRUCTION FOR ICE MACHINES. RASMUS M. HVID, Chicago, Ill. Filed Oct. 25, 1927. Serial No. 228,513. 9 Claims. (Cl. 230—159.)

1. In a compressor for ice machines having a high pressure chamber and a motor mounted outside and entirely exteriorly thereof, the combination of a drive shaft connected to the motor, an intermediate shaft projecting through a wall of the high pressure chamber, a driven shaft located entirely within the chamber, and loose couplings between the three shafts.



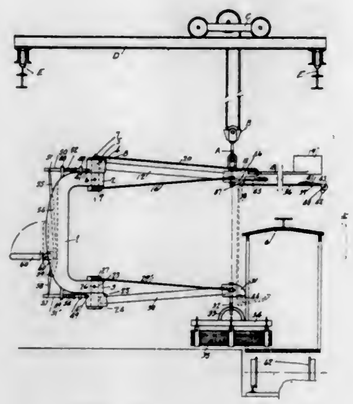
1,783,018. GAS-GENERATING COMBUSTION ENGINE. JOHAN ERIK JOHANSSON, Gottenborg, Sweden, assignor to Aktiebolaget Gotaverken, Gottenborg, Sweden, a Corporation of Sweden. Filed Oct. 12, 1925, Serial No. 61,898, and in Sweden Oct. 22, 1924. 4 Claims. (Cl. 60—30.)

4. In combination, in an internal combustion engine and compressor, a combustion cylinder, a compressor cylinder, and a packing cylinder disposed in coaxial relation, a compound piston structure comprising pistons having a working fit with the respective cylinders, means for admitting air to the compressor cylinder above the piston therein during the suction stroke of the engine, the volume



of air drawn into the compressor being approximately fifty per cent greater than the volume of air required to charge the engine, means for admitting a charging portion of the air compressed during the compression stroke into the engine cylinder and for admitting the remainder of such compressed air into the compressor cylinder below the piston therein, a take-off pipe leading from the engine exhaust valve, and means for conducting the air compressed in the compressor cylinder during the out stroke of the piston over the exhaust valve and into said pipe.

1,783,019. HONING MACHINE. ALBERT M. JOHNSON, Rockford, Ill., assignor to Barnes Drill Company, Rockford, Ill., a Corporation of Illinois. Filed Dec. 4, 1926. Serial No. 152,560. 24 Claims. (Cl. 51—34.)



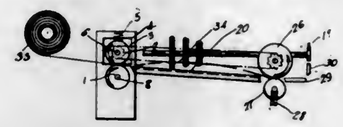
1. A machine of the class described having, in combination, a reciprocatory head, rotatable spindles operatively supported upon said head, a pair of spaced guiding sleeves attached to said head, stationary bearings for said guiding sleeves, a pair of shafts respectively supported within said guiding sleeves and having operative connection with said spindles, means for rotating said shafts, and hydraulic reciprocating means operatively connected to said head between said guiding sleeves separately from said guiding members and shafts.

1,783,020. ELECTRIC-FIXTURE DEVICE. LEON KOZLOWSKI, Union City, N. J., assignor of one-half to Theresa Puschett, Jersey City, N. J. Filed June 11, 1929. Serial No. 370,019. 2 Claims. (Cl. 173—339.)

2. A device of the character described, comprising a fixture formed with an opening including a notch, a lamp-socket casing having the lamp-receiving end thereof furnished with an abutment flange, said casing being provided with screw-threads adjacent its said end, the said casing being insertible into said opening from the outside of the fixture with the abutment flange overlying the fixture's exterior, an element projecting from said flange on the side thereof facing said fixture, said element being capable of entering said notch to keep the casing from turning, an internally threaded member adapted to engage the threads on the lamp-socket casing from the inside of the said fixture, and a spanner engagement ear extending therefrom in a like direction to the notch-entering element, the said member serving to hold said abutment flange against the side of the fixture with the lamp-socket casing entirely hidden therewithin.

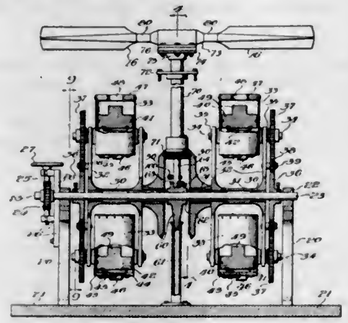
1,783,021. LOADING CRANE. WILLIAM W. LEACH, Mansfield, Ohio. Filed Feb. 26, 1929. Serial No. 342,823. 16 Claims. (Cl. 212—17.)

1. In a hoisting frame, a support, a bracket mounted for swinging movement at the upper end of the support, a jib mounted for swinging movement at the lower end of the support, and means whereby the bracket and jib may be secured in vertical alinement and fixed with respect to the support.



1,783,022. COMBINED LETTER AND ENVELOPE STUFFER. JOHN O. LITTLE, New York, N. Y. Filed Feb. 24, 1928. Serial No. 256,523. 1 Claim. (Cl. 281—43.)

A combined four edged perimeter letter sheet and envelope stuffer formed from a single sheet comprising inwardly extending aligned cuts in the sheet on opposite sides thereof and adjacent one side thereof and extending inwardly equal distances from the sides to define a four edged perimeter of a letter sheet, and folds extending from the inner extremities of the cuts and perpendicular thereto for a distance less than one third the length of the sheet in the direction of the folds, said cuts and folds forming three leaves of substantially equal area, the leaves formed by the folds being folded in opposite directions to overlie each other and form a plurality of leaves in the stuffer, and a fold formed between the inwardly extending cuts to cause the leaves to lie over the letter sheet.



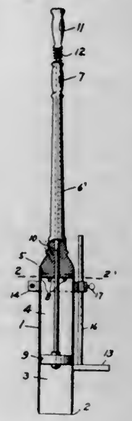
CARNEGIE LIBRARY OF ATLANTA

1,783,023. CUTTER. SAMUEL G. MARTIN, West Somerville, Mass., assignor to The Barrett Company, a Corporation of New Jersey. Filed Sept. 25, 1923. Serial No. 664,667. 6 Claims. (Cl. 164—49.)

1. In a cutter, means for continuously feeding a strip of flexible strap-making material, a cutter, means for intermittently operating said cutter at various time intervals to stop and to cut the strap-making material and a guide between said cutter and feeding means adapted to permit the strap material to buckle when the material is stopped by the cutter.

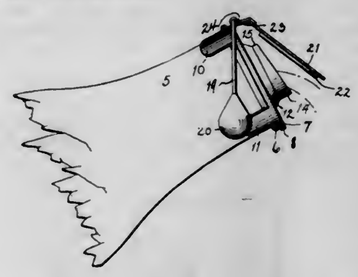
1,783,024. FLYING MACHINE. DANIEL P. MCLAUGHLIN, Chicago, Ill. Filed Apr. 22, 1929. Serial No. 356,957. 22 Claims. (Cl. 244—19.)

1. In a body having means for propelling it, an auxiliary device comprising rotary mechanism including freely movable means for producing atmospheric suction by employing centrifugal force, to co-operate with said propelling means in moving said body.



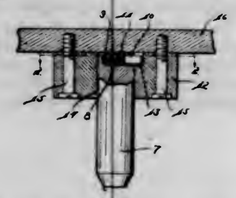
1,783,025. ANTENNA. ALEXANDER MEISSNER, Berlin, Germany, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches, Berlin, Germany, a Corporation of Germany. Filed June 17, 1925, Serial No. 37,826, and in Germany July 25, 1924. 4 Claims. (Cl. 250—33.)

2. A space radiation antenna comprising a conductor the current distribution in which contains a whole and a half current loop, and reactance devices located symmetrically with respect to the whole current loop.



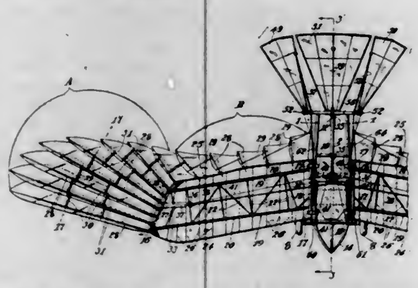
1,783,026. TRANSPLANTING DEVICE. WILLIAM R. OBER, Llanerch, Pa. Filed Mar. 5, 1929. Serial No. 344,312. 1 Claim. (Cl. 55—18.)

A device of the character stated comprising an elongated cylindrical shell of thin material having a positively closed top and an open bottom, said shell being of equal diameter throughout its extent having at its lower end an outwardly bevelled annular cutting portion, said shell forming a combined transplanting chamber and air compression chamber, said air compression chamber being provided with an annular series of ports at its top, a casing of relatively thick material extended from said shell in a tapering manner and having a hand grip formed integral therewith at its top, a piston rod extended through said casing which is solid, a piston, a vertically



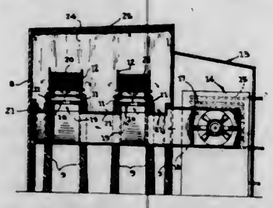
disposed handle for said piston rod the vertical axis of which parallels the vertical axis of the cylinder, a coiled spring between the top of said hand grip and the bottom of said handle, a split ring adjustable vertically and horizontally with respect to said shell, a vertical stem carrying a horizontal foot rest adjustable vertically of said split ring, and a thumb nut for securing said foot rest in adjusted position, whereby the lowest position of the piston may be accurately gauged for compression purposes for expelling a plant without interfering with that part contained in the cylinder.

1,783,027. BOTTLE CLOSURE. CAMILLO SAVINO, City Island, N. Y. Filed Aug. 13, 1928. Serial No. 299,397. 1 Claim. (Cl. 215—63.)



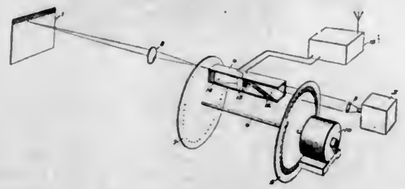
A bottle closure comprising a plate having an annular flange and a plurality of depending tongues frictionally engaging the mouth of a bottle, a pouring spout formed with said plate, the front wall of said spout being higher than the rear wall thereof, a flanged lid normally closing said spout, said lid having a rear extension bent backwardly on itself forming a pivotal connection for a pintle, spaced ears on each side of said pivotal connection, a pintle or rod passing through said ears, said rod being bent downwardly and inwardly toward the neck of said bottle and weights carried at the ends of said pintle or rod.

1,783,028. QUICK-CHANGE PUNCH AND HOLDER THEREFOR. CLARENCE F. SHERIDAN, Detroit, Mich. Filed May 31, 1928. Serial No. 281,703. 1 Claim. (Cl. 279—93.)



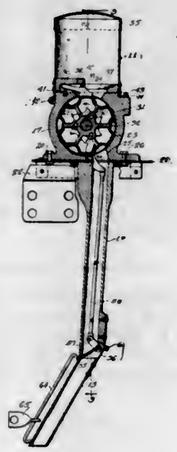
A device of the class described comprising: a punch holder having a bore formed therein and provided on its upper face with a recess communicating with said bore, one of the side walls of said recess being tangent to said bore and the other side wall being radial to said bore; a punch insertable into said bore; a radially movable locking member on said punch engageable in said recess for locking said punch against removal from said holder; and resilient means for normally thrusting said radially movable locking member outwardly beyond the periphery of said punch, into said recess, the rotation of said punch in said holder, effecting, through engagement of said locking member with said tangent side wall, an inward movement of said locking member to inoperative position.

1,783,029. ORNITHOPTER. GEORGE R. WHITE, Stony Brook, N. Y. Filed Oct. 31, 1927. Serial No. 229,884. 8 Claims. (Cl. 244—20.)



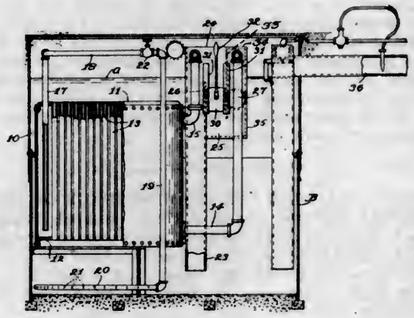
1. In a flying machine, a wing comprising an air-foil section and a feathered section, the feathered section comprising a plurality of feathers having twistable quills, and means to limit the twisting of said quills relative to each other.

1,783,030. KILN. JAMES ALLEN WORDEN, Antigo, Wis. Filed June 24, 1929. Serial No. 373,398. 4 Claims. (Cl. 34—46.)



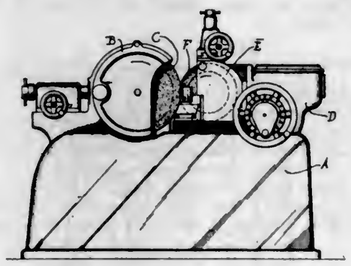
1. In a kiln, an enclosure, a heating unit thereadjacent, an outlet flue, a return flue, said flues extending between opposite ends of said enclosure and the heating unit, and a pair of conduits extended between said flues and communicating with the same and with the interior of the enclosure, said conduits being oppositely tapered.

1,783,031. TRANSMISSION OF PICTURES. ERNST F. W. ALEXANDERSON, Schenectady, and RAY D. KELL, Scotia, N. Y., assignors to General Electric Company, a Corporation of New York. Filed July 24, 1928. Serial No. 295,006. 3 Claims. (Cl. 178—6.)



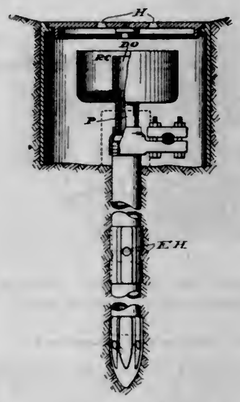
1. A picture transmitting system including a Kerr cell, polarizing groups of transparent plates mounted on opposite sides of said cell, the planes of polarization of the two groups being arranged at right angles to each other, a lense disk arranged to project light through said plates and said cell, and a perforated disk arranged to receive the light transmitted through said cell and said plates.

1,783,032. SEED-REPLANTING ATTACHMENT FOR CULTIVATORS. EVERETT AYERS, Brooklyn, Ill., assignor of one-third to Hester Ayers, Chicago, Ill., and one-third to James Ayers, Camden, Ill. Filed June 23, 1928. Serial No. 287,774. 3 Claims. (Cl. 111—51.)



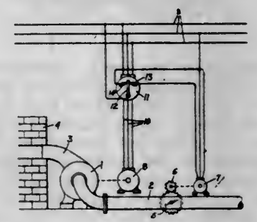
1. In a seed planter for cultivators having a yieldable inclined shovel, a seed magazine having an outlet therein, a vertically disposed chute communicating with said outlet, means in said magazine for feeding measured quantities of seeds from said outlet to said chute, a gate hinged at the lower end of said chute on a horizontal axis for retaining a measured quantity of seed therein ready for discharge, a vertically movable rod located within said chute, the lower end of said rod being connected to said gate, the upper end of said rod being arranged to be actuated by said feeding means, a discharge spout hinged on the lower end of said chute on a horizontal axis, and means connecting said chute and spout for retaining said spout in an inclined position with its discharge end in close proximity to said shovel so as to deposit seeds immediately in back of said shovel.

1,783,033. SOIL-WATER CATCH BASIN AND HEAT RECLAIMER. FRED S. BOLTZ, Mansfield, Mass. Filed Feb. 23, 1928. Serial No. 256,126. 8 Claims. (Cl. 257—122.)



2. An apparatus of the character described comprising a soil water catch basin, a shell mounted in said basin having tube sheets at its top and bottom and a plurality of tubes connecting said sheets, said tubes being open at their ends to soil water in the basin, means for introducing clean water under pressure into said shell and into contact with said tubes, means for discharging the clean water from said shell to a point outside of said basin, an overflow discharge pipe extending from the lower part of said basin to a part of the basin higher than the top of the said shell, a siphon blow-off pipe, one leg of which is open at its lower end to the lower part of the interior of the clean water shell and which extends out of said shell to a point above the clean water shell and is there connected with another leg of the siphon which extends down into the lower part of the waste water basin, said other leg having at its lower end a portion open to the interior of the catch basin, and a valve which controls the passage through said siphon, the pressure of said clean water introduced into the shell and thence through said siphon into the catch basin when said valve is open being adapted to force the soil water and entrained contents up through said overflow pipe, and a discharge outlet from the overflow pipe.

1,783,034. PROCESS OF PRODUCING NONCYLINDRICAL ARTICLES. CLEMENT BOOTH, Cincinnati, Ohio, assignor to Cincinnati Grinders Incorporated, Cincinnati, Ohio, a Corporation of Ohio. Filed June 25, 1928. Serial No. 287,999. 8 Claims. (Cl. 51—278.)

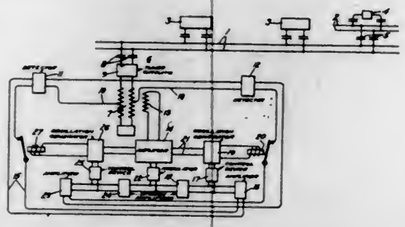


1. The process of producing a non-cylindrical roll consisting in axially progressing a work piece in an arcuate path defined by a grinding member and a control member having contra-generic transversely curved work engaging surfaces.

1,783,035. EARTH ELECTRODE. STEPHEN W. BORDEN, Summit, N. J. Filed June 16, 1928. Serial No. 286,045. 5 Claims. (Cl. 173—31.)

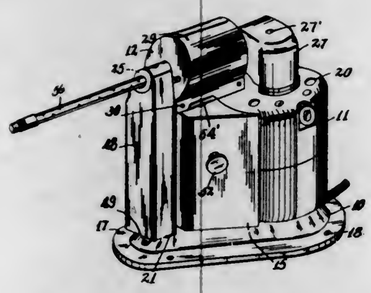
1. In a pipe coupling for earth electrodes; the improvement consisting of a centrally located internal shoulder, of sufficient width to form a seat for the pipe, said seat having a depression in its surface and openings through the coupling wall connecting the depression with the outside of the coupling.

1,783,036. CONTROL MECHANISM FOR CENTRIFUGAL COMPRESSORS AND METHOD OF OPERATING THE SAME. HENRY V. CRAWFORD, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Mar. 22, 1928. Serial No. 263,932. 4 Claims. (Cl. 230—114.)



1. A centrifugal compressor having a blast gate, a substantially constant speed electric motor for driving the compressor, said compressor and motor having characteristics such that the power supplied to the motor varies, within the region of normal operation, substantially in the same ratio as the weight of air delivered by the compressor, and automatic means responsive to the power supplied to the motor for operating said blast gate to maintain constant power input to the motor and thereby supply air at a constant weight rate.

1,783,037. HIGH-FREQUENCY SIGNALING SYSTEM. FREDERICK W. FRINK, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Sept. 27, 1928. Serial No. 308,775. 12 Claims. (Cl. 179—2.5.)



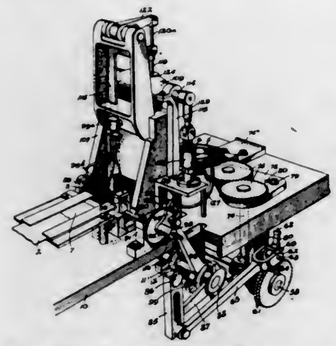
1. The combination in a carrier current communication system, with a plurality of power lines, intercommunicating carrier stations on each line, the stations on different lines operating at different frequencies, a carrier channel interconnecting said lines, and means located upon one of said lines between stations on said line for receiving sig-

nals from any of said stations with a carrier wave having predetermined frequency and repeating said signal to a station on a different line with a carrier wave having the

frequency at which said last station operates whereby duplex communication may be effected between stations on different lines.

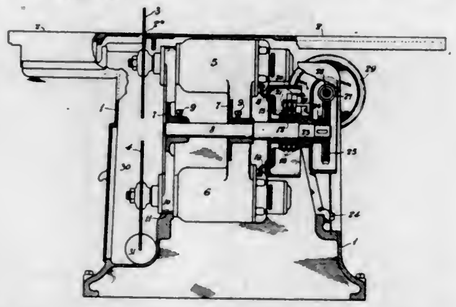
1,783,038. ELECTRIC PENCIL SHARPENER. DAVID J. GAWRON, Brooklyn, N. Y. Filed Aug. 27, 1930. Serial No. 478,078. 8 Claims. (Cl. 120—96.)

1. An electric pencil sharpener, comprising a base, a motor attached on the base so that its sides are vertical, a vertical support plate spaced from the motor and attached on the base, a pencil sharpener extending horizontally across the motor and the vertical plate and operatively connected to the motor, an automatic switch for starting the motor upon the insertion of a pencil into the sharpener and mounted upon the vertical plate, a drawer for receiving shavings from the sharpener and formed with a window at the rear and slidably mounted on the base between the motor and the vertical plate, and means on base to hold drawer in place, said vertical support plate comprising a flange formed with an aperture at its upper end for rotatively mounting the sharpener, and lugs bent at right angles to the plate at the lower end for mounting the plate to the said base.



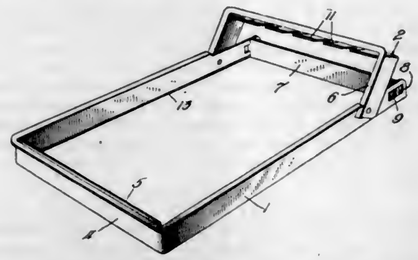
1,783,039. FEED CHUCK. FRANK E. GREEN, Pittsburgh, Pa. Filed Feb. 18, 1930. Serial No. 429,345. 5 Claims. (Cl. 29—62.)

1. In a feed chuck, the combination of a tubular holder, a plurality of spring metal grippers having end portions to fit the holder and removably mounted in said holder, said grippers having intermediate portions bowed inwardly toward the axis of the holder to form stock-gripping fingers, and means for compressing the grippers longitudinally to increase their stock-gripping action.



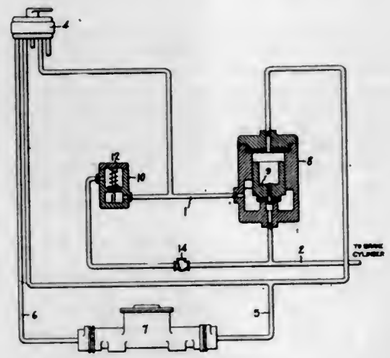
5. In a feed chuck, the combination of a tubular holder having an internal wedging shoulder at one end, a member screwed into the other end of the holder and forming a second internal wedging shoulder, and a plurality of spring metal grippers having end portions to fit the holder held in said holder between said shoulders, the intermediate portions of said grippers being bowed inwardly to form stock-gripping fingers, and the compression of said fingers being regulated by the degree of insertion of said member in said holder.

1,783,040. MACHINE FOR FORMING RINGS OF SEGMENTAL PIECES. EMILE J. GUAY, deceased, Swampscott, Mass., by Fred Germain, administrator, Swampscott, Mass., and FREDRICK S. GODFREY, Lynn, Mass., assignors to General Electric Company, a Corporation of New York. Filed Aug. 19, 1927. Serial No. 214,188. 4 Claims. (Cl. 164—49.)



1. In a machine for cutting pieces from material and stacking the pieces one on another in overlapping relation, the combination of a reciprocating cutting means for cutting pieces from the material, step by step means for feeding the material under the cutting means, a holder in front of the cutting means, means for supporting a cut-off piece in alignment with the edge of the material whereby a cut-off piece is transferred to the holder by movement of the material when the material is advanced under the cutting means, and means for imparting turning movement to the holder.

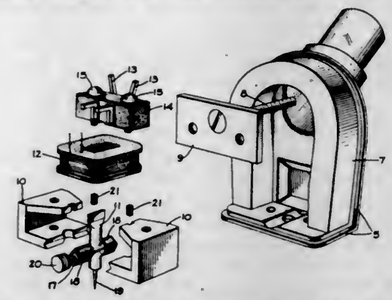
1,783,041. WOODWORKING MACHINERY. JAMES E. HIRST, Cincinnati, Ohio, assignor to The J. A. Fay & Egan Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Aug. 22, 1929. Serial No. 387,615. 6 Claims. (Cl. 143—45.)



2. In a woodworking machine of the class described, a frame, a table therefor, a plurality of circular saws, a motor directly connected with each saw, means for moving said saws within said frame so that when one of said saws is extending through an opening in the table the other of said saws will be concealed within the frame of the machine, and switching means for completing the electrical circuit to the motor of the saw extending through the table, said switching means being actuated by the means for moving said saws and automatically severing the electrical circuit to the motor of the saw concealed within the frame of said machine.

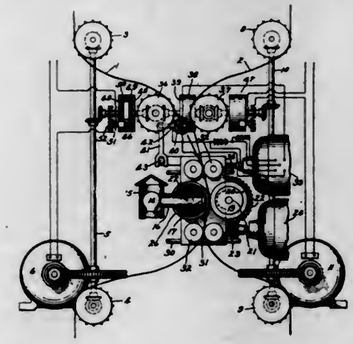
1,783,042. TYPE-PAGE FRAME. EDWARD B. HOWE, Olympia Fields, Ill. Filed Mar. 2, 1928. Serial No. 258,502. 12 Claims. (Cl. 101—404.)

1. In a type page holder, a rectangular frame, pivotal means for clamping the type form in the frame, and resilient means integral with said frame for holding the type under pressure after the form has been clamped.



1,783,043. AIR-BRAKE SYSTEM. CHARLES A. IVES, Lawrence Park, Pa., assignor to General Electric Company, a Corporation of New York. Filed May 22, 1929. Serial No. 365,171. 6 Claims. (Cl. 303—61.1.)

1. In an air brake system, a straight air pipe, a brake cylinder pipe, door controlling mechanism, and means for permitting the pressure in said brake cylinder pipe to build up to the pressure in said straight air pipe when the doors controlled by said mechanism are closed and for limiting the pressure in said brake cylinder pipe to a predetermined value when said mechanism is operated to open the doors.

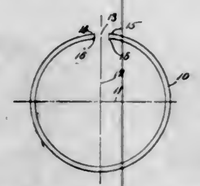


1,783,044. REPRODUCER. EDWARD W. KELLOGG, Schenectady, N. Y., assignor to The General Electric Company, a Corporation of New York. Filed Dec. 1, 1925 Serial No. 72,541. 18 Claims. (Cl. 179—100.41.)

5. The combination of an armature member adapted to be rocked to and fro and provided with a plurality of stylus holding surfaces, and clamping means symmetrically disposed about the rotational axis of said armature for producing pressure at a point intermediate said surfaces.

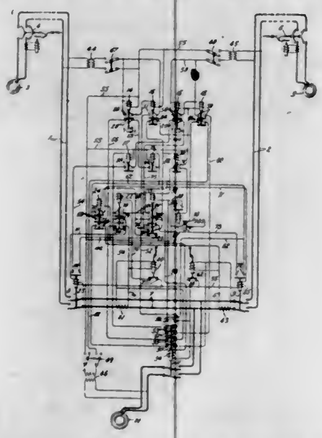
18. The combination of a magnet, a coil interposed in the flux path of said magnet, an armature having a rigid non-circular shaft extending at right angles thereto, a resilient bearing for said shaft adapted to maintain said armature in a central position, said armature being adapted to be rocked to and fro for varying the path of the flux transmitted through said coil by said magnet, one end of said armature being adapted to receive a stylus, and means extending through said shaft for holding said stylus in position.

1,783,045. CONTACT FILM PRINTER. EDWARD W. KELLOGG, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Oct. 4, 1929. Serial No. 397,394. 9 Claims. (Cl. 95—75.)



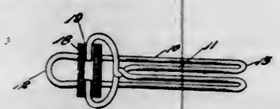
1. A contact film printer comprising means for moving a plurality of films having different degrees of shrinkage in contact with each other through an exposing light, means for causing the film to move in a curved path when passing through the light with the more shrunken film on the concave side, and means for adjusting the curvature of said path to compensate for the difference in shrinkage of the films.

1,783,046. PROCESS FOR THE SEPARATION OF COBALT AND IRON FROM SOLUTIONS RICH IN IRON AS OBTAINED BY LIXIVIATING ROASTED PYRITES. NILS ERIK LENANDER, Trondhjem, Norway, assignor to Orkla, Grubeaktiebolag, Lokken Verk, near Trondhjem, Norway. Filed June 27, 1929, Serial No. 374,263, and in Germany July 26, 1926. 2 Claims. (Cl. 75—18.)



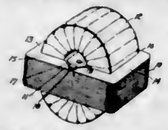
1. The process of recovering cobalt from solutions, containing besides cobalt also iron in the ferrous state, comprising the steps of subjecting the ferrous iron to the oxidizing action of an alkali metal chlorate, precipitating the ferric iron thus obtained and further treating the remaining solution to recover the cobalt contained therein.

1,783,047. METHOD OF MAKING STEEL PISTON RINGS. LEWIS C. MARSHALL, Walpole, Mass. Filed June 1, 1927. Serial No. 195,720. 28 Claims. (Cl. 29—156.6.)



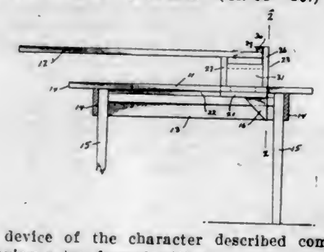
1. That method of making split packing rings from hard steel wire or rod which comprises as steps bending a length of wire or rod, whose surface at least is sufficiently hard to form a good bearing against a cylinder wall, to form a single annular turn, severing said turn from the material before completing a subsequent turn, at such a point as to form a ring having a gap therein, and removing any burr produced in severing the material.

1,783,048. CONTROL SYSTEM. ROBERT Y. MCCULLOUGH, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Jan. 22, 1929. Serial No. 334,314. 10 Claims. (Cl. 171—97.)



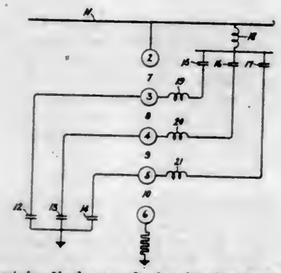
1. In combination, two normally disconnected independently energized circuits, a source of current normally disconnected therefrom, and means responsive to the voltages of said circuits for effecting the connection of said circuits together when the voltage of one of said circuits deconnected therefrom, and means responsive to the voltages of the other circuit is above a predetermined value and for effecting the connection of both of said circuits to said source when the voltages of both of said circuits are simultaneusly below predetermined values.

1,783,049. NECKTIE CLIP. ELBERT D. MILKS, Salamanca, N. Y. Filed Feb. 21, 1930. Serial No. 430,229. 9 Claims. (Cl. 24—255.)



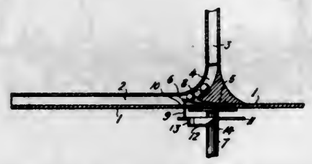
1. A necktie holder formed of a length of resilient wire folded upon itself forming opposed gripping arms, a roll having an axial opening, and one end of one of said arms being arranged to extend into said roll to provide a trunnion on which the same may rotate, the end of the wire arm opposite the roll extending beyond the roll and being turned outwardly to facilitate positioning the holder on the fabric.

1,783,050. MAGNETIC CORE. WAYNE J. MORRILL, Fort Wayne, Ind., assignor to General Electric Company, a Corporation of New York. Filed Apr. 22, 1930. Serial No. 446,376. 3 Claims. (Cl. 175—356.)



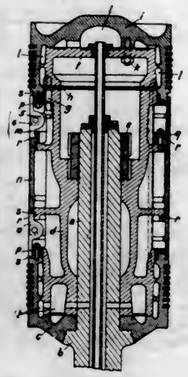
1. A laminated magnetic core for electrical induction apparatus, said core including a laminated outer part forming two outer legs and yokes connecting said legs, a laminated central leg part between said yokes, means for securing the laminations of at least one of said parts together, there being a non-magnetic gap between at least one end of said winding leg and the adjacent yoke, and a rivet through said gap, said rivet being expanded throughout its length against the adjacent leg and yoke laminations.

1,783,051. COMBINED IRONING BOARD AND TABLE. WILLIAM PALMER, Buffalo, N. Y., assignor of one-half to Ernest W. Astels, Buffalo, N. Y. Filed May 18, 1928. Serial No. 278,865. 5 Claims. (Cl. 68—10.)



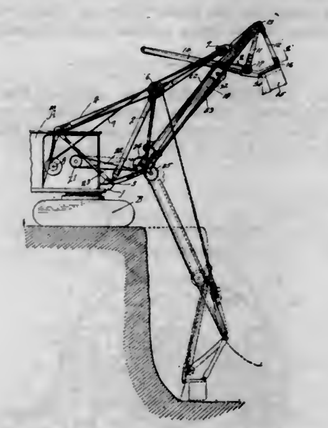
1. A device of the character described comprising a table having a top formed with an opening therein, a removable ironing board arranged within the opening, a slidable member mounted beneath the opening and movable in a plane substantially parallel to the top, and foldable supporting means pivotally secured to the slidable member, comprising two interspaced supports for engaging one end of the ironing board and holding it in position for use, one of the supports engaging the ironing board on its under side and the other support engaging the board on its upper side.

1,783,052. ELECTRIC DISCHARGE DEVICE. FRANK W. PEEK, Jr., Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Mar. 2, 1926. Serial No. 91,684. 3 Claims. (Cl. 175—30.)



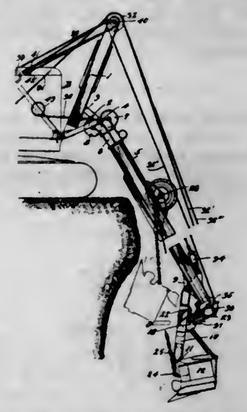
1. An electric discharge device having a series of gaps and an electrode on each side of each gap, the last electrode at one end of the series constituting one terminal electrode of the device and the last electrode at the opposite end of the series constituting another terminal electrode, the gaps adjacent to the terminal electrodes constituting terminal gaps, the remaining gaps and electrodes of the series being located between the terminal gaps, said remaining electrodes and gaps constituting intermediate electrodes and gaps, capacitance between each intermediate electrode and one of the terminals of the device, a corresponding balancing capacitance interposed between each intermediate electrode and the opposite terminal electrode of the device, and an impedance element interposed between one of the terminal electrodes of the device and said intermediate electrodes in series with the capacitance located between the same terminal electrode, and the intermediate electrodes whereby a differential spark-over characteristic is imparted to the device with respect to high frequency and low frequency currents.

1,783,053. CENTRIFUGAL GUN. BADEN FLETCHER SMYTH BADEN-POWELL, Riverhead, Sevenoaks, England. Filed Nov. 26, 1929, Serial No. 409,887, and in Great Britain Jan. 28, 1929. 19 Claims. (Cl. 89—10.)



1. Apparatus for discharging projectiles by centrifugal force comprising, a central chamber rotatably mounted, a barrel carried by and radiating from said chamber, means for feeding projectiles into said chamber, retaining means for preventing the discharge of the projectile until the centrifugal force of the projectile has reached a predetermined amount when the projectile will be released, and retaining control means acting to determine the position of the barrel at which the release takes place.

1,783,054. PISTON FOR INTERNAL-COMBUSTION ENGINES. JOHANNES RADLOFF, Berlin, Germany, assignor to General Electric Company, a Corporation of New York. Filed Nov. 20, 1928, Serial No. 320,675, and in Germany Dec. 13, 1927. 6 Claims. (Cl. 123—176.)

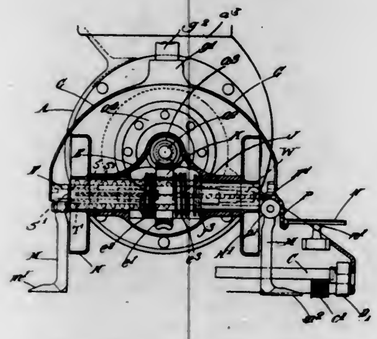


1. In a piston structure for double-acting internal combustion engines, the combination of a piston rod, a supporting body on the rod, piston heads adjacent the upper and lower ends of and positioned by said supporting body, said piston heads comprising end walls which are fixed to said supporting body and integral flanges which are free to expand and contract, and a piston shell carried by the supporting body and located between the integral flanges, said piston shell being connected to the supporting body at only one point whereby it is free to expand in an axial direction.

1,783,055. HOE-TYPE SHOVEL CRANE. LESLIE A. RUSSELL, Milwaukee, Wis., assignor to Koehring Company, Milwaukee, Wis., a Corporation. Filed June 19, 1926. Serial No. 117,099. 31 Claims. (Cl. 214—138.)

1. In a shovel crane as described, in combination, a crane body, a boom pivoted to said body, a dipper handle movable in opposite directions and mounted on said boom, an indigging dipper carried by the boom and connected with said handle, means for raising and lowering the boom and at the same time causing movements of the dipper handle, and means for positively moving the handle in either of opposite directions.

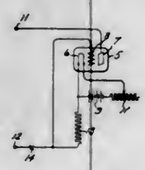
1,783,056. INSTROKE SHOVEL CRANE. LESLIE A. RUSSELL, Milwaukee, Wis., assignor to Koehring Company, Milwaukee, Wis., a Corporation. Filed June 19, 1928. Serial No. 264,601. 13 Claims. (Cl. 214—138.)



1. In combination, a hoe type shovel crane comprising a swing body, a main supporting boom thereon having an

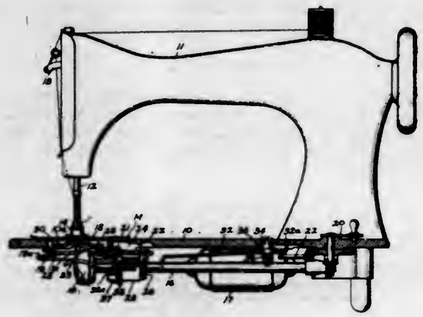
off-standing dipper boom arm, means for raising and lowering the said dipper boom arm of the main supporting boom, a dipper boom pivoted to the dipper boom arm, and an in-stroke dipper mounted upon the dipper boom, with means for controlling the crowding in and the out-haul movements of said dipper.

1,783,057. PRESERVATION OF LATEX. KURT SCHUSTER and HEINRICH HOPFF, Ludwigshafen-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Apr. 6, 1928, Serial No. 268,071, and in Germany Apr. 20, 1927. 13 Claims. (Cl. 18—50.)



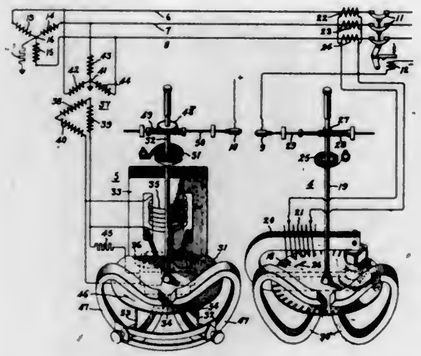
6. A process for the preservation of latex, which comprisea adding to the latex sodium dicresylphosphate.

1,783,058. VACUUM CLEANER. HERBERT BRAND SHARMAN and ALBERT EDWARD BURRAGE, Northampton, England. Filed Mar. 4, 1927, Serial No. 172,719, and in Great Britain Apr. 29, 1926. 2 Claims. (Cl. 15—17.)



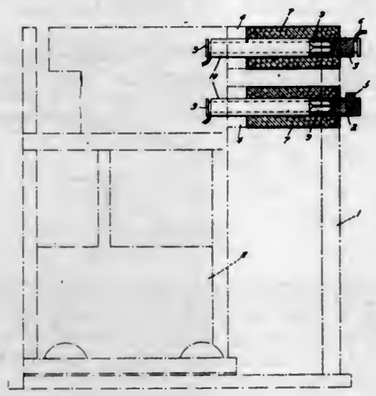
1. In a vacuum cleaner, a staud, a casing adapted to rest on said stand and having an outlet, an inlet communicating with the interior of said casing, a rotatable shaft, a suction fan secured on said shaft and adapted to be revolved thereby in said casing, an internally screw threaded tubular axle geared to said shaft, an externally screw threaded plunger within said axle, a pedal, a flexible connection between said pedal and said plunger adapted to draw said plunger longitudinally and thereby rotate said axle, means to prevent rotation of said plunger in said operative movement, and means to return said plunger inoperatively.

1,783,059. MEANS FOR RECTIFYING ALTERNATING CURRENT. EDWIN E. SPITZER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Oct. 12, 1928. Serial No. 312,167. 5 Claims. (Cl. 250—27.)



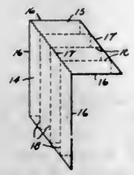
1. A linear rectifier means for alternating current comprising an electric discharge device having an electron emission limit above its working range and provided with a cathode, an anode and a control grid, a resistor connecting said grid and the cathode, the resistance value of said resistor being such that the volt-ampere rectifier characteristic of said device is rendered substantially rectilinear, and alternating current supply terminals connected with the anode and the control grid.

1,783,060. SEWING-MACHINE FEEDING MECHANISM. HUGH M. STEPHENSON, Fort Wayne, Ind., assignor to General Electric Company, a Corporation of New York. Filed Aug. 30, 1927. Serial No. 216,485. 16 Claims. (Cl. 112—204.)



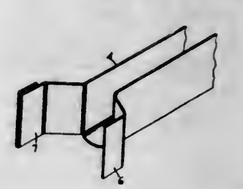
1. In a sewing machine having a cloth-plate, a universal feeding mechanism comprising a feed-dog arranged below the top of said cloth-plate, a vertically movable member, means for supporting said member so as to provide for rotatable adjustment of the same, means for supporting said feed-dog on said member and for actuating the same to feed material in response to vertical movement of said member in any position of rotatable adjustment so that the feeding mechanism can be adjusted to feed in all directions.

1,783,061. PROTECTIVE ARRANGEMENT. OLIVER C. TRAVER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Aug. 11, 1927. Serial No. 212,347. 8 Claims. (Cl. 175—294.)



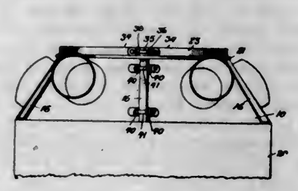
1. In combination, an electric circuit, and controlling means therefor comprising a relay having an electroresponsive movable member, means for actuating said member at a velocity dependent on the residual current of the circuit when said current is above a predetermined value, a cooperating electroresponsive movable member, and means for positioning said cooperating member in accordance with the resultant voltage to ground of the conductors of the circuit.

1,783,062. ELECTRIC SWITCH. HENRY TRENCHAM, Ruislip, England, assignor to General Electric Company, a Corporation of New York. Filed Dec. 10, 1923. Serial No. 679,720. 3 Claims. (Cl. 173—332.)



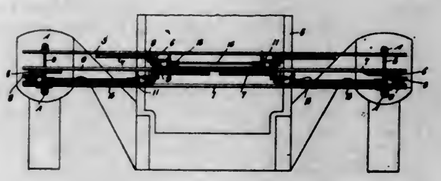
1. An electric switch particularly adapted for use in an explosive atmosphere comprising cooperating plug and socket contact members, and an elongated insulating sleeve secured at one end to one of said members, said end being thereby closed, said sleeve and the other of said members being adapted to make a relatively long, closely fitting, sliding contact with each other after the contact members are separated to cool below their ignition point gases expelled upon explosions occurring within said sleeve at the separation of the contacts.

1,783,063. MAGNETIC CORE. JACOB J. VIENNEAU, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Dec. 23, 1929. Serial No. 415,901. 2 Claims. (Cl. 29—155.5.)



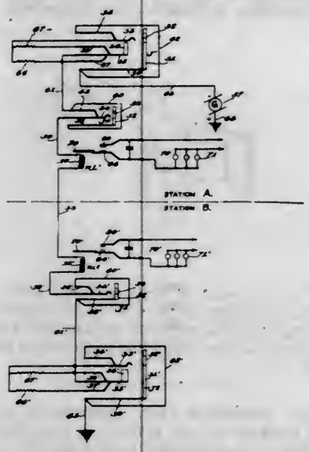
1. The method of producing L-shaped magnetic core lamination members, said method including the steps of severing two sections from magnetic strip sheet material along lines making acute complementary angles with the side edges of said strip material, welding said sections together end to end with their side edges respectively at right angles, thus forming a welded unit, and severing L-shaped members from said unit along lines parallel to the side edges of the sections of the unit and meeting at the weld.

1,783,064. DYNAMO-ELECTRIC MACHINE. PAUL WACHSMANN, Berlin-Halensee, Germany, assignor to General Electric Company, a Corporation of New York. Filed May 14, 1928, Serial No. 277,770, and in Germany July 21, 1927. 4 Claims. (Cl. 171—206.)



3. A bar for squirrel cage windings having a tubular body and being split at the ends thereof, each end of said bar having one straight split portion and another folded split portion for directly joining the bar to another.

1,783,065. FURNACE TOP. HERBERT A. ACER, Medina, N. Y., assignor to Acer & Whedon, Inc., Medina, N. Y., a Corporation of New York. Filed May 27, 1930. Serial No. 456,105. 6 Claims. (Cl. 126—114.)

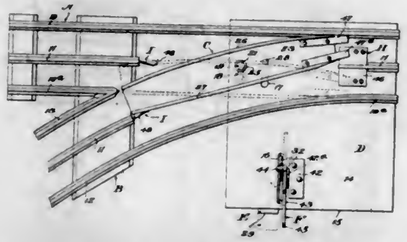


1. In a furnace top, a horizontally disposed circular rail member having a central opening and a groove extending radially from the central opening, the rail member having a sand rail extending above the groove, and a top member having a circular periphery disposed to close the central opening and having its periphery normally disposed in the groove.

1,783,066. AUTOMOBILE TRAP BUMPER. JAROSLAV AMLER, Stamford, Conn. Filed May 2, 1930. Serial No. 449,256. 3 Claims. (Cl. 293—15.)

3. In a device for the purpose set forth, pivotally supported spring influenced arched gripping members, latching means for holding the members in non-gripping position, swingable bumper bars connected with the latching members and designed when contacted to release such latching means to permit of the gripping members swinging to gripping position.

1,783,067. ELECTRIC POWER CIRCUIT CONTROL SYSTEM. FRED M. ANDERSON, New Orleans, La. Filed Jan. 12, 1929. Serial No. 332,006. 6 Claims. (Cl. 178—2.)



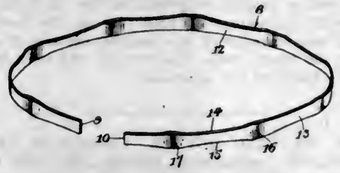
1. In electric power circuit control systems of the class described, a normally open local power circuit at each of two stations, an automatic switching device for controlling each of the said local circuits, a normally closed control circuit at each of the said stations, one inter-connected with the other and with the said automatic switching devices, switching means in each of the said control circuits, and means for actuating said last named switching means whereby either of the same may be operated to first momentarily open both of the said control circuits to cause the said automatic switching devices to close the said local circuits, then to reclose the said control circuits without affecting the said automatic switching devices, said switching means being thereafter operable to momentarily effect an increase in the value of the current in the said control circuits to again cause the said automatic switching devices to operate and open both of the said local circuits, and thereafter to reduce the current to its normal value without affecting the said automatic switching devices.

1,783,068. FOLDING CONTAINER. ISAAC APPELBAUM, Brooklyn, N. Y. Filed Mar. 3, 1930. Serial No. 432,692. 2 Claims. (Cl. 206—7.)

1. A folding box formed of a single blank, comprising juxtaposed body portions and an intermediate base, side and end end walls for said body portions, said end walls being folded upon themselves to form reinforcing strips terminating at substantially the mid-height of said end walls, means for fastening said reinforcing strips to said end walls, foldable end extensions for said side walls adapted to form corners for the box, and further to reinforce said end walls, means for securing said extensions to the juxtaposed end portions of said end walls and said reinforcing strips, and a hanger member integral with the edge of one of said reinforcing strips and adapted to extend over and substantially parallel to the adjacent body portion, the end extensions of said side flaps being adapted to be retained between the ends of said reinforcing strips and said end walls when the box is in erected condition.

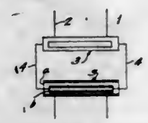
1,783,069. TRACK SWITCH FOR TOY ELECTRIC RAILROADS. HARRY S. BECKER, River Forest, Ill., assignor to American Flyer Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Feb. 23, 1929. Serial No. 342,152. 15 Claims. (Cl. 246—419.)

1. A track switch for toy electric railways comprising fixed wheel bearing rails for main and branch lines, a pivotally movable switch frog for controlling the movement of a train through the main line or onto the branch lines, a base for supporting the frog, and tensioning means for holding the frog against the base.



1,783,070. SCREW DRIVER. FREDERICK R. BERGEMANN, Pueblo, Colo. Filed Mar. 22, 1930. Serial No. 438,093. 3 Claims. (Cl. 145—52.)

1. A screw driver comprising a handle, a shank carried by the handle, the free end of the shank having a blade for engagement with a groove in the head of a screw, the shank being provided with a notch forming a seat to receive a portion of the head of a screw, a resilient blade connected to the shank and having a free end terminating adjacent the notch for engaging a groove of the screw and for retaining the head in the notch.



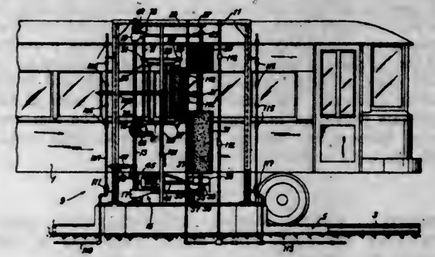
1,783,071. SPREADER. EDWARD J. BUDLONG, Hanford, Calif., assignor to Budlong & Funchess Motor Products Co., Hanford, Calif. Filed May 29, 1928. Serial No. 281,435. 2 Claims. (Cl. 74—109.)

1. A spreader comprising a split band, said band provided with a plurality of circumferentially spaced portions resistant to curvature and further provided with portion intermediate said resistant portions adapted to flexibility and said band further having each of the

edges of each of the portions between said resistant portions formed with clearances for the passage of a lubricant.

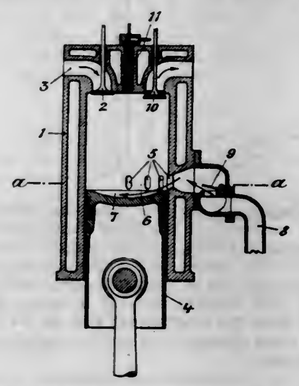
1,783,072. ANTENNA SYSTEM. HENRI CHIREIX, Paris, France. Filed Sept. 8, 1925, Serial No. 55,087, and in France Sept. 9, 1924. 9 Claims. (Cl. 250—33.)

2. An antenna arrangement comprising an upright antenna conductor with substantially uniformly spaced condensers in series with it distributed along its length.



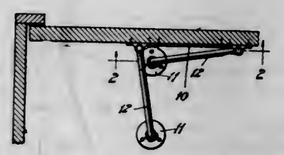
1,783,073. BALANCING OF CRANK SHAFTS. CLAUDE CLENCH, Dumfries, Scotland. Filed Feb. 26, 1929, Serial No. 342,750, and in Great Britain Mar. 31, 1928. 2 Claims. (Cl. 74—38.)

2. A crank shaft comprising a series of flanged sections bolted together and balancing rings mounted on the joints between said sections and forming the journal bearings for the shaft.



1,783,074. CAR-WASHING MACHINE. HENRY CORDELL, Wilmette, and JOHN ROBERT BLACKHALL, Highland Park, Ill.; said Cordell assignor to said Blackhall. Filed Nov. 21, 1929. Serial No. 408,834. 8 Claims. (Cl. 15—53.)

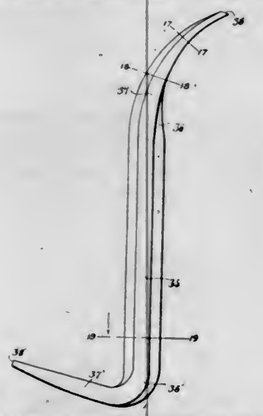
1. A car washer comprising a stationary frame, a movable primary frame pivoted thereon, said primary frame carrying rotatable brushes, motivating means located on said primary frame and movable therewith for driving said brushes, a secondary frame on said primary frame and



movable with respect thereto, a rotatable brush on said secondary frame and driving means connecting the first-named brushes with the last-named brush.

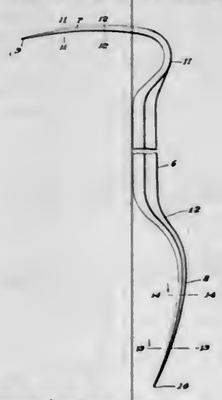
1,783,075. INTERNAL-COMBUSTION ENGINE. KUNO EISENBURGER, Bistrita, Rumania, assignor to the Firm of Sulzer Frères Société Anonyme, Winterthur, Switzerland. Filed Dec. 16, 1929, Serial No. 414,551, and in Switzerland Dec. 13, 1928. 1 Claim. (Cl. 123—76.)

In a four-stroke fuel-injection combustion engine, a cylinder and an air-inlet valve in the head thereof for the main scavenging air, a piston having a concave head, said cylinder wall having downwardly and tangentially opening ports therein for the admission of auxiliary scavenging air, said ports being connected to a manifold surrounding at least a part of said cylinder wall, a header connected to the outer end of said manifold by one side and a source of compressed air by the other side, and a non-return valve in said header for preventing products of combustion from entering the source of compressed air.



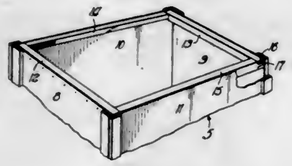
1,783,076. HINGE. WILLIAM LEWIS EVANS, Washington, Ind. Filed Oct. 19, 1928. Serial No. 313,529. 2 Claims. (Cl. 16—163.)

1. In a multiple pivot hinge of the character described, plate members providing means to secure the hinge to a



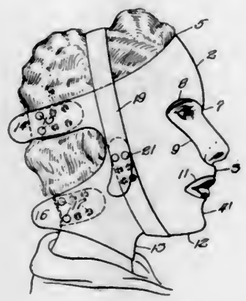
door; vertical bearing sockets drilled through said plate members and of uniform diameter throughout their lengths; Z-shaped bars having vertical, parallel arms; reduced terminals formed on said arms extending through the bearing sockets and presenting shoulders at their inner ends; closely fitting washers on the reduced terminals between the shoulders and the bearing sockets providing end thrust bearing elements; closely fitting washers on the outer ends of said terminals also providing end thrust bearing elements; and heads formed on the ends of said terminals providing integral shoulders for the last mentioned washers and holding the washers in close contact with the ends of the bearing sockets.

1,783,077. SHEET-METAL-BUMPING-OUT TOOL. WILLIAM FERGUSON, Flint, Mich. Filed May 4, 1928. Serial No. 275,217. 10 Claims. (Cl. 81—15.)



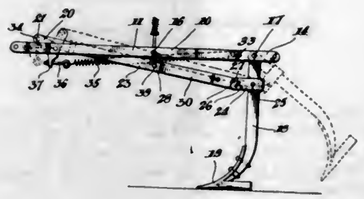
1. A bumping-out tool for removing indentations in the metal structure of a vehicle comprising a bar-like handle having a curved coupling portion extending from each end of the handle, and a tapered elongated anvil provided at each end of the handle and connected to the handle by said coupling portions to extend in opposite directions from the longitudinal axis of the handle and one anvil being disposed at a greater angle to the handle than the other.

1,783,078. BUMPING-OUT TOOL. WILLIAM FERGUSON, Flint, Mich. Continuation of application Serial No. 275,215, filed May 4, 1928. This application filed Aug. 30, 1929. Serial No. 389,565. 22 Claims. (Cl. 81—15.)



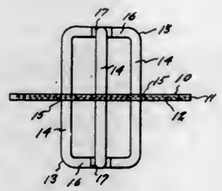
1. A bumping-out tool for removing indentations in the metal body of a vehicle, comprising a blade-like anvil adapted for insertion between the metal body of the vehicle and its inner frame construction and having a bumping surface to rest against the inner surface of the metal body while the body and frame remain in assembled relation, and a handle connected to the blade-like anvil and disposed opposite the inner face of the anvil that the latter may be inserted into position between the metal body and the inner frame construction and held in place during the bumping out operation.

1,783,079. PACKING DEVICE. CHARLES W. GERLACH, Wheaton, Ill., assignor to Chicago Mill and Lumber Corporation, Chicago, Ill., a Corporation of Delaware. Filed Feb. 20, 1930. Serial No. 429,846. 7 Claims. (Cl. 217—53.)



7. A packing case having an internal spacing and reinforcing frame in close contact with the four side walls of the case, at least two members of the frame being secured to opposite side walls of the case, and at least one member being freely removable outwardly from the other members when its corresponding side wall is released, but secured against movement in either direction parallel to the plane of said wall by means on the frame members.

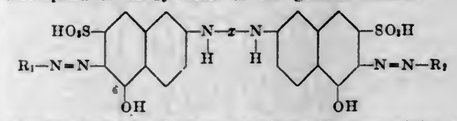
1,783,080. FACE MASK. MARIE GIMENEZ, Chicago, Ill. Filed Jan. 21, 1929. Serial No. 333,784. 2 Claims. (Cl. 128—164.)



1. A facial mask constructed of a single piece of imperforate elastic sheet material having a single opening for the eyes and nose and a separate opening for the mouth, the opening for the eyes and nose being of approximately triangular shape with the side edges of the triangle each cut on a convex curve, so that the side portions of the mask contiguous to said side edges will contact with the cheeks of the wearer as close to the nose as may be possible, the top edge of said triangular opening being provided with a depending middle portion which is positioned to engage the face intermediate between the eyebrows and approximately at the junction of the nose and forehead, said mask having a chin portion extending rearwardly beneath the chin, and means for securing the mask in place.

1,783,081. DRAGBAR FOR CULTIVATORS. JOHN GODDARD and RAYMOND ARTHUR CALVERT, Smiths Falls, Ontario, Canada, assignors to the Firm Frost & Wood, Smiths Falls, Canada. Filed June 1, 1928. Serial No. 282,200. 3 Claims. (Cl. 97—184.)

1. A seeder or cultivator tooth mechanism comprising a main draw bar, a tooth standard pivotally connected to one end of said draw bar, a channel-shaped member formed with spaced and orificed lugs at one extremity and terminating in a solid orifice lug at the other extremity, the said channel-shaped member being pivotally mounted in the opposite end of the main draw bar, a longitudinally extending coil spring adjustably connected to the solid orificed lug at one extremity of the channel-shaped member and anchored to the main draw bar at the end whereon the shank is mounted, a bent plate member embracing the shank, an auxiliary draw bar pivotally and adjustably connected to said plate and pivotally connected to the spaced and orificed lugs on the channel-shaped member.

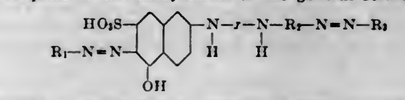


1,783,082. DRAIN PROTECTOR. GEORGE B. GROSJEAN, Shreveport, La. Filed April 17, 1930. Serial No. 445,147. 1 Claim. (Cl. 210—170.)

In a drain protector, a screen comprising an outer flange member and a wire screening attached to said flange member, and a plurality of legs secured to said screen and spaced from the center of said screen and from each other, each of said legs comprising a vertical portion and horizontal upper and lower end portions, the vertical portions being disposed through said screen and permanently secured thereto intermediate the ends thereof, whereby said legs extend above and below the plane of said screen, and means rigidly securing the horizontal upper and lower ends of said legs together.

1,783,083. DYESTUFFS CONTAINING METALS AND PROCESS OF MAKING SAME. HANS GUBLER and GUILLAUME DE MONTMOLLIN, Basel, and JOSEPH SPIELER, Laufen, Switzerland, assignors to the Firm Society of Chemical Industry in Basle, Basel, Switzerland. Filed July 9, 1929, Serial No. 377,068, and in Switzerland July 14, 1928. 10 Claims. (Cl. 260—12.)

1. As new articles of manufacture the azodyestuffs containing complex bound metals, which, on the one hand, correspond to azodyestuffs of the general formula



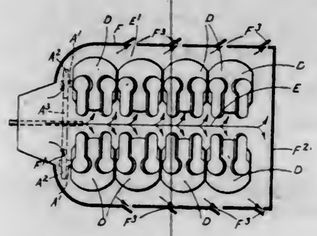
wherein $\mathfrak{a}$ stands for an organic residue containing at least one carbon atom, the

groups being linked to such carbon atoms of said residue which are united by a double bond with a nitrogen, oxygen or sulfur atom, and wherein R_1 means the residue of a benzene nucleus characterized by the presence of a COOR-group (R=H or alkyl) standing in ortho-position to the —N=N— group, and R_2 is the residue of a benzene nucleus characterized by the presence of a COOR- or OR-group (R=H or alkyl) standing in ortho-position to the —N=N— group, and, on the other hand, contain complex bound metals of the atomic weight ranging between 52.1 and 63.6, which products are dark powders which dye vegetable fibers and artificial fibers of the regenerated cellulose orange, red, bordeaux and brown tints of excellent fastness to light.

1,783,084. DYESTUFFS CONTAINING METALS AND PROCESS OF MAKING SAME. HANS GUBLER, Basel, Switzerland, assignor to the Firm Society of Chemical Industry in Basle, Basel, Switzerland. Filed July 9, 1929, Serial No. 377,069, and in Switzerland July 14, 1928. 10 Claims. (Cl. 260—12.)

1. As new articles of manufacture the azodyestuffs containing complex bound metals which, on the one hand, correspond to the azodyestuffs of the general formula

wherein $\mathfrak{a}$ stands for an organic residue containing at least one carbon atom, the



groups being linked to such carbon atoms of said residue which are united by a double bond with a nitrogen, oxygen or sulfur atom, and wherein R_1 means the residue of a benzene nucleus characterized by the presence of a COOR-group (R=H or alkyl) standing in ortho-position to the —N=N— group, R_2 is an aryl nucleus, and R_3 an aryl nucleus which carries a carboxyl group and a OH-group standing in ortho-position to each other, and which, on the other hand, contain complex bound metals of the atomic weight ranging between 52.1 and 63.6, which products form dark powders dyeing the vegetable fiber yellow-brown to orange reddish-brown tints.

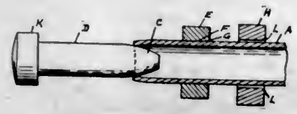
1,783,085. INTERNAL-COMBUSTION ENGINE. FRANK BERNARD HALFORD, London, England. Filed Apr. 23, 1928, Serial No. 272,125, and in Great Britain Nov. 23, 1927. 6 Claims. (Cl. 123—171.)

1. An internal combustion engine including in combination a crank case, two parallel crankshafts mounted in the crank case, a driven shaft, an operative driving connection between the crankshafts and the driven shaft,

two adjacent rows of air-cooled cylinders associated respectively with the two crankshafts and disposed with the axes of the cylinders in one row parallel to those of the cylinders in the other row, and means including an

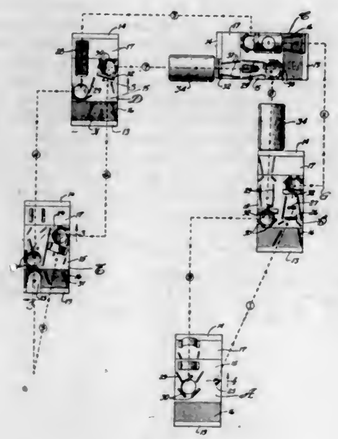
obstruction at one end of the air space between the adjacent rows of cylinders whereby air flowing through this space is caused to flow laterally between and over all the cylinders in each row.

1,783,086. METHOD OF TREATING ETHYL ALCOHOL. CARL HANER, Moylan, Pa., assignor to Publicker, Inc., Philadelphia, Pa., a Corporation of Delaware. Filed Oct. 3, 1928. Serial No. 310,196. 2 Claims. (Cl. 202—68.)



1. The method of treating alcohol-water mixtures which comprises dissolving alkali hydroxide in the alcohol-water mixture, applying heat to the mixture, condensing and removing from the system a distillate whose composition is higher in alcohol than the constant boiling mixture, thereafter condensing and removing from the system a second portion containing less alcohol, and then stopping the distillation with sufficient alcohol and water remaining with the alkali hydroxide to keep it in a liquid condition at the temperature of distillation.

1,783,087. AUTOMATIC SEMITRAILER. HARRY W. HELMS, Edgerton, Wis., assignor to Highway Trailer Company, Edgerton, Wis., a Corporation of Wisconsin. Filed July 26, 1928. Serial No. 295,567. 30 Claims. (Cl. 280—33.1.)



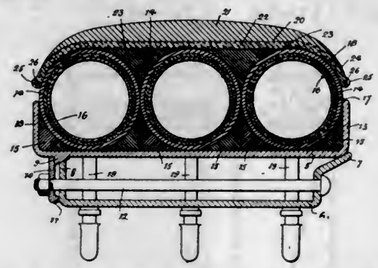
1. In combination with a tractor and a semi-trailer having a main frame, a fifth wheel, providing a turntable connection between said tractor and trailer, said fifth wheel including a lower member carried on the tractor and an upper member slidably mounted on the trailer main frame and forwardly extensible relative to said frame during uncoupling of the tractor from the trailer, means causing tilting of said upper member as it is forwardly extended, and supporting means rigidly connected to said upper member and movable therewith into trailer-supporting position when said upper member is moved to its extended and tilted position, said upper member when in such extended position being adapted for rearward movement relative to the main frame, upon coupling of the tractor and trailer, said combined tilting and rearward movement of the upper member simultaneously rendering said supporting means inoperative.

1,783,088. METHOD OF AND APPARATUS FOR RESHAPING DEFORMED PIPE ENDS. CHARLES A. HILL, Port Huron, Mich., assignor to Mueller Brass Co., Port Huron, Mich., a Corporation of Michigan. Filed July 27, 1929. Serial No. 381,445. 8 Claims. (Cl. 153—79.)

1. Apparatus for reshaping tube ends which comprises means for compressing said tube ends to the desired interior and exterior diameter, and means for removing said compressing means from said tube end comprising a longitudinally movable ring.

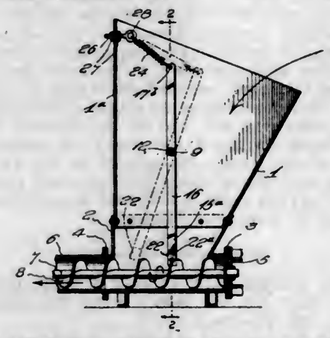
1,783,089. HOME GOLF GAME. BARNEY ETS HOKIN, Chicago, Ill. Filed Sept. 11, 1930. Serial No. 481,290. 5 Claims. (Cl. 273—32.)

1. In units for a miniature golf game, each unit adapted to lie on a relatively smooth surface and having a raised platform portion with a cup simulating opening adjacent one end thereof whereby to provide a substantial ball rolling surface as an approach to the cup simulating opening, a chute communicating with said opening to direct a ball from said unit into playing position with respect to another unit, inclined surfaces leading up to the platform adjacent the opposite ends thereof, and a plurality of spaced and angularly positioned hazards on said ball rolling surface, some of which hazards are arranged about the opening so as to form a path for a ball when the ball is played up on the platform portion from one end of the unit and to form a guard for said opening when the ball is played up on the platform from the opposite end of the unit.



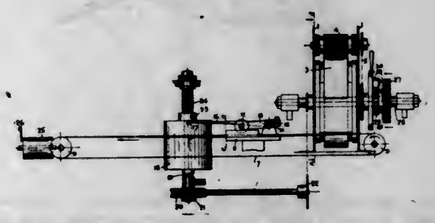
1,783,090. FOUNTAIN PEN. JOHN A. KIEDROWSKI, Chicago, Ill. Filed Mar. 21, 1930. Serial No. 437,911. 5 Claims. (Cl. 120—42.)

1. In a fountain pen, a barrel, a pen point at one end of the barrel, a plurality of collapsible ink reservoirs within the said barrel, selective means to direct ink from any one of the reservoirs to the pen point, means operatively connected with each reservoir to collapse the



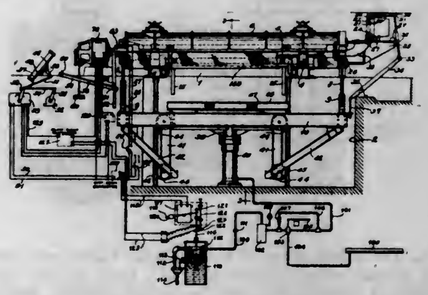
reservoirs to fill the same, and means common to all of the reservoirs, collapsing means to selectively collapse any one of the reservoirs.

1,783,091. RESILIENT TIRE. MATHIAS LEUPOLD, Jamaica, N. Y. Filed May 25, 1929. Serial No. 365,906. 6 Claims. (Cl. 152—22.)



1. In a resilient tire, a rim having outwardly extending sides, a plurality of separate tubes, each tube having integral cushions at its sides, the cushions on each tube being free from the cushions on adjacent tubes and which are disposed in the space between the sides of the rim, a tread disposed around the tubes, the tread having beyond the outer tubes inwardly extending sides spaced at all times from the rim and V-shaped cushions integral with the tread and disposed inwardly to engage the outer adjacent sides of the tubes.

1,783,092. AGITATOR FOR COAL HOPPERS. BASIL C. LEWIS, Frederick, Md., assignor to The Frederick Iron & Steel Company, Frederick, Md., a Corporation of Maryland. Filed Apr. 8, 1930. Serial No. 442,668. 6 Claims. (Cl. 259—39.)

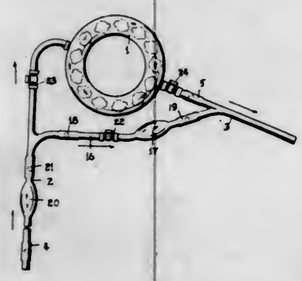


1. An agitator for coal hoppers of the screw conveyor type comprising a rigid frame structure including a plurality of frame members shaped to substantially conform with the interior contour of the coal hopper, means for pivotally mounting said frame members for rockable movement within the coal hopper, the frame members terminating in a depending end adapted to engage with the convolutions of the screw conveyor, and a plurality of spring means for adjustably tensioning said frame structure for movement within the coal hopper under control of the screw conveyor.

1,783,093. CIGARETTE-MAKING MACHINE. WALTER EVERETT MOLINS, Deptford, London, England. Filed Feb. 25, 1928, Serial No. 257,004, and in Great Britain Mar. 26, 1927. 10 Claims. (Cl. 284—1.)

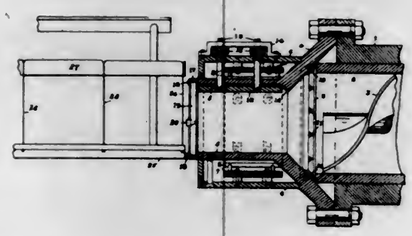
1. In apparatus for checking the consistency of cigarettes, the combination with means adapted to receive cigarettes and to compress a portion of the cylindrical surface thereof to a predetermined radius, mechanism for carrying a series of cigarettes in line through said means, and a device adapted to bear upon the uncompressed portion of the cigarettes for indicating variations in the uniformity thereof.

1,783,094. CENTRIFUGAL CASTING MACHINE. WILLIAM D. MOORE and WALTER MORGAN, Birmingham, Ala., assignors to Sand Spun Patents Corporation, New York, N. Y., a Corporation of Delaware. Filed June 4, 1928. Serial No. 282,718. 21 Claims. (Cl. 22—65.)



1. In a centrifugal casting machine, means to support a flask for rotation about a substantially horizontal axis, means to rotate the flask, means for removing a charged flask laterally from the machine toward one side, and means for inserting a flask to be charged into the machine from the other side.

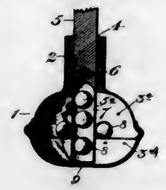
1,783,095. DEVICE FOR PUMPING FLUIDS. JOHN ROBB MUIRHEAD, Kirkcaldy, and JOHN WILLIAM MILLS, Adelaide, South Australia, Australia. Filed Nov. 20, 1928, Serial No. 320,616, and in Australia Nov. 26, 1927. 1 Claim. (Cl. 103—148.)



A device of the character described comprising a resilient tube having confined therein a plurality of large resilient perforated bulbs, an inlet tube connected to said first mentioned tube and provided with a supplementary

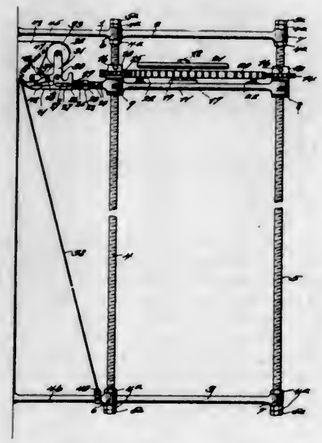
bulb, a valve disposed upon opposite sides of said supplementary bulb, a cock in said inlet tube disposed between one of said valves and said first named tube, an outlet tube connected to said first named tube having a valve, a cock between said valve and said first named tube, and a by-pass tube connected to said inlet tube between said cock and valve of the supplementary bulb, said by-pass tube being connected to said outlet tube in advance of the valve thereof; a cock in said by-pass tube, a valve in

said tube between said cock and said inlet, a bulb disposed in said by-pass and positioned between said cock and said outlet, and a valve between said bulb and outlet, whereby the closing of the cock in the by-pass and opening the cocks in the inlet and outlet tubes enables the device to be used as a pump by alternate compression and expansion of said first named tube, and whereby the closing of the cocks in the inlet and outlet pipes and opening of the cock in the by-pass, enables it to be used as a siphon once the fluid has been set in motion.



1,783,096. BUTTER-CUTTING MACHINE. WILLIAM J. PEARCE, McKeesport, Pa. Filed Oct. 31, 1928. Serial No. 316,278. 2 Claims. (Cl. 31—14.)

2. The combination with a conveyer barrel and means for forcing butter therethrough, of a head on said barrel having a rectangular frusto-pyramidal portion adjacent the head and a rectangular prismatic throat leading therefrom, said throat having one of its side walls offset outwardly of a side edge of the minor base of the frusto-pyramidal portion to provide a recess, a false wall located normally in said recess, and a divider member having a frame provided with inclined walls and fitting the said frusto-pyramidal head portion at the end of the barrel whereby butter issuing from the barrel is first divided longitudinally and is then pressed to force the divided portions together before passing into said throat.

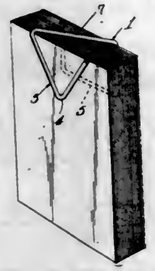


1,783,097. SANITARY DOORKNOB. BASILIO POLCARI, Somerville, Mass. Filed Nov. 11, 1929. Serial No. 406,466. 2 Claims. (Cl. 292—347.)

1. A hollow door knob having openings leading from the outer surface of the knob to the interior thereof; a knob bolt extending into the knob through the neck thereof and projecting from the neck inwardly into the main body of the knob, said inwardly projecting porton of the bolt having a longitudinal recess extending inwardly from the end thereof; and a disinfectant in lump form carried in said recess, the opening in the end of the bolt leading

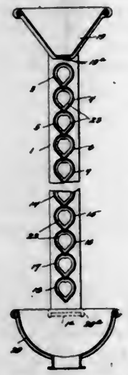
into said recess being partially closed to prevent the escape of the disinfectant in bulk from said opening in the bolt, but left sufficiently open to permit the access of air thereto, whereby to volatilize the disinfectant and to cause its gradual escape from the knob through the openings therein.

1,783,098. PLASTERING MACHINE. FRIGYES POTYIK, Philadelphia, Pa. Filed Mar. 7, 1929. Serial No. 345,102. 6 Claims. (Cl. 72—130.)



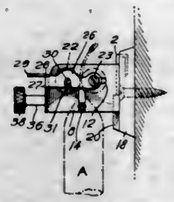
1. In a plastering machine, the combination with a frame having screw guide rods and provided with wall props, the latter adapted to bear against the wall or other surface which receives the plaster, of a carriage operable on the screw rods and having manually operated gear connections with the rods whereby the carriage may be fed manually in a vertical direction on the rods, said carriage having an extension yieldably mounted thereon, and a plastering apron connected to the lower part of the frame and having pay out connections with the extension of the carriage for applying the plaster to the wall, means operably associated with and on the extension carriage for saturating the apron, and means for regulating the position of the apron with relation to the wall to be plastered, and a mortar trough associated with the plastering roller and the apron to retain the mortar between the apron and the wall to be plastered.

1,783,099. PAPER CLIP. HENRY J. RIES, Iowa City, Iowa. Filed Oct. 28, 1929. Serial No. 402,978. 1 Claim. (Cl. 24—261.)



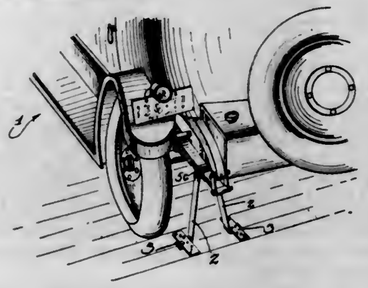
A paper clip composed of a piece of wire bent to form a U-shaped and a V-shaped clamping member arranged in

overlapping relation with a rod connecting the upper corner of one member with the upper corner of the other member, the free ends of said wire being oppositely positioned at the corners of the clip, and the apex of the V-shaped



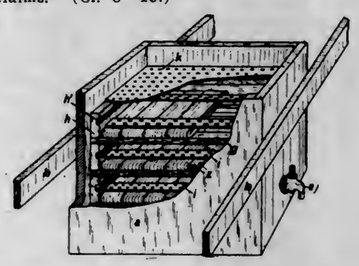
member lying against one face of the lower cross bar of the other member and shiftable to position said apex against the other face of said lower cross bar to adapt the members of the clip to effectively clamp the paper when in either position.

1,783,100. MILK COOLER. LOUIS ROSENFELD, Baltimore, Md., assignor to Cherry-Burrell Corporation, Chicago, Ill., a Corporation of Delaware. Filed Feb. 15, 1929. Serial No. 340,209. 1 Claim. (Cl. 257—183.)



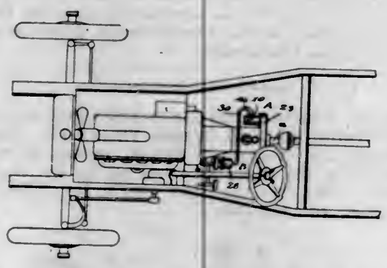
A milk cooler comprising opposed upright hollow headers, each having a vertical series of tubular bosses heart-shaped in cross section and tubes, heart-shaped in cross section, extending between the headers and having their ends fitting around the bosses, the apex of each tube fitting into the recess in the tube next below it, the headers having partitions therein for causing the cooling fluid to flow through the tubes in succession.

1,783,101. TOILET-PASTE-TUBE COMPRESSOR. ADOLPH O. SCHAEFER, Brooklyn, N. Y., assignor to Atlantic Service Company, Inc., Brooklyn, N. Y., a Corporation of New York. Filed June 19, 1929. Serial No. 372,106. 4 Claims. (Cl. 221—60.)



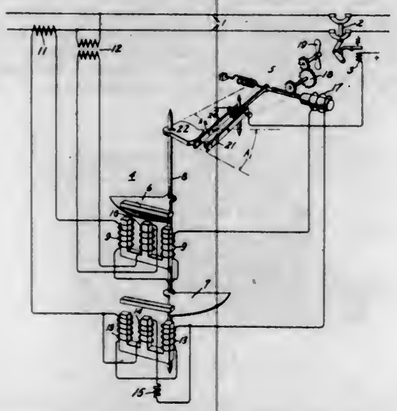
1. A paste tube compressor comprising a frame, said frame having at said sides hole openings and slot openings in alignment therewith, a roller having its axes journaled in the hole openings, a roller journaled and slidable in the slot openings, said rollers having gear wheels, a handle member pivotally connected with the axis of one of the rollers and having recesses adapted to receive the axis of the other roller, and means carried by the frame for turning one of the gear wheels.

1,783,102. REENFORCED HOLD-DOWN FOR LOADING AUTOMOBILES AND OTHER VEHICLES. MAX D. TUCKER and CLIFFORD L. SNYDER, Detroit, Mich., assignors to The Evans Auto Loading Co. Inc., Detroit, Mich. Filed Nov. 23, 1928. Serial No. 321,421. 7 Claims. (Cl. 188—32.)



1. The combination with an automobile holddown comprising a strap, of a reenforcing element interlockingly engaged with the strap.

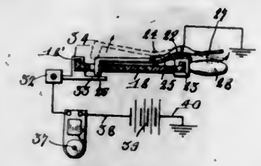
1,783,103. APPARATUS FOR WASHING, BLEACHING, AND DYEING ARTIFICIAL SILK IN HANKS OR SPINNING CAKES. JOSEPH VON DEN DRIESCH, Dresden, Germany, assignor to the Firm Fr. Küttner Aktiengesellschaft, Pirna-on-the-Elbe, Germany. Filed May 8, 1928, Serial No. 276,133, and in Germany Apr. 16, 1927. 4 Claims. (Cl. 8—19.)



1. In an apparatus for liquid treatment of fibrous material in the form of spinning cakes, comprising a framework, a series of spraying devices with nozzles mounted above the framework in spaced relation to each other, the alternate nozzles being adapted for delivering sprays of chemically active liquids and the intermediate nozzles for delivering rinsing liquid; a series of troughs of substantially rectangular cross-section fitting in said framework to register with the nozzles and provided with means for removably supporting them therein, a hurdle in each trough consisting of alternating grid bottoms and frames stacked on top of each other, perforated strips of flexible material adapted to be sprung into position in horizontal grooves provided therefor in opposite side walls of said frames, said hurdles being so dimensioned that the spinning cakes may be packed tightly on the bottoms between said side walls and held down by said strips, thereby providing space between each layer of said cakes and the next bottom.

1,783,104. BRAKE MECHANISM. WINSTON C. BARKER, Detroit, Mich. Filed Mar. 1, 1929. Serial No. 343,797. 1 Claim. (Cl. 188—90.)

The combination with the propeller shaft of a motor vehicle and the usual foot brake pedal thereof, a brake cylinder, a rotor within said cylinder and operably connected to the said propeller shaft, a pressure cylinder, a conduit connecting said brake cylinder, a body of liquid confined within said cylinders and conduit, a piston within said pressure cylinder and operably connected to said foot pedal whereby to force the liquid under pressure into said brake cylinder to completely fill the same and thereby restrain the normal free rotation of said rotor and the said propeller shaft, and an air compression valve connecting said brake cylinder.



1,783,105. CIRCUIT PROTECTION. JOSEF BIERMANNS, Karlshorst, Germany, assignor to General Electric Company, a Corporation of New York. Filed Aug. 24, 1925, Serial No. 52,143, and in Germany Sept. 16, 1924. Renewed Apr. 18, 1930. 12 Claims. (Cl. 175—294.)

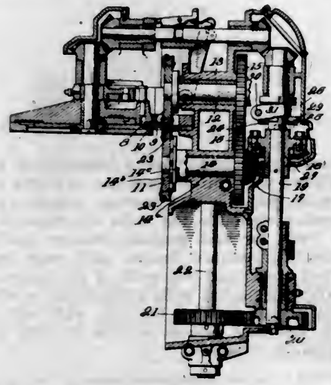
1. A protective device comprising a time limit relay, an ohm meter and movable members respectively arranged to be actuated thereby, characterized by the fact that one of said members is arranged for movement in the path of movement of the other and is so shaped that for predetermined ranges of movement different definite movements of the other are permitted.

1,783,106. SIGNAL SWITCH FOR DISPENSING APPARATUS. ATHANASE BIRON, Montreal, Quebec, Canada. Filed June 26, 1928. Serial No. 288,330. 1 Claim. (Cl. 200—153.)

An electric switch adapted to be used in combination with a liquid dispensing device, comprising an insulated panel having a plurality of apertures therein, a member movable along one edge of the panel and actuated by suitable means associated with the dispensing device, a second member also movable along the other edge of the panel and having a handle, a lever pivoted to said member and adapted to protrude through the panel apertures, and

spring means to urge the lever to an aperture engaging position, the first and second members being connected to an electric source in series with a signalling device.

1,783,107. HANDLE. FRANCIS BRANDON, New Albany, Ind. Filed Apr. 9, 1929. Serial No. 353,739. 1 Claim. (Cl. 294—57.)

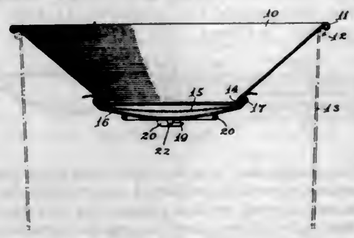


A handle including a one-piece shank having diverging integral arms joined by a rounded crotch and each having its opposed faces parallel, said arms being extended from the rounded crotch along straight lines to points adjacent their free ends, the free end portions of the arms being extended along parallel lines, a grip having squared ends interposed between the parallel portions of the arms, means embracing the arms for preventing them from splitting, a dowel extending through one of the arms and into the grip for holding the grip against rotation, said dowel being retained by one of the means embracing said arm, and a tie device extending through the grip and arm and the arm embracing means and constituting the sole means for holding them against relative movement.

1,783,108. HAIR WAVER. HILDA H. CADY, Saranac Lake, N. Y. Filed Jan. 25, 1930. Serial No. 423,486. 8 Claims. (Cl. 132—41.)

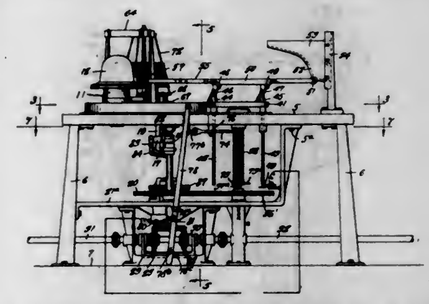
1. A device of the kind described comprising elastic clamping strips provided with interengaging spaced teeth and sockets, and flat surfaces between said teeth and sockets, whereby the individual strands of hair will be held firmly in place when the hair is combed backward and forward to form the wave.

1,783,109. MARKING DEVICE FOR CAN-CLOSING MACHINES. JOHN COYLE, Baltimore, Md., assignor to Continental Can Co. Inc., New York, N. Y., a Corporation of New York. Filed May 21, 1927. Serial No. 193,350. 4 Claims. (Cl. 113—1.)



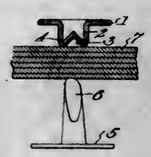
1. In a closing machine, the combination with a seaming head, a stack holder, means for feeding can ends from the stack holder to the seaming head; of mechanism intermediate the stack holder and the seaming head for marking the can ends including steel male die members, a platen of deformable material adapted to be permanently impressed by the male die member after said members are assembled in the closing machine, and means for moving said members relative to each other for marking a can end,

1,783,110. MANUFACTURE OF ACTIVATED CARBON. RUDOLF DEFRIS, Stockerau, and ROBERT WALDER, Vienna, Austria. Filed Feb. 27, 1928, Serial No. 257,540, and in Austria Mar. 3, 1927. 7 Claims. (Cl. 252—3.)



1. The process for the production of activated carbon which comprises forming filamentary passages in agglomerated finely divided carbonaceous material and thereafter treating the carbonaceous material to produce active carbon.

1,783,111. STRAINER. AMOS T. DWIGHT, Red Bank, N. J. Filed Jan. 4, 1930. Serial No. 418,567. 1 Claim. (Cl. 210—159.)



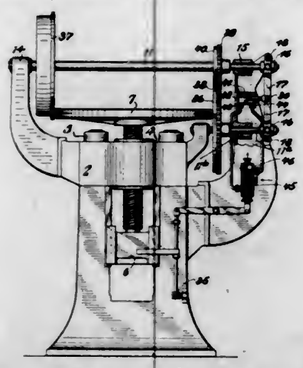
A milk strainer, including a substantially frusto-conical body, apertured ears depending from said body adjacent its inner end, an apertured strainer cloth securing member adapted to fit over said inner end of said body, said member being dish-shaped to provide a central portion below the plane of the inner end of said body, and a securing ring for said member including end fingers engageable within the apertures of said ears, said apertures being above the central portion of said member whereby said ring must be sprung to have its ends received in said apertures thus to provide spring tension on said member.

1,783,112. HAT-MAKING MACHINE. IRVING A. EICHENBAUM, New York, N. Y. Filed Aug. 7, 1929. Serial No. 384,046. 16 Claims. (Cl. 223—31.)

1. A hat working machine consisting of a hat form, means for rotating the hat form, a tool for applying hat making strip material against the hat form, a profile maintaining element, means engaging said element for causing the tool to follow a vertical path corresponding to the form of the element, and means for raising the tool and said last means as the material is wound upon the hat form.

1,783,113. MACHINE-ATTACHED RIVET AND BURR. PAUL E. FENTON, Thomaston, Conn., assignor to Scovill Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed Aug. 13, 1929. Serial No. 385,649. 2 Claims. (Cl. 85—37.)

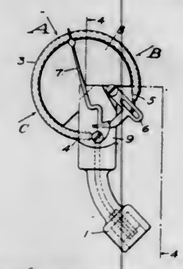
1. A burr provided with a flange and a barrel extending from said flange and having a closed and inwardly depressed end, and a rivet or tack having a pointed shank adapted to be driven through the closed end of the barrel and clinched therein, the clinching of the rivet or tack making a hole in the burr no larger than its shank and thereby preventing the drawing through and exposing of the threads or fibres of the material.



1,783,114. TREATMENT OF MATERIALS TO RETARD FADING. EDGAR W. GEISLER, Brooklyn, N. Y., assignor, by mesne assignments, to R. H. Comey Brooklyn Company, Inc., Brooklyn, N. Y., a Corporation of New York. Filed Nov. 16, 1926. Serial No. 148,770. 13 Claims. (Cl. 8—2.)

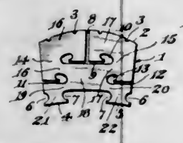
1. A method of retarding the fading of vegetable fibrous material which consists in treating the material with a solution of a thiosulphate.

1,783,115. FRICTIONAL SCREW-SPINDLE PRESS. OTTO GEORG, Herdecke, Germany. Filed July 12, 1927, Serial No. 205,268, and in Germany Feb. 28, 1927. 5 Claims. (Cl. 74—26.)



2. A friction screw press comprising a frame, a ram actuating screw spindle mounted on the frame, a horizontal friction disk carried by said spindle, a pair of vertically disposed friction disks at opposite sides of the horizontal friction disk for driving the same in opposite directions, parallel horizontally arranged rotating and sliding shafts in gear with each other and carrying the vertical friction disks and arranged respectively above

and below the horizontal plane of the horizontal friction disk, and manually controlled motor-operated means for simultaneously adjusting said horizontal shafts in one

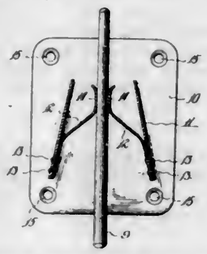


direction or the other and whereby the spindle may be governed to arrest the up and down travel of the horizontal friction disk in any working position in its range of up and down travel.

1,783,116. TIRE GAUGE. WALTER E. GOCHNAUER, La Crosse, Wis., assignor, by mesne assignments, to Moto Meter Gauge & Equipment Corporation, Long Island City, N. Y., a Corporation of Delaware. Filed Jan. 17, 1928. Serial No. 247,344. 1 Claim. (Cl. 73—109.)

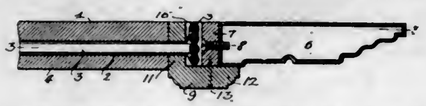
A pressure gauge combining a connector element; an expansible element having one end engaging said connector element, an oscillatable pointer, sliding connecting devices between said pointer and said expansible element and supporting means including a flat disk located within the plane of said expansible element engaging the inner surface of said expansible element for limiting the inward movement thereof under exterior shocks and forces.

1,783,117. BRIDGE FOR STRINGED MUSICAL INSTRUMENTS. FREDERICK GOSPARLIN, Chicago, Ill. Filed May 10, 1929. Serial No. 362,056. 12 Claims. (Cl. 84—309.)



1. A bridge for stringed musical instruments comprising a body formed with a longitudinal slot and a cutout perpendicular to said slot and providing a space opening at its inner end into the top of said slot centrally thereof and opening at its outer end at the top edge of said body.

1,783,118. FLOATING DECK. ALVAH M. GRIFFIN, Los Angeles, Calif., assignor, by mesne assignments, to Chicago Bridge & Iron Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 8, 1927. Serial No. 224,786. 9 Claims. (Cl. 220—26.)

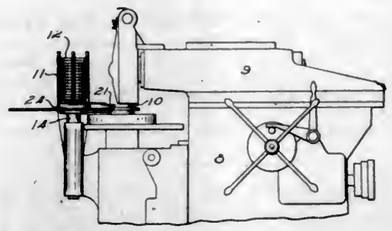


1. A floating deck comprising a plurality of pontoon members formed with bottom walls and upwardly expanding side walls, whereby said pontoon members may be nested together when the top walls are removed therefrom, top walls for said pontoon members having upwardly extending marginal flanges, split tubes enclosing said marginal flanges and side walls of the pontoon members for attaching the top walls and pontoon members together, and gaskets between the side walls and flanges of said top walls and gaskets between the side walls of adjacent pontoon members.

1,783,119. BROOM HOLDER. WILLIAM F. HACKING, Burley, Idaho. Filed Mar. 31, 1930. Serial No. 440,471. 4 Claims. (Cl. 24—257.)

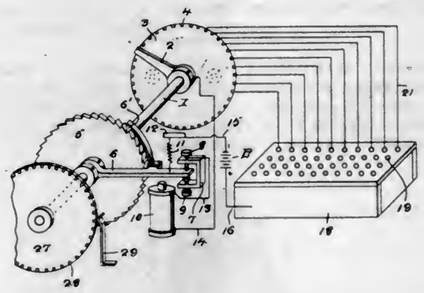
.. A broom holder comprising a wall plate for attaching the device to a wall or other support, a casing attached to said wall plate and open at its upper and lower ends, and opposing spring clamping members mounted within the casing to engage and grip the handle of the broom between them.

1,783,120. CONDUIT BASE AND TRIM. CLARENCE L. HARPER, Philadelphia, Pa. Filed Jan. 11, 1928. Serial No. 245,992. 4 Claims. (Cl. 247—3.)



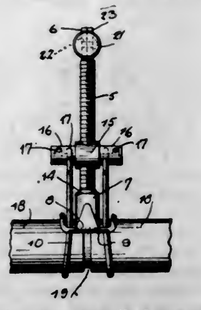
1. The combination in a base and trim for a room having a channel therein for wires, of a cover-strip for closing the channel; a strip secured against the back of the trim of a door or window; and an angular extension trim, one portion of the extension trim arranged to be spaced from the strip to form a channel for the wires, and the other portion arranged to overlap the strip and be operatively secured thereto.

1,783,121. PISTON-RING BURR-REMOVING DEVICE. JOSEPH H. HOERN, Saginaw, Mich., assignor to Wilcox-Rich Corporation, a Corporation of Michigan. Filed Nov. 23, 1929. Serial No. 409,393. 11 Claims. (Cl. 29—33.)



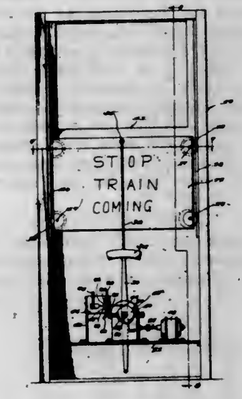
1. The combination of a surface grinding machine having a grinding wheel, a work holder, means providing a

relative feeding movement between the work holder and wheel, a tool for engaging the work when in grinding position, and means operable by said work holder for controlling movement of said tool, to lift the same during such feeding movement.



11. The combination of a surface grinding machine having a grinding wheel, a magazine for pieces of work, a conveyor for moving pieces of work from said magazine to said wheel, a tool for trimming pieces of work when in grinding position, a spring arm mounted on said magazine for supporting said tool and normally urging it into operative engagement with the work, and a cam carried on said conveyor for engaging and moving said tool to inoperative position during the feeding movement of said conveyor.

1,783,122. SELECTOR MECHANISM. ALBERT F. HORLACHER, Fredonia, N. Y. Filed May 7, 1927. Serial No. 189,650. 2 Claims. (Cl. 172—239.)

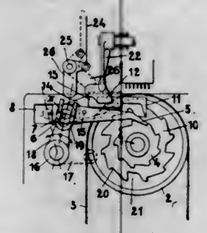


1. A selector device of the class described comprising a shaft, a commutator having its arm connected with the shaft, magnetic means for giving the shaft a step by step rotation, a circuit for the magnetic means including the commutator and key operated means arranged in the circuit for controlling the extent of movement of the parts, such key operated means comprising a plurality of keys arranged in rows, a spring associated with each key, said means being connected with that part of the circuit which is connected with the commutator, a plate arranged under the keys and connected with the other part of the circuit, a plurality of springs insulated from the plate but contacting the plate when depressed, a conducting strip associated with each row of keys and normally engaged by the springs of the keys, means for electrically connecting the conducting strips together, means for electrically connecting one of the strips with the springs carried by the plate, strips of non-conducting material carried by the springs on the plate and engaged by the springs of the keys when a key is depressed whereby the plate will be electrically connected with the springs of the keys which are not depressed, while the spring of the depressed key will be out of electrical contact with the conducting strips and the plate.

1,783,123. HOSE-CLAMP-APPLYING TOOL. JOEL KIVIAHO, Marshfield, Oreg. Filed Apr. 5, 1928. Serial No. 267,719. 2 Claims. (Cl. 81—9.3.)

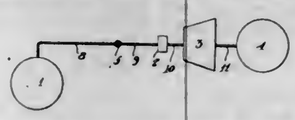
1. A device of the class described comprising a threaded rod having a turning handle at one end and a clamping band engaging shoe at the other end in which the threaded rod is rotatably mounted, and a nut engaging the threads of the rod and having laterally projecting studs provided with transverse openings spaced from the stud ends to receive the ends of the clamping band, said openings being disposed angularly to the longitudinal axis of said threaded rod, whereby the tool is applied to the ends of the clamping band while out of tightening position and the band ends will become anchored for tightening purposes by swinging the tool to its tightening position.

1,783,124. SIGNAL DEVICE. JESSE L. LAMONT, Geneseo, Ill. Filed Nov. 15, 1929. Serial No. 407,460. 2 Claims. (Cl. 246—130.)



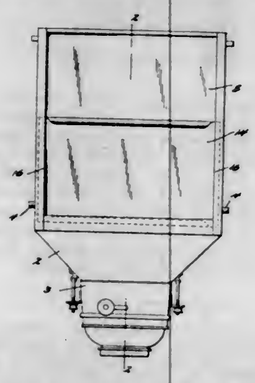
2. A signalling system for railway crossings comprising a movable signal, a casing normally housing the signal, an electrical motor, means for periodically causing actuation of the motor when a train moves into and out of a block adjacent the railway crossing, a shaft driven by the motor, a crank arm having a weight at one end connected intermediate its ends to the shaft, a rod pivotally connected at one end to the end of the crank arm which is opposite to the end having the weight, the other end of the rod being connected with the signal.

1,783,125. CARD-SAVING MOTION. GOTTLIEB LIEBENDER, Oisnitz, Germany, assignor to Koch & Te Kock, Oisnitz, Germany, a Firm. Filed May 3, 1928, Serial No. 274,781, and in Germany Mar. 18, 1927. 3 Claims. (Cl. 139—127.)



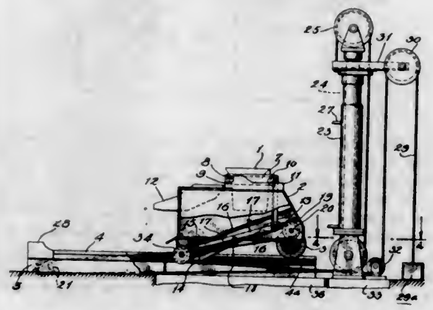
1. In a jacquard card driving mechanism for looms, a card cylinder, a pawl and ratchet wheel drive mechanism

for intermittently rotating the same, a series of feed disks loosely rotatable on the card cylinder shaft and provided with notches different in number and depth for variable feed actions, a control pawl engageable with the notches



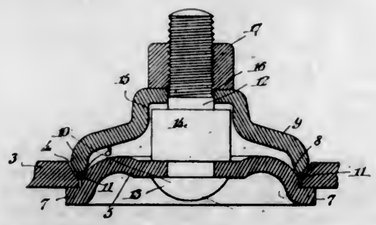
of any of the disks and connected with the drive pawl for shifting the latter into and out of engagement with the teeth of the ratchet wheel, and means for shifting the control pawl relative to the disks for relative engagement with any disk.

1,783,126. TURBINE-DRIVEN LOCOMOTIVE. ALF LYSHOLM, Stockholm, Sweden, assignor to Aktiebolaget Ljungströms Angturbin, Lidingo-Brevik, Sweden, a Corporation. Filed May 1, 1924, Serial No. 710,463, and in Sweden Apr. 30, 1923. 6 Claims. (Cl. 60—70.)



4. In a turbine driven locomotive, a boiler, a main turbine for driving the locomotive, an air forcing device, an auxiliary turbine for driving said air forcing device, a conduit connecting the inlet part of said auxiliary turbine with the boiler, said inlet part comprising two groups of guide blades, the passages between the blades of the one group widening towards the blade wheel of the turbine, whereas the passages between the blades of the other group are of the same width throughout their entire length, and an exhaust pipe from said auxiliary turbine connecting same with the main turbine.

1,783,127. FLOUR BIN FOR KITCHEN CABINETS. ORA N. MCCORMICK, Albany, Ind., assignor to McCormick Brothers Company, Albany, Ind. Filed Nov. 30, 1928. Serial No. 322,780. 2 Claims. (Cl. 209—244.)



1. A flour bin for kitchen cabinets comprising a casing having a partition therein, dividing it into upper and lower compartments, said partition having a passageway for permitting flour to pass from the former to the latter compartment, a valve for closing said passageway, the lower compartment having an opening at its front side, a door for closing said opening, and a sifter detachably connected to the bottom of the casing.

1,783,128. LADLE-TIPPING DEVICE FOR CASTING MACHINES. WALTER MORGAN, Birmingham, Ala., assignor to American Cast Iron Pipe Company, Birmingham, Ala., a Corporation of Georgia. Filed Dec. 7, 1928. Serial No. 324,463. 12 Claims. (Cl. 22—82.)

2. A charging device for use in a casting machine, including a tiltable ladle movable toward and from the machine, means for guiding the ladle, a common means to first move the ladle toward the machine along the guiding means and to afterwards tilt it to discharge the contents thereof, and counter-weighted means for first restoring the ladle to normal position and afterwards moving the same away from the machine.

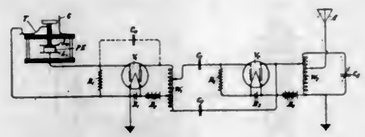
1,783,129. HAND-HOLE PLATE. AMAZIAH J. MOSES and FRANK H. WRIGHT, Chattanooga, Tenn., assignors to The Casey-Hedges Company, Chattanooga, Tenn., a Corporation of Ohio. Filed May 5, 1927. Serial No. 188,553. 1 Claim. (Cl. 220—25.)

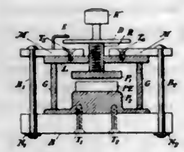
In a device of the class described, a plate to close a boiler opening, a cap having an edge to be brought substantially into contact with said plate, a boss on said cap projecting outwardly from the central portion of said cap, said boss presenting angularly disposed walls, a bolt carried by said plate and projecting centrally through said boss, an enlargement on said bolt extending from said plate into said boss and having angularly disposed walls to coact with the walls of said boss, and a nut for the outer end of said bolt.

1,783,130. PIEZO-ELECTRIC OSCILLATOR. RUSSELL S. OHL, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed June 24, 1926. Serial No. 118,346. 8 Claims. (Cl. 171—327.)

1. The combination of a piezo-electric crystal, two conductive plates between which the piezo electric crystal

is placed so that it may freely vibrate therebetween, means for manually adjusting the air gap between one conductive





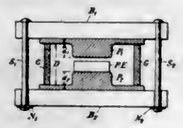


plate and the corresponding surface of the piezo-electric crystal, and means for indicating the distance between the piezo-electric crystal and the latter conductive plate.

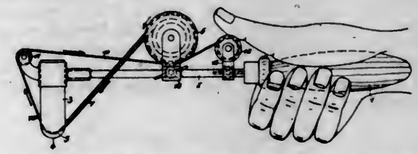
1,783,131. MOUNTING FOR PIEZO-ELECTRIC DEVICES. RUSSELL S. OHL, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 23, 1926. Serial No. 137,376. 9 Claims. (Cl. 171—327.)

2. A mounting for a piezo-electric device, comprising two conductive electrodes between which a piezo-electric device may be placed so that it may freely vibrate therebetween, means for adjusting the distance between said conductive electrodes, and means for maintaining the distance between said electrodes substantially independent of external temperature variations.

1,783,132. MOUNTING FOR PIEZO-ELECTRIC DEVICES. RUSSELL S. OHL, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 23, 1926. Serial No. 137,377. 9 Claims. (Cl. 171—327.)

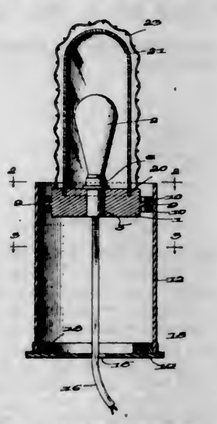


1. A mounting for a piezo-electric device which shall be substantially free from external thermal variations, comprising two metallic electrodes disposed so that the piezo-electric device may freely vibrate therebetween and so that there will be a longitudinal movement of the faces of said electrodes due to external thermal variations, and a tube surrounding the piezo-electric device and coaxial therewith maintaining the metallic electrodes a fixed distance apart, said tube producing a longitudinal movement due to said external thermal variations equal to that of the faces of said metallic electrodes.

1,783,133. ETHYL ALCOHOL-GEL. HEINZ OHLE and JOHANNA OTHMAR-NEUSCHELLER, Berlin, Germany. Filed Nov. 15, 1927, Serial No. 233,516, and in Germany Nov. 30, 1926. 6 Claims. (Cl. 44—7.)

1. As a new composition of matter a solidified ethyl-alcohol containing an alkali-salt of the sulphuric acid half-esters of acetone-derivatives of sugars or polyvalent alcohols as the solidifying agent.

1,783,134. CONTINUOUS SOLDERING. MAX ORENSTEIN, Berlin, Germany. Filed Feb. 9, 1929, Serial No. 338,795, and in Germany Feb. 15, 1928. 12 Claims. (Cl. 113—109.)

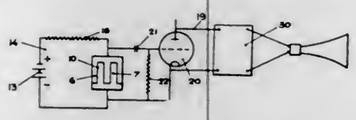


1. A soldering club comprising a handle, a soldering head, storage means for a soldering metal wire containing a carrier wire non-fusible in the soldering heat, means for actuating the said storage means in order to advance the metal wire towards the soldering head in order to fuse soldering metal off the carrier wire and to apply such metal to the soldering head and means for winding up the carrier wire after the soldering metal has been removed therefrom.

1,783,135. CARBON FOR ELECTROTECHNICAL USES AND PROCESS OF MANUFACTURE THEREOF. MARCEL OSWALD, Nanterre, France, assignor to Compagnie Lorraine de Charbons pour l'Electricite, Paris, France, a Corporation of France. Filed May 24, 1928, Serial No. 280,362, and in France Apr. 8, 1927. 1 Claim. (Cl. 266—1.5.)

The method of making carbon conductors metallized on the end, comprising grooving circumferentially a carbon rod while soft, at length intervals equal to the desired lengths of the conductors, breaking the rod in the planes of the grooves providing the conductors thus separated, with rough end surfaces of fracture, bounded by the smoother walls of the said grooves, and metallizing the said surfaces of fracture.

1,783,136. MINING LAMP. JAMES A. PAISLEY, Cleveland, Ohio, assignor to The Valley Camp Coal Company, Cleveland, Ohio, a Corporation of Pennsylvania. Filed July 11, 1929. Serial No. 377,534. 4 Claims. (Cl. 240—36.)



4. In a device of the class described, the combination of a protecting lamp casing having within its upper in-

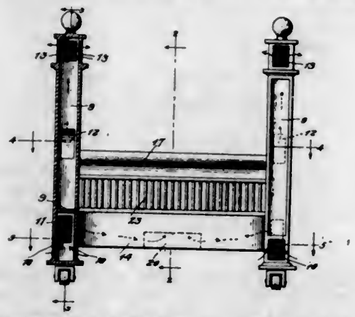
terior portion opposite pairs of diametrically related spaced guiding lugs, a lamp base fitting within and spaced from said casing and having lugs for cooperating with said guiding lugs, a lamp on said base, said lamp and base arranged to drop by gravity in upright position wholly within said casing, a current carrying cable passing through an aperture in the bottom portion of said casing, and having connection with said lamp, a transparent cover for said lamp and a metallic guard arranged outside of said cover and sustained by the lamp base.

1,783,137. PROCESS FOR MANUFACTURING A GREEN VAT DYESTUFF FROM 1.12 PERYLENE QUINONE. WALTHER PENECKE, Graz, Austria, assignor to Felice Bensa, Genoa, Italy. Filed Jan. 5, 1928, Serial No. 244,772, and in Austria Nov. 19, 1927. 1 Claim. (Cl. 260—61.)

A process for manufacturing a vat dye stuff from 1,12 perylene quinone consisting in that 1,12 perylene quinone is condensed with benzoylchloride by means of aluminium chloride at 140° to 180° centigrade.

1,783,138. TRANSFORMING OF ACOUSTIC SWINGINGS INTO ELECTRIC CAPACITY SWINGINGS. AAGE VALDEMAR PETERSEN, Frederiksberg, by Copenhagen, Denmark. Filed Oct. 2, 1928, Serial No. 309,826, and in Denmark Oct. 5, 1927. 2 Claims. (Cl. 179—106.)

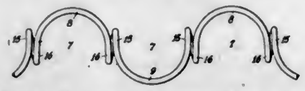
2. A sound receiving and transmitting system including a microphone adapted for transforming of sound waves into electrical waves comprising rigidly mounted electrical conductor bars positioned for the accommodation of dielectric means therebetween, dielectric vapors interposed between said bars and in a state in which the dielectricity constant is highly variable upon pressure and adapted for the reception of sound waves, whereby said conductors respond electrically but non-mechanically to said sound waves.



1,783,139. ALLOY. CHARLES PHILIPPOSSIAN, Geneva, Switzerland. Filed Aug. 14, 1929, Serial No. 385,969, and in Switzerland Nov. 3, 1928. 2 Claims. (Cl. 75—1.)

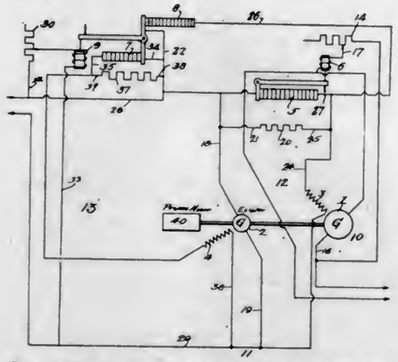
2. A white alloy comprising the following elements in the following proportions:

	Per cent
Cu	66.554
Ni	18.2
Zn	14.5
Al	0.190
Mg	0.190
Cd	0.098
Si	0.078
Mn	0.190



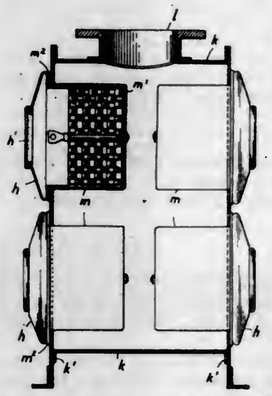
1,783,140. FIREPLACE AIR HEATER. MATTHEW S. QUINLIVEN, Los Angeles, Calif. Filed Jan. 9, 1930. Serial No. 419,617. 3 Claims. (Cl. 126—121.)

1. A fireplace air heater comprising two hollow vertical front posts each having a relatively low hot air inlet and a comparatively high hot air outlet, a front horizontal cool air receiving flue extending from one of said posts to the other, a hollow rear wall behind said front flue, a front-to-front flue extending between and communicating with said front flue and said rear wall, two hollow end walls secured to and communicating with said rear wall, the front portions of said end walls being secured to said posts and communicating with said rear wall, the front portions of said end walls being secured to said



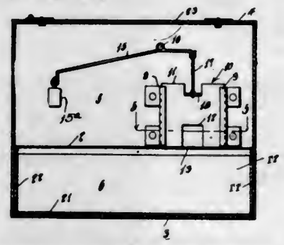
communicating with said hot air inlets thereof, and a grate extending between the lower portions of said back wall and said front flue.

1,783,141. CAGE FOR BALL BEARINGS. CHARLES LYON RUSSELL, Rahway, N. J., assignor to The Hess-Bright Manufacturing Company, Philadelphia, Pa., a Corporation of Delaware. Filed Feb. 27, 1929. Serial No. 343,012. 7 Claims. (Cl. 308—201.)



1. A ball cage for bearings, comprising a single wire bent into pocket forming loops opening alternately from opposite sides, the wire between each two adjacent loops being bent into a helix, each two adjacent helices being capable of retaining a ball in the appurtenant pocket.

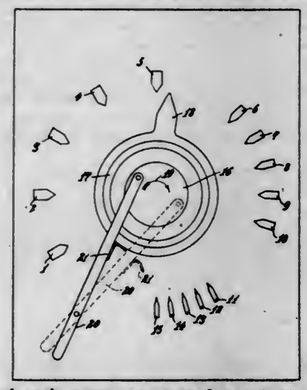
1,783,142. LOAD-REGULATING MEANS. CLINTON SAYRES and DONALD C. PEABODY, Philadelphia, Pa., assignors to The J. G. Brill Company, a Corporation of Pennsylvania. Filed Sept. 2, 1927. Serial No. 217,294. 5 Claims. (Cl. 290—40.)



5. In a prime mover dynamo plant, a prime mover, a main generator including a field circuit and an armature circuit, an auxiliary generator including a field circuit and an armature circuit, said generators being driven by the prime mover, said auxiliary generator supplying field current to the main generator, means for maintaining a constant output voltage on the auxiliary generator, opposed variable resistances in the field circuit of the main generator, and electro-magnetic means responsive to speed fluctuations of the prime mover for varying one of said resistances inversely and the other of said resistances directly as said speed varies.

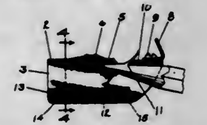
1,783,143. FILTER DEVICE. ALBERT SCHREMPP, Dusseldorf, Germany. Filed Jan. 4, 1927, Serial No. 158,963, and in Germany Jan. 9, 1926. 5 Claims. (Cl. 183—69.)

5. A filtering apparatus, comprising a plurality of sets of superimposed filter elements, said elements having perforations with projecting ragged rims, the elements of each set being arranged in such a manner that the perforations of neighboring filter elements are located in staggered relation to each other, a casing for each set of filter elements, with an outwardly bent flange at one end and an inwardly bent flange at the other end, covers for the casings and a common frame structure for said casings.



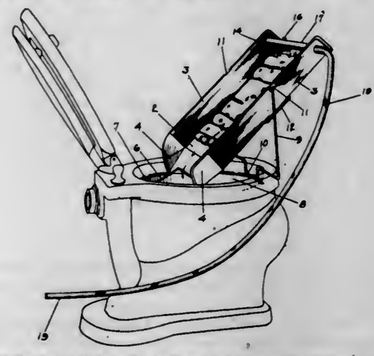
1,783,144. ANIMAL TRAP. JAMES E. SPILMAN, Wartrace, Tenn. Filed Jan. 2, 1930. Serial No. 418,045. 3 Claims. (Cl. 43—68.)

1. In an animal trap, a housing having an entrance opening in one of its walls, a horizontal partition in said housing dividing it into an entrance chamber and a captive chamber, said partition provided with an opening contiguous to the entrance opening, a trip member having an upright portion slidably mounted over said entrance opening and having an opening alined with said entrance opening, and a horizontal platform movable through the opening in the partition, and means to hold said trip member elevated with the platform alined with the partition, said upright portion providing a closure for the entrance opening when the platform is depressed by a victim.



1,783,145. DEVICE FOR THROWING AT WILL PROJECTILES FROM AIRCRAFT. FRANCISCUS WILHELMUS VAN HEIJST, The Hague, Netherlands, assignor to Commanditaire Vennootschap: J. B. van Heijst & Zonen, The Hague, Netherlands. Filed Jan. 20, 1930, Serial No. 422,158, and in the Netherlands Feb. 13, 1929. 2 Claims. (Cl. 244—1.)

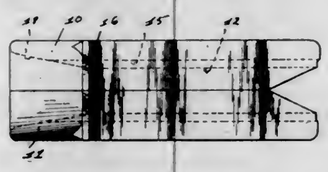
1. A device for throwing at will projectiles from aircraft, characterized in this, that the device comprises a number of groups of contacts being placed in a circle, said contacts being touched in succession by a contact-arm so that an electrical current circuit to the corresponding throwing device is actuated and whereby the



contacts of each group are spaced apart at equal distances, while the mutual distances of the contacts of one group differ from those of another group.

1,783,146. PENCIL SHARPENER. NEAL G. BARNARD, Minneapolis, Minn. Filed Apr. 9, 1928. Serial No. 268,761. 1 Claim. (Cl. 120—90.)

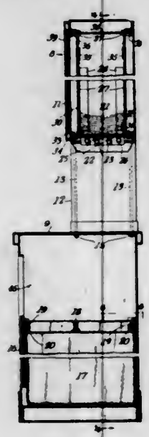
A pencil sharpener including a substantially U-shaped integral holder comprising spaced apart side walls having a top wall connecting them together, a knife blade attached to the upper wall, a flexible guide tongue also on the upper wall having its free end extending in a direction towards the knife blade and bent downwardly and positioned adjacent to the cutting edge of said blade, the free end of said tongue lying substantially in the medial plane of the blade, said tongue being bendable whereby it may be adjusted relatively to the knife edge to regulate the depth of the cut, and a thumb rest provided on said holder adjacent to said blade whereby the user may readily support the holder with the thumb while drawing a pencil through the sharpener to sharpen it.



1,783,147. LAUNDRY APPARATUS. NEAL G. BARNARD, Minneapolis, Minn. Filed June 16, 1928. Serial No. 285,975. 3 Claims. (Cl. 68—11.)

3. A device of the class described, comprising a member including a bottom and spaced side walls, said walls di-

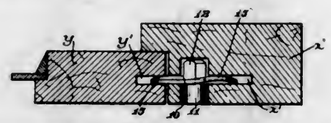
verging inwardly at one end of said member to reduce the width thereof and whereby one end of the member may be inserted into a closet bowl having an upper rolled edge, prongs secured to the reduced end portion of said member and adapted to be inserted under said rolled edge to retain one end of the member on the closet bowl, a support on said member for supporting the opposite end thereof, the lower portion of said support being adapted to engage the upper portion of said rolled edge, and a depending portion on said support projecting into the closet bowl to prevent disengagement of the support from said rolled edge.



1,783,148. ROLLER-MILL GUIDE. MARVINE GORHAM, Buffalo, N. Y., assignor to Michigan Steel Casting Company, Detroit, Mich., a Corporation of Michigan. Filed May 7, 1928. Serial No. 275,934. 6 Claims. (Cl. 80—51.)

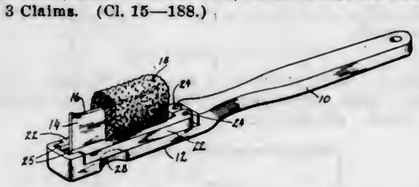
5. A rolling mill guide adapted to be subjected to the wear of highly heated bars and billets as they are being rolled, said guide having the guiding portions thereof composed of an alloy adapted to resist wear at elevated temperatures, said alloy being of approximately the following composition:

Nickel	32	to 38	%
Chromium	13	to 17	%
Carbon	0.35	to 0.65	%
Silicon	0.9	to 1.4	%
Manganese	0.85	to 0.95	%
Iron			Balance.



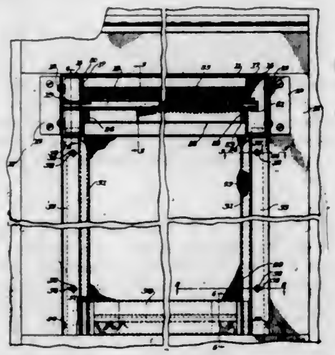
1,783,149. TOWEL CABINET. FRED JANTZEN, Bronx, N. Y. Filed Feb. 21, 1930. Serial No. 430,158. 10 Claims. (Cl. 312—60.)

4. A towel rack, comprising guides for the edges of a stack of towels, said guides having wavy surfaces engaged with the edges of the stack to segregate the towels and means for holding said guides yieldingly engaged with the edges of the stack.



7. A towel cabinet having a vanity shelf top, said cabinet having an opening in the front of the same beneath said vanity shelf top and provided with a door below said opening giving full access to the interior of the cabinet, and a soiled towel bag removably supported in the cabinet behind said door and with the mouth of the same in opened relation at approximately the top of the door to receive soiled towels thrown through the front opening over the top of the door and in position disclosing through said opening the extent to which it is filled, without opening the door and being fully exposed and readily removable from the cabinet upon opening the door.

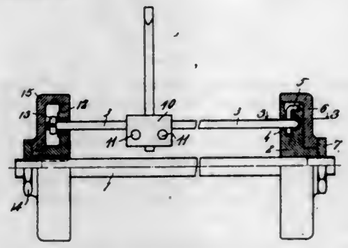
1,783,150. FASTENER FOR DOOR PANELS. RUPERT G. JEFFERY, Nashua, N. H. Filed Mar. 1, 1930. Serial No. 432,440. 2 Claims. (Cl. 292—202.)



1. A fastener for engaging recesses in frame members, said fastener comprising a bushing, a stud mounted in said bushing and having a non-circular portion, and an elongated blade having its central portion mounted on the non-circular portion of the stud, the ends of the blade being twisted in opposite directions out of its plane.

1,783,151. TOOTHBRUSH. CLARENCE M. MCARTHUR, Detroit, Mich. Filed Nov. 9, 1929. Serial No. 406,098. 3 Claims. (Cl. 15—188.)

1. A tooth brush comprising a handle having a brush holding head provided with a lip portion, an arm pivoted to the head on each side of the lip portion and adapted to be detachably engaged with said head, a brush element folded over said lip portion and adapted to be held in place by said arms.

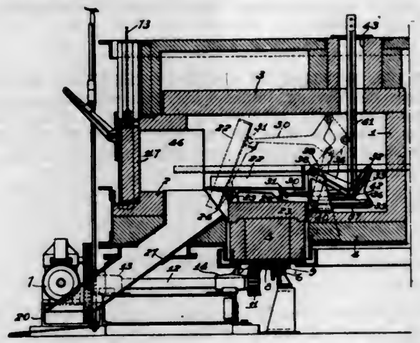


1,783,152. ROLL-SCREEN CONSTRUCTION. NILE OLDHAM, Chicago, Ill. Filed Apr. 8, 1927. Serial No. 181,909. 5 Claims. (Cl. 156—39.)

2. In a screen construction, an integral transverse sheet metal member having portions forming a longitudinal

groove, the open side of the groove being narrower than a lower portion of the groove, said portions adapted to grip a screen secured to said member by having a reversely bent portion of the screen extending within the lower portion of the groove, said member having other portions forming a hollow body member open at the ends.

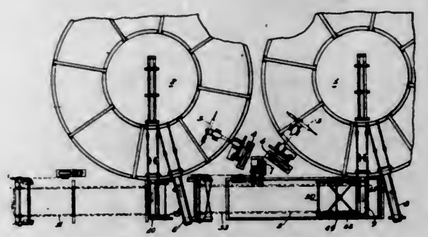
1,783,153. TILLER. GEORG PENEFF, Berlin-Wilmersdorf, Germany, assignor to Siemens-Schuckertwerke Aktiengesellschaft, Berlin-Siemensstadt, Germany, a Corporation of Germany. Filed Sept. 20, 1928, Serial No. 307,141, and in Germany Aug. 15, 1927. 21 Claims. (Cl. 97—216.)



1. A rotary tiller, comprising a driven shaft, torsion spring bars mounted on said shaft and tools connected with said torsion bars.

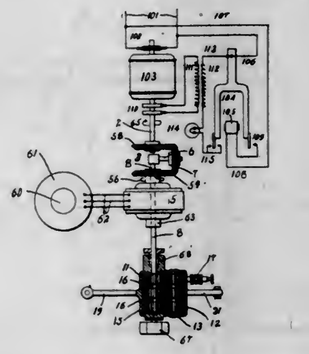
1,783,154. COLORING MATERIAL FOR OLEOMARGARINE, BUTTER, AND THE LIKE. JACOB SCHAUB, Westfield, N. J., assignor to Best Foods, Inc., New York, N. Y., a Corporation of New Jersey. Filed July 6, 1925. Serial No. 41,872. 5 Claims. (Cl. 99—13.)

1. A dry coloring material for oleomargarine and the like consisting of water soluble granules coated and impregnated with a dry coloring matter.



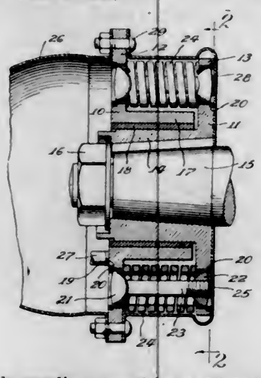
3. The method of making a coloring material for oleomargarine and butter which consists in dissolving a dyestuff in a volatile solvent carrier, absorbing the colored solution with porous material and evaporating off the solvent.

1,783,155. ELECTRIC HEATING FURNACE. RANDAL E. TALLEY, Irwin, Pa., assignor to George J. Hagan Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed June 2, 1927. Serial No. 195,988. 15 Claims. (Cl. 263—7.)



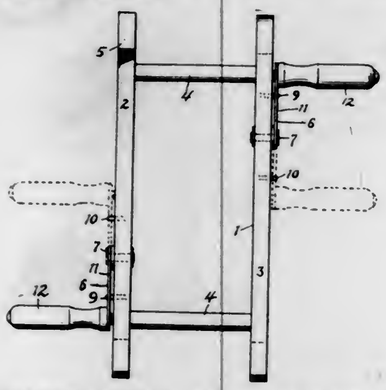
12. In a furnace the combination with a pivotally mounted hearth and means for tilting said hearth, of cam actuated means for causing a jarring of the hearth during the tilting action.

1,783,156. HEAT-TREATING APPARATUS. RANDAL E. TALLEY, Irwin, Pa., assignor to George J. Hagan Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed May 11, 1928, Serial No. 276,922. Renewed June 13, 1930. 9 Claims. (Cl. 263—7.)



1. Heat treating apparatus comprising in combination a rotary hearth furnace and a conveyor mechanism for conducting material thereto, means for automatically charging and discharging the material to and from the hearth of said furnace and means actuated by the material carried on said conveyor for controlling said charging means.

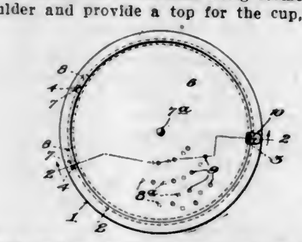
1,783,157. SYSTEM OF SPEED GOVERNING FOR PRIME MOVERS. HARVEY BIRCHARD TAYLOR, Philadelphia, Pa. Filed May 16, 1919, Serial No. 297,552. Renewed Jan. 19, 1929. 32 Claims. (Cl. 175—355.)



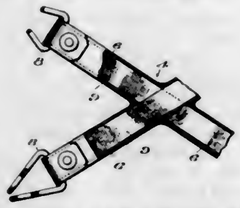
9. A governing system for a gate controlled hydraulic turbine driving an alternating current generator, comprising a gate operating fluid actuated servo-motor having a fluid distributing valve and a pilot valve therefor, and means for effecting actuation of said distributing valve in accordance with a difference of frequency between the generator current and a standard value of frequency and to adjust the power of the prime mover until its speed is brought back to that corresponding to the standard value of frequency whereby the speed of the prime mover and its generator may be brought back to normal or to any predetermined variation from normal for all positions of the turbine gates, said means including electrical instrumentalities inherently responsive to frequency for determining said standard value, primary restoring mechanism operative directly on said distributing valve upon movements of said servo-motor, and secondary restoring mechanism operative on said pilot valve to effect further restoring action on said distributing valve.

1,783,158. FLEXIBLE COUPLING. GEORGE F. ECKART, Chicago, Ill., assignor to George A. Chritton, Chicago, Ill., trustee. Filed July 5, 1929. Serial No. 376,012. 5 Claims. (Cl. 64—96.)

1. A flexible coupling comprising a driving and a driven member having a common axis and each having an opposing flange, means for guiding one member with respect to the other means for flexible connecting said flanges, and a series of helical springs having their axes disposed at intervals in a circle about the axis of said members, said springs lying between the members and tending to keep said members separated.



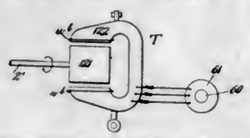
1,783,159. REEL. JOHN B. PALMER, Fort Wayne, Ind., assignor of one-half to Albert F. Palmer, Fort Wayne, Ind. Filed Jan. 14, 1929. Serial No. 332,293. 4 Claims. (Cl. 242—96.)



1. In a reeling appliance, a frame having spaced side bars and transversely disposed connecting members; a crank in pivotal connection with each of said side bars, the pivot of one crank being spaced from the axis of said frame, the pivot for one of said cranks being located at a point opposite that of the other crank respecting said axis, and a pair of latch pins projecting from each of said side bars, oppositely disposed respecting the pivot upon which the crank is mounted, the arm of said crank being adapted to have engagement with said pins selectively according to the adjusted position of the crank.

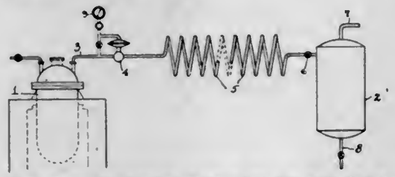
1,783,160. LOOSE-POWDER CONTAINER. WINFRED T. PARKIN, Providence, R. I., assignor to Theodore W. Foster & Brother Co., Providence, R. I. Filed Apr. 4, 1929. Serial No. 352,509. 8 Claims. (Cl. 221—64.)

1. In a loose powder container, a cup having a rim with a shoulder located above its bottom, and having a pair of spaced slots and a third slot opposite to the pair, all of the slots being located in the rim of the cup, and above the shoulder, a pair of pivotally connected disks having perforations formed to register in one position, each of said disks having spaced radial ears which extend through the pair of slots, the lower disk being formed to seat on the shoulder and provide a top for the cup, and a combined latch and operating member for the upper disk having a part formed to be snapped into the third slot, the ears of the lower disk engaging the ends of the pair of slots to hold said disk against rotation and the ears and member of the upper disk being of less width than the length of the respective slots to allow of movement of the last named ears and member in the slots thereby to rotate the upper disk.



1,783,161. TRACTION DEVICE FOR TIRES. CARSON R. STEWART, Akron, Ohio, assignor to United States Chain & Forging Company, Pittsburgh, Pa., a Corporation of Delaware. Filed June 5, 1922. Serial No. 565,898. 18 Claims. (Cl. 152—14.)

1. A tire armor comprising, the combination of endless link chains adapted to be disposed upon opposite sides of the tire, and a plurality of elements of resilient material being constructed to span the tire, each element yieldable radially of the tire but being incapable of stretching transversely of the tire and being formed with arms arranged in cruciform relation and looped at their extremities to adapt them for attachment to said chains.



13. An anti-skid device comprising a strap of flexible material having an eye portion adjacent to each end and inserts of relatively great tensile strength surrounding said eye portions.

1,783,162. SYSTEM OF SPEED GOVERNING. HARVEY BIRCHARD TAYLOR, Philadelphia, Pa. Original application filed May 16, 1919, Serial No. 297,552. Divided and this application filed Apr. 5, 1920. Serial No. 371,349. Renewed Jan. 19, 1929. 18 Claims. (Cl. 175—355.)

9. A turbine regulating system of the type wherein the turbine gates are controlled from a speed responsive device whose operation is limited from the turbine gates by a restoring mechanism, characterized by the fact that the speed responsive device comprises two inductively related windings, means for supplying current to one of said windings having a characteristic which varies with the speed of the turbine, means for supplying to the other of said windings current having a fixed characteristic corresponding to a speed standard, and means for producing an operating force through the interaction of the currents in said windings.

1,783,163. PRESSURE-RELIEVING METHOD AND APPARATUS FOR AUTOCLAVES AND THE LIKE. THOMAS GRISWOLD, Jr., Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed Sept. 26, 1925. Serial No. 58,804. 11 Claims. (Cl. 137—111.)

11. In pressure relieving apparatus for autoclaves and the like, the combination of a branched discharge line, a control valve in each of the branches of said line, two stop valves in each such branch, one on each side of the corresponding control valve, a header connecting such branches beyond such valves, a duct leading from said header and including a portion arranged and constructed to interpose resistance to the flow of the fluid therethrough, whereby a substantial portion of the drop in pressure is absorbed, and a plurality of taps connected with said duct at different distances from said header.

1,783,164. HEATING DEVICE FOR RAILROAD SWITCHES. HENRY MILLER and BENJAMIN B. BETTS, St. Louis, Mo.; said Betts assignor to said Miller. Filed Apr. 18, 1928. Serial No. 270,982. 1 Claim. (Cl. 158—91.)

A switch heating device comprising a receptacle having communicating compartments, one being a reservoir for liquid fuel and the other constructed as a burner, a sliable cover closing top openings of both compartments, the length of which does not substantially exceed the length of the fuel reservoir, and a removable under-cover over that part of the reservoir exposed when the sliding cover is moved to a position covering the burner.

1,783,165. MIXED ESTERS OF COLOPHONY AND RELATED SUBSTANCES. HERMAN ALEXANDER BRUSON, Philadelphia, Pa., assignor to The Resinous Products & Chemical Company, a Corporation of Delaware. Filed Oct. 8, 1928. Serial No. 311,255. 20 Claims. (Cl. 260—8.)

1. A composition of matter comprising a mixed ester of an acidic gum with a polyhydric alcohol and a straight chain aliphatic acid of the formula

$$HOOC—(CH_2)_n—COOH$$

where n is a whole number between 4 and 8 inclusive.

8. A composition of matter comprising a mixed ester of colophony, glycerol, and sebacic acid.

13. A composition of matter comprisng a mixed ester of an acidic gum, diethylene glycol, and sebacic acid.

1,783,166. RESIN PLASTICIZER. HERMAN ALEXANDER BRUSON, Philadelphia, Pa., assignor to The Resinous Products & Chemical Company, a Corporation of Delaware. Filed July 5, 1929. Serial No. 376,288. 8 Claims. (Cl. 106—22.)

1. Method of plasticizing phenol aldehyde resins which consists in incorporating therewith a condensation product of a polyhydric alcohol and a member of the group consisting of pimelic, suberic, azelaic and sebacic acids.

1,783,167. PREPARATION OF RUBBERLIKE MASSES. HERMAN ALEXANDER BRUSON, Germantown, Pa., assignor to The Resinous Products & Chemical Company, a Corporation of Delaware. Filed July 8, 1930. Serial No. 466,590. 18 Claims. (Cl. 260—8.)

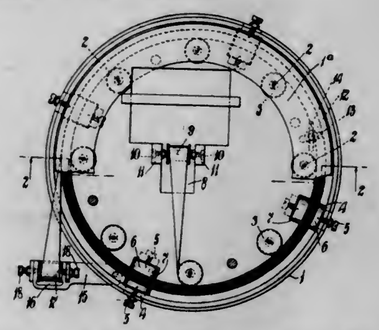
1. A composition of matter comprising the reaction product of castor oil, glycerol, and sebacic acid.

6. A composition of matter comprising the reaction product of castor oil, a polyhydric alcohol having over two hydroxyl groups, and an aliphatic dibasic acid having the general formula $HOOC—(CH_2)_n—COOH$ where n is a whole number between 4 and 8 inclusive.

18. A composition of matter comprising the reaction product of castor oil, a polyhydric alcohol having over two hydroxyl groups, and an aliphatic dibasic acid having the general formula

$$(CH_2)_n\begin{cases}COOH\\COOH\end{cases}$$

where n is a whole number between 4 and 8 inclusive, and a dihydric alcohol.

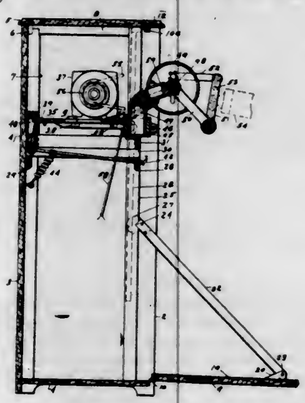


1,783,168. CONDENSATION PRODUCT AND PROCESS OF PREPARING SAME. HERMAN ALEXANDER BRUSON, Germantown, Pa., assignor to The Resinous Products & Chemical Company, a Corporation of Delaware. Filed Sept. 25, 1930. Serial No. 484,475. 12 Claims. (Cl. 260—8.)

12. A process for preparing a resinous mass which comprises heating to reaction temperature an acid of the general formula

$$(CH_2)_n\begin{cases}COOH\\COOH\end{cases}$$

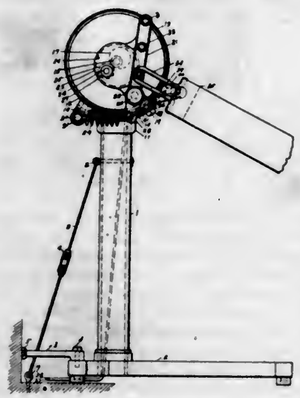
where n is a whole number between 4 and 8 inclusive, an aliphatic monobasic acid derived from the hydrolysis of a natural fatty oil glyceride, a polyhydric alcohol and unhydrolyzed fatty oil glycerides.



1,783,169. MEANS FOR WINDING ENDLESS CINEMATOGRAPH FILMS AND THE LIKE. MARTIN HARPER, Strand, London, England. Filed Nov. 2, 1928, Serial No. 316,833, and in Great Britain July 9, 1928. 4 Claims. (Cl. 88—187.)

1. Means for winding endless cinematograph films and the like comprising a film carrying drum, two plates spaced

apart by means of rollers arranged near the periphery and at right angles to the plates, centres for such rollers mounted in the plates, an aperture in the lower plate, a roller mounted parallel with the lower plate, and with the lowest part of its surface in the plane of the plate, centres for said roller mounted on said lower plate, a tangential extension to said lower plate, an aperture in said extension, a second roller mounted parallel with the said extension and in said aperture, centres for said second roller mounted on said extension, and means for adjustably attaching the film-carrying drum or reel in a horizontal position to a projection apparatus.



1,783,170. MASSAGING-MACHINE CABINET. FRANK W. KNOTT, Detroit, Mich., assignor to Knott & Garllus Company, Detroit, Mich., a Corporation of Michigan. Filed May 28, 1929. Serial No. 366,544. 5 Claims. (Cl. 312—21.)

1. A portable cabinet adapted for supporting and enclosing a massaging machine, comprising a rigid cabinet enclosure, formed with one open side, a panel door pivotally mounted within said side opening, a support member pivotally mounted within the cabinet enclosure designed to receive and support a massaging machine thereon, said support member being capable of being rotated from a horizontal to a vertical position about its pivot support within the cabinet enclosure, and means mounted within the cabinet for rigidly retaining the pivoted support member and attached massaging machine in its extreme pre-determined positions therein.

1,783,171. ELECTRIC MASSAGING MACHINE. FRANK W. KNOTT, Detroit, Mich., assignor to Knott & Garllus Company, Detroit, Mich., a Corporation of Michigan. Filed June 12, 1929. Serial No. 370,437. 3 Claims. (Cl. 128—63.)

3. A massaging machine adapted for massaging the body through an attached flexible applicator belt, comprising a rigid supporting frame having a slow speed motor mounted therein and securely attached thereto, means mounted on said slow speed motor for connecting the same within an electric power circuit, said motor being provided with an armature shaft extending beyond the motor bearings at each end, eccentric cams fixedly mounted on the outer opposite ends of said armature shaft positioned diametrically opposite each other, applicator arms pivotally mounted on opposite sides of the supporting frame positioned adjacent to the respective cams and in approximate alignment therewith, said applicator arms being provided with a cam cup formed on one side thereof, said cam cup being of a size and positioned to enclose the respective eccentric cams and allow the cams to rotate freely therein, a contact roller mounted within each of the cam cups positioned to engage the cam surface on the side opposite the applicator arms forming a contact therewith, spring means mounted on the said applicator arms in a manner for holding the contact rollers in con-

tinuous contact with the eccentric cams during the continuous rotation of the motor armature for producing a continuous alternate oscillating movement of the applicator arms, and a series of applicator attaching buttons mounted on the applicator arms for attaching the ends of a flexible applicator belt thereto at various positions along the arms for transmitting the alternate oscillating movement of the arms directly into the attached applicator belt.

1,783,172. ATTACHMENT FOR CALCULATING MACHINES. FRANK M. SMITH, West Orange, N. J., assignor to Monroe Calculating Machine Company, Orange, N. J., a Corporation of Delaware. Filed Mar. 25, 1930. Serial No. 438,806. 3 Claims. (Cl. 235—131.)

3. In a calculating machine having a shaft provided with a longitudinal series of spaced gears, and a coiled check spring parallel to said shaft and engaging the teeth of said gears; means for preventing crystallization of said spring including means for rotatably supporting and holding said spring extended longitudinally having end supports and swivel pins seated in said supports and engaging the ends of the spring.

ALPHABETICAL LIST OF REGISTRANTS OF TRADE-MARKS

Abbott Laboratories, North Chicago, Ill. Bismuth preparation. 277,960; Dec. 2; Serial No. 303,560; published Sept. 2, 1930. Class 6.

Almotone Chemical Company. (See Fagras, Anastasios G.)

Albatross Quilting, Inc., Cicero, Ill. Quilts and quiltings, pads, etc. 278,033; Dec. 2; Serial No. 296,941; published Sept. 16, 1930. Class 42.

Alexander, Clara C., doing business as C. C. Alexander Mfg. Co., Prince George, British Columbia, Canada. Egg-preserving composition. 277,917; Dec. 2; Serial No. 301,770; published Sept. 23, 1930. Class 6.

Allen & Smith Company, Inc., Richmond, Va. Candy, salted peanuts, and peanut butter. 277,966; Dec. 2; Serial No. 302,846; published Sept. 2, 1930. Class 46.

Allied Products. (See Schmidt, Fred E.)

Alma Manufacturing Company of Baltimore. (See American Steel Buckle Co.)

American Dyewood Company, New York, N. Y. Fat liquor for use on furs and hides. 278,052; Dec. 2; Serial No. 303,362; published Aug. 26, 1930. Class 6.

American Dyewood Company, New York, N. Y. Vegetable dye for furs. 278,053; Dec. 2; Serial No. 303,363; published Aug. 26, 1930. Class 6.

American National Fox and Fur Breeders Association, Minneapolis, Minn. Pelts. 277,914; Dec. 2; Serial No. 302,522; published Sept. 16, 1930. Class 1.

American Paper Goods Company, The, Kensington, Conn. Paper, folded or unfolded, envelopes, photograph inclosures. 80,968; renewed Feb. 21, 1931.

American Propeller Company, The, Baltimore, Md. Electric fans. 277,882; Dec. 2; Serial No. 303,243; published Sept. 16, 1930. Class 21.

American Steel Buckle Co., to Alma Manufacturing Company of Baltimore, Baltimore, Md., successor. Buckles, buttons, and clasps. 35,491; renewed Nov. 27, 1930.

Apex Products Corporation, Chicago, Ill. Deodorizer. 278,046; Dec. 2; Serial No. 303,148; published Sept. 9, 1930. Class 6.

Arlington Chemical Company, The. (See Palisade Manufacturing Co., The, assignor.)

Atlantic Mills, The, Olneyville and Providence, R. I., and Stottville, N. Y. Fabric in the piece. 278,069; Dec. 2; Serial No. 304,306; published Sept. 16, 1930. Class 42.

Audline Company. (See Paquin, William T.)

Auto-Matic Seat Cover Corporation, New York, N. Y. Automobile slip covers. 278,001; Dec. 2; Serial No. 295,246; published Sept. 16, 1930. Class 19.

B. D. Medicine Co. (See Dixon, B. M.)

Bach Laboratories, Inc., Newark, N. J. Liquid general tonic. 277,944; Dec. 2; Serial No. 302,848; published Sept. 9, 1930. Class 6.

Bakers' Help r Co., Chicago, Ill. Magazine. 278,024; Dec. 2; Serial No. 298,925; published Sept. 23, 1930. Class 38.

Baltimore Drug Company, Incorporated, The, Baltimore, Md. Aspirin, boric acid, bay rum, etc. 278,086; Dec. 2; Serial No. 292,573; published Sept. 16, 1930. Class 6.

Bartel, Adam H., Company, Richmond, Ind. Men's, ladies', and children's underwear. 278,117; Dec. 2. Class 39.

Beardmore & Co., Toronto, Ontario, Canada. Leather. 277,924; Dec. 2; Serial No. 304,091; published Sept. 16, 1930. Class 1.

Beaurline, Francis J., doing business as Beaurline Co., St. Paul, Minn. Lip tint. 278,002; Dec. 2; Serial No. 295,147; published Sept. 2, 1930. Class 6.

Beech-Nut Packing Company, Canajoharie, N. Y. Confectionery. 278,003; Dec. 2; Serial No. 294,952; published Sept. 16, 1930. Class 46.

Bendel, Henri, Inc., New York, N. Y. Perfumes, bath salts, etc. 278,116; Dec. 2. Class 6.

Bendix Service Corporation, South Bend, Ind. Rivets. 277,891; Dec. 2; Serial No. 304,270; published Sept. 23, 1930. Class 13.

Berger, Walter J., doing business as California Confections Company, San Francisco, Calif. Raisins. 277,976; Dec. 2; Serial No. 300,046; published Sept. 23, 1930. Class 46.

Bessler, Frank E., assignor to The Bessler Disappearing Stairway Company, Akron, Ohio. Movable stairway. 80,825; renewed Feb. 7, 1931.

Bluich, Adolph, Inc., San Francisco, Calif. Fishing lines, hooks, reels, etc. 278,067; Dec. 2; Serial No. 304,532; published Sept. 23, 1930. Class 22.

Bliss Brothers Company, Attleboro, Mass. Lockets. 79,811; renewed Oct. 11, 1930.

Blumenthal, Sidney, & Co. Inc., New York, N. Y. Pile fabrics. 278,073; Dec. 2; Serial No. 303,992; published Sept. 9, 1930. Class 42.

Board of Trustees of the Leland Stanford Junior University, The, doing business as Stanford University, San Francisco, Calif. Pharmaceutical agent. 278,047; Dec. 2; Serial No. 303,153; published Aug. 26, 1930. Class 6.

Bob, H. D., Company Inc., New York, N. Y. Windbreakers. 278,123; Dec. 2. Class 39.

Bogey Practice Ball Company. (See Fiedler, Max.)

Böhme, H. Th., A. G., Chemnitz, Germany. Chemical dye aids. 277,937; Dec. 2; Serial No. 303,626; published Sept. 16, 1930. Class 6.

Bonneau, L. P., doing business as The Bonneau Beauty Shop, Utica, N. Y. Permanent-wave solution. 278,041; Dec. 2; Serial No. 302,766; published Sept. 2, 1930. Class 6.

Booth Bottling Company, Philadelphia, Pa. Maltless beverages. 278,030; Dec. 2; Serial No. 297,515; published Sept. 23, 1930. Class 45.

Boott Mills, Lowell, Mass. Scrim in the piece and made up into curtains. 277,888; Dec. 2; Serial No. 301,562; published Aug. 19, 1930. Class 42.

Brill's, Max, Sons, Inc., New York, N. Y. Ladies' hand bags. 277,909; Dec. 2; 303,738; published Sept. 16, 1930. Class 3.

Browning & Baines, Inc., Washington, D. C. Roasted and granulated coffee. 277,863; Dec. 2; Serial No. 303,948; published Sept. 16, 1930. Class 46.

Buenger Pharmacal Company. (See E. M. Pharmacal Company, assignor.)

Busch, G. Walton, & Sons, New York, N. Y. Metal drains. 277,907; Dec. 2; Serial No. 303,686; published Sept. 23, 1930. Class 13.

Butterfield, Clarence J., Van Nuys, Calif. Goods made of leather or fabric or combinations thereof. 277,921–3; Dec. 2; Serial Nos. 304,230–2; published Sept. 16, 1930. Class 3.

Byrne, Frank H., doing business as Byrne Products Co., New York, N. Y. Paint product. 278,103; Dec. 2; Serial No. 300,167; published Sept. 16, 1930. Class 16.

Calco Chemical Company, Inc., The, Bound Brook, N. J. Medicinal preparation. 277,930-3; Dec. 2; Serial Nos. 303,994-7; published Sept. 9, 1930. Class 6.

Calco Chemical Company, Inc., The, Bound Brook, N. J. Medicinal preparation. 277,934; Dec. 2; Serial No. 303,993; published Sept. 16, 1930. Class 6.

Caldwell Flour Mills, The. (See Colorado Milling & Elevator Co. The.)

California Confections Company. (See Berger, Walter J.)

California Medicinal Wine Co., Los Angeles, Calif. Medicinal and pharmaceutical preparations. 278,060; Dec. 2; Serial No. 301,572; published Sept. 9, 1930. Class 6.

Carboni, Giulio M., doing business as G. M. Carboni & Co., Rochester, N. Y. Medicinal preparations. 277,946; Dec. 2; Serial No. 302,625; published Sept. 9, 1930. Class 6.

Carey Salt Co., Hutchinson, Kans. Salt. 278,007; Dec. 2; Serial No. 294,572; published Sept. 16, 1930. Class 6.

Cerruti, E., New York, N. Y. Cheese. 277,913; Dec. 2; Serial No. 302,852; published Sept. 16, 1930. Class 46.

Chemische Fabrik Joh. A. Benckiser G. m. b. H., Ludwigshafen-on-the-Rhine, Germany. Cheese-dissolving salt. 278,043; Dec. 2; Serial No. 302,992; published Sept. 9, 1930. Class 6.

Chenango Knitting Company, Sherburne, N. Y. Hosiery. 278,131; Dec. 2. Class 39.

Cheney Brothers, South Manchester, Conn. Fabrics in the piece. 278,076; Dec. 2; Serial No. 303,596; published Sept. 23, 1930. Class 42.

Chicago Candy Novelties Corp., Chicago, Ill. Confectionery. 277,974; Dec. 2; Serial No. 300,333; published Sept. 23, 1930. Class 46.

Clark, Robert E., doing business as R. E. Clark Milling Company, Chillicothe, Ohio. Wheat flour. 277,910; Dec. 2; Serial No. 303,628; published Sept. 16, 1930. Class 46.

Clarke Sanding Machine Company, Chicago, Ill. Domestic electric vacuum cleaners. 278,108; Dec. 2. Class 21.

Cleveland Heater Company, The, Cleveland, Ohio. Water heaters and their structural parts. 277,982; Dec. 2; Serial No. 299,554; published Sept. 16, 1930. Class 34.

Cleveland Heater Company, The, Cleveland, Ohio. Water heaters, heating systems, central house-heating units, etc. 277,996; Dec. 2; Serial No. 301,843; published Sept. 16, 1930. Class 34.

Cleveland Heater Company, The, Cleveland, Ohio. Water heaters, heating systems, central house-heating units, etc. 278,018–20; Dec. 2; Serial Nos. 299,373–5; published Sept. 16, 1930. Class 34.

Clifford, Kathleen, Ltd., Beverly Hills, Calif. Cleansing creams, emollients, skin balms, etc. 277,998; Dec. 2; Serial No. 295,833; published Sept. 23, 1930. Class 6.

Coated Paper Products Company, The, Minerva, Ohio. Wax-coated paper. 277,898; Dec. 2; Serial No. 304,039; published Sept. 16, 1930. Class 37.

Colgate-Palmolive-Peet Company, Chicago, Ill. Dental cream. 278,048; Dec. 2; Serial No. 303,161; published Sept. 9, 1930. Class 6.

Colgate-Palmolive-Peet Company, Chicago, Ill. Talc powder. 278,049; Dec. 2; Serial No. 303,162; published Aug. 26, 1930. Class 6.

Colorado Fuel and Iron Company, The, Denver, Colo. Wire fence. 278,130; Dec. 2. Class 13.

Colorado Milling & Elevator Co., The, Denver, Colo., doing business as The Caldwell Flour Mills, Caldwell, Idaho. Self-rising flour. 278,011; Dec. 2; Serial No. 300,927; published Sept. 16, 1930. Class 46.

Columbia Radio Corporation, Chicago, Ill. Radio receiving sets, vacuum or electron tubes, and radiospeakers. 277,890; Dec. 2; Serial No. 304,315; published Sept. 16, 1930. Class 21.

Comet's California Orange Drink Co., Inc., Los Angeles, Calif. Maltless beverage and syrup for making same. 278,075; Dec. 2; Serial No. 303,879; published Sept. 23, 1930. Class 45.

Compact Perfume Inc., New York, N. Y. Perfumes. 278,044; Dec. 2; Serial No. 302,995; published Aug. 26, 1930. Class 6.

Consolidated Pecan Sales Company, Albany, Ga. Nuts. 277,876; Dec. 2; Serial No. 303,047; published Sept. 16, 1930. Class 46.

Consolidated Tea Company, Inc., New York, N. Y. Candy. 277,875; Dec. 2; Serial No. 303,365; published Sept. 16, 1930. Class 46.

Cook, Emma K., St. Louis, Mo. Electric-fan protectors. 278,109; Dec. 2. Class 21.

Curtis Publishing Company, The. (See Stuyvesant Company, The, assignor.)

Curtis Publishing Company, by change of name to The Curtis Publishing Company, Philadelphia, Pa. Illustrated weekly magazine. 81,055; renewed Feb. 28, 1931.

Curtiss Candy Company, The, Chicago, Ill. Candy. 277,872; Dec. 2; Serial No. 303,631; published Sept. 16, 1930. Class 46.

Dallas Co., The, Des Moines, Iowa. Women's and misses' ready-made dresses. 278,120; Dec. 2. Class 39.

Dan Valley Mills, The, Danville, Va. Wheat flour. 277,973; Dec. 2; Serial No. 300,340; published Sept. 23, 1930. Class 46.

Daum, Rogers, Spritzer Co. (See Townsend, E. M., assignor.)

Dayton Spice Mills Company, The, Dayton, Ohio. Roasted coffee. 79,040; renewed Aug. 2, 1930.

Delta Company, Inc., North Chicago, Ill. Automatic stokers, their parts and attachments. 277,991; Dec. 2; Serial No. 303,802; published Sept. 23, 1930. Class 34.

Dempster Mill Manufacturing Company, Beatrice, Nebr. Cistern rings, cistern covers, well castings, and fixed hog waterers. 277,881; Dec. 2; Serial No. 303,468; published Sept. 16, 1930. Class 13.

Dempster Mill Manufacturing Company, Beatrice, Nebr. Windmills and parts thereof, well-drilling machinery, etc. 278,054; Dec. 2; Serial No. 303,467; published Sept. 23, 1930. Class 23.

Denny, Hilborn & Rosenbach (The White Company), assignor to Denny, Hilborn & Rosenbach Inc., Philadelphia, Pa. Painters' materials. 80,581; renewed Jan. 10, 1931.

Derma Way Beauty School. (See Sarnes, Mary A.)

Dicalite Company, The, Torrance, Calif. Diatomaceous-earth materials. 277,916; Dec. 2; Serial No. 302,133; published Sept. 23, 1930. Class 1.

Dice-Count, Inc., Indianapolis, Ind. Game boards. 278,068; Dec. 2; Serial No. 304,369; published Sept. 16, 1930. Class 22.

Di Salvo, Leon, Philadelphia, Pa. Liquid skin cleanser containing alcohol. 278,042; Dec. 2; Serial No. 302,770; published Aug. 26, 1930. Class 6.

Dixon, B. M., doing business as B. D. Medicine Co., Pulaski, Va. Preparation for headache, neuralgia, etc. 277,948; Dec. 2; Serial No. 301,861; published Sept. 16, 1930. Class 6.

Dombcik, Bessie, Cleveland, Ohio. Hardware holders. 278,087; Dec. 2; Serial No. 290,565; published Sept. 16, 1930. Class 13.

Dorsey Printing Co., The, by change of name, to The Dorsey Company, Dallas, Tex. Carbon paper and typewriter ribbons. 79,194; renewed Aug. 16, 1930.

Doxa Watch Factory, Georges Ducommun. (See Ducommun, Georges, assignor.)

Drake Bakeries Incorporated, Brooklyn, N. Y. Cake. 277,983; Dec. 2; Serial No. 304,043; published Sept. 16, 1930. Class 46.

Ducommun, Georges, assignor to Doxa Watch Factory, Georges Ducommun, Le Locle, Switzerland. Watches, watch movements, watch dials, and watchcases. 79,196; renewed Aug. 16, 1930.

Du-Gas Fire Extinguisher Corporation, New York, N. Y. Fire-extinguishing chemicals. 278,057; Dec. 2; Serial No. 303,504; published Sept. 2, 1930. Class 6.

Duncan, William D., to Jennie D. Peltier, doing business as Duncan's Drug Stores, Ottawa, Ill., successor. Medical compounds. 36,131; renewed Mar. 26, 1931.

Du Pont, E. I., de Nemours and Company, Wilmington, Del. Dyes and dyestuffs. 277,938; Dec. 2; Serial No. 303,325; published Sept. 9, 1930. Class 6.

Du Pont, E. I., de Nemours and Company, Wilmington, Del. Intermediate for dyeing processes. 277,939; Dec. 2; Serial No. 303,324; published Sept. 9, 1930. Class 6.

Toilet preparations. Plough, Inc. 278,021; Dec. 2; Serial No. 299,336; published Sept. 9, 1930.
Tonic and blood purifier. P. J. Simashevsky. 278,010; Dec. 2; Serial No. 300,988; published Aug. 26, 1930.
Tonic and blood purifier, General. A. G. Fagras. 277,940; Dec. 2; Serial No. 303,174; published Sept. 16, 1930.
Tonic, Hair. L. Hirtzel. 278,062; Dec. 2; Serial No. 301,440; published Aug. 26, 1930.
Tonic, Liquid general. Bach Laboratories, Inc. 277,944; Dec. 2; Serial No. 302,848; published Sept. 9, 1930.
Tonics, Hair. P. J. Happ. 278,100; Dec. 2; Serial No. 286,327; published Sept. 9, 1930.

CLASS 8

Pipes, Tobacco-smoking. Hirschl & Bendheim. 277,999; Dec. 2; Serial No. 295,676; published Sept. 16, 1930.

CLASS 11

Carbon paper and typewriter ribbons. Dorsey Printing Co. 79,194; renewed Aug. 16, 1930.

CLASS 12

Roofing and building paper. Ruberoid Co. 278,127; Dec. 2.
Roofings, Prepared rubber. Ford Manufacturing Company. 80,275; renewed Nov. 29, 1930.
Stairway, Movable. F. E. Bessler. 80,825; renewed Feb. 7, 1931.
Thermoinsulating material. Gebrüder Mayer Komm.-Ges. 278,009; Dec. 2; Serial No. 293,039; published Sept. 9, 1930.

CLASS 13

Cistern rings and covers, well casings, and fixed hog waterers. Dempster Mill Manufacturing Company. 277,881; Dec. 2; Serial No. 303,468; published Sept. 16, 1930.
Fencing, Wire. Pittsburgh Steel Company. 277,988; Dec. 2; Serial No. 304,343; published Sept. 23, 1930.
Hardware holders. B. Dombcik. 278,087; Dec. 2; Serial No. 290,505; published Sept. 16, 1930.
Metal drains. G. Walton Busch & Sons. 277,907; Dec. 2; Serial No. 303,686; published Sept. 23, 1930.
Rivets. Bendix Service Corporation. 277,891; Dec. 2; Serial No. 304,270; published Sept. 23, 1930.
Wire fence. Colorado Fuel and Iron Company. 278,130; Dec. 2.

CLASS 14

Metal, Antifriction and bearing. Smith-Courtney Company. 35,586; renewed Dec. 11, 1930.
Paints and painters' supplies. Patton Paint Company. 35,818; renewed Jan. 22, 1931.

CLASS 15

Kerosene. Texas Company. 80,879; renewed Feb. 7, 1931.
Kerosene. Texas Company. 81,179; renewed Mar. 7, 1931.
Oils and greases. Indian Refining Company. 278,122; Dec. 2.
Oils, Lubricating. Tide Water Oil Company. 80,390; renewed Dec. 13, 1930.
Oils, Lubricating. Union Oil Company of California. 278,104; Dec. 2; Serial No. 268,716; published Sept. 16, 1930.

CLASS 16

Paint product. F. H. Byrne. 278,103; Dec. 2; Serial No. 300,167; published Sept. 16, 1930.
Paint, Ready-mixed. Patton Paint Company. 81,228; renewed Mar. 14, 1931.
Painters' materials. Denny, Hilborn & Rosenbach (The White Company). 80,581; renewed Jan. 10, 1931.
Paints, Ready-mixed. Rinald Bros. 80,546; renewed Jan. 3, 1931.
Turpentine substitute consisting of benzin. Texas Company. 80,961; renewed Feb. 14, 1931.

CLASS 17

Cigars. House of Crane, Inc. 278,132; Dec. 2.
Cigars. Justin Seubert, Inc. 79,303; renewed Aug. 23, 1930.

CLASS 19

Antiglare shields. O. W. Muenster. 277,896; Dec. 2; Serial No. 304,104; published Sept. 23, 1930.
Flying machines. R. M. Thomson. 278,094; Dec. 2; Serial No. 287,951; published Sept. 23, 1930.
Slip covers, Automobile. Auto-Matic Seat Cover Corporation. 278,001; Dec. 2; Serial No. 295,246; published Sept. 16, 1930.

CLASS 21

Batteries, Storage. Monark Battery Company. 277,906; Dec. 2; Serial No. 303,696; published Sept. 16, 1930.
Batteries, Storage. White Star Refining Company. 277,900; Dec. 2; Serial No. 303,930; published Sept. 16, 1930.
Condensers, Electric. Sprague Specialties Company. 277,908; Dec. 2; Serial No. 303,602; published Sept. 16, 1930.
Electric-fan protectors. E. K. Cook. 278,109; Dec. 2.
Fans, Electric. American Propeller Company. 277,882; Dec. 2; Serial No. 303,248; published Sept. 16, 1930.
Insulating compounds, Electrical. Mica Insulator Company. 277,883; Dec. 2; Serial No. 303,065; published Sept. 16, 1930.
Radio receiving sets. Gray & Danielson Mfg. Co. 277,884; Dec. 2; Serial No. 303,024; published Sept. 16, 1930.
Radio receiving sets, vacuum or electron tubes, and radio-speakers. Columbia Radio Corporation. 277,890; Dec. 2; Serial No. 304,315; published Sept. 16, 1930.
Radiotubes and television tubes. F. A. Schiller, Inc. 277,892; Dec. 2; Serial No. 304,215; published Sept. 16, 1930.
Telephone sets. Kellogg Switchboard & Supply Co. 277,970; Dec. 2; Serial No. 300,352; published Sept. 16, 1930.
Vacuum cleaners, Domestic electric. Clarke Sanding Machine Company. 278,108; Dec. 2.
Wires and cables for electrical use. National Electric Products Corporation. 278,110; Dec. 2.

CLASS 22

Balls and golf clubs, Golf. Professional Golfers' Association of America. 278,036; Dec. 2; Serial No. 296,197; published Sept. 23, 1930.
Balls, Golf. Howard Lux Company. 277,951; Dec. 2; Serial No. 301,108; published Sept. 16, 1930.
Balls, Golf. Miller & West, Inc. 277,950; Dec. 2; Serial No. 301,487; published Sept. 23, 1930.
Balls, Practice golf. M. Fiedler. 278,102; Dec. 2; Serial No. 285,448; published Sept. 16, 1930.

Balls, Rubber play. Independent Druggists' Alliance Distributing Co. 277,902; Dec. 2; Serial No. 303,897; published Sept. 23, 1930.
Fish lures. Wright & McGill Company. 278,080; Dec. 2; Serial No. 283,639; published Sept. 23, 1930.
Fishing lines, hooks, reels, etc. Adolph Blaich, Inc. 278,067; Dec. 2; Serial No. 304,532; published Sept. 23, 1930.
Game boards. Dice-Count, Inc. 278,068; Dec. 2; Serial No. 304,369; published Sept. 16, 1930.
Golf clubs. Schavolite Golf Corporation. 278,066; Dec. 2; Serial No. 304,583; published Sept. 23, 1930.
Golf courses and parts therefor. Miniature Golf Courses, Inc. 278,077; Dec. 2; Serial No. 303,541; published Sept. 16, 1930.
Gut strings. Johnson Suture Corporation. 278,134; Dec. 2.
Radio receiving apparatus. Pilot Radio & Tube Corporation. 278,088; Dec. 2; Serial No. 290,322; published Sept. 16, 1930.
Toys and implements for exercises and sports. C. Kuramochi. 277,969; Dec. 2; Serial No. 302,636; published Sept. 16, 1930.

CLASS 23

Cloth-conditioning apparatus. Parks & Woolson Machine Company. 277,981; Dec. 2; Serial No. 299,618; published Sept. 23, 1930.
Drills. Whitman & Barnes, Inc. 278,039; Dec. 2; Serial No. 302,226; published Sept. 16, 1930.
Fire extinguishers, Stationary automatic. International Fire Equipment Corporation. 278,124; Dec. 2.
Knives of base metal and bone and imitation-bone handles for knives, Bone handle. Novelty Cutlery Company. 278,112; Dec. 2.
Knives, scythes, axes, etc. North Wayne Tool Company. 278,101; Dec. 2; Serial No. 286,380; published Sept. 23, 1930.
Machines. Praktische Maschinen, G. m. b. H. 278,059; Dec. 2; Serial No. 304,144; published Sept. 16, 1930.
Razor blades. International Safety Razor Corp. 277,954; Dec. 2; Serial No. 304,144; published Sept. 16, 1930.
Saws, Fret. J. N. Eberle & Cie. Aktiengesellschaft. 278,037; Dec. 2; Serial No. 296,177; published Sept. 23, 1930.
Vehicular machine, Unitary. Swigert, Hart & Yett, Inc. 277,952; Dec. 2; Serial No. 304,222; published Sept. 16, 1930.
Windmills and parts thereof, well-drilling machinery, etc. Dempster Mill Manufacturing Company. 278,054; Dec. 2; Serial No. 303,467; published Sept. 23, 1930.
Wrenches. Walworth Company. 277,955; Dec. 2; Serial No. 304,079; published Sept. 16, 1930.

CLASS 24

Ironer. Sears, Roebuck and Co. 277,885; Dec. 2; Serial No. 302,488; published Sept. 16, 1930.
Laundry machinery. Lovell Manufacturing Company. 36,237; renewed Apr. 9, 1931.

CLASS 25

Door fasts, latches, transom catches, etc. Yale and Towne Mfg. Co. 277,903; Dec. 2; Serial No. 303,792; published Sept. 16, 1930.

CLASS 26

Binoculars and glasses, Prism. P. E. Valette et Cie. 278,004; Dec. 2; Serial No. 294,822; published Sept. 16, 1930.
Lenses. Optical Service Corporation. 278,082; Dec. 2; Serial No. 281,744; published Sept. 23, 1930.
Thermostats. Electro-Master Company. 278,092; Dec. 2; Serial No. 289,452; published Sept. 16, 1930.

CLASS 27

Watches, watch movements, watch dials, and watchcases. G. Ducommun. 79,196; renewed Aug. 16, 1930.

CLASS 28

Bracelets, straps, attachments, Watch. Pontiac Company. 277,905; Dec. 2; Serial No. 303,725; published Sept. 16, 1930.
Jewelry. Kessler Brothers. 278,125; Dec. 2.
Lockets. Bliss Brothers Company. 79,811; renewed Oct. 11, 1930.
Rings, and mountings therefor, Finger. Benjamin & Edward J. Gross Co. 278,118; Dec. 2.
Silver, flatware. Oneida Community, Limited. 278,126; Dec. 2.

CLASS 31

Filter cloths, cotton discs, filter bags, etc. P. J. Reeve. 278,070; Dec. 2; Serial No. 304,250; published Sept. 23, 1930.
Refrigerators, Food-preserving receptacles for. Republic Stamping & Enameling Co. 277,949; Dec. 2; Serial No. 302,187; published Sept. 16, 1930.

CLASS 32

Furniture. P. Strauss. 278,063; Dec. 2; Serial No. 301,214; published Sept. 16, 1930.
Mattresses. S. Karpen & Bros. 277,975; Dec. 2; Serial No. 300,202; published Sept. 16, 1930.
Tables. Kiel Furniture Co. 277,956; Dec. 2; Serial No. 303,909; published Sept. 23, 1930.
Tables, mirror frames, tea carts, etc., Coffee. Milano Furniture Co. 278,005; Dec. 2; Serial No. 294,817; published Sept. 16, 1930.
Trays and cabinets, Steel filing. Globe-Wernicke Co. 277,953; Dec. 2; Serial No. 304,196; published Sept. 16, 1930.

CLASS 34

Boiler and boiler auxiliaries. Steam and Combustion Company. 277,994; Dec. 2; Serial No. 303,221; published Sept. 16, 1930.
Boilers, House-heating. Pacific Steel Boiler Corporation. 277,989; Dec. 2; Serial No. 304,212; published Sept. 23, 1930.
Heaters and their structural parts, Water. Cleveland Heater Company. 277,982; Dec. 2; Serial No. 299,554; published Sept. 16, 1930.
Heaters, heating systems, central house-heating units, etc., Water. Cleveland Heater Company. 277,996; Dec. 2; Serial No. 301,843; published Sept. 16, 1930.
Heaters, heating systems, central house-heating units, etc., Water. Cleveland Heater Company. 278,018–20; Dec. 2; Serial Nos. 299,373–5; published Sept. 16, 1930.
Heating apparatus. Richmond Stove Company. 35,986; renewed Feb. 26, 1931.
Ignition and control devices. Gas-range burner. Patrol Valve Company. 277,993; Dec. 2; Serial No. 303,383; published Sept. 16, 1930.
Ranges, stoves, and heaters, Gas. Holbrook, Merrill & Stetson, Inc. 277,997; Dec. 2; Serial No. 301,638; published Sept. 16, 1930.
Stokers, their parts and attachments, Automatic. Delta Company. 277,991; Dec. 2; Serial No. 303,802; published Sept. 23, 1930.
Ventilator, blowers, and fans. Hartzell Industries, Inc. 278,022; Dec. 2; Serial No. 298,993; published Sept. 23, 1930.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 2D DAY OF DECEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

A C Spark Plug Company. (See Gustafson, Edwin A., assignor.)
A C Spark Plug Company. (See Helgeby, Ralph O., assignor.)
A C Spark Plug Company. (See Keeney, Don E., assignor.)
A C Spark Plug Company. (See McKinley, Charles W., assignor.)
A C Spark Plug Company. (See Zubaty, Joseph, assignor.)
Abbe, Edward J., assignor to The Elwell-Parker Electric Company, Cleveland, Ohio. Controller. 1,783,763; Dec. 2.
Adams, James R., Hatboro, Pa. Zone-hardening steel articles. 1,783,764; Dec. 2.
Adams, Kempton, Redding Ridge, Conn. Mixer. 1,783,553; Dec. 2.
Adams, Lester V. (See Kienle, R. H., and Adams.)
Adjustable Clamp Company. (See Holman, Harry V., assignor.)
Agfa Ansco Corporation. (See Goldacker, P., and Schmidt, assignors.)
Ainsworth, Harry G., Aurora, Ill. Door-operating mechanism. 1,783,354; Dec. 2.
Air Reduction Company. (See Crowe, John J., assignor.)
Alemite Die Casting & Mfg. Co. (See Guilborg, John S., assignor.)
Allen, Hugh E. (See Carter, E. F., and Allen.)
Allen, Hugh E., Schenectady, N. Y., assignor to General Electric Company. Remote control system. 1,783,820; Dec. 2.
Allen, John L., New Bedford, Mass. Gasket-cutting machine. 1,783,869; Dec. 2.
American Air Filter Company. (See Birkholz, Hans E., assignor.)
American Air Filter Company. (See McConnell, J. R., and Lewis, assignors.)
American Anode Inc. (See Klein, P., and Szegvari, assignors.)
American Brown Boveri Electric Corporation. (See Sindeband, M. L., and Marti, assignors.)
American Engineering Company. (See Harrison, Clifford E., assignor.)
American Manganese Steel Company. (See Watts, James R., assignor.)
American Optical Company. (See Baker, Nelson M., assignor.)
American Smelting and Refining Company. (See Easter, Henry F., assignor.)
American Telephone and Telegraph Company. (See Weaver, Allan, assignor.)
Ames, Adelbert, jr., Tewksbury, Mass. Art of and apparatus for motion-picture photography. 1,783,399; Dec. 2.
Anchor Cap & Closure Corporation. (See Scofield, Edgar, assignor.)
Anderssen, Walter, St. Louis, Mo. Flask supporter. 1,83,765; Dec. 2.
Angier, Clarence V., jr., Atlanta, Ga. Traffic-line marking and stenciling machine. 1,783,689; Dec. 2.
Anzulovic, James V. (See Collins, C. L., and Anzulovic.)
Apple, Vincent G., Dayton, Ohio. Direct-drive electric railway truck. 1,783,269; Dec. 2.
Appler, Abraham B. (See Brown, G., and Appler.)
Arenberg, Albert L., Chicago, Ill. Lamp. Des. 82,648; Dec. 2.
Arenberg, Albert L., Chicago, Ill. Lamp. Des. 82,649; Dec. 2.
Armsbruster, Inc. (See Bradt, Edward L., assignor.)
Askam, Le Roy, Milford, Conn. Windshield clarifier. 1,783,270; Dec. 2.
Asmussen, Heinrich. (See Loebe, W.-W., Ledig, and Asmussen.)
Augenthaler, Friedrich A., Berlin, Germany. Chuck for torsional stresses. 1,783,870; Dec. 2.
Austin, Arthur O., Barberton, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. High-potential installation. 1,783,271; Dec. 2.
Austin, Arthur O., Barberton, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Support for transmission lines. 1,783,272; Dec. 2.
Automatic Packaging Machinery Company. (See Van der Pyl, E., and Stimpson, assignors.)
Aveyard, Charles, Lowell, assignor to Whitin Machine Works, Whitinsville, Mass. Yarn stop motion for twisting machines. 1,783,897; Dec. 2.
B. V. D. Company. (See Ide, Walter D., assignor.)
Babe, William E., assignor to The Pedlar People Limited, Oshawa, Ontario, Canada. Sheet-metal culvert. 1,783,597; Dec. 2.
Bacheldor, William H. (See Wood, W. E., and Bacheldor.)
Backer, Christian B., Brooklyn, N. Y. Electric heating device. 1,783,554; Dec. 2.
Baker, Frederick C., Portland, Oreg. Semiindirect diffusing bowl. Des. 82,715; Dec. 2.
Baker, Nelson M., assignor to American Optical Company, Southbridge, Mass. Guard for an ophthalmic mounting. Des. 82,651; Dec. 2.
Baker, Reginald H., and C. W. Parsons, Aston, Birmingham, England. Electric switch. 1,783,690; Dec. 2.
Baldwin, William E., New York, N. Y. Golf tee. 1,783,211; Dec. 2.
Ball, Charles O., Birmingham, assignor to Yellow Truck and Coach Manufacturing Company, Pontiac, Mich. Window-regulator adjustment. 1,783,933; Dec. 2.
Balloon Rubber Heel Corporation. (See Norwood, Harry G., assignor.)
Balton, James L., Baltimore, Md. Ice-cream cone. Des. 82,650; Dec. 2.
Bamberger, Otto, Duisburg, Germany. Tube-transporting device. 1,783,555; Dec. 2.
Bamford, Frank L., assignor to C. M. Hall Lamp Company, Detroit, Mich. Lamp catch. 1,783,598; Dec. 2.
Banning, Thomas A., jr. (See Shay, Ralph R., assignor.)
Banschbach, Edward A., Madison, Wis. Protector for automobiles. 1,783,934; Dec. 2.
Barbas, Raymond, assignor to La Société Anonyme Jean Patou, Paris, France. Bottle. Des. 82,652; Dec. 2.
Barbas, Raymond, assignor to La Société Anonyme Jean Patou, Paris, France. Bottle. Des. 82,653; Dec. 2.
Barbas, Raymond, assignor to La Société Anonyme Jean Patou, Paris, France. Bottle. Des. 82,716; Dec. 2.
Barber, Howard M., Pawcatuck, Conn., assignor to C. B. Cottrell & Sons Company, Westerly, R. I. Rotary web-printing press. 1,783,766; Dec. 2.
Barber, Howard M., Pawcatuck, Conn., assignor to C. B. Cottrell & Sons Company, Westerly, R. I. Rotary web-printing press. 1,278,767; Dec. 2.
Barclay, William R., and F. Ricks, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Heel-seat-fitting machine. 1,783,212; Dec. 2.
Barker, Galen D., Dowagiac, Mich. Heater control. 1,783,821; Dec. 2.
Barnes, William E., Tarentum, Pa., assignor to Pittsburgh Plate Glass Company. Glass-pot-filling apparatus. 1,783,459; Dec. 2.
Barnett, James W., Spokane, Wash. Doorstop. Des. 82,654; Dec. 2.
Barry, James J., Dartmouth, Nova Scotia, Canada. Brining machine. 1,783,898; Dec. 2.
Barton, Fred C., Schenectady, N. Y., assignor to General Electric Company. Radio receiving apparatus. 1,783,899; Dec. 2.
Bass, Earl E., Fort Mill, S. C., assignor to Draper Corporation, Hopedale, Mass. Shuttle-feeler mechanism for looms. 1,783,768; Dec. 2.
Bastien, Paul, Lansing, Mich., assignor to Bendix Brake Company, Chicago, Ill. Brake-operating mechanism. Re17,888; Dec. 2.
Bates, Mortimer F., assignor, by mesne assignments, to Sperry Gyroscope Company Inc., Brooklyn, N. Y. Bomb sight. 1,783,769; Dec. 2.
Batty, Alfred. (See Boyd, Charles R., assignor.)
Bauer, William J., New York, N. Y. Collapsible table. 1,783,556; Dec. 2.
Baum, Isaac A., Chicago, Ill. Baseboard construction. 1,783,180; Dec. 2.
Bausch & Lomb Optical Company. (See Rayton, Wilbur B., assignor.)
Beach, Ralph H., Belleville, N. J. Carburetor. 1,783,273; Dec. 2.
Beam, Charles C., assignor to United States Glass Company, Pittsburgh, Pa. Pedestal for a goblet or similar article. Des. 82,655; Dec. 2.
Bebry, Percival P., Hyde Park, Boston, Mass., assignor to Englander Spring Bed Company, New York, N. Y. Sliding couch. 1,783,530; Dec. 2.
Bebry, Percival P., Hyde Park, Mass., assignor to Englander Spring Bed Company, New York, N. Y. Sliding spiral-spring bed. 1,783,531; Dec. 2.
Beck, Adolf, and G. Siebel, Bitterfeld, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Improving the resistance to corrosion of articles of magnesium and magnesium alloys. 1,783,770; Dec. 2.
Becker, Franz, Dessau in Anhalt, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Making cellulose esters of both nitric acid and an organic acid. 1,783,771; Dec. 2.
Beckham, Guy F., and C. D. Morgan, Crosbyton, Tex. Furnace-door-carried fuel burner. 1,783,490; Dec. 2.

Beeson, Joseph W., East St. Louis, assignor to J. E. Carson, Belleville, Ill. Coin-controlled vending machine. 1,783,325; Dec. 2.

Behncke, Hermann. (See Marx, K., Behncke, and Brodersen.)

Behrmann, Georg J. K., Rijswijk, assignor to Naamlooze Vennootschap Ingenieurs Kantoor voor Scheepsbouw, The Hague, Netherlands. Submarine boat. 1,783,691; Dec. 2.

Belcher, Robert F., et al. (See Carter, Samuel C., assignor.)

Belden, Albert G. (See Trefethen, C. G., and Belden.)

Bell, Raymond T., assignor to A. O. Smith Corporation, Milwaukee, Wis. Railway grade crossing. 1,783,274; Dec. 2.

Bellam, Joseph E. (See Edmonds, John H., assignor.)

Bendix Brake Company. (See Bastien, Paul, assignor.)

Benner, Harry P. (See Egloff, G., and Benner.)

Benner, Harry P. (See Morrell, J. C., and Benner.)

Bennett, Ashley C., Minneapolis, Minn. Apparatus for supplying fuel oil to furnaces. 1,783,213; Dec. 2.

Bensema, Harm H., Gilman, Ill. Reel. 1,783,692; Dec. 2.

Benson, Walter F., St. Paul, Minn. Desk set. 1,783,772; Dec. 2.

Bergmann, Friedrich. (See Eisenmann, K., and Bergmann.)

Bergmann, Philip, assignor to Columbia Steel Equipment Company, Philadelphia, Pa. Posting tray. 1,783,871; Dec. 2.

Berwin, Alfred G., New York, N. Y. Combined lady's hand bag for umbrellas and pocketbooks. 1,783,275; Dec. 2.

Bethenod, Joseph, Paris, France. Compensating system for amplifiers. 1,783,557; Dec. 2.

Bethlehem Steel Company. (See Kinney, James A., assignor.)

Bicknell, George M., assignor to Carter Carburetor Corporation, St. Louis, Mo. Carburetor. 1,783,214; Dec. 2.

Bilde, Tord E. D., Stockholm, Sweden, assignor to Inventia Patent-Verwertungs-Gesellschaft, Schaffhausen, Switzerland. Surface-treating machine. 1,783,773; Dec. 2.

Bird, Lester F., Schenectady, N. Y., assignor to General Electric Company. Remote-control switching system. 1,783,900; Dec. 2.

Birdsboro Steel Foundry & Machine Company. (See Martin, Mark H., assignor.)

Birkholz, Hans E., Chicago, Ill., assignor, by mesne assignments, to American Air Filter Company, Inc., Louisville, Ky. Automatic resistance-controlled air and gas filter. 1,783,181; Dec. 2.

Black, Starr and Frost. (See Wuyts, Joseph, assignor.)

Blair, Camille C., Los Angeles, Calif. Doll. Des. 82,656; Dec. 2.

Blake, Dennis B. D., assignor of one-half to D. E. Willard, Danville, Ill. Shock absorber. 1,783,599; Dec. 2.

Blake, George H. (See Crowell, S. E., and Blake.)

Blanchard, Berton L., assignor to F. A. Whitney Carriage Company, Leominster, Mass. Baby carriage. 1,783,913; Dec. 2.

Bliss, Howard R., Flushing, N. Y. Sound-controlling ventilating device. 1,783,276; Dec. 2.

Bloch, Max, Frankfort-on-the-Main, Germany. Method and device for removing the hairs from the skin of fells. 1,783,693; Dec. 2.

Block, Joseph, Brooklyn, assignor to Noma Electric Corporation, New York, N. Y. Electrical decorative illuminating device. 1,783,277; Dec. 2.

Blondeau, Howard. (See Canny, J., and Blondeau.)

Blumenberg, Henry, jr., Moapa, Nev. Sulphur composition and making the same. 1,783,695; Dec. 2.

Blumenberg, Henry, jr., Moapa, Nev., and J. H. Blumenberg, Huntington Park, Calif. Producing organic iron compounds and the resulting product. 1,783,694; Dec. 2.

Blumenberg, John H. (See Blumenberg, Henry, jr., and J. H.)

Bock, Carl J., Pontiac, assignor to Yellow Truck & Coach Manufacturing Company, Pontiac, Mich. Brake cross shaft mounting. 1,783,774; Dec. 2.

Bockwitz, Virgil J., Humboldt, Minn. Grain saver. 1,783,400; Dec. 2.

Bodde, Theodore, Niagara Falls, assignor to The Regan Safety Devices Company, Inc., New York, N. Y. Train-control system. 1,783,491; Dec. 2.

Boden, George, assignor to Scovell Manufacturing Company, Waterbury, Conn. Penholder. 1,783,215; Dec. 2.

Bodmer, Albert, assignor to Heberlein & Co., A. G., Wattwil, Switzerland. Dyeing. Re17,894; Dec. 2.

Boehler, Raymond F., jr., Springfield, assignor to The Williams Company, London, Ohio. Steel-wool holder with pad. 1,783,775; Dec. 2.

Boehm, George P., Chicago, Ill. Bath fixture. 1,783,492; Dec. 2.

Boeschel, Frederick, East Rutherford, N. J. Bottle-rinsing machine. 1,783,776; Dec. 2.

Bögemann, Max, Elberfeld, and H. Friedrich, Wiesdor-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Producing vulcanized rubber. 1,783,216; Dec. 2.

Bolard, Alfred J. G., Vernon, assignor to "Rusbol," Société à Responsabilité Limitée, Clichy, France. Automobile jack. 1,783,822; Dec. 2.

Bolton, Becher B., Rosemead, assignor to W. Steen, Brea, Calif. Tile block. Des. 82,657; Dec. 2.

Borton, George W., Philadelphia, Pa., assignor to Pennsylvania Crusher Company, New York, N. Y. Single-roll crusher. 1,783,373; Dec. 2.

Borzykowski, Benno, Paris, France. Washing yarn or threads wound upon spools. 1,783,493; Dec. 2.

Bosch, Robert, Aktiengesellschaft. (See Burkas, Hans, assignor.)

Bosch, Robert, Aktiengesellschaft. (See Lang, Franz, assignor.)

Bothe, Adolph and E., Lansing, Mich. Automatic deep-frying machine. 1,783,696; Dec. 2.

Bothe, Ernest. (See Bothe, Adolph and E.)

Böttner, August, Eltmannshausen, Germany. Window pane. 1,783,326; Dec. 2.

Bottoms, Robert R., assignor to The Girdler Corporation, Louisville, Ky. Separating acidic gases. 1,783,901; Dec. 2.

Boyce Automatic Oil Burner Corporation. (See Gaston, Harry W., assignor.)

Boyd, Charles R., assignor of forty per cent to A. Batty, Marshalltown, Iowa. Shoe stretcher or adjuster. 1,783,600; Dec. 2.

Bradt, Edward L., assignor to Armbruster, Inc., Shreveport, La. Unloading machine. 1,783,823; Dec. 2.

Brady, Charles T., Detroit, Mich. Clamp for examination devices. 1,783,278; Dec. 2.

Brenner, Fred A., Belleville, Ill., assignor to Gretsch & Brenner, Inc., New York, N. Y. Reed for musical instruments. 1,783,824; Dec. 2.

Brewster, Thomas E., Grand Rapids, Mich. Compensating division sheet. 1,783,777; Dec. 2.

Brink, William and G. L. Hess, El Dorado, Ark., assignors to General Oil Products Company. Method and apparatus for cracking oil. 1,783,697; Dec. 2.

Broadwell, Halvor S., and S. T. Thorpe, assignors to The Horton Manufacturing Company, Bristol, Conn. Fishing reel. 1,783,494; Dec. 2.

Brodersen, Karl. (See Marx, K., Behncke, and Brodersen.)

Broge, William F., Detroit, Mich., assignor of one-third to J. Frame. Carburetor. 1,783,217; Dec. 2.

Brooks, Charles P., jr., and S. Kovner, assignors to Standard Modern Printing Co., Inc., Brockton, Mass. Method of and apparatus for finishing the bottoms of boots and shoes. 1,783,401; Dec. 2.

Brooks, Thomas E. (See Olson, C. A., Buch, and Brooks.)

Brooks, Thomas R. (See Patocka, Theodore, assignor.)

Brost, Henry, Medford, Wis. Brake adjuster. 1,783,902; Dec. 2.

Brotz, Frank G., assignor to Kohler Company, Kohler, Wis. Pop-up waste. 1,783,460; Dec. 2.

Brown Company. (See Schur, M. O., and Rasch, assignors.)

Brown, George, Oneota, and A. B. Appler, Albany, N. Y. Crank pin and collar. 1,783,825; Dec. 2.

Brown, Hugh C., Asheville, N. C. Coffee table. Des. 82,658; Dec. 2.

Brown, William E., Los Angeles, Calif. Folding support. 1,783,558; Dec. 2.

Brownback, Henry L., Norristown, Pa. Crank-pin bearing for connecting-rod assemblies. 1,783,698; Dec. 2.

Bryant, Louis O. (See Denmark, A. C., and Bryant.)

Buch, Frederick L. (See Olson, C. A., Buch, and Brooks.)

Buck, William H. (See Morris, C., and Buck.)

Builders Iron Foundry. (See Kent, W. G., and Hovenden, assignors.)

Bunch, Walter R., Los Angeles, Calif. Back filler. 1,783,941; Dec. 2.

Burdsall, Richard L., assignor to Russell, Burdsall & Ward Bolt & Nut Company, Port Chester, N. Y. Machine for assemblying nuts. 1,783,218; Dec. 2.

Burgess, Ira W., Minden, W. Va. Electric switch. 1,783,903; Dec. 2.

Burkas, Hans, Tubingen, assignor to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Circuit breaker for ignition installations of internal-combustion engines. 1,783,495; Dec. 2.

Burke, Robert J., assignor to Lincoln Scale Corporation, Latrobe, Pa. Rack-rod assembly for scales. 1,783,826; Dec. 2.

Burnham, George A., Saugus, assignor to Condit Electrical Manufacturing Corporation, South Boston, Mass. Circuit interrupter. 1,783,279; Dec. 2.

Burton, Charles S., Oak Park, Ill. Fuel-feeding device. 1,783,374; Dec. 2.

Bushnell, James E., North Plainfield, assignor to Ransome Concrete Machinery Company, Plainfield, N. J. Loading device for concrete mixers. 1,783,532; Dec. 2.

Butcher, George C., Parkersburg, W. Va. Poultry killer. 1,783,699; Dec. 2.

Butler, Willard J., Cincinnati, Ohio. Program device for player musical instruments and program strip therefor. 1,783,375; Dec. 2.

Button, George W., Corporation. (See Sierad, Milton, assignor.)

Byington, James A., Orlando, Fla. Fruit-grading table. 1,783,700; Dec. 2.

Cahoon, Edward E., assignor to Racine Confectioners' Machinery Company, Racine, Wis. Chocolate-molding machine. 1,783,402; Dec. 2.

Callis, D. M., et al. (See Carter, Samuel C., assignor.)

Camco Scale Corporation. (See Chambers, Leverett D., assignor.)

Cameron, William J., Chicago, Ill. Optical instrument. 1,783,461; Dec. 2.

Candee, Zenas P., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Connection. 1,783,403; Dec. 2.

Candee, Zenas P., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Gauging mechanism. 1,783,404; Dec. 2.

Canny, James, and H. Blondeau, Seattle, Wash. Tube-flanging wrench. 1,783,639; Dec. 2.

Card Display Inc. (See O'Rourke, Tex, assignor.)

Carlson, John W., assignor to Hedman Manufacturing Company, Chicago, Ill. Check protector. 1,783,182; Dec. 2.

Carlson, John W., assignor to The Hedman Manufacturing Company, Chicago, Ill. Check protector. 1,783,219; Dec. 2.

Carlsson, Carl V., Upplands-Vasby, Sweden. Cooking apparatus. 1,783,601; Dec. 2.

Carr, Charles W., Meadow Grove, Nebr. Valve-spring lifter. 1,783,827; Dec. 2.

Carson, John E. (See Beeson, Joseph W., assignor.)

Carter Carburetor Corporation. (See Bicknell, George M., assignor.)

Carter, Emmett F., and H. E. Allen, Schenectady, N. Y., assignors to General Electric Company. System of distribution. 1,783,904; Dec. 2.

Carter, Samuel C., assignor of thirty-five per cent to R. F. Belcher, Los Angeles, twenty per cent to W. H. Maxwell, Beverly Hills, and ten per cent to D. M. Callis, Long Beach, Calif. Power transmission. 1,783,533; Dec. 2.

Celander, Philip A., assignor to Williams Oil-O-Matic Heating Corporation, Bloomington, Ill. Liquid-fuel-burning device for domestic purposes. 1,783,405; Dec. 2.

Celanese Corporation of America. (See Dreyfus, C., and Schneider, assignors.)

Celanese Corporation of America. (See Ellis, G. H., Olpin, and Walker, assignors.)

Chamberlain, George L., Chicago, Ill. Multiple connecting device. 1,783,220; Dec. 2.

Chambers, Laura A., St. Louis, Mo. Hospital appliance. 1,783,640; Dec. 2.

Chambers, Leverett D., assignor to Camco Scale Corporation, New York, N. Y. Weighing-scale casing. Des. 82,659; Dec. 2.

Chardard, Jean B. D. L., Paris, France, assignor to Risler Corporation of America, Kansas City, Mo. Portable heat-exchanging apparatus. 1,783,355; Dec. 2.

Chase, Elroy A., Northfield, assignor to Rock of Ages Corporation, Burlington, Vt. Producing an ornamental surface on granite. 1,783,828; Dec. 2.

Cheatham Electric Switching Device Co. et al. (See Richterkessing, Frank H., assignor.)

Chicago Steel and Wire Company. (See Green, J. Birchard, assignor.)

Cihulas, Stephen E., Bridgeport, Conn. Ventilator. 1,783,406; Dec. 2.

Clark, John M., New York, N. Y. Emergency feeder device for submarines. 1,783,221; Dec. 2.

Clemons, Harry K., St. Paul, Minn. Excavating, elevating, and loading machine. 1,783,462; Dec. 2.

Cleveland Rock Drill Company, The. (See Renfer, John E., assignor.)

Cleveland Rock Drill Company, The. (See Richardson, Led L., assignor.)

Clizbe, Floyd O., Chicago, Ill. Electromagnetic brake. 1,783,280; Dec. 2.

Coffman, S. M., et al. (See Reed, Andrew H., assignor.)

Cohn & Rosenberger, Inc. (See Dauer, Ernest I., assignor.)

Cohn & Rosenberger, Inc. (See Marcher, Royal, assignor.)

Collins, Charles L., and J. V. Anzulovic, Omaha, Nebr. Adjustable slicing machine. 1,783,222; Dec. 2.

Colman, Howard D. (See Stewart, Duncan J., assignor.)

Columbia Ribbon & Carbon Manufacturing Company. (See Dixon, Harold W. A., assignor.)

Columbia Steel Equipment Company. (See Bergmann, Philip, assignor.)

Columbus Phonograph Company. (See Prescott, John O., assignor.)

Commercial Shearing and Stamping Company, The. (See Proctor, Robert V., assignor.)

Commonwealth Electric Company, The. (See Schorr, P. C., and Syring, assignors.)

Condit Electrical Manufacturing Corporation. (See Burnham, George A., assignor.)

Cone, James H., Rosiland, N. J., assignor to Westinghouse Electric & Manufacturing Company. Electrical measuring instrument. 1,783,559; Dec. 2.

Conley, Annie, Eau Claire, Wis. Liquid cooler. 1,783,641; Dec. 2.

Conn, Robert W. (See Ferguson, J. E., Conn, and Hoffman.)

Connolly, Michael M., Sherman, Calif. Roof paint. 1,783,702; Dec. 2.

Conover Company, The. (See Watt, E. D., and Conover, assignors.)

Conover, George W. (See Watt, E. D., and Conover.)

Conway, Irvin M., and T. M. Lawson, assignors to Journal-Box Servicing Corporation, Indianapolis, Ind. Machine for cleaning journal-box waste. 1,783,407; Dec. 2.

Cook, Herbert R., assignor to Jefferson Electric Company, Chicago, Ill. Conduit clamp for an outlet box. 1,783,356; Dec. 2.

Cook, Herbert R., assignor to Jefferson Electric Company, Chicago, Ill. Universal clamp for outlet boxes. 1,783,408; Dec. 2.

Cook, Herbert R., assignor to Jefferson Electric Company, Chicago, Ill. Combined conduit clamping and bushing device. 1,783,409; Dec. 2.

Cook, Walter M., Ludlow, Vt., assignor to International Combustion Engineering Corporation, New York, N. Y. Mechanical separator. 1,783,357; Dec. 2.

Cooke, Thomas S., and J. E. Rouse, Casper, Wyo., assignors to Standard Oil Company, Whiting, Ind. Storage of oils. 1,783,701; Dec. 2.

Copell, Daniel, Atlantic City, N. J. Burglarproof lock. 1,783,905; Dec. 2.

Cortese, Nicholas. (See Richards, J., and Cortese.)

Cottrell, C. B., & Sons Company. (See Barber, Howard M., assignor.)

Cowell, Robert F., Teaneck, N. J., assignor to International Motor Company, New York, N. Y. Shock-insulated union and pipe strap. 1,783,410; Dec. 2.

Cox, James D., Cape May, N. J. Potato-grading machine. 1,783,496; Dec. 2.

Cox, Julian H., Newton, Mass., assignor to The Mechanical Rubber Company. Valve. 1,783,281; Dec. 2.

Crawford, William E., Wauwatosa, assignor to A. O. Smith Corporation, Milwaukee, Wis. Electrically welding tubular articles. 1,783,411; Dec. 2.

Crites, Joe, and W. A. Koren, Evanston, assignors to The Raymond Brothers Impact Pulverizer Co., Chicago, Ill. Automatic temperature control in pulverizing mills. 1,783,358; Dec. 2.

Crowe, John J., Westfield, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Method and apparatus for testing cylinders. 1,783,412; Dec. 2.

Crowell, Sarah E., and G. H. Blake, New York, N. Y. Bookcase. 1,783,703; Dec. 2.

Crowley, John C., Cleveland Heights, assignor to The Dill Manufacturing Company, Cleveland, Ohio. Valve insides. 1,783,327; Dec. 2.

Cummings, James D., Houston, Tex. Attachment for tractors. 1,783,282; Dec. 2.

Curtis, John C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Valve for rock drills 1,783,829; Dec. 2.

Cuthbert, William R. (See Sheaffer, W. A., and Cuthbert.)

Cutler-Hammer, Inc. (See Meuer, George J., assignor.)

Cutler-Hammer Inc. (See Seeger, Edwin W., assignor.

Cutler-Hammer, Inc. (See Tregoning, William C., assignor.)

Cypress Novelty Corporation et al. (See Reisert, Mathias, assignor.)

Dalton, Nelson W., Bath, assignor of three-fourths to Pequod Realty Corporation, New York, N. Y. Aerofoil construction. 1,783,413; Dec. 2.

Damelio, Joseph, Youngstown, Ohio. Flowerpot holder. Des. 82,660; Dec. 2.

Damron, Milton H., Long Beach, Calif. Vaginal speculum. 1,783,602; Dec. 2.

Daniels, Joseph S., assignor to Daniels Manufacturing Company, Rhinelander, Wis. Dispensing device. 1,783,414; Dec. 2.

Daniels Manufacturing Company. (See Daniels, Joseph S., assignor.)

Darche, Albert A. A., Algiers, Algeria. Antiexplosive means with great turbulence for explosion motors. 1,783,603; Dec. 2.

Darqué, Etienne, Clichy, France. Machine for opening tins of canned goods. 1,783,534; Dec. 2.

Dauer, Ernest I., Providence, R. I., assignor to Cohn & Rosenberger, Inc., New York, N. Y. Ornamental device. 1,783,223; Dec. 2.

Davidson, Arthur P., Odessa, Tex. Lifting device for motor vehicles. 1,783,224; Dec. 2.

Davidson, William D., assignor to Emsco Derrick & Equipment Company, Los Angeles, Calif. Crown block. 1,783,328; Dec. 2.

Davidson, William D., assignor to Emsco Derrick & Equipment Company, Los Angeles, Calif. Draw works for use with hild drives. 1,783,914; Dec. 2.

De Freece, G. A. (See Doss, Jesse L., assignor.)

Dezener, Gustave O., Brooklyn, N. Y., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,783,604; Dec. 2.

Dehle, Otto T., Watertown, assignor to Mult-Hydro Washing Machine Company, Boston, Mass. Washing machine. 1,783,415; Dec. 2.

De La Mare, Albert, San Francisco, Calif. Fire truck. Des. 82,661; Dec. 2.

Della, Ernest, assignor to Walter J. McGuigan, Rochester, N. Y. Pipe. 1,783,605; Dec. 2.

De Lore, Casper P., and B. B. McHan, St. Louis, Mo.; said McHan assignor to said De Lore. Treating barytes. 1,783,778; Dec. 2.

Demeur, Emanuel. (See Karabatsos, Peter N., assignor.)

Deming Company, The. (See Mueller, Alexander V., assignor.)

Demuth, Wm., & Co. (See Hutcheson, Ray R., assignor.)

Denmark, Albert C., and L. O. Bryant, Austin, Tex. Kitchen utensil. 1,783,830; Dec. 2.

Denney, William F. (See Miller, Felix B., assignor.)

Detroit Steel Products Company. (See Loucks, James F., assignor.)

De Witt, William J., assignor to Shoe Form Co., Inc., Auburn, N. Y. Process of and apparatus for molding hollow lasts. 1,783,915; Dec. 2.

Dibble, Claude M., assignor to Moore Brothers Company, Joliet, Ill. Broiler. 1,783,183; Dec. 2.

Dicks, Thomas A., assignor, by mesne assignments, to Pittsburgh Screw & Bolt Company, Pittsburgh, Pa. Propeller. 1,783,225; Dec. 2.
Dictaphone Corporation. (See King, Henry J., assignor.)
Dictaphone Corporation. (See Worrell, Howard S., assignor.)
Dill Manufacturing Company, The. (See Crowley, John C., assignor.)
Dixon, Harold W. A., Hollis, N. Y., assignor to Columbia Ribbon & Carbon Manufacturing Company, Inc., Glen Cove, Long Island. Wrapping machine. 1,783,226; Dec. 2.
Dockstader, De Witt, Johnston, N. Y. Device for measuring the inseams of men's trousers and height of waistbands. 1,783,906; Dec. 2.
Domkee, John H., assignor to The Wire Novelty Manufacturing Co., West Haven, Conn. Button loop. 1,783,497; Dec. 2.
Dorneth, Julius, Berlin-Konradshohe, assignor to the firm Typograph-Gesellschaft m. b. H., Berlin, Germany. Matrix-setting and type-line-casting machine. 1,783,704; Dec. 2.
Dornier, Claudius, assignor to the firm: Dornier-Metalbauten G. m. b. H., Friedrichshafen-on-the-Bodensee, Germany. Starting of large flying machines. 1,783,227; Dec. 2.
Dornier-Metalbauten G. m. b. H. (See Dornier, Claudius, assignor.)
Doss, Jesse L., Evanston, assignor of forty-eight per cent to G. A. De Freece, Midwest, Wyo. Tire chain. 1,783,872; Dec. 2.
Dos Santos, Roal, Honolulu, Hawaii. Merry-go-round. 1,783,586; Dec. 2.
Dovel, G. P. (See Dovel, James P., assignor.)
Dovel, James P., Birmingham, Ala., assignor to G. P. Dovel. Blast furnace. 1,783,416; Dec. 2.
Downie, Robert R., assignor to Keystone Driller Company, Beaver Falls, Pa. Excavator scoop. 1,783,831; Dec. 2.
Draper, Clare H., assignor to Draper Corporation, Hopedale, Mass. Let-off mechanism for looms. 1,783,779; Dec. 2.
Draper Corporation. (See Bass, Earl E., assignor.)
Draper Corporation. (See Draper, Clare H., assignor.)
Draper Corporation. (See Kearsley, Richard A., assignor.)
Draper Corporation. (See O'Brien, Patrick F., assignor.)
Dreyfus, Camille, New York, N. Y. Printing fabrics. 1,783,606; Dec. 2.
Dreyfus, Camille, New York, N. Y., and G. Schneider, Cumberland, Md., assignors to Celanese Corporation of America. Treating cellulose material. 1,783,184; Dec. 2.
Dreyfus, Henry, London, England. Coloration of materials made of or containing cellulose derivatives. 1,783,607; Dec. 2.
Drissner, Alfred E. (See Petsche, G. B., and Drissner.)
Dryden, Harry R., Pittsburgh, Pa. Safety holding device for flash lights. 1,783,874; Dec. 2.
Dubbs, Carbon P., Wilmette, assignor to Universal Oil Products Company, Chicago, Ill. Apparatus for producing lower-boiling-point hydrocarbons. 1,783,185; Dec. 2.
Dubbs, Carbon P., Wilmette, assignor to Universal Oil Products Company, Chicago, Ill. Cracking petroleum oil. 1,783,228; Dec. 2.
Dubbs, Carbon P., Wilmette, assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for treating oils. 1,783,229; Dec. 2.
Duff, Charles L., Columbus, Ohio. Exercising machine. 1,783,376; Dec. 2.
Duff, James G. (See Rehwold, W. C., and Duff.)
Duncan, Thomas P., jr., Newport News, Va. Furniture caster. 1,783,873; Dec. 2.
Dunham, George W., assignor to Whirldry Corporation, New Haven, Conn. Laundry machine. 1,783,186; Dec. 2.
Du Pont, E. I. de Nemours & Company. (See Engelmann, Max, assignor.)
Du Pont, E. I., de Nemours & Company. (See Woodbury, Clifford A., assignor.)
Durgin, Charles B., A. B. Gerber, Anniston, Ala., and P. Logue, St. Louis, Mo., assignors, by mesne assignments, to Swann Research, Inc., Birmingham, Ala. White anhydrous calcium sulphate and producing same. 1,783,417; Dec. 2.
Dyeing Processes Corporation. (See Hebden, John C., assignor.)
Dyer, Frank L., New York, N. Y. Making phonograph records. 1,783,498; Dec. 2.
Eastburn, Samuel L., Sloatsburg, assignor to Ramapo Ajax Corporation, New York, N. Y. Switch stand. 1,783,283; Dec. 2.
Easter, Henry F., Hayden, Ariz., assignor to American Smelting and Refining Company, New York, N. Y. Furnace cooling by steam. 1,783,284; Dec. 2.
Ecker, Mathilda. (See Mandy, James, assignor.)
Eclipse Petrol Economiser System Company, The. (See Godward, Ernest R., assignor.)
Edmonds, John H., assignor of one-third to J. E. Bellam, Seattle, Wash. Valve. 1,783,329; Dec. 2.
Edwards, Harold. (See Finnegan, H. L., and Lanham, assignors.)
Edwards, Harold C., Kansas City, Mo. Radiocabinet or similar article. Des. 82,662; Dec. 2.
Edwards, William W., Los Angeles, Calif. Saw guide. 1,783,330; Dec. 2.
Efcolite Corporation. (See von Nessen, Walter, assignor.)
Egloff, Gustav, and H. P. Benner, assignors to Universal Oil Products Company, Chicago, Ill. Cracking resins. 1,783,230; Dec. 2.
Egloff, Gustav, and J. C. Morrell, assignors to Universal Oil Products Company, Chicago, Ill. Converting petroleum oil. 1,783,231; Dec. 2.
Ehrenfeld, Ralph, Springfield, Mass., assignor to Westinghouse Electric & Manufacturing Company. Lubricating device. 1,783,535; Dec. 2.
Eight Wheel Motor Vehicle Company, The. (See Fageol, Rollie B., assignor.)
Eilers, Frank B., Fort Wayne, Ind., assignor to Tokheim Oil Tank and Pump Company. Liquid-dispensing apparatus. 1,783,916; Dec. 2.
Eisenmann, Karl, Ludwigshafen-on-the-Rhine, and F. Bergmann, Mannheim, assignors to I. G. Farbenindustrie Aktinegesellschaft, Frankfort-on-the-Main, Germany. Magnetic core. 1,783,560; Dec. 2.
Eisenmann, Karl, Ludwigshafen-on-the-Rhine, and F. Bergmann, Mannheim, assignors to I. G. Farbenindustrie Aklengesellschaft, Frankfort-on-the-Main, Germany. Production of improved magnetic cores. 1,783,561; Dec. 2.
Ellerbusch, Hermann, Dortmund-Eving, Germany. Internal-combustion engine. 1,783,499; Dec. 2.
Elliott, Charles W., Seymour, Ind. Wood-bending machine. 1,783,187; Dec. 2.
Ellis, George H., H. C. Olpin, and E. E. Walker, Spondon, near Derby, England, assignors to Celanese Corporation of America. Treatment of fabrics. 1,783,608; Dec. 2.
Ellis, Paul W., Clearwater, Fla. Punctureproof legging. 1,783,832; Dec. 2.
Elms, John D., St. George, assignor, by mesne assignments, to Felms Revo Corporation, New York, N. Y. Motion-picture camera. 1,783,463; Dec. 2.
Elsner, Alois, Brunn, Czechoslovakia. Nonslip device for use with skis. 1,783,833; Dec. 2.
Elwell-Parker Electric Company, The. (See Abbe, Edward J., assignor.)
Ely & Walker Dry Goods Company. (See Irwin, Carl C., assignor.)
Emerson, George H., and J. T. Tatum, Baltimore, Md. Railway-car wheel. 1,783,705; Dec. 2.
Emsco Derrick & Equipment Company. (See Davidson, William D., assignor.)
Emsco Derrick & Equipment Company. (See Gunn, R. W., and Thompson, assignors.)
Engelmann, Max, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Making disinfectant compositions. 1,783,377; Dec. 2.
Englander Spring Bed Company. (See Bebry, Percival P., assignor.)
Erie City Iron Works. (See Kaemmerling, Gustav H., assignor.)
Ernst, Alfred F. (See La Mont, W. D., and Ernst.)
Errett, Albert J., and C. P. Pesek, assignors to Hen Houses, Inc., Minneapolis, Minn. Restaurant building. Des. 82,663; Dec. 2.
Evans, Amos J., Minneapolis, Minn. Driving-gear mechanism for motor vehicles. 1,783,780; Dec. 2.
Everett, Edward A., Long Island City, N. Y. Insulation block for electric terminals. Des. 82,664; Dec. 2.
Everett, William H. H., Newton Falls, Ohio. Vehicle sanding device. 1,783,834; Dec. 2.
Excel Magneto Co. (See Reis, Curt F., assignor.)
Eyre, Joseph R., Hull, England. Pressure-reducing valve. 1,783,506; Dec. 2.
Fageol, Rollie B., Los Angeles, assignor to The Eight Wheel Motor Vehicle Company, San Francisco, Calif. Road vehicle. Re17,889; Dec. 2.
Fahrney, Emery H., Chicago, Ill. Propelling mechanism for boats. 1,783,331; Dec. 2.
Falk, Edward H., Philadelphia, Pa. Air preheater for manifolds. 1,783,781; Dec. 2.
Farbwerke Vorm, Meister Lucius and Bruning. (See Rössner, H. Steindorff, and Pfaff, assignors.)
Faries Manufacturing Company. (See Peters, Henry M., assignor.)
Farrand, Harry M., Los Angeles, Calif. Combined radio receiver cabinet and clock. Des. 82,665; Dec. 2.
Farrel-Birmingham Company. (See Schnuck, Carl F., assignor.)
Felms Revo Corporation. (See Elms, John D., assignor.)
Fenton, Elmer B., and W. C. Fenton, Cedar Rapids, Iowa. Curtain stretcher. 1,783,835; Dec. 2.
Fenton, Wilbur C. (See Fenton, Elmer B. and W. C.)
Ferdinand, Louis, Drifton, Pa. Bumper. 1,783,875; Dec. 2.
Ferguson, John E., Bloomfield, N. J., assignor to Westinghouse Lamp Company. Base-pin-staking machine. 1,783,706; Dec. 2.
Ferguson, John E., Bloomfield, R. W. Conn, Vauxhall, and W. A. Hoffman, Bloomfield, N. J., assignors to Westinghouse Lamp Company. Automatic soldering machine. 1,783,642; Dec. 2.
Ferris, William D., assignor to Frantz Manufacturing Co., Sterling, Ill. Garage-door construction. 1,783,378; Dec. 2.
Ferris, William S., Elkhart, Ind., and E. C. Harter, Sturgis, Mich. Chair. Des. 82,666; Dec. 2.
Fidler, Harry E. (See Tenney, P. L., and Fidler.)

Field, Edward A., jr. (See Field, Edward A., and E. A., jr.)
Field, Edward A. and E. A., jr., Chicago, Ill. Draft stabilizer. 1,783,418; Dec. 2.
Fiesselmann, Frederich. (See Tweddell, Oscar G., assignor.)
Finlayson, Frank E., Schenectady, N. Y., assignor to General Electric Company. Sewing machine. 1,783,836; Dec. 2.
Finn, Sidney J., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Washer-loading device. 1,783,232; Dec. 2.
Finn, Sidney J., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Washer-loading device. 1,783,233; Dec. 2.
Finnegan, Herman L., and P. O. Lanham, assignors to H. Edwards, Kansas City, Mo. Radiocabinet or similar article. Des. 82,667; Dec. 2.
Fireproof Wall Company. (See Makowski, John F., assignor.)
Firestone, Floyd, assignor to The Regents of the University of Michigan, Ann Arbor, Mich. Electrical apparatus. 1,783,234; Dec. 2.
Fischer, Ernst. (See Thiess, K., and Fischer.)
Fitch, Fred W., Des Moines, Iowa. Dispenser-charge-regulating device. 1,783,419; Dec. 2.
Fitz-Empire Double Pivot Last Company. (See Lucas, Harry W., assignor.)
Fitz-Empire Double Pivot Last Company. (See Thomas, George C., assignor.)
Fleer, Harry H., Quincy, assignor to Orbon Stove Co., Belleville, Ill. Stove. Des. 82,668; Dec. 2.
Floding, W. E., Company, The. (See Shaw, Thomas E., assignor.)
Floyd, Ray H., assignor to Unique Spark Plug Cleaner Co., Chicago, Ill. Slack-take-up device. 1,783,359; Dec. 2.
Flynn, Charles C., Detroit, Mich. Sound amplifier. 1,783,360; Dec. 2.
Follain, Raoul F., Colombes, assignor to Société Anonyme pour l'Exploitation des Procédés Maurice Leblanc-Vickers, Paris, France. Refrigerating machine. 1,783,464; Dec. 2.
Forbstein, Bessie G., Los Angeles, Calif. Meter for sewing machines. 1,783,562; Dec. 2.
Ford, Henry, assignor to Ford Motor Company, Dearborn, Mich. Automobile ventilating construction. 1,783,501; Dec. 2.
Ford Motor Company. (See Ford, Henry, assignor.)
Ford Motor Company. (See Sheldrick, Laurence S., assignor.)
Forshee, Frank F., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Door catch. 1,783,563; Dec. 2.
Forssell, Carl, Stockholm, Sweden. Carcass for buildings. 1,783,609; Dec. 2.
Forster, Percy M., Berkeley, Calif. Dental gas burner. Des. 82,669; Dec. 2.
Fort Wayne Engineering and Manufacturing Company. (See Tannehill, Vernon L., assignor.)
Foster Machine Company. (See McKean, John O., assignor.)
Fox, John H., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Fluid-cooled roll. 1,783,465; Dec. 2.
Frame, John. (See Broge, William F., assignor.)
Franklin Simon & Company. (See Long, Dorothy, assignor.)
Frantz Manufacturing Co. (See Ferris, William D., assignor.)
Freiburghouse, Edward H., Schenectady, N. Y., assignor to General Electric Company. High-voltage apparatus. 1,783,837; Dec. 2.
Freund, Herman R., assignor to Intertype Corporation, Brooklyn, N. Y. Punching matrices. 1,783,838; Dec. 2.
Frick, George W., Baltimore, Md. Refrigerator-door frame. 1,783,235; Dec. 2.
Friedmann, Firm of Alex. (See Hajek, Otto, assignor.)
Friedrich, Hermann. (See Bögemann, M., and Friedrich.)
Friend, Robert O., Chicago, Ill. Construction of zeolite water softeners. 1,783,466; Dec. 2.
Frischke, Max. (See Schulz, W., Frischke, and Schiffmann.)
Fry, William H., Kansas City, Mo. Attachment for porch swings. 1,783,502; Dec. 2.
Gaire, Paul E., New York, N. Y. Hair-treating machine. 1,783,610; Dec. 2.
Gelassi, Pasquale, New York, N. Y. Compound floor strip. 1,783,782; Dec. 2.
Gammeter, John R. (See MacDonald, Frank J., assignor.)
Gamon, Ernest E., Prince Bay, N. Y. Water meter. 1,783,707; Dec. 2.
Garcia, Gaspar, Habana, Cuba. Hinged rack. 1,783,708; Dec. 2.
Garey, Charles Q., Windsor, Vt., assignor to The National Acme Company, Cleveland, Ohio. Chuck-operating mechanism for automatic spindle screw machines. 1,783,565; Dec. 2.
Garey, Charles Q., Windsor, Vt., assignor to The National Acme Company, Cleveland, Ohio. Spindle-stopping mechanism for metal-working machines. 1,783,566; Dec. 2.
Garno, George E., assignor to The Heald Machine Company, Worcester, Mass. Chuck. 1,783,420; Dec. 2.
Garrett, Edmund A., Brightwaters, assignor of one-half to F. C. Schwab, Mount Vernon, N. Y. Gas generating and burning apparatus. 1,783,564; Dec. 2.
Garrett, Milan W., Bloomfield, N. J., assignor to Westinghouse Lamp Company. Ultra-violet lamp. 1,783,643; Dec. 2.
Gasmesserfabrik Mainz, Elster & Co. (See Meyer, Georg, assignor.)
Gaston, Harry W., New Rochelle, assignor to Boyce Automatic Oil Burner Corporation, New York, N. Y. Oil-burner construction. 1,783,567; Dec. 2.
Gauvin, Henri, Ottawa, Ontario, Canada. Roof covering. 1,783,839; Dec. 2.
General Aniline Works, Inc. (See Lüttringhaus, A., and Kačer, assignors.)
General Aniline Works, Inc. (See Schmidt, M. P., and Limpach, assignors.)
General Aniline Works, Inc. (See Thiess, K., and Fischer, assignors.)
General Electric Company. (See Allen, Hugh E., assignor.)
General Electric Company. (See Barton, Fred C., assignor.)
General Electric Company. (See Bird, Lester F., assignor.)
General Electric Company. (See Carter, E. F., and Allen, assignors.)
General Electric Company. (See Finlayson, Frank E., assignor.)
General Electric Company. (See Freiburghouse, Edward H., assignor.)
General Electric Company. (See Halvorson, Cromwell A. B., assignor.)
General Electric Company. (See Kienle, R. H., and Adams, assignors.)
General Electric Company. (See Lennox, Thomas C., assignor.)
General Electric Company. (See Loebe, W.-W., Ledig, and Asmussen, assignors.)
General Electric Company. (See Tritle, John F., assignor.)
General Electric Company. (See Wright, James G. E., assignor.)
General Motors Corporation (See Kettering, Charles F., assignor.)
General Motors Corporation. (See King, Clarence E., assignor.)
General Motors Corporation. (See Kjellberg, Anders W., assignor.)
General Motors Corporation. (See Landers, Charles H., assignor.)
General Motors Corporation. (See Sterling, Claude H., assignor.)
General Motors Corporation. (See Stranahan, Samuel A., assignor.)
General Motors Corporation. (See Tenney, P. L., and Fidler, assignors.)
General Motors Corporation. (See Trumble, John T., assignor.)
General Motors Research Corporation. (See Mougey, Harry C., assignor.)
General Motors Research Corporation. (See Sterling, Claude H., assignor.)
General Oil Products Company. (See Brink, W., and Hess, assignors.)
George, James S., and R. S. Sperry, assignors to Scovill Manufacturing Company, Waterbury, Conn. Coating metal articles. 1,783,188; Dec. 2.
Gerber, Arthur B. (See Durgin, C. B., Gerber, and Logue.)
Gesellschaft für Drahtlose Telegraphie, m. b. H. (See Meissner, Alexander, assignor.)
Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Electric switch. 1,783,421; Dec. 2.
Geyer, Benjamin F., and R. J. Jauch, assignors to Wayne Company, Fort Wayne, Ind. Visible flow indicator. 1,783,644; Dec. 2.
Gibson, George H. D., Ottawa, Ontario, Canada. Music-instruction device. 1,783,361; Dec. 2.
Gilbert & Barker Manufacturing Company. (See Jacob, Herman A., assignor.)
Gilbert, George L., Lakewood, Ohio. Combined radio and phonograph cabinet. Des. 82,717; Dec. 2.
Girdler Corporation, The. (See Bottoms, Robert R., assignor.)
Godward, Ernest R., New York, N. Y., assignor to The Eclipse Petrol Economiser System Company, Limited, Christchurch, New Zealand. Auxiliary heater and vaporizer. 1,783,536; Dec. 2.
Goeller, Lawrence E., Circleville, Ohio. Necktie holder. 1,783,840; Dec. 2.
Gohring, Herman C., Estacada, Oreg. Pump. 1,783,611; Dec. 2.
Goldacker, Paul, and M. Schmidt, Dessau in Anhalt, Germany, assignors, by mesne assignments, to Agfa Ansco Corporation, Binghamton, N. Y. X-ray dental film package. 1,783,467; Dec. 2.
Goldberg, Sifton A., Brooklyn, N. Y. Garment hanger. 1,783,709; Dec. 2.
Goldberg, Solomon H., assignor to The Hump Hairpin Manufacturing Co., Chicago, Ill. Display card or similar article. Des. 82,670; Dec. 2.
Golding Bros. Company. (See Sherover, Max, assignor.)

Goldsborough, Shirley L., East Orange, N. J., assignor to Westinghouse Electric & Manufacturing Company. Alternating-current relay. 1,783,568; Dec. 2.
Goodspeed, Jack L., assignor to Prescott Iron Works, Seattle, Wash. Trim-saw lift unit. 1,783,362; Dec. 2.
Goodwin, William G., Royal Oak, Mich. Mold. 1,783,285; Dec. 2.
Gosch, William H., Reading, and A. Kohout, Shillington, assignors to The Nolde and Horst Company, Reading, Pa. Hank-bundling device. 1,783,236; Dec. 2.
Goudsmit, Maurits J., The Hague, Netherlands. Music-time indicator. 1,783,537; Dec. 2.
Gould, James O., Summerville, Pa. Rail nut lock. 1,783,876; Dec. 2.
Graham, Oakley J. (See Graham, Ota T., and O. J.)
Graham, Ota T., and O. J. Graham, Richmond, Va. Producing, transporting, and handling cementitious material. 1,783,332; Dec. 2.
Granell, George P., Long Island City, N. Y. Strip for terrazzo floors and like structures. 1,783,783; Dec. 2.
Greegor, Ralph H., assignor to The Kinnear Manufacturing Company, Columbus, Ohio. Trolley bridge. 1,783,710; Dec. 2.
Green, Earl F., York, Pa. Towing mechanism. 1,783,189; Dec. 2.
Green, J Birchard, assignor to Chicago Steel and Wire Company, Chicago, Ill. Making cement-coated wire. 1,783,613; Dec. 2.
Greer, Leslie W., Phoenix, Ariz. Sprinkler. 1,783,237; Dec. 2.
Gretsch & Brenner, Inc. (See Brenner, Fred A., assignor.)
Gribojedoff, Nicolai, Teddington, England. Variable-speed and reversing epicyclic gear. 1,783,877; Dec. 2.
Grimm, Albert E. (See Windsor, George W., assignor.)
Griswold, Walter R., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 1,783,614; Dec. 2.
Grob, Armin R., Milwaukee, Wis. System for handling freight and apparatus therefor. 1,783,363; Dec. 2.
Grob, Henry, Piqua, Ohio. Automobile signal. 1,783,422; Dec. 2.
Grondahl, Lars O., Pittsburgh, and L. F. Howard, Edgewood, assignors to The Union Switch & Signal Company, Swissvale, Pa. Instrument inclosed in nonmetallic housings. 1,783,784; Dec. 2.
Gross, Benjamin & Edward J., Co. (See Gross, Edward J., assignor.)
Gross, Edward J., New Rochelle, assignor to Benjamin & Edward J. Gross Co., Inc., New York, N. Y. Finger ring or article of similar nature. Des. 82,671; Dec. 2.
Gross, Edward J., New Rochelle, assignor to Benjamin & Edward J. Gross Co., Inc., New York, N. Y. Finger ring or article of similar nature. Des. 82,672; Dec. 2.
Grout, Martin B., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Control device. 1,783,645; Dec. 2.
Grundon, George F., Middletown, and F. E. Knight, High Spire, Pa. Means to facilitate the electrical bonding of railway rails. 1,783,238; Dec. 2.
Gullborg, John S., Chicago, assignor to Alemite Die Casting & Mfg. Co., Woodstock, Ill. Handle for door of automobile or the like. Des. 82,673; Dec. 2.
Gullborg, John S., Chicago, assignor to Alemite Die Casting & Mfg. Co., Woodstock, Ill. Handle for automobile-window lifter or the like. 82,674; Dec. 2.
Gullborg, John S., Chicago, assignor to Alemite Die Casting & Mfg. Co., Woodstock, Ill. Handle for automobile-window lifter or the like. Des. 82,675; Dec. 2.
Gullborg, John S., Chicago, assignor to Alemite Die Casting & Mfg. Co., Woodstock, Ill. Handle escutcheon for automobile hardware or the like. Des. 82,676; Dec. 2.
Gunn, Robert W., and W. A. S. Thompson, assignors, by mesne assignments, to Emsco Derrick & Equipment Company, Los Angeles, Calif. Pump. 1,783,615; Dec. 2.
Gurley, W. & L. E. (See Kapps, Robert E., assignor.)
Gustafson, Edwin A., assignor to A C Spark Plug Company, Flint, Mich. Speedometer drive clamp. 1,783,917; Dec. 2.
Habicht, George C., Snyder, N. Y. Rail-tie plate and fastener. 1,783,841; Dec. 2.
Habicht, Sidney J., Buffalo, N. Y. Door latch. 1,783,785; Dec. 2.
Hachmuth, Henry C., Comstock Park, Mich. Stepladder. 1,783,616; Dec. 2.
Hajek, Otto, assignor to the firm of Alex. Friedmann, Vienna, Austria. Stop valve. 1,783,646; Dec. 2.
Hall, C. M., Lamp Company. (See Bamford, Frank L., assignor.)
Hall, Frederick B., Richmond, Va. Combined pipe-tapping and plug-setting machine. 1,783,503; Dec. 2.
Halvorson, Cromwell A., B., Lynn, Mass., assignor to General Electric Company. Lamp. 1,783,468; Dec. 2.
Hamilton-Grapes, George, Murrumbeena, Australia. Carburation of hydrocarbon fuel for internal-combustion engines. 1,783,612; Dec. 2.
Hamilton, Joseph B., South Pasadena, Calif. Signal. 1,783,504; Dec. 2.
Hamilton, Wade C., Vicksburg, Miss. Combination brace and bit drill. 1,783,786; Dec. 2.
Hanna, Clinton R., Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrodynamic signal device. 1,783,569; Dec. 2.
Hanny, Charles E., Unionville, assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Switch-box latch and seal. 1,783,711; Dec. 2.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Excavating machine. 1,783,787; Dec. 2.
Harding, Dana E., Melrose, assignor to Harding Engineering Company, East Boston, Mass. Shanking machine. 1,783,907; Dec. 2.
Harding Engineering Company. (See Harding, Dana E., assignor.)
Harper, Elmer E., Kansas City, Mo. Chemical-feed machine. 1,783,423; Dec. 2.
Harrison, Clifford E., assignor to American Engineering Company, Philadelphia, Pa. Grate construction. 1,783,878; Dec. 2.
Harter, Evan C. (See Ferris, W. S., and Harter.)
Hartford-Empire Company. (See Schroder, John E., assignor.)
Hartman, Emanuel W., Phoenix, Ariz. Condenser. 1,783,286; Dec. 2.
Hartmann, Otto H., assignor to Schmidt'sche Heissdampf-Gesellschaft mit beschrankter Haftung, Kassel-Wilhelmshohe, Germany. Multipressure boiler installation. 1,783,842; Dec. 2.
Harvey, Leo M., Los Angeles, Calif. Tie for metal straps. 1,783,239; Dec. 2.
Haselow, Frederick H., and C. Redig, Milwaukee, Wis. Vibratory screen. 1,783,617; Dec. 2.
Hatchett, Andrew H., sr., Cleveland, Ohio. Brush. 1,783,788; Dec. 2.
Hatfield, Schuyler C., Baltimore, Md. Resilient disk wheel. 1,783,469; Dec. 2.
Haverstick, Thomas E. (See Klugh, O. L., and Haverstick.)
Hayes, James J., Louisville, Ky. Wearing apparel. 1,783,505; Dec. 2.
Heald Machine Company, The. (See Garno, George E., assignor.)
Heald Machine Company, The. (See Woytych, Raymond M., assignor.)
Hebden, John C., assignor to Dyeing Processes Corporation, New York, N. Y. Treating yarn. 1,783,908; Dec. 2.
Heberlein & Co., A. G. (See Bodmer, Albert, assignor.)
Hector, Alexander B., Greenwich, near Sydney, New South Wales, Australia. Apparatus for producing color music or other spectacular luminous effects. 1,783,789; Dec. 2.
Hedman Manufacturing Company, The. (See Carlson, John W., assignor.)
Helzeby, Ralph O., assignor to A C Spark Plug Company, Flint, Mich. Speedometer. 1,783,918; Dec. 2.
Helmbold, Margaret L., and F. T. O'Malley, St. Paul, Minn. Lingerie suspender. 1,783,470; Dec. 2.
Hen Houses, Inc. (See Errett, A. J., and Pesek, assignors.)
Henglein, Friedrich A., Cologne-Deutz, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of metallic nitrates. 1,783,647; Dec. 2.
Herbsman, Abraham M., Huntington Park, Calif. Treating colloids. 1,783,471; Dec. 2.
Hernandez, Jesus G., Seattle, Wash. Portable lavatory. 1,783,712; Dec. 2.
Herskowitz, Adolf, & Son, Inc. (See Herskowitz, Joseph, assignor.)
Herskowitz, Joseph, Woodhaven, assignor to Adolf Herskowitz & Son, Inc., Brooklyn, N. Y. Overalls. 1,783,538; Dec. 2.
Hertel, Otto H., assignor to Old Ben Coal Corporation, Chicago, Ill. Carbonizing apparatus. 1,783,190; Dec. 2.
Hess, George L. (See Brink, W., and Hess.)
Hewitt, Edward R., Midvale, N. J., assignor to International Motor Company, New York, N. Y. Bus body. 1,783,424; Dec. 2.
Heyer, Don, Los Angeles, Calif. Massaging oscillator. Des. 82,677; Dec. 2.
Heyner, Fritz, assignor to Franz Kruckenberg, Hanover, Germany. Rail-supporting structure for long spans for high-speed suspended vehicles. 1,783,648; Dec. 2.
Hiers, Herbert A. (See Hiers, Ralph H. and H. A.)
Hiers, Ralph H. and H. A., assignors to Noble and Cooley Co., Granville, Mass. Snare drum. 1,783,843; Dec. 2.
Hilgendorf, Henry, Harvey, assignor to National Brick Company, Chicago, Ill. Brick-making machine and method. 1,783,287; Dec. 2.
Hill, Harry L., assignor to Rodwell Sign Company, Buffalo, N. Y. Packing cushion. 1,783,570; Dec. 2.
Hinrichs, Karl H., Winnetka, Ill. Oil-base insulating pan for internal-combustion engines. 1,783,472; Dec. 2.
Hitner, Harry F., Oakmont, Pa., assignor to Pittsburgh Plate Glass Company. Process and apparatus for regulating the temperature of glass withdrawn from a tank. 1,783,473; Dec. 2.
Hoehn, Anton. (See von Staden, H. A., and Hoehn.)
Hoffman, Walter A. (See Ferguson, J. E., Conn, and Hoffman.)
Hogg, William J., assignor to The National Acme Company, Cleveland, Ohio. Threading die. 1,783,539; Dec. 2.
Hogg, Wiliam J., and F. Neumann, assignors to The National Acme Company, Cleveland, Ohio. Die-chaser-grinding fixture. 1,783,540; Dec. 2.
Hogg, William J., and F. Neumann, assignors to The National Acme Company, Cleveland, Ohio. Tool holder. 1,783,541; Dec. 2.
Hohner, Jacob, Trossingen, Germany. Mouth organ. 1,783,173; Dec. 2.

Holm Company. (See Holm, John H., assignor.)
Holm, John H., assignor to Holm Company, Kenosha, Wis. Golf-teeing stand or similar device. Des. 82,678; Dec. 2.
Holman, Harry V., assignor to Adjustable Clamp Company, Chicago, Ill. Adjustable clamp. 1,783,713; Dec. 2.
Holmes, Grant, Danville, Ill. Steering mechanism for self-propelled vehicles. 1,783,288; Dec. 2.
Holt, Edwin M., West Durham, N. C., assignor to Whitin Machine Works, Whitinsville, Mass. Automatic feed control for cotton-opening machinery. 1,783,333; Dec. 2.
Holt, John W., Cleveland Heights, Ohio. Making electrically-welded tubing. 1,783,571; Dec. 2.
Homel, Charles L., Detroit, Mich. System for the generation and distribution of electric energy. 1,783,935; Dec. 2.
Homiller, Thomas C., Washington, D. C. Glass-cleaning device. 1,783,506; Dec. 2.
Hookless Fastener Company. (See Sundbrook, Gideon, assignor.)
Hoover Company, The. (See Hoover, Howard E., assignor.)
Hoover Company, The. (See White, Harry B., assignor.)
Hoover, Howard E., Glencoe, Ill., assignor to The Hoover Company. Dust-bag ring. 1,783,240; Dec. 2.
Hopkins, George W., Cleveland, Ohio. Motor heater. 1,783,289; Dec. 2.
Horning, Harry L., assignor to Waukesha Motor Company, Waukesha, Wis. Internal-combustion engine. 1,783,714; Dec. 2.
Horning, Harry L., assignor to Waukesha Motor Company, Waukesha, Wis. Internal-combustion engine. 1,783,715; Dec. 2.
Horton, Erwin C. (See Oishei, J. R., Hueber, Paulus, and Horton.)
Horton Manufacturing Company, The. (See Broadwell, H. S., and Thorpe, assignors.)
Horton Manufacturing Company, The. (See Lagerblade, Herbert C., assignor.)
Hotchkiss, Clifford, Milwaukee, Wis., assignor, by mesne assignments, to Time-O-Stat Controls Company. Sign flasher. 1,783,474; Dec. 2.
Hovenden, Alice H., et al, Executors. (See Kent, W. G., and Hovenden.)
Hovenden, Edward W. (See Kent, W. G., and Hovenden.)
Hovenden, Jack R., et al., executors. (See Kent, W. G., and Hovenden.)
Howard, Lemuel F. (See Grondahl, L. O., and Howard.)
Howell, James W., Cleveland, Ohio. Axial pulling tool. 1,783,649; Dec. 2.
Hoyt, Elmore S., assignor to Red Wing Union Stoneware Company, Red Wing, Minn. Poultry feeder. 1,783,790; Dec. 2.
Hoyt, Milton A., East Orange, N. J., assignor to Westinghouse Lamp Company. Locking device for lapping machines. 1,783,618; Dec. 2.
Hueber, Henry. (See Oishei, J. R., Hueber, Paulus, and Horton.)
Huffman Manufacturing Company, The. (See Wilson, R. G., and R. M., assignors.)
Hughes, Frederick G., assignor to The New Departure Manufacturing Company, Bristol, Conn. Assembling antifriction bearings. 1,783,791; Dec. 2.
Hulshizer, George W., Stewartsville, assignor to Ingersoll-Rand Company, Jersey City, N. J. Anchor for drilling mechanism. 1,783,290; Dec. 2.
Humason, John P., Houston, Tex. Valve mechanism. 1,783,291; Dec. 2.
Hume, William G., assignor to Keystone Steel & Wire Company, Peoria, Ill. Fish-trap structure. 1,783,716; Dec. 2.
Hump Hairpin Manufacturing Co., The. (See Goldberg, Solomon H., assignor.)
Hunter, John S., Coalinga, Calif. Double-acting pump. 1,783,425; Dec. 2.
Huntley, Reginald C., assignor to Sturgis Posture Chair Company, Sturgis, Mich. Adjustable chair. 1,783,426; Dec. 2.
Hutcheson, Ray R., Richmond Hill, N. Y., assignor to Wm. Demuth & Co. Bottle stopper. Des. 82,679; Dec. 2.
Huxford, Jere O., Perry, Fla. Turpentine apron. 1,783,650; Dec. 2.
I. G. Farbenindustrie Aktiengesellschaft. (See Beck, A., and Siebel, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Becker, Franz, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Bögemann, M., and Friedrich, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Eisemann, K., and Bergmann, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Langheinrich, Hellmuth, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Lappe, F., Koch, Pier, and Sauer, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Loehr, Oskar, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Marx, K., Behncke, and Brodersen, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Mittasch, A., and Müller, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See von Staden, H. A., and Hoehn, assignors.)
Ide, Walter D., Piqua, Ohio, assignor to B. V. D. Company, Inc., Baltimore, Md. Bathing suit. 1,783,174; Dec. 2.
Infelt, Orie. (See Morris, C., and Buck, assignors.)
Ingersoll-Rand Company. (See Curtis, John C., assignor.)
Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)
Ingersoll-Rand Company. (See Hulshizer, George W., assignor.)
Innes, George, Davenport, assignor to Innes Manufacturing Company, Bettendorf, Iowa. Grain-shocking mechanism. 1,783,241; Dec. 2.
Innes Manufacturing Company. (See Innes, George, assignor.)
International Combustion Engineering Corporation. (See Cook, Walter M., assignor.)
International Motor Company. (See Cowell, Robert F., assignor.)
International Motor Company. (See Hewitt, Edward R., assignor.)
International Motor Company. (See Jupp, William B., assignor.)
International Motor Company. (See Leipert, August H., assignor.)
International Patents Development Company. (See Newkirk, William B., assignor.)
International Seal and Knot Protector Co., The. (See Keidel, Frank, assignor.)
Intertype Corporation. (See Freund, Herman R., assignor.)
Intertype Corporation. (See Sperry, Samuel E., assignor.)
Inventia Patent-Verwertungs-Gesellschaft. (See Bilde, Tord. E. D., assignor.)
Irwin, Carl C., Kirkwood, assignor to Ely & Walker Dry Goods Company, St. Louis, Mo. Merchandise-display cabinet. Des. 82,680; Dec. 2.
Isaacson, William O., Chicago, Ill. Cooking utensil. 1,783,792; Dec. 2.
Israel, Henry H., Lansford, and G. Trussa, Nesquehoning, Pa. Coal-handling apparatus. 1,783,619; Dec. 2.
Jacob, Herman A., Holyoke, assignor to Gilbert & Barker Manufacturing Company, West Springfield, Mass. Liquid-dispensing apparatus. 1,783,379; Dec. 2.
Jacobsen, Jens N., Alameda, Calif., assignor to The Pfaudler Co., Rochester, N. Y. Heat-transfer apparatus. 1,783,844; Dec. 2.
Jacobucci, Raphael, Cleveland, Ohio. Printing press. 1,783,942; Dec. 2.
Jacoby, Benjamin. (See King, C. B., Jacoby, and Shelton.)
Jauch, Robert J. (See Geyer, B. F., and Jauch.)
Jefferson Electric Company. (See Cook, Herbert R., assignor.)
Jennings, Irving C., South Norwalk, Conn. Sealing device for centrifugal pumps. 1,783,427; Dec. 2.
Jennings, Irving C., South Norwalk, Conn. Pressure-control mechanism for vacuum heating systems. 1,783,428; Dec. 2.
Johanning, Carlos F., Denison, Tex. Auxiliary base and switch attachment for telephones. 1,783,936; Dec. 2.
John, William J., Croydon, and H. Wright, jr., London, England; said Wright, jr., assignor to said John. Electric fuse. 1,783,242; Dec. 2.
Johnson, Allan W., Newark, N. J., assignor to Westinghouse Lamp Company. Wire-cutting mechanism. 1,783,620; Dec. 2.
Johnson, Charles D., assignor to Johnson Steel & Wire Company, Inc., Worcester, Mass. Apparatus for coating wire. 1,783,429; Dec. 2.
Johnson, Charles S., Champaign, Ill. Valve. 1,783,621; Dec. 2.
Johnson, Clarence G., Hartford City, Ind. Movable molding for closure members. 1,783,919; Dec. 2.
Johnson, Homer R., Los Angeles, Calif. Kitchen utensil. 1,783,651; Dec. 2.
Johnson Metal Products Company. (See Johnson, Theodore and P. G., assignors.)
Johnson, Minnie P., Long Beach, Calif. Garment. 1,783,572; Dec. 2.
Johnson, Paul G. (See Johnson, Theodore and P. G.)
Johnson Steel & Wire Company. (See Johnson, Charles D., assignor.)
Johnson, Theodore, Erie, and P. G. Johnson, Wesleyville, assignors to Johnson Metal Products Company, Erie, Pa. Hinge. 1,783,475; Dec. 2.
Johnson, Thomas W., Mountain View, assignor to V. H. Owen, Oakland, Calif. Method of and apparatus for treating fruit trees. 1,783,430; Dec. 2.
Jordan, Richard H., Springfield, Mass., assignor to Westinghouse Electric & Manufacturing Company. Starting device for fan motors. 1,783,175; Dec. 2.
Journal-Box Servicing Corporation. (See Conway, I. M., and Lawson, assignors.)
Jupp, William B., Brooklyn, assignor to International Motor Company, New York, N. Y. Throttle-controlling means for internal-combustion engines. 1,783,431; Dec. 2.
Kačer, Filip. (See Lüttringhaus, A., and Kačer.)
Kaemmerling, Gustav H., assignor to Erie City Iron Works, Erie, Pa. Pulverizer. 1,783,717; Dec. 2.
Kageyama, Hosaku, Los Angeles, Calif. Signal device for automobiles. 1,783,718; Dec. 2.
Kapps, Robert E., assignor to W. & L. E. Gurley, Troy, N. Y. Surveyor's rod. 1,783,507; Dec. 2.
Karabatsos, Peter N., assignor of one-half to E. Demeur, Oak Park, Ill. Electric fan. 1,783,652; Dec. 2.

Kassner, Ernst, Berlin, Germany. Combined duplex adding machine and cash register. 1,783,943; Dec. 2.
Knufman, Gerson, New York, N. Y. Syringe nozzle. Des. 82,681; Dec. 2.
Kaufmann, John J., Elkins Park, assignor to Steel Heddle Manufacturing Company, Philadelphia, Pa. Loom harness. 1,783,793; Dec. 2.
Knufmann, John J., Elkins Park, assignor to Steel Heddle Manufacturing Company, Philadelphia, Pa. Heddle frame. 1,783,794; Dec. 2.
Kearney, Edward J., Wauwatosa, assignor to Kearney & Trecker Corporation, West Allis, Wis. Adjustable housing. 1,783,653; Dec. 2.
Kearney & Trecker Corporation. (See Kearney, Edward J., assignor.)
Kearsley, Richard A., Milford, assignor to Draper Corporation, Hopedale, Mass. Let-off mechanism for looms. 1,783,719; Dec. 2.
Keelan, Harry S., assignor to E. R. Squibb and Sons, Brooklyn, N. Y. Colloidal silver iodide compound and preparing same. 1,783,334; Dec. 2.
Keene, Edward W. W., Kingston-upon-Hull, England. Filtering apparatus. 1,783,937; Dec. 2.
Keeney, Don E., assignor to A C Spark Plug Company, Flint, Mich. Illuminating device for instrument panels. 1,783,920; Dec. 2.
Keidel, Frank, Elmhurst, assignor to The International Seal and Knot Protector Co., New York, N. Y. Seal. 1,783,938; Dec. 2.
Keller, Charles G., Poughkeepsie, N. Y. Vehicle wheel-hub construction. 1,783,432; Dec. 2.
Keller, James L., Ferndale, Mich. Clotheslines support. 1,783,433; Dec. 2.
Kellogg Company. (See Kellogg, John L., assignor.)
Kellogg, John L., assignor to Kellogg Company, Battle Creek, Mich. Combination toasting and shredding oven. 1,783,434; Dec. 2.
Kellogg Switchboard and Supply Company. See Grout, Martin B., assignor.)
Kelsey, William A., Minneapolis, Minn. Dental instrument. 1,783,654; Dec. 2.
Kelso, William, assignor to The McConway & Torley Company, Pittsburgh, Pa. Car-coupler mechanism. 1,783,655; Dec. 2.
Kenny, Victor, New York, N. Y. Making toy figures. 1,783,720; Dec. 2.
Kenny, Victor, New York, N. Y. Artificial hair for dolls' heads. 1,783,721; Dec. 2.
Kenner, Duncan, deceased, New Orleans, La., by court order, Mrs. E. T. Kenner sole heir and legatee. Mop head. 1,783,795; Dec. 2.
Kenner, Duncan, deceased, New Orleans, La.; by court order, Mrs. E. T. Kenner sole heir and legatee. Mop wringer and holder. 1,783,879; Dec. 2.
Kenner, Mrs. Emma T., sole heir and legatee. (See Kenner, Duncan.)
Kent, Arthur A., Ardmore, Pa. Radio receiving apparatus. 1,783,292; Dec. 2.
Kent, Walter G., and E. W. Hovenden, deceased, Luton, by J. R. Hovenden, London, and A. H. Hovenden, Bedford, England, executors, assignors to Builders Iron Foundry, Providence, R. I. Apparatus for measuring the flow of liquids. 1,783,880; Dec. 2.
Kettering, Charles F., Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Container for removing carbon. 1,783,921; Dec. 2.
Keystone Driller Company. (See Downie, Robert R., assignor.)
Keystone Steel & Wire Company. (See Hume, William G., assignor.)
Kienle, Roy H., and L. V. Adams, Schenectady, N. Y., assignors to General Electric Company. Coating composition. 1,783,364; Dec. 2.
Kildare, Joseph. (See Yarnall, D. R., and Kildare.)
Kimball, Wallace D. (See Schroeder, A. C., and Kimball.)
King, Charles B., B. Jacoby, and D. J. Shelton, assignors to The Marion Steam Shovel Company, Marion, Ohio. Excavating machine. 1,783,293; Dec. 2.
King, Clarence E., Harpenden, England, assignor to General Motors Corporation, Detroit, Mich. Sleeve-valve engine. 1,783,722; Dec. 2.
King, Henry J., New Haven, assignor to Dictaphone Corporation, Bridgeport, Conn. Phonograph. 1,783,723 Dec. 2.
King's Julia, Candy Corporation. (See Phelps, Robert W., assignor.)
Kinnear Manufacturing Company, The. (See Greggor, Ralph H., assignor.)
Kinney, James A., Lebanon, Pa., assignor to Bethlehem Steel Company. High-speed thread-rolling machine. 1,783,796; Dec. 2.
Kirby, James B., West Richfield, Ohio. Mechanical movement. 1,783,380; Dec. 2.
Kirk, Walter R. (See Stepelton, Aubry F., assignor.)
Kjellberg, Anders W., assignor to General Motors Corporation, Detroit, Mich. Connecting rod. 1,783,922; Dec. 2.
Klein, Clarence J., Bellevue, assignor to United Engineering & Foundry Company, Pittsburgh, Pa. Material-handling device. 1,783,797; Dec. 2.
Klein, Paul, Budapest, Hungary, and A. Szegvari, assignors to American Anode Inc., of Akron, Ohio. Manufacture of rubber goods from rubber dispersions. 1,783,435; Dec. 2.
Klugh, Ormon L., and T. E. Haverstick, Muncie, Ind. Safety attachment for machine tools. 1,783,476; Dec. 2.
Knapp, Frederick H., Kelso, Wash. Loading jack and clamp. 1,783,294; Dec. 2.
Knefel, Stanley C., St. Louis, Mo. Boiler return and vacuum trap. 1,783,381; Dec. 2.
Knight, B. B. & R., Corporation. (See Picard, Stanislas, assignor.)
Knight, Fred E. (See Grundon, G. F., and Knight.)
Knight, Troy J., Golden, Ill. Farm gate. 1,783,508; Dec. 2.
Koch, Edwin. (See Lappe, F., Koch, Pier, and Sauer.)
Koerner, John, Brooklyn, N. Y. Permanent-wave beautifier. 1,783,881; Dec. 2.
Kohler Company. (See Brotz, Frank G., assignor.)
Kohn, Max A., Harrisburg, Pa. Hand-pump sprayer. 1,783,882; Dec. 2.
Kohout, Addison. (See Gosch, W. H., and Kohout.)
Kohr, Elton D., York, Pa. Mold for forming cones for ice cream and frozen custard. 1,783,798; Dec. 2.
Kohr, Elton D., York, Pa. Mold for forming cones for ice cream and frozen custard. 1,783,799; Dec. 2.
Koren, Walter A. (See Crites, J., and Koren.)
Kovner, Samuel. (See Brooks, C. P., jr., and Kovner.)
Krastin, August, Cleveland, Ohio. Electric switch. 1,783,656; Dec. 2.
Kratochvil, Emanuel, Chicago, Ill. Fountain pen. 1,783,436; Dec. 2.
Krelling, James E., Chicago, Ill. Household-budget system. 1,783,800; Dec. 2.
Kromer, Theodor, assignor to Theodor Kromer Gesellschaft mit beschränkter Haftung, Freiburg, in Breisgau, Germany. Safety lock. 1,783,923; Dec. 2.
Kromer, Theodor, Gesellschaft mit beschränkter Haftung. (See Kromer, Theodor, assignor.)
Kruckenberg, Franz. (See Heyner, Fritz, assignor.)
Krum, Howard L., assignor to Teletype Corporation, Chicago, Ill. Electric selector mechanism. 1,783,382; Dec. 2.
Kucich, Reginald A. (See Rehe, Albert K., assignor.)
Kuntzleman, Roy A., Barberton, Ohio. Device for teaching penmanship. 1,783,657; Dec. 2.
La France, Richard, assignor to Owens-Illinois Glass Company, Toledo, Ohio. Machine for forming glass articles. 1,783,191; Dec. 2.
Lagerblade, Herbert C., assignor to The Horton Manufacturing Company, Bristol, Conn. Welding strip for golf shafts. 1,783,802; Dec. 2.
Laher, Frank J., Oakland, Calif. Automobile bumper. 1,783,335; Dec. 2.
Lahey, William E., Lima, Ohio. Pipe clamp. 1,783,509; Dec. 2.
Laib, William L., Oak Park, Ill. Whipper and mixer. 1,783,437; Dec. 2.
Lalanne, Louis, Marseille, France. Scuttle port and like tight-closed window. 1,783,336; Dec. 2.
La Mont Corporation. (See La Mont, W. D., and Ernst, assignors.)
La Mont, Walter D., Larchmont, N. Y., and A. F. Ernst, Passaic, N. J., assignors to La Mont Corporation, New York, N. Y. Effecting heat exchange. 1,783,724; Dec. 2.
Landers, Charles H., Lansing, assignor to General Motors Corporation, Detroit, Mich. Making bearings. 1,783,438; Dec. 2.
Lang, Franz, Munich-Nymphenburg, assignor to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Internal-combustion engine. 1,783,803; Dec. 2.
Lange, Hans. (See Reddelien, G., Lange, and Pfannenstiel.)
Lange, William L., New York, N. Y. Frame for musical instruments. 1,783,243; Dec. 2.
Lange, William L., New York, N. Y. Resonating means for banjos. 1,783,244; Dec. 2.
Langheinrich, Hellmuth, Neuroessen, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Recovery of sulphur from alkali-metal polysulphides. 1,783,725; Dec. 2.
Lanham, Prentiss O. (See Finnegan, H. L., and Lanham.)
Lanser, Alfred, Corseaux-Vevey, Switzerland. Liquid-measuring apparatus. 1,783,510; Dec. 2.
Lanzillotta, Rudolph, Columbus, Ohio. Sash balance. 1,783,573; Dec. 2.
Lappe, Franz, E. Koch, Ludwigshafen-on-the-Rhine, M. Pier, Heidelberg, and H. Sauer, Neurossen, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Metallic apparatus for carrying out chemical and other processes. 1,783,726; Dec. 2.
Laroche, Louis J., Reading, Pa. Doorstop or the like. Des. 82,682; Dec. 2.
Larrison, Lewis K., Wharton, N. J. Plumbing device. 1,783,883; Dec. 2.
Larsson, Thure, assignor to Norton Company, Worcester, Mass. Segmental grinding wheel. 1,783,727; Dec. 2.
Larsson, Thure, assignor to Norton Company, Worcester, Mass. Grinding wheel. 1,783,728; Dec. 2.
Larsson, Thure, assignor to Norton Company, Worcester, Mass. Abrasive-wheel mount. 1,783,729; Dec. 2.
La Société Anonyme Jean Paton. (See Barbas, Raymond, assignor.)
Law, Otis E., assignor to Pinless Clothes Line Corporation, Brookfield, Ill. Metallic clothesline. 1,783,245; Dec. 2.

Lawler, James J., Mount Vernon, N. Y. Thermostat. 1,783,574; Dec. 2.
Lawser, Charles W., Bala, assignor to The Wicaco Machine Corporation, Philadelphia, Pa. Pumping unit for artificial-silk-spinnng machines. 1,783,439; Dec. 2.
Lawson, Thomas M. (See Conway, I. M., and Lawson.)
Laymon, Herman B., Spencer, Ind. Making bags. 1,783,845; Dec. 2.
Leach, Edgar J., Janesville, Wis., assignor to Time-O-Stat Controls Company, Elkhart, Ind. Thermostatic valve. 1,783,730; Dec. 2.
Ledford, Grover R., San Joaquin, Calif. Shock-absorbing structure for firearms. 1,783,246; Dec. 2.
Ledig, Willy. (See Loebe, W.-W., Ledig, and Asmussen.)
Lee, Clifford C., assignor to K. O. Lee & Son Co., Aberdeen, S. Dak. Valve-seat. 1,783,884; Dec. 2.
Lee, K. O., & Son Co. (See Lee, Clifford C., assignor.)
Leipert, August H., College Point, assignor to International Motor Company, New York, N. Y. Cushion connection for vehicle construction. 1,783,801; Dec. 2.
Lennox, Thomas C., Pittsfield, Mass., assignor to General Electric Company. Electric system. 1,783,804; Dec. 2.
Leppert, Henry E., New Britain, assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Inclosed switch. 1,783,731; Dec. 2.
Leroux, Aza, New York, N. Y. Pickpocketproof button. 1,783,846; Dec. 2.
Leslie, John W., Evanston, Ill., assignor, by mesne assignments, to Signode Steel Strapping Company. Strapping joint. 1,783,192; Dec. 2.
Leslie, John W., Evanston, Ill., assignor, by mesne assignments, to Signode Steel Strapping Company. Strapping joint. 1,783,247; Dec. 2.
Leuthner, Frank J., Sharpsville, Pa. Molding apparatus. 1,783,805; Dec. 2.
Levi, Louis, Winthrop, Mass. Window screen. 1,783,732; Dec. 2.
Levy, Oscar C., Chicago, Ill., assignor to Reserve Holding Company, Kansas City, Mo. Party-line telephone system. 1,783,295; Dec. 2.
Lévy, Pierre, Nancy, assignor to The Société P. & P. Levy die Etablissements J et S Levy Fréres, Meurthe-et-Moselle, France. Fashioned warp knitting. 1,783,847; Dec. 2.
Lewis, Albert S., jr. (See McConnell, J. R., and Lewis.)
Lewis, Charles H. (See Travers, J. T., Lewis, and Urbain.)
Lewis, James O., Tulsa, Okla. Valve. 1,783,441; Dec. 2.
Lewis, Richard W., Montclair, N. J. Dispersion and making the same. 1,783,365; Dec. 2.
Lewis, Richard W., Montclair, N. J. Dispersion and making the same. 1,783,366; Dec. 2.
Lieber, Carl M., Oklahoma City, Okla. Automatic safety valve. 1,783,440; Dec. 2.
Lillibridge, Duane M., St. Charles, Ill. Hammock or glider supporting frame. 1,783,848; Dec. 2.
Limpach, Otto. (See Schmidt, M. P., and Limpach.)
Lincoln Scale Corporation. (See Burke, Robert J., assignor.)
Lindermann, A. J., & Hoverson Company. (See Rutenber, Edwin A., assignor.)
Lisle Manufacturing Company, The. (See Olson, C. A., Buch, and Brooks, assignors.)
Little, Earl W., Indianapolis, Ind. Attachment for welding machines. 1,783,337; Dec. 2.
Loebe, Walther-Winfried, Waldmannslust, Berlin, W. Ledig, Berlin, and H. Asmussen, Charlottenburg, Berlin, Germany, assignors to General Electric Company. Bulb feeder for sealing-in machines. 1,783,806; Dec. 2.
Loehr, Oskar, Uerdingn-Niederrhein, assignor to I. G. Farbenindustrie Aktiengeselischaft, Frankfort-on-the-Main, Germany. Manufacture of soft and pliable masses from cellulose esters. 1,783,176; Dec. 2.
Logue, Paul. (See Durgin, C. B., Gerber, and Logue.)
Lomax, Clarence E. (See Saunders, N. H., Lomax, and Riebe.)
Long, Dorothy, assignor to Franklin Simon & Company, Inc., New York, N. Y. Ensemble suit. Des. 82,683; Dec. 2.
Loucks, James F., Cleveland, Ohio, assignor to Detroit Steel Products Company, Detroit, Mich. Building-construction unit. 1,783,248; Dec. 2.
Lowenstein, Gothard, Brooklyn, N. Y. Handling and storing motor vehicles. 1,783,296; Dec. 2.
Lucas, Harry W., Holbrook, Mass., assignor to Fitz-Empire Double Pivot Last Company, Auburn, Me. Hinge last. 1,783,658; Dec. 2.
Luce, Hans, Dusseldorf, assignor to Rheinische Metallwaaren-und Maschinenfabrik Sömmerda Aktiengesellschaft, Sommerda, Germany. Setting type levers. 1,783,177; Dec. 2.
Lüttringhaus, Arthur, and F. Kačer, Mannheim, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Anthraquinone-thioxanthone vat dyestuffs. 1,783,659; Dec. 2.
MacDonald, Chester R., Rutherford, N. J., assignor, by mesne assignments, to The Patent and Licensing Corporation, Boston, Mass. Apparatus for coating roofing units. 1,783,575; Dec. 2.
MacDonald, Chester R., Rutherford, N. J., assignor, by mesne assignments, to The Patent and Licensing Corporation, Boston, Mass. Finishing roofing units. 1,783,849; Dec. 2.
MacDonald, Chester R., Rutherford, N. J., assignor, by mesne assignments, to The Patent and Licensing Corporation, Boston, Mass. Apparatus for finishing roofing units. 1,783,850; Dec. 2.
MacDonald, Frank J., Ellet, assignor of one-half to J. R. Gammeter, Akron, Ohio. Bottle cap. 1,783,909; Dec. 2.
MacGahan, Paul, Orange, N. J., assignor to Westinghouse Electric and Manufacturing Company. Instrument panel for switchboards. Des. 82,684; Dec. 2.
MacMillen, William C., Rochester, Pa., assignor, by mesne assignments, to The Wayne Pump Company, Baltimore, Md. Liquid-overflow-control means. 1,783,249; Dec. 2.
Maes, Michael, Cincinnati, Ohio. Folding table and bench. 1,783,660; Dec. 2.
Majors, Walter L., St. Louis, Mo. Heating apparatus. 1,783,576; Dec. 2.
Makoski, Alexander, J. W., and W. J., Grand Rapids, Mich.; said A. Makoski and said J. W. Makoski, assignors to said W. J. Makoski. Adjustable typewriter stand. 1,783,661; Dec. 2.
Makoski, Joseph W. (See Makoski, Alexander, J. W., and W. J.)
Makoski, Walter J. (See Makoski, Alexander, J. W., and W. J.)
Makowski, John F., Oakland, Calif., assignor to Fireproof Wall Company, Reno, Nev. Conduit construction. 1,783,178; Dec. 2.
Manassero, Giuseppe, New York, N. Y. Golf tee. 1,783,733; Dec. 2.
Mandy, James, assignor of one-half to M. Ecker, New York, N. Y. Laundry hanger. 1,783,578; Dec. 2.
Manley Manufacturing Company. (See Manley, Robert E., assignor.)
Manley, Robert E., assignor to Manley Manufacturing Company, York, Pa. Lever mechanism. 1,783,250; Dec. 2.
Mann, Chauncey R., Troy, N. Y. Game apparatus. 1,783,338; Dec. 2.
Mansfield, Samuel J., Dallas, Tex. Piston. 1,783,477; Dec. 2.
Marcher, Royal, assignor to Cohn & Rosenberger, Inc., New York, N. Y. Pin for holding golf tees. Des. 82,685; Dec. 2.
Marion Steam Shovel Company, The. (See King, C. B., Jacoby, and Shelton, assignors.)
Markham, Charles M., Toledo, Ohio. Timber splicer. 1,783,622; Dec. 2.
Marr, Arthur P. (See Marr, George M. and A. P.)
Marr, George M. and A. P., New York, N. Y. Rudder-angle-indicating device. 1,783,251; Dec. 2.
Marshall, Arnold C., assignor to The Steel Scaffolding Company Limited, London, England. Coupling or clamp for scaffolding or other purposes. 1,783,735; Dec. 2.
Marshall, Clinton E., Brooklyn, N. Y. Fountain-pen attachment. 1,783,734; Dec. 2.
Marshall, Clinton E., New York, N. Y. Pen and pencil clip. 1,783,736; Dec. 2.
Marti, Othmar K. (See Sindeband, M. L., and Marti.)
Martin, Francis G., and W. Ramsay, Birkenhead, assignors to J. Stone & Company Limited, Deptford, England. Apparatus for electrolytically depositing metal on metal tubes. 1,783,885; Dec. 2.
Martin, Mark H., Reading, assignor to Birdsboro Steel Foundry & Machine Company, Birdsboro, Pa. Car truck. 1,783,737; Dec. 2.
Martocello, Joseph A., Philadelphia, Pa. Ice-making system and method of obtaining dry air. 1,783,807; Dec. 2.
Martocello, Joseph A., Philadelphia, Pa. Support for drop tubes. 1,783,808; Dec. 2.
Marx, Karl, H. Behncke, and K. Brodersen, Dessau in Anhalt, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Highly-active catalyst. 1,783,662; Dec. 2.
Marx, Louis, New York, N. Y. Toy. 1,783,511; Dec. 2.
Mascarucci, Giuseppe, assignor to Safat Società Anonima Fabbrica Armi-Torino, Turin, Italy. Device for feeding cartridges and for cocking the striker in automatic firearms. 1,783,577; Dec. 2.
Maschinenfabrik Augsburg-Nuernberg, Aktiengesellschaft. (See Wilhelm, Ottmar, assignor.)
Maslin, Albert J. (See Peters, J. F., and Maslin.)
Massie, Arnold C., Bloomfield, N. J., assignor to Westinghouse Lamp Company. Support construction for large filament lamps. 1,783,623; Dec. 2.
Mather, Mildred C., Minneapolis, Minn. Protector. 1,783,512; Dec. 2.
Matthews, Edward, Denver, Colo. Snubber for automobiles. 1,783,193; Dec. 2.
Matthews, Howard D., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Thermostatic switch. 1,783,179; Dec. 2.
Mattson, Carl, New York, N. Y. Collapsible window frame. 1,783,910; Dec. 2.
Maurer, Donald D., Walnut Creek, Calif. Transmission. 1,783,513; Dec. 2.
Maxwell, William H., et al. (See Carter, Samuel C., assignor.)
Mayer, Charles W., and E. F. Siller, Rochester, N. Y. Recording paper. 1,783,442; Dec. 2.
McConnell, John R., Anchorage, and A. S. Lewis, jr., assignors, by mesne assignments, to American Air Filter Company, Inc., Louisville, Ky. Apparatus for cleaning air-filter cells. 1,783,194; Dec. 2.

McConway & Torley Company, The. (See Kelso, William, assignor.)
McCoy, William C., Akron, Ohio, assignor to Moto Meter Gauge & Equipment Corporation, Long Island City, N. Y. Electrical indicating instrument. 1,783,851; Dec. 2.
McFall, Thurlow E., Sparta, Mich. Piston-ring casting. 1,783,886; Dec. 2.
McFarland, James C., Fort Thomas, assignor to The Wadsworth Watch Case Co., Dayton, Ky. Etching precious metals. 1,783,663; Dec. 2.
McGovern, Peter F., Weehawken, N. J. Shafting for engines. 1,783,664; Dec. 2.
McGrath, Patrick J., Mill Iron, Mont. Automobile gate. 1,783,579; Dec. 2.
McGuigan, Walter J. (See Della, Ernest, assignor.)
McGuire, John J., Yonkers, N. Y. Vehicle brake. 1,783,852; Dec. 2.
McHan, Brack B. (See De Lore, C. P., and McHan.)
McKean, John O., assignor to Forest Machine Company, Westfield, Mass. Bobbin-supply truck for winding machines. 1,783,911; Dec. 2.
McKee, Garnet W., Rockford, Ill. Ribbon burner. 1,783,195; Dec. 2.
McKenzie, Thomas K., Harrisonville, Mo. Dental instrument. 1,783,252; Dec. 2.
McKeown, Thomas H., Metuchen, N. J., assignor, by mesne assignments, to The Roessler & Hasslacher Chemical Company. Opacifier for enamels. 1,783,738; Dec. 2.
McKeown, Thomas H., Metuchen, N. J., assignor, by mesne assignments, to The Roessler & Hasslacher Chemical company. Opacifier for enamels. 1,783,739; Dec. 2.
McKeown, Thomas H., Metuchen, N. J., assignor, by mesne assignments, to The Roessler & Hasslacher Chemical Company. Opacifier for enamels. 1,783,740; Dec. 2.
McKinley, Charles W., assignor to A C Spark Plug Company, Flint, Mich. Oil-filter member. 1,783,924; Dec. 2.
McMillan Book Company. (See McMillan, John L., assignor.)
McMillan, John L., assignor to McMillan Book Company, Syracuse, N. Y. Loose-leaf binder. Re17,895; Dec. 2.
McNamara, Leon, Rochelle, Ill. Fastening mechanism. 1,783,253; Dec. 2.
Mears, Arthur M., Portland, Oreg. Clutch mechanism. 1,783,741; Dec. 2.
Mechanical Rubber Company, The. (See Cox, Julian H., assignor.)
Meissner, Alexander, assignor to Gesellschaft für Drahtlose Telegraphie, m. b. H., Berlin, Germany. Indicating means for high-frequency oscillations. 1,783,297; Dec. 2.
Menke, Edward W., Chicago, and J. C. Redington, Geneva, Ill., assignors, by mesne assignments to St. Regis Paper Company, New York, N. Y. Siftproof valve bag. 1,783,624; Dec. 2.
Merle, George, sr., Brooklyn, N. Y. Voltage controlling and regulating device. 1,783,542; Dec. 2.
Meuer, George J., Milwaukee, Wis., assignor, by mesne assignments, to Cutler-Hammer, Inc. Electric switch. 1,783,298; Dec. 2.
Meuer, George J., Milwaukee, Wis., assignor, by mesne assignments, to Cutler-Hammer, Inc. Electric switch. 1,783,665; Dec. 2.
Meyer, Charles, Miami, Fla., assignor to Press-Or Company Juice extractor. Re17,893; Dec. 2.
Meyer, Georg, assignor to Gasmesserfabrik Mainz, Elster & Co., Mainz, Germany. Valve mechanism for gas meters. 1,783,742; Dec. 2.
Milcor Steel Company. (See Schmieder, Robert S., assignor.)
Miller, Elmer, Boonton, N. J. Heel structure for shoes. 1,783,514; Dec. 2.
Miller, Ernest, Saginaw West Side, Mich. Air moistener for internal-combustion engines. 1,783,254; Dec. 2.
Miller, Felix B., Attleboro, Mass., assignor to W. F. Denney, Philadelphia, Pa. Compact or similar article. Des. 82,718; Dec. 2.
Miller, Frank W., Chicago, assignor of one-half to I. J. Wilson, Winnetka, Ill. Water softener. 1,783,255; Dec. 2.
Miller, Frederic H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Suspension clamp. 1,783,543; Dec. 2.
Miller, Jesse P., Houma, La., assignor of one-half to J. H. Thatcher. Drill bit. 1,783,580; Dec. 2.
Miller, John C., Chicago, Ill. Apparatus for cleaning out drain pipes. 1,783,256; Dec. 2.
Miller, Morris, East Orange, assignor to Simon Miller & Co., Newark, N. J. Bracelet clasp. 1,783,743; Dec. 2.
Miller, Simon, & Co. (See Miller, Morris, assignor.)
Miller, William J., Swissvale, Pa. Tray for pottery-fabricating apparatus. 1,783,197; Dec. 2.
Mills, Bertram M., assignor to The Standard Engineering Works, Pawtucket, R. I. Humidifier casing. Des. 82,686; Dec. 2.
Mirick, Carlos B., assignor to National Electrical Supply Company, Washington, D. C. Antenna weight. 1,783,299; Dec. 2.
Miriello, George, Bronx, N. Y. Scissors. 1,783,853; Dec. 2.
Mitchell, John R., Trenton, N. J. Bobbin or spool cap. 1,783,339; Dec. 2.
Mittasch, Alwin, Ludwigshafen-on-the-Rhine, and C. Müller, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of iron carbonyl. 1,783,744; Dec. 2.
Mohun, John L., Omaha, Nebr. Locomotive structure. 1,783,300; Dec. 2.
Monar, Fred B., Washington, D. C. Constant-voltage generator. 1,783,745; Dec. 2.
Monroe Calculating Machine Company. (See Overbury, Austin A., assignor.)
Montgomery, Harry W., Omaha, Nebr. Valve actuation for a burglar-repelling device. 1,783,515; Dec. 2.
Montreal General Hospital, The. (See Rabinowitch, Israel M., assignor.)
Montrief, James V., Bridgeport, Tex. Building construction. 1,783,383; Dec. 2.
Moore Brothers Company. (See Dibble, Claude M., assignor.)
Moore, Walter N., assignor to Three-M Manufacturing Company, Kansas City, Mo. Removing scale from water jackets of internal-combustion engines. 1,783,478; Dec. 2.
Moreton, Henry H., Stony Point, N. Y. Spotlight attachment. 1,783,516; Dec. 2.
Morgan, Connie D. (See Beckham, G. F., and Morgan.)
Morgan Dry Cleaners Equipment Co. (See Morgan, Paul W., assignor.)
Morgan, Edmund C., deceased, Richmond Hill, N. Y., C. E. Morgan, executrix. Mining and loading machine. 1,783,443; Dec. 2.
Morgan, Olive E., executrix. (See Morgan, Edmund C.)
Morgan, Paul W., assignor to Morgan Dry Cleaners Equipment Co., St. Louis, Mo. Filter for cleaning fluids. 1,783,444; Dec. 2.
Morrell, Jacque C. (See Egloff, G., and Morrell.)
Morrell, Jacque C., and H. P. Benner, assignors to Universal Oil Products Company, Chicago, Ill. Process and apparatus for converting hydrocarbons. 1,783,257; Dec. 2.
Morris, Carl, and W. H. Buck, assignors of one-third to O. Infelt, Thornton, Iowa. Railroad mowing machine. 1,783,517; Dec. 2.
Morris, Raymond G., et al. (See Morris, William R., assignor.)
Morris, Robert H., et al. (See Morris, William R., assignor.)
Morris, William R., Fairfield, assignor of one-half to R. H. Morris, and one-half to R. G. Morris, Boise, Idaho. Hydraulic power device. 1,783,887; Dec. 2.
Morse, William J., Attleboro, Mass. Clamp lever for buckles. 1,783,854; Dec. 2.
Mort, Lee H., Pittsburgh, Pa. Attachment for internal-combustion engines. 1,783,746; Dec. 2.
Morthland, John A., Forest Park, Ill. Supporting bracket. 1,783,666; Dec. 2.
Morton, Charles, Pawtucket, R. I. Spinning frame. 1,783,301; Dec. 2.
Moto Meter Gauge & Equipment Corporation. (See McCoy, William C., assignor.)
Mougey, Harry C., assignor to General Motors Research Corporation, Detroit, Mich. Soldering flux. 1,783,925; Dec. 2.
Mountain, Harry W. (See Reed, Robert W., assignor.)
Moyer, Charles L., Chicago, Ill., assignor, by mesne assignments, to Quality Hardware and Machine Corporation. Automatic book-assembly mechanism. 1,783,625; Dec. 2.
Mueller, Alexander V., assignor to The Deming Company, Salem, Ohio. Centrifugal pump. 1,783,667; Dec. 2.
Müller, Carl. (See Mittasch, A., and Müller.)
Müller, Friederich, Elizabeth, N. J. Tube-tapering apparatus. 1,783,384; Dec. 2.
Multi-Hydro Washing Machine Company. (See Dehle, Otto T., assignor.)
N. D. Q. Specialty Corporation et al. (See Reisert, Mathias, assignor.)
Naamlooze Vennootschap Ingenieurs Kantoor voor Scheepsbouw. (See Behrmann, Georg J. K., assignor.)
Nachod and United States Signal Co. et al. (See Richterkessing, Frank H., assignor.)
Nagle, Harold E., Kansas City, Mo. Package-dispensing machine. 1,783,479; Dec. 2.
National Acme Company, The. (See Garey, Charles Q., assignor.)
National Acme Company, The. (See Hogg, William J., assignor.)
National Acme Company, The. (See Hogg, W. J., and Neumann, assignors.)
National Acme Company, The. (See Petsche, G. B. and Drissner, assignors.)
National Acme Company, The. (See Trobeck, Olof E., assignor.)
National Brick Company. (See Hilgendorf, Henry, assignor.)
National Electrical Supply Company. (See Mirick, Carlos B., assignor.)
National Enameling and Stamping Company. (See Sladky, Alexander C., assignor.)
Naugle, John J. (See Wickenden, Leonard, assignor.)
Neumann, Frederick. (See Hogg, W. J., and Neumann.)
New Departure Manufacturing Company, The. (See Hughes, Frederick G., assignor.)
Newkirk, William B., Riverside, Ill., assignor to International Patents Development Company, Wilmington, Del. Making crystalline dextrose. 1,783,626; Dec. 2.
Newton, John H., Nutley, N. J. Perpetual calendar. 1,783,302; Dec. 2.
Niebel, Gottfried, New York, N. Y. Electric bulb or similar article. Des. 82,687; Dec. 2.

Noble and Cooley Co. (See Hiers, Ralph H. and H. A., assignors.)
Nolde and Horst Company, The. (See Gosch, W. H., and Kohout, assignors.)
Noma Electric Corporation. (See Block, Joseph, assignor.)
Noma Electric Corporation. (See Sadacca, Albert, assignors.)
Norton Company. (See Larsson, Thure, assignor.)
Norton Company. (See Trefethen, C. G., and Belden, assignors.)
Norwood, Harry G., Baltimore, Md., assignor, by mesne assignments, to Balloon Rubber Heel Corporation. Rubber cushioned heel. Re17,890; Dec. 2.
Nystrom, Martin, Chicago, Ill., assignor, by mesne assignments, to United Research Corporation, Long Island City, N. Y. Sound-reproducing device. 1,783,385; Dec. 2.
Nystrom, Martin, Chicago, Ill., assignor, by mesne assignments, to United Research Corporation, Long Island City, N. Y. Making diaphragms. 1,783,386; Dec. 2.
Nystrom, Martin, Chicago, Ill., assignor, by mesne assignments, to United Research Corporation, Long Island City, N. Y. Diaphragm. 1,783,926; Dec. 2.
Oberndorfer, Louis, New York, N. Y. Shooting game. 1,783,303; Dec. 2.
O'Brien, Patrick F., Franklin, assignor to Draper Corporation, Hopedale, Mass. Feeler mechanism for looms. 1,783,518; Dec. 2.
Ohio Brass Company, The. (See Austin, Arthur O., assignor.)
Ohio Sanitary Engineering Corporation, The. (See Travers, J. T., Lewis, and Urbain, assignors.)
Ohman, Charles A., and W. T. Ohman, Great Kills, N. Y. Transmitting tube for submarines and like vessels. 1,783,668; Dec. 2.
Ohman, Willihard T. (See Ohman, Charles A. and W. T.)
Ohnstrand, Enoch, Kenmore, N. Y., assignor to Remington Rand Inc., Tonawanda, N. Y. Lock-replacing unit. 1,783,581; Dec. 2.
Oishei, John R., H. Hueber, W. Paulus, Buffalo, and E. C. Horton, Hamburg, assignors to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 1,783,582; Dec. 2.
Okatoff, Alexander P., Leningrad, Union of Socialist Soviet Republics. Producing colloidal silicic acid. 1,783,304; Dec. 2.
Old Ben Coal Corporation. (See Hertel, Otto H., assignor.)
Oliphant, John, Chicago, Ill., assignor to Sullivan Machinery Company. Displacement pumping system. 1,783,747; Dec. 2.
Oliver, Dew R., Los Angeles, Calif. Air motor. 1,783,669; Dec. 2.
Oliver, Elwyn E., Cleveland, Ohio. Gear drive for cinematographic projectors. 1,783,340; Dec. 2.
Olpin, Henry C. (See Ellis, G. H., Olpin, and Walker.)
Olson, Axel, West Roxbury, Mass. Roller weather strip for doors. 1,783,305; Dec. 2.
Olson, Carl A., F. L. Buch, and T. E. Brooks, assignors to The Lisle Manufacturing Company, Clarinda, Iowa. Shearing and riveting machine. 1,783,445; Dec. 2.
O'Malley, Frank T. (See Helmbold, M. L., and O'Malley.)
Opitz, Georg, Berlin, Germany. Letter-of-credit form. 1,783,258; Dec. 2.
Orbon Stove Co. (See Fleer, Harry H., assignor.)
O'Rourke, Tex., assignor to Card Display Inc., New York, N. Y. Display device. Des. 82,688; Dec. 2.
Otten, Lawrence F., Fort Thomas, assignor to The Wadsworth Watch Case Co., Dayton, Ky. Catch clasp for ladies' mesh bracelets. 1,783,306; Dec. 2.
Overbury, Austin A., West Orange, assignor to Monroe Calculating Machine Company, Orange, N. J. Attachment for calculating machines. 1,783,446; Dec. 2.
Owen, Morris, Oak Park, Ill. Furnace attachment. 1,783,809; Dec. 2.
Owen, Victor H. (See Johnson, Thomas W., assignor.)
Owens-Illinois Glass Company. (See La France, Richard, assignor.)
Owens-Illinois Glass Company. (See Soubier, Leonard D., assignor.)
Owens-Illinois Glass Company. (See Williams, Percy Q., assignor.)
Pacific Electric Manufacturing Corporation. (See Rea, James C., assignor.)
Packard Motor Car Company. (See Griswold, Walter R., assignor.)
Packer, Lewis C., Long Meadow, Mass., assignor to Westinghouse Electric & Manufacturing Company. Lighting unit. 1,783,519; Dec. 2.
Packer, Lewis C., Long Meadow, Mass., assignor to Westinghouse Electric & Manufacturing Company. Sewing-machine lighting unit. 1,783,544; Dec. 2.
Paradiso, Frank, Philadelphia, Pa. Shoe-stitcher attachment. 1,783,198; Dec. 2.
Parlato, Peter, Astoria, N. Y., assignor to Max Schaeffer Co., Inc. Globe for inclosed lighting units. Des. 82,690; Dec. 2.
Parsons, Cecil W. (See Baker, R. H., and Parsons.)
Parsons, Ethel, New York, N. Y., assignor to The Stearns & Foster Company, Lockland, Ohio. Textile fabric. Des. 82,691; Dec. 2.
Partlow, Alfred, Lincoln Park, assignor to Vorclone Corporation, Milwaukee, Wis. Washing-machine-cover latch. 1,783,447; Dec. 2.
Pasternak, Martin, New York, N. Y., assignor to Radio Corporation of America. Radiocabinet. Des. 82,692; Dec. 2.
Patent and Licensing Corporation, The. (See MacDonald, Chester R., assignor.)
Patocka, Theodore, College Point, N. Y., assignor to T. R. Brooks, Scranton, Pa. Protected directional signal. 1,783,307; Dec. 2.
Patricolo, Vincent, Buffalo, N. Y. Shock absorber. 1,783,387; Dec. 2.
Patricolo, Vincent, Buffalo, N. Y. Shock absorber. 1,783,388; Dec. 2.
Paulus, William. (See Oishei, J. R. Hueber, Paulus, and Horton.)
Pearce, George C., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Thermal control system. 1,783,520; Dec. 2.
Pedlar People Limited, The. (See Babe, William E., assignor.)
Pen Desk Set Company. (See Sheaffer, W. A., and Cuthbert, assignors.)
Penn, Albert, assignor to Penn Electric Switch Co., Des Moines, Iowa. Float-operated switch. 1,783,448; Dec. 2.
Penn Electric Switch Co. (See Penn, Albert, assignor.)
Pennsylvania Crusher Company. (See Borton, George W., assignor.)
Pequod Realty Corporation. (See Dalton, Nelson W., assignor.).
Pesek, Cyril P. (See Errett, A. J., and Pesek.)
Peters, Henry M., Chicago, assignor to Faries Manufacturing Company, Decatur, Ill. Portable electric lamp. Des. 82,693; Dec. 2.
Peters, John F., and A. J. Maslin, Edgewood, Pa., assignors to Westinghouse Electric and Manufacturing Company. Variable-voltage transformer. 1,783,545; Dec. 2.
Petersen, John H., West New York, N. J. Stencil printing machine. 1,783,810; Dec. 2.
Petersen, Martin J., Canyon, Minn. Trap. 1,783,670; Dec. 2.
Peterson, Clarence R., jr., Pelham Manor, N. Y. Roadbed construction for toy railways. 1,783,367; Dec. 2.
Petroleum Rectifying Company of California. (See Worthington, John T., assignor.)
Petsche, Gustav B., and A. E. Drissner, assignors to The National Acme Company, Cleveland, Ohio. Centrifuge. 1,783,546; Dec. 2.
Pfaff, Kaspar. (See Rössner, H., Steindorff, and Pfaff.)
Pfannenstiel, Hugo. (See Reddelien, G., Lange, and Pfannenstiel.)
Pfaudler Co., The. (See Jacobsen, Jens N., assignor.)
Pfager, Charles W., Evanston, assignor to The Pullman Company, Chicago, Ill. Sleeping car. 1,783,480; Dec. 2.
Phelps, Robert W., assignor to Julia King's Candy Corporation, Chicago, Ill. Box. Des. 82,689; Dec. 2.
Philadelphia Storage Battery Company. (See Roberts, David, assignor.)
Philadelphia Storage Battery Company. (See Weindel, Fred, jr., assignor.)
Picard, Stanislas, assignor to B. B. & R. Knight Corporation, Providence, R. I. Thread-extracting needle. 1,783,449; Dec. 2.
Pier, Mathias. (See Lappe, F., Koch, Pier, and Sauer.)
Pinless Clothes Line Corporation. (See Law, Otis E., assignor.)
Pittsburgh Plate Glass Company. (See Barnes, William E., assignor.)
Pittsburgh Plate Glass Company. (See Fox, John H., assignor.)
Pittsburgh Plate Glass Company. (See Hitner, Harry F., assignor.)
Pittsburgh Plate Glass Company. (See Schneider, Frederick W., assignor.)
Pittsburgh Screw & Bolt Company. (See Dicks, Thomas A., assignor.)
Pollock, Robert T., New York, N. Y., assignor to Universal Oil Products Company, Chicago, Ill. Cracking petroleum oil. 1,783,259; Dec. 2.
Popper, Otto, Vienna, Austria. Dock ship for conveying river boats across the sea. 1,783,450; Dec. 2.
Porter, George M., New York, N. Y. Magazine for printers' type. 1,783,811; Dec. 2.
Prescott Iron Works. (See Goodspeed, Jack L., assignor.)
Prescott, John O., Glenbrook, assignor to Columbia Phonograph Company, Inc., Bridgeport, Conn. Selector tuning device. 1,783,671; Dec. 2.
Press-Or Company. (See Meyer, Charles, assignor.)
Proctor, Robert V., assignor to The Commercial Shearing and Stamping Company, Youngstown, Ohio. Mine-shaft construction. 1,783,812; Dec. 2.
Pugliese, John, South Manchester, Conn. System of filtration. 1,783,341; Dec. 2.
Pullman Company, The. (See Pfiager, Charles W., assignor.)
Purdy, William G., and J. P. Speck, Tiffin, Ohio. Lattice work and supporting the same. 1,783,196; Dec. 2.
Quality Hardware and Machine Corporation. (See Moyer, Charles L., assignor.)
Rabinowitch, Israel M., Montreal, Quebec, assignor to The Montreal General Hospital, Montreal, Canada. Apparatus for diagnosing human ailments. 1,783,451; Dec. 2.

Racine Confectioners' Machinery Company. (See Cahoon, Edward E., assignor.)
Radcliffe, Frank P., Fairmont, W. Va. Signal. 1,783,855; Dec. 2.
Radio Corporation of America. (See Pasternak, Martin, assignor.)
Raimondi, Vito O., Chicago, Ill. Novelty top. 1,783,627; Dec. 2.
Ralston, Frank L., La Grande, Oreg. Detachable bladed scissors. 1,783,583; Dec. 2.
Ramapo Ajax Corporation. (See Eastburn, Samuel L., assignor.)
Ramsay, William. (See Martin, F. G., and Ramsay.)
Randolph, George B., San Antonio, Tex. Lifting device. 1,783,856; Dec. 2.
Ransome Concrete Machinery Company. (See Bushnell, James E., assignor.)
Rasch, Royal H. (See Schur, M. O., and Rasch.)
Rawls Manufacturing Company. (See Rawls, Silas E., assignor.)
Rawls, Silas E., Streator, Ill., assignor to Rawls Manufacturing Company, Mowing machine. 1,783,672; Dec. 2.
Raymond Brothers Impact Pulverizer Co., The. (See Crites, J., and Koren, assignors.)
Rayton, Wilbur B., assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Condensing lens system. 1,783,481; Dec. 2.
Rea, James C., assignor to Pacific Electric Manufacturing Corporation, San Francisco, Calif. Electrical switch. 1,783,389; Dec. 2.
Red Wing Union Stoneware Company. (See Hoyt, Elmore S., assignor.)
Reddelien, Gustav, Leipzig, H. Lange, and H. Pfannenstiel, Dessau in Anhalt, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Manufacture of aromatic hydroxyaldehydes. 1,783,584; Dec. 2.
Redig, Charles. (See Haselow, F. H., and Redig.)
Redington, John C. (See Menke, E. W., and Redington.)
Reed, Andrew H., assignor of one-third to C. W. Turner, and one-third to S. M. Coffman, Kansas City, Mo. Parachute-cord retainer. 1,783,452; Dec. 2.
Reed, Robert W., Fairport, N. Y., assignor of one-half to Harry W. Mountain, Aberdeen, S. Dak. Gauge. 1,783,260; Dec. 2.
Regan Safety Devices Company, The. (See Bodde, Theodore, assignor.)
Regents of the University of Michigan, The. (See Firestone, Floyd, assignor.)
Regina Corporation, The. (See Smith, Bernard P., assignor.)
Rehe, Albert K., assignor of one-half to R. A. Kucich, San Francisco, Calif. Continuous coffee roaster and storer. 1,783,673; Dec. 2.
Rehwold, Walton C., Beverly Hills, and J. G. Duff, Los Angeles, Calif. Vacuum-cleaner attachment for automobiles. 1,783,674; Dec. 2.
Reich, Gustave T., Drexel Hill, Pa. Purifying yeast. 1,783,521; Dec. 2.
Reinhold, Frederick E., Van Nuys, Calif. Locking plug for electric circuits. 1,783,342; Dec. 2.
Reis, Curt F., assignor to Excel Magneto Co., Chicago, Ill. Battery ignition system. 1,783,343; Dec. 2.
Reis, Curt F., Chicago, assignor to Excel Magneto Company, Chicago, Ill. Rotor for magnetos. 1,783,344; Dec. 2.
Reisert, Mathias, Brooklyn, assignor of one-half to Cypress Novelty Corporation, Brooklyn, N. Y., and one-half to N. D. O. Specialty Corporation. Combination package. 1,783,453; Dec. 2.
Reiter, Daniel L., New York, N. Y. Pronged fastener. 1,783,748; Dec. 2.
Remington Rand Inc. (See Ohnstrand, Enoch, assignor.)
Renfer, John E., assignor to The Cleveland Rock Drill Company, Cleveland, Ohio. Air-line oiler. 1,783,522; Dec. 2.
Reserve Holding Company. (See Levy, Oscar C., assignor.)
Reserve Holding Company. (See Saunders, N. H., Lomax, and Riebe, assignors.)
Rheinische Metallwaaren- und Maschinenfabrik. (See Sundhaussen, Hermann, assignor.)
Rheinische Metallwaaren- und Maschinenfabrik Sömmerda Aktiengesellschaft. (See Luce, Hans, assignor.)
Rice, Barton & Fales, Incorporated. (See Smith, H. A., Thomson, and Stafford, assignors.)
Richards, James, and N. Cortese, Arnold, Pa. Anticreeper for railway rails. 1,783,482; Dec. 2.
Richardson, Led L., Cleveland, Ohio, assignor to The Cleveland Rock Drill Company. Pile-driving tool. 1,783,523; Dec. 2.
Richter, Walter M., Staten Island, N. Y. Window construction. 1,783,433; Dec. 2.
Richterkessing, Frank H., assignor to The Cheatham Electric Switching Device Co. and Nachod and United States Signal Co., Louisville, Ky. Electric switch and signal system. 1,783,308; Dec. 2.
Ricks, Fred. (See Barclay, W. R., and Ricks.)
Riebe, Theodore C. (See Saunders, N. H., Lomax, and Riebe.)
Rieke Metal Products Corporation. (See Rieke, Theodore W., assignor.)
Rieke, Theodore W., Auburn, Ind., assignor to Rieke Metal Products Corporation. Bung fixture for sheet-metal containers. 1,783,927; Dec. 2.
Riker, Andrew L., jr., Fairfield, Conn., assignor to The Rubber Shock Insulator Corporation, Wilmington, Del. Shackle connection between spring and frame. 1,783,199; Dec. 2.
Riker, Samuel M., Chester, N. J. Shoe buckle. Des. 82,694; Dec. 2.
Riker, Samuel M., Chester, N. J. Shoe buckle. Des. 82,695; Dec. 2.
Riker, Samuel M., Chester, N. J. Shoe buckle. Des. 82,696; Dec. 2.
Riker, Samuel M., Chester, N. J. Shoe buckle. Des. 82,697; Dec. 2.
Riker, Samuel M., Chester, N. J. Shoe ornament. Des. 82,698; Dec. 2.
Riker, Samuel M., Chester, N. J. Shoe buckle. Des. 82,699; Dec. 2.
Riker, Samuel M., Chester, N. J. Shoe buckle. Des. 82,700; Dec. 2.
Riker, Samuel M., Chester, N. J. Shoe buckle. Des. 82,701; Dec. 2.
Riker, Samuel M., Chester, N. J. Shoe buckle. Des. 82,702; Dec. 2.
Ringwald, Clarence, North Hampton, assignor to Robbins & Myers, Inc., Springfield, Ohio. Combined drink mixer and juice extractor. Des. 82,703; Dec. 2.
Risler Corporation of America. (See Chardard, Jean B. D. L., assignor.)
Robbins & Myers, Inc. (See Ringwald, Clarence, assignor.)
Roberts, David, Collingswood, N. J., assignor to Philadelphia Storage Battery Company, Philadelphia, Pa. Cabinet. Des. 82,704; Dec. 2.
Roberts, Samuel J., assignor to J. A. Schadt, Scranton, Pa. School desk and seat cover. 1,783,675; Dec. 2.
Robertson, Robert R., Evanston, Ill. Etching machine. 1,783,390; Dec. 2.
Rock of Ages Corporation. (See Chase, Elroy A., assignor.)
Rodenberg, Otto H., Cincinnati, Ohio. Pilot for furnaces. 1,783,676; Dec. 2.
Rodwell Sign Company. (See Hill, Harry L., assignor.)
Roehl, Louis M., Ithaca, N. Y. Bag holder. 1,783,749; Dec. 2.
Roesen, Oscar C., Brooklyn, assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Stereotype-plate-cooling apparatus. 1,783,345; Dec. 2.
Roessler & Hasslacher Chemical Company, The. (See McKeown, Thomas H., assignor.)
Rohleder, Firm, A. (See Schwerts, Alfons L., assignor.)
Ross, Martin, assignor of one-half to R. Ross, Evansville, Ind. Paper clip. 1,783,484; Dec. 2.
Ross, Ruby. (See Ross, Martin, assignor.)
Rössner, Heinrich, A. Steindorff, and K. Pfaff, assignors to Farbwerke Vorm. Meister Lucius and Bruning, Hochst-on-the-Main, Germany. Dressing seed. 1,783,200; Dec. 2.
Rouse, John E. (See Cooke, T. S., and Rouse.)
Roussean, Stanislas, Alton, assignor to Western Cartridge Company, East Alton, Ill. Process and apparatus for making bullets. 1,783,261; Dec. 2.
Rowland, Louis D., Seattle, Wash. Safety blow-off for boilers. 1,783,368; Dec. 2.
Royal Typewriter Company. (See Degener, Gustave O., assignor.)
Rubber Shock Insulator Corporation, The. (See Riker, Andrew L., jr., assignor.)
"Rusbol", Société à Responsabilité Limitée. (See Bolard, Alfred J. G., assignor.)
Russell, Burdsall & Ward Bolt & Nut Company. (See Burdsall, Richard L., assignor.)
Rutenber, Edwin A., assignor to A. J. Lindemann & Hoverson Company, Milwaukee, Wis. Thermostatic device. 1,783,309; Dec. 2.
Ruths Steam Storage Incorporated. (See Wettstein, Fritz, assignor.)
Rutter, Argyle R., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Meter housing. 1,783,547; Dec. 2.
Sachse, Ernest C., Edgewater, N. J. Apparatus for facilitating the manipulation of manicuring. 1,783,262; Dec. 2.
Sadacca, Albert, assignor to Noma Electric Corporation, New York, N. Y. Ornamental illuminating device. 1,783,750; Dec. 2.
Sadtler, Philip B., Chicago, assignor to Swenson Evaporator Company, Harvey, Ill. Condenser. 1,783,369; Dec. 2.
Safat Società Anonima Fabbrica Armi-Torino. (See Mascarucci, Giuseppe, assignor.)
Safety Car Heating & Lighting Company, The. (See Schepmoes, Lindsley, assignor.)
St. Regis Paper Company. (See Menke, E. W., and Redington, assignors.)
Salter, Vernon D., Oakland, Calif. Game apparatus. 1,783,370; Dec. 2.
Samuelson, Alfred M., Henning, Minn. Cream cooler. 1,783,585; Dec. 2.
Sauer, Hans. (See Lappe, F., Koch, Pier, and Sauer.)
Saunders, Norman H., Homewood, C. E. Lomax, Oak Park, and T. C. Riebe, Chicago, Ill., assignors to Reserve Holding Company, Kansas City, Mo. Telephone-station equipment. 1,783,310; Dec. 2.

Sawyer, Harold L., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Device for softening stiffeners for boots and shoes. 1,783,587; Dec. 2.
Schadt, John A. (See Roberts, Samuel J., assignor.)
Schaeffer, Jacob H., Brooklyn, N. Y. Finger ring. Des. 82,705; Dec. 2.
Schaeffer, Max, Co. (See Parlato, Peter, assignor.)
Schepmoes, Lindsley, New Haven, Conn., assignor to The Safety Car Heating & Lighting Company. Lighting fixture. 1,783,311; Dec. 2.
Schicle, Frederick, Niles, Mich. Cut-out valve. 1,783,628; Dec. 2.
Schiffman, Karl. (See Schulz, W., Frischke, and Schiffmann.)
Schjolin, Eric O., Birmingham, assignor to Yellow Truck & Coach Manufacturing Company, Pontiac, Mich. Radiator. 1,783,928; Dec. 2.
Schleicher, Frank J., St. Louis, Mo. Box lid. Des. 82,708; Dec. 2.
Schmidt, Friedrich K., Speldorf, Muelheim-on-the-Ruhr, Germany. Apparatus for preventing the passing of danger signals. 1,783,857; Dec. 2.
Schmidt, Max. (See Goldacker, P., and Schmidt.)
Schmidt, Maximilian P., Wiesbaden, and O. Limpach, Biebrich, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Isatin-carbazole compound vat dyestuff. 1,783,588; Dec. 2.
Schmidt'sche Heissdampf-Gesellschaft mit beschrankter Haftung. (See Hartman, Otto H., assignor.)
Schmieder, Robert S., assignor, by mesne assignments, to Milcor Steel Company, Milwaukee, Wis. Imitation plaster. 1,783,454; Dec. 2.
Schneible, Claude B., et al., as trustees. (See Schneible, Claude B., assignor.)
Schneible, Claude B., Evanston, Ill., assignor to C. B. Schneible, K. F. Schreier, and B. B. Schneider as trustees under the name of Joseph Schneible Trust. Column. 1,783,813; Dec. 2.
Schneible, Joseph, Trust. (See Schneible, Claude B.)
Schneider, Benjamin B., et al., as trustees. (See Schneible, Claude B., assignor.)
Schneider, Frederick W., Baltimore, Md., assignor to Pittsburgh Plate Glass Company. Bristle tester. 1,783,455; Dec. 2.
Schneider, George. (See Dreyfus, C., and Schneider.)
Schnuck, Carl F., New Haven, assignor, by mesne assignments, to Farrel-Birmingham Company, Incorporated, Ansonia, Conn. Calender. 1,783,263; Dec. 2.
Schorr, Paul C., and L. H. Syring, assignors to The Commonwealth Electric Company, St. Paul, Minn. Insert. 1,783,391; Dec. 2.
Schötteldreier, Wilhelm, Nachrodt in Westfalen, Germany, assignor to Vereinigte Stahlwerke A. G. Dusseldorf. Heating rolls. 1,783,524; Dec. 2.
Schreier, K. F., et al., as trustees. (See Schneible, Claude B., assignor.)
Schroder, John E., assignor to Hartford-Empire Company, Hartford, Conn. Apparatus for handling glassware. 1,783,939; Dec. 2.
Schroeder, Arthur C., Syracuse, and W. D. Kimball, New York, assignors to Standard Sealing Equipment Corporation, Long Island City, N. Y. Carton handling and sealing apparatus. 1,783,814; Dec. 2.
Schubnell, Hugo H., New York, N. Y. Match-book holder. 1,783,751; Dec. 2.
Schulz, Werner, M. Frischke, and K. Schiffmann, assignors to Siemens & Halske, Aktiengesellschaft, Wernerwerk, Siemensstadt, near Berlin, Germany. Telephone system. 1,783,312; Dec. 2.
Schur, Milton O., and R. H. Rasch, assignors to Brown Company, Berlin, N. H. Material for conversion into cellulose derivatives and producing the same. 1,783,313; Dec. 2.
Schwab, Francis C. (See Garrett, Edmund A., assignor.)
Scofield, Edgar, New York, assignor to Anchor Cap & Closure Corporation, Long Island City, N. Y. Two-piece closure cap. 1,783,314; Dec. 2.
Scott, James G., Washington, D. C. Refrigerator. Des. 82,706; Dec. 2.
Scott & Williams, Inc. (See Sutphen, John L., assignor.)
Scovill Manufacturing Company. (See Boden, George, assignor.)
Scoville Manufacturing Company. (See George, J. S., and Sperry, assignors.)
Scully, John T., New York, N. Y. Handle for tools. 1,783,346; Dec. 2.
Seeger, Edwin W., South Milwaukee, assignor, by mesne assignments, to Cutler-Hammer Inc., Milwaukee, Wis. Push-button elevator-control system. 1,783,629; Dec. 2.
Seiwerts, Alfons L., Barmen-Langerfeld, assignor to the Firm A. Rohleder, Barmen, Germany. Valenciennes lace. 1,783,858; Dec. 2.
Self-Locking Carton Company. (See Troyk, Felix, assignor.)
Selzer, Clarence F., North Milwaukee, Wis. Ship-steering device. 1,783,752; Dec. 2.
Selzer, Glenn, Protection, Kans. Choke and needle valve control. 1,736,677; Dec. 2.
Sexton, John R., Meriden, Conn. Tinsel cord. 1,783,315; Dec. 2.
Shaw, Al B., assignor to D. M. Storey, Santa Monica, Calif. Paper clip or fastener. 1,783,678; Dec. 2.
Shaw, Thomas E., assignor of three-fourths to The W. E. Floding Company, Atlanta, Ga. Garment. 1,783,485; Dec. 2.
Shay, Ralph R., assignor, by mesne assignments, to T. A. Banning, jr., Chicago, Ill. Moistener for gummed strips and the like. 1,783,679; Dec. 2.
Sheaffer, Walter A., and W. R. Cuthbert, Fort Madison, Iowa; said Cuthbert assignor, by mesne assignments, to Pen Desk Set Company. Fountain-pen desk stand. 1,783,630; Dec. 2.
Sheedy, Frank T., H. C. Wood, and L. Traung, assignors to The Traung Company, San Francisco, Calif. Transfer press. 1,783,888; Dec. 2.
Sheldrick, Laurence S., assignor to Ford Motor Company, Dearborn, Mich. Instrument panel. Des. 82,710; Dec. 2.
Shelton, Dwight J. (See King, C. B., Jacoby, and Shelton.)
Shelton, Edward L., Memphis, Tenn. Combined license-tag mounting and signal and tail light. 1,783,316; Dec. 2.
Shepard, Alban F., Richmond, England. Converting rotary into reciprocating motion and vice versa. 1,783,589; Dec. 2.
Sherman, Rallston M., Glastonbury, assignor to The Silent Glow Oil Burner Corporation, Hartford, Conn. Oil stove. 1,783,392; Dec. 2.
Sherover, Max, assignor to Golding Bros. Company, Inc., New York, N. Y. Mattress cover. Des. 82,707; Dec. 2.
Shields, James J., Guelph, Ontario, Canada. Gate operating and locking mechanism. 1,783,753; Dec. 2.
Shoe Form Co. (See De Witt, William J., assignor.)
Shoemaker, William D. (See Young, Frank L., assignor.)
Siebel, Gustav. (See Beck, A., and Siebel.)
Siemens & Halske Aktiengesellschaft. (See Schulz, W., Frischke, and Schiffmann, assignors.)
Sierad, Milton, assignor to George W. Button Corporation, New York, N. Y. Face-powder container. Des. 82,709; Dec. 2.
Signode Steel Strapping Company. (See Leslie, John W., assignor.)
Sigsbey, Fred W., Willoughby, Ohio. Feed apron for wringers. 1,783,347; Dec. 2.
Silent Glow Oil Burner Corporation, The. (See Sherman, Rallston M., assignor.)
Siller, Everett F. (See Mayer, C. W., and Siller.)
Simon, Henry H., Greenville, S. C. Airplane. 1,783,590; Dec. 2.
Sinclair, Peter S., Holyoke, Mass. Ball-bearing mounting for dandy rolls. 1,783,317; Dec. 2.
Sindeband, Maurice L., New York, N. Y., and O. K. Marti, Haddonfield, N. J., assignors to American Brown Boveri Electric Corporation, New York, N. Y. Power system and apparatus therefor. 1,783,548; Dec. 2.
Sirotek, Louis, Chicago, Ill. Mixing valve. 1,783,264; Dec. 2.
Sladky, Alexander C., assignor to National Enameling and Stamping Company, Milwaukee, Wis. Insect trap. 1,783,631; Dec. 2.
Smith, A. O., Corporation. (See Bell, Raymond T., assignor.)
Smith, A. O., Corporation. (See Crawford, William E., assignor.)
Smith, Bernard P., assignor to The Regina Corporation, Rahway, N. J. Disinfecting attachment for vacuum cleaners. 1,783,859; Dec. 2.
Smith, Herman A., G. H. Thomson, Worcester, and S. B. Stafford, Oxford, assignors to Rice, Barton & Fales, Incorporated, Worcester, Mass. Gearing for textile-printing machines. 1,783,889; Dec. 2.
Smith, Winfield D., Deal, N. J., assignor to L. G. Sylvester, Scranton, Pa. Electrical pickup. 1,783,265; Dec. 2.
Smitmans, John A., assignor to United Engineering & Foundry Company, Pittsburgh, Pa. Manipulator. 1,783,815; Dec. 2.
Société Anonyme pour l'Exploitation des Procédés Maurice Leblanc-Vickers. (See Follain, Raoul F., assignor.)
Société P. & P. Levy dite Etablissements J et S Levy Fréres. (See Lévy, Pierre, assignor.)
Solar Refining Company, The. (See Werkenthin, Theodore A., assignor.)
Solomon, Charles, Yonkers, N. Y., assignor, by mesne assignments, to Superior Hat Company, St. Louis, Mo. Hat. 1,783,549; Dec. 2.
Sommer, William H., Peoria, Ill. Machine for making welded reenforcing fabrics. 1,783,944; Dec. 2.
Sommer, William H., Peoria, Ill. Heating apparatus. 1,783,945; Dec. 2.
Sommer, William H., Peoria, Ill. Wire-fence machine. 1,783,946; Dec. 2.
Sommer, William H., Peoria, Ill. Stop mechanism for detecting irregularities in wire feeding. 1,783,947; Dec. 2.
Sommer, William H., Peoria, Ill. Making wire fabrics. 1,783,948; Dec. 2.
Soubier, Leonard D., assignor to Owens-Illinois Glass Company, Toledo, Ohio. Glassware-forming machine. 1,783,201; Dec. 2.
Speck, John P. (See Purdy, W. G., and Speck.)
Spencer, Owen H., Indianapolis, Ind. Engine-cooling cowl. 1,783,318; Dec. 2.
Sperry Gyroscope Company Inc. (See Bates, Mortimer F., assignor.)
Sperry, Roger S. (See George, J. S., and Sperry.)

Sperry, Samuel E., Hollis, assignor to Intertype Corporation, Brooklyn, N. Y. Matrix magazine. 1,783,929; Dec. 2.
Squibb, E. R., and Sons. (See Keelan, Harry S., assignor.)
Squire, Mary E., Manitowoc, Wis. Spall-burning kiln. 1,783,632; Dec. 2.
Stafford, Stephen B. (See Smith, H. A., Thomson, and Stafford.)
Standard Engineering Works, The. (See Mills, Bertram M., assignor.)
Standard Modern Printing Co. (See Brooks, C. P., jr., and Kovner, assignors.)
Standard Oil Company. (See Cooke, T. S., and Rouse, assignors.)
Standard Oil Company. (See Wood, W. E., and Bachelder, assignors.)
Standard Sealing Equipment Corporation. (See Schroeder, A. C., and Kimball, assignors.)
Statham, Noel, Irvington-upon-Hudson, N. Y. Flexible fastening device. 1,783,550; Dec. 2.
Stearns & Foster Company, The. (See Parsons, Ethel, assignor.)
Steel Heddle Manufacturing Company. (See Kaufmann, John J., assignor.)
Steel Scaffolding Company Limited, The. (See Marshall, Arnold C., assignor.)
Steen, Willa. (See Bolton, Becher B., assignor.)
Stein, Frederick W., Atchison, Kans. Radiocabinet. Des. 82,711; Dec. 2.
Steindorff, Adolf. (See Rössner, H., Steindorff, and Pfaff.)
Stepelton, Aubry F., assignor of one-half to W. R. Kirk, Chicago, Ill. Soap-dispensing shaving brush. 1,783,754; Dec. 2.
Stephenson Protectahood Corporation. (See Stephenson, Robert J., assignor.)
Stephenson, Robert J., assignor to Stephenson Protectahood Corporation, Auburn, N. Y. Lining for automobile hoods. 1,783,816; Dec. 2.
Sterling, Claude H., assignor to General Motors Research Corporation, Detroit, Mich. Overgear transmission. 1,783,393; Dec. 2.
Sterling, Claude H., assignor to General Motors Corporation, Detroit, Mich. Overgear transmission. 1,783,930; Dec. 2.
Stevens, Albert B., Inspiration, Ariz. Apparatus for leaching and washing ores by the use of gas. 1,783,591; Dec. 2.
Stevenson, Robert A., Wilmington, Del. Combined lifting and carrying tool. 1,783,680; Dec. 2.
Stewart, Duncan J., assignor to H. D. Colman, Rockford, Ill. Light-control system. 1,783,633; Dec. 2.
Stewart, Patterson O., New York, N. Y. Antifouling spark plug. 1,783,525; Dec. 2.
Stewart, Patterson O., New York, N. Y. Spark plug. 1,783,526; Dec. 2.
Stimpson, Robert H. (See Van der Pyl, E., and Stimpson.)
Stockard, Richard L., Forrest City, Ark. Lap link. 1,783,860; Dec. 2.
Stone, J., & Company Limited. (See Martin, F. G., and Ramsay, assignors.)
Storey, Dorothy M. (See Shaw, Al B., assignor.)
Stranahan, Samuel A., Flint, assignor to General Motors Corporation, Detroit, Mich. Steel-plate spring shackles. 1,783,394; Dec. 2.
Sturgis Posture Chair Company. (See Huntley, Reginald C., assignor.)
Sullivan Machinery Company. (See Oliphant, John, assignor.)
Sundback, Gideon, Meadville, Pa., assignor to Hookless Fastener Company. Fastener. Re17,891; Dec. 2.
Sundhaussen, Hermann, Dusseldorf-Rath, assignor to Rheinische Metallwaaren-und Maschinenfabrik, Dusseldorf-Derendorf, Germany. Compensator for brush-resistance voltage drop in motor-control systems. 1,783,527; Dec. 2.
Superior Hat Company. (See Solomon, Charles, assignor.)
Superior Hat Company. (See Wittcoff, Edward, assignor.)
Sutphen, John L., Philadelphia, Pa., assignor to Scott & Williams, Inc., New York, N. Y. Knitting machine. 1,783,202; Dec. 2.
Swann Research, Inc. (See Durgin, C. B., Gerber, and Logue, assignors.)
Swenson Evaporator Company. (See Sadtler, Philip B., assignor.)
Sylvester, Louis G. (See Smith, Winfield D., assignor.)
Symons, Arthur H., assignor to Symons Clamp & Mfg. Company, Chicago, Ill. Shore. 1,783,266; Dec. 2.
Symons Clamp & Mfg. Company. (See Symons, Arthur H., assignor.)
Syring, Louis H. (See Schorr, P. C., and Syring.)
Szegvari, Andrew. (See Klein, P., and Szegvari.)
Tannehill, Vernon L., assignor to Fort Wayne Engineering and Manufacturing Company, Fort Wayne, Ind. Control mechanism for electric motors. 1,783,634; Dec. 2.
Tapp, Ernest T. J., London, England. Self-propelled road vehicle. 1,783,890; Dec. 2.
Tatum, John J. (See Emerson, G. H., and Tatum.)
Taylor, Alston D., Los Angeles, Calif. Automatic gas-control valve. 1,783,395; Dec. 2.
Taylor, Cecil H., Detroit, Mich. Shimmying dampener. 1,783,348; Dec. 2.
Teletype Corporation. (See Krum, Howard L., assignor.)
Tenney, Perry L., and H. E. Fidler, Muncie, Ind., assignors to General Motors Corporation, Detroit, Mich. Transmission control. 1,783,931; Dec. 2.
Terry, Owen A., Detroit, Mich. Fountain-pen-refill indicator. 1,783,681; Dec. 2.
Thatcher, J. H. (See Miller, Jesse P., assignor.)
Thibert, Napoleon R., Worcester, Mass. Feed tank. 1,783,891; Dec. 2.
Thiem, Edward A., Minneapolis, Minn. Antifrost device. 1,783,861; Dec. 2.
Thiess, Karl, and E. Fischer, Frankfort-on-the-Main, Hochst, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Vat dyestuff of the benzothionaphthene series. 1,783,592; Dec. 2.
Thomas, George C., Swampscott, Mass., assignor to Fitz-Empire Double Pivot Last Company, Auburn, Me. Hinge last. 1,783,682; Dec. 2.
Thomas, George C., Swampscott, Mass., assignor to Fitz-Empire Double Pivot Last Company, Auburn, Me. Hinged last. 1,783,862; Dec. 2.
Thompson, Willsie A. S. (See Gunn, R. W. and Thompson.)
Thomson, George H. (See Smith, H. A., Thomson, and Stafford.)
Thorpe, Samuel T. (See Broadwell, H. S., and Thorpe.)
Three-M Manufacturing Company. (See Moore, Walter N., assignor.)
Tillberg, Charles, Chicago, Ill. Door-operated signal. 1,783,267; Dec. 2.
Time-O-Stat Controls Company. (See Hotchkiss, Clifford, assignor.)
Time-O-Stat Controls Company. (See Leach, Edgar J., assignor.)
Titania Corporation. (See von Bichowsky, Foord, assignor.)
Tokheim Oil Tank and Pump Company. (See Ellers, Frank B., assignor.)
Tomlinson, Julian D., College Place, Wash. Crack filler. 1,783,683; Dec. 2.
Traung Company, The. (See Sheedy, F. T., Wood, and Traung, assignors.)
Traung, Louis. (See Sheedy, F. T., Wood, and Traung.)
Traver, Harry G., Beaver Falls, Pa. Amusement ride and car therefor. 1,783,268; Dec. 2.
Travers, John T., Columbus, C. H. Lewis, Harpster, and O. M. Urbain, Columbus, assignors to The Ohio Sanitary Engineering Corporation, Columbus, Ohio. Mineral adsorbent and manufacturing same. 1,783,396; Dec. 2.
Trefethen, Charles G., and A. G. Belden, assignors to Norton Company, Worcester, Mass. Grinding machine. 1,783,755; Dec. 2.
Tregoning, William C., Milwaukee, Wis., assignor, by mesne assignments, to Cutler-Hammer, Inc. Electric snap switch. 1,783,635; Dec. 2.
Tregoning, William C., Wauwatosa, assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Electric snap switch. 1,783,636; Dec. 2.
Trico Products Corporation. (See Oishei, J. R., Hueber, Paulus, and Horton, assignors.)
Tritle, John F., Erie, Pa., assignor to General Electric Company. Electrical resistor. 1,783,863; Dec. 2.
Trobeck, Olof E., Berlin, Germany, assignor to The National Acme Company, Cleveland, Ohio. Cross-tool slide for multiple-spindle automatic screw machines. 1,783,528; Dec. 2.
Troyk, Felix, Chicago, Ill., assignor to Self-Locking Carton Company. Cushioned carton. 1,783,397; Dec. 2.
Trumble, John T., Lansing, assignor to General Motors Corporation, Detroit, Mich. Fuel pump. 1,783,940; Dec. 2.
Trumbull Electric Manufacturing Company, The. (See Getchell, Benjamin E., assignor.)
Trumbull Electric Manufacturing Company, The. (See Hanny, Charles E., assignor.)
Trumbull Electric Manufacturing Company, The. (See Leppert, Henry E., assignor.)
Trussa, George. (See Israel, H. H., and Trussa.)
Tunstall, William B., Worcester, Mass. Mechanism for player pianos. 1,783,319; Dec. 2.
Turner, Charles W., et al. (See Reed, Andrew H., assignor.)
Tuthill, James B. (See Wilsey, Irven H., assignor.)
Tweddell, Oscar G., assignor of sixty per cent to F. Fiesselmann, Detroit, Mich. Vertical turret lathe. 1,783,637; Dec. 2.
Typograph-Gesellschaft m. b. H. (See Dorneth, Julius, assignor.)
Union Switch & Signal Company, The. (See Grondahl, L. O., and Howard, assignors.)
Unique Spark Plug Cleaner Co. (See Floyd, Ray H., assignor.)
United Engineering & Foundry Company. (See Klein, Clarence J., assignor.)
United Engineering & Foundry Company. (See Smitmans, John A., assignor.)
United Research Corporation. (See Nystrom, Martin, assignor.)
United Shoe Machinery Corporation. (See Barclay, W. R., and Ricks, assignors.)
United Shoe Machinery Corporation. (See Finn, Sidney J., assignor.)
United Shoe Machinery Corporation. (See Sawyer, Harold L., assignor.)

United States Glass Company. (See Beam, Charles C., assignor.)
Universal Oil Products Company. (See Dubbs, Carbon P., assignor.)
Universal Oil Products Company. (See Egloff, G., and Benner, assignors.)
Universal Oil Products Company. (See Egloff, G., and Morrell, assignors.)
Universal Oil Products Company. (See Morrell, J. C., and Benner, assignors.)
Universal Oil Products Company. (See Pollock, Robert T., assignor.)
Unke, Herman A., Cleveland, Ohio. Thread protector. 1,783,892; Dec. 2.
Unke, Herman A., Cleveland, Ohio. Pipe end protector. 1,783,893; Dec. 2.
Urbain, Oliver M. (See Travers, J. T., Lewis, and Urbain.)
Van der Pyl, Edward, Wilton, and R. H. Stimpson, assignors to Automatic Packaging Machinery Company, Nashua, N. H. Carton-feeding magazine. 1,783,912; Dec. 2.
Vasey, Joseph N., Brookfield, Ill. Musical instrument. 1,783,638; Dec. 2.
Vereinigte Stahlwerke A. G. Dusseldorf. (See Schöttel-dreier, Wilhelm, assignor.)
Victor, Benjamin J., Oak Park, assignor to Victor Manufacturing & Gasket Company, Chicago, Ill. Safety attachment for punch presses. 1,783,817; Dec. 2.
Victor Manufacturing & Gasket Company. (See Victor, Benjamin J., assignor.)
Vogt, Clarence W., assignor to Vogt Instant Freezers, Inc., Louisville, Ky. Apparatus and process for treating materials. 1,783,864; Dec. 2.
Vogt, Clarence W., Louisville, Ky., assignor to Vogt Instant Freezers, Inc. Machine for processing materials. 1,783,865; Dec. 2.
Vogt, Clarence W., assignor to Vogt Instant Freezers, Inc., Louisville, Ky. Process and apparatus for treating materials. 1,783,866; Dec. 2.
Vogt, Clarence W., Louisville, Ky., assignor to Vogt Instant Freezers, Inc. Machine for processing materials. 1,783,867; Dec. 2.
Vogt Instant Freezers, Inc. (See Vogt, Clarence W., assignor.)
Volet, René A. L., La Vareune St. Hilaire, France. Pump. 1,783,486; Dec. 2.
Volhardt, Heinrich, Frankfort-on-the-Main, Germany. Whipping top. 1,783,593; Dec. 2.
Von Bichowsky, Foord, Glendale, assignor to Titania Corporation, Los Angeles, Calif. Titanium-acid sulphate and producing same. 1,783,684; Dec. 2.
Von Frankenberg, Arthur, New York, N. Y. Water-tight receptacle. 1,783,756; Dec. 2.
Von Nessen, Walter, New York, N. Y., assignor to Efcolite Corporation, Trenton, N. J. Lighting-fixture bracket or article of similar nature. Des. 82,712; Dec. 2.
Von Staden, Hans A., and A. Hoehn, Neuroessen, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Dehydration of moist fuels. 1,783,757; Dec. 2.
Vorclone Corporation. (See Partlow, Alfred, assignor.)
Voss, James D., Oakleigh, near Melbourne, Australia. Vulcanizing appliance. 1,783,894; Dec. 2.
Wadsworth, George H. (See Welton, P. E., and Wadsworth.)
Wadsworth Watch Case Co., The. (See McFarland, James C., assignor.)
Wadsworth Watch Case Co., The. (See Otten, Lawrence F., assignor.)
Wagner Electric Corporation. (See Welchsel, Hans, assignor.)
Walker, Arthur W., Malden, Mass. Thermostatic control apparatus. 1,783,320; Dec. 2.
Walker, Eric E. (See Ellis, G. H., Olpin, and Walker.)
Waterbury Farrel Foundry and Machine Company, The. (See Candee, Zenas P., assignor.)
Waterman, Waldo D., Santa Monica Canyon, Calif. Aeroplane control. 1,7835,29; Dec. 2.
Watt, Elihu D., La Grange, and G. W. Conover, Chicago, assignors to The Conover Company, Chicago, Ill. Dish-washing machine. 1,783,349; Dec. 2.
Watts, James R., New Castle, Del., assignor to American Manganese Steel Company, Chicago, Ill. Dipper tooth. 1,783 350; Dec. 2.
Waukesha Motor Company. (See Horning, Harry L., assignor.)
Wayles, Edgar E., East Hartford, Conn. Muffler for burners. 1,783,685; Dec. 2.
Wayne Company. (See Geyer, B. F., and Jauch, assignors.)
Wayne Pump Company, The. (See MacMillen, William C., assignor.)
Weaver, Allan, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Electrical transmission of pictures. 1,783,321; Dec. 2.
Welchsel, Hans, assignor to Wagner Electric Corporation, St. Louis, Mo. Commutator. 1,783,371; Dec. 2.
Weindel, Fred, jr., Allentown, assignor to Philadelphia Storage Battery Company, Philadelphia, Pa. Escutcheon plate. Des. 82,713; Dec. 2.
Weiss, Carl W., Brooklyn, N. Y. Power-transmission device. 1,783,758; Dec. 2.
Weiss, Harry H., Chicago, Ill. Material-transfer apparatus. 1,783,487; Dec. 2.
Welton, P. E., Engineering Company, The. (See Welton, P. E., and Wadsworth, assignors.)
Welton, Park E., and G. H. Wadsworth, assignors to The P. E. Welton Engineering Company, Akron, Ohio. Fuel briquette. 1,783,759; Dec. 2.
Wenzel, Max, Muldenstein, near Bitterfeld, Germany. Paper manufacture. 1,783,868; Dec. 2.
Werkenthin, Theodore A., assignor to The Solar Refining Company, Lima, Ohio. Process of and apparatus for the fractional extraction of petroleum hydrocarbons with alcohol. 1,783,203; Dec. 2.
Werner, Frank J., Portage Township, Porto County, Ind. Burner structure. 1,783,818; Dec. 2.
Western Cartridge Company. (See Rousseau, Stanislas, assignor.)
Westinghouse Electric & Manufacturing Company. (See Cone, James H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Ehrenfeld, Ralph, assignor.)
Westinghouse Electric & Manufacturing Company. (See Forshee, Frank F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Goldsborough, Shirley L., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hanna, Clinton R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Jordan, Richard H., assignor.)
Westinghouse Electric and Manufacturing Company. (See MacGahan, Paul, assignor.)
Westinghouse Electric & Manufacturing Company. (See Matthews, Howard D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Miller, Frederic H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Packer, Lewis C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Pearce, George C., assignor.)
Westinghouse Electric and Manufacturing Company. (See Peters, J. F., and Maslin, assignors.)
Westinghouse Electric & Manufacturing Company. (See Rutter, Argyle R., assignor.)
Westinghouse Electric & Manufacturing Company. (See White, Harold E., assignor.)
Westinghouse Lamp Company. (See Ferguson, J. E., assignor.)
Westinghouse Lamp Company. (See Ferguson, J. E., Conn. and Hoffman, assignors.)
Westinghouse Lamp Company. (See Garrett, Milan W., assignor.)
Westinghouse Lamp Company. (See Hoyt, Milton A., assignor.)
Westinghouse Lamp Company. (See Johnson, Allan W., assignor.)
Westinghouse Lamp Company. (See Massie, Arnold C., assignor.)
Wettstein, Fritz, Summit, N. J., assignor, by mesne assignments, to Ruths Steam Storage Incorporated, New York, N. Y. Steam plant. 1,783,204; Dec. 2.
Whirldry Corporation. (See Dunham, George W., assignor.)
White, Harold E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Protective relay. 1,783,552; Dec. 2.
White, Harry B., Canton, Ohio, assignor to The Hoover Company. Cleaner. 1,783,205; Dec. 2.
Whitin Machine Works. (See Aveyard, Charles, assignor.)
Whitin Machine Works. (See Holt, Edwin M., assignor.)
Whitney, F. A., Carriage Company. (See Blanchard, Berton L., assignor.)
Whitney, Karl H., assignor to Whitney Manufacturing Company, Kirksville, Mo. Supporting bracket for window hangings. Re17,896; Dec. 2.
Whitney Manufacturing Company. (See Whitney, Karl H., assignor.)
Wicaco Machine Corporation, The. (See Lawser, Charles W., assignor.)
Wickenden, Leonard, Flushing, assignor to J. J. Naugle, Rye, N. Y. Treating saccharine fluids. 1,783,551; Dec. 2.
Widdis, Albert L., Harrisville, Mich. Antifriction attachment for vessels. 1,783,322; Dec. 2.
Wigton, George H., Eureka, Utah. Concentration of ores. 1,783,206; Dec. 2.
Wigton, George H., Eureka, Utah. Concentration of ores. 1,783,207; Dec. 2.
Wilbur, Lawrence S., Evanston, Ill. Splice bar or fish-plate. 1,783,351; Dec. 2.
Wilbur, Lawrence S., Evanston, Ill. Splice bar or fish-plate. 1,783,352; Dec. 2.
Wilbur, Lawrence S., Evanston, Ill. Splice bar or fish-plate. 1,783,353; Dec. 2.
Wilhelm, Ottmar, assignor to Maschinenfabrik Augsburg-Nuernberg, Aktiengesellschaft, Augsburg, Germany. Rotary intaglio-printing multimachines. 1,783,819; Dec. 2.
Willard, Donald E. (See Blake, Dennis B. D., assignor.)
Williams Company, The. (See Boehler, Raymond F., jr., assignor.)
Williams Oil-O-Matic Heating Corporation. (See Celander, Philip A., assignor.)
Williams, Percy Q., assignor to Owens-Illinois Glass Company, Toledo, Ohio. Glassware-annealing leer. 1,783,208; Dec. 2.
Williams, Samuel F., San Diego, Calif. Folding ladder. 1,783,686; Dec. 2.

Wilsey, Irven H., assignor to J. B. Tuthill, Chicago, Ill. Spur-gear pump. 1,783,209; Dec. 2.
Wilson, Elmer L., Indianapolis, Ind. Corner clamp. 1,783,456; Dec. 2.
Wilson, Ira J. (See Miller, Frank W., assignor.)
Wilson, Robert G., Wayne, and R. M. Wilson, Upper Darby, Pa., assignors to The Huffman Manufacturing Company, Dayton, Ohio. Liquid measuring and dispensing can. 1,783,457; Dec. 2.
Wilson, Ronald M. (See Wilson, Robert G., and R. M.)
Windsor, George W., assignor of one-third to A. E. Grimm, Sacramento, Calif. Vertical-lift airplane. 1,783,458; Dec. 2.
Wintbrop Chemical Company. (See Reddelien, G., Lange, and Pfannenstiel, assignors.)
Wire Novelty Manufacturing Co., The. (See Domkee, John H., assignor.)
Wittcoff, Edward, assignor to Superior Hat Company, St. Louis, Mo. Hat. 1,783,760; Dec. 2.
Wolfer, Paul C., Everett, Mass. Boot or shoe. 1,783,210; Dec. 2.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Cutting cushion for folding cylinders. Re17,892; Dec. 2.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Tilting casting box. 1,783,323; Dec. 2.
Wood, Hugh C. (See Sheedy, F. T., Wood, and Traung.)
Wood Newspaper Machinery Corporation. (See Wood, Henry A. W., assignor.)
Wood, William E., Alton, and W. H. Bacheldor, Wood River, Ill., assignors to Standard Oil Company, Whiting, Ind. Head-locking mechanism for containers. 1,783,687; Dec. 2.
Woodbury, Clifford A., Media, Pa., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Detonator and process of making. 1,783,372; Dec. 2.
Woods, Thomas E., Redding, Calif. Vise. 1,783,594; Dec. 2.
Worrell, Howard S., Ardmore, Pa., assignor to Dictaphone Corporation, Bridgeport, Conn. Phonographic recording. 1,783,761; Dec. 2.
Worthington, John T., Long Beach, assignor to Petroleum Rectifying Company, California, Los Angeles, Calif. Dehydrator having horizontal revolving electrodes. 1,783,595; Dec. 2.
Woytych, Raymond M., Fond du Lac, Wis., assignor, by mesne assignments, to The Heald Machine Company, Worcester, Mass. Work holder. 1,783,596; Dec. 2.
Wright, Herbert, jr. (See John, W. J., and Wright.)
Wright, James G. E., Alplans, N. Y., assignor to General Electric Company. Restoring shrunken films. 1,783,895; Dec. 2.
Wurlod, Luis, Buenos Aires, Argentina. Spittoon of variable height fit for dentists or physicians. 1,783,688; Dec. 2.
Wuyts, Joseph, Staten Island, assignor to Black, Starr and Frost, New York, N. Y. Plate or similar article. Des. 82,714; Dec. 2.
Yarnall, David R., and J. Kildare, assignors to Yarnall-Waring Company, Philadelphia, Pa. Packing for plungers. 1,783,762; Dec. 2.
Yarnall-Waring Company. (See Yarnall, D. R., and Kilhare, assignors.)
Yellow Truck and Coach Manufacturing Company. (See Ball, Charles O., assignor.)
Yellow Truck & Coach Manufacturing Company. (See Bock, Carl J., assignor.)
Yellow Truck & Coach Manufacturing Company. (See Schjolin, Eric O., assignor.)
Young, Frank L., assignor to W. D. Shoemaker, Washington, D. C. Extension-clutch control for tractor equipment. 1,783,324; Dec. 2.
Young, Leland G., Muscatine, Iowa. Clothes drier. 1,783,488; Dec. 2.
Zeb, Joseph, Spokane, Wash. Pea or like material splitting mechanism. 1,783,489; Dec. 2.
Zimmers, Joseph B., Chicago, Ill. Drip and trim molding. 1,783,896; Dec. 2.
Zubsty, Joseph, assignor to A C Spark Plug Company, Flint, Mich. Reset mechanism for odometers. 1,783,398; Dec. 2.
Zubaty, Joseph, assignor to A C Spark Plug Company, Flint, Mich. Ammeter. 1,783,932; Dec. 2.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 2D DAY OF DECEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Acid, Producing colloidal silicic. A. P. Okatoff. 1,783,304; Dec. 2.
Acid sulphate and producing same, Titanium. F. von Bichowsky. 1,783,684; Dec. 2.
Adding machine and cash register, Combined duplex. E. Kassner. 1,783,943; Dec. 2.
Adjustable chair. R. C. Huntley. 1,783,426; Dec. 2.
Adjustable clamp. H. V. Holman. 1,783,713; Dec. 2.
Aerofoil construction. N. W. Dalton. 1,783,413; Dec. 2.
Aeroplane control. W. D. Waterman. 1,783,529; Dec. 2.
Air-filter cells, Apparatus for cleaning. J. R. McConnell and A. S. Lewis, jr. 1,783,194; Dec. 2.
Air moistener for internal-combustion engines. E. Miller, 1,783,254; Dec. 2.
Air motor. D. R. Oliver. 1,783,669; Dec. 2.
Airplane. H. H. Simon. 1,783,590; Dec. 2.
Airplane, Vertical lift. G. W. Windsor. 1,783,458; Dec. 2.
Air preheater for manifolds. E. H. Falk. 1,783,781; Dec. 2.
Ammeter. J. Zubaty. 1,783,932; Dec. 2.
Amplifiers, Compensating system for. J. Bethenod. 1,783,557; Dec. 2.
Amusement ride and car therefor. H. G. Traver. 1,783,268; Dec. 2.
Anchor for drilling mechanism. G. W. Hulshizer. 1,783,200; Dec. 2.
Antenna weight. C. B. Mirick. 1,783,299; Dec. 2.
Antifriction attachment for vessels. A. L. Widdis. 1,783,322; Dec. 2.
Antifrost device. E. A. Thiem. 1,783,861; Dec. 2.
Apparatus for diagnosing human ailments. I. M. Rabinowitch. 1,783,451; Dec. 2.
Apparatus for preventing the passing of danger signals. F. K. Schmidt. 1,783,857; Dec. 2.
Apparel, Wearing. J. J. Hayes. 1,783,505; Dec. 2.
Apron, Turpentine. J. O. Huxford. 1,783,650; Dec. 2.
Automobile gate. P. J. McGrath. 1,783,579; Dec. 2.
Automobile jack. A. J. G. Bolard. 1,783,822; Dec. 2.
Automobile signal. H. Grob. 1,783,422; Dec. 2.
Back filler. W. R. Bunch. 1,783,941; Dec. 2.
Bag: *See*—
Valve bag.
Bag for umbrellas and pocketbooks, Combined lady's hand. A. G. Berwin. 1,783,275; Dec. 2.
Bags, Making. H. B. Laymon. 1,783,845; Dec. 2.
Banjos, Resonating means for. W. L. Lange. 1,783,244; Dec. 2.
Barytes, Treating. C. P. De Lore and B. B. McHan. 1,783,778; Dec. 2.
Baseboard construction. I. A. Baum. 1,783,180; Dec. 2.
Bath fixture. G. P. Boehm. 1,783,492; Dec. 2.
Battery ignition system. C. F. Reis. 1,783,343; Dec. 2.
Bearing for connecting-rod assemblies, Crank-pin. H. L. Brownback. 1,783,698; Dec. 2.
Bearing mounting for dandy rolls, Ball-. P. S. Sinclair. 1,783,317; Dec. 2.
Bearings, Assembling antifriction. F. G. Hughes. 1,783,791; Dec. 2.
Bearings, Making. C. H. Landers. 1,783,438; Dec. 2.
Bed, Sliding-spiral-spring. P. P. Bebry. 1,783,531; Dec. 2.
Binder, Loose-leaf. J. L. McMillan. Re17,895; Dec. 2.
Bit: *See*—
Drill bit.
Blast furnace. J. P. Dovel. 1,783,416; Dec. 2.
Block: *See*—
Crown block.
Boat, Submarine. G. J. K. Behrmann. 1,783,691; Dec. 2.
Boats, Propelling mechanism for. E. H. Fahrney. 1,783,331; Dec. 2.
Bobbin or spool cap. J. R. Mitchell. 1,783,339; Dec. 2.
Boiler installation, Multipressure-. G. H. Hartmann. 1,783,842; Dec. 2.
Boiler return and vacuum trap. S. C. Knefel. 1,783,381; Dec. 2.
Boilers, Safety blow-off for. L. D. Rowland. 1,783,368; Dec. 2.
Bomb sight. M. F. Bates. 1,783,769; Dec. 2.
Book assembly mechanism, Automatic. C. L. Moyer. 1,783,625; Dec. 2.
Bookcase. S. E. Crowell. 1,783,703; Dec. 2.
Boot or shoe. P. C. Wolfer. 1,783,210; Dec. 2.
Boots and shoes, Method of and apparatus for finishing the bottoms of. C. P. Brooks, jr., and S. Kovner. 1,783,401; Dec. 2.
Bottle. R. Barbas. Des. 82,652–3; Dec. 2.
Bottle. R. Barbas. Des. 82,716; Dec. 2.
Bottle cap. F. J. MacDonald. 1,783,909; Dec. 2.
Bottle-rinsing machine. F. Boeschel. 1,783,776; Dec. 2.
Bottle stopper. R. R. Hutcheson. Des. 82,679; Dec. 2.
Bowl, Semiindirect-diffusing. F. C. Baker. Des. 82,715; Dec. 2.
Box: *See*—
Tilting casting box.
Box. R. W. Phelps. Des. 82,689; Dec. 2.
Box lid. F. J. Schleicher. Des. 82,708; Dec. 2.
Brace and bit drill, Combination. W. C. Hamilton. 1,783,786; Dec. 2.
Bracelet clasp. M. Miller. 1,783,743; Dec. 2.
Bracket: *See*—
Supporting bracket.
Bracket for window hangings, Supporting. K. H. Whitney. Re17,896; Dec. 2.
Brake: *See*—
Electromagnetic brake. Vehicle brake.
Brake adjuster. H. Brost. 1,783,902; Dec. 2.
Brake cross shaft mounting. C. J. Boek. 1,783,774; Dec. 2.
Brake-operating mechanism. P. Bastien. Re17,888; Dec. 2.
Brickmaking machine and method. H. Hilgendorf. 1,783,287; Dec. 2.
Bridge, Trolley. R. H. Greegor. 1,783,710; Dec. 2.
Brining machine. J. J. Barry. 1,783,898; Dec. 2.
Bristle tester. F. W. Schneider. 1,783,455; Dec. 2.
Broiler. C. M. Dibble. 1,783,183; Dec. 2.
Brush. A. H. Hatchett, sr. 1,783,788; Dec. 2.
Brush, Soap-dispensing shaving. A. F. Stepelton. 1,783,754; Dec. 2.
Buckle, Shoe. S. M. Riker. Des. 82,694–7; Dec. 2.
Buckle, Shoe. S. M. Riker. Des. 82,699–702; Dec. 2.
Buckles, Clamp lever for. W. J. Morse. 1,783,854; Dec. 2.
Budget system, Household. J. E. Kreiling. 1,783,800; Dec. 2.
Building construction. J. V. Montrief. 1,783,383; Dec. 2.
Building-construction unit. J. F. Loucks. 1,783,248; Dec. 2.
Building, Restaurant. A. J. Errett and C. P. Peseck. Des. 82,663; Dec. 2.
Bullets, Process and apparatus for making. S. Rousseau. 1,783,261; Dec. 2.
Bumper. L. Ferdinand. 1,783,875; Dec. 2.
Bumper, Automobile. F. J. Laher. 1,783,335; Dec. 2.
Bung fixture for sheet-metal containers. T. W. Rieke. 1,783,927; Dec. 2.
Burglarproof lock. D. Copell. 1,783,905; Dec. 2.
Burner: *See*—
Fuel burner. Ribbon burner.
Burner construction, Oil-. H. W. Gaston. 1,783,567; Dec. 2.
Burner structure. F. J. Werner. 1,783,818; Dec. 2.
Bus body. E. R. Hewitt. 1,783,424; Dec. 2.
Button loop. J. H. Domkee. 1,783,497; Dec. 2.
Button, Pickpocketproof. A. Leroux. 1,783,846; Dec. 2.
Cabinet. D. Roberts. Des. 82,704; Dec. 2.
Cabinet and clock, Combined radio receiver. H. M. Farrand. Des. 82,665; Dec. 2.
Cabinet, Combined radio and phonograph. G. L. Gilbert. Des. 82,717; Dec. 2.
Cabinet, Merchandise-display. C. C. Irwin. Des. 82,680; Dec. 2.
Calculating machines, Attachment for. A. A. Overbury. 1,783,446; Dec. 2.
Calendar, Perpetual. J. H. Newton. 1,783,302; Dec. 2.
Calender. C. F. Schnuck. 1,783,263; Dec. 2.
Camera, Motion-picture. J. D. Elms. 1,783,463; Dec. 2.
Can: *See*—
Measuring and dispensing can.
Car-coupler mechanism. W. Kelso. 1,783,655; Dec. 2.
Car, Sleeping. C. W. Pflager. 1,783,480; Dec. 2.
Car wheel, Railway-. G. H. Emerson and J. J. Tatum. 1,783,705; Dec. 2.
Carbonizing apparatus. O. H. Hertel. 1,783,190; Dec. 2.
Carburetor. R. H. Beach. 1,783,278; Dec. 2.
Carburetor. G. M. Bicknell. 1,783,214; Dec. 2.
Carburetor. W. F. Broge. 1,783,217; Dec. 2.
Carcasses for buildings. C. Forssell. 1,783,609; Dec. 2.
Card or similar article, Display. S. H. Goldberg. Des. 82,670; Dec. 2.
Carriage, Baby. B. L. Blanchard. 1,783,913; Dec. 2.
Carton, Cushioned. F. Troyk. 1,783,397; Dec. 2.
Carton-feeding magazine. E. Van Der Pyl and R. H. Stimpson. 1,783,912; Dec. 2.
Carton handling and sealing apparatus. A. C. Schroeder and W. D. Kimball. 1,783,814; Dec. 2.
Casing, Humidifier. B. M. Mills. Des. 82,686; Dec. 2.
Caster, Furniture. T. P. Duncan, jr. 1,783,873; Dec. 2.
Casting machine, Matrix-setting and type-line-. J. Dorneth. 1,783,704; Dec. 2.

Catalyst, Highly-active. K. Marx, H. Behncke, and K. Brodersen. 1,783,662; Dec. 2.
Catch, Door. F. F. Forshee. 1,783,563; Dec. 2.
Catch, Lamp. F. L. Bamford. 1,783,598; Dec. 2.
Cellulose esters of both nitric acid and an organic acid, Making. F. Becker. 1,783,771; Dec. 2.
Cellulosic material, Treating. C. Dreyfus and G. Schneider. 1,783,184; Dec. 2.
Cementitious material, Producing, transporting, and handling. O. T. and O. J. Graham. 1,783,332; Dec. 2.
Centrifuge. G. B. Petsche and A. E. Drissner. 1,783,546; Dec. 2.
Chain, Tire. J. L. Doss. 1,783,872; Dec. 2.
Chair: *See*—
Adjustable chair.
Chair. W. S. Ferris and E. C. Harter. Des. 82,666; Dec. 2.
Check protector. J. W. Carlson. 1,783,182; Dec. 2.
Check protector. J. W. Carlson. 1,783,219; Dec. 2.
Chemical-feed machine. E. E. Harper. 1,783,423; Dec. 2.
Chocolate-molding machine. E. E. Cahoon. 1,783,402; Dec. 2.
Chuck. G. E. Garno. 1,783,420; Dec. 2.
Chuck for torsional stresses. F. A. Augenthaler. 1,783,870; Dec. 2.
Circuit breaker for ignition installations of internal-combustion engines. H. Burkas. 1,783,495; Dec. 2.
Circuit interrupter. G. A. Burnham. 1,783,279; Dec. 2.
Clamp: *See*—
Adjustable clamp. Speedometer-drive clamp.
Corner clamp. Suspension clamp.
Pipe clamp.
Clamp for an outlet box, Conduit. H. R. Cook. 1,783,356; Dec. 2.
Clamp for examination devices. C. T. Brady. 1,783,278; Dec. 2.
Clamp for outlet boxes, Universal. H. R. Cook. 1,783,408; Dec. 2.
Clamping and bushing device, Combined conduit. H. R. Cook. 1,783,409; Dec. 2.
Clasp: *See*—
Bracelet clasp.
Clasp for ladies' mesh bracelets, Catch. L. F. Otten. 1,783,306; Dec. 2.
Cleaner: *See*—
Windshield cleaner.
Cleaner. H. B. White. 1,783,205; Dec. 2.
Clip: *See*—
Paper clip. Pen and pencil clip.
Clip or fastener Paper. A. B. Shaw. 1,783,678; Dec. 2.
Closure cap, Two-piece. E. Scofield. 1,783,314; Dec. 2.
Clothes drier. L. G. Young. 1,783,488; Dec. 2.
Clothesline, Metallic. O. E. Law. 1,783,245; Dec. 2.
Clutch control for tractor equipment, Extension-. F. L. Young. 1,783,324; Dec. 2.
Clutch mechanism. A. M. Mears. 1,783,741; Dec. 2.
Coal-handling apparatus. H. H. Israel and G. Trussa. 1,783,619; Dec. 2.
Coating composition. R. H. Kienle and L. V. Adams. 1,783,364; Dec. 2.
Coffee table. H. C. Brown. Des. 82,658; Dec. 2.
Collapsible table. W. J. Bauer. 1,783,556; Dec. 2.
Colloids, Treating. A. M. Herbsman. 1,783,471; Dec. 2.
Color music or other spectacular luminous effects, Apparatus for producing. A. B. Hector. 1,783,789; Dec. 2.
Column. C. B. Schneible. 1,783,813; Dec. 2.
Commutator. H. Welchsel. 1,783,371; Dec. 2.
Compact or similar article. F. B. Miller. Des. 82,718; Dec. 2.
Compensating division sheet. T. E. Brewster. 1,783,777; Dec. 2.
Compensator for brush resistance voltage drop in motor-control systems. H. Sundhaussern. 1,783,527; Dec. 2.
Condenser. E. W. Hartman. 1,783,286; Dec. 2.
Condenser. P. B. Sadtler. 1,783,369; Dec. 2.
Conduit construction. J. F. Makowski. 1,783,178; Dec. 2.
Connecting device, Multiple. G. L. Chamberlain. 1,783,220; Dec. 2.
Connecting rod. A. W. Kjellberg. 1,783,922; Dec. 2.
Connection. Z. P. Candee. 1,783,403; Dec. 2.
Container, Face-powder. M. Sierad. Des. 82,709; Dec. 2.
Container for removing carbon. C. F. Kettering. 1,783,921 Dec. 2.
Control device. M. B. Grout. 1,783,645; Dec. 2.
Control mechanism for electric motors. V. L. Tannehill. 1,783,634; Dec. 2.
Control system, Remote. H. E. Allen. 1,783,820; Dec. 2.
Controller. E. J. Abbe. 1,783,763; Dec. 2.
Cooking apparatus. C. V. Carlsson. 1,783,601; Dec. 2.
Cooler: *See*—
Cream cooler. Liquid cooler.
Cord, Tinsel. J. R. Sexton. 1,783,315; Dec. 2.
Corner clamp. E. L. Wilson. 1,783,456; Dec. 2.
Corrosion of articles of magnesium and magnesium alloys, Improving the resistance to. A. Beck and G. Siebel. 1,783,770; Dec. 2.
Couch, Sliding. P. P. Bebry. 1,783,530; Dec. 2.
Coupling or clamp for scaffolding or other purposes. A. C. Marshall. 1,783,735; Dec. 2.
Cover, Mattress. M. Sherover. Des. 82,707; Dec. 2.
Cover, School desk and seat. S. J. Roberts. 1,783,675; Dec. 2.
Crack filler. J. D. Tomlinson. 1,783,683; Dec. 2.

Looms, Let-off mechanism for. C. H. Draper. 1,783,779; Dec. 2.
Looms, Let-off mechanism for. R. A. Kearsley. 1,783,719; Dec. 2.
Looms, Shuttle-feeler mechanism for. E. E. Bass. 1,783,768; Dec. 2.
Lubricating device. R. Ehrenfeld. 1,783,535; Dec. 2.
Machine for assembling nuts. R. L. Burdsall. 1,783,218; Dec. 2.
Machine for cleaning journal-box waste. I. M. Conway and T. M. Lawson. 1,783,407; Dec. 2.
Machine for forming glass articles. R. La France. 1,783,191; Dec. 2.
Machine for making welded reenforcing fabrics. W. H. Sommer. 1,783,944; Dec. 2.
Machine for opening tins of canned goods. E. Darqué. 1,783,534; Dec. 2.
Machine for processing materials. C. W. Vogt. 1,783,865; Dec. 2.
Machine for processing materials. C. W. Vogt. 1,783,867; Dec. 2.
Machinery, Automatic feed control for cotton-opening. E. M. Holt. 1,783,333; Dec. 2.
Magazine for printers' type. G. M. Porter. 1,783,811; Dec. 2.
Magnetic core. E. Eisenmann and F. Bergmann. 1,783,560; Dec. 2.
Magnetic cores, Production of improved. K. Eisenmann and F. Bergmann. 1,783,561; Dec. 2.
Manicuring, Apparatus for facilitating the manipulation of. E. C. Sachse. 1,783,262; Dec. 2.
Manipulator. J. A. Smitmans. 1,783,815; Dec. 2.
Marking and stenciling machine, Traffic-line. C. V. Angier. 1,783,689; Dec. 2.
Massaging oscillator. D. Heyer. Des. 82,677; Dec. 2.
Masses from cellulose esters, Manufacture of soft and pliable. O. Loehr. 1,783,176; Dec. 2.
Material for conversion into cellulose derivatives and producing the same. M. O. Schur and R. H. Rasch. 1,783,313; Dec. 2.
Material-handling device. C. J. Klein. 1,783,797; Dec. 2.
Material-transfer apparatus. H. H. Weiss. 1,783,487; Dec. 2.
Materials, Apparatus and process for treating. C. W. Vogt. 1,783,864; Dec. 2.
Materials made of or containing cellulose derivatives, Coloration of. H. Dreyfus. 1,783,607; Dec. 2.
Materials, Process and apparatus for treating. C. W. Vogt. 1,783,866; Dec. 2.
Matrices, Punching. H. R. Freund. 1,783,838; Dec. 2.
Matrix magazine. S. E. Sperry. 1,783,929; Dec. 2.
Measuring and dispensing can, Liquid. R. G. and R. M. Wilson. 1,783,457; Dec. 2.
Measuring instrument, Electrical. J. H. Cone. 1,783,559; Dec. 2.
Mechanical movement. J. B. Kirby. 1,783,380; Dec. 2.
Mechanical separator. W. M. Cook. 1,783,357; Dec. 2.
Merry-go-round. R. dos Santos. 1,783,586; Dec. 2.
Metal articles, Coating. J. S. George and R. S. Sperry. 1,783,188; Dec. 2.
Metal on metal tubes, Apparatus for electrolytically depositing. F. G. Martin and W. Ramsay. 1,783,885; Dec. 2.
Metal-working machines, Spindle-stopping mechanism for. C. Q. Garey. 1,783,566; Dec. 2.
Metallic apparatus for carrying out chemical and other processes. F. Lappe, E. Koch, M. Pier, and H. Sauer. 1,783,726; Dec. 2.
Metals, Etching precious. J. C. McFarland. 1,783,663; Dec. 2.
Meter: *See*—
Water meter.
Meter for sewing machines. B. G. Forbstein. 1,783,562; Dec. 2.
Meter housing. A. R. Rutter. 1,783,547; Dec. 2.
Mineral adsorbent and manufacturing same. J. T. Travers, C. H. Lewis, and O. M. Urbain. 1,783,396; Dec. 2.
Mining and loading machine. E. C. Morgan. 1,783,443; Dec. 2.
Mixer. K. Adams. 1,783,553; Dec. 2.
Moistener for gummed strips and the like. R. R. Shay. 1,783,679; Dec. 2.
Mold. W. G. Goodwin. 1,783,285; Dec. 2.
Mold for forming cones for ice cream and frozen custard. E. D. Kohr. 1,783,798–9; Dec. 2.
Molding apparatus. F. J. Leuthner. 1,783,805; Dec. 2.
Molding, Drip and trim. J. B. Zimmers. 1,783,896; Dec. 2.
Molding for closure members, Movable. C. G. Johnson. 1,783,919; Dec. 2.
Mop head. D. Kenner. 1,783,795; Dec. 2.
Motion and vice versa, Converting rotary into reciprocating. A. F. Shepard. 1,783,589; Dec. 2.
Motor: *See*—
Air motor.
Motor heater. G. W. Hopkins. 1,783,289; Dec. 2.
Motors, Antiexplosive means with great turbulence for explosion. A. A. A. Darche. 1,783,603; Dec. 2.
Mowing machine. S. E. Rawls. 1,783,672; Dec. 2.

Mowing machine, Railroad. C. Morris and W. H. Buck. 1,783,517; Dec. 2.
Muffler for burner. E. E. Wayless. 1,783,685; Dec. 2.
Music-instruction device. G. H. D. Gibson. 1,783,361; Dec. 2.
Music time indicator. M. J. Goudsmit. 1,783,537; Dec. 2.
Musical instrument. J. N. Vasey. 1,783,638; Dec. 2.
Needle, Thread-extracting. S. Picard. 1,783,449; Dec. 2.
Nitrates, Manufacture of metallic. F. A. Henglein. 1,783,647; Dec. 2.
Nonslip device for use with skis. A. Elsner. 1,783,833; Dec. 2.
Nozzle, Syringe. G. Kaufman. Des. 82,681; Dec. 2.
Odometers, Reset mechanism for. J. Zubaty. 1,783,398; Dec. 2.
Oil, Cracking petroleum. R. T. Pollock. 1,783,259; Dec. 2.
Oil-filter member. C. W. McKinley. 1,783,924; Dec. 2.
Oil, Method and apparatus for cracking. W. Brink and G. L. Hess. 1,783,697; Dec. 2.
Oil to furnaces, Apparatus for supplying fuel. A. C. Bennett. 1,783,213; Dec. 2.
Oiler, Air-line. J. E. Renfer. 1,783,522; Dec. 2.
Oils, Process and apparatus for treating. C. P. Dubbs. 1,783,229; Dec. 2.
Oils, Storage of. T. S. Cooke and J. E. Rouse. 1,783,701; Dec. 2.
Opacifier for enamels. T. H. McKeown. 1,783,738–40; Dec. 2.
Ophthalmic mounting, Guard for an. N. M. Baker. Des. 82,651; Dec. 2.
Optical instrument. W. J. Cameron. 1,783,461; Dec. 2.
Ores by use of gas, Apparatus for leaching and washing. A. B. Stevens. 1,783,591; Dec. 2.
Ores, Concentration of. G. H. Wigton. 1,783,206–7; Dec. 2.
Organ, Mouth. J. Hohner. 1,783,173; Dec. 2.
Ornament, Shoe. S. M. Riker. Des. 82,698; Dec. 2.
Ornamental device. E. I. Dauer. 1,783,223; Dec. 2.
Oven, Combination toasting and shredding. J. L. Kellogg. 1,783,434; Dec. 2.
Overalls. J. Herskowitz. 1,783,538; Dec. 2.
Package, Combination. M. Reisert. 1,783,453; Dec. 2.
Packing cushion. H. L. Hill. 1,783,570; Dec. 2.
Packing for plungers. D. R. Yarnall and J. Kildare. 1,783,762; Dec. 2.
Paint, Roof. M. M. Connolly. 1,783,702; Dec. 2.
Pan for internal-combustion engines, Oil-base insulating. K. H. Hinrichs. 1,783,472; Dec. 2.
Pane, Window. A. Böttner. 1,783,326; Dec. 2.
Paper clip. M. Ross. 1,783,484; Dec. 2.
Paper manufacture. M. Wenzel. 1,783,868; Dec. 2.
Paper, Recording. C. W. Mayer and E. F. Siller. 1,783,442; Dec. 2.
Parachute cord retainer. A. H. Reed. 1,783,452; Dec. 2.
Pen or like material splitting mechanism. J. Zeb. 1,783,489; Dec. 2.
Pedestal for a goblet or similar article. C. C. Beam. Des. 82,655; Dec. 2.
Pen and pencil clip. C. E. Marshall. 1,783,736; Dec. 2.
Pen attachment, Fountain-. C. E. Marshall. 1,783,734; Dec. 2.
Pen, Fountain. E. Kratochvil. 1,783,436; Dec. 2.
Pen refill indicator, Fountain-. O. R. Terry. 1,783,681; Dec. 2.
Penmanship, Device for teaching. R. A. Kuntzleman. 1,783,657; Dec. 2.
Petroleum hydrocarbons with alcohol, Process of and apparatus for the fractional extraction of. T. A. Werkenthin. 1,783,203; Dec. 2.
Petroleum oil, Converting. G. Egloff and J. C. Morrell. 1,783,231; Dec. 2.
Petroleum oil, Cracking. C. P. Dubbs. 1,783,228; Dec. 2.
Phonograph. H. J. King. 1,783,723; Dec. 2.
Phonographic recording. H. S. Worrell. 1,783,761; Dec. 2.
Photography, Art of and apparatus for motion-picture. A. Ames, jr. 1,783,399; Dec. 2.
Pianos, Mechanism for player. W. B. Tunstall. 1,783,319; Dec. 2.
Pictures, Electrical transmission of. A. Weaver. 1,783,321; Dec. 2.
Pilot for furnaces. O. H. Rodenberg. 1,783,676; Dec. 2.
Pin for holding golf tees. R. Marcher. Des. 82,685; Dec. 2.
Pinholder. G. Boden. 1,783,215; Dec. 2.
Pin-staking machine, Base. J. E. Ferguson. 1,783,706; Dec. 2.
Pipe. E. Della. 1,783,605; Dec. 2.
Pipe clamp. W. E. Lahey. 1,783,509; Dec. 2.
Pipe end protector. H. A. Unke. 1,783,893; Dec. 2.
Pipe-tapping and plug-setting machine, Combined. F. B. Hall. 1,783,503; Dec. 2.
Piston. S. J. Mansfield. 1,783,477; Dec. 2.
Piston-ring casting. T. E. McFall. 1,783,886; Dec. 2.
Plaster, Imitation. R. S. Schmieder. 1,783,454; Dec. 2.
Plate or similar article. J. Wuyts. Des. 82,714; Dec. 2.
Plug for electric circuits, Locking. F. E. Reinhold. 1,783,342; Dec. 2.
Plumbing device. L. K. Larrison. 1,783,883; Dec. 2.
Pop-up waste. F. G. Brotz. 1,783,460; Dec. 2.
Pot-filling apparatus, Glass-. W. E. Barnes. 1,783,459; Dec. 2.
Poultry killer. G. C. Butcher. 1,783,699; Dec. 2.
Power device, Hydraulic. W. R. Morris. 1,783,887; Dec. 2.
Power system and apparatus therefor. M. L. Sindeband, and O. K. Marti. 1,783,548; Dec. 2.
Power transmission. S. C. Carter. 1,783,533; Dec. 2.
Power-transmission device. C. W. Weiss. 1,783,758; Dec. 2.
Press: *See*—
Printing press. Transfer press.
Printing multimachine, Rotary intaglio-. O. Wilhelm. 1,783,819; Dec. 2.
Printing press. R. Jacobucci. 1,783,942; Dec. 2.
Printing press, Rotary web-. H. M. Barber. 1,783,766–7; Dec. 2.
Program device for player musical instruments and program strip therefor. W. J. Butler. 1,783,375; Dec. 2.
Propeller. T. A. Dicks. 1,783,225; Dec. 2.
Protector. M. C. Mather. 1,783,512; Dec. 2.
Protector for automobiles. E. A. Banschbach. 1,783,984; Dec. 2.
Pulverizer. G. H. Kaemmerling. 1,783,717; Dec. 2.
Pump. H. C. Gohring. 1,783,611; Dec. 2.
Pump. R. W. Gunn, and W. A. S. Thompson. 1,783,615; Dec. 2.
Pump. R. A. L. Volet. 1,783,486; Dec. 2.
Pump, Centrifugal. A. V. Mueller. 1,783,667; Dec. 2.
Pump, Double-acting. J. S. Hunter. 1,783,425; Dec. 2.
Pump, Fuel. J. T. Trumble. 1,783,940; Dec. 2.
Pump, Spur-gear. I. H. Wilsey. 1,783,209; Dec. 2.
Pumping system, Displacement. J. Oliphant. 1,783,747; Dec. 2.
Pumps, Sealing device for centrifugal. I. C. Jennings. 1,783,427; Dec. 2.
Rack: *See*—
Hinged rack.
Radiator. E. O. Schjolin. 1,783,928; Dec. 2.
Radiocabinet M. Pasternak. Des. 82,692; Dec. 2.
Radiocabinet. F. W. Stein. Des. 82,711; Dec. 2.
Radiocabinet or similar article. H. C. Edwards. Des. 82,662; Dec. 2.
Radio cabinet or similar article. H. L. Finnegan and P. O. Lanham. Des. 82,667; Dec. 2.
Radio receiving apparatus. F. C. Barton. 1,783,899; Dec. 2.
Radio receiving apparatus. A. A. Kent. 1,783,292; Dec. 2.
Rail nut lock. J. O. Gould. 1,783,876; Dec. 2.
Rail-tie plate and fastener. G. C. Habicht. 1,783,841; Dec. 2.
Rails, Anticreeper for railway. J. Richards and N. Cortese. 1,783,482; Dec. 2.
Rails, Means to felicitate the electrical bonding of railway. G. F. Grundon and F. E. Knight. 1,783,238; Dec. 2.
Receptacle, Water-tight. A. von Frankenberg. 1,783,756; Dec. 2.
Records, Making phonograph. F. L. Dyer. 1,783,498; Dec. 2.
Reed for musical instruments. F. A. Brenner. 1,783,824; Dec. 2.
Reel: *See*—
Fishing reel.
Reel. H. H. Bensema. 1,783,692; Dec. 2.
Refrigerating machine. R. F. Follain. 1,783,464; Dec. 2.
Refrigerator. J. G. Scott. Des. 82,706; Dec. 2.
Relay, Alternating-current S. L. Goldsborough. 1,783,568; Dec. 2.
Relay, Protective. H. E. White. 1,783,552; Dec. 2.
Ribbon burner. G. W. McKee. 1,783,195; Dec. 2.
Ring: *See*—
Dust-bag ring.
Ring or article of similar nature, Finger. E. J. Gross. Des. 82,671–2; Dec. 2.
Roadbed construction for toy railways. C. R. Peterson, jr. 1,783,367; Dec. 2.
Roaster and storer, Continuous coffee. A. K. Rehe. 1,783,673; Dec. 2.
Rod: *See*—
Connecting rod. Surveyor's rod.
Roll, Fluid-cooled. J. H. Fox. 1,783,465; Dec. 2.
Roof covering. H. Gauvin. 1,783,839; Dec. 2.
Roofing units, Apparatus for coating. C. R. MacDonald. 1,783,575; Dec. 2.
Roofing units, Apparatus for finishing. C. R. MacDonald. 1,783,850; Dec. 2.
Roofing units, Finishing. C. R. MacDonald. 1,783,849; Dec. 2.
Rosin, Cracking. G. Egloff and H. P. Benner. 1,783,230; Dec. 2.
Rotor for magnetos. C. F. Reis. 1,783,344; Dec. 2.
Rubber goods from rubber dispersions, Manufacture of. P. Klein and A. Szegvari. 1,783,435; Dec. 2.
Rubber, Producing vulcanized. M. Bögemann and H. Friedrich. 1,783,216; Dec. 2.
Rudder-angle-indicating device. G. M. and A. P. Marr. 1,783,251; Dec. 2.
Saccharine fluids, Treating. L. Wickenden. 1,783,551; Dec. 2.
Safety attachment for punch presses. B. J. Victor. 1,783,817; Dec. 2.
Safety lock. T. Kromer. 1,783,923; Dec. 2.
Sanding device, Vehicle. W. H. H. Everett. 1,783,834; Dec. 2.
Sash balance. R. Lanzillotta. 1,783,573; Dec. 2.
Saw guide. W. W. Edwards. 1,783,330; Dec. 2.
Scale casing, Weighing-. L. D. Chambers. Des. 82,659; Dec. 2.
Scale from water jackets of internal-combustion engines, Removing. W. N. Moore. 1,783,478; Dec. 2.
Scales, Rack-rod assembly for. R. J. Burke. 1,783,826; Dec. 2.

Scissors G. Miriello. 1,783,853; Dec. 2.
Scissors. Detachable-loaded. F. L. Ralston. 1,783,583; Dec. 2.
Scoop, Excavator. R. R. Downie. 1,783,831; Dec. 2.
Screen: *See*—
Vibratory screen. Window screen.
Screw machines, Cross-tool slide for multiple-spindle automatic. O. E. Trobeck. 1,783,528; Dec. 2.
Scuttle port and like tight-closed window. L. Lalanne. 1,783,336; Dec. 2.
Seal. F. Keidel. 1,783,938; Dec. 2.
Sealing-in machine, Bulb feeder for. W. W. Loebe, Ledig, and H. Asmussen. 1,783,806; Dec. 2.
Seed, Dressing. H. Rössner, A. Steindorff, and K. Pfaff. 1,783,200; Dec. 2.
Separator: *See*—
Mechanical separator.
Sewing machine. F. E. Finlayson. 1,783,836; Dec. 2.
Shackle connection between spring and frame. A. L. Riker, jr. 1,783,199; Dec. 2.
Shackle, Steel-plate spring. S. A. Stranahan. 1,783,394; Dec. 2.
Shaft construction, Mine-. R. V. Proctor. 1,783,812; Dec. 2.
Shafting for engines. P. F. McGovern. 1,783,664; Dec. 2.
Shanking machine. D. E. Harding. 1,783,907; Dec. 2.
Shearing and riveting machine. C. A. Olson, F. L. Buch and T. E. Brooks. 1,783,445; Dec. 2.
Ship for conveying river boats across the sea, Dock. O. Popper. 1,783,450; Dec. 2.
Shock absorber. D. B. D. Blake. 1,783,599; Dec. 2.
Shock absorber. V. Patricolo. 1,783,387–8; Dec. 2.
Shoe-stitcher attachment. F. Paradiso. 1,783,198; Dec. 2.
Shoe stretcher or adjuster. C. R. Boyd. 1,783,600; Dec. 2.
Shore. A. H. Symons. 1,783,266; Dec. 2.
Sign flasher. C. Hotchiss. 1,783,474; Dec. 2.
Signal: *See*—

Strapping joint. J. W. Leslie. 1,783,247; Dec. 2.
Stretcher, Curtain. E. B. and W. C. Fenton. 1,783,835; Dec. 2.
Strip for terrazo floors and like structures. G. P. Granell. 1,783,783; Dec. 2.
Submarines and like vessels, Transmitting tube for. C. A. and W. T. Ohman. 1,783,668; Dec. 2.
Submarines, Emergency feeder device for. J. M. Clark. 1,783,221; Dec. 2.
Suit, Bathing. W. D. Ide. 1,783,174; Dec. 2.
Suit, Ensemble. D. Long. Des. 82,683; Dec. 2.
Sulphate and producing the same, White anhydrous calcium. C. B. Durgin, A. B. Gerber, and P. Logue. 1,783,417; Dec. 2.
Sulphur composition and making the same. H. Blumenberg, jr. 1,783,695; Dec. 2.
Sulphur from alkali-metal polysulphides, Recovery of. H. Langheinrich. 1,783,725; Dec. 2.
Support, Clothesline. J. L. Keller. 1,783,433; Dec. 2.
Support construction for large-filament lamps. A. C. Massie. 1,783,623; Dec. 2.
Support, Folding. W. E. Brown. 1,783,558; Dec. 2.
Support for drop tubes. J. A. Martocello. 1,783,808; Dec. 2.
Support for transmission lines. A. O. Austin. 1,783,272; Dec. 2.
Supporter, Flask. W. Anderssen. 1,783,765; Dec. 2.
Supporting bracket. J. A. Morthland. 1,783,666; Dec. 2.
Supporting frame, Hammock or glider. D. M. Lillibridge. 1,783,848; Dec. 2.
Supporting structure for long spans for high-speed suspended vehicles, Rail-. F. Heyner. 1,783,648; Dec. 2.
Surface-treating machine. T. E. D. Bilde. 1,783,773; Dec. 2.
Surveyor's rod. R. E. Kapps. 1,783,507; Dec. 2.
Suspender, Lingerie. M. L. Helmbold and F. T. O'Malley. 1,783,470; Dec. 2.
Suspension clamp. F. H. Miller. 1,783,543; Dec. 2.
Swings, Attachment for porch. W. H. Fry. 1,783,502; Dec. 2.
Switch: *See*—
Electric snap switch. Float-operated switch.
Electric switch. Inclosed switch.
Electrical switch. Thermostatic switch.
Switch and signal system, Electric. F. H. Richterkessing. 1,783,308; Dec. 2.
Switch stand. S. L. Eastburn. 1,783,283; Dec. 2.
Switching system, Remote-control. L. F. Bird. 1,783,900; Dec. 2.
Table: *See*—
Collapsible table. Fruit-grading table.
Table and bench, Folding. M. Maes. 1,783,660; Dec. 2.
Tank: *See*—
Feed tank.
Telephone-station equipment. N. H. Saunders and T. C. Riebe. 1,783,310; Dec. 2.
Telephone system. W. Schulz, M. Frischke, and K. Schiffmann. 1,783,312; Dec. 2.
Telephone system, Party-line. O. C. Levy. 1,783,295; Dec. 2.
Telephones, Auxiliary base and switch attachment for. C. F. Johanning. 1,783,936; Dec. 2.
Temperature control in pulverizing mills, Automatic. J. Crites and W. A. Koren. 1,783,358; Dec. 2.
Textile fabric. E. Parsons. Des. 82,691; Dec. 2.
Thermal control system. G. C. Pearce. 1,783,520; Dec. 2.
Thermostat. J. J. Lawler. 1,783,574; Dec. 2.
Thermostatic control apparatus. A. W. Walker. 1,783,320; Dec. 2.
Thermostatic device. E. A. Rutenber. 1,783,309; Dec. 2.
Thermostatic switch. H. D. Matthews. 1,783,179; Dec. 2.
Thread protector. H. A. Unke. 1,783,892; Dec. 2.
Thread-rolling machine, High-speed. J. A. Kinney. 1,783,796; Dec. 2.
Threading die. W. J. Hogg. 1,783,539; Dec. 2.
Tie for metal straps. L. M. Harvey. 1,783,239; Dec. 2.
Tile block. B. B. Bolton. Des. 82,657; Dec. 2.
Tilting casting box. H. A. W. Wood. 1,783,323; Dec. 2.
Timber splicer. C. M. Markham. 1,783,622; Dec. 2.
Tool, Axial pulling. J. W. Howell. 1,783,649; Dec. 2.
Tool, Combined lifting and carrying. R. A. Stevenson. 1,783,680; Dec. 2.
Tool, Pile driving. L. L. Richardson. 1,783,523; Dec. 2.
Tools, Safety attachment for machine. O. L. Klugh and T. E. Haverstick. 1,783,476; Dec. 2.
Top, Novelty. V. O. Raimondi. 1,783,627; Dec. 2.
Top, Whipping. H. Vollhardt. 1,783,593; Dec. 2.
Towing mechanism. E. F. Green. 1,783,189; Dec. 2.
Toy. L. Marx. 1,783,511; Dec. 2.
Toy figures, Making. Y. Keney. 1,783,720; Dec. 2.
Tractors, Attachment for. J. D. Cummings. 1,783,282; Dec. 2.
Train-control system. T. Bodde. 1,783,491; Dec. 2.
Transfer press. F. T. Sheedy, H. C. Wood, and L. Traung. 1,783,888; Dec. 2.
Transmission. D. D. Maurer. 1,783,513; Dec. 2.
Transmission control. P. L. Tenney and H. E. Fidler. 1,783,931; Dec. 2.
Transmission, Overgear. C. H. Sterling. 1,783,930; Dec. 2.
Transmission, Overspeed. C. H. Sterling. 1,783,393; Dec. 2.
Trap: *See*—
Boiler return and vacuum trap. Insect trap.
Trap. M. J. Petersen. 1,783,670; Dec. 2.
Trap structure, Fish-. W. G. Hume. 1,783,716; Dec. 2.

Tray for pottery fabricating apparatus. W. J. Miller. 1,783,197; Dec. 2.
Tray, Posting. P. Bergmann. 1,783,871; Dec. 2.
Trees, Method of and apparatus for treating fruit. T. W. Johnson. 1,783,430; Dec. 2.
Trim-saw lift unit. J. L. Goodspeed. 1,783,362; Dec. 2.
Trousers and height of waist bands, Device for measuring the inseams of men's. D. W. Dockstader. 1,783,906; Dec. 2.
Truck, Car. M. H. Martin. 1,783,737; Dec. 2.
Truck, Direct-drive electric railway. V. G. Apple. 1,783,269; Dec. 2.
Truck, Fire. A. de la Mare. Des. 82,661; Dec. 2.
Truck for winding machines, Bobbin-supply. J. O. McKean. 1,783,911; Dec. 2.
Tube-flanging wrench. J. Canny and H. Blondeau. 1,783,639; Dec. 2.
Tube-tapering apparatus. F. Müller. 1,783,384; Dec. 2.
Tube-transporting device. O. Bamberger. 1,783,555; Dec. 2.
Tubing, Making electrically-welded. J. W. Holt. 1,783,571; Dec. 2.
Tuning device, Selector. J. O. Prescott. 1,783,671; Dec. 2.
Twisting machines, Yarn stop motion for. C. Aveyard. 1,783,897; Dec. 2.
Type levers, Setting. H. Luce. 1,783,177; Dec. 2.
Typewriter stand, Adjustable. A., J. W., and W. J. Makoski. 1,783,661; Dec. 2.
Typewriting machine. G. O. Degener. 1,783,604; Dec. 2.
Unloading machine. E. L. Bradt. 1,783,823; Dec. 2.
Utensil, Cooking. W. O. Isaacson. 1,783,792; Dec. 2.
Utensil, Kitchen. A. C. Denmark and L. O. Bryant. 1,783,830; Dec. 2.
Utensil, Kitchen. H. R. Johnson. 1,783,651; Dec. 2.
Vacuum-cleaner attachment for automobiles. W. C. Rehwold and J. G. Duff. 1,783,674; Dec. 2.
Vacuum cleaners, Disinfecting attachment for. B. P. Smith. 1,783,859; Dec. 2.
Valve. J. H. Cox. 1,783,281; Dec. 2.
Valve. J. H. Edmonds. 1,783,329; Dec. 2.
Valve. C. S. Johnson. 1,783,621; Dec. 2.
Valve. J. O. Lewis. 1,783,441; Dec. 2.
Valve actuation for a burglar-repelling device. H. W. Montgomery. 1,783,515; Dec. 2.
Valve, Automatic gas-control. A. D. Taylor. 1,783,395; Dec. 2.
Valve, Automatic safety. C. M. Lieber. 1,783,440; Dec. 2.
Valve bag, Siftproof. E. W. Menke, and J. C. Redington. 1,783,624; Dec. 2.
Valve control, Choke and needle. G. Selzer. 1,783,677; Dec. 2.
Valve, Cut-out. F. Schiele. 1,783,628; Dec. 2.
Valve for rock drills. J. C. Curtis. 1,783,829; Dec. 2.
Valve insides. J. C. Crowley. 1,783,327; Dec. 2.
Valve mechanism. J. P. Humason. 1,783,291; Dec. 2.
Valve mechanism for gas meters. G. Meyer. 1,783,742; Dec. 2.
Valve, Mixing. L. Sirotek. 1,783,264; Dec. 2.
Valve, Pressure-reducing. J. R. Tyre. 1,783,500; Dec. 2.
Valve-seat liner. C. C. Lee. 1,783,884; Dec. 2.
Valve-spring lifter. C. W. Carr. 1,783,827; Dec. 2.
Valve, Stop. O. Hajek. 1,783,646; Dec. 2.
Valve, Thermostatic. E. J. Leach. 1,783,730; Dec. 2.
Vehicle brake. J. J. McGuire. 1,783,852; Dec. 2.
Vehicle, Motor. W. R. Griswold. 1,783,614; Dec. 2.
Vehicle, Road. R. B. Fageol. Re17,889; Dec. 2.
Vehicle, Self-propelled road. E. T. J. Tapp. 1,783,890; Dec. 2.
Vehicles, Handling and storing motor. G. Lowenstein. 1,783,206; Dec. 2.
Vending machine, Coin-controlled. J. W. Beeson. 1,783,325; Dec. 2.
Ventilating construction, Automobile. H. Ford. 1,783,501; Dec. 2.
Ventilating device, Sound-controlling. H. R. Bliss. 1,783,276; Dec. 2.
Ventilator. S. E. Cibulas. 1,783,406; Dec. 2.
Vibratory screen. F. H. Haselow, and C. Redig. 1,783,617; Dec. 2.
Vise. T. R. Woods. 1,783,594; Dec. 2.
Visible flow indicator. B. Geyer and R. J. Jauch. 1,783,542; Dec. 2.
Voltage controlling and regulating device. G. Merle, sr. 1,784,542; Dec. 2.
Voltage generator, Constant. F. B. Monar. 1,783,745; Dec. 2.
Voltage transformer, Variable. J. F. Peters and A. J. Maslin. 1,783,545; Dec. 2.
Vulcanizing appliance. J. D. Voss. 1,783,894; Dec. 2.
Warp knitting, Fashioned. P. Lévy. 1,783,847; Dec. 2.
Washer-loading device. S. J. Finn. 1,783,232–3; Dec. 2.
Washing machine. O. T. Dehle. 1,783,415; Dec. 2
Water meter. E. E. Gamon. 1,783,707; Dec. 2.
Water softener. F. W. Miller. 1,783,255; Dec. 2.
Water Softeners, Construction of zeolite. R. O. Friend. 1,783,466; Dec. 2.
Wave beautifier, Permanent-. J. Koerner. 1,783,881; Dec. 2.
Weather strip for doors, Roller. A. Olson. 1,783,305; Dec. 2.
Welding machines, Attachment for. E. W. Little. 1,783,337; Dec. 2.
Welding strip for golf shafts. H. C. Lagerblade. 1,783,802; Dec. 2.
Welding tubular articles, Electrically. W. E. Crawford. 1,783,411; Dec. 2.
Wheel: *See*—
Car wheel. Grinding wheel.
Disk wheel.
Wheel-hub construction, Vehicle. C. G. Keller. 1,783,432; Dec. 2.
Wheel mount, Abrasive-. T. Larsson. 1,783,729; Dec. 2.
Whipper and mixer. W. L. Laib. 1,783,437; Dec. 2.
Window construction. W. M. Richter. 1,783,483; Dec. 2.
Window frame, Collapsible. C. Mattson. 1,783,910; Dec. 2.
Window-regulator adjustment. C. O. Ball. 1,783,933; Dec. 2.
Window screen. L. Levi. 1,783,732; Dec. 2.
Windshield clarifier. L. Askam. 1,783,270; Dec. 2.
Windshield cleaner. J. R. Oishei, H. Bueber, W. Paulus, and E. C. Horton. 1,783,582; Dec. 2.
Wire, Apparatus for coating. C. D. Johnson. 1,783,429; Dec. 2.
Wire-cutting mechanism. A. W. Johnson. 1,783,620; Dec. 2.
Wire fabrics, Making. W. H. Sommer. 1,783,948; Dec. 2.
Wire-fence machine. W. H. Sommer. 1,783,946; Dec. 2.
Wire, Making cement-coated. J. B. Green. 1,783,613; Dec. 2.
Wood-bending machine. C. W. Elliott. 1,783,187; Dec. 2.
Wrapping machine. H. W. A. Dixon. 1,783,226; Dec. 2.
Wrench: *See*—
Tube-flanging wrench.
Wringer and holder, Mop. D. Kenner. 1,783,879; Dec. 2.
Wringers, Feed apron for. F. W. Sigsbey. 1,783,347; Dec. 2.
X-ray dental film package. P. Goldacker and M. Schmidt. 1,783,467; Dec. 2.
Yarn or threads wound upon spools, Washing. B. Borzykowski. 1,783,493; Dec. 2.
Yarn, Treating. J. C. Hebden. 1,783,908; Dec. 2.
Yeast, Purifying. G. T. Reich. 1,783,521; Dec 2.

CLASSIFICATION OF PATENTS

ISSUED DECEMBER 2, 1930

NOTE.—First number=class, second number=subclass, third number=patent number

2— 42: 1,783,512
67: 1,783,174
72: 1,783,572
79: 1,783,485
1,783,538
86: 1,783,505
175: 1,783,549
176: 1,783,760
4— 113: 1,783,640
203: 1,783,460
263: 1,783,688
5— 18: 1,783,530
21: 1,783,531
127: 1,783,848
7— 16: 1,783,346
8— 5: R. 17,894
1,783,607
17: 1,783,908
10— 89: 1,783,539
162: 1,783,218
12— 17: 1,783,212
128.3: 1,783,600
136: 1,783,658
1,783,682
1,783,862
15— 8: 1,783,205
119: 1,783,879
126: 1,783,506
137: 1,783,754
160: 1,783,788
209: 1,783,775
229: 1,783,795
255: 1,783,582
16— 149: 1,783,475
201: 1,783,573
17— 12: 1,783,609
18— 1: 1,783,232
1,783,233
18: 1,783,894
19: 1,783,915
53: 1,783,216
54: 1,783,493
19— 2: 1,783,693
68: 1,783,333
130: 1,783,301
20— 12: 1,783,910
20: 1,783,378
40.5: 1,783,270
1,783,861
52.1: 1,783,483
52.6: 1,783,919
56.5: 1,783,326
68: 1,783,305
92: 1,783,622
22— 2: 1,783,323
124. 1,783,285
133: 1,783,805
23— 2: 1,783,901
5: 1,783,417
102: 1,783,647
117: 1,783,684
122: 1,783,778
182: 1,783,304
203: 1,783,744
229: 1,783,725
236: 1,783,662
252: 1,783,726
271: 1,783,591
24— 11: 1,783,736
23: 1,783,192
1,783,239
1,783,247
71: 1,783,743
81: 1,783,751
84: 1,783,578

CLASS 44

Arch braces. Jung Arch Brace Company. 278,197; Dec. 9; Serial No. 300,283; published Sept. 23, 1930.
Atomizers, Perfume. Evans Case Company. 278,148; Dec. 9; Serial No. 303,533; published Sept. 16, 1930.
Electrical apparatus for assisting persons with defective hearing. Adlanco Industrial Products Corporation. 278,199; Dec. 9; Serial No. 299,881; published Sept. 23, 1930.
Electromedical apparatus. N. V. Philips' Gloeilampenfabrieken. 278,248; Dec. 9; Serial No. 294,233; published Sept. 23, 1930.
Prophylactic articles of rubber or animal tissue. Stardant Rubber Company. 278,247; Dec. 9; Serial No. 295,241; published Sept. 16, 1930.
Prophylactic rubber articles. L. Hilsenbeck, Inc. 278,195; Dec. 9; Serial No. 300,871; published Sept. 16, 1930.
Prophylactic rubber articles. L. M. Schaeffer. 278,141; Dec. 9; Serial No. 304,582; published Sept. 30, 1930.
Prophylactic rubber articles. Thoro-Bred Rubber Mfg. Co. 278,142; Dec. 9; Serial No. 304,522; published Sept. 30, 1930.
Prophylactic rubber goods. R. R. Burks. 278,156; Dec. 9; Serial No. 303,245; published Sept. 30, 1930.
Prophylactic rubber goods. H. V. Plattner. 278,188; Dec. 9; Serial No. 303,005; published Sept. 16, 1930.
Scientific sleeping belt. D. S. Price. 278,140; Dec. 9; Serial No. 304,632; published Sept. 30, 1930.
Sterilizer for sterilizing dental and surgical instruments. Spark Electric Company. 278,185; Dec. 9; Serial No. 303,927; published Sept. 16, 1930.

CLASS 45

Beverages and sirups and concentrates for making the same, Maltless. Nehi, Inc. 278,214; Dec. 9; Serial No. 289,320; published Nov. 12, 1929.
Beverages and syrups and extracts for making the same, Maltless. Chesterman Co. 278,192; Dec. 9; Serial No. 304,533; published Sept. 30, 1930.
Beverages, syrups and extracts therefor. Blue Seal Extract Company. 278,193; Dec. 9; Serial No. 288,269; published Nov. 26, 1929.
Water, Spring. Virginia Buffalo Springs Corporation. 278,178; Dec. 9; Serial No. 302,843; published Aug. 5, 1930.

CLASS 46

Alimentary pastes. Kansas City Macaroni & Importing Co. 278,251; Dec. 9; Serial No. 280,499; published Sept. 16, 1930.
Biscuits. McCormick Mfg. Co. Limited. 278,216; Dec. 9; Serial No. 295,855; published Sept. 16, 1930.
Cake confections. H. C. Brill Company. 278,252; Dec. 9; Serial No. 279,516; published Apr. 9, 1929.
Cake confections. H. C. Brill Company. 278,253; Dec. 9; Serial No. 278,454; published Aug. 6, 1929.
Cake icing. Adolf J. Mainzer Inc. 278,146; Dec. 9; Serial No. 303,509; published Sept. 16, 1930.
Canned chop suey, noodles, bean sprouts, etc. Oriental Show-You Company. 278,215; Dec. 9; Serial No. 295,807; published Sept. 16, 1930.
Canned meats, sliced dried beef, canned corned-beef hash, etc. John Cook & Sons, Inc. 278,264; Dec. 9.
Canned spaghetti. Isleton Canning Co. 278,217; Dec. 9; Serial No. 298,498; published Sept. 16, 1930.
Canned tomato paste and canned tuna fish. Joseph Antognoli & Company. 278,258; Dec. 9; Serial No. 290,112; published Sept. 16, 1930.
Coconut hard butter. Spencer Kellogg and Sons, Inc. 278,160; Dec. 9; Serial No. 303,070; published Sept. 16, 1930.
Coffee, tea, and rice. Samuel S. Beard & Company. 278,160; Dec. 9; Serial No. 303,070; published Sept. 16, 1930.
Confections, Frozen. Hydrice Corporation. 278,210; Dec. 9; Serial No. 294,725; published Sept. 16, 1930.
Fruit juices, Citrus-. H. L. Sherman. 278,154; Dec. 9; Serial No. 303,350; published Sept. 16, 1930.
Gelatine dessert powder. M. S. Vosburg. 278,261; Dec. 9.
Glucose or corn syrup. Corn Products Refining Company. 278,159; Dec. 9; Serial No. 303,094; published Sept. 16, 1930.
Ice cream. D. Levinson. 278,172; Dec. 9; Serial No. 301,116; published Sept. 16, 1930.
Ice-cream confection. Gould Select Dairies, Inc. 278,169; Dec. 9; Serial No. 302,143; published Sept. 16, 1930.
Ice-cream sandwich wafers. General Cone Corporation. 278,171; Dec. 9; Serial No. 301,260; published Sept. 23, 1930.
Jellies, fruit butters, maple syrup, etc. Blanke-Baer Extract and Preserving Company. 278,277; Dec. 9.
Lamb, mutton, veal, etc. Swift & Company. 278,221; Dec. 9; Serial No. 300,686; published Aug. 26, 1930.
Mayonnaise and sandwich spread. Blue Plate Foods Inc. 278,165; Dec. 9; Serial No. 302,764; published Sept. 23, 1930.
Mayonnaise or salad dressing. M. E. Febr. 278,145; Dec. 9; Serial No. 303,534; published Sept. 16, 1930.
Sardines, herring, kipper snacks, etc. A/S United Sardine Factories. 278,213; Dec. 9; Serial No. 295,413; published Sept. 23, 1930.
Syrup, Malt. Hancock-Nelson Mercantile Company. 278,278; Dec. 9.
Syrup, Malt. M. Mercurio. 278,220; Dec. 9; Serial No. 300,643; published Sept. 16, 1930.
Syrups. J. V. Hughes. 278,250; Dec. 9; Serial No. 282,990; published Sept. 16, 1930.
Tomato paste, tomato purée, canned tomatoes, and tomato catsup. Tomato Products Company. 278,275; Dec. 9.

ALPHABETICAL LIST OF LABELS

Arant's Crack Shot. For Medicine. J. E. Arant. 38,355; Dec. 9.
Casey's Compound. For an Alterative Tonic. J. H. Casey. 38,357; Dec. 9.
Chikloh. For Poultry Medicine. P. J. Oesterling & Son Inc. 38,365; Dec. 9.

D. H. & G. H. Bell. For Boxes. Hoague-Sprague Corporation. 38,361; Dec. 9.
Dr. La Mond's Prescription. For a Preparation for Treating Nasal Catarrh, Hay Fever, Asthma, Tuberculosis. H. M. Fletcher. 38,359; Dec. 9.
Fleischmann's Baking Powder. For Baking Powder. Standard Brands Incorporated. 38,368; Dec. 9.

Hop-Ball. For Game. O. E. Swearingen. 38,369; Dec. 9.
Howard H. Jones Collegiate Football Game. For Football Game Board. Municipal Service Corporation. 38,364; Dec. 9.
Nox-Em-Out. For Insecticides. Vinco Manufacturing Co. 38,370; Dec. 9.
Puzzle of Magic 16 and Fifteen. For Game Apparatus Employing a Graduated Board and Counters Therefor. Embossing Company. 38,358; Dec. 9.
Red Head No. 6 Portable Acetylene Generator. For Acetylene Generators. Harris Calorific Company. 38,360; Dec. 9.
Roach Ded. For a Preparation for Killing Roaches. Midway Chemical Co. 38,363; Dec. 9.
Rubber Oil. For Shoe Oil. Rubber Oil Manufacturing Company. 38,366; Dec. 9.
Saw Tone. For Medicinal Preparation. H. M. Sawyer. 38,367; Dec. 9.
Stovbrite. For Stove Polish. Midway Chemical Co. 38,362; Dec. 9.
The Good Luck Brand. For Sherry Beverage. California Grape Juice Corporation. 38,356; Dec. 9.
Today's Fresh Bread. For Bread. J. L. Alline. 38,354; Dec. 9.
Vita-Mint Chewing Gum. For Chewing Gum. Vita-Mint Inc. 38,371; Dec. 9.
Waldorf. For Toilet Paper. Scott Paper Company. 38,372; Dec. 9.

ALPHABETICAL LIST OF PRINTS

Instructions for Installing Amperite Line Voltage Control. For Line-Voltage-Control Devices for Radio Sets. Amperite Corporation. 12,854; Dec. 9.
It's a Good Rule That Works Both Ways. For Rulers. George B. Graff Company. 12,855; Dec. 9.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 9TH DAY OF DECEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

A C Spark Plug Company. (See Gregg, David, assignor.)
A C Spark Plug Company. (See Zubaty, Joseph, assignor.)
Abell, Rollin, Milton, Mass. Engine drive mechanism. 1,784,409; Dec. 9.
Aberfoyle Manufacturing Company. (See Ashton, Francis E., assignor.)
Ackley, William L., assignor of fifty-one per cent to Dallas Tailor's Supply Company, Incorporated, Dallas, Tex. Valve-stem guide. 1,784,086; Dec. 9.
Acme Steel Company. (See Norton, Ralph H., assignor.)
Acoustic Products Company. (See Hutchison, Miller R., assignor.)
Adams, Henry, Plainfield, N. J. Apparatus and method of transferring coke and coal or the like. 1,784,650; Dec. 9.
Adams & Westlake Company, The. (See Levan, John F., assignor.)
Air Reduction Company. (See Van Nuys, C. C., and Schlitt, assignors.)
Aktiebolaget Maskinfabriken Gota. (See Hammarström, N. L., and Hoving, assignors.)
Aldeen, Gedor W., Rockford, Ill. Pulley. 1,783,993; Dec. 9.
Alder, Harvin F., La Grange, Ky. Electric signal. 1,784,326; Dec. 9.
Aldrich, Herbert H., and J. L. Rupp, Wilkinsburg, Pa., assignor, by mesne assignments, to Wubco Battery Corporation, Niagara Falls, N. Y. Sealing storage batteries. 1,784,216; Dec. 9.
Alexander, Charles R., Ennis, Tex. Stalk cutter. 1,784,410; Dec. 9.
Algemeene Kunstzijde unie Naamlooze Venootschap. (See Koch, Theodoor, assignor.)
Allen, Ambrose L., Mart, Tex. Mowing machine. 1,784,327; Dec. 9.
Allen, Grosvenor N., M. G. Parker and E. H. Kreps, assignors to Oneida Community, Limited, Oneida, N. Y. Spoon or similar article. Des. 82,719; Dec. 9.
Allis-Chalmers Manufacturing Company. (See Jeffrey, Fraser, assignor.)
Almquist, Leopold, Jersey City, N. J., assignor to American Car and Foundry Company, New York, N. Y. Mine car. 1,784,477; Dec. 9.
Altorfer, Alpheus W., Peoria, assignor to Altorfer Bros. Company, East Peoria, Ill. Laundry machine. 1,784,564; Dec. 9.
Altorfer Bros. Company. (See Altorfer, Alpheus W., assignor.)
American Bemberg Corporation. (See Zur Löwen, Waldemar, assignor.)
American Can Company (See Cabot, Walter K., assignor.)
American Can Company. (See Jones, Lyman L., assignor.)
American Car and Foundry Company. (See Almquist, Leopold, assignor.)
American Car and Foundry Company. (See Beyer, John, assignor.)
American Car and Foundry Company. (See Dietrichson, William F., assignor.)
American Car and Foundry Company. (See Knight, J. M., and Willoughby, assignors.)
American Car and Foundry Company. (See McBride, John J., assignor.)
American Car and Foundry Company. (See Stolberg, Emil C., assignor.)
American Car and Foundry Company. (See Walp, Charles F., assignor.)
American Car and Foundry Company. (See Willoughby, Victor, assignor.)
American Car and Foundry Motors Company. (See Hall, Elbert J., assignor.)
American Cyanamid Company. (See Heuser, Ralph V., assignor.)
American Fabrics Company, The. (See Piepenbring, Gustave A., assignor.)
American Flyer Mfg. Co. (See Becker, Harry S., assignor.)
American Hardware Corporation, The. (See Teich, Ernest L., assignor.)
American La France and Foamite Corporation. (See Patterson, Duncan W., assignor.)
American Lead Pencil Company. (See Burden, W. H., and Friedlein, assignors.)
American Lurgi Corporation. (See Pantenburg, Vitalis, assignor.)
American Rolling Mill Company, The. (See Townsend, A. J., and Miller, assignors.)
American Stove Company. (See Stockstrom, Arthur, assignor.)
American Stove Company. (See Stockstrom, A., and Brodbeck, assignors.)
American Telephone and Telegraph Company. (See Carpe, Allen, assignor.)
American Telephone and Telegraph Company. (See Mitchell, Doren, assignor.)
American Textile Company. (See Ball, Ben A., assignor.)
Anchor Cap & Closure Corporation. (See Carr, Harold J., assignor.)
Andersen, Lauritz W., Waterbury, Conn. Bouquet pin. 1,784,565; Dec. 9.
Anderson, Arvid E., Scotia, N. Y., assignor to General Electric Company. Automatic reclosing circuit-breaker system. 1,784,651; Dec. 9.
Anderson, Fritz A., assignor to The Burdick Corporation, Milton, Wis. Table therapeutic lamp. Des. 82,775; Dec. 9.
Anderson, Fritz A., assignor to The Burdick Corporation, Milton, Wis. Floor-type therapeutic lamp. Des. 82,776; Dec. 9.
Andrews, Clarence W., Burlington, N. C. Treating cotton and other vegetable pulps or fibers of a porous absorbing nature. 1,784,566; Dec. 9.
Arden Box Toe Company. (See Daly, Charles L., assignor.)
Argüelles, Paulino G., La Felguera, Spain. Safety device for electric-lamp bulbs. 1,784,167; Dec. 9.
Ashton, Francis E., assignor to Aberfoyle Manufacturing Company, Chester, Pa. Needle loom. 1,783,994; Dec. 9.
Associated Telephone and Telegraph Company. (See Preist, Thomas P., assignor.)
Augustine, Charles C., North Liberty, Iowa. Violin bow. 1,784,038; Dec. 9.
Ault, David V., Morton, Pa. Producing a pigment. 1,784,411; Dec. 9.
Aultman, Joseph L., Gadsden, Ala. Sweeper. 1,784,567; Dec. 9.
Autocall Company, The. (See Love, F. B., and Smith, assignors.)
Auto Specialties Manufacturing Company. (See Lucker, Millard B., assignor.)
Avorio, Luigi, Rome, Italy. Elastically-deformable parachute. 1,784,774; Dec. 9.
Babcock Manufacturing Company, The. (See Reynolds, Arthur W., assignor.)
Babcock & Wilcox Company, The. (See Fairchild, Frederick P., assignor.)
Babcock & Wilcox Company, The. (See Jacobus, David S., assignor.)
Babitzky, Samuel, Chicago, Ill. Base for bird-cage stands or similar articles. Des. 82,720; Dec. 9.
Bade-Cummins Mfg. Company, The. (See Cummins, Norman W., assignor.)
Badger, Edwin L., Spokane, Wash., assignor to Doherty Research Company, New York, N. Y. Water heater. 1,784,652; Dec. 9.
Bahan, William H., Greenville, S. C. Adjustable gripper for shuttles. 1,784,266; Dec. 9.
Bakelite Limited. (See Lloyd, Arthur, assignor.)
Balazinski, Louis, East Port Chester, Conn. Airship. 1,784,775; Dec. 9.
Baldwin, James L., Chicago, Ill. Cash carrier. 1,784,776; Dec. 9.
Baldwin, James P., and C. Garver, Los Angeles, Calif.; said Garver assignor to said Baldwin. Shock absorber. 1,784,328; Dec. 9.
Bale, Lawrence D., Cleveland, assignor to Union Metal Manufacturing Company, Canton, Ohio. Anchorage for poles. 1,784,568; Dec. 9.
Ball, Ben A., assignor to American Textile Company, Inc., Pawtucket, R. I. Lace. Des. 82,721; Dec. 9.
Ball, Henry V., Concord, Mass., assignor, by mesne assignments, to R. Hoe and Co., Inc., New York, N. Y. Printing machine. 1784,412; Dec. 9.
Balliet, A. H., Corporation. (See Kleinsmith, H. B., Neely, and Doll, assignors.)
Balzano, Oreste. (See Carmichael, A. J., and Balzano.)
Bander, Jacob B., Newark, N. J., assignor of one-half to C. Berger, Brooklyn, N. Y. Reading glass. 1,784,168; Dec. 9.
Barnes, James, Glasgow, Scotland. Spring clip. 1,784,717; Dec. 9.
Barrington, John H., Baltimore, Md., assignor, by mesne assignments, to Standard Brands Incorporated, Dover, Del. Yeast manufacture. 1,784,618; Dec. 9.
Bartlett, C. O., & Snow Company, The. (See Snow, Karl F., assignor.)
Bartlett, John H., jr., assignor to The Oshkosh Trunk Company, Oshkosh, Wis. Garment hanger. 1,784,569; Dec. 9.
Bauer Brothers Company, The. (See Brennan, Edward M., assignor.)

Bauer, Martin, Lakewood, Cleveland, Ohio. Ladder. 1,784,413; Dec. 9.
Baumgartner, Frédéric, Geneva, assignor to Fabrique des Montres Zenith, successeurs de Fabriques des Montres Zenith, Georges, Favre-Jacot, Le Locle, Switzerland. Watchcase. 1,784,169; Dec. 9.
Bayard, Morris L., and M. Harvey, Philadelphia, Pa. Filter-sand washing machine. 1,784,798; Dec. 9.
Baylis, Walter S., assignor to Filtrol Company of California, Los Angeles, Calif. Filtering and decolorizing paper of acid character. 1,784,509; Dec. 9.
Bayliss, Gilbert T. (See Pugh, J. V., and Bayliss.)
Beach & Arthur, Inc. (See Beach, Richard W., assignor.)
Beach, Richard W., assignor to Beach & Arthur, Inc., Indianapolis, Ind. Paper napkin or the like. Des. 82,722; Dec. 9.
Beam, Charles C., assignor to United States Glass Company, Pittsburgh, Pa. Bowl or similar article. Des. 82,723; Dec. 9.
Beards, Jess, and L. L. Tetelman, New York, N. Y. Shade and awning roller bracket. 1,784,478; Dec. 9.
Beardsley, Edwin W., and M. W. Colony, Texas City, Tex., assignors to Petroleum Conversion Corporation, New York, N. Y. Cracking hydrocarbons. 1,784,126; Dec. 9.
Beaujean, Camille, Brussels, assignor to Societe Anonyme d'Ougrée Marikaye, Ougree, Belgium. Sheet piling. 1,784,777; Dec. 9.
Becker, Harry S., River Forest, assignor to American Flyer Mfg. Co., Chicago, Ill. Automatic signaling means for toy tracks. 1,784,778; Dec. 9.
Becker, John H., Richmond Hill, assignor to Warp Twisting-In Machine Company, Brooklyn, N. Y. Removing the harness and stopping instrumentalities from a loom. 1,784,127; Dec. 9.
Becker, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Coking retort oven. 1,784,414; Dec. 9.
Becket, Frederick M., New York, N. Y., assignor to Electro Metallurgical Company. Coating metal articles. 1,784,570; Dec. 9.
Bedford, Alda V., Schenectady, N. Y., assignor to General Electric Company. Amplifier. 1,784,653; Dec. 9.
Bell, Codie D., New York, N. Y. Pulling hand top. 1,784,684; Dec. 9.
Bellman, Edward, Rockford, Ill. Alarm-clock unit. 1,784,479; Dec. 9.
Bendix Brake Company. (See La Brie, Ludger E., assignor.)
Benes, Josef, Vsetin, Czechoslovakia. Fuel pump for internal-combustion engines. 1,784,170; Dec. 9.
Benioff, Hugo, Pasadena, Calif., assignor to Carnegie Institution of Washington, Washington, D. C. Electrical recording seismograph. 1,784,415; Dec. 9.
Benoit, Leon. (See Coyle, Joseph L., assignor.)
Berg, Charles, New York, N. Y. Motor vehicle. 1,783,995; Dec. 9.
Berg, Frederick A., Chicago, Ill. Aircraft toy bomber. 1,783,949; Dec. 9.
Berger, Christian. (See Bander, Jacob B., assignor.)
Bergren, Charles G. (See Bergren, John A. and C. G.)
Bergren, John A. and C. G., Lake Park, Minn., assignors to Bergren Manufacturing Company. Potato-cutting machine. 1,784,718; Dec. 9.
Bergren Manufacturing Company. (See Bergren, John A. and C. G., assignors.)
Bergstein, Samuel, assignor to The Interstate Folding Box Company, Middletown, Ohio. Machine for refolding paper trays of the like. 1,784,571; Dec. 9.
Berline, Raoul M., Ruell, France, assignor to The Sharples Specialty Company, Philadelphia, Pa. Centrifugal apparatus. 1,784,510; Dec. 9.
Berlinerblau, Joseph, Warsaw, Poland. Driving spindles in textile-spinning machines. 1,784,719; Dec. 9.
Bernaerts, Henricus F. J., Zeist, assignor to Naamlooze Vennootschap Technisch- en Handelsbureau Van Vliet en Zonen, Bussum, Netherlands. Shock reducer for vehicles provided with leaf springs. 1,784,128; Dec. 9.
Berry, James M., Detroit, Mich. Electric wire casing. 1,784,217; Dec. 9.
Bertling, Herbert, Berlin-Wilmersdorf, Germany. Artificial lighting having a daylight effect. 1,784,171; Dec. 9.
Beyer, John, Bayonne, N. J., assignor to American Car and Foundry Company, New York, N. Y. Tank-dome cover and securing means therefor. 1,784,480; Dec. 9.
Bicknell, George M., assignor to Carter Carburetor Corporation, St. Louis, Mo. Carburetor. 1,784,481; Dec. 9.
Bierhaalder, Dirk, assignor to E. M. Bierhaalder, Minneapolis, Minn. Mold-form construction. 1,784,320; Dec. 9.
Bierhaalder, Edna M. (See Bierhaalder, Dirk, assignor.)
Bishop, Joseph W., Muskegon Heights, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Toilet seat. 1,784,619; Dec. 9.
Blackhall, John R. (See Pardee, Harvey S., assignor.)
Blaikie, Charles D. (See Durand, Moise H., assignor.)
Blake, Robert A., Brooklyn, N. Y. Toy grasshopper. 1,783,996; Dec. 9.
Bleier, Herman E., Chicago, Ill. Electric-light-bulb jacket or similar article. Des. 82,724; Dec. 9.
Bloch, André, Paris, France. Listening and selecting apparatus. 1,784,172; Dec. 9.
Blount, William H. (See Nigro, M., and Blount.)
Boca, Joseph Flint, assignor to General Motors Corporation, Detroit, Mich. Folding top. 1,784,779; Dec. 9.
Boltz, Fred S., Mansfield, Mass. Catch basin for soil-water-heat reclaimers. 1,783,950; Dec. 9.
Bonser, Ernest F., Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Pattern-copying machine. 1,783,951; Dec. 9.
Booth, Byron C., Muskegon Heights, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Toilet seat. 1,784,620; Dec. 9.
Booth, Byron C., Muskegon Heights, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Toilet seat. 1,784,807; Dec. 9.
Booth, William N., assignor to Kelsay-Hayes Wheel Corporation, of Detroit, Mich. Forming vehicle wheel disks. 1,784,218; Dec. 9.
Borgwardt, Erich. (See Schoeller, W., Borgwardt, and Feldt.)
Bowers, Maurice L., Long Beach, Calif. Wheel retainer. 1,784,330; Dec. 9.
Bowler, George H., and O. Nasu, Las Vegas, Nev. Oil burner. 1,784,173; Dec. 9.
Boye Needle Company, The. (See Carlson, Gustav A., assignor.)
Boyer, Charles A., Winona Lake, Ind. Flower holder. 1,784,621; Dec. 9.
Boynton, Alexander, San Antonio, Tex. Stage-lift flowing device. 1,784,720; Dec. 9.
Bramming, Carl, Chicago, Ill., assignor to Delta Electric Company, Marion, Ind. Electric switch. Re17,897; Dec. 9.
Brandt, David G., Westfield, N. J., assignor to Doherty Research Company, New York, N. Y. Process and apparatus for the treatment of oil. 1,784,087; Dec. 9.
Brattlien, Erick A., Kensington, Minn. Snowplow. 1,784,331; Dec. 9.
Bratu, Romulus, Paris, France. Aircraft. 1,784,654; Dec. 9.
Braun, Linus A., Minneapolis, Minn. Wood-pulp production and refining. 1,784,039; Dec. 9.
Breckenridge, Floyd. (See Schurr, L. A., and Breckenridge.)
Bredenberg, Alfred, Champlain, assignor of one-half to The Sheridan Iron Works and one-half to T. W. & C. B. Sheridan Company, New York, N. Y. Press for operating upon sheet material. 1,784,721; Dec. 9.
Brennan, Edward M., assignor to The Bauer Brothers Company, Springfield, Ohio. Cleaning apparatus for cottonseed. 1,784,219; Dec. 9.
Briggs Manufacturing Company. (See Marshall, W., and Woodhull, assignors.)
Briggs, Stephen L., Chicago, Ill. Picture-printing machine. 1,783,953; Dec. 9.
Briggs and Stratton Corporation. (See Jacobi, Edward N., assignor.)
Brill, August C., Oberursel, near Frankfort-on-the-Main, Germany, assignor to The Turner Tanning Machinery Company, Portland, Me. Plating skins. 1,783,952; Dec. 9.
Bristol Aeroplane Company Limited, The. (See Fedden, Alfred H. R., assignor.)
Britton, Edgar C., and W. R. Reed, assignors to The Dow Chemical Company, Midland, Mich. Making halogenated aromatic hydrocarbon derivatives. 1,784,267; Dec. 9.
Brockmann, Henry F. W., assignor of one-half to H. C. Scott, San Francisco, Calif. Agitator. 1,784,416; Dec. 9.
Brodbeck, Almer H. (See Stockstrom, A., and Brodbeck.)
Broder, Reuben, New York, N. Y. Automobile handgrip. 1,783,954; Dec. 9.
Broeman, Frank C., Cincinnati, Ohio, assignor to National Products-Supply Company, Ashland, Ky. Cooling compound and lubricant and manufacturing same. 1,784,220; Dec. 9.
Brogger, Ivar W., Springfield, assignor to Tiffany Manufacturing Company, Newark, N. J. Electrical indicating instrument. 1,784,417; Dec. 9.
Bronson, Budd, Lakewood, assignor to The Ohio Rubber Company, Cleveland, Ohio. Vulcanizing press. 1,784,780; Dec. 9.
Bronson, Budd, Lakewood, assignor to The Ohio Rubber Company, Cleveland, Ohio. Composite steel and rubber article. 1,784,781; Dec. 9.
Bronson, Budd, Lakewood, assignor to The Ohio Rubber Company, Cleveland, Ohio. Composite running board. 1,784,782; Dec. 9.
Brooke, Herbert, Brighton, England. Liquid electric controller. 1,784,332; Dec. 9.
Brown Company. (See Richter, G. A., and Schur, assignors.)
Brown Instrument Company, The. (See Harrison, Thomas R., assignor.)
Brown, James W., Tulsa, Okla. Derrick. 1,784,572; Dec. 9.
Bruback, Theodore M. (See Linaker, F. W., and Bruback.)
Bruer, Genevieve, San Francisco, Calif. Hatbox. 1,784,333; Dec. 9.
Brunswick-Balke-Collender Company, The. (See Bishop, Joseph W., assignor.)
Brunswick-Balke-Collender Company. (See Booth, Byron C., assignor.)
Brunswick-Balke-Collender Company, The. (See Johnson, George, assignor.)

Bryan, Joseph H., assignor of two-thirds to W. L. Simpson, Birmingham, Ala. Radiator cabinet. 1,784,040; Dec. 9.
Bryant Electric Company, The. (See McKinley, Benjamin P., assignor.)
Buckendale, Laurence R., Detroit, Mich., and C. A. Peirce, Chicago, Ill. Motor vehicle. 1,784,268; Dec. 9.
Bucklitch, Gustave J. (See Hadfield, S., and Bucklitch.)
Budd, Edward G., Manufacturing Company. (See Ledwinka, Joseph, assignor.)
Budd, Edward G., Manufacturing Company. (See Paugh, James J., assignor.)
Budd, Gerald J., Venice, Calif. Harrow and tooth thereof. 1,784,655; Dec. 9.
Budd Wheel Company. (See Hughes, James W., assignor.)
Bühler, Georg, Vienna, Austria. Compound mold for casting metal bodies. 1,784,174; Dec. 9.
Builders' Patent Scaffolding Company. (See Kingston, Thomas H., assignor.)
Burden, William H., Weehawken, and R. E. Friedlein, Mountain View, N. J., assignors to American Lead Pencil Company, New York, N. Y. Apparatus for the manufacture of pencils. 1,783,997; Dec. 9.
Burdick Corporation, The. (See Anderson, Fritz A., assignor.)
Burgess Battery Company. (See Schulte, Walter B., assignor.)
Burt Machine Company. (See Wild, Charles H., assignor.)
Burton, Charles S., Oak Park, Ill. Vacuum tank. 1,784,129; Dec. 9.
Burton, Charles S., Oak Park, Ill. Vacuum tank. 1,784,130; Dec. 9.
Burton-Dixie Corporation. (See Pearce, Charles F., jr., assignor.)
Butler, Clyde G., assignor to The Cincinnati Ball Crank Company, Cincinnati, Ohio. Grease-gun casing. Des. 82,725; Dec. 9.
Butler, Clyde G., and F. C. Woelfer, jr., assignors to The Cincinnati Ball Crank Company, Cincinnati, Ohio. Grease cup. 1,784,573; Dec. 9.
Butler, Henry E., Scotia, N. Y., assignor to General Electric Company. Film cut-out. 1,784,656; Dec. 9.
Cabot, Walter K., Montclair, N. J., assignor to American Can Company, New York, N. Y. Can-making machinery and apparatus. 1,784,131; Dec. 9.
Cabrera, Charles T., assignor to Electric Dialyzer Corporation, New York, N. Y. Filtration system. 1,784,132; Dec. 9.
Caille Motor Company. (See Knupp, Harry E., assignor.)
Cain, John R., Washington, D. C., assignor to The Richardson Company, Lockland, Ohio. Annealing. 1,784,221; Dec. 9.
Cairns Development Company. (See Carns, Edmund B., assignor.)
California Institute of Technology. (See Millikan, R. A., and Sorensen, assignors.)
Callum, Preston D., Baltimore, Md. Knife guard. 1,784,334; Dec. 9.
Campbell, Leon J., Buchanan, Mich., assignor, by mesne assignments, to The Studebaker Corporation, South Bend, Ind. Power take-off unit for tractors. 1,784,088; Dec. 9.
Cantwell, John M., Tarrytown, N. Y. Jack. 1,784,574; Dec. 9.
Carbaugh, Conrad A., Dickeys Mountain, Pa. Adjusting stop for sawmill-carriage headblocks. 1,784,175; Dec. 9.
Carborundum Company, The. (See Wills, Herbert J., assignor.)
Carickhoff, James R., Lexington, N. C. Clutch construction. 1,784,722; Dec. 9.
Carlson, Gustav A., assignor to The Boye Needle Company, Chicago, Ill. Beater spoon. 1,784,575; Dec. 9.
Carmichael, Andrew J., and O. Balzano, New Haven, Conn., assignors to The Greist Manufacturing Company. Sewing-machine presser foot. 1,784,177; Dec. 9.
Carnegie Institute of Washington. (See Benioff, Hugo, assignor.)
Carney, Samuel C., San Francisco, Calif., assignor to Shell Petroleum Corporation. Treatment of hydrocarbons. Re17,898; Dec. 9.
Carns, Edmund B., New York, N. Y., assignor to Cairns Development Company, Wilmington, Del. Laminated sheet structure. 1,784,511; Dec. 9.
Carpe, Allen, New York, N. Y., assignor to American Telephone and Telegraph Company. Equalization for carrier systems. 1,784,176; Dec. 9.
Carpe, Allen, New York, N. Y., assignor to American Telephone and Telegraph Company. Voice-controlled circuits. 1,784,178; Dec. 9.
Carr, Harold J., New York, assignor to Anchor Cap & Closure Corporation, Long Island City, N. Y. Screw cap. 1,784,089; Dec. 9.
Carson, William W., Jr. (See Giesler, J. V., Carson, and Clark.)
Carson, William W., jr., assignor, by mesne assignments, to The Fulton Syphon Company, Knoxville, Tenn. Thermostatically-controlled valve mechanism. 1,784,041; Dec. 9.
Carson, William W., jr., assignor to The Fulton Syphon Company, Knoxville, Tenn. Thermostat support. 1,784,042; Dec. 9.
Carter Carburetor Corporation. (See Bicknell, George M., assignor.)
Case, J. I., Company. (See Walsh, James A., assignor.)
Catlin, Gordon W. F., St. Albans, England. Apparatus for separating fat or other material from gases. 1,784,418; Dec. 9.
Cauchemont, Albert, Paris, France. Ventilating device. 1,784,783; Dec. 9.
Celanese Corporation of America. (See Dickie, W. A., Platts, and Latham, assignors.)
Cement Gun Construction Co. (See Swann, Edward C., assignor.)
Centofanti, Sam, and A. Marchetti, Youngstown, Ohio. Radiator cap and movable headlight. 1,784,043; Dec. 9.
Chamberlain, Martin T., Joliet, Ill. Coating machine. 1,783,955; Dec. 9.
Chandler, Franklin F., assignor to Ross Gear & Tool Company, La Fayette, Ind. Steering gear. 1,784,044; Dec. 9.
Chapple, John C. (See Muhlfeld, J. E., and Chapple.)
Charcolite Corporation. (See Mitchell, John, assignor.)
Chemische Fabrik auf Actien vorm E. Schering. (See Jordan, H., Schoeller, and Clerc, assignors.)
Chemische Fabrik auf Actien (vorm. E. Schering.) (See Schoeller, W., Borgwardt, and Feldt, assignors.)
Cheney Weeder Company. (See Largent, Raleigh M., assignor.)
Chrétien, Henri, St.-Cloud, assignor to Societe Anonyme Francaise dite: Societe Technique D'Optique et de Photographie (S. T. O. P.) St.-Ouen, France. Photographic reproduction objective with two diaphragms and its application as in printing positives for black and white cinematography, color cinematography, or cinematography in relief. 1,783,998; Dec. 9.
Christensen Machine Company, The. (See Greene, Frederick J., assignor.)
Christiansen, Nels and C. Mortensen, Ringsted, Iowa. Flexible hinged drawbar for harrows. 1,784,576; Dec. 9.
Christensen, Niels A., Cleveland, Ohio. Vehicle brake mechanism. Re17,899; Dec. 9.
Christophel, Carl E., deceased, late of Pearl River, by The First National Bank and Trust Company of New York, executor; said Christophel assignor to Dexter Folder Company, New York, N. Y. Sheet-feeding device. 1,784,335; Dec. 9.
Christophel, Carl E., deceased, late of Pearl River, by The First National Bank and Trust Company of Pearl River, New York, executor; said Christophel assignor to Dexter Folder Company, New York, N. Y. Sheet-feeding device. 1,784,336; Dec. 9.
Chrysler Corporation. (See Hadley, Newton F., assignor.)
Chrysler Corporation. (See Skelton, Owen R., assignor.)
Cimorosi, Alberto, Elkton, Md. Salute and making same. 1,783,999; Dec. 9.
Cincinnati Ball Crank Company, The. (See Butler, Clyde G., assignor.)
Cincinnati Ball Crank Company, The. (See Butler, C. G., and Woelfer, assignors.)
Clark, Fred D., Kansas City, Mo. Building. Des. 82,726; Dec. 9.
Clark, Thomas R. (See Giesler, J. V., Carson, and Clark.)
Clark, Thomas R., Knox County, assignor to The Fulton Syphon Company, Knoxville, Tenn. Thermostat support. 1,784,045; Dec. 9.
Clarke, Bruce E., and A. A. Schlew, Tulsa, Okla. Cast or splint removing device. 1,784,337; Dec. 9.
Clarkson, Thomas, London, England. Steam generator or water heater. 1,784,338; Dec. 9.
Clasen, Friedrich, Lubeck, and H. Lenckerstorf, Stockelsdorf, assignors to Maschinenfabrik Beth, Aktiengesellschaft, Lubeck, Germany. Filtering apparatus. 1,784,339; Dec. 9.
Claus Manufacturing Co. (See Leins, Oscar J., assignor.)
Clayton, Andrew B., Union, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Looper-actuating mechanism for sewing machines. 1,784,512; Dec. 9.
Clegg Lock Washer Corporation. (See Clegg, Roy E., assignor.)
Clegg, Roy E., assignor to Clegg Lock Washer Corporation, Chicago, Ill. Lock washer. 1,784,269; Dec. 9.
Clerc, Reinhard. (See Jordan, H., Schoeller, and Clerc.)
Cleveland Trust Company, The. (See Jardine, Frank, assignor.)
Coahran, Jesse M., Colegrove, Pa. Removing methanol from pyroligneous acid liquor. 1,784,270; Dec. 9.
Coberly, Clarence J., Los Angeles, assignor to Kobe, Inc., Huntington Park, Calif. Cutting slots in metal. 1,784,513; Dec. 9.
Coffield Washer Company of Canada Limited, The. (See Kamp, C. T., and Ryckman, assignors.)
Coleman, Allen B., Des Moines, Iowa. Display rack for ornamental tiles. 1,784,577; Dec. 9.
Coles, Yeyton S., Atlanta, Ga. Whirligig. 1,784,179; Dec. 9.
Collins, Walter H., assignor to Pacific Clay Products, Los Angeles, Calif. Conduit and constructing the same. 1,784,271; Dec. 9.
Colony, Myron W. (See Beardsley, E. W., and Colony.)
Conant, Clarence H., Chicago, Ill. Electrical connecter. 1,784,340; Dec. 9.
Condit Electrical Manufacturing Corporation. (See Edsall, William S., assignor.)
Congoleum-Nairn, Inc. (See Feeney, Joseph P., assignor.)

Consolidated Aircraft Corporation. (See Gwinn, J. M., jr., and Oversmith, assignors.)
Consortium fur Elektrochemische Industrie. (See Herrmann, W. O., and Haehnel, assignors.)
Constable, Charles E., assignor to The National Marking Machine Company, Cincinnati, Ohio. Spiral conveyer device for packages and coat hangers. 1,783,272; Dec. 9.
Constable, Charles E., assignor to The National Marking Machine Company, Cincinnati, Ohio. Bundle-transferring device for conveyers. 1,784,273; Dec. 9.
Constant, C. L., Company. (See Stewart, Alexander, assignor.)
Cook, Harvey S., Valparaiso, Ind., assignor to Cook Laboratories, Inc. Medicament-dispensing cartridge. 1,783,956; Dec. 9.
Cook Laboratories, Inc. (See Cook, Harvey S., assignor.)
Cooper, William L., Kankakee, Ill., assignor to Florence Stove Company, Boston, Mass. Oil heating stove. 1,784,000; Dec. 9.
Cornwell, Ralph E., Pasadena, Calif. Rotary engine. 1,784,578; Dec. 9.
Cotton, Frederick S., London, England. Airplane skid. 1,784,274; Dec. 9.
Coultas, Dwight W., Cranston, R. I. Buckle. Des. 82,727; Dec. 9.
Courter, Andrew L., Paterson, N. J., assignor to C. K. Eagle & Co., Inc., New York, N. Y. Decorative fabric. Des. 82,728; Dec. 9.
Courter, Andrew L., Paterson, N. J., assignor to C. K. Eagle & Co., Inc., New York, N. Y. Decorative fabric. Des. 82,729; Dec. 9.
Courter, Andrew L., Paterson, N. J., assignor to C. K. Eagle & Co., Inc., New York, N. Y. Decorative fabric. Des. 82,730; Dec. 9.
Courter, Andrew L., Paterson, N. J., assignor to C. K. Eagle & Co., Inc., New York, N. Y. Decorative fabric. Des. 82,731; Dec. 9.
Courter, Andrew L., Paterson, N. J., assignor to C. K. Eagle & Co., Inc., New York, N. Y. Decorative fabric. Des. 82,732; Dec. 9.
Coyle, Joseph L., London, Ontario, Canada, assignor to L. Benoit, Chicago, Ill. Egg carton. 1,784,275; Dec. 9.
Craig, Robert, Dayton, Ohio, assignor to International Business Machines Corporation. Metroscopic force-measuring instrument. 1,784,046; Dec. 9.
Crary, Charles A., Wyoming, Ohio. Cake of soap. Des. 82,777; Dec. 9.
Crawford, Marian, Chicago, Ill. Lingerie clasp. 1,784,482; Dec. 9.
Crickmer, Charles S., assignor to Tridex Corporation, Dallas, Tex. Suction atomizer. 1,784,222; Dec. 9.
Crickmer, Charles S., assignor to Tridex Corporation, Dallas, Tex. Handle. 1,784,223; Dec. 9.
Crites, Joe. (See Davidson, P., and Crites.)
Cummins, Norman W., assignor to The Bade-Cummins Mfg. Co., Louisville, Ky. Hood clamp. 1,784,224; Dec. 9.
Curtis, Rowland J., assignor to The Reeves Manufacturing Company, Dover, Ohio. Forming die. 1,784,579; Dec. 9.
Cushner, Henry F., Brooklyn, N. Y. Car for amusement devices. Des. 82,733; Dec. 9.
Cutler-Hammer, Inc. (See Seeger, Edwin W., assignor.)
Cutler-Hammer, Inc. (See Stevens, W. C., and Meuer, assignors.)
Cutler-Hammer, Inc. (See Tregoning, William C., assignor.)
Dahl, Victor, Spokane, Wash. Christmas-tree support. 1,784,090; Dec. 9.
Dallas Tailor's Supply Company Incorporated. (See Ackley, William L., assignor.)
Daly, Charles L., Brockton, assignor, by mesne assignments, to Arden Box Toe Company, Watertown, Mass. Soft box toe. 1,784,276; Dec. 9.
Darby, George A., East Orange, assignor to Orange Roller Bearing Company, Orange, N. J. Roller bearing. 1,783,957; Dec. 9.
Dardani, Martin E. E., assignor, by mesne assignments, to The New England Filter Corporation, Fairfield, Conn. Gasoline filter. 1,784,622; Dec. 9.
Darlington, Francis G., San Francisco, Calif. Switch-box plate cover. 1,784,277; Dec. 9.
Davidson, Louis, New York, N. Y. Arch or truss shoe. 1,783,958; Dec. 9.
Davidson, Philip, New York, N. Y., and J. Crites, Evanston, Ill., assignor to International Combustion Engineering Corporation, New York, N. Y. Pneumatic feed-regulating mechanism. 1,784,483; Dec. 9.
Davydoff, Leonide. (See Rebikoff, Wassily, assignor.)
Day, J. H., Company, The. (See Schiff, Sigmund, assignor.)
Dayton Pump & Manufacturing Company, The. (See Eickmeyer, Earl E., assignor.)
Deacon, Percy J., Lakeworth, Fla. Tendering meats. 1,784,580; Dec. 9.
Dean, George H., Norwood, R. I. Cap for building columns. 1,784,091; Dec. 9.
Dean, George H., Norwood, R. I. Cap for building columns. 1,784,092; Dec. 9.
De Benedictis, Charles, Palisades, N. J. Rug. 1,784,657; Dec. 9.
Decker, Alonzo G., Baltimore County, Md., assignor to Marschke Manufacturing Company, Indianapolis, Ind. Electric drive for grinder wheels. 1,784,133; Dec. 9.
Degener, Gustave O., Brooklyn, assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,784,047; Dec. 9.
De Hora, Manuel H., New York, N. Y. Aircraft. 1,784,723; Dec. 9.
Deimel, Richard F. (See Gillmor, R. E., and Deimel.)
Delale, Emile, Paris, France. Roof for carriage bodies. 1,784,180; Dec. 9.
Delta Electric Company. (See Bramming, Carl, assignor.)
Demag Aktiengesellschaft. (See Möller, Fritz, assignor.)
De Marco, Anthony. (See Morano, James E., assignor.)
Demoucron, Gaston J., Paris, France. Boot last. 1,784,181; Dec. 9.
De Samsonow, Alexandre, assignor, by mesne assignments, to Societe pour l'Enrichissement et l'Agglomeration des Minerals, Societe Anonyme, Brussels, Belgium. Apparatus for agglomerating and roasting minerals. 1,784,658; Dec. 9.
De Sherbinin, Ingvar E., New York, N. Y. Lamp shade. 1,784,048; Dec. 9.
Despard, Victor R., assignor to McGill Manufacturing Company, Valparaiso, Ind. Electric switch. 1,784,514; Dec. 9.
Des Roches, Philip W., Detroit, Mich. Control member for liquids. 1,783,959; Dec. 9.
Detroit Steel Products Company. (See Loucks, James F., assignor.)
Devany, Patrick F., Chicago, Ill. Core box. 1,784,225; Dec. 9.
Devaux, Paul, Juvisy, France. Driving means for the rollers of spinning machines. 1,784,659; Dec. 9.
Devito, Antonio, Brooklyn, N. Y. Bicycle mechanism. 1,784,419; Dec. 9.
De Vlieg, Gerard A., Rockford, Ill. Setting gauge. 1,784,093; Dec. 9.
De Witt, William J., assignor to Shoe Form Co., Inc., Auburn, N. Y. Expansible toe form. 1,784,660; Dec. 9.
De Witt, William J., assignor to Shoe Form Co., Inc., Auburn, N. Y. Shoe form. 1,784,661; Dec. 9.
De Witt, William J., assignor to Shoe Form Co., Inc., Auburn, N. Y. Shoe form. 1,784,662; Dec. 9.
Dexter Folder Company. (See Christophel, Carl E., assignor.)
Dexter Folder Company. (See Ehlig, Harry, assignor.)
Dick, Chas. A., trustee, et al. (See Gullette, William A., assignor.)
Dickie, William A., T. H. Platts, and L. Latham, Spondon, near Derby, England, assignors to Celanese Corporation of America. Manufacture of yarns or threads and apparatus therefor. 1,784,581; Dec. 9.
Dietert, Harry W., assignor to United States Radiator Cor., Detroit, Mich. Continuous iron-temperature recorder. 1,784,420; Dec. 9.
Dietrichson, William F., Webster Groves, Mo., assignor to American Car and Foundry Company, New York, N. Y. Car construction. 1,784,484; Dec. 9.
Doerr Manufacturing Company. (See Roedding, Gordon E., assignor.)
Doherty Research Company. (See Badger, Edwin L., assignor.)
Doherty Research Company. (See Brandt, David G., assignor.)
Doll, Fred W. (See Kleinsmith, H. B., Neely, and Doll.)
Dollinger, Lewis L., assignor to Staynew Filter Corporation, Rochester, N. Y. Method and apparatus for filtering and cleaning filters. 1,784,278; Dec. 9.
Donald, James. (See Downey, T. F., and Donald.)
Donovan, Robert E. (See Wallenberg, Richard S., assignor.)
Döppenschmitt, Friedrich, Pforzheim, Germany. Flexible structure. 1,784,582; Dec. 9.
Dorr Company, The. (See Newton, Harry W., assignor.)
Dorsey, Herbert G. (See Fay, R. D., and Dorsey.)
Douglas Aircraft Company. (See Douglas, Donald W., assignor.)
Douglas, Donald W., Santa Monica, assignor, by mesne assignments, to Douglas Aircraft Company, Inc., Los Angeles, Calif. Amphibian plane. 1,784,784; Dec. 9.
Douglis, Charles, Lawrence, N. Y. Connecter device for cuffs of knickers. 1,784,785; Dec. 9.
Dow Chemical Company, The. (See Britton, E. C., and Reed, assignors.)
Dowling, Frederick A. (See Zuber, E. F., and Dowling.)
Downey, Thomas F., and J. Donald, Chicago, Ill. Steam-generating furnace. 1,784,134; Dec. 9.
Draper, John H., Canton, Mass. Washing machine. 1,784,663; Dec. 9.
Dreese, Erwin E. (See Lincoln, J. F., and Dreese.)
Dreyfus, Henry, London, England. Making acetic acid. 1,784,583; Dec. 9.
Dujardin, Henry. (See Rensonnet, Oscar, assignor.)
Duncan, William M., Alton, Ill. Mechanical stoker. 1,784,001; Dec. 9.
Dunning, William E., assignor to The McCaskey Register Company, Alliance, Ohio. Filing appliance. 1,784,584; Dec. 9.
Duplate Corporation. (See Sherts, James H., assignor.)
Du Pont, E. I., de Nemours & Company. (See Frei, John, assignor.)
Du Pont, E. I., de Nemours, & Company. (See Woodward, Harold E., assignor.)
Durand & Huguenin. (See Taussig, Walter, assignor.)
Durand, Moise H., assignor to C. D. Blaikie, doing business as Smith, Richardson Co., Attleboro, Mass. Woven wire and method of its manufacture. 1,784,786; Dec. 9.

Dur-O-Lite Pencil Co. (See Lynn, John P., assignor.)
Dutchess Tool Company. (See Van Houten, Frank H., assignor.)
Dyer, Clarence J. L., Kisbey, Saskatchewan, Canada. Drag harrow. 1,784,182; Dec. 9.
Eagle, C. K., & Co. (See Courter, Andrew L., assignor.)
Eastman Kodak Company. (See Fritts, Edwin C., assignor.)
Eastman Kodak Company. (See Sheppard, S. E., and McNally, assignors.)
Eclipse Machine Company. (See Lansing, Raymond P., assignor.)
Edgerton, Israel V., assignor to Palace Poultry Car Company, Chicago, Ill. Poultry car. 1,784,685; Dec. 9.
Edsall, William S., Brookline, assignor to Condit Electrical Manufacturing Corporation, South Boston, Mass. Motor-control switch. 1,784,226; Dec. 9.
Ehlig, Harry, Pearl River, assignor, by mesne assignments, to Dexter Folder Company, New York, N. Y. Sheet feeder. 1,783,962; Dec. 9.
Eickholt, Friedrich, Weisweld, Germany. Separator. 1,784,664; Dec. 9.
Eickmeyer, Earl E., assignor to The Dayton Pump & Manufacturing Company, Dayton, Ohio. Liquid-dispensing pump. Des. 82,734; Dec. 9.
Electric Boat Company. (See Spear, Lawrence Y., assignor.)
Electro Dialyzer Corporation. (See Cabrera, Charles T., assignor.)
Electro Metallurgical Company. (See Becket, Frederick M., assignor.)
Electro Metallurgical Company. (See George, Harry S., assignor.)
Electro-Mobile Corporation. (See Neuland, Alfons H., assignor.)
Elgin National Watch Company. (See Showalter, Victor E., assignor.)
Eller, Fritz, Berlin-Wannsee, Germany. Coin-controlled sales apparatus. 1,784,585; Dec. 9.
Ellerbeck, Ben B., Salt Lake City, Utah. Convertible automobile top. 1,784,279; Dec. 9.
Elliott, Edward O., Jenkintown, Pa. Locomotive-boiler support. 1,784,787; Dec. 9.
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Floor covering. 1,784,135; Dec. 9.
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Floor-covering material and making same. 1,784,799; Dec. 9.
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Floor covering and making same. 1,784,800; Dec. 9.
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Floor covering and making same. 1,784,801; Dec. 9.
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Textured floor covering and making same. 1,784,802; Dec. 9.
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Light-colored floor covering and making same. 1,784,803; Dec. 9.
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Variegated floor covering and making same. 1,784,804; Dec. 9.
Ellis-Foster Company. (See Ellis, Carleton, assignor.)
Ellis-Foster Company. (See Lougovoy, Boris N., assignor.)
Elms, Robert W., Baltimore, Md. Sampler. 1,784,485; Dec. 9.
Emis, Benjamin, New York, assignor of one-half to I. L. Schonbrun, Brooklyn, N. Y. Illuminated sign. 1,783,963; Dec. 9.
Engel, Albert W., Chicago, Ill. System for mounting stereoscopic views. 1,784,227; Dec. 9.
Englund, Albert E., West Hartford, assignor to The Jacobs Manufacturing Company, Hartford, Conn. Chuck. 1,784,002; Dec. 9.
Enke, Martin F., Oakland, Calif. Buoy-inflated swimming paddle. 1,784,136; Dec. 9.
Eslinger, Harvey H., Hecktown, Pa., assignor to Eslinger Motors Company. Valve mechanism for internal-combustion engines. 1,784,421; Dec. 9.
Eslinger Motors Company. (See Eslinger, Harvey H., assignor.)
Esmond Mills, The. (See Viscolosi, Louis, assignor.)
Eugene Ltd. (See Gunter, W. A., and Griesser, assignors.)
Evans Case Company. (See Lawrence, Cecil H., assignor.)
Evans, Powell, and M. P. Stoney, Philadelphia, Pa. Fire-extinguisher unit. Des. 82,735; Dec. 9.
Fabre, Hippolyte, Clamart, France. Plant for the vertical molding of concrete work. 1,784,422; Dec. 9.
Fabriques des Montres Zenith. (See Baumgartner, Frédéric, assignor.)
Fahrenholtz, Henry, assignor of one-third to J. Fahrenholtz and one-third to E. Winters, Dayton, Ky. Musical alarm. 1,784,049; Dec. 9.
Fahrenholtz, Joseph, et al. (See Fahrenholtz, Henry, assignor.)
Fairall, Harry K., assignor to Multicolor Ltd., Los Angeles, Calif. Binocular nonstop motion-picture camera. 1,784,515; Dec. 9.
Fairbanks, Luke J., Los Angeles, Calif. Container and means for holding said containers in cooperation. 1,784,516; Dec. 9.
Fairchild, Frederick P., White Plains, N. Y., assignor to The Babcock & Wilcox Company, Bayonne, N. J. Furnace. 1,784,586; Dec. 9.
Fairchild, Walter L., New York, N. Y. Molding apparatus for pneumatic tubes, tires, and the like. 1,784,623; Dec. 9.
Fantino, Italo, New York, N. Y. Shoe stretcher. 1,784,341; Dec. 9.
Farber, S. W., Inc. (See Farber, Simon W., assignor.)
Farber, S. W., Inc. (See Murphy, Frank J., assignor.)
Farber, Simon W., assignor to S. W. Farber, Inc., Brooklyn, N. Y. Casserole or similar article. Des. 82,736; Dec. 9.
Farley, William D. (See McNabb, W. R., Farley, and Starcher.)
Farmer, Frank T., Detroit, Mich., assignor of one-half to R. E. Farmer, New York, N. Y. Lawn mower. 1,784,342; Dec. 9.
Farmer, Robert E. (See Farmer, Frank T., assignor.)
Farrand, Clair L., Forest Hills, N. Y., assignor to Farrand Inductor Corporation, Jersey City, N. J. Loud-speaker and circuit therefor. 1,784,486; Dec. 9.
Farrand, Clair L., Forest Hills, N. Y., assignor to Farrand Inductor Corporation, Jersey City, N. J. Motor for loud-speakers. 1,784,517; Dec. 9.
Farrand Inductor Corporation. (See Farrand, Clair L., assignor.)
Farrar, John H., Memphis, Tenn., assignor to S. J. Graham, Tuckerman, Ark. Coin-controlled vending machine. 1,784,587; Dec. 9.
Fauerbach, Daniel, West Easton, Pa., assignor to General Chemical Company, New York, N. Y. Process and apparatus for producing wax. 1,784,686; Dec. 9.
Faulkner, Ralph C., Brooklyn, assignor to E. R. Squibb & Sons, New York, N. Y. Bottle. Des. 82,737; Dec. 9.
Fay, Richard D., Cambridge, and H. G. Dorsey, Gloucester, assignors to Submarine Signal Corporation, Boston, Mass. Submarine signaling. 1,784,137; Dec. 9.
Fedden, Alfred H. R., assignor to The Bristol Aeroplane Company Limited, Bristol, England. Lubrication of internal-combustion engines. 1,784,788; Dec. 9.
Federal Merchandise Co. (See Hueglin, Herman C., assignor.)
Feeney, Joseph P., Kearny, N. J., assignor to Congoleum-Nairn, Inc. Ejector for cutting cylinders. 1,784,487; Dec. 9.
Feldt, Adolf. (See Schoeller, W., Borgwardt, and Feldt.)
Fellmer, Ernst, Leverkusen-on-the-Rhine, Germany, assignor to General Aniline Works, Inc., New York, N. Y. New azo dyestuffs. 1,784,343; Dec. 9.
Ferrier, Paul, Paris, France. Joint for molds operating by centrifugal force. 1,784,344; Dec. 9.
Ferris, Lockwood W., Salt Lake City, Utah. Concentration of minerals by froth flotation. 1,784,280; Dec. 9.
Fike, Roy H., Eagle, Idaho. Mechanical bucking horse. 1,784,183; Dec. 9.
Filtrol Company of California. (See Baylis, Walter, assignor.)
Firm "Universelle" Cigarettenmaschinen-Fabrik J. C. Muller & Co. (See Hohn, Max P. E., assignor.)
First National Bank and Trust Company of Pearl River, New York, The, executor. (See Christophel, Carl E.)
Fischer, Kuno, assignor to Süddeutsche Tele-F-On-Apparate-Kabel- und Drahtwerke A.-G., Nuremberg, Germany. Long-distance cable installation. 1,784,184; Dec. 9.
Fisk Rubber Company, The. (See Littlefield, Lloyd M., assignor.)
Flack, Theodore J., Brooksville, Fla. Positioning mold pattern units. 1,784,345; Dec. 9.
Flehr, Paul D., San Francisco, Calif. Frequency converter. 1,784,228; Dec. 9.
Fletcher, Harold W., assignor to Hughes Tool Company, Houston, Tex. Valve-operating means. 1,784,094; Dec. 9.
Fletcher, Harold W., assignor to Hughes Tool Company, Houston, Tex. Quenching tank. 1,784,095; Dec. 9.
Fletcher, Harold W., assignor to Hughes Tool Company, Houston, Tex. Fluid-operated swab. 1,784,096; Dec. 9.
Florence Stove Company. (See Cooper, William L., assignor.)
Föbus, Ludwig, Dortmund-Barop, Germany. Cooling means for castings. 1,784,346; Dec. 9.
Foote-Burt Company, The. (See Kelleher, Daniel, assignor.)
Ford, Henry, assignor to Ford Motor Company, Dearborn, Mich. Generator. 1,784,624; Dec. 9.
Ford Instrument Company. (See Tanner, Harry L., assignor.)
Ford, James S., and F. Murray, Greymouth, New Zealand. Fuel briquette. 1,784,665; Dec. 9.
Ford Motor Company. (See Ford, Henry, assignor.)
Forgrove Machinery Company Limited, The. (See Grover, Frederick, assignor.)
Fortinberry, Howard F., Fort Worth, assignor to Gulf Production Company, Houston, Tex. Dump and seal tubing valve. 1,784,050; Dec. 9.
Fox Furnace Company, The. (See Suppes, Max M., assignor.)
Fox, John H., and W. Owen, Pittsburgh, Pa., assignors to Pittsburgh Plate Glass Company. Surfacing machine. 1,783,960; Dec. 9.
Fox, Vernie A., assignor to Young Brothers Company, Detroit, Mich. Conveyer rack. 1,784,229; Dec. 9.
Frank, S. K., et al. (See Gullette, William A., assignor.)
Franks, Harry H., assignor of three-fourths to Tidal Oil Company, Tulsa, Okla. Walking-beam stirrup. 1,784,003; Dec. 9.

Frantz, Virgil L., and O. O. Lemon, Roanoke, Va., assignors to said Frantz. Locomotive sending device. 1,784,051; Dec. 9.

Freeberg, George. (See Simons, G. A., and Freeberg.)

Freed, Frank A. (See Pearson, Alfred, assignor.)

Freeman, John C., Jeffersonville, Ind. Handgrip attachment for steering wheels. 1,784,230; Dec. 9.

Frei, John, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Making alkyl chlorides. 1,784,423; Dec. 9.

French, William A., Minneapolis, Minn. Cabinet. Des. 82,738; Dec. 9.

French, William A., Minneapolis, Minn. Table. Des. 82,739; Dec. 9.

Fried, Abraham L., New York, N. Y. Shoe and making same. 1,784,806; Dec. 9.

Fried. Krupp Germaniawerft Aktiengesellschaft. (See Haussmann, Karl, assignor.)

Friedlein, Robert E. (See Burden, W. H., and Friedlein.)

Fritts, Edwin C., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic cartridge. 1,784,281; Dec. 9.

Frova, Giovanni, Milan, Italy. Fruit-pitting machine. 1,784,347; Dec. 9.

Fujii, Isao, Komasawa-Machi, Ebara-Gun, Tokyo-Fu, Japan. Matrix for typographical machines. 1,784,789; Dec. 9.

Fulton Sylphon Company, The. (See Carson, William W., jr., assignor.)

Fulton Sylphon Company, The. (See Clark, Thomas R., assignor.)

Fulton Sylphon Company, The. (See Giesler, Jean V., assignor.)

Fulton Sylphon Company, The. (See Giesler, J. V., Carson, and Clark, assignors.)

Fulton Sylphon Company, The. (See Searle, William F., jr., assignor.)

Garde, John, Toronto, Ontario, Canada. Sewing-machine feed. 1,784,724; Dec. 9.

Gardner, Frederic E., Beloit, Wis. Grinding machine. 1,784,231; Dec. 9.

Gardner, George, Redlands, Calif. Loading attachment for road graders. 1,784,666; Dec. 9.

Garver, Clifford. (See Baldwin, J. P., and Garver.)

Garwood, Charles E., Avalon, Calif. Wave-motor driving mechanism. 1,784,424; Dec. 9.

Gasoline Products Company. (See Hargrove, G. C., and Montgomery, assignors.)

Gebrüder Brehmer, Maschinenfabrik. (See Kleinschmit, Oscar, assignor.)

Geiger, Paul H., Wilkinsburg, and L. O. Grondahl, Pittsburgh, assignors to The Union Switch & Signal Company, Swissvale, Pa. Electrical filtering apparatus. 1,784,004; Dec. 9.

Gelatt, Philo M., Miami Beach, Fla. Vapor-pressure gauge. 1,784,052; Dec. 9.

General Aniline Works, Inc. (See Fellmer, Ernst, assignor.)

General Aniline Works, Inc. (See Herz, R., and Schubert, assignors.)

General Aniline Works, Inc. (See Krauss, Carl, assignor.)

General Aniline Works, Inc. (See Münch, Eduard, assignor.)

General Aniline Works, Inc. (See Thiess, Karl, assignor.)

General Aniline Works, Inc. (See Zitscher, Arthur, assignor.)

General Chemical Company. (See Fauerbach, Daniel, assignor.)

General Electric Company. (See Anderson, Arvid E., assignor.)

General Electric Company. (See Bedford, Alda V., assignor.)

General Electric Company. (See Butler, Henry E., assignor.)

General Electric Company. (See Hilliard, John D., assignor.)

General Electric Company. (See Meador, Barclay F., assignor.)

General Electric Company. (See Parry, Robert D., assignor.)

General Electric Company. (See Reist, Henry G., assignor.)

General Electric Company. (See Tolson, William A., assignor.)

General Electric Company. (See Whitney, Willis R., assignor.)

General Electric Company. (See Wood, Alexander P., assignor.)

General Fire Extinguisher Company. (See Loepsinger, A. J., and Knight, assignors.)

General Fire Extinguisher Company. (See Moulder, Albert W., assignor.)

General Motors Corporation. (See Boca, Joseph, assignor.)

General Motors Corporation. (See Stranahan, Samuel A., assignor.)

General Motors Corporation. (See Summers, Caleb E., assignor.)

George, Harry S., Massapequa, N. Y., assignor to Electro Metallurgical Company. Illumination for microscopy. 1,784,425; Dec. 9.

Gesellschaft für Drahtlose Telegraphie m. b. H. (See von Arco, Georg, assignor.)

Giancola, Nicolas, assignor of one-half to R. L. McLaran, St. Louis, Mo. Garment-making machine. 1,784,687; Dec. 9.

Gibson, George M., assignor to Woodrow Washing Machine Company, Pella, Iowa. Gearing mechanism for washing machines. 1,784,282; Dec. 9.

Giesler, Jean V., assignor, by mesne assignments, to The Fulton Sylphon Company, Knoxville, Tenn. Valve mechanism. 1,784,053; Dec. 9.

Giesler, Jean V., assignor, by mesne assignments, to The Fulton Sylphon Company, Knoxville, Tenn. Thermostatically-controlled valve mechanism. 1,784,054; Dec. 9.

Giesler, Jean V., assignor, by mesne assignments, to The Fulton Sylphon Company, Knoxville, Tenn. Thermostatically-controlled valve mechanism. 1,784,055; Dec. 9.

Giesler, Jean V., assignor, by mesne asignments, to The Fulton Sylphon Company, Knoxville, Tenn. Thermostatically-controlled valve mechanism. 1,784,057; Dec. 9.

Giesler, Jean V., assignor, by mesne assignments, to The Fulton Sylphon Company, Knoxville, Tenn. Thermostat support. 1,784,058; Dec. 9.

Giesler, Jean V., assignor, by mesne assignments, to The Fulton Sylphon Company, Knoxville, Tenn. Thermostat support. 1,784,059; Dec. 9.

Giesler, Jean V., assignor, by mesne assignments, to The Fulton Sylphon Company, Knoxville, Tenn. Thermostatically-controlled-valve unit. 1,784,060; Dec. 9.

Giesler, Jean V., assignor to The Fulton Sylphon Company, Knoxville, Tenn. Thermostatically-controlled valve mechanism. 1,784,061; Dec. 9.

Giesler, Jean V., assignor to The Fulton Sylphon Company, Knoxville, Tenn. Temperature regulator. 1,784,062; Dec. 9.

Giesler, Jean V., assignor to The Fulton Sylphon Company, Knoxville, Tenn. Temperature regulator. 1,784,063; Dec. 9.

Giesler, Jean V., William W. Carson, jr., and T. R. Clark, assignors, by mesne assignments, to The Fulton Sylphon Company, Knoxville, Tenn. Thermostatically-controlled valve mechanism. 1,784,056; Dec. 9.

Gillet, Alexis F., assignor to Jubilee Manufacturing Company, Omaha, Nebr. Split segmental washer. 1,784,667; Dec. 9.

Gillmor, Reginald E., Washington, D. C., and R. F. Deimel, Hoboken, N. J., assignors, my mesne assignments, to Sperry Gyroscope Company, Inc., Brooklyn, N. Y. Latitude adjustment of gyrocompasses. 1,784,348; Dec. 9.

Gillooly, William, assignor to Metal Stampings Corporation, Streator, Ill. Lid control for workboxes. 1,784,518; Dec. 9.

Glaenser, Harry, Philadelphia, Pa. Engine truck on which boosters are mounted. 1,784,790; Dec. 9.

Gleichmann, Hans, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Berlin-Siemensstadt, Germany. Apparatus for and method of generating steam. 1,784,426; Dec. 9.

Globar Corporation. (See Imbery, Arthur, assignor.)

Globe Company, The. (See Leicht, Fred, assignor.)

Georig, Ernst, Mannheim, Germany. Rotary tempering furnace. 1,784,427; Dec. 9.

Gohlke, Henry C., Port Hope, Mich. Brake. 1,784,688; Dec. 9.

Goldberg, Solomon H., assignor to The Hump Hairpin Manufacturing Co., Chicago, Ill. Display card or similar article. Des. 82,740; Dec. 9.

Goldman, Barney, New York, N. Y. Hydraulic jack. 1,784,428; Dec. 9.

Goldsmith, Abraham L., and P. W. Rogers, Orono, Me. Device for expanding and contracting demountable rims. 1,784,283; Dec. 9.

Goodman, Abraham and J., Brooklyn, N. Y. Hair-waving device. 1,784,429; Dec. 9.

Goodman, Abraham and J., Brooklyn, N. Y. Barrette. 1,784,430; Dec. 9.

Goodman, Jacob. (See Goodman, Abraham and J.)

Gottschau, Christian M., Columbus, Ohio, assignor to Picture Machine Service Corporation. Motion-picture-projecting apparatus. 1,784,138; Dec. 9.

Grabelsky, Israel, New York, N. Y., assignor to Universal Fringe Works, Inc., Fringe. Des. 82,741; Dec. 9.

Grabler, Peter, Rocky River, assignor to Grabler Stabilizer Co., Cleveland, Ohio. Shock absorber. 1,784,005. Dec. 9.

Grabler Stabilizer Co. (See Grabler, Peter, assignor.)

Graffenberger, Friedrick, Milwaukee, Wis. Blade edger. 1,784,625; Dec. 9.

Graham, Stephen J. (See Farrar, John H., assignor.)

Green, Azaria M., Minneapolis, Minn. Mop holder. 1,784,588; Dec. 9.

Green, Thomas L., Indianapolis, Ind. Biscuit cutting and embossing machine. 1,784,431; Dec. 9.

Green, Thomas L., Indianapolis, Ind. Biscuit cutting and embossing machine. 1,784,432; Dec. 9.

Greenberg, Harry, Dover, N. J. Workholding implement. 1,784,589; Dec. 9.

Greene, Frederick J., assignor to The Christensen Machine Company, Racine, Wis. Delivery mechanism for signature-stitching machines. 1,784,590; Dec. 9.

Gregg, David, assignor to A C Spark Plug Company, Flint, Mich. Supercharger oiling system. 1,784,433; Dec. 9.

Greist Manufacturing Company, The (See Carmichael, A. J., and Balzano, assignors.)

Gresser, Peter, Detroit, Mich. Grease gun. 1,784,484; Dec. 9.

Griesser, Charles F. (See Gunter, W. A., and Griesser.)

Griswold, George M., Denver, Colo. Chalk-line reel. 1,784,064; Dec. 9.

Griswold, William A., Nashville, Tenn. Gas heater. Des. 82,742; Dec. 9.

Grondahl, Lars O. (See Geiger, P. H., and Grondahl.)

Grondahl, Lars, O., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Preparing resistance units. 1,784,435; Dec. 9.

Gross, Miriam, assignor to Miriam Gross Company, Milwaukee, Wis. Knitted garment. Des. 82,743; Dec. 9.

Gross, Miriam, Company. (See Gross, Miriam, assignor.)

Grover, Frederick, assignor to The Forgrove Machinery Company Limited, Leeds, England. Machine for wrapping cigars and similar articles. 1,784,349; Dec. 9.

Gruber, Karl, Rheydt, Germany. Rolling mill. 1,784,791; Dec. 9.

Grubman, Leo J., Belle Harbor, N. Y. Eye mounting for dolls. 1,784,519; Dec. 9.

Grubman, Leo J., Belle Harbor, N. Y. Eye mounting for dolls. 1,784,520; Dec. 9.

Guerin, Amedee, San Francisco, Calif. Vibration conductor for the deaf. 1,784,350; Dec. 9.

Gulf Production Company. (See Fortinberry, Howard F., assignor.)

Gullette, William A., assignor of two-thirds to S. K. Frank and one-third to Chas. A. Dick, Wheeling, W. Va., as trustee for J. E. Stevenson, V. G. Gundling, and C. A. Dick. Automobile running-board lamp. 1,784,668; Dec. 9.

Gundling, Val G. (See Gullette, William A.)

Gunter, Walter A., and C. F. Griesser, Baltimore, Md., assignors to Eugene Ltd. Hair-drying hood. 1,784,139; Dec. 9.

Gustafson, Carl J., Aberdeen, S. Dak. Humidifying device. 1,784,725; Dec. 9.

Guy, Ira D. (See Guy, William H., I. D., and R. E.)

Guy, Robert E. (See Guy, William H., I. D., and R. E.)

Guy, William H., I. D., and R. E., Stockton, Calif. Scraper-control mechanism. 1,784,284; Dec. 9.

Gwinn, Joseph M., jr., Buffalo, and R. E. Oversmith, Kenmore, assignors to Consolidated Aircraft Corporation, Buffalo, N. Y. Pulley mount. 1,784,521; Dec. 9.

Hadfield, Samuel, and G. J. Bucklitch, Lawrence, Mass. Front fluted drawing roll for gill boxes. 1,784,140; Dec. 9.

Hadley, Newton F., Beverly Hills, assignor to Chrysler Corporation, Highland Park, Mich. Propeller shaft. 1,784,436; Dec. 9.

Haehnel, Wolfram. (See Herrmann, W. O., and Haehnel.)

Hall, Elbert J., Berkeley, Calif., assignor to American Car and Foundry Motors Company, New York, N. Y. Air control for internal-combustion engines. 1,784,006; Dec. 9.

Hall, John W., Santa Ana, Calif. Capping-device valve for wells. 1,784,007; Dec. 9.

Hallowell, Howard T., assignor to Standard Pressed Steel Company, Jenkintown, Pa. Workbench. 1,784,726; Dec. 9.

Halpern, Max, Bronx, and W. Mayer, Brooklyn, N. Y. Necktie. 1,784,351; Dec. 9.

Halpern, Max, Bronx, and W. Mayer, Brooklyn, N. Y. Nectkie structure. 1,784,352; Dec. 9.

Hamill, James, East Orange, N. J. Apparatus for separating moisture from vapor. 1,784,627; Dec. 9.

Hamill, James, East Orange, N. J., and J. F. Taddiken, Forest Hills, N. Y. Bone-char-drying apparatus. 1,784,626; Dec. 9.

Hamill, Virginia, New York, N. Y., assignor to W. S. Libbey Company. Textile fabric. Des. 82,744; Dec. 9.

Hammarström, Nils L., Stockholm, and E. A. Hoving, Kungsor, assignors to Aktiebolaget Maskinfabriken Gota, Stockholm, Sweden. Mechanical movement. 1,784,185; Dec. 9.

Hargrove, George C., Westfield, and W. B. Montgomery, Elizabeth, N. J., assignors, by mesne assignments, to Gasoline Products Company, Inc., Wilmington, Del. Cracking hydrocarbons. 1,784,065; Dec. 9.

Harley, George W., Collingswood, N. J. Guide and pattern strip and anchor therefor. 1,784,353; Dec. 9.

Harlow, Lee H., assignor of one-half to G. C. Piper, Los Angeles, Calif. Single-button electric switch. 1,784,437; Dec. 9.

Harris, Gordon D., assignor to The Industrial Dryer Corporation, Stamford, Conn. Method of and apparatus for conditioning lumber and other materials. 1,784,727; Dec. 9.

Harrison-Noyes Chemical Corporation. (See Noyes, Stanley E., assignor.)

Harrison, Thomas R., Wyncote, assignor to The Brown Instrument Company, Philadelphia, Pa. Method of and apparatus for measuring. 1,784,522; Dec. 9.

Harriss, John A., New York, N. Y. Transit apparatus. 1,784,728; Dec. 9.

Hart-Carter Company. (See Smith, Louis E., assignor.)

Hartford-Empire Company. (See Steelman, Merton A., assignor.)

Hartmann, August, Montclair, assignor to Spratts' Patent, America, Limited, Newark, N. J. Exhibition bench. 1,784,438; Dec. 9.

Harvel Corporation, The. (See Hughes, Edward R., assignor.)

Harvey, Minor. (See Bayard, M. L., and Harvey.)

Hastings, Walter M., Methuen, Mass. Clearer and slub catcher for textile machines. 1,784,141; Dec. 9.

Haussmann, Karl, Kiel, assignor to Fried. Krupp Germaniawerft Aktiengesellschaft, Kiel-Gaarden, Prussia, Germany. Drive for motor boats. 1,784,354; Dec. 9.

Hawley, Kent A., assignor to Locke Insulator Corporation, Baltimore, Md. Apparatus for making insulators. 1,784,792; Dec. 9.

Hayden, Arthur C., Brockton, Mass. Motion-picture projector. 1,784,097; Dec. 9.

Hayes, Harvey C., Washington, D. C. Making subterranean surveys. 1,784,439; Dec. 9.

Haynes, John L. (See Michelson, L. M., and Haynes.)

Heal, Paul E., Marion, Ind. Lawn-sprinkler nozzle. Des. 82,745; Dec. 9.

Heaton, William H., assignor to Tufoak Products Co., Oakland, Calif. Making garments. 1,784,285; Dec. 9.

Heenan & Froude Limited. (See Walker, George H., assignor.)

Heinze, Ernst, Wiesdorf, near Cologne-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Producing hydroxides of alkali metals. 1,784,066; Dec. 9.

Heise, George W., and E. A. Schumacher, Lakewood, Ohio, assignors to National Carbon Co., Inc. Dry-battery electrolyte reenforcing means. 1,784,592; Dec. 9.

Heisey, A. H., & Company. (See Heisey, Edgar W., assignor.)

Heisey, Edgar W., assignor to A. H. Heisey & Company, Newark, Ohio. Ice receptacle. 1,784,232; Dec. 9.

Herlach, Fritz, and T. Rakula, Dusseldorf, assignors to Rheinische Metallwaaren-und Maschinenfabrik, Dusseldorf-Derendorf, Germany. Automatic firearm with two cartridge magazines. 1,784,355; Dec. 9.

Herrmann, Willy O., and W. Haehnel, assignors to Consortium fur Elektrochemische Industrie, Munich, Germany. Adhesive composition. 1,784,008; Dec. 9.

Hershman, Paul R., assignor of one-fourth to C. O. Sethness, one-fourth to C. H. Sethness, and one-fourth to P. Rudnick, Chicago, Ill. Making easily soluble stable hypochlorites. 1,784,286; Dec. 9.

Hertzberg, Harry, Brooklyn, N. Y. Holder for dusters and the like. 1,784,287; Dec. 9.

Hertzberg, Harry, Brooklyn, assignor, by mesne assignments, to The M. Propp Co. Inc., New York, N. Y. Electric-lamp socket. 1,784,440; Dec. 9.

Herz, Richard, Frankfort-on-the-Main, and M. Schubert Fechenheim, near Frankfort-on-the-Main, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Manufacturing ortho-aminoarylmercaptanes. 1,784,441; Dec. 9.

Heuser, Ralph V., Elizabeth, N. J., assignor to American Cyanamid Company, New York, N. Y. Making substituted guanidines. 1,784,442; Dec. 9.

Heusser, Wilfrid, Salt Lake City, Utah. Casing for precision balances. 1,784,098; Dec. 9.

Hiering, William C., assignor to J. E. Mergott Company, Newark, N. J. Cigarette-package holder. Des. 82,746; Dec. 9.

Highway Trailer Company. (See Nolen, T., and Truemper, assignors.)

Highway Trailer Company. (See Williams, Leroy E., assignor.)

Hild, Frederic W., Los Angeles, Calif. Gear transmission. 1,784,593; Dec. 9.

Hilliard, John D., Schenectady, N. Y., assignor to General Electric Company. Electric switch. 1,784,669; Dec. 9.

Himmel Brothers Company, The. (See Himmel, Fred and I., assignors.)

Himmel, Fred and I., assignors to The Himmel Brothers Company, New Haven, Conn. Store-front construction. 1,784,689; Dec. 9.

Himmel, Isidore. (See Himmel, Fred and I.)

Hi-Way Service Corporation. (See Kerber, Joseph H., assignor.)

Hoe, R., and Co. (See Ball, Henry V., assignor.)

Hohn, Max P. E., Dresden, assignor to The Firm "Universelle" Cigarettenmaschinen-Fabrik J. C. Muller & Co., Dresden, Germany. Cigarette-making machine. 1,784,443; Dec. 9.

Holston, James B., Baltimore, Md., assignor to The Huffman Manufacturing Company, Dayton, Ohio. Tank-vent device. 1,784,067; Dec. 9.

Holtzen, John F. (See Watts, Leo E., assignor.)

Holum, Martin, Hazel Run, Minn. Seed-corn stringer. 1,784,690; Dec. 9.

Homolle, Robert G. M., assignor to Societe Bournisien Beau & Cie., Paris, France. Cylinder lock. 1,784,444; Dec. 9.

Hopkinson, Ernest, New York, N. Y. Rubberizing fibrous material and article produced thereby. 1,784,523; Dec. 9.

Horner, John W. (See Lindgren, Peter J., assignor.)

Horspool, Francis L., Salt Lake City, Utah. Vehicle air brake. 1,784,233; Dec. 9.

Hosking, Richard T., Wilmette, assignor, by mesne assignments, to Shakeproof Lock Washer Company, Incorporated, Chicago, Ill. Material strip for spring-tooth lock washers. 1,784,142; Dec. 9.

Houston Company, The. (See Lomar, Louis L., assignor.)

Hoving, Erik A. (See Hammarström, N. L., and Hoving.)

Howe, Samuel P. (See Prior, John A., assignor.)

Howie, Kenneth, assignor to Wildman Mfg. Co., Norristown, Pa. Knitting machine. 1,784,186; Dec. 9.

Hudson, George A. (See Perry, E. W., and Hudson.)

Hueglin, Herman C., assignor to Federal Merchandise Co., Chicago, Ill. Ventilator. 1,784,234; Dec. 9.

Huff, Leslie R., Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Constant-volume regulator. 1,784,009; Dec. 9.

Huffman Manufacturing Company, The. (See Holtson, James B., assignor.)

Hughes, Edward R., Morristown, N. J., assignor to The Harvel Corporation. Removing oil from the shell of the cashew nut. 1,784,628; Dec. 9.

Hughes, James W., assignor to Budd Wheel Company, Philadelphia, Pa. Apparatus for and method of fabricating wheels. 1,784,445; Dec. 9.

Hughes Tool Company. (See Fletcher, Harold W., assignor.)

Hughes Tool Company. (See Ricker, Norman H., assignor.)

Hull, J. A., Co., The. (See Melton, Wendell A., assignor.)

Hump Hairpin Manufacturing Co., The. (See Goldberg, Solomon H., assignor.)

Hunt, Wilson P., Moline, Ill. Multiple drill apparatus. 1,784,288; Dec. 9.

Hurd, Edward L., Milton, and C. B. Tibbetts, Walpole, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Tool-securing device. 1,783,961; Dec. 9.

Hussey, Nellie B., Peking, China. Lady's hand bag. Des. 82,747; Dec. 9.

Husted, H. A., Company, The. (See Kraft, Herman T., assignor.)

Hutchison, Miller R., Llewellyn Park, West Orange, N. J., assignor, by mesne assignments, to Acoustic Products Company, New York, N. Y. Loud-speaker. 1,784,594; Dec. 9.

Hutchison, Miller R., Llewellyn Park, West Orange, N. J., assignor, by mesne assignments, to Acoustic Products Company, New York, N. Y. Acoustic device. 1,784,595; Dec. 9.

Hutchison, Miller R., Llewellyn Park, West Orange, N. J., assignor, by mesne assignments, to Acoustic Products Company, New York, N. Y. Closed end resonating horn. 1,784,596; Dec. 9.

Hyde, Elbert L., Shaker Heights, Ohio. Exercising machine. 1,784,289; Dec. 9.

Hyde, Ralph E., assignor to The Oster Manufacturing Company, Cleveland, Ohio. Stamped diestock. 1,783,964; Dec. 9.

Hyde, Ralph E., assignor to The Oster Mfg. Company, Cleveland, Ohio. Diestock. 1,784,099; Dec. 9.

Hyman, Daniel N., Detroit, Mich. Cover for buses. 1,784,356; Dec. 9.

I. G. Farbenindustrie Aktiengesellschaft. (See Heinze, Ernst, assignor.)

Imbery, Arthur, Halifax, England, assignor to Globar Corporation, Niagara Falls, N. Y. Electric furnace. 1,784,670; Dec. 9.

Imler, Marvin C., Malheur County, Oreg. Shipping crate for small animals. 1,784,187; Dec. 9.

Industrial Dryer Corporation, The. (See Harris, Gordon D., assignor.)

Ingalls, Henry A., Bakersfield, Calif. Road-surfacing machine. 1,784,691; Dec. 9.

Ingersoll-Rand Company. (See Huff, Leslie R., assignor.)

Ingersoll-Rand Company. (See Jowett, James H., assignor.)

International Business Machines Corporation. (See Craig, Robert, assignor.)

International Coal Carbonization Company. (See Runge, Walter, assignor.)

International Coal Carbonization Company. (See Runge, W., and Packard, assignors.)

International Combustion Engineering Corporation. (See Davidson, P., and Crites, assignors.)

International Combustion Engineering Corporation. (See Jackson, George P., assignor.)

International Combustion Engineering Corporation. (See Wood, Wilfred R., assignor.)

International Postal Supply Company. (See Zahn, Lawrence J., assignor.)

Interstate Folding Box Company, The. (See Bergstein, Samuel, assignor.)

Jackson, George P., Flushing, N. Y., assignor to International Combustion Engineering Corporation. Coal drier. 1,783,965; Dec. 9.

Jacobi, Edward N., assignor to Briggs and Stratton Corporation, Milwaukee, Wis. Switch. 1,784,290; Dec. 9.

Jacobs Manufacturing Company, The. (See Englund, Albert E., assignor.)

Jacobus, David S., Jersey City, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Heating-surface-cleaning device. 1,784,629; Dec. 9.

Jardine, Frank, assignor, by mesne assignments, to The Cleveland Trust Company, Cleveland, Ohio. Piston. 1,784,291; Dec. 9.

Jarrell, W. G., Machine Company. (See Webb, Adolphus M., assignor.)

Jeffrey, Fraser, Wauwatosa, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Induction-synchronous motor system. 1,784,235; Dec. 9.

Jegge, Emil G. (See Smith, P. S., and Jegge.)

Jehle, Ferdinand, assignor to The White Motor Company, Cleveland, Ohio. Throttle mechanism for internal-combustion engines. 1,784,671; Dec. 9.

Jenkins, Nathan, Chicago, Ill. Combination tool. 1,784,488; Dec. 9.

Jennings, R. G., Yarn Cleaning Machine Co. Inc., The. (See Jennings, Robert G., assignor.)

Jennings, Robert G., assignor to The R. G. Jennings Yarn Cleaning Machine Co. Inc., Elmira, N. Y. Detector mechanism for knitting machines. 1,784,446; Dec. 9.

Jensen, Thorvald, St. Louis, Mo., assignor to The Winther Company, Wilmington, Del. Automotive drive. 1,784,524; Dec. 9.

Johnson, Arvid W., Los Angeles, Calif. Display device. 1,784,597; Dec. 9.

Johnson Bronze Company. (See Leis, Carl H., assignor.)

Johnson, Clarence G., Hartford City, Ind. Double overhead door. 1,784,292; Dec. 9.

Johnson, Elmer E., Joplin, Mo. Game apparatus. 1,784,068; Dec. 9.

Johnson, George, Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Toilet-seat hinge. 1,784,630; Dec. 9.

Johnson, James B., Poplar, Minn. Rural mail box. 1,784,447; Dec. 9.

Johnson, John A., Woodhaven, N. Y. Apparatus for feeding closure caps. 1,784,010; Dec. 9.

Johnson & Johnson. (See Mathey, Gustave S., assignor.)

Johnson, Robert S. (See Quisenberry, James H., assignor.)

Jones, Albert E., assignor to Vickers-Armstrongs Limited, Westminster, London, England. Device for carrying heavy bodies on and releasing them from aircraft. 1,784,011; Dec. 9.

Jones, Howard B., Evanston, Ill. Electrical-connection device. 1,784,236; Dec. 9.

Jones, Leo D., assignor to The Charplea Specialty Company, Philadelphia, Pa. Dewaxing petroleum oil. 1,784,525; Dec. 9.

Jones, Lyman L., Seattle, Wash., assignor to American Can Company, New York, N. Y. Line control for can-making machinery. 1,784,358; Dec. 9.

Jordan, Hans, Berlin-Steglitz, W. Schoeller, Berlin-Westend, and R. Clerc, Berlin, assignors to the firm: Chemische Fabrik auf Actien vorm. E. Schering, Berlin, Germany. Production of thymol. 1,784,598; Dec. 9.

Jordan, Hans, Berlin-Steglitz, W. Schoeller, Berlin-Westend, and R. Clerc, assignors to the firm: Chemische Fabrik auf Actien vorm. E. Schering, Berlin, Germany. Producing phenols. 1,784,599; Dec. 9.

Jordon, Reuben B., Poplarville, Miss. Tire pump. 1,784,143; Dec. 9.

Josinsky, John. (See Martin, E., and Josinsky.)

Jowett, James H., New York, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J. Front head for pneumatic tools. 1,784,012; Dec. 9.

Jubilee Manufacturing Company. (See Gillet, Alexis F., assignor.)

Junghans, Siegfried, Baden, Germany. Casting under pressure. 1,784,600; Dec. 9.

Kaegebehn, Charles F., Hoboken, N. J., assignor to R. T. Vanderbilt Co., Inc., New York, N. Y. Mineral-oil composition. 1,784,359; Dec. 9.

Kaegebehn, Charles F., Hoboken, N. J., assignor to R. T. Vanderbilt Co., Inc., New York, N. Y. Fatty-oil composition. 1,784,360; Dec. 9.

Kahn, Felix, San Francisco, Calif. Hanger for forms on steel-beam construction. 1,784,448; Dec. 9.

Kaiser, Ernest F., New York, N. Y. Holder. 1,784,237; Dec. 9.

Kakuda, Saibei, assignor to Saibi Mojiami Kabushiki Kaisha, Hiroshima-Ken, Japan. Operating mechanism for net-making machines. 1,784,188; Dec. 9.

Kallenbach, Ernest, Philadelphia, Pa. Brake for sleds. 1,783,966; Dec. 9.

Karolus, August, Leipzig, Germany, assignor to Radio Corporation of American. Phase-correcting coupling for picture transmission. 1,784,526; Dec. 9.

Kearney, James R., St. Louis, Mo. Guy clip. 1,783,967; Dec. 9.

Kearney, James R., St. Louis, Mo. Fastening means for cables. 1,783,968; Dec. 9.

Keck, Charles H., New York, N. Y. Propellant powder and colloiding same. 1,784,189; Dec. 9.

Keen, John S., Philadelphia, Pa. Valve gear. 1,784,729; Dec. 9.

Kelleher, Daniel, Berea, assignor to The Foote-Burt Company, Cleveland, Ohio. Nut-tapping machine. 1,784,631; Dec. 9.

Kelsey-Hayes Wheel Corporation. (See Booth, William N., assignor.)

Kelty, Charles R., Milton, Mass. Limit switch. 1,784,672; Dec. 9.

Kemp, Charles T., and N. E. Ryckman, assignors to The Coffield Washer Company of Canada Limited, Hamilton, Ontario, Canada. Liquid seal. 1,784,100; Dec. 9.

Kennedy, Albert H., Grove City, assignor to A. F. Lind, Kittanning, Pa. Combined table and ironing board. 1,784,449; Dec. 9.

Kennedy, Edward, New York, assignor to The Kennedy-Steiner Corporation, Bronx County, N. Y. Combined test T and expansion fitting for drainage and soil pipes. 1,784,238; Dec. 9.

Kennedy-Steiner Corporation, The. (See Kennedy, Edward, assignor.)

Kent, Willys P., New York, N. Y. Teaching attachment for phonographs. 1,784,489; Dec. 9.

Kerber, Joseph H., West Allis, assignor to Hi-Way Service Corporation, Milwaukee, Wis. Material-handling apparatus. 1,784,144; Dec. 9.

Kern, John B., Montclair, N. J. Guard for spectacles and eyeglasses. 1,784,013; Dec. 9.

King, C. G., & Co. (See Recchia, Orlando R., assignor.)

King, George A., assignor to Scovill Manufacturing Company, Waterbury, Conn. Attaching seat covers and the like. 1,784,361; Dec. 9.

Kingsbury, Harry T., Keene, N. H. Toy airplane landing gear. 1,784,730; Dec. 9.

Kingston, Thomas H., assignor to Builders' Patent Scaffolding Company, West Somerville, Mass. Putlog. 1,784,601; Dec. 9.

Kirby, James B., West Richfield, Ohio. Motion-arresting means for motor-propelled vehicles. 1,784,145; Dec. 9.

Kirkpatrick, Carroll P., assignor of one-half to R. M. Smith, Fellows, Calif. Valve for oil-well pumps. 1,784,602; Dec. 9.

Klahn, Emil, New Vernon, N. J. Mechanical movement. 1,784,450; Dec. 9.

Kleinschmit, Oscar, assignor to Gebrüder Brehmer, Maschinenfabrik, Leipzig-Plagwitz, Germany. Paper-folding machine. 1,784,731; Dec. 9.

Kleinsmith, Horace B., F. R. Neely, and F. W. Doll, assignors to A. H. Balliet Corporation, Allentown, Pa. Lid-wrapping machine. 1,784,632; Dec. 9.

Kline, Joseph E., Port Huron, Mich. Toy. 1,784,692; Dec. 9.

Knight, Ira W. (See Loepsinger, A. J., and Knight.)

Knight, John M., Atlantic Highlands, and Victor Willoughby, Ridgewood, assignors to American Car and Foundry Company, New York, N. Y. Car seat. 1,784,527; Dec. 9.

Knipp, Lynn A., Los Angeles, Calif. Rotary cabinet. 1,784,293; Dec. 9.

Knupp, Harry E., assignor to Caille Motor Company, Detroit, Mich. Scale. Des. 82,748; Dec. 9.

Kobe, Inc. (See Coberly, Clarence J., assignor.)

Koch, Theodoor, assignor to Algemeene Kunstzijde unie Naamlooze Vennootschap, Arnhem, Netherlands. Preparing artificial textile products with reduced luster. 1,784,014; Dec. 9.

Koehler, Marcel Levallois-Perret, assignor to Société Anonyme: Graissage "Alcyl," Levallois-Perret, Seine, France. Apparatus for lubrication by means of capillary elements. 1,784,732; Dec. 9.

Komen, Gerrit. (See van der Lande, Bernardus L. M., assignor.)

Konoff, Alexander. (See Marcus, S., and Konoff.)

Koppers Company, The. (See Becker, Joseph, assignor.)

Kraeft, Herman L., assignor to Murray Ohio Manufacturing Company, Cleveland, Ohio. Sheet-metal toy construction. 1,784,633; Dec. 9.

Kraeft, Herman L., assignor to The Murray Ohio Manufacturing Company, Cleveland, Ohio. Toy construction. 1,784,634; Dec. 9.

Kraemer, August F., assignor to Louis Stern Company, Providence, R. I. Chain assembly. 1,784,451; Dec. 9.

Kraft, Herman T., Akron, Ohio, assignor to The H. A. Husted Company, Detroit, Mich. Steering wheel. 1,784,733; Dec. 9.

Krauel, Philip L. (See Watts, G. W., Krauel, and Stockdale.)

Krauss, Carl, Leverkusen, near Cologne-on-the-Rhine, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Indigoid vat dyestuffs from dihalogeno-alkylisatins. 1,784,452; Dec. 9.

Kreisler, Jacques, New Rochelle, assignor to Jacques Kreisler & Co., New York, N. Y. Jewelry. 1,784,635; Dec. 9.

Kreisler, Jacques, & Co. (See Kreisler, Jacques, assignor.)

Kreps, Elmer H. (See Allen, G. N., Parker, and Kreps.)

Kriege, Elizabeth, San Diego, Calif. Mattress. 1,784,294; Dec. 9.

Kroh, Joseph S., Chicago, Ill. Sausage-casing machine. 1,784,693; Dec. 9.

Kuwata, Tsutomu. (See Tanaka, Y., and Kuwata.)

Kwiatkowski, Joseph, Perth Amboy, N. J. Work-handling crane for locomotive appurtenances. 1,784,694; Dec. 9.

La Brie, Ludger E., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Brake-operating means. 1,784,295; Dec. 9.

Lage, Frederick, Gladbrook, Iowa. Sanitary poultry nest. 1,784,101; Dec. 9.

Laley, Jehan, Hayange, assignor to Les Petits Fils de Francois de Wendel & Cie., Paris, France. Recovery of the tin contained in the residues of tin-plate manufacture. 1,784,490; Dec. 9.

Lamphere, Emmet D., jr., West Rutland, Vt. Frozen-cream cutter. 1,784,603; Dec. 9.

Land, Arthur A. G., Chicago, Ill. Chain-link wire fabric. 1,784,453; Dec. 9.

Lander, Clarence I., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N, J. Last. 1,784,454; Dec. 9.

Lander, Clarence I., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. 1,784,455; Dec. 9.

Lane, Fulton, Palos Verdes Estates, and H. J. Morgan, Walnut Park, assignors to P. L. & M. Company, Los Angeles, Calif. Arc-welding apparatus. 1,784,015; Dec. 9.

Lang Electric Mfg. Company, The. (See Lang, Walter S., assignor.)

Lang, Walter S., assignor to The Lang Electric Mfg. Company, Kendallville, Ind. Electric water heater. 1,784,695; Dec. 9.

Lansing, Raymond P., Montclair, N. J., assignor to Eclipse Machine Company, Elmira Heights, N. Y. Engine starter. 1,784,190; Dec. 9.

Lapres, Theo, Jr., Inc. (See Miller, Paul R., assignor.)

Largent, Raleigh M., Walla Walla, assignor to Cheney Weeder Company, Cheney, Wash. Gang weeder with tractor hitch. 1,784,362; Dec. 9.

Larson, Charles E. (See Nelson, E. A., and Larson.)

Larson, John A., San Jose, Calif. Ball joint. 1,784,604; Dec. 9.

Larsson, Carl A., Westminster, London, assignor to Vickers-Armstrongs Limited, London, England. Mounting for automatic guns. 1,784,016; Dec. 9.

Latham, Leonard. (See Dickie, W. A., Platts, and Latham.)

Lawler, James J., Mount Vernon, N. Y. Hydrothermostatic valve control. 1,784,734; Dec. 9.

Lawrence, Cecil H., Attleboro, Mass., assignor to Evans Case Company. Table lighter. Des. 82,749; Dec. 9.

Lawson, Joel S., St. James, assignor to Memco Engineering & Manufacturing Company, Inc., New York, N. Y. Electric switch. 1,784,735; Dec. 9.

Lea Fabrics Inc. (See Smith, P. S., and Jegge, assignors.)

Lear, Sidney, Germantown, Pa. Easel support. 1,784,736; Dec. 9.

Lederer, Irving R., Providence, R. I. Wrist-watch strap. 1,784,239; Dec. 9.

Ledwinka, Joseph, assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Method and apparatus for filling upholstery. 1,784,456; Dec. 9.

Leezenbaum, Isidor. (See Walker, Thomas S., assignor.)

Lehmbeck, Frederick, New Providence, N. J. Band-saw holder. 1,784,696; Dec. 9.

Leicht, Fred., assignor to The Globe Company, Sheboygan, Wis. Steering mechanism for coaster wagons. 1,784,017; Dec. 9.

Leins, Oscar J., assignor to Claus Manufacturing Co., Milwaukee, Wis. Valve structure. 1,784,636; Dec. 9.

Leis, Carl H., assignor to Johnson Bronze Company, New Castle, Pa. Machine for babbitting sleeve bearings. 1,784,146; Dec. 9.

Lemon, Oren O. (See Frantz, V. L., and Lemon.)

Lenckerstorf, Heinrich. (See Clasen, F., and Lenckerstorf.)

Les Petits Fils de Francois de Wendel & Cie. (See Laley, Jehan, assignor.)

Lester, George, Milwaukee, Wis. Golfer's practice target. 1,784,363; Dec. 9.

Levan, John F., Elkhart, Ind., assignor to The Adams & Westlake Company, Chicago, Ill. Sash latch. 1,784,147; Dec. 9.

Levinson, David, assignor to Wilson-Western Sporting Goods Co., Chicago, Ill. Guard for athletes. 1,784,148; Dec. 9.

Lewis, Wilfred, Haverford, assignor to The Tabor Manufacturing Company, Philadelphia, Pa. Molding machine. 1,784,457; Dec. 9.

Leyland, Alfred, Taddington, near Buxton, England. Building structure. 1,784,808; Dec. 9.

Libbey, W. S., Company. (See Hamill, Virginia, assignor.)

Lidke, George E. (See Lidke, Otto F. and G. E.)

Lidke, Otto F. and G. E., Denton; said Otto F. Lidke assignor to one-fourth to L. A. Yoder, Rumulus, Mich. Electric heating apparatus. 1,784,528; Dec. 9.

Linaker, Frederick W., and T. M. Bruback, Du Bois, Pa. Rotary soot cleaner for boilers. 1,784,491; Dec. 9.

Lincoln Electric Company, The. (See Lincoln, J. F., and Dreese, assignors.)

Lincoln, James F., East Cleveland, and E. E. Dreese, Euclid, assignors to The Lincoln Electric Company, Cleveland, Ohio. Dynamo-electric machine. 1,784,102; Dec. 9.

Lind, Adolph F. (See Kennedy, Albert H., assignor.)

Lindauer, Jules, Paris, France. Lacing device for corsets and like articles. 1,784,458. Dec. 9.

Lindgren, Peter J., assignor to J. W. Horner, Denver, Colo. Pipe connection. 1,784,637; Dec. 9.

Lindley, Alva A., Spokane, Wash. Boiler. 1,784,149; Dec. 9.

Lipsius, Samuel, New York, N. Y. Powdering machine. 1,784,459; Dec. 9.

Littlefield, Lloyd M., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Packing tubes. 1,784,366; Dec. 9.

Lloyd, Arthur, assignor to Bakelite Limited, London, England. Manufacture of mica tubes and sheets. 1,784,737; Dec. 9.

Locke Insulator Corporation. (See Hawley, Kent A., assignor.)

Locke Insulator Corporation. (See Rowland, Davidge H., assignor.)

Loepsinger, Albert J., and I. W. Knight, assignors to General Fire Extinguisher Company, Providence, R. I. Adjusting unit for heating systems. 1,784,673; Dec. 9.

Loftin, Edward H., Washington, D. C., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Amplifier of electrical currents. 1,784,150; Dec. 9.

Lomar, Louis L., assignor of forty-nine one hundredths to The Houston Company, Houston, Tex. Shock absorber. 1,784,529; Dec. 9.

Long, Armistead R., Scarbro, W. Va. Temporary extension for mine railways. 1,784,367; Dec. 9.

Long, Everett N., jr. (See Renton, D. M., Long, and Murphy.)

Lorentz, Valentin, assignor to United Cigarette Machine Company Aktiengesellschaft, Dresden, Germany. Process and device for improving cigarettes. 1,784,296; Dec. 9.

Loucks, James F., Cleveland, Ohio, assignor to Detroit Steel Products Company, Detroit, Mich. Sheet-metal building construction. 1,784,368; Dec. 9

Lougovoy, Boris N., assignor to Ellis-Foster Company, Montclair, N. J. Floor rug and making same. 1,784,503; Dec. 9.

Love, Francis B., and B. H. Smith, assignors to The Autocall Company, Shelby, Ohio. Combination fire alarm and watchman's recording box. 1,784,530; Dec. 9.

Lovekin, Luther D., Wynnewood, Pa. Lock joint. 1,784,492; Dec. 9.

Lowenbaum, R., Mfg. Co. (See Lowenbaum, Ralph, assignor.)

Lowenbaum, Ralph, assignor to R. Lowenbaum Mfg. Co., St. Louis, Mo. Woman's combination or convertible garment. 1,784,369; Dec. 9.

Lucius, George P., Ruleville, Miss. Combination plow. 1,784,738; Dec. 9.

Lucker, Millard B., Benton Harbor, Mich., assignor Auto Specialties Manufacturing Company. Recoil check. 1,784,739; Dec. 9.

Ludwig, Hans, Homburg-on-the-Hohe, Germany. Shock absorber. 1,784,191; Dec. 9.

Lurgi-Gesellschaft für Wärmetechnik m. b. H. (See Rüder, Heinrich B., assignor.)

Lynds, Walter A., Boston, Mass. Collapsible basket support. 1,784,240; Dec. 9.

Lynn, John P., assignor to Dur-O-Lite Pencil Co., Chicago, Ill. Clip. 1,784,605; Dec. 9.

MacFarlane, Arthur D., Los Angeles, Calif. Engine construction. 1,784,192; Dec. 9.

Macneir, Donald B., New York, N. Y. Railway tie. 1,784,606; Dec. 9.

Maerlender, Henry G. and H. A., Cleveland, Ohio. High-frequency transformer. 1,784,297; Dec. 9.

Maerlender, Hugo A. (See Maerlender, Henry G. and H. A.)

Mahan, Charles B., and C. M. Weber, Rochester, N. Y., assignors to Weber Machine Corporation. Wire-stripping machine. 1,784,298; Dec. 9.

Malcom, Robert, Chicago, Ill. Goggles. 1,784,151; Dec. 9.

Malleable Iron Range Company. (See Rogers, Frederick W., assignor.)

Many, Fillette C., Kalamazoo, Mich. Tie for cards, sheets, etc. 1,784,299; Dec. 9.

Marchetti, Annibale. (See Centofanti, S., and Marchetti.)

Marcus, Samuel, Brooklyn, and A. Konoff, New York, N. Y., assignors to Markon Mfg. Co., Inc., New York, N. Y. Eye set for dolls and like toys. 1,784,531; Dec. 9.

Markel, Orville. (See Masterson, M., and Markel.)

Markley, Milton, Harrisburg, Pa., assignor to The Rail Joint Company, New York, N. Y. Construction for rehabilitating rail joints. 1,784,370; Dec. 9.

Markon Mfg. Co. (See Marcus, S., and Konoff, assignors.)

Marks, Charles K., Womelsdorf, and W. G. Weinhold, Shillington, Pa. Concrete mixer. 1,784,371; Dec. 9.

Marschke Manufacturing Company. (See Decker, Alonzo G., assignor.)

Marshall, William, and L. S. Woodhull, assignors to Briggs Manufacturing Company, Detroit, Mich. Seat assembly. 1,784,241; Dec. 9.

Mart, Leon T., Kansas City, Mo. Spray cooling device. 1,784,019; Dec. 9.

Martin, Eugene, Freeport, and J. Josinsky, Bayside, N. Y. Current controlling or insulating device for ignition systems. 1,784,697; Dec. 9.

Martin, Frank J., Weirton, W. Va. Dry pipe for steam boilers. 1,784,638; Dec. 9.

Maschinenfabrik Beth, Aktiengesellschaft. (See Clasen, F., and Lenckerstorf, assignors.)

Masterson, Meckley, and O. Markel, Chicago, Ill. Leak-preventing seal. 1,784,104; Dec. 9.

Mathey, Gustave S., Elizabeth, N. J., assignor to Johnson & Johnson, New Brunswick, N. J. Adhesive. 1,784,740; Dec. 9.

Maxant, Frank, Ayer, Mass. Railway-car journal box. 1,784,069; Dec. 9.

Mayer, Williams. (See Halpern, M., and Mayer.)

Mayle, George F. A. (See Shevlin, Joseph P., assignor.)

McBride, John J., Bayonne, N. J., assignor to American Car and Foundry Company, New York, N. Y. Valve assembly. 1,784,460; Dec. 9.

McBride, John J., Bayonne, N. J., assignor to American Car and Foundry Company, New York, N. Y. Securing means for internal-combustion engines. 1,784,461; Dec. 9.

McCarty, Edmond J., Chicago, Ill. Car reraller. 1,784,741; Dec. 9.

McCaskell, Jasper A., Salt Lake City, Utah. Cake-discharging means for pressure filters. 1,784,372; Dec. 9.

McCaskey Register Company, The. (See Dunning, William E., assignor.)

McDonald, Leonard, Houston, Tex. Lettering machine. 1,784,152; Dec. 9.

McFarland, Parley E., assignor to J. L. Wortham, Rockford, Ill. Automatic exhibitor. 1,784,607; Dec. 9.

McGill Manufacturing Company. (See Despard, Victor R., assignor.)

McGrew, Earl E., assignor to McGrew Machine Company, Lincoln, Nebr. Combined shade and awning. 1,784,300; Dec. 9.

McGrew Machine Company. (See McGrew, Earl E., assignor.)

McKinley, Benjamin P., Bridgeport, Conn., assignor to The Bryant Electric Company. Electrical connecter. 1,784,020; Dec. 9.

McLaran, Robert L. (See Giancola, Nicholas, assignor.)

McNabb, William R., William D. Farley, and F. J. Starcher, Long Beach, Calif. Piston expander. 1,784,018; Dec. 9.

McNally, James G. (See Sheppard, S. E., and McNally.)

McOsker, Ernest L., Preston, Kans. Spring-tooth cultivator. 1,784,193; Dec. 9.

Meador, Barclay F., Kansas City, Mo., assignor to General Electric Company. Control system. 1,784,639; Dec. 9.

Mekler, Lev A., Chicago, Ill. Massaging device. 1,784,301; Dec. 9.

Melton, Wendell A., assignor to The J. A. Hull Co., Tulsa, Okla. Apparatus for inducing flow of oil from wells. 1,784,242; Dec. 9.

Memco Engineering & Manufacturing Company. (See Lawson, Joel S., assignor.)

Mergott, J. E., Company. (See Hiering, William C., assignor.)

Merk, Friedrich, Frankfort-on-the-Main, Germany. Telephone system. 1,784,698; Dec. 9.

Mershon, Ralph D., New York, N. Y. Electrode for electrolytic condensers and the like. 1,784,532; Dec. 9.

Mershon, Ralph D., New York, N. Y. Film formation and operation of electrolytic condensers and other apparatus. 1,784,674; Dec. 9.

Messmer Brass Company. (See Messmer, Joseph, assignor.)

Messmer, Joseph, Kirkwood, assignor to Messmer Brass Company, St. Louis, Mo. Steam trap. 1,784,153; Dec. 9.

Metal Stampings Corporation. (See Gillooly, William, assignor.)

Meuer, George J. (See Stevens, W. C., and Meuer.)

Meyer, Franz, assignor to the firm of Carl Zeiss, Jena, Germany. Governor switch for electric motors. 1,784,675; Dec. 9.

Meyer, Henry, Long Island, N. Y. Valve-controlled switch for electric grinders. 1,784,493; Dec. 9.

Meyers, Roy L, Janesville, Wis. Automatic pipe damper. 1,784,608; Dec. 9.

Michelson, Lawrence M., and J. L. Haynes, St. Louis, Mo. Stool seat. 1,784,021; Dec. 9.

Michigan Silo Company, The. (See Zuber, E. F., and Dowling, assignors.)

Midland Steel Products Company, The. (See Sneed, John, assignor.)

Miguet, Paul L. J., St.-Julien-de-Maurienne, France. Automatic charging of electric furnaces. 1,784,699; Dec. 9.

Miles, William B., Downers Grove, Ill. Child's vehicle. Des. 82,750; Dec. 9.

Miles, William B., Downers Grove, Ill. Child's vehicle. Des. 82,751; Dec. 9.

Miles, William B., Downers Grove, Ill. Child's vehicle. Des. 82,752; Dec. 9.

Miles, William B., Downers Grove, Ill. Child's vehicle. Des. 82,753; Dec. 9.

Miles, William B., Downers Grove, Ill. Child's vehicle. Des. 82,754; Dec. 9.

Miller, Carl, New York, N. Y. Sanitary telephone device. 1,784,700; Dec. 9.

Miller, Edward S. (See Townsend, A. J., and Miller.)

Miller, John A., Nazareth, Pa., and E. P. Newhard, Kingsport, Tenn. Producing ground raw material for Portland cement manufacture. 1,784,462; Dec. 9.

Miller, Paul R., New York, N. Y., assignor to Theo. J. Lapres, Inc., Atlantic City, N. J. Carton. Des. 82,755; Dec. 9.

Miller, William, Ritzville, Wash. Door-opening device. 1,784,374; Dec. 9.

Miller, William J., Swissvale, Pa. Pottery mold and making the same. 1,784,873; Dec. 9.

Millikan, Robert A., and R. W. Sorensen, assignors to California Institute of Technology, Pasadena, Calif. Conditioning electric switches. 1,784,302; Dec. 9.

Millikan, Robert A., and R. W. Sorensen, assignors to California Institute of Technology, Pasadena, Calif. Alternating-power current interrupter. 1,784,303; Dec. 9.

Millspaugh, William H., assignor to The Paper & Textile Machinery Company, Sandusky, Ohio. Paper-making machine. 1,783,969; Dec. 9.

Millspaugh, William H., assignor to The Paper & Textile Machinery Company, Sandusky, Ohio. Paper-making machine. 1,783,970; Dec. 9.

Minikhiem, George F., Syracuse, N. Y. Lawn-trimming device. 1,784,022; Dec. 9.

Minneapolis-Moline Power Implement Company. (See Seaholm, John P., assignor.)

Miquet, Louis E., Neuilly, France. Lock. 1,783,971; Dec. 9.

Mitchell, Charles G., Miami, Fla. Automatic transmission. 1,784,742; Dec. 9.

Mitchell, Doran, New York, N. Y., assignor to American Telephone and Telegraph Company. Transmission frequency-delay-measuring circuit. 1,784,194; Dec. 9.

Mitchell, John, assignor to Charcolite Corporation, Clinton, Ind. Apparatus for carbonizing coal. 1,784,676; Dec. 9.

Mitchell, Joseph S., Chicago, Ill., assignor to Sullivan Machinery Company. Drilling apparatus. 1,784,154; Dec. 9.

Moffet, Lloyd A., Fremont, Nebr. Spraying device. 1,784,243; Dec. 9.

Mohun, John L., and H. Piesch, Omaha, Nebr., assignors to National Lock Washer Company, Newark, N. J. Curtain fixture. 1,784,375; Dec. 9.

Moineau, Hector E., Marlboro, Mass. Soap holder. 1,784,155; Dec. 9.

Molins, Walter E., Deptford, London, England. Packing cigarettes and like articles. 1,784,701; Dec. 9.

Möller, Fritz, assignor to Demag Aktiengesellschaft, Duisburg, Germany. Electrically-operated edge-driven roll. 1,784,304; Dec. 9.

Monkhouse, Joseph L., Guelph, Ontario, Canada. Excelsior-cutting machine. 1,784,305; Dec. 9.

Montgomery, Harry A., assignor to Sani-Loc Cabinet Company, Louisville, Ky. Receiving and dispensing cabinet. 1,784,743; Dec. 9.

Montgomery, Walter B. (See Hargrove, G. C., and Montgomery.)

Moore, David P., Avon Park, Fla. Paper mulch and reenforcing and retaining means therefor. 1,784,376; Dec. 9.

Moore, George A., Boston, Mass. Set screw. 1,784,377; Dec. 9.

Morano, James E., assignor of one-third to A. De Marco, Hammonton, N. J. Cranberry gatherer. 1,784,702; Dec. 9.

Morgan, Edmund C., deceased; O. E. Morgan, executrix, New York, N. Y. Apparatus for mining and loading coal. 1,784,156. Dec. 9.

Morgan, Harry J. (See Lane, F., and Morgan.)

Morgan, Olive E., executrix. (See Morgan, Edmund C.)

Morland & Impey Limited. (See Power, Richard F., assignor.)

Morris, John R., Philadelphia, Pa. Adjustable pipe suspender. 1,784,244; Dec. 9.

Morris, Levi C., North Canton, Ohio. Electric program clock. 1,784,195; Dec. 9.

Morse Chain Company. (See Perry, David B., assignor.)

Morse Chain Company. (See Thompson, Fred C., assignor.)

Morse, Frank L., Ithaca, N. Y. Drive chain. 1,784,023; Dec. 9.

Mortensen, Chris. (See Christiansen, N., and Mortensen.)

Morton, Benjamin A., New York, N. Y. Sectional illuminated sign. 1,784,677; Dec. 9.

Morton, Harold A., Akron, Ohio. Vulcanization accelerator. 1,784,703; Dec. 9.

Morton, William F., Portland, Oreg. Sign. 1,784,704; Dec. 9.

Moses, Cassie R., Davenport, Iowa. Umbrella. 1,783,972; Dec. 9.

Moss, Effie H., Chillicothe, Ohio. Soft rubberlike composition. 1,784,070; Dec. 9.

Moulder, Albert W., Warren, Ohio, assignor to General Fire Extinguisher Company, Providence, R. I. Heating system. 1,784,609; Dec. 9.

Mueller Co. (See Smith, Marion F., assignor.)

Muhlfeld, John E., Scarsdale, and J. C. Chapple, Brooklyn, N. Y. Locomotive superheater. 1,784,378; Dec. 9.

Mulford, Logan W., Long Island City, N. Y. Vault light, floor light, or skylight. 1,784,678; Dec. 9.

Muller, Frederick W., Atlanta, Ga. Type-form storage and lock-up frame. 1,784,533; Dec. 9.

Multicolor Ltd. (See Fairall, Harry K., assignor.)

Münch, Eduard, Ludwigshafen-on-the-Rhine, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Reducing organic keto compounds. 1,784,379; Dec. 9.

Murdoch, Walter B., assignor to The Stanley Works, New Britain, Conn. Bit or drill holder. 1,784,380; Dec. 9.

Murphy, Anson E. (See Renton, D. M., Long, and Murphy.)

Murphy, Frank J., Floral Park, assignor to S. W. Farber, Inc., Brooklyn, N. Y. Swiveled lamp-shade support. 1,784,306; Dec. 9.

Murray, Frederick. (See Ford, J. S., and Murray.)

Murray Ohio Manufacturing Company. (See Kraeft, Herman L., assignor.)

Myers, F. E., & Brother Company, The. (See Myers, Philip A., assignor.)

Myers, Philip A., assignor to The F. E. Myers & Brother Company, Ashland, Ohio. Pump-motor support. 1,784,245; Dec. 9.

Naamlooze Vennootschap Technisch- en Handelsbureau Van Vliet en Zonen. (See Bernaerts, Henricus, F. J., assignor.)

Naggatz, Frank H., Fairmount, N. Dak. Adjustable license-plate holder. 1,784,196; Dec. 9.

Nasu, Otohei. (See Bowler, G. H., and Nasu.)

Nathanson, Isidore. (See Rodstein, H., and Nathanson.)

National Carbon Co. (See Heise, G. W., and Schumacher, assignors.)

National Lead Company. (See Newell, James S., assignor.)

National Lock Washer Company. (See Mohun, J. L., and Piesch, assignors.)

National Marking Machine Company, The. (See Constable, Charles E., assignor.)

National Products-Supply Company. (See Broeman, Frank C., assignor.)

National Supply Company of Delaware, The. (See Timbs, E., and Zerbe, assignors.)

Natwick, Albert G., St. Catherines, Ontario, Canada. Circulating apparatus for wood-pulp digesters. 1,784,197; Dec. 9.

Neely, Frank R. (See Kleinsmith, H. B., Neely, and Doll.)

Negley, Frank H., South Bend, Ind., assignor to Wilson Brothers, Chicago, Ill. Underwear or athletic pants. 1,784,744; Dec. 9.

Nelson, Earl A., Minneapolis, and C. E. Larson, St. Louis Park, Minn. Combined dental lathe and vibrator. 1,784,307; Dec. 9.

Neuland, Alfons H., assignor to Electro-Mobile Corporation, Irvington, N. J. Automatic power transmission. 1,784,308; Dec. 9.

Neuland, Alfons H., assignor to Electric-Mobile Corporation, Irvington, N. J. Power-transmission device. 1,784,309; Dec. 9.

Newell, James S., assignor to National Lead Company, St. Louis, Mo. Machine for welding. 1,784,024; Dec. 9.

New England Filter Corporation, The. (See Dardani, Martin E. E., assignor.)

Newhall, Henry B., Corporation. (See Pleister, Henry W., assignor.)

Newhard, Edmund P.. (See Miller, J. A., and Newhard.)

Newman, David F., Freeport, assignor to Trans-Lux Daylight Picture Screen Corporation, New York, N. Y. Projection screen. 1,783,973; Dec. 9.

Newman, William A., Montreal, Quebec, Canada. Water-gauge guard. 1,784,247; Dec. 9.

Newton, Harry W., Denver, Colorado, assignor to The Dorr Company, New York, N. Y. Classifying and washing apparatus. 1,784,246; Dec. 9.

Nice, Budd G., Hatboro, Pa. Making cylindrical rollers. 1,784,463; Dec. 9.

Nichol Manufacturing Company. (See Nichol, Orr T., assignor.)

Nichol, Orr T., assignor to Nichol Manufacturing Company, Omaha, Neb. Tractor pilot structure. 1,784,534; Dec. 9.

Nier, Ernst B., Beierfeld, Germany. Effecting rotary operations in step presses. 1,784,745; Dec. 9.

Nigro, Michel, Worcester, and W. H. Blount, West Brookfield, assignors to Sleeper & Hartley, Inc., Worcester, Mass. Wire-stranding machine. 1,784,105; Dec. 9.

Noble, Warren, Detroit, Mich. Poppet valve. 1,784,640; Dec. 9.

Nolen, Truly, and J. C. Truemper, Indianapolis, Ind., assignors to Highway Trailer Company, Edgerton, Wis. Roll-top cover for dumping vehicles. 1,784,248; Dec. 9.

Norman, Frank M., Galena, Ill. Boat. 1,784,071; Dec. 9.

Norton, Ralph H., assignor to Acme Steel Company, Chicago, Ill. Strap-stretching device. 1,784,025; Dec. 9.

Norton, Raymond P., Algona, assignor of one-half to W. A. Norton, Marshalltown, Iowa. Coin-controlled mechanism. 1,784,249; Dec. 9.

Norton, William A. (See Norton, Raymond P., assignor.)

Noyes, Stanley E., Los Angeles, assignor to Harrison-Noyes Chemical Corporation, Ltd., Long Beach, Calif. Composition for dentures. 1,784,250; Dec. 9.

Numans, Johannes J., Eindhoven, Netherlands, assignor to Radio Corporation of America. Modulating system. 1,784,610; Dec. 9.

Oglesby, Nicholas E., and F. R. Weaver, Edgewood, Md. Process and apparatus for atomizing materials from moving aircraft. 1,784,157; Dec. 9.

Ohio Rubber Company, The. (See Bronson, Budd, assignor.)

Oildraulic Lift Company. (See Stukenborg, Louis C., assignor.)

Oldfield, William H., Rochester, N. Y. Lavatory or washstand. 1,784,641; Dec. 9.

Oliver, Marshall F., Charlottesville, Va. Electric fan. 1,784,072; Dec. 9.

Olsen, Corrine, et al. (See Olsen, Emil J., assignor.)

Olsen, Emelia, et al. (See Olsen, Emil J., assignor.)

Olsen, Emil J., North St. Paul, assignor of one-fourth to E. Olsen, one-fourth to C. Olsen, and one-fourth to V. Olsen, St. Paul, Minn. Auxiliary air-pressure stop. 1,784,705; Dec. 9.

Olsen, Vernon, et al. (See Olsen, Emil J., assignor.)

Olson, Carl G., assignor to Shakeproof Lock Washer Company, Chicago, Ill. Self-locking screw. 1,784,026; Dec. 9.

Olsson, Anders H. and O. D. Peterson, Lidkoping, Sweden. Alarm apparatus for the prevension of gas poisoning. 1,783,974; Dec. 9.

Oneida Community, Limited. (See Allen, G. N., Parker, and Kreps, assignors.)

O'Neil, Cornelius J., Oak Park, Ill. Ornamenting surfaces. 1,784,495; Dec. 9.

O'Neill, Edward J., Syracuse, assignor to Sterilek Company, Inc., Brooklyn, N. Y. Machine for cutting angular ends. 1,784,494; Dec. 9.

Orange Roller Bearing Company. (See Darby, George A., assignor.)

Oshkosh Trunk Company. (See Bartlett, John H., jr., assignor.)

Osman, Ralph T., Mansfield, Ohio. Vehicle dump body. 1,784,464; Dec. 9.
Osmer, James H. (See Ziser, G. J., and Osmer.)
Oster Manufacturing Company, The. (See Hyde, Ralph E., assignor.)
Osterby, Wayne, Astoria, Oreg. Fireman's hose spanner and scaling hook. 1,784,535; Dec. 9.
O'Stroske, Frank J., Columbus, Ohio. Valve. 1,784,381; Dec. 9.
Otts, William J., San Francisco, Calif. Badge. Des. 82,756; Dec. 9.
Ousdal, Asbjörn P., Santa Barbara, Calif. Apparatus for utilizing solar radiations for therapeutic purposes. 1,784,382; Dec. 9.
Oversmith, Ralph E. (See Gwinn, J. M., jr., and Oversmith.)
Owen, William. (See Fox, J. H., and Owen.)
P. L. & M. Company. (See Lane, F., and Morgan, assignors.)
Pacific Clay Products. (See Collins, Walter H., assignor.)
Packard, Edwin A. (See Runge, W., and Packard.)
Pacz, Aladar, East Cleveland, Ohio. Coating zinc and cadmium. 1,784,106; Dec. 9.
Palace Poultry Car Company. (See Edgerton, Israel V., assignor.)
Pantenburg, Vitalis, Frankfort-on-the-Main, Germany, assignor to American Lurgi Corporation, New York, N. Y. Regeneration of adsorption material. 1,784,536; Dec. 9.
Papendick, Inc. (See Tewes, Anthony, assignor.)
Paper & Textile Machinery Company, The. (See Millspaugh, William H., assignor.)
Pardee, Harvey S., Ravinia, assignor to J. R. Blackhall, Chicago, Ill. Control system. 1,784,310; Dec. 9.
Parker, Grover, Red Bank, N. J. Truck. 1,784,746; Dec. 9.
Parker, Leslie M., Evanston, Ill. Demountable structure. 1,784,107; Dec. 9.
Parker, Mary G. (See Allen, G. N., Parker, and Kreps.)
Parker, Ralph W., Falmouth, Nova Scotia, Canada. Safety milk-bottle container. 1,784,073; Dec. 9.
Parry, Robert D., Northway, England, assignor to General Electric Company. Electrical regulator. 1,784,642; Dec. 9.
Paterson, John T. H., Chicago, Ill. Cord tie. 1,784,679; Dec. 9.
Patrone, Eugene, Washington, D. C. Tire rim. 1,784,383; Dec. 9.
Patterson, Duncan W., Douglaston, N. Y., assignor, by mesne assignments, to American La France and Foamite Corporation. Method of and system for generating fire-extinguishing foam. 1,784,680; Dec. 9.
Paugh, James J., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Water-cooled welding cable-joint construction. 1,784,384; Dec. 9.
Pauling, Harry, Berlin, Germany. Apparatus for the production of ammonia-air mixtures. 1,784,074; Dec. 9.
Pearce, Charles F., jr., assignor to Burton-Dixie Corporation, Chicago, Ill. Textile fabric. Des. 82,757; Dec. 9.
Pearson, Alfred, assignor of one-half to F. A. Freed, Rockford, Ill. Garden tool. 1,784,108; Dec. 9.
Peckelhoff, Bruno, Rahlstedt, near Hamburg, Germany. Fuel burner. 1,784,747; Dec. 9.
Pedelty, Walter B., Mason City, Iowa. Pulverizing process and apparatus. 1,783,975; Dec. 9.
Peerless Pump Company. (See Wintroath, John A., assignor.)
Peirce, Clarence A. (See Buckendale, L. R., and Peirce.)
Pelster, Edwin W., St. Louis, Mo. Axle structure. 1,783,977; Dec. 9.
Pelton, John C., Santa Barbara, Calif. Compacting mechanism. 1,784,385; Dec. 9.
Pepper, Byron J., Fort Wayne, Ind. Thermostat. 1,784,465; Dec. 9.
Perry, David B., assignor to Morse Chain Company, Ithaca, N. Y. Lubricating system for chain drives. 1,783,978; Dec. 9.
Perry, Edward W., and G. A. Hudson, Winnipeg, Manitoba, Canada. Pocket holder. 1,784,312; Dec. 9.
Perry, Miles D., Parkers Landing, Pa. Oil-well pulling machine. 1,784,311; Dec. 9.
Persson, Edwin, Estevan, Saskatchewan, Canada. Closure cap for radiators, water tanks, pressure tanks, gas tanks, and the like. 1,784,198; Dec. 9.
Peterson, Martin J., Selma, Calif. Beach canopy. 1,784,199; Dec. 9.
Peterson, Per D. (See Olsson, A. H., and Peterson.)
Petroleum Conversion Corporation. (See Beardsley, E. W., and Colony, assignors.)
Phillips, Jacob M., Pillow, Pa. Pump. 1,784,706; Dec. 9.
Pickup, George E., assignor to The Wehrle Company, Newark, Ohio. Oven structure for electric ranges. 1,784,201; Dec. 9.
Picture Machine Service Corporation. (See Gottschau, Christian M., assignor.)
Piepenbring, Gustave A., Stratford, assignor to The American Fabrics Company, Bridgeport, Conn. Ironing machine. 1,784,200; Dec. 9.
Piesch, Henry. (See Mohun, J. L., and Piesch.)
Piggott, Hattie A. (See Piggott, Warren M., assignor.)
Piggott, Warren M., assignor to H. A. Piggott, Bay City, Mich. Aircraft construction. 1,784,027; Dec. 9.
Piper, Grover C. (See Harlow, Lee H., assignor.)
Pittman, Artemus E., Muscogee, Fla. Combined cotton blocker and cultivator. 1,784,318; Dec. 9.
Pittsburgh Plate Glass Company. (See Fox, J. H., and Owen, assignors.)
Place, Charles H., New Rochelle, N. Y. Raincoat. 1,784,158; Dec. 9.
Platts, Thomas H. (See Dickie, W. A., Platts, and Latham.)
Pleister, Henry W., Westfield, assignor to Henry B. Newhall Corporation, Garwood, N. J. Combined bolt anchor and support. 1,783,976; Dec. 9.
Plishker, Herbert E., Flushing, N. Y., assignor to Westinghouse Lamp Company. Wrapper for a box or carton. Des. 82,758; Dec. 9.
Plumer, James T., Detroit, Mich. Sprinkler. 1,784,251; Dec. 9.
Poeck, Max, New York, N. Y. Sanitary cigarette. 1,784,386; Dec. 9.
Polanyi, Michael, Berlin-Zehlendorf-Mitte, and S. von Bogdandy, Berlin-Dahlem, Germany. Producing bodies consisting of a plurality of thin alternately conducting and insulating layers. 1,784,611; Dec. 9.
Pollard, Eugene R., Miami, Ariz. Wedge-cutting machine. 1,784,028; Dec. 9.
Porter, William C., Bogalusa, La. Paper weight. 1,784,707; Dec. 9.
Postel, John W., Palisade, N. J. Brake mechanism for motor vehicles. 1,784,887; Dec. 9.
Potdevin, Adolph, Garden City, assignor to Potdevin Machine Company, Brooklyn, N. Y. Garment bag. 1,783,979; Dec. 9.
Potdevin Machine Company. (See Potdevin, Adolph, assignor.)
Potter, Henry N., Encinitas, Calif. Rotary sprinkler. 1,784,314; Dec. 9.
Power, Richard F., Hampstead, London, assignor to Morland & Impey Limited, Birmingham, England. Transfer-binding case and release stand therefor. 1,784,315; Dec. 9.
Preist, Thomas P., Cheshire, England, assignor to Associated Telephone and Telegraph Company, Kansas City, Mo. Testing device for impulse senders. 1,784,612; Dec. 9.
Preston, Fredrick L., Mobile, Ala. Chemical furnace. 1,784,109; Dec. 9.
Prior, John A., Philadelphia, Pa., assignor of one-half to S. P. Howe, Camden, N. J. Double automatic clutch. 1,784,793; Dec. 9.
Propp, Louis, assignor to The M. Propp Co. Inc., New York, N. Y. Electric socket fitting. 1,784,388; Dec. 9.
Propp, M., Co. Inc., The. (See Hertzberg, Henry, assignor.)
Propp, M., Co. Inc., The. (See Propp, Louis, assignor.)
Prutzman, Paul W. (See Wheeler, R. C., and Prutzman.)
Pugh, John V., and G. T. Bayliss, Coventry, England; said Bayliss assignor to said Pugh. Rotational driving connection. 1,784,708; Dec. 9.
Quigan, Frank J., Jackson Heights, N. Y. Hand bag and frame therefor. 1,784,748; Dec. 9.
Quisenberry, James H., assignor of one-half to R. S. Johnson, Louisville, Ky. Electro holder. 1,784,075; Dec. 9.
Radio Corporation of America. (See Karolus, August, assignor.)
Radio Corporation of America. (See Loftin, Edward H., assignor.)
Radio Corporation of America. (See Numans, Johannes J., assignor.)
Radio Corporation of America. (See Van Dyck, Arthur F., assignor.)
Rafalski, Walter, Philadelphia, Pa. Bathtub attachment. 1,784,749; Dec. 9.
Rail Joint Company, The. (See Markley, Milton, assignor.)
Railway Metal Products Company. (See Sisson, Vinton E., assignor.)
Rakula, Theodor. (See Herlach, F., and Rakula.)
Ratto, Joseph, Brooklyn, N. Y. Emergency-brake lever and lock. 1,784,750; Dec. 9.
Rau, William G., Louisville, Ky. Necktie holder. 1,784,537; Dec. 9.
Raymond, Fred I., River Forest, Ill. Control apparatus for heating systems. 1,784,538; Dec. 9.
Rebikoff, Wassily, assignor to Leonide Davydoff, Paris, France. Double-control device for phonographs. 1,784,159; Dec. 9.
Recchia, Orlando R., Cranston, assignor to C. G. King & Co., Inc., Providence, R. I. Shoe ornament. Des. 82,759; Dec. 9.
Reeb, Leyle B., Roselle, N. J. Window frame. 1,784,751; Dec. 9.
Reed, William R. (See Britton, E. C., and Reed.)
Reeves Manufacturing Company, The. (See Curtis, Rowland J., assignor.)
Reist, Henry G., Schenectady, N. Y., assignor to General Electric Company. Making stators for dynamo-electric machines. 1,784,643; Dec. 9.
Reiter, Daniel I., New York, N. Y. Shiftable fastener. 1,784,389; Dec. 9.
Rémond, Jacques, Amiens, France. Portable loading gauge for railroad cars. 1,784,160; Dec. 9.
Rensonnet, Oscar, Etterbeek-Brussels, Belgium, assignor to H. Dujardin, New York, N. Y. Steering sight adapted to be fitted to the mud guards of motor vehicles. 1,784,466; Dec. 9.

Renton, David M., E. N. Long, jr., and A. E. Murphy, Avalon, assignors to Santa Catalina Island Company, Avalon, Calif. Stone spreader. 1,784,202; Dec. 9.
Reynolds, Arthur W., assignor to The Babcock Manufacturing Company, Leonardsville, N. Y. Spring tooth for harrows and the like. 1,784,613; Dec. 9.
Rheinische Metallwaaren- und Maschinenfabrik. (See Herlach, F., and Rakula, assignors.)
Rheinische Metallwaaren- und Maschinenfabrik. (See Witzell, Karl, assignor.)
Rhenania-Kunheim Verein Chemischen Fabriken Aktiengesellschaft. (See von Dieterich, Wilhelm, assignor.)
Rice, Harold G., Chicago, Ill. Holder for socket-wrench sets. 1,784,203; Dec. 9.
Rice, Howard E., Miami, Fla. Foldable chair. 1,784,390; Dec. 9.
Rich, Henry, Elmo Township, Otter Tail County, Minn. Portable sawing machine. 1,784,709; Dec. 9.
Richardson Company, The. (See Cain, John R., assignor.)
Richter, George A., and M. O. Schur, assignors to Brown Company, Berlin, N. H. Refining cellulose pulp. 1,784,161; Dec. 9.
Richter, John L. (See Schmidt, C. C., and Richter.)
Ricker, Chester S., Waukesha, Wis. Lamp. 1,784,539; Dec. 9.
Ricker, Norman H., assignor to Hughes Tool Company, Houston, Tex. Buffer for well swabs. 1,784,110; Dec. 9.
Ries, John I., Chillicothe, Ohio. Collapsible tube holder. 1,784,752; Dec. 9.
Rightmire, Franklin, Paterson, N. J. Traction attachment for vehicle wheels. 1,784,681; Dec. 9.
Rinne, John, Rutledge, Pa. Method of and machine for manufacturing matches and match tape. 1,784,111; Dec. 9.
Ripley, David W., Fresno, assignor to Sun-Maid Raisin Growers of California, Fresno, Calif. Weight-checking device. 1,784,540; Dec. 9.
Roberts, Clifford, Winchester, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cushion tread for footwear. 1,783,980; Dec. 9.
Roberts, Ralph R., Lockport, N. Y. Lubricating method and apparatus. 1,783,981; Dec. 9.
Roças, Orlando, Rio de Janeiro, Brazil. Apparatus for automatic opening and closing of sewer inlets. 1,784,076; Dec. 9.
Rodstein, Harry, and I. Nathanson, Brooklyn, N. Y. Curtain-retaining device. 1,784,496; Dec. 9.
Roe, William C., Pittsburgh, Pa. Phonograph stop. 1,784,391; Dec. 9.
Roedding, Gordon E., assignor to Doerr Manufacturing Company, Grand Rapids, Mich. Securing means. 1,784,204; Dec. 9.
Rogers, Frederick W., Beaver Dam, Wis., assignor to Malleable Iron Range Company. Electric oven construction. 1,784,753; Dec. 9.
Rogers, Perley W. (See Goldsmith, A. L., and Rogers.)
Rohrbach Metall-Flugzeugbau, G. m. b. H. (See Staiger, Ludwig, assignor.)
Rosano, Max G., Chicago, Ill. Plate holder. 1,784,112; Dec. 9.
Rosenberg, A., & Co. (See Rosenberg, Arthur, assignor.)
Rosenberg, Arthur, assignor to A. Rosenberg & Co., Boston, Mass. Belt buckle. 1,784,794; Dec. 9.
Rosenberg, Heyman, New York, N. Y. Anchorage in masonry. 1,784,754; Dec. 9.
Rosenberg, Heyman, New York, N. Y. Anchorage device. 1,784,755; Dec. 9.
Ross Gear & Tool Company. (See Chandler, Franklin F., assignor.)
Rouillard, René, Detroit, Mich. Heated spark-plug holder. 1,784,541; Dec. 9.
Rowland, Davidge H., assignor to Locke Insulator Corporation, Baltimore, Md. Manufacture of insulators. 1,784,392; Dec. 9.
Royal, Charles B., Chicago, Ill. Lubricator for railway journal boxes. 1,784,542; Dec. 9.
Royal Typewriter Company. (See Degener, Gustave O., assignor.)
Rubber Service Laboratories Co., The. (See Scott, Winfield, assignor.)
Rüder, Heinrich B., assignor to Lurgi-Gesellschaft für Wärmetechnik m. b. H., Frankfort-on-the-Main, Germany. Production of adsorbents. 1,784,543; Dec. 9.
Rudnick, Paul, et al. (See Hershman, Paul R., assignor.)
Runge, Walter, East Orange, N. J., assignor, by mesne assignments, to International Coal Carbonization Company. Powdered coke product. 1,783,983; Dec. 9.
Runge, Walter, East Orange, N. J., and E. A. Packard, Yonkers, N. Y., assignors, by mesne assignments, to International Coal Carbonizaton Company. Processing of coal and product thereof. 1,783,982; Dec. 9.
Rupp, John L. (See Aldrich, H. H., and Rupp.)
Russell, John J., Rochester, N. Y. Clamp. 1,784,544; Dec. 9.
Ryckman, Norman E. (See Kemp, C. T., and Ryckman.)
Sager, Abraham, Chicago, Ill. Ring. Des. 82,760; Dec. 9.
Saibi Mojiami Kabushiki Kaisha. (See Kakuda, Saibei, assignor.)
Sailer, Rudolph J., Townley, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Sewing-machine attachment. 1,784,614; Dec. 9.
Sani-Loc Cabinet Company. (See Montgomery, Harry A., assignor.)
Santa Catalina Island Company. (See Renton, D. M., Long, and Murphy, assignors.)
Scarr, Agnes H., Atlantic, Iowa. Clothespin. 1,784,252; Dec. 9.
Schano, Peter, Union City, N. J. Foldable copy stand for portable typewriters. 1,784,253; Dec. 9.
Schawrow, Morris, Bayonne, N. J. Threadless coupling. 1,784,393; Dec. 9.
Schiebuhr, Friedrich, Berlin-Charlottenburg, assignor to Siemens-Schuckertwerke, Aktiengesellschaft, Berlin-Siemensstadt, Germany. Drive for paper machines. 1,784,545; Dec. 9.
Schiff, Sigmund, assignor to The J. H. Day Company, Cincinnati, Ohio. Process and apparatus for dividing plastics. 1,784,113; Dec. 9.
Schimpf, Robert, Berlin-Schlachtensee, assignor to Siemens-Schuckertwerke, Aktiengesellschaft, Berlin-Siemensstadt, Germany. Arc-ground suppressor. 1,784,682; Dec. 9.
Schlaich, Herman, Long Island City, N. Y. Mounting for temperature-responsive elements. 1,784,756; Dec. 9.
Schleicher, Manfred, Berlin-Charlottenburg, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt, Germany. Apparatus for controlling and indicating earth leakages in alternating-current lines. 1,784,546; Dec. 9.
Schlew, Arthur A. (See Clarke, B. E., and Schlew.)
Schlitt, Joseph L. (See Van Nuys, C. C., and Schlitt.)
Schmidt, Clarence C., Reynoldsburg, and J. L. Richter, Bexley, Ohio. Hydraulic-brake mechanism. 1,784,547; Dec. 9.
Schoeller, Walter. (See Jordan, H., and Schoeller, and Clerc.)
Schoeller, Walter E., Borgwaldt, and A. Feldt, assignors to Chemische Fabrik auf Actien (vorm. E. Schering), Berlin, Germany. Organic metallo mercapto sulphonic compounds and making same. 1,784,497; Dec. 9.
Schofer, Eugen, Pforzheim, Germany. Machine for manufacturing metal-chain mail. 1,784,254; Dec. 9.
Schonbrun, Irving L. (See Emis, Benjamin, assignor.)
Schubert, Max. (See Herz, R., and Schubert.)
Schulte, Walter B., assignor to Burgess Battery Company, Madison, Wis. Battery hand lamp. 1,784,114; Dec. 9.
Schumacher, Erwin A. (See Heise, G. W., and Schumacher.)
Schur, Milton O. (See Richter, G. A., and Schur.)
Schurr, Leslie A., and F. Breckenridge, Breckenridge, Mich. Washing machine. 1,784,316; Dec. 9.
Schweigert, Frederick, New York, N. Y. Sledge hammer. 1,784,683; Dec. 9.
Scott, David J., executors, et al. (See Scott, David J., assignor.)
Scott, David J., assignor to I., and D. J. Scott, executors of the estate of W. Scott, deceased, doing business under the name of Walter Scott & Company, Plainfield, N. J. Folding or other device. 1,784,757; Dec. 9.
Scott, Elmer T. (See Zublin, J. A., and Scott.)
Scott, Harry C. (See Brockman, Henry F. W., assignor.)
Scott, Isabella, executors, et al. (See Scott, David J., assignor.)
Scott, Walter. (See Scott, David J.)
Scott, Walter, & Company. (See Scott, David J.)
Scott, Winfield, Nitro, W. V., assignor to The Rubber Service Laboratories Co., Akron, Ohio. Vulcanizing rubber and product obtained therefrom. 1,784,498; Dec. 9.
Scovill Manufacturing Company. (See King, George A., assignor.)
Scribner, William L., assignor to The Timken Roller Bearing Company, Canton, Ohio. Car-journal construction. 1,784,467; Dec. 9.
Seaholm, John P., Moline, Ill., assignor, by mesne assignments, to Minneapolis-Moline Power Implement Company, Minneapolis, Minn. Cultivator. 1,784,499; Dec. 9.
Searle, William F., jr., assignor to The Fulton Sylphon Company, Knoxville, Tenn. Thermostatically-controlled valve mechanism. 1,784,077; Dec. 9.
Sebell, Harry, Boston, Mass. Combined automobile cover and tent. 1,784,115; Dec. 9.
Selby Shoe Company, The. (See Selby, Roger A., assignor.)
Seeger, Edwin W., South Milwaukee, Wis., assignor, by mesne assignments, to Cutler-Hammer, Inc. Controller for power-driven pumps. 1,784,205; Dec. 9.
Seidman, Charles, Philadelphia, Pa. Corded-edge knit neckband for sweaters and the like. 1,784,548; Dec. 9.
Selby, Roger A., assignor to The Selby Shoe Company, Portsmouth, Ohio. Shoe. Des. 82,761; Dec. 9.
Sethness, C. H., et al. (See Hershman, Paul R., assignor.)
Sethness, C. O., et al. (See Hershman, Paul R., assignor.)
Shakeproof Lock Washer Company. (See Hosking, Richard T., assignor.)
Shakeproof Lock Washer Company. (See Olson, Carl G., assignor.)
Shane, Minnie V., assignor of one-half to C. H. Winterborne, San Antonio, Tex. Manicurist's thumb guard. 1,783,984; Dec. 9.
Sharples Specialty Company, The. (See Berline, Raoul M., assignor.)
Sharples Specialty Company, The. (See Jones, Leo D., assignor.)
Shell Petroleum Corporation. (See Carney, Samuel C., assignor.)
Sheppard, Samuel E., and J. G. McNally, assignors to Eastman Kodak Company, Rochester, N. Y. Cellulose film. 1,784,758; Dec. 9.

Sheridan Iron Works, The, et al. (See Bredenberg, Alfred, assignor.)
Sherts, James H., Brackenridge, Pa., assignor to Duplate Corporation. Apparatus for making composite glass. 1,783,985; Dec. 9.
Shevlin, Joseph P., Chicago, Ill., assignor, by mesne assignments, to G. F. A. Mayle, London, England. Hydraulic jack. 1,784,116; Dec. 9.
Shoe Form Co., Inc. (See De Witt, William J., assignor.)
Shoemaker, Edward J., Canton, Ohio. Vessel and auxiliary boat therefor. 1,784,549; Dec. 9.
Showalter, Victor E., Elgin, assignor to Elgin National Watch Company, Chicago, Ill. Rear-vision mirror. 1,784,710; Dec. 9.
Sidis, William J., New York, N. Y. Perpetual calendar. 1,784,117; Dec. 9.
Siemens & Halske Aktiengesellschaft. (See Schleicher, Manfred, assignor.)
Siemens-Schuckertwerke Aktiengesellschaft. (See Schimpf, Robert, assignor.)
Siemens-Schuckertwerke Aktiengesellschaft. (See Shiebuhr, Friedrich, assignor.)
Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. (See Gleichmann, Hans, assignor.)
Signode Steel Strapping Company. (See Westphal, Rudolph E., assignor.)
Simoni, Armando, Bologna, Italy. Device for automatically filling fountain pens. 1,784,078; Dec. 9.
Simons, George A., and G. Freeberg, assignors to Simons Millwork, Inc., Minneapolis, Minn. Medicine cabinet. Des. 82,762; Dec. 9.
Simons, George A., and G. Freeberg, assignors to Simons Millwork, Inc., Minneapolis, Minn. Corner china closet. Des. 82,763; Dec. 9.
Simons Millwork, Inc. (See Simons, G. A., and Freeberg, assignors.)
Simpson, Walter L. (See Bryan, Joseph H., assignor.)
Sims, Jacob, Brooklyn, N. Y. Hand bag. 1,784,759; Dec. 9.
Singer Manufacturing Company, The. (See Clayton, Andrew B., assignor.)
Singer Manufacturing Company, The. (See Sailer, Rudolph J., assignor.)
Sinner, John, and O. A. Sinner, Los Angeles, Calif. Double-reading plumb level. 1,784,550; Dec. 9.
Sinner, Oscar A. (See Sinner, John, and O. A.)
Sisson, Vinton E., assignor to Railway Metal Products Company, Chicago, Ill. Adjustable support for railway-car side doors. 1,784,029; Dec. 9.
Skelton, Owen R., assignor to Chrysler Corporation, Detroit, Mich. Axle construction. 1,784,394; Dec. 9.
Skonberg, Eric K., Brooklyn, N. Y., assignor to Therm-O-Mat Dispenser, Inc. Liquid-dispensing device. 1,784,795; Dec. 9.
Slaten, Albert, Minneapolis, Minn. Measuring valve. 1,784,255; Dec. 9.
Sleeper & Hartley, Inc. (See Nigro, M., and Blount, assignors.)
Slepian, Joseph, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Circuit breaker. 1,784,760; Dec. 9.
Slusser Holding, Inc. (See Slusser, Leland, D., assignor.)
Slusser, Leland D., assignor to Slusser Holding, Inc., Ottawa, Ohio. Coin-controlled switch. 1,784,079; Dec. 9.
Smith, A. O., Corporation. (See Stresau, Richard, assignor.)
Smith, A. O., Corporation. (See Wetmore, Charles P., assignor.)
Smith, Boyd H. (See Love, F. B., and Smith.)
Smith, Floyd, Morrisville, Pa., assignor to Switlik Manufacturing Company. Parachute harness. 1,784,162; Dec. 9.
Smith, Jerry T., Washington, D. C. Roller skate. 1,784,761; Dec. 9.
Smith, Louis E., Minneapolis, Minn., assignor, by mesne assignments, to Hart-Carter Company, Peoria, Ill. Process of and apparatus for milling flour. 1,784,762; Dec. 9.
Smith, Marion F., assignor to Muller Co., Decatur, Ill. Meter-box lid. 1,784,551; Dec. 9.
Smith, Paul S., Madison, and E. G. Jegge, Montclair, assignors to Lea Fabrics Inc., Newark, N. J. Machine for production of pile fabrics. 1,784,552; Dec. 9.
Smith, R. M. (See Kirkpatrick Carroll P., assignor.)
Smith, Richardson Co. (See Durand, Moise H.)
Smith, Wellington J., Cleveland, Ohio. Ozonizing apparatus. Des. 82,764; Dec. 9.
Smithers, Vernon L., Akron, Ohio. Tire and marking the same. 1,784,118; Dec. 9.
Sneed, John, Ferndale, Mich., assignor to The Midland Steel Products Company, Cleveland, Ohio. Brake structure. 1,784,395; Dec. 9.
Snow, Karl F., Brecksville, assignor to The C. O. Bartlett & Snow Company, Cleveland, Ohio. Barrel-conveying tray. 1,784,615; Dec. 9.
Snyder, William J., Fort Leavenworth, Kans. Photographic process printing machine. 1,784,206; Dec. 9.
Societe Anonyme d'Ougrée Marikaye. (See Beaujean, Camille, assignor.)
Societe Anonyme Francaise dite: Societe Technique D'Optique et de Photographie (S. T. O. P.) (See Chrétien, Henri, assignor.)
Société Anonyme: Graissage "Alcyl." (See Koehler, Marcel, assignor.)
Societe Bournisien Beau & Cie. (See Homolle, Robert G. M., assignor.)
Société les Fils de Valton & Cie. (See Valton, Jean B., assignor.)
Societe pour l'Enrichissement et l'Agglomeration des Minerals, Societe Anonyme. (See de Samsonow, Alexandre, assignor.)
Soprani, Mario, Castelfidardo, Italy. Bass-key action for accordions. 1,784,468; Dec. 9.
Soprani, Mario, Castelfidardo, Italy. Piano-key action for accordions. 1,784,469; Dec. 9.
Sorensen, Andrew J., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Transformer. 1,784,030; Dec. 9.
Sorensen, Royal W. (See Millikan, R. A., and Sorensen.)
Spear, Lawrence Y., New London, assignor to Electric Boat Company, Groton, Conn. Rescue submarine. 1,784,500; Dec. 9.
Spengeman, Edwin, New York, N. Y. Timing apparatus. 1,784,031; Dec. 9.
Sperry Gyroscope Company. (See Gillmor, R. E., and Deimel, assignors.)
Spratts' Patent, America, Limited. (See Hartmann, August, assignor.)
Squibb, E. R., & Sons. (See Faulkner, Ralph C., assignor.)
Staiger, Ludwig, Spandau, near Berlin, assignor to the firm Rohrbach Metall-Flugzeughau, G. m. b. H., Berlin, Germany. Manufacture of wedge-shaped hollow bodies. 1,784,501; Dec. 9.
Standard Brands Incorporated. (See Barrington, John H., assignor.)
Standard Oil Company. (See Watts, G. W., Krauel, and Stockdale, assignors.)
Standard Oil Company of California. (See Ziser, G. J., and Osmer, assignors.)
Standard Pressed Steel Company. (See Hallowell, Howard T., assignor.)
Stanley Works, The. (See Murdoch, Walter B., assignor.)
Starcher, Ferreld J. (See McNabb, W. R., Farley, and Starcher.)
Stauverman, Edward, Lakeland, Fla. Weed cutter. 1,784,163; Dec. 9.
Staynew Filter Corporation. (See Dollinger, Lewis L., assignor.)
Steelman, Anna M., administratrix. (See Steelman, Merton A.)
Steelman, Merton A., deceased, by A. M. Steelman, administratrix, Vineland, N. J., assignor to Hartford-Empire Company, Hartford, Conn. Glassworking apparatus. 1,784,763; Dec. 9.
Steinberg, Carl, New York, N. Y. Hat. 1,784,470; Dec. 9.
Sterilek Company. (See O'Neill, Edward J., assignor.)
Stern, Louis, Company. (See Kraemer, August F., assignor.)
Stern, Maximilian, New York, N. Y. Bunion appliance. 1,784,032; Dec. 9.
Stevens, William C., and G. J. Meuer, Milwaukee, Wis., assignors, by mesne assignments, to Cutler-Hammer, Inc. Electric snap-switch mechanism. 1,784,207; Dec. 9.
Stevenson, John E. (See Gullette, William A.)
Stewart, Alexander, Roselle, assignor to C. L. Constant Company, Hoboken, N. J. Treating lead-bearing material. 1,783,986; Dec. 9.
Still, William J., London, England. Power-transmission gear for internal-combustion engines. 1,784,396; Dec. 9.
Stockdale, Thomas E. (See Watts, G. W., Krauel, and Stockdale.)
Stockstrom, Arthur, assignor to American Stove Company, St. Louis, Mo. Range or similar article. Re17,900; Dec. 9.
Stockstrom, Arthur, assignor to American Stove Company, St. Louis, Mo. Range. Des. 82,765; Dec. 9.
Stockstrom, Arthur, and A. H. Brodbeck, assignors to American Stove Company, St. Louis, Mo. Range. Des. 82,766; Dec. 9.
Stockstrom, Arthur, and A. H. Brodbeck, assignors to American Stove Company, St. Louis, Mo. Gas range. 1,784,764; Dec. 9.
Stoffels, Andreas J. M., and H. T. van der Wissel, The Hague, Netherlands. Impregnating bricks and like materials. 1,784,164; Dec. 9.
Stokes and Smith Company. (See Stokes, John S., assignor.)
Stokes, John S., Huntingdon Valley, assignor to Stokes and Smith Company, Philadelphia, Pa. Package, wrapper, and method of applying wrappers to containers. 1,784,317; Dec. 9.
Stolberg, Emil C., East Orange, N. J., assignor to American Car and Foundry Company, New York, N. Y. Wheel-breaking machine. 1,784,471; Dec. 9.
Stone, Junius H., Port Washington, N. Y. Building construction. 1,784,502; Dec. 9.
Stone, Thomas W., assignor to The Western Gas Construction Company, Fort Wayne, Ind. Water-gas process. 1,784,765; Dec. 9.
Stoney, Malcolm P. (See Evans, P., and Stoney.)
Stout, Harold E., West Reading, Pa. Manufacturing sinkers for knitting machines. 1,784,256; Dec. 9.
Stranahan, Samuel A., Flint, assignor to General Motors Corporation, Detroit, Mich. Radiator mounting. 1,784,766; Dec. 9.

Stresau, Richard, Wauwatosa, assignor to A. O. Smith Corporation, Milwaukee, Wis. Manufacturing electrically-welded vessels. 1,784,080; Dec. 9.
Stromberg, David, Cleveland, Ohio. Building. Des. 82,767; Dec. 9.
Studebaker Corporation, The. (See Campbell, Leon J., assignor.)
Stukenborg, Louis C., assignor to Oildraulic Lift Company, Memphis, Tenn. Hydraulic jack. 1,784,553; Dec. 9.
Stukenborg, Louis C., assignor to Oildraulic Lift Company, Memphis, Tenn. Rotary automobile lift structure. 1,784,554; Dec. 9.
Submarine Signal Corporation. (See Fay, R. D., and Dorsey, assignors.)
Süddeutsche Tele-F-On-Apparate-Kabel-, und Drahtwerke A.-G. (See Fischer, Kuno, assignor.)
Sulda, Herman, Modling, near Vienna, Austria. Recovering cresol from aqueous solutions of same. 1,784,711; Dec. 9.
Sullivan Machinery Company. (See Mitchell, Joseph S., assignor.)
Summers, Caleb E., Pontiac, assignor to General Motors Corporation, Detroit, Mich. Means to prevent valves from sticking. 1,784,555; Dec. 9.
Summers, Caleb E., Pontiac, assignor to General Motors Corporation, Detroit, Mich. Hydraulic valve mechanism. 1,784,767; Dec. 9.
Sun-Maid Raisin Growers of California. (See Ripley, David W., assignor.)
Supnes, Max M., assignor to The Fox Furnace Company, Elyria, Ohio. Heating apparatus. 1,784,796; Dec. 9.
Swanbaum, Albert, Duluth, Minn. Wire-twisting apparatus. 1,784,318; Dec. 9.
Swarby, George E., Burlington, Wash. Automobile tool. 1,784,033; Dec. 9.
Swann, Edward C., New York, N. Y., assignor to Cement Gun Construction Co., Chicago, Ill. Cement-gun nozzle. 1,784,503; Dec. 9.
Swartz, William H., Celina, Ohio. Sanitary milk pail. 1,784,319; Dec. 9.
Swenson, Martin, jr., Taihape, New Zealand. Lamp for motor and the like vehicles. 1,784,320; Dec. 9.
Switlik Manufacturing Company. (See Smith, Floyd, assignor.)
T. W. & C. B. Sheridan Company et al. (See Bredenberg, Alfred, assignor.)
Tabor Manufacturing Company, The. (See Lewis, Wilfred, assignor.)
Taddiken, John F. (See Hamill, J., and Taddiken.)
Tanaka, Yoshio, Kitatoshima-Gun, Tokyo-Fu, and T. Kuwata, Ebara-Gun, Tokyo-Fu, Japan. Producing borneol and limonene. 1,784,165; Dec. 9.
Tanner, Harry L., Brooklyn, assignor to Ford Instrument Company, Inc., Long Island City, N. Y. Variable-speed control device. 1,784,504; Dec. 9.
Taussig, Walter, Frankfort-on-the-Main, Germany, assignor to Durand & Huguenin, Basel, Switzerland. Printing wool with ester salts of leuco compounds of vat dyestuffs. 1,784,768; Dec. 9.
Teague, Walter D., Forest Hills, N. Y., assignor to Turner Glass Corporation, Terre Haute, Ind. Bottle or similar container. Des. 82,768; Dec. 9.
Teetor, Ralph R., Hagerstown, Ind. Piston and making same. 1,784,505; Dec. 9.
Teich, Ernest L., assignor to The American Hardware Corporation, New Britain, Conn. Lock. 1,784,208; Dec. 9.
Teller Corporation. (See Teller, Jacob, assignor.)
Teller, Jacob, assignor to Teller Corporation, Chicago, Ill. Coal range. Des. 82,769; Dec. 9.
Terman, Frederick E., Stanford University, Calif., assignor to Wired Radio, Inc., New York, N. Y. Oscillograph. 1,784,119; Dec. 9.
Terry, Matson C., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Refrigerator cooling unit. Des. 82,770; Dec. 9.
Tetelman, Louis L. (See Beards, J., and Tetelman.)
Teutsch, Eugene, Denver, Colo. Woodworking machine. 1,784,644; Dec. 9.
Teves, Anthony, assignor to Papendick, Inc., St. Louis, Mo. Bread-slicing machine. 1,784,397; Dec. 9.
Therm-O-Mat Dispenser, Inc. (See Skonberg, Eric K., assignor.)
Thiess, Karl, Frankfort-on-the-Main-Hochst, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Azo dyestuffs. 1,784,398; Dec. 9.
Thomas, Horace T., Lansing, Mich. Valve gearing. 1,784,257; Dec. 9.
Thompson, Fred C., Detroit, Mich., assignor to Morse Chain Company, Ithaca, N. Y. Chain-adjusting device. 1,783,987; Dec. 9.
Thompson, James H., Trenton, N. J., assignor to Walker & Davis, Inc., Philadelphia, Pa. Machine for dyeing and treating yarn. 1,784,399; Dec. 9.
Thornton-Jones, Gilbert, Sherwood, Nottingham, England. Apparatus for the projection of light rays. 1,784,357; Dec. 9.
Tibbetts, Charles B. (See Hurd, E. L., and Tibbetts.)
Tidal Oil Company. (See Franks, Harry H., assignor.)
Tidblad, Anders T., Soderhamn, Sweden. Centering and guiding device. 1,784,321; Dec. 9.
Tiffany Manufacturing Company. (See Brogger, Ivar W., assignor.)
Timbs, Edward, Los Angeles, and L. E. Zerbe, Moneta, Calif., assignors to The National Supply Company of Delaware, New York, N. Y. Two-post, two-speed, three-shaft portable draw works. 1,783,988; Dec. 9.
Timken Roller Bearing Company, The. (See Scribner, William L., assignor.)
Timm, Henry, Saxeville, Wis. Potato gatherer for potato diggers. 1,784,209; Dec. 9.
Tisdale, Leo S., New Albany, Miss. Internal-combustion engine. 1,784,712; Dec. 9.
Tolson, William A., Rexford, N. Y., assignor to General Electric Company. Signaling system. 1,784,645; Dec. 9.
Townsend, Arthur J., Canton, and E. S. Miller, Elyria, assignors, by mesne assignments, to The American Rolling Mill Company, Middletown, Ohio. Automatic shears. 1,784,556; Dec. 9.
Trans-Lux Daylight Picture Screen Corporation. (See Newman, David F., assignor.)
Tregoning, William C., Wauwatosa, assignor to Cutler-Hammer, Inc., Milwaukee, Wis. Molded insulation article. 1,784,557; Dec. 9.
Tribune Company, The. (See Wolf, Otto R., assignor.)
Tridex Corporation. (See Crickmer, Charles S., assignor.)
Truemper, John C. (See Nolen, T., and Truemper.)
Trusler, Frank S., Vernon, Tex. Artificial tooth. 1,784,322; Dec. 9.
Tufoak Products Co. (See Heaton, William H., assignor.)
Turner Glass Corporation. (See Teague, Walter D., assignor.)
Turner Tanning Machinery Company, The. (See Brill, August C., assignor.)
Tynan, Henry J., Ridgewood, N. J. Twine holder and cutter. 1,784,258; Dec. 9.
Underland, Cornelius, Elkton, S. Dak. Loading attachment for tractors. 1,784,558; Dec. 9.
Union Metal Manufacturing Company. (See Bale, Lawrence D., assignor.)
Union Switch & Signal Company, The. (See Geiger, P. H., and Grondahl, assignors.)
Union Switch & Signal Company, The. (See Grondahl, Lars O., assignor.)
Union Switch & Signal Company, The. (See Sorensen, Andrew J., assignor.)
United Cigarette Machine Company Aktiengesellschaft. (See Lorentz, Valentin, assignor.)
United Shoe Machinery Corporation. (See Bonser, Ernest F., assignor.)
United Shoe Machinery Corporation. (See Hurd, E. L., and Tibbetts, assignors.)
United Shoe Machinery Corporation. (See Lander, Clarence I., assignor.)
United Shoe Machinery Corporation. (See Roberts, Clifford, assignor.)
United States Glass Company. (See Beam, Charles C., assignor.)
United States Radiator Cor. (See Dietert, Harry W., assignor.)
Universal Fringe Works. (See Grabelsky, Israel, assignor.)
Urschel, William B., Valparaiso, Ind. Harvesting machine. 1,784,081; Dec. 9.
Valton, Jean B., assignor to Société les Fils de Valton & Cie., Troyes, France. Linking machine. 1,784,713; Dec. 9.
Van Bergen, Edward R., Cleveland Heights, Ohio. Stenciling apparatus. 1,784,616; Dec. 9.
Vanderbilt, R. T., Co. (See Kaegenbehn, Charles F., assignor.)
Van der Lande, Bernardus L. M., and G. Komen, Deventer, Netherlands. Apparatus for preparing casting molds. 1,784,714; Dec. 9.
Van der Wissel, Herman T. (See Stoffels, A. J. M., and van der Wissel.)
Van Dyck, Arthur F., Yonkers, N. Y., assignor to Radio Corporation of America. Radio receiving system. 1,784,210; Dec. 9.
Van Houten, Frank H., assignor to Dutchess Tool Company, Beacon, N. Y. Dough-dividing apparatus. 1,784,559; Dec. 9.
Van Nuys, Claude C., Cranford, and J. L. Schlitt, Elizabeth, N. J., assignors to Air Reduction Company, Incorporated, New York, N. Y. Separation of the constituents of gaseous mixtures. 1,784,120; Dec. 9.
Vickers-Armstrongs Limited. (See Jones, Albert E., assignor.)
Vickers-Armstrongs Limited. (See Larsson, Carl A., assignor.)
Viscolosi, Louis, Providence, assignor to The Esmond Mills, Esmond, R. I. Loom. 1,784,400; Dec. 9.
Vissat, Anthony L., Jeannette, Pa. Railway cross over frog construction. 1,784,211; Dec. 9.
Vitte, Paul R., Long Beach, Calif. Clamping machine for snap fasteners. 1,784,034; Dec. 9.
Von Arco, Georg, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Radio receiving system. 1,784,506; Dec. 9.
Von Bogdandy, Stephan. (See Polanyi, M., and von Bogdandy.)
Von der Lippe-Lipski, Elaine, Washington, D. C. Changeable exhibitor. 1,784,364; Dec. 9.
Von der Lippe-Lipski Elaine, Washington, D. C. Animated sign. 1,784,365; Dec. 9.

Von Dieterich, Wilhelm, Honningen-on-the-Rhine, assignor to the firm Rhenania-Kunheim Verein Chemischen Fabriken Aktiengesellschaft, Berlin, Germany. Mold for casting sulphur. 1,784,769; Dec. 9.
Von Wilmowsky, Felix F., New York, N. Y. Footwear. 1,784,035; Dec. 9.
Wachsman, Jacob, Brooklyn, N. Y. Electric stop mechanism for knitting machines and the like. 1,784,560; Dec. 9.
Wagel, Srinivas R., assignor of seventy-five per cent to The Winchester American Corporation, New York, N. Y. Washing device. 1,784,401; Dec. 9.
Wagner, Theodore B., Brooklyn, N. Y. Monosaccharide material. 1,784,402; Dec. 9.
Walker & Davis, Inc. (See Thompson, James H., assignor.)
Walker, Edwin R., Yakima, Wash. Fruit-packing stand. 1,784,403; Dec. 9.
Walker, George H., assignor to Heenan & Froude Limited, Worcester, England. Hydraulic clutch. 1,784,212; Dec. 9.
Walker, Thomas S., assignor to I. Leezenbaum, Newark, N. J. Folding table. 1,784,507; Dec. 9.
Wallace, Henry, London, England. Grit-distributing device. 1,784,323; Dec. 9.
Wallenberg, Richard S., Buffalo, assignor of one-half to R. E. Donovan, Tonawanda, N. Y. Battery-terminal connecter. 1,784,259; Dec. 9.
Walp, Charles F., Berwick, Pa., assignor to American Car and Foundry Company, New York, N. Y. Roof. 1,784,508; Dec. 9.
Walsh, James A., Indianapolis, Ind., assignor to J. I. Case Company, Racine, Wis. Combination harvester thrasher. 1,784,121; Dec. 9.
Walstrom, Axel M., Minneapolis, Minn. Double-acting grease gun. 1,784,260; Dec. 9.
Wantz, Julius B., Oak Park, Ill. Rectifying switch. 1,784,122; Dec. 9.
Warp Twisting-In Machine Company. (See Becker, John H., assignor.)
Washington, George T., Russell, Ky. Filing cabinet. 1,784,166; Dec. 9.
Waterbury Farrel Foundry and Machine Company, The. (See Wilcox, Richard L., assignor.)
Watts, George W., P. L. Krauel, and T. E. Stockdale, assignors to Standard Oil Company, Whiting, Ind. Distillation of hydrocarbon oils. 1,784,561; Dec. 9.
Watts, Leo E., assignor to J. F. Holtzen, Enid, Okla. Ironing board. 1,784,715; Dec. 9.
Weaver, Fleming R. (See Oglesby, N. E., and Weaver.)
Weaver, William A., Shaker Heights, Ohio. Package of dental supplies. 1,784,646; Dec. 9.
Webb, Adolphus M., assignor of one-fourth to W. G. Jarrell Machine Company, Charlotte, N. C. Exercising device. 1,784,082; Dec. 9.
Weber, Carl M. (See Mahan, C. B., and Weber.)
Weber Machine Corporation. (See Mahan, C. B., and Weber, assignors.)
Wehrle Company, The. (See Pickup, George E., assignor.)
Weidner, George, Rochester, N. Y. Precision dressing apparatus for grinding wheels. 1,784,261; Dec. 9.
Weinheim, Emil, New York, N. Y. Coating and impregnating webs of flexible material. 1,784,797; Dec. 9.
Weinhold, Walter G. (See Marks, C. K., and Weinhold.)
Welch, Joseph H., Tulsa, Okla. Method and apparatus for oil cracking. 1,784,562; Dec. 9.
Wellensiek, Louis H., Houston, Tex. Drilling apparatus. 1,784,404; Dec. 9.
Werner, Ernst A. G., Brooklyn, N. Y. Wrench. 1,784,123; Dec. 9.
West, George W., West Warwick, R. I. Oil-can support and oil stove. 1,784,716; Dec. 9.
Western Gas Construction Company, The. (See Stone, Thomas W., assignor.)
Western Wire Products Co. (See Young, Lee C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Slepian, Joseph, assignor.)
Westinghouse Electric & Manufacturing Company. (See Terry, Matson C., assignor.)
Westinghouse Lamp Company. (See Plishker, Herbert E., assignor.)
Westlund, John H., Marshalltown, Iowa. Self-defense firearm. 1,784,563; Dec. 9.
Westphal, Rudolph E., Chicago, Ill., assignor, by mesne assignments, to Signode Steel Strapping Company. Sealing tool. 1,784,213; Dec. 9.
Wetmore, Charles P., assignor to A. O. Smith Corporation, Milwaukee, Wis. Reversible chuck for lathes. 1,783,989; Dec. 9.
Wheeler, Raymond C., and P. W. Prutzman, Los Angeles, Calif. Alkaline treatment of petroleum vapors. 1,784,262; Dec. 9.
White Motor Company, The. (See Jehle, Ferdinand, assignor.)
Whitney, Willis R., Niskayuna, N. Y., assignor to General Electric Company. Making crucibles. 1,784,647; Dec. 9.
Wilcox, Richard L., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Hopper mechanism. 1,784,124; Dec. 9.
Wild, Charles H., assignor to Burt Machine Company, Incorporated, Baltimore, Md. Case-filling machine. 1,784,083; Dec. 9.
Wildman Mfg. Co. (See Howie, Kenneth, assignor.)
Wiley, Andrew J., Boise, Idaho. Metal reenforcement for timber poles. 1,784,770; Dec. 9.
Williams, Calvin C., Philadelphia, Pa. Valve-actuating mechanism. 1,784,036; Dec. 9.
Williams, Leroy E., assignor to Highway Trailer Company, Edgerton, Wis. Trailer-steering device. 1,784,263; Dec. 9.
Williams, Raymond A., Arlington, Mass. Pin magazine for bowling alleys. 1,784,084; Dec. 9.
Williams, Roger S., New York, N. Y. Method and mechanism for lubricating locomotive driving-rod journals. 1,784,405; Dec. 9.
Willoughby, Victor. (See Knight, J. M., and Willoughby.)
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Mine car. 1,784,472; Dec. 9.
Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Mine car. 1,784,473; Dec. 9.
Wills, Herbert J., Niagara Falls, N. Y., assignor to The Carborundum Company. Automatic lapping machine. 1,784,648; Dec. 9.
Wilson Brothers. (See Negley, Frank H., assignor.)
Wilson, Edwin B., Forest Hills, N. Y. Illuminated ornamental object. 1,784,474; Dec. 9.
Wilson, Leon A., Los Angeles, Calif., assignor of one-half to E. L. Yewell, Washington, D. C. Medicine. 1,784,324; Dec. 9.
Wilson, Robert E. (See Wilson, Robert E. and R. E.)
Wilson, Robert E. and R. E., Belleville, N. J. Poppet-valve-actuation means. 1,784,125; Dec. 9.
Wilson-Western Sporting Goods Co. (See Levinson, David, assignor.)
Winchester American Corporation, The. (See Wagel, Srinivas R., assignor.)
Winterborne, Charles H. (See Shane, Minnie V., assignor.)
Winters, Elzie, et al. (See Fahrenholtz, Henry, assignor.)
Winther Company, The. (See Jensen, Thorvald, assignor.)
Wintroath, John A., assignor to Peerless Pump Company, Los Angeles, Calif. Shaft-tubing sustaining device for deep-well pumps. 1,784,406; Dec. 9.
Wired Radio, Inc. (See Terman, Frederick E., assignor.)
Witz, Albert A., Chicago, Ill. Lamp-stand bracket. Des. 82,771; Dec. 9.
Witzel, Karl, Berlin-Lichterfelde, assignor to Rheinische Metallwaaren-und Maschinenfabrik, Dusseldorf-Derendorf, Germany. Barrel of firearms. 1,784,325; Dec. 9.
Woelfer, Frank C., jr. (See Butler, C. G., and Woelfer.)
Wolf, Otto R., River Forest, assignor to The Tribune Company, Chicago, Ill. Printing press. 1,784,037; Dec. 9.
Wood, Alexander P., Schenectady, N. Y., assignor to General Electric Company. Stator for dynamo-electric machines and making the same. 1,784,649; Dec. 9.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Motor drive for printing presses. 1,784,085; Dec. 9.
Wood, Myron W., Sioux City, Iowa. Oil burner. 1,784,771; Dec. 9.
Wood Newspaper Machinery Corporation. (See Wood, Henry A. W., assignor.)
Wood, Wilfred R., London, England, assignor to International Combustion Engineering Corporation, New York, N. Y. Steam generator. 1,784,407; Dec. 9.
Woodhull, Llewellyn S. (See Marshall, W., and Woodhull.)
Woodron Washing Machine Company. (See Gibson, George M.)
Woodward, Harold E., Penns Grove, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Trisazo dyes and producing the same. 1,784,617; Dec. 9.
Workman, Paul E., Dallas, Tex. Recovering and increasing the production of oil. 1,784,214; Dec. 9.
Wortham, Jesse L. (See McFarland, Parley E., assignor.)
Wubco Battery Corporation. (See Aldrich, H. H., and Rupp, assignors.)
Yewell, Edwin L. (See Wilson, Leon A., assignor.)
Yoder, Lee A. (See Lidke, Otto F., assignor, and George E. Lidke.)
Young Brothers Company. (See Fox, Vernie A., assignor.)
Young, Lee C., assignor to Western Wire Products Co., St. Louis, Mo. Pipe-vise stand. 1,784,264; Dec. 9.
Young, Walter D., Flint, Mich. Hood catch. 1,784,475; Dec. 9.
Zahn, Lawrence J., Long Island City, assignor to International Postal Supply Company, Brooklyn, N. Y. Check-indorsing machine. 1,783,990; Dec. 9.
Zahn, Lawrence J., Long Island City, assignor to International Postal Supply Company, Brooklyn, N. Y. Printing-die structure. 1,783,991; Dec. 9.
Zeamans, Harold R., New York, N. Y. Clear-vision automobile body construction. 1,784,265; Dec. 9.
Zeiss Firm, Carl. (See Meyer, Franz, assignor.)
Zerbe, Lewis E. (See Timbs, E., and Zerbe.)
Ziegler, George, Bogota, N. J. Grate key. 1,784,772; Dec. 9.
Ziser, George J., Los Angeles, and J. H. Osmer, El Segundo, assignor, by mesne assignments, to Standard Oil Company of California, San Francisco, Calif. Treating petroleum oils containing sulphur. 1,784,215; Dec. 9.

Zitscher, Arthur, Offenbach-on-the-Main, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Manufacturing aminonaphthol ethers. 1,784,408; Dec. 9.
Zubaty, Joseph, assignor to A C Spark Plug Company, Flint, Mich. Odometer. 1,784,773; Dec. 9.
Zuber, Emil F., and F. A. Dowling, Peoria, Ill., assignors to The Michigan Silo Company, Kalamazoo, Mich. Silo door. 1,783,992; Dec. 9.
Zublin, John A., Los Angeles, and E. T. Scott, Bell, Calif.; said Scott assignor to said Zublin. Cleaning device for rotary drilling tools. 1,784,476; Dec. 9.
Zur Löwen, Waldemar, Barmen-Rittershausen, Germany, assignor, by mesne assignments, to American Bemberg Corporation. Exchangeable filter, more particularly for artificial-silk-spinning machines. 1,784,103; Dec. 9.
Zwiebel, Elmer W., Los Angeles, Calif. Radiocabinet. Des. 82,772; Dec. 9.
Zwiebel, Elmer W., Los Angeles, Calif. Radiocabinet. Des. 82,773; Dec. 9.
Zwiebel, Elmer W., Los Angeles, Calif. Radiocabinet. Des. 82,774; Dec. 9.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 9TH DAY OF DECEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Accordions, Bass-key section for. M. Soprani. 1,784,468; Dec. 9.
Accordions, Piano-key action for. M. Soprani. 1,784,469; Dec. 9.
Acid, Making acetic. H. Dreyfus. 1,784,583; Dec. 9.
Acoustic device. M. R. Hutchison. 1,784,595; Dec. 9.
Adhesive. G. S. Mathey. 1,784,740; Dec. 9.
Adhesive composition. W. O. Herrmann and W. Haehnel. 1,784,008; Dec. 9.
Adsorbents, Production of. H. B. Rüder. 1,784,543; Dec. 9.
Adsorption material, Regeneration of. V. Pantenburg. 1,784,536; Dec. 9.
Agitator. H. F. W. Brockmann. 1,784,416; Dec. 9.
Air brake, Vehicle. F. L. Horspool. 1,784,233; Dec. 9.
Air control for internal-combustion engines. E. J. Hall. 1,784,006; Dec. 9.
Aircraft. R. Bratu. 1,784,654; Dec. 9.
Aircraft. M. H. de Hora. 1,784,723; Dec. 9.
Aircraft construction. W. M. Piggott. 1,784,027; Dec. 9.
Airplane skid. F. S. Cotton. 1,784,274; Dec. 9.
Airship. L. Balazinski. 1,784,775; Dec. 9.
Alarm: *See*—
  Musical alarm.
Alarm apparatus for the prevention of gas poisoning. A. N. Olsson and P. D. Peterson. 1,783,974; Dec. 9.
Alarm control unit. E. Bellman. 1,784,479; Dec. 9.
Ammonia-air mixtures. Apparatus for the production of. H. Pauling. 1,784,074; Dec. 9.
Amplifier. A. V. Bedford. 1,784,653; Dec. 9.
Amplifier of electrical currents. E. H. Loftin. 1,784,150; Dec. 9.
Anchorage device. H. Rosenberg. 1,784,755; Dec. 9.
Anchorage for poles. L. D. Bale. 1,784,568; Dec. 9.
Annealing. J. R. Cain. 1,784,221; Dec. 9.
Apparatus for feeding closure caps. J. A. Johnson. 1,784,010; Dec. 9.
Apparatus for inducing flow of oil from wells. W. A. Melton. 1,784,242; Dec. 9.
Arc-ground suppressor. R. Schimpf. 1,784,682; Dec. 9.
Atomizer, Suction. C. S. Crickmer. 1,784,222; Dec. 9.
Automatic sheafs. A. J. Townsend and E. S. Miller. 1,784,556; Dec. 9.
Automobile lift structure, Rotary. L. C. Stukenborg. 1,784,554; Dec. 9.
Axle construction. O. R. Skelton. 1,784,394; Dec. 9.
Axle structure. E. W. Pelster. 1,783,977; Dec. 9.
Badge. W. J. Otts. Des. 82,756; Dec. 9.
Bag: *See*—
  Garment bag. Hand bag.
Bag and frame therefor, Hand. F. J. Quigan. 1,784,748; Dec. 9.
Barrel of firearms. K. Witzell. 1,784,325; Dec. 9.
Barrette. A. and J. Goodman. 1,784,430; Dec. 9.
Base for bird-cage stands or similar articles. S. Babitzky. Des. 82,720; Dec. 9.
Basin for soil-water-heat reclaimers, Catch. F. S. Boltz. 1,783,950; Dec. 9.
Bathtub attachment. W. Rafalski. 1,784,749; Dec. 9.
Batteries, Sealing storage. H. H. Aldrich and J. L. Rupp. 1,784,216; Dec. 9.
Battery-electrolyte-reenforcing means, Dry-. G. W. Heise and E. A. Schumacher. 1,784,592; Dec. 9.
Battery-terminal connecter. R. S. Wallenberg. 1,784,259; Dec. 9.
Bearing, Roller. G. A. Darby. 1,783,957; Dec. 9.
Bench: *See*—
  Exhibition bench.
Bicycle mechanism. A. Devito. 1,784,449; Dec. 9.
Biscuit cutting and embossing machine. T. L. Green. 1,784,431; Dec. 9.
Blade edger. F. Graffenberger. 1,784,625; Dec. 9.
Board: *See*—
  Ironing board. Running board.
Boat. F. M. Norman. 1,784,071; Dec. 9.
Bodies consisting of a plurality of thin alternately conducting and insulating layers, Producing. M. Polanyi and S. von Bogdandy. 1,784,611; Dec. 9.
Body construction, Clear-vision automobile. H. R. Zeamans. 1,784,265; Dec. 9.
Boiler. A. A. Lindley. 1,784,149; Dec. 9.
Bolt anchor and support, Combined. H. W. Pleister. 1,783,976; Dec. 9.
Bone-char-drying apparatus. J. Hamill and J. F. Taddiken. 1,784,626; Dec. 9.
Borneol and limonene, Producing. Y. Tanaka and T. Kuwata. 1,784,165; Dec. 9.
Bottle. R. C. Faulkner. Des. 82,737; Dec. 9.
Bottle or similar container. W. D. Teague. Des. 72,768; Dec. 9.
Bottles, Process and apparatus for producing wax. D. Fauerbach. 1,784,686; Dec. 9.
Bouquet pin. L. W. Andersen. 1,784,565; Dec. 9.
Bowl or similar article. C. C. Beam. Des. 82,723; Dec. 9.
Box: *See*—
  Core box. Journal box.
  Fire-alarm and watchman's recording box. Mail box.
Box toe, Soft. C. L. Daly. 1,784,276; Dec. 9.
Bracket: *See*—
  Roller bracket.
Brake: *See*—
  Air brake.
Brake. H. C. Gohlke. 1,784,688; Dec. 9.
Brake for sleds. E. Kallenbach. 1,783,966; Dec. 9.
Brake lever and lock, Emergency. J. Ratto. 1,784,750; Dec. 9.
Brake mechanism for motor vehicles. J. W. Postel. 1,784,387; Dec. 9.
Brake mechanism, Hydraulic. C. C. Schmidt and J. L. Richter. 1,784,547; Dec. 9.
Brake mechanism, Vehicle. N. A. Christensen. Re17,899; Dec. 9.
Brake-operating means. L. E. La Brie. 1,784,295; Dec. 9.
Brake structure. J. Sneed. 1,784,395; Dec. 9.
Bread-slicing machine. A. Tewes. 1,784,397; Dec. 9.
Bricks and like materials, Impregnating. A. J. Stoffels and T. van der Wissel. 1,784,164; Dec. 9.
Buckle. D. W. Coulias. Des. 82,727; Dec. 9.
Buckle, Belt. A. Rosenberg. 1,784,794; Dec. 9.
Buffer for well swabs. N. H. Ricker. 1,784,110; Dec. 9.
Building. F. D. Clark. Des. 82,726; Dec. 9.
Building. D. Stromberg. Des. 82,767; Dec. 9.
Building construction. J. H. Stone. 1,784,502; Dec. 9.
Building structure. A. Leyland. 1,784,808; Dec. 9.
Bunion appliance. M. Stern. 1,784,032; Dec. 9.
Burner: *See*—
  Fuel burner. Oil burner.
Cabinet. W. A. French. Des. 82,738; Dec. 9.
Cabinet, Filing. G. T. Washington. 1,784,166; Dec. 9.
Cabinet, Medicine. G. A. Simons and G. Freeberg. Des. 82,762; Dec. 9.
Cabinet, Radiator. J. H. Bryan. 1,784,040; Dec. 9.
Cabinet, Receiving and dispensing. H. A. Montgomery. 1,784,743; Dec. 9.
Cabinet, Rotary. L. A. Knipp. 1,784,293; Dec. 9.
Cable installation, Long-distance-. K. Fischer. 1,784,184; Dec. 9.
Cable-joint construction, Water-cooled welding. J. J. Paugh. 1,784,384; Dec. 9.
Calendar, Perpetual. W. J. Sidis. 1,784,117; Dec. 9.
Camera, Binocular nonstop motion-picture. H. K. Fairall. 1,784,515; Dec. 9.
Can-making machinery and apparatus. W. K. Cabot. 1,784,131; Dec. 9.
Can-making machinery, Line control for. L. L. Jones. 1,784,358; Dec. 9.
Canopy, Beach. M. J. Peterson. 1,784,199; Dec. 9.
Car construction. W. F. Dietrichson. 1,784,484; Dec. 9.
Car for amusement devices. H. F. Cushner. Des. 82,733; Dec. 9.
Car-journal construction. W. L. Scribner. 1,784,467; Dec. 9.
Car, Mine-. L. Almquist. 1,784,477; Dec. 9.
Car, Mine. V. Willoughby. 1,784,472–3; Dec. 9.
Car, Poultry. I. V. Edgerton. 1,784,685; Dec. 9.
Car rerailer. E. J. McCarty. 1,784,741; Dec. 9.
Car seat. J. M. Knight and V. Willoughby. 1,784,527; Dec. 9.
Carburetor. G. M. Bicknell. 1,784,481; Dec. 9.
Card or Similar article, Display. S. H. Goldberg. Des. 82,740; Dec. 9.
Carrier systems, Equalization for. A. Carpe. 1,784,176; Dec. 9.
Carton. P. R. Miller. Des. 82,755; Dec. 9.
Carton, Egg. J. L. Coyle. 1,784,275; Dec. 9.
Case-filling machine. C. H. Wild. 1,784,083; Dec. 9.
Casing, Electric-wire. J. M. Berry. 1,784,217; Dec. 9.
Casing for precision balances. W. Heusser. 1,784,098; Dec. 9.
Casing, Grease-gun. C. G. Butler. Des. 82,725; Dec. 9.
Cash carrier. J. L. Baldwin. 1,784,776; Dec. 9.
Casserole or similar article. S. W. Farber. Des. 82,736; Dec. 9.
Cast or splint removing device. B. E. Clarke and A. A. Schlew. 1,784,337; Dec. 9.
Casting under pressure. S. Junghans. 1,784,600; Dec. 9.
Castings, Cooling means for. L. Föbus. 1,784,346; Dec. 9.

Catch, Hood. W. D. Young. 1,784,475; Dec. 9.
Cellulose pulp, Refining. G. A. Richter and M. O. Schur. 1,784,161; Dec. 9.
Cement manufacture, Producing ground raw material for Portland. J. A. Miller and E. P. Newhard. 1,784,462; Dec. 9.
Centering and guiding device. A. T. Tidblad. 1,784,321; Dec. 9.
Centrifugal apparatus. R. M. Berline. 1,784,510; Dec. 9.
Chain-adjusting device. F. C. Thompson. 1,783,987; Dec. 9.
Chain assembly. A. F. Kraemer. 1,784,451; Dec. 9.
Chain, Drive. F. L. Morse. 1,784,023; Dec. 9.
Chair: *See*—
  Foldable chair.
Chalk-line reel. G. M. Griswold. 1,784,064; Dec. 9.
Check-endorsing machine. L. J. Zahn. 1,783,990; Dec. 9.
Check, Recoil. M. B. Lucker. 1,784,739; Dec. 9.
Chemical furnace. F. L. Preston. 1,784,109; Dec. 9.
China closet, Corner. G. A. Simons and G. Freeberg. Des. 82,763; Dec. 9.
Chlorides, Making alkyl. J. Frei. 1,784,423; Dec. 9.
Chuck. A. E. Englund. 1,784,002; Dec. 9.
Chuck for lathes, Reversible. C. P. Wetmore. 1,783,989; Dec. 9.
Cigarette-making machine. M. P. E. Hohn. 1,784,443; Dec. 9.
Cigarette, Sanitary. M. Poeck. 1,784,386; Dec. 9.
Cigarettes and like articles, Packing. W. E. Molins. 1,784,701; Dec. 9.
Cigarettes, Process and device for improving. V. Lorentz. 1,784,296; Dec. 9.
Circuit breaker. J. Slepian. 1,784,760; Dec. 9.
Circuit-breaker system, Automatic reclosing. A. E. Anderson. 1,784,651; Dec. 9.
Circuit, Transmission frequency-delay-measuring. D. Mitchell. 1,784,194; Dec. 9.
Circuits, Voice-controlled. A. Carpe. 1,784,178; Dec. 9.
Circulating apparatus for wood-pulp digesters. A. G. Natwick. 1,784,197; Dec. 9.
Clamp: *See*—
  Hood clamp.
Clamp. J. J. Russell. 1,784,544; Dec. 9.
Clamping machine for snap fasteners. P. R. Vitte. 1,784,034; Dec. 9.
Clasp: *See*—
  Lingerie clasp.
Classifying and washing apparatus. H. W. Newton. 1,784,246; Dec. 9.
Cleaner for boilers, Rotary soot. F. W. Linaker and T. M. Bruback. 1,784,491; Dec. 9.
Cleaning apparatus for cottonseed. E. M. Brennan. 1,784,219; Dec. 9.
Cleaning device for rotary drilling tools. J. A. Zublin and E. T. Scott. 1,784,476; Dec. 9.
Cleaning device, Heating-surface-. D. S. Jacobus. 1,784,629; Dec. 9.
Clip: *See*—
  Guy clip. Spring clip.
Clip. J. P. Lynn. 1,784,605; Dec. 9.
Clock, Electric program. L. C. Morris. 1,784,195; Dec. 9.
Closure cap for radiators, water tanks, pressure tanks, gas tanks, and the like. E. Persson. 1,784,198; Dec. 9.
Clothespin. A. H. Scarr. 1,784,252; Dec. 9.
Clutch construction. J. R. Carickhoff. 1,784,722; Dec. 9.
Clutch, Double automatic. J. A. Prior. 1,784,793; Dec. 9.
Clutch, Hydraulic. G. H. Walker. 1,784,212; Dec. 9.
Coal and product thereof, Processing of. W. Runge and E. A. Packard. 1,783,982; Dec. 9.
Coal, Apparatus for carbonizing. J. Mitchell. 1,784,676; Dec. 9.
Coal, Apparatus for mining and loading. E. C. Morgan. 1,784,156; Dec. 9.
Coal drier. G. P. Jackson. 1,783,965; Dec. 9.
Coating machine. M. T. Chamberlain. 1,783,955; Dec. 9.
Coin-controlled mechanism. R. P. Norton. 1,784,249; Dec. 9.
Coin-controlled switch. L. D. Slusser. 1,784,079; Dec. 9.
Coke and coal or the like, Apparatus and method of transferring. H. Adams. 1,784,650; Dec. 9.
Coke product, Powdered. W. Runge. 1,783,983; Dec. 9.
Columns, Cap for building. G. H. Dean. 1,784,091–2; Dec. 9.
Compacting mechanism. J. C. Pelton. 1,784,385; Dec. 9.
Composition for dentures. S. E. Noyes. 1,784,250; Dec. 9.
Concrete mixer. C. K. Marks and W. G. Weinhold. 1,784,371; Dec. 9.
Conduit and constructing the same. W. H. Collins. 1,784,271; Dec. 9.
Connecter, Electrical. C. H. Conant. 1,784,340; Dec. 9.
Connection, Rotational driving. J. V. Pugh and G. T. Bayliss. 1,784,708; Dec. 9.
Container and means for holding said containers in cooperation. L. J. Fairbanks. 1,784,516; Dec. 9.
Container, Safety milk-bottle. R. W. Parker. 1,784,073; Dec. 9.
Control system. B. F. Meador. 1,784,639; Dec. 9.
Control system. H. S. Pardee. 1,784,310; Dec. 9.
Conveyer device for packages and coat hangers, Spiral. C. E. Constable. 1,783,272; Dec. 9.
Conveyer rack. V. A. Fox. 1,784,229. Dec. 9.
Conveyers, Bundle-transferring device for. C. E. Constable. 1,784,273; Dec. 9.
Cooling compound and lubricant and manufacturing same. F. C. Broeman. 1,784,220; Dec. 9.
Cooling unit, Refrigerator. M. C. Terry Des. 82,770; Dec. 9.
Cord tie. J. T. H. Paterson. 1,784,679; Dec. 9.
Core box. P. F. Devany. 1,784,225; Dec. 9.
Cotton and other vegetable pulps or fibers of a porous absorbing nature, Treating. C. W. Andrews. 1,784,566; Dec. 9.
Cotton blocker and cultivator, Combined. A. E. Pittman. 1,784,313; Dec. 9.
Coupling: *See*—
  Threadless coupling.
Cover and securing means therefor, Tank-dome. J. Beyer. 1,784,480; Dec. 9.
Cover and tent, Combined automobile. H. Sebell. 1,784,115; Dec. 9.
Cover for buses. D. N. Hyman. 1,784,356; Dec. 9.
Cover for dumping vehicles, Roll-top. T. Nolen and J. C. Truemper. 1,784,248; Dec. 9.
Cover, Switch-box plate. F. G. Darlington. 1,784,277; Dec. 9.
Covering and making same, Floor. C. Ellis. 1,784,800–01; Dec. 9.
Covering and making same, Light-colored floor. C. Ellis. 1,784,803; Dec. 9.
Covering and making same, Textured floor. C. Ellis. 1,784,802; Dec. 9.
Covering and making same, Variegated floor. C. Ellis. 1,784,804; Dec. 9.
Covering, Floor. C. Ellis. 1,784,135; Dec. 9.
Covering material and making same. Floor. C. Ellis. 1,784,799; Dec. 9.
Cranberry gatherer. J. E. Morano. 1,784,702; Dec. 9.
Crane for locomotive appurtenances, Work-handling. J. Kwiatkowski. 1,784,694; Dec. 9.
Crate for small animals, Shipping. M. C. Imler. 1,784,187; Dec. 9.
Cream cutter, Frozen-. E. D. Lamphere, jr. 1,784,603; Dec. 9.
Cresol from aqueous solutions of same, Recovering. H. Sulda. 1,784,711; Dec. 9.
Crucibles, Making. W. R. Whitney. 1,784,647; Dec. 9.
Cuffs of knickers, Connecter device for. C. Douglis. 1,784,785; Dec. 9.
Cultivator. J. P. Seaholm. 1,784,499; Dec. 9.
Cultivator, Spring-tooth. E. L. McOsker. 1,784,193; Dec. 9.
Cup: *See*—
  Grease cup.
Current interrupter, Alternating-power-. R. A. Millikan and R. W. Sorensen. 1,784,303; Dec. 9.
Curtain-retaining device. H. Rodstein and I. Nathanson. 1,784,496; Dec. 9.
Cushion tread for footwear. C. Roberts. 1,783,980; Dec. 9.
Cutter: *See*—
  Cream cutter. Weed cutter.
  Stalk cutter.
Cylinder lock. R. G. M. Homolle. 1,784,444; Dec. 9.
Cylinders, Ejector for cutting. J. P. Feeney. 1,784,487; Dec. 9.
Damper, Automatic pipe. R. L. Meyers. 1,784,608; Dec. 9.
Decorative fabric. A. L. Courter. Des. 82,728–32; Dec. 9.
Delivery mechanism for signature-stitching machines. F. J. Greene. 1,784,590; Dec. 9.
Demountable structure. L. M. Parker. 1,784,107; Dec. 9.
Dental lathe and vibrator, Combined. E. A. Nelson and C. E. Larson. 1,784,307; Dec. 9.
Dental supplies, Package of. W. A. Weaver. 1,784,646; Dec. 9.
Derrick. J. W. Brown. 1,784,572; Dec. 9.
Device for carrying heavy bodies on and releasing them from aircraft. A. E. Jones. 1,784,011; Dec. 9.
Die, Forming. R. J. Curtis. 1,784,579; Dec. 9.
Diestock. R. E. Hyde. 1,784,099; Dec. 9.
Diestock, Stamped. R. E. Hyde. 1,783,964; Dec. 9.
Dispensing cartridge, Medicament-. H. S. Cook. 1,783,956; Dec. 9.
Display device. A. W. Johnson. 1,784,597; Dec. 9.
Display rack for ornamental tile. A. B. Coleman. 1,784,577; Dec. 9.
Dolls and like toys, Eye set for. S. Marcus and A. Konoff. 1,784,531; Dec. 9.
Dolls, Eye mounting for. L. J. Grubman. 1,784,519–20; Dec. 9.
Door, Double overhead. C. G. Johnson. 1,784,292; Dec. 9.
Door-opening device. W. Miller. 1,784,374; Dec. 9.
Door, Silo. E. F. Zuber and F. A. Dowling. 1,783,992; Dec. 9.
Dough-dividing apparatus. F. H. Van Houten. 1,784,559; Dec. 9.
Drawworks, Two-post, two-speed, three-shaft portable. E. Timbs and L. E. Zerbe. 1,783,988; Dec. 9.
Drier: *See*—
  Coal drier.
Drill apparatus, Multiple-. W. P. Hunt. 1,784,288; Dec. 9.
Drilling apparatus. J. S. Mitchell. 1,784,154; Dec. 9.
Drilling apparatus. L. H. Wellensiek. 1,784,404; Dec. 9.
Drive, Automotive. T. Jensen. 1,784,524; Dec. 9.
Drive for grinder wheels, Electric. A. G. Decker. 1,784,133; Dec. 9.
Drive for motor boats. K. Haussmann. 1,784,354; Dec. 9.
Dump body, Vehicle. R. T. Osman. 1,784,464; Dec. 9.

Dyes and producing the same, Trisazo. H. E. Woodward. 1,784,617; Dec. 9.
Dyestuffs, Azo. K. Thiess. 1,784,398; Dec. 9.
Dyestuffs from dihalogeno-alkylisatins, Indigoid vat. C. Krauss. 1,784,452; Dec. 9.
Dyestuffs, New azo. E. Fellmer. 1,784,343; Dec. 9.
Dynamo-electric machine. J. F. Lincoln and E. E. Dreese. 1,784,102; Dec. 9.
Earth lenkages in alternating-current lines, Apparatus for controlling and indicating. M. Schleicher. 1,784,546; Dec. 9.
Electric controller, Liquid. H. Brooke. 1,784,332; Dec. 9.
Electric furnace. A. Imbery. 1,784,670; Dec. 9.
Electric-light-bulb jacket or similar article. H. E. Bleier. Des. 82,724; Dec. 9.
Electric signal. M. F. Alder. 1,784,326; Dec. 9.
Electric switch. C. Bramming. Re17,897; Dec. 9.
Electric switch. V. R. Despard. 1,784,514; Dec. 9.
Electric switch. J. D. Hilliard. 1,784,669; Dec. 9.
Electric switch. J. S. Lawson. 1,784,735; Dec. 9.
Electric switch, Single-button. L. H. Harlow. 1,784,437; Dec. 9.
Electrical connecter. B. P. McKinley. 1,784,020; Dec. 9.
Electrical connection device. H. B. Jones. 1,784,236; Dec. 9.
Electrical indicating instrument. I. W. Brogger. 1,784,417; Dec. 9.
Electrical regulator. R. D. Parry. 1,784,642; Dec. 9.
Electrode for electrolytic condensers and the like. R. D. Mershon. 1,784,532; Dec. 9.
Engine: *See*—
Internal-combustion engine. Rotary engine.
Engine construction. A. D. MacFarlane. 1,784,192; Dec. 9.
Engine drive mechanism. R. Abell. 1,784,409; Dec. 9.
Engine, Securing means for internal-combustion. J. J. McBride. 1,784,461; Dec. 9.
Ethers, Manufacturing aminonaphthol. A. Zitscher. 1,784,408; Dec. 9.
Excelsior-cutting machine. J. L. Monkhouse. 1,784,305; Dec. 9.
Exercising device. A. M. Webb. 1,784,082; Dec. 9.
Exercising machine. E. L. Hyde. 1,784,289; Dec. 9.
Exhibition bench. A. Hartmann. 1,784,438; Dec. 9.
Exhibitor, Automatic. P. E. McFarland. 1,784,607; Dec. 9.
Exhibitor, Changeable. E. von der Lippe-Lipski. 1,784,364; Dec. 9.
Fabric: *See*—
Wire fabric.
Fan, Electric. M. F. Oliver. 1,784,072; Dec. 9.
Fastener, Shiftable. D. I. Reiter. 1,784,389; Dec. 9.
Fastening means for cables. J. R. Kearney. 1,783,968; Dec. 9.
Fat or other material from gases, Apparatus for separating. G. W. F. Catlin. 1,784,418; Dec. 9.
Feed-regulating mechanism, Pneumatic. P. Davidson. 1,784,483; Dec. 9.
Fibrous material and article produced thereby, Rubberizing. E. Hopkinson. 1,784,523; Dec. 9.
Filing appliance. W. E. Dunning. 1,784,584; Dec. 9.
Film, Cellulose. S. E. Sheppard and J. G. McNally. 1,784,758; Dec. 9.
Film cut-out. H. E. Butler. 1,784,656; Dec. 9.
Film formation and operation of electrolytic condensers and other apparatus. R. D. Mershon. 1,784,674; Dec. 9.
Filter, Gasoline. M. E. E. Dardani. 1,784,622; Dec. 9.
Filter more particularly for artificial-silk-spinning machines, Exchangeable. W. Zur Löwen. 1,784,103; Dec. 9.
Filter-sand-washing machine. M. L. Bayard. 1,784,798; Dec. 9.
Filtering and cleaning filters, Method and apparatus for. L. L. Dollinger. 1,784,278; Dec. 9.
Filtering apparatus. F. Clasen and H. Lenckerstorf. 1,784,339; Dec. 9.
Filtering apparatus, Electrical. P. H. Geiger and L. O. Grondahl. 1,784,004; Dec. 9.
Filters, Cake-discharging means for pressure. J. A. McCaskell. 1,784,372; Dec. 9.
Filtration system. C. T. Cabrera. 1,784,132; Dec. 9.
Fire-alarm and watchman's recording box, Combination. F. B. Love and B. H. Smith. 1,784,530; Dec. 9.
Firearm, Self-defense. J. H. Westlund. 1,784,563; Dec. 9.
Firearm with two cartridge magazines, Automatic. F. Herlach and T. Rakula. 1,784,355; Dec. 9.
Fire-extinguisher unit. P. Evans and M. P. Stoney. Des. 82,735; Dec. 9.
Fire-extinguishing foam, Method of and system for generating. D. W. Patterson. 1,784,680; Dec. 9.
Fixture, Curtain. J. L. Mohun and H. Piesch. 1,784,375; Dec. 9.
Flexible structure. F. Döppenchmitt. 1,784,582; Dec. 9.
Flour. Process of and apparatus for milling. L. E. Smith. 1,784,762; Dec. 9.
Foldable chair. H. E. Rice. 1,784,390; Dec. 9.
Folding or other device. D. J. Scott. 1,784,757; Dec. 9.
Folding table. T. S. Walker. 1,784,507; Dec. 9.
Footwear. F. F. von Wilmowsky. 1,784,035; Dec. 9.
Form, Expansible toe. W. J. De Witt. 1,784,660; Dec. 9.
Form, Shoe. W. J. De Witt. 1,784,661–2; Dec. 9.
Frame: *See*—

Insulators, Apparatus for making. K. A. Hawley. 1,784,792; Dec. 9.
Insulators, Manufacture of. D. H. Rowland. 1,784,392; Dec. 9.
Internal-combustion engine. L. S. Tisdale. 1,784,712; Dec. 9.
Ironing board. L. E. Watts. 1,784,715; Dec. 9.
Ironing machine. G. A. Piepenbring. 1,784,200; Dec. 9.
Jack: *See*—
Hydraulic jack.
Jack. J. M. Cantwell. 1,784,574; Dec. 9.
Jewelry. J. Kreisler. 1,784,635; Dec. 9.
Joint: *See*—
Ball-and-socket joint. Rail joint.
Lock joint.
Joint for molds operating by centrifugal force. P. Ferrier. 1,784,344; Dec. 9.
Journal box, Railway-car. F. Maxant. 1,784,069; Dec. 9.
Keto compounds, Reducing organic. E. Münch. 1,784,379; Dec. 9.
Key: *See*—
Grate key.
Knife guard. P. D. Callum. 1,784,334; Dec. 9.
Knitting machine. K. Howie. 1,784,186; Dec. 9.
Knitting machines and the like, Electric stop mechanism for. J. Wachsman. 1,784,560; Dec. 9.
Knitting machines, Detector mechanism for. R. G. Jennings. 1,784,446; Dec. 9.
Lace. B. A. Ball. Des. 82,721; Dec. 9.
Lacing device for corsets and like articles. J. Lindauer. 1,784,458; Dec. 9.
Ladder. M. Bauer. 1,784,413; Dec. 9.
Laminated sheet atructure. E. B. Carns. 1,784,511; Dec. 9.
Lamp. C. S. Ricker. 1,784,539; Dec. 9.
Lamp, Automobile running-board. W. A. Gullette. 1,784,668; Dec. 9.
Lamp, Battery hand. W. B. Schulte. 1,784,114; Dec. 9.
Lamp, Floor-type therapeutic. F. A. Anderson. Des. 82,776; Dec. 9.
Lamp for motor and like vehicles. M. Swenson, jr. 1,784,320; Dec. 9.
Lamp-stand, Bracket. A. A. Witz. Des. 82,771; Dec. 9.
Lamp, Table therapeutic. F. A. Anderson. Des. 82,775; Dec. 9.
Lapping machine, Automatic. H. J. Wills. 1,784,648; Dec. 9.
Last, C. I. Lander. 1,784,454; Dec. 9.
Last, Boot. G. J. Demoucron. 1,784,181; Dec. 9.
Latch, Sash. J. F. Levan. 1,784,147; Dec. 9.
Laundry machine. A. W. Altorfer. 1,784,564; Dec. 9.
Lavatory or washstand. W. H. Oldfield. 1,784,641; Dec. 9.
Lawn-trimming device. G. F. Minikhiem. 1,784,022; Dec. 9.
Lead-bearing material, Treating. A. Stewart. 1,783,986; Dec. 9.
Lettering machine. L. McDonald. 1,784,152; Dec. 9.
Level, Double-reading plumb. J. and O. A. Sinner. 1,784,550; Dec. 9.
Light, floor light, or skylight, Vault. L. W. Mulford. 1,784,678; Dec. 9.
Light rays, Apparatus for the projection of. G. Thornton-Jones. 1,784,357; Dec. 9.
Lighter, Table. C. H. Lawrence. Des. 82,749; Dec. 9.
Lighting having a daylight effect, Artificial. H. Bertling. 1,784,171; Dec. 9.
Limit switch. C. R. Kelty. 1,784,672; Dec. 9.
Lingerie clasp. M. Crawford. 1,784,482; Dec. 9.
Linking machine. J. B. Valton. 1,784,713; Dec. 9.
Liquid-dispensing device. E. K. Skonberg. 1,784,795; Dec. 9.
Liquids, Control member for. P. W. Des Roches. 1,783,959; Dec. 9.
Listening and selecting apparatus. A. Bloch. 1,784,172; Dec. 9.
Lock: *See*—
Cylinder lock.
Lock. L. E. Miquet. 1,783,971; Dec. 9.
Lock. E. L. Teich. 1,784,208; Dec. 9.
Lock joint. L. D. Lovekin. 1,784,492; Dec. 9.
Lock washer. R. E. Clegg. 1,784,269; Dec. 9.
Locomotive-driving-rod journals, Method and mechanism for lubricating. R. S. Williams. 1,784,405; Dec. 9.
Locomotive sanding device. V. L. Frantz and O. O. Lemon. 1,784,051; Dec. 9.
Loom. L. Viscolosi. 1,784,400; Dec. 9.
Loom, Needle. F. E. Ashton. 1,783,994; Dec. 9.
Loom, Removing the harness and stopping instrumentalities from a. J. H. Becker. 1,784,127; Dec. 9.
Loud-speaker. M. R. Hutchison. 1,784,594; Dec. 9.
Loud-speaker and circuit therefor. C. L. Farrand. 1,784,486; Dec. 9.
Lubricating method and apparatus. R. R. Roberts. 1,783,981; Dec. 9.
Lubricating system for chain drives. D. B. Perry. 1,783,978; Dec. 9.
Lubrication by means of capillary elements, Apparatus for. M. Koehler. 1,784,732; Dec. 9.
Lubrication of internal-combustion engines. A. H. R. Fedden. 1,784,788; Dec. 9.
Lubricator for railway journal boxes. C. B. Royal. 1,784,542; Dec. 9.
Lumber and other materials, method of and apparatus for conditioning. G. D. Harris. 1,784,727; Dec. 9.
Machine for babbitting sleeve bearings. C. H. Leis. 1,784,146; Dec. 9.
Machine for cutting angular ends. E. J. O'Neill. 1,784,494; Dec. 9.
Machine for dyeing and treating yarn. J. H. Thompson. 1,784,399; Dec. 9.
Machine for manufacturing metal chain mail. E. Schofer. 1,784,254; Dec. 9.
Machine for production of pile fabrics. P. S. Smith and E. G. Jegge. 1,784,552; Dec. 9.
Machine for refolding paper trays or the like. S. Bergstein. 1,784,571; Dec. 9.
Machine for welding. J. S. Newell. 1,784,024; Dec. 9.
Machine for wrapping cigars and similar articles. F. Grover. 1,784,349; Dec. 9.
Mail box, Rural. J. B. Johnson. 1,784,447; Dec. 9.
Masonry, Anchorage in. H. Rosenberg. 1,784,754; Dec. 9.
Massaging device. L. A. Mekler. 1,784,301; Dec. 9.
Matches and match tape, Method of and machine for manufacturing. J. Rinne. 1,784,111; Dec. 9.
Material-handling apparatus. J. H. Kerber. 1,784,144; Dec. 9.
Material strip for spring-tooth lock washers. R. T. Hosking. 1,784,142; Dec. 9.
Materials from moving aircraft, Process and apparatus for atomizing. N. E. Oglesby and F. R. Weaver. 1,784,157; Dec. 9.
Matrix for typographical machines. I. Fujii. 1,784,789; Dec. 9.
Mattress. E. Kriege. 1,784,294; Dec. 9.
Measuring, Method and apparatus for. T. R. Harrison. 1,784,522; Dec. 9.
Meats, Tendering. P. J. Deacon. 1,784,580; Dec. 9.
Mechanical bucking horse. R. H. Fike. 1,784,183; Dec. 9.
Mechanical movement. N. L. Hammarström and E. A. Hoving. 1,784,185; Dec. 9.
Mechanical movement. E. Klahn. 1,784,450; Dec. 9.
Medicine. L. A. Wilson. 1,784,324; Dec. 9.
Metal articles, Coating. F. M. Becket. 1,784,570; Dec. 9.
Metal building construction, Sheet-. J. F. Loucks. 1,784,368; Dec. 9.
Metal, Cutting slots in. C. J. Coberly. 1,784,513; Dec. 9.
Metal reenforcement for timber poles. A. J. Wiley. 1,784,770; Dec. 9.
Meter-box lid. M. F. Smith. 1,784,551; Dec. 9.
Methanol from pyroligneous acid liquor, Removing. J. M. Coahran. 1,784,270; Dec. 9.
Metroscopic force-measuring instrument. R. Craig. 1,784,046; Dec. 9.

Mica tubes and sheets, Manufacture of. A. Lloyd. 1,784,737; Dec. 9.
Mill: *See*—
Rolling mill.
Minerals. Apparatus for agglomerating and roasting. A. de Samsonow. 1,784,658; Dec. 9.
Minerals by froth flotation, Concentration of. L. W. Ferris. 1,784,280; Dec. 9.
Mirror, Rear-vision. V. E. Showalter. 1,784,710; Dec. 9.
Mixer: *See*—
Concrete mixer.
Modulating system. J. J. Numans. 1,784,610; Dec. 9.
Moisture from vapor, Apparatus for separating. J. Hamill. 1,784,627; Dec. 9.
Mold and making the same, Pottery. W. J. Miller. 1,784,373; Dec. 9.
Mold for casting metal bodies, Compound. G. Bühler. 1,784,174; Dec. 9.
Mold for casting sulphur. W. von Dieterich. 1,784,769; Dec. 9.
Mold form construction. D. Bierhaalder. 1,784,329; Dec. 9.
Mold-pattern units, Positioning. T. J. Flack. 1,784,345; Dec. 9.
Molding apparatus for pneumatic tubes, tires, and the like. W. L. Fairchild. 1,784,623; Dec. 9.
Molding machine. W. Lewis. 1,784,457; Dec. 9.
Molds, Apparatus for preparing castnig. B. L. van der Lande and G. Komen. 1,784,714; Dec. 9.
Monosaccharide material. T. B. Wagner. 1,784,402; Dec. 9.
Motion-arresting means for motor-propelled vehicles. J. B. Kirby. 1,784,145; Dec. 9.
Motor-control switch. W. S. Edsall. 1,784,226; Dec. 9.
Motor driving mechanism, Wave. C. E. Garwood. 1,784,424; Dec. 9.
Motor for loud-speakers. C. L. Farrand. 1,784,517; Dec. 9.
Motor system, Induction synchronous. F. Jeffrey. 1,784,235; Dec. 9.
Mounting for automatic guns. C. A. Larsson. 1,784,016; Dec. 9.
Mounting for temperature-responsive elements. H. Schlaich. 1,784,756; Dec. 9.
Mower, Lawn. F. T. Farmer. 1,784,342; Dec. 9.
Mowing machine. A. L. Allen. 1,784,327; Dec. 9.
Musical alarm. H. Fahrenholtz. 1,784,049; Dec. 9.
Neckband for sweaters and the like, Corded-edge knit. C. Seidman. 1,784,548; Dec. 9.
Necktie. M. Halpern and W. Mayer. 1,784,351; Dec. 9.
Necktie structure. M. Halpern and W. Mayer. 1,784,352; Dec. 9.
Nest, Sanitary poultry. F. Lage. 1,784,101; Dec. 9.
Net-making machines, Operating mechanism for. S. Kakuda. 1,784,188; Dec. 9.
Nozzle, Cement-gun. E. C. Swann. 1,784,503; Dec. 9.
Nozzle, Lawn-sprinkler. P. E. Heal. Des. 82,745; Dec. 9.
Nut-tapping machine. D. Kelleher. 1,784,631; Dec. 9.
Odometer. J. Zubaty. 1,784,773; Dec. 9.
Oil burner. G. H. Bowler. 1,784,173; Dec. 9.
Oil burner. M. W. Wood. 1,784,771; Dec. 9.
Oil composition, Fatty-. C. F. Kaegebehn. 1,784,360; Dec. 9.
Oil composition, Mineral-. C. F. Kaegebehn. 1,784,359; Dec. 9.
Oil cracking, Method and apparatus for. J. H. Welch. 1,784,562; Dec. 9.
Oil, Dewaxing petroleum. L. D. Jones. 1,784,525; Dec. 9.
Oil from the shell of the cashew nut, Removing. E. R. Hughes. 1,784,628; Dec. 9.
Oil, Process and apparatus for the treatment of. D. G. Brandt. 1,784,087; Dec. 9.
Oil, Recovering and increasing the production of. P. E. Workman. 1,784,214; Dec. 9.
Oil-well-pulling machine. M. D. Perry. 1,784,311; Dec. 9.
Oiling system, Supercharger. D. Gregg. 1,784,433; Dec. 9.
Oils containing sulphur, Treating petroleum. C. J. Ziser and J. H. Osmer. 1,784,215; Dec. 9.
Oils, Distillation of hydrocarbon. G. W. Watts, P. L. Krauel, and T. E. Stockdale. 1,784,561; Dec. 9.
Ornament, Shoe. O. R. Recchia. Des. 82,759; Dec. 9.
Ornamental object, Illuminated. E. B. Wilson. 1,784,474; Dec. 9.
Ornamenting surfaces. C. J. O'Neil. 1,784,495; Dec. 9.
Ortho-amino-arylmercaptanes, Manufacturing. R. Herz and M. Schubert. 1,784,441; Dec. 9.
Oscillograph. F. E. Terman. 1,784,119; Dec. 9.
Oven, Coking retort. J. Becker. 1,784,414; Dec. 9.
Oven construction, Electric. F. W. Rogers. 1,784,753; Dec. 9.
Oven structure for electric ranges. G. E. Pickup. 1,784,201; Dec. 9.
Ozonizing apparatus. W. J. Smith. Des. 82,764; Dec. 9.
Package, wrapper, and method of applying wrappers to containers. J. S. Stokes. 1,784,317; Dec. 9.
Paddle, Buoy inflated swimming. M. F. Enke. 1,784,136; Dec. 9.
Pail, Sanitary milk. W. H. Swartz. 1,784,319; Dec. 9.
Paper-folding machine. O. Kleinschmit. 1,784,731; Dec. 9.
Paper machines, Drive for. F. Schiebuhr. 1,784,545; Dec. 9.
Paper-making machine. W. H. Millspaugh. 1,783,969–70; Dec. 9.
Paper mulch and reenforcing and retaining means therefor. D. P. Moore. 1,784,376; Dec. 9.
Paper napkin or the like. R. W. Beach. Des. 82,722; Dec. 9.
Paper of acid character, Filtering and decolorizing. W. S. Baylis. 1,784,509; Dec. 9.
Parachute, Elastically-deformable. L. Avorio. 1,784,774; Dec. 9.
Parachute harness. F. Smith. 1,784,162; Dec. 9.
Pattern-copying machine. E. F. Bonser. 1,783,951; Dec. 9.
Pencils, Apparatus for the manufacture of. W. H. Burden and R. E. Friedlein. 1,783,997; Dec. 9.
Pens, Device for automatically filling fountain. A. Simoni. 1,784,078; Dec. 9.
Petroleum vapors, Alkaline treatment of. R. C. Wheeler and P. W. Prutzman. 1,784,262; Dec. 9.
Phenols, Producing. H. Jordan, W. Schoeller, and R. Clerc. 1,784,599; Dec. 9.
Phonograph stop. W. C. Roe. 1,784,391; Dec. 9.
Phonographs, Double-control device for. W. Rebikoff. 1,784,159; Dec. 9.
Phonographs, Teaching attachment for. W. P. Kent. 1,784,489; Dec. 9.
Photographic cartridge. E. C. Fritts. 1,784,281; Dec. 9.
Photographic reproduction objective with two diaphragms and its application as in printing positives for black and white cinematography, color cinematography, or cinematography in relief. H. Chrétien. 1,783,998; Dec. 9.
Picture-printing machine. S. L. Briggs. 1,783,953; Dec. 9.
Picture-projecting apparatus, Motion-. C. M. Gottschau. 1,784,138; Dec. 9.
Picture projector, Motion-. A. C. Hayden. 1,784,097; Dec. 9.
Picture transmission, Phase-correct coupling for. A. Karolus. 1,784,526; Dec. 9.
Pigment, Producing a. D. V. Ault. 1,784,411; Dec. 9.
Pin: *See*—
Bouquet pin.
Pin magazine for bowling alleys. R. A. Williams. 1,784,084; Dec. 9.
Pipe connection. P. J. Lindgren. 1,784,637; Dec. 9.
Pipe for steam boilers, Dry. F. J. Martin. 1,784,638; Dec. 9.
Pipe suspender, Adjustable. J. R. Morris. 1,784,244; Dec. 9.
Pipe-vise stand. L. C. Young. 1,784,264; Dec. 9.
Pipes, Combined test T and expansion fitting for drainage and soil. E. Kennedy. 1,784,238; Dec. 9.
Piston. F. Jardine. 1,784,291; Dec. 9.
Piston and making same. R. R. Teetor. 1,784,505; Dec. 9.
Piston expander. W. R. McNabb, W. D. Farley and F. J. Starcher. 1,784,018; Dec. 9.
Plane, Amphibian. D. W. Douglas. 1,784,784; Dec. 9.
Plant for the vertical molding of concrete work. H. Fabre. 1,784,422; Dec. 9.
Plastics, Process and apparatus for dividing. S. Schiff. 1,784,113; Dec. 9.
Plow, Combination. G. P. Lucius. 1,784,738; Dec. 9.
Potato-cutting machine. J. A. and C. G. Bergren. 1,784,718; Dec. 9.
Potato gatherer for potato diggers. H. Timm. 1,784,209; Dec. 9.
Powder and colloiding same, Propellant. C. H. Keck. 1,784,189; Dec. 9.
Powdering machine. S. Lipsius. 1,784,459; Dec. 9.
Power take-off unit for tractors. L. J. Campbell. 1,784,088; Dec. 9.
Power transmission, Automatic. A. H. Neuland. 1,784,308; Dec. 9.
Power-transmission device. A. H. Neuland. 1,784,309; Dec. 9.
Press: *See*—
Printing press. Vulcanizing press.
Press for operating upon sheet material. A. Bredenberg. 1,784,721; Dec. 9.
Presses, Effecting rotary operations in step. E. B. Nier. 1,784,745; Dec. 9.
Presses, Motor drive for printing. H. A. W. Wood. 1,784,085; Dec. 9.
Printing-die structure. L. J. Zahn. 1,783,991; Dec. 9.
Printing machine. H. V. Ball. 1,784,412; Dec. 9.
Printing machine, Photographic process. W. J. Synder. 1,784,206; Dec. 9.
Printing press. O. H. Wolf. 1,784,037; Dec. 9.
Projection screen. D. F. Newman. 1,783,973; Dec. 9.
Propeller shaft. N. F. Hadley. 1,784,436; Dec. 9.
Pulley. G. W. Aldeen. 1,783,993; Dec. 9.
Pulley mount. J. M. Gwinn, jr., and R. E. Oversmith. 1,784,521; Dec. 9.
Pulp production and refining, Wood-. L. A. Braun. 1,784,039; Dec. 9.
Pulverizing process and apparatus. W. B. Pedelty. 1,783,975; Dec. 9.
Pump. J. M. Phillips. 1,784,706; Dec. 9.
Pump for internal-combustion engines, Fuel. J. Benes. 1,784,170; Dec. 9.
Pump, Liquid-dispensing. E. E. Eickmeyer. Des. 82,734; Dec. 9.

Pump, Tire. R. B. Jordan. 1,784,143; Dec. 9.
Pumps, Controller for power-driven. E. W. Seeger. 1,784,205; Dec. 9.
Pumps, Shaft-tubing sustaining device for deep-well. J. A. Wintroath. 1,784,406; Dec. 9.
Putlog. T. H. Kingston. 1,784,601; Dec. 9.
Quenching tank. H. W. Fletcher. 1,784,095; Dec. 9.
Rack: *See*—

Projection screen.
Screw cap. H. J. Carr. 1,784,089; Dec. 9.
Screw, Self-locking. C. G. Olson. 1,784,026; Dec. 9.
Screw, Set. G. A. Moore. 1,784,377; Dec. 9.
Seal, Leak-preventing. M. Masterson, and O. Markel. 1,784,104; Dec. 9.
Seal, Liquid. C. T. Kemp, and N. E. Ryckman. 1,784,100; Dec. 9.
Seat: *See*—
Car seat. Toilet seat.
Stool seat.
Seat assembly. W. Marshall, and L. S. Woodhull. 1,784,241; Dec. 9.
Seat covers and the like, Attaching. G. A. King. 1,784,361; Dec. 9.
Securing means. G. E. Roedding. 1,784,204; Dec. 9.
Seed-corn stringer. M. Holum. 1,784,690; Dec. 9.
Seismograph, Electrical recording. H. Benioff. 1,784,415; Dec. 9.
Separator. F. Eickholt. 1,784,664; Dec. 9.
Setting gauge. G. A. De Vlieg. 1,784,093; Dec. 9.
Sewer inlets, Apparatus for automatic opening and closing of. O. Rocas. 1,784,076; Dec. 9.
Sewing-machine attachment. R. J. Sailer. 1,784,614; Dec. 9.
Sewing-machine feed. J. Garde. 1,784,724; Dec. 9.
Sewing-machine presser foot. A. J. Carmichael, and O. Balzano. 1,784,177; Dec. 9.
Sewing machines, looper-actuating mechanism for. A. B. Clayton. 1,784,512; Dec. 9.
Shade and awning, Combined. E. E. McGrew. 1,784,300; Dec. 9.
Shade, Lamp. I. E. de Sherbinin. 1,784,048; Dec. 9.
Shears: *See*—
Automatic shears.
Sheet feeder. H. Ehlig. 1,783,962; Dec. 9.
Sheet-feeding device. C. E. Christophel. 1,784,835–6; Dec. 9.
Sheet piling. C. Beaujean. 1,784,777; Dec. 9.
Shock absorber. J. P. Baldwin and C. Garver. 1,784,328; Dec. 9.
Shock absorber. P. Grabler. 1,784,005; Dec. 9.
Shock absorber. L. L. Lomar. 1,784,529; Dec. 9.
Shock absorber. H. Ludwig. 1,784,191; Dec. 9.
Shock reducer for vehicles provided with leaf springs. H. F. J. Bernaerts. 1,784,128; Dec. 9.
Shoe. R. A. Selby. Des. 82,761; Dec. 9.
Shoe and making same. A. L. Fried. 1,784,806; Dec. 9.
Shoe, Arch or truss. L. Davidson. 1,783,958; Dec. 9.
Shoe stretcher. I. Fantino. 1,784,341; Dec. 9.
Shoes, Leveling. C. I. Lander. 1,784,455; Dec. 9.
Shuttles, Adjustable gripper for. W. H. Bahan. 1,784,266; Dec. 9.
Sign. W. F. Morton. 1,784,704; Dec. 9.
Sign, Animated. E. von der Lippe-Lipski. 1,784,365; Dec. 9.
Sign, Illuminated. B. Emis. 1,783,963; Dec. 9.
Sign, Sectional illuminated. B. A. Morton. 1,784,677; Dec. 9.
Signal: *See*—
Electric signal
Signaling Submarine. R. D. Fay and H. G. Dorsey. 1,784,137; Dec. 9.
Signaling system. W. A. Tolson. 1,784,645; Dec. 9.
Sinkers for knitting machines, Manufacturing. H. E. Stout. 1,784,256; Dec. 9.
Skate, Roller. J. T. Smith. 1,784,761; Dec. 9.
Skins, Plating. A. C. Brill. 1,783,952; Dec. 9.
Snowplow. E. A. Brattlien. 1,784,331; Dec. 9.
Soap, Cake of. C. A. Crary. Des. 82,777; Dec. 9.
Socket, Electric-lamp. H. Hertzberg. 1,784,440; Dec. 9.
Socket fitting, Electric. L. Propp. 1,784,388; Dec. 9.
Solar radiations for therapeutic purposes, Apparatus for utilizing. A. P. Ousdal. 1,784,382; Dec. 9.
Speed-control device, Variable-. H. L. Tanner. 1,784,504; Dec. 9.
Spindles in textile-spinning machines, Driving. J. Berlinerbau. 1,784,719; Dec. 9.
Spinning machines, Driving means for the rollers of. P. Devaux. 1,784,659; Dec. 9.
Split segmental washer. A. F. Gillet. 1,784,667; Dec. 9.
Spoon, Beater. G. A. Carlson. 1,784,575; Dec. 9.
Spoon or similar article. G. N. Allen, M. G. Parker, and E. H. Kreps. Des. 82,719; Dec. 9.
Spray-cooling device. L. T. Mart. 1,784,019; Dec. 9.
Spraying device. L. A. Moffet. 1,784,243; Dec. 9.
Spring clip. J. Barnes. 1,784,717; Dec. 9.
Sprinkler: *See*—
Rotary sprinkler.
Sprinkler. J. T. Plumer. 1,784,251; Dec. 9.
Stage-lift flowing device. A. Boynton. 1,784,720; Dec. 9.
Stalk cutter. C. R. Alexander. 1,784,410; Dec. 9.
Stand: *See*—
Fruit-packing stand. Pipe-vise stand.
Stand for portable typewriters, Foldable copy. P. Schano. 1,784,253; Dec. 9.
Starter, Engine. R. P. Lansing. 1,784,190; Dec. 9.
Stator for dynamo-electric machines and making the same. A. P. Wood. 1,784,649; Dec. 9.
Stators for dynamo-electric machines, Making. H. G. Reist. 1,784,643; Dec. 9.
Steam, Apparatus for and method of generating. H. Gleichmann. 1,784,426; Dec. 9.
Steam-generating furnace. T. F. Downey and J. Donald. 1,784,134; Dec. 9.
Steam generator. W. R. Wood. 1,784,407; Dec. 9.
Steam generator or water heater. T. Clarkson. 1,784,338; Dec. 9.
Steam trap. J. Messmer. 1,784,153; Dec. 9.
Steel and rubber article, Composite. B. Bronson. 1,784,781; Dec. 9.
Steering device, Trailer-. L. E. Williams. 1,784,263; Dec. 9.
Steering gear. F. F. Chandler. 1,784,044; Dec. 9.
Steering mechanism for coaster wagons. F. Leicht. 1,784,017; Dec. 9.
Steering sight adapted to be fitted to the mudguards of motor vehicles. O. Rensonnet. 1,784,466; Dec. 9.
Steering wheel. H. T. Kraft. 1,784,733; Dec. 9.
Stenciling apparatus. E. R. Van Bergen. 1,784,616; Dec. 9.
Stereoscopic views, System for mounting. A. W. Engel. 1,784,227; Dec. 9.
Stirrup, Walking-beam. H. H. Franks. 1,784,003; Dec. 9.
Stoker, Mechanical. W. M. Duncan. 1,784,001; Dec. 9.
Stone spreader. D. M. Renton, E. N. Long, jr., and A. E. Murphy. 1,784,202; Dec. 9.

Stool seat. L. M. Michelson and J. L. Haynes. 1,784,021; Dec. 9.
Stop, Auxiliary air-pressure. E. J. Olsen. 1,784,705; Dec. 9.
Stop for sawmill-carriage headblocks, Adjusting. C. A. Carbaugh. 1,784,175; Dec. 9.
Storage and lock-up frame, Type-form. F. W. Muller. 1,784,533; Dec. 9.
Store-front construction. F. and I. Himmel. 1,784,689; Dec. 9.
Stove, Oil heating. W. L. Cooper. 1,784,000; Dec. 9.
Strap: *See*—
Watch strap.
Strap-stretching device. R. H. Norton. 1,784,025; Dec. 9.
Submarine, Rescue. L. Y. Spear. 1,784,500; Dec. 9.
Subterranean surveys, Making. H. C. Hayes. 1,784,439; Dec. 9.
Sulphonic compound and making same, Organic metallo mercapto. W. Schoeller, E. Borgwardt, and A. Feldt. 1,784,497; Dec. 9.
Superheater, Locomotive. J. E. Muhlfeld and J. C. Chapple. 1,784,378; Dec. 9.
Support and oil stove, Oil-can. G. W. West. 1,784,716; Dec. 9.
Support, Christmas-tree. V. Dahl. 1,784,090; Dec. 9.
Support, Collapsible basket. W. A. Lynds. 1,784,240; Dec. 9.
Support, Easel. S. Lear. 1,784,736; Dec. 9.
Support for railway-car side doors, Adjustable. V. E. Sisson. 1,784,029; Dec. 9.
Support, Locomotive-boiler. E. O. Elliott. 1,784,787; Dec. 9.
Support, Pump-motor. P. A. Myers. 1,784,245; Dec. 9.
Support, Swiveled lamp-shade. F. J. Murphy. 1,784,306; Dec. 9.
Support, Thermostat. W. W. Carson. 1,784,042; Dec. 9.
Support, Thermostat. T. R. Clark. 1,784,045; Dec. 9.
Support, Thermostat. J. V. Giesler. 1,784,058–9; Dec. 9.
Surfacing machine. J. H. Fox and W. Owen. 1,783,960; Dec. 9.
Swab, Fluid-operated. H. W. Fletcher. 1,784,096; Dec. 9.
Sweeper. J. L. Aultman. 1,784,567; Dec. 9.
Switch: *See*—
Coin-controlled switch. Motor-control switch
Electric switch. Rectifying switch.
Limit smitch.
Switch. E. N. Jacobi. 1,784,290; Dec. 9.
Switch for electric grinders, Valve-controlled. H. Meyer. 1,784,493; Dec. 9.
Switch for electric motors, Governor. F. Meyer. 1,784,675; Dec. 9.
Switch mechanism, Electric snap-. W. C. Stevens and G. J. Meuer. 1,784,207; Dec. 9.
Switches, Conditioning electric. R. A. Millikan and R. W. Sorensen. 1,784,302; Dec. 9.
Table: *See*—
Folding table.
Table. W. A. French. Des. 82,739; Dec. 9.
Table and ironing board, Combined. A. H. Kennedy. 1,784,449; Dec. 9.
Tank: *See*—
Quenching tank. Vacuum tank.
Tank-vent device. J. B. Holtson. 1,784,067; Dec. 9.
Target, Golfer's practice. G. Lester. 1,784,363; Dec. 9.
Telephone device, Sanitary. C. Miller. 1,784,700; Dec. 9.
Telephone system. F. Merk. 1,784,698; Dec. 9.
Temperature recorder, Continuous iron-. H. W. Dietert. 1,784,420; Dec. 9.
Temperature regulator. J. V. Giesler. 1,784,062–3; Dec. 9.
Tempering furnace, Rotary. E. Goerig. 1,784,427; Dec. 9.
Testing device for impulse senders. T. P. Preist. 1,784,612; Dec. 9.
Textile fabric. V. Hamill. Des. 82,744; Dec. 9.
Textile fabric. C. F. Pearce, jr. No. 82,757; Dec. 9.
Textile machines, Clearer and slub catcher for. W. M. Hastings. 1,784,141; Dec. 9.
Textile products with reduced lustre, Preparing artificial. T. Koch. 1,784,014; Dec. 9.
Thermostat. B. J. Pepper. 1,784,465; Dec. 9.
Threadless coupling. M. Schawrow. 1,784,393; Dec. 9.
Throttle mechanism for internal-combustion engines. F. Jehle. 1,784,671; Dec. 9.
Thumb guard, Manicurists'. M. V. Shane. 1,783,984; Dec. 9.
Thymol, Production of. H. Jordan, W. Schoeller, and R. Clerc. 1,784,598; Dec. 9.
Tie: *See*—
Cord tie. Railway tie.
Tie for cards, sheets, etc. F. C. Many. 1,784,299; Dec. 9.
Timing apparatus. E. Spengeman. 1,784,031; Dec. 9.
Tin contained in the residues of tin-plate manufacture, Recovery of the. J. H. Laley. 1,784,490; Dec. 9.
Tire and marking the same. V. L. Smithers. 1,784,118; Dec. 9.
Toilet seat. J. W. Bishop. 1,784,619; Dec. 9.
Toilet seat. B. C. Booth. 1,784,620; Dec. 9.
Toilet seat. B. C. Booth. 1,784,807; Dec. 9.
Tool, Automobile. G. E. Swanby. 1,784,033; Dec. 9.
Tool, Combination. N. Jenkins. 1,784,488; Dec. 9.
Tool, Garden. A. Pearson. 1,784,108; Dec. 9.
Tool, Sealing. R. E. Westphal. 1,784,213; Dec. 9.
Tool-securing device. E. L. Hurd and C. B. Tibbetts. 1,783,961; Dec. 9.
Tools, Front head for pneumatic. J. H. Jowett. 1,784,012; Dec. 9.
Tooth, Artificial. F. S. Trusler. 1,784,322; Dec. 9.
Top, Convertible automobile. B. B. Ellerbeck. 1,784,279; Dec. 9.
Top, Folding. J. Boca. 1,784,779; Dec. 9.
Top, Pulling hand. C. D. Bell. 1,784,684; Dec. 9.
Toy. J. E. Kline. 1,784,692; Dec. 9.
Toy airplane landing gear. H. T. Kingsbury. 1,784,730; Dec. 9.
Toy bomber, Aircraft. F. A. Berg. 1,783,949; Dec. 9.
Toy construction. H. L. Kraeft. 1,784,634; Dec. 9.
Toy construction, Sheet-metal. H. L. Kraeft. 1,784,633; Dec. 9.
Toy grasshopper. R. A. Blake. 1,783,996; Dec. 9.
Toy tracks, Automatic signaling means for. H. S. Becker. 1,784,778; Dec. 9.
Tractor pilot structure. O. T. Nichol. 1,784,534; Dec. 9.
Tractors, Loading attachment for. C. Underland. 1,784,558; Dec. 9.
Transfer-binding case and release stand therefor. R. F. Power. 1,784,315; Dec. 9.
Transformer. A. J. Sorensen. 1,784,030; Dec. 9.
Transformer, High-frequency. H. G. and H. A. Maerlender. 1,784,297; Dec. 9.
Transit apparatus. J. A. Harriss. 1,784,728; Dec. 9.
Transmission, Automatic. C. G. Mitchell. 1,784,742; Dec. 9.
Transmission, Gear. F. W. Hild. 1,784,593; Dec. 9.
Trap: *See*—
Steam trap.
Tray, Barrel-conveying. K. F. Snow. 1,784,615; Dec. 9.
Truck. G. Parker. 1,784,746; Dec. 9.
Truck on which boosters are mounted, Engine. H. Glaenzer. 1,784,790; Dec. 9.
Tubes, Packing. L. M. Littlefield. 1,784,366; Dec. 9.
Typewriting machine. G. O. Degener. 1,784,047; Dec. 9.
Umbrella. C. R. Moses. 1,783,972; Dec. 9.
Underwear or athletic pants. F. H. Negley. 1,784,744; Dec. 9.
Upholstery, Method and apparatus for filling. J. Ledwinka. 1,784,456; Dec. 9.
Vacuum tank. C. S. Burton. 1,784,129–30; Dec. 9.
Valve. F. J. O'Stroske. 1,784,381; Dec. 9.
Valve-actuating mechanism. C. C. Williams. 1,784,036; Dec. 9.
Valve-actuation means, Poppet-. R. E. and R. E. Wilson. 1,784,123; Dec. 9.
Valve assembly. J. J. McBride. 1,784,460; Dec. 9.
Valve control, Hydrothermostatic. J. J. Lawler. 1,784,734; Dec. 9.
Valve, Dump and seal tubing. H. F. Fortinberry. 1,784,050; Dec. 9.
Valve for oil-well pumps. C. P. Kirkpatrick. 1,784,602; Dec. 9.
Valve for wells, Capping-device. J. W. Hall. 1,784,007; Dec. 9.
Valve, Measuring. A. Slaten. 1,784,255; Dec. 9.
Valve mechanism. J. V. Giesler. 1,784,053; Dec. 9.
Valve mechanism for internal-combustion engines. H. H. Eslinger. 1,784,421; Dec. 9.
Valve mechanism, Hydraulic. C. B. Summers. 1,784,767; Dec. 9.
Valve mechanism, Thermostatically-controlled. W. W. Carson, jr. 1,784,041; Dec. 9.
Valve mechanism, Thermostatically-controlled. J. V. Giesler. 1,784,054–5; Dec. 9.
Valve mechanism, Thermostatically-controlled. J. V. Giesler. 1,784,057; Dec. 9.
Valve mechanism, Thermostatically-controlled. J. V. Giesler. 1,784,061; Dec. 9.
Valve mechanism, Thermostatically-controlled. J. V. Giesler, W. W. Carson, jr., and T. R. Clark. 1,784,056; Dec. 9.
Valve mechanism, Thermostatically-controlled. W. F. Searle, jr. 1,784,077; Dec. 9.
Valve-operating means. H. W. Fletcher. 1,784,094; Dec. 9.
Valve, Poppet. W. Noble. 1,784,640; Dec. 9.
Valve-stem guide. W. L. Ackley. 1,784,086; Dec. 9.
Valve structure. O. J. Leins. 1,784,636; Dec. 9.
Valve unit, Thermostatically-controlled. J. V. Giesler. 1,784,060; Dec. 9.
Valves from sticking, Means to prevent. C. E. Summers. 1,784,555; Dec. 9.
Vapor-pressure gauge. P. M. Gelatt. 1,784,052; Dec. 9.
Vehicle, Child's. W. B. Miles. Des. 82,750–4; Dec. 9.
Vehicle, Motor. C. Berg. 1,784,995; Dec. 9.
Vehicle, Motor. L. R. Buckendale and C. A. Peirce. 1,784,268; Dec. 9.
Vending machine, Coin-controlled. J. H. Farrar. 1,784,587; Dec. 9.
Ventilating device. A. Cauchemont. 1,784,783; Dec. 9.
Ventilator. H. C. Hueglin. 1,784,234; Dec. 9.
Vessel and auxiliary boat therefor. E. J. Shoemaker. 1,784,549; Dec. 9.
Vessels, Manufacturing electrically-welded. H. Stresau. 1,784,080; Dec. 9.
Vibration conductor for the deaf. E. Guerin. 1,784,350; Dec. 9.
Violin bow. C. C. Augustine. 1,784,038; Dec. 9.
Volume regulator, Constant. L. R. Huff. 1,784,009; Dec. 9.

Vulcanization accelerator. H. A. Morton. 1,784,703; Dec. 9.
Vulcanizing press. B. L. Bronson. 1,784,780; Dec. 9.
Washer: *See*—
Lock washer. Split segmental washer.
Washing device. S. R. Wagel. 1,784,401; Dec. 9.
Washing machine. J. H. Draper. 1,784,663; Dec. 9.
Washing machine. L. A. Schurr and F. Breckenridge. 1,784,316; Dec. 9.
Watchcase. F. Baumgartner. 1,784,169; Dec. 9.
Watch strap, Wrist-. I. R. Lederer. 1,784,239; Dec. 9.
Water-gas process. T. W. Stone. 1,784,765; Dec. 9.
Water-gauge guard. W. A. Newman. 1,784,247; Dec. 9.
Water heater. E. L. Badger. 1,784,652; Dec. 9.
Water heater, Electric. W. S. Lang. 1,784,695; Dec. 9.
Webs of flexible material, Coating and impregnating. E. Weinheim. 1,784,797; Dec. 9.
Wedge-cutting machine. E. R. Pollard. 1,784,028; Dec. 9.
Weed cutter. E. Stauverman. 1,784,163; Dec. 9.
Weeder with tractor hitch, Gang. R. M. Largent. 1,784,362; Dec. 9.
Weight-checking device. D. W. Ripley. 1,784,540; Dec. 9.
Weight, Paper. W. C. Porter. 1,784,707; Dec. 9.
Welding apparatus, Arc-. F. Lane and H. J. Morgan. 1,784,015; Dec. 9.
Wheel: *See*—
Steering wheel.
Wheel-breaking machine. E. C. Stolberg. 1,784,471; Dec. 9.
Wheel disks, Forming vehicle. W. N. Booth. 1,784,218; Dec. 9.
Wheel retainer. M. L. Bowers. 1,784,330; Dec. 9.
Wheels, Apparatus for and method of fabricating. J. W. Hughes. 1,784,445; Dec. 9.
Wheels, Hand-grip attachment for steering. J. C. Freeman. 1,784,230; Dec. 9.
Wheels, Precision dressing apparatus for grinding. G. Weidner. 1,784,216; Dec. 9.
Wheels, Traction attachment for vehicle. F. Rightmire. 1,784,681; Dec. 9.
Whirligig. P. S. Coles. 1,784,179; Dec. 9.
Window frame. L. B. Reeb. 1,784,751; Dec. 9.
Wire and its manufacture, Woven. M. H. Durand. 1,784,786; Dec. 9.
Wire fabric, Chain link. A. A. G. Land. 1,784,453; Dec. 9.
Wire-stranding machine. M. Nigro and W. H. Blount. 1,784,105; Dec. 9.
Wire-stripping machine. C. B. Mahan and C. M. Weber. 1,784,298; Dec. 9.
Wire-twisting apparatus. A. Swanbaum. 1,784,318; Dec. 9.
Woodworking machine. E. Teutsch. 1,784,644; Dec. 9.
Wool with ester salts of leuco compounds of vat dyestuffs, Printing. W. Taussig. 1,784,768; Dec. 9.
Workbench. H. T. Hallowell. 1,784,726; Dec. 9.
Workboxes, Lid control for. W. Gillooly. 1,784,518; Dec. 9.
Work-holding implement. H. Greenberg. 1,784,589; Dec. 9.
Wrapper for a box or carton. H. E. Plishker. Des. 82,758; Dec. 9.
Wrapping machine, Lid-. H. B. Kleinsmith, F. R. Neely, and F. W. Doll. 1,784,632; Dec. 9.
Wrench. E. A. G. Werner. 1,784,123; Dec. 9.
Yarns or threads, and apparatus therefor, Manufacture of. W. A. Dickie, T. H. Platts, and L. Latham. 1,784,581; Dec. 9.
Yeast manufacture. J. H. Barrington. 1,784,618; Dec. 9.
Zinc and cadmium, Coating. A. Pacz. 1,784,106; Dec. 9.

CLASSIFICATION OF PATENTS

ISSUED DECEMBER 9, 1930

NOTE.—First number—class, second number—subclass, third number—patent number

2— 2: 1,784,148
14: 1,784,151
39: 1,784,458
72: 1,784,369
87: 1,784,158
90: 1,784,548
151: 1,784,351
1,784,352
193: 1,784,470
224: 1,784,744
228: 1,784,785
243: 1,784,285
4— 162: 1,784,749
197: 1,784,641
236: 1,784,619
237: 1,784,620
1,784,630
1,784,807
5— 357: 1,784,294

Astringents, astringent cerates, bleach creams, etc. A. P. Babcock Company. 278,426; Dec. 16; Serial No. 300,852; published Sept. 23, 1930.
Blood purifier, tonic, and alterative. E. F. Stentz. 278,405; Dec. 16; Serial No. 303,825; published Sept. 30, 1930.
Chemical composition. American Colloid Corporation. 278,412; Dec. 16; Serial No. 303,561; published Sept. 16, 1930.
Compound for use in permanent waving of the human hair, Liquid. W. G. Shelton Company. 278,419; Dec. 16; Serial No. 303,126; published Sept. 30, 1930.
Corn plasters. Allcock Manufacturing Co. 278,441; Dec. 16; Serial No. 286,096; published Sept. 30, 1930.
Cream, cough medicine, Epsom salts, etc., Cold. Independent Druggists' Alliance Distributing Co. 278,401; Dec. 16; Serial No. 303,892; published Sept. 30, 1930.
Creams, Skin. L. M. Kattelmann. 278,431; Dec. 16; Serial No. 295,263; published Sept. 16, 1930.
Dentifrices and remedies for certain diseases. Smith, Kline & French Company. 80,683; renewed Jan. 17, 1931.
Disinfectants and insecticides. Hygiene Products Limited. 278,413; Dec. 16; Serial No. 303,507; published Sept. 16, 1930.
Douche powder, Vaginal. R. T. Haller. 278,428; Dec. 16; Serial No. 299,574; published Sept. 16, 1930.
Extractive, Weight reducing. F. Llewellyn. 278,437; Dec. 16; Serial No. 304,504; published Sept. 23, 1930.
Germicidal substance. Sharp & Dohme, Incorporated. 278,435; Dec. 16; Serial No. 304,586; published Sept. 23, 1930.
Insecticide and disinfectants. H. Edelstein. 278,484; Dec. 16.
Laxative. P. P. Errante. 278,404; Dec. 16; Serial No. 303,843; published Oct. 7, 1930.
Lip sticks. Edna Wallace Hopper, Inc. 278,410; Dec. 16; Serial No. 303,568; published Sept. 23, 1930.
Medical preparation. J. W. Williams. 278,409; Dec. 16; Serial No. 303,587; published Sept. 30, 1930.
Medicated shields or pads for corns, Adhesive. Scholl Mfg. Co. Inc. 278,423; Dec. 16; Serial No. 304,110; published Sept. 16, 1930.
Medicinal herbs, a medicinal mineral, and an organic mineral. J. C. Bornfeldt. 278,422; Dec. 16; Serial No. 301,239; published Sept. 16, 1930.
Medicinal preparation. Kolo Springs Products Co. 278,415; Dec. 16; Serial No. 303,445; published Sept. 23, 1930.
Medicinal preparations. N. E. Long. 278,417; Dec. 16; Serial No. 303,332; published Sept. 16, 1930.
Medicinal product, Vitamin. Société des Usines Chimiques Rhone-Poulenc. 278,442; Dec. 16; Serial No. 285,232; published Oct. 7, 1930.
Medicinal solution and pharmaceutical preparation. Ichthyol Co. 278,443; Dec. 16; Serial No. 285,155; published Nov. 19, 1929.
Medicine. R-B Pharmacal Co. Inc. 278,408; Dec. 16; Serial No. 303,726; published Oct. 7, 1930.
Medicines. K. Nakashima. 278,414; Dec. 16; Serial No. 303,484; published Oct. 7, 1930.
Medicines. Martin H. Smith Co. 35,974; renewed Feb. 26, 1931.
Oil for the protection of animals from flies, gnats, etc. G. B. Carran. 278,439; Dec. 16; Serial No. 304,450; published Sept. 23, 1930.
Perfumes, toilet essences, powder, and lotions. B. Fernández. 278,444; Dec. 16; Serial No. 274,828; published Oct. 7, 1930.
Powder, Face and toilet. Coty, Inc. 278,420; Dec. 16; Serial No. 302,812; published Sept. 23, 1930.
Powder, Hair. C. Reichart. 278,430; Dec. 16; Serial No. 298,715; published Sept. 16, 1930.
Preparation for the treatment of poison oak. E. W. King. 278,436; Dec. 16; Serial No. 304,562; published Sept. 30, 1930.
Preparation for use in the treatment of piles. J. H. Anderson. 278,407; Dec. 16; Serial No. 303,796; published Sept. 23, 1930.
Preparation used for removing ink, iodine, grease, etc. C. H. Eddy. 278,416; Dec. 16; Serial No. 303,430; published Oct. 7, 1930.
Rouge, Lip. A. Warnesson. 278,438; Dec. 16; Serial No. 304,478; published Oct. 7, 1930.
Salt, Granular effervescent. T. H. Jones. 278,496; Dec. 16.
Salt, Laxative effervescent. Lee Laboratories Incorporated. 278,432; Dec. 16; Serial No. 304,871; published Oct. 7, 1930.
Salve. A Somers. 278,495; Dec. 16.
Sedative and antispasmodic. R. T. Haller. 278,429; Dec. 16; Serial No. 299,573; published Sept. 16, 1930.
Shampoo, Liquid. B. Cervelli. 278,421; Dec. 16; Serial No. 301,333; published Sept. 30, 1930.
Shampoo powder. Colgate-Palmolive-Peet Company. 278,418; Dec. 16; Serial No. 303,160; published Sept. 16, 1930.
Shampooing preparation. F. T. Hopkins. 278,402; Dec. 16; Serial No. 303,888; published Oct. 7, 1930.
Shampoos, hair tonics, cold creams, etc. A. R. Martino. 278,406; Dec. 16; Serial No. 303,817; published Oct. 7, 1930.
Silver chloride compound, mercury sulphide, and mercury copper sulphide, Colloidal. Hille Laboratories Incorporated. 278,425; Dec. 16; Serial No. 283,683; published Sept. 30, 1930.
Tablet for the treatment of anemia, etc. William H. Rorer, Inc. 278,500; Dec. 16.
Toilet preparations. May Department Stores Company. 278,427; Dec. 16; Serial No. 299,787; published Oct. 7, 1930.
Toilet preparations and cosmetics. S. Carrick. 278,440; Dec. 16; Serial No. 288,062; published Sept. 30, 1930.
Toilet preparations, preparations for use in the treatment of the hair, and cosmetics. Nestle-Le Mur Company. 278,489; Dec. 16.
Tonic, General body. El-Sano Laboratories, Inc. 278,411; Dec. 16; Serial No. 303,566; published Oct. 7, 1930.
Tonic, Nerve and kidney. Blac-Kat Medicine Company. 278,403; Dec. 16; Serial No. 303,874; published Sept. 30, 1930.
Tooth paste. J. Zuckerman. 278,424; Dec. 16; Serial No. 304,443; published Sept. 23, 1930.

CLASS 7

Cordage, rope, and twine. Edwin H. Fitler Co. 36,156; renewed Apr. 2, 1931.

CLASS 11

Ink, Duplicating. A. B. Dick Company. 81,204; renewed Mar. 14, 1931.

CLASS 12

Asphalt, All grades of petroleum. Lion Oil Refining Company. 278,347; Dec. 16; Serial No. 304,010; published Sept. 30, 1930.
Metallic plates. Berger Manufacturing Company. 80,300; renewed Dec. 6, 1930.
Plastic expansive-joint-sealing compound. Quigley Furnace Specialties Company. 278,353; Dec. 16; Serial No. 303,209; published Sept. 30, 1930.
Slate, Roofing. Bangor Slate Association Inc. 278,357; Dec. 16; Serial No. 302,525; published Sept. 30, 1930.
Tar, asphalt, gravel, etc., Mixtures of. Geigy Company. 278,390; Dec. 16; Serial No. 294,511; published Sept. 30, 1930.
Trellises and pergolas. R. S. Cox. 278,473; Dec. 16; Serial No. 297,411; published Sept. 30, 1930.
Wooden panels for cabinetwork. National Veneer Package Company. 278,350; Dec. 16; Serial No. 303,648; published Sept. 30, 1930.

CLASS 13

Curtains, Duck shower-bath. Chase Brass & Copper Co. Incorporated. 278,462; Dec. 16; Serial No. 283,782; published Sept. 30, 1930.
Pipe and tubing, Metal. Youngstown Sheet & Tube Company. 278,309; Dec. 16; Serial No. 304,481; published Sept. 30, 1930.
Valves and valve casings. Fried. Krupp Aktiengesellschaft. 278,453; Dec. 16; Serial No. 288,997; published Sept. 30, 1930.
Wire fencing. American Wire Fence Company. 278,501; Dec. 16.

CLASS 14

Magnesium and magnesium alloy castings and forgings. Dow Chemical Company. 278,461; Dec. 16; Serial No. 286,674; published July 29, 1930.
Metal castings and forgings. William Jessop & Sons, Limited. 79,060; renewed Aug. 2, 1930.
Metal castings and forgings. William Jessop & Sons, Limited. 79,585; renewed Sept. 20, 1930.
Tin, terne, zinc, and black plates. Redbrook Tinplate Co. Limited. 81,548; renewed Apr. 18, 1931.

CLASS 15

Gasoline, naphtha, kerosene, etc. White Star Refining Company. 278,296; Dec. 16; Serial No. 303,233; published Sept. 30, 1930.
Oils and greases, Lubricating. Georgia-Carolina Oil Company. 278,280; Dec. 16; Serial No. 304,240; published Sept. 30, 1930.

Oils and greases, Lubricating. Jesco Lubricants Co. 278,293; Dec. 16; Serial No. 303,443; published Sept. 30, 1930.

CLASS 19

Automobiles and structural parts thereof. Peerless Motor Car Corporation. 278,317; Dec. 16; Serial No. 302,185; published Sept. 30, 1930.
Oars and paddles, Boat. New York Boat Oar Company. 278,315; Dec. 16; Serial No. 302,789; published Sept. 30, 1930.
Springs and bearing springs and blocks for railway vehicles, India-rubber buffing and draw. George Spencer, Moulton & Company, Limited. 278,383; Dec. 16; Serial No. 295,766; published Sept. 30, 1930.

CLASS 21

Armatures and armature parts. Universal Armature Corporation. 278,397; Dec. 16; Serial No. 304,592; published Sept. 30, 1930.
Dry-cell batteries. French Battery Company. 278,396; Dec. 16; Serial No. 304,612; published Sept. 30, 1930.
Dry-cell batteries. French Battery Company. 278,398; Dec. 16; Serial No. 304,550; published Sept. 30, 1930.
Electric lanterns, electric flash lights, etc. Bond Electric Corporation. 278,451; Dec. 16; Serial No. 291,961; published Jan. 14, 1930.
Electric signs. Longsign Corporation. 278,399; Dec. 16; Serial No. 304,467; published Sept. 30, 1930.
Electrical conductors. United States Rubber Company. 278,295; Dec. 16; Serial No. 303,354; published Sept. 30, 1930.
Electrical goods and apparatus. Edwards and Company. 278,381; Dec. 16; Serial No. 269,834; published Sept. 30, 1930.
Electrical goods and apparatus. Edwards and Company. 278,382; Dec. 16; Serial No. 269,832; published Sept. 30, 1930.
Electrical sunplies. Star Expansion Bolt Company. 80,684; renewed Jan. 17, 1931.
Heaters, Water. Lux-Visel Company. 278,297; Dec. 16; Serial No. 303,061; published Sept. 30, 1930.
Horns and alarms, Electrically-operated signal. Lovell-McConnell Manufacturing Company. 80,789–90; renewed Jan. 31, 1931.
Insulating knobs, Assembled. Porcelain Products, Inc. 278,282; Dec. 16; Serial No. 304,065; published Sept. 30, 1930.
Lighters, Electric cigar. J. H. Cohen. 278,469; Dec. 16; Serial No. 299,046; published Sept. 30, 1930.
Radio apparatus. Kiel Furniture Co. 278,290; Dec. 16; Serial No. 303,907; published Sept. 30, 1930.
Radio grounds, aerials, selective radio aerials, etc. F. J. Vondenbosh. 278,298; Dec. 16; Serial No. 303,016; published Sept. 30, 1930.
Vacuum cleaners, Electrical. P. A. Geier Company. 278,281; Dec. 16; Serial No. 304,134; published Sept. 30, 1930.

CLASS 22

Archery ranges, bows, and arrows, Complete portable. E. E. Jarrett. 278,291; Dec. 16; Serial No. 303,747; published Sept. 30, 1930.
Artificial bait. L. B. Huntington. 278,394; Dec. 16; Serial No. 304,688; published Sept. 30, 1930.
Balls. Albany Billiard Ball Co. 278,289; Dec. 16; Serial No. 304,747; published Sept. 30, 1930.
Balls. Albany Billiard Ball Co. 278,392; Dec. 16; Serial No. 304,746; published Sept. 30, 1930.
Balls. Albany Billiard Ball Co. 278,393; Dec. 16; Serial No. 304,744; published Sept. 30, 1930.
Golf balls and clubs. Popular Games, Inc. 278,460; Dec. 16; Serial No. 288,146; published Sept. 30, 1930.

CLASS 23

Apparatus for subjecting gases to centrifugal action. Western Precipitation Company. 278,465; Dec. 16; Serial No. 299,294; published Oct. 7, 1930.
Engines. Menasco Motors, Inc. 278,358; Dec. 16; Serial No. 302,441; published Oct. 7, 1930.
Engines, crank cases, cylinders, etc. Daimler-Benz Aktiengesellschaft. 278,454; Dec. 16; Serial No. 288,587; published Oct. 7, 1930.
Grinders, Feed. Western Land Roller Company. 278,343; Dec. 16; Serial No. 304,985; published Oct. 7, 1930.
Ice-shaving machines. Snoko Inc. 278,450; Dec. 16; Serial No. 299,868; published Oct. 7, 1930.
Knives, forks, basters, etc., Base-metal. Württembergische Metallwarenfabrik. 278,472; Dec. 16; Serial No. 297,462; published Oct. 7, 1930.
Loom reeds. Textile Specialty Co. 278,346; Dec. 16; Serial No. 304,022; published Oct. 7, 1930.
Razor blades, Safety. Gillette Safety Razor Company. 278,391; Dec. 16; Serial No. 293,878; published Oct. 7, 1930.
Sewing machines and parts thereof. Anker-Werke A.-G. 278,354; Dec. 16; Serial No. 303,042; published Oct. 7, 1930.
Shears and scissors. Acme Shear Company. 278,344; Dec. 16; Serial No. 304,935; published Oct. 7, 1930.
Stropping machines. E. Braselmann. 278,385; Dec. 16; Serial No. 295,420; published Oct. 7, 1930.

CLASS 24

Laundry articles. American Wringer Co. 36,101; renewed Mar. 19, 1931.

CLASS 26

Films. Eureka Color Film Company. 278,463; Dec. 16; Serial No. 299,694; published Oct. 7, 1930.
Films. Randolph Movie Company. 278,476; Dec. 16; Serial No. 296,080; published Sept. 9, 1930.
Lorgnettes, eyeglasses, spectacles, etc. Lugene Inc. 278,340–1; Dec. 16; Serial Nos. 305,139–40; published Oct. 7, 1930.
Marine instruments. A. McNab. 278,299; Dec. 16; Serial No. 301,979; published Oct. 1, 1930.
Pictures and films, Motion. Fox Film Corporation. 278,348; Dec. 16; Serial No. 303,765; published Oct. 7, 1930.

CLASS 28

Bracelets. J. Granat. 278,292; Dec. 16; Serial No. 303,640; published Sept. 30, 1930.
Rings, Finger. J. Granat. 278,294; Dec. 16; Serial No. 303,436; published Sept. 30, 1930.

CLASS 29

Toothbrushes. Geo. Borgfeldt & Co. 81,121; renewed Mar. 7, 1931.

CLASS 32

Mattresses, box springs, and pillows. P. Strauss. 278,300; Dec. 16; Serial No. 301,215; published Oct. 7, 1930.
Tables. Ingram Richardson Corporation. 278,351; Dec. 16; Serial No. 303,644; published Oct. 7, 1930.

CLASS 34

Boilers and water heaters, Steel heating. Monitor Boiler Company. 278,447; Dec. 16; Serial No. 300,580; published Sept. 30, 1930.
Lighters, Friction and pyrophoric. Croyden Products, Inc. 278,308; Dec. 16; Serial No. 304,607; published Sept. 30, 1930.
Ranges. Crown Stove Works. 278,313; Dec. 16; Serial No. 303,166; published Sept. 30, 1930.

CLASS 35

Brake linings. Russell Manufacturing Company. 278,342; Dec. 16; Serial No. 305,090; published Oct. 7, 1930.
Hose, Garden. Sears, Roebuck and Co. 278,481–3; Dec. 16.

CLASS 36

Musical instruments and supplies. S. G. Stern. 278,464; Dec. 16; Serial No. 299,471; published Sept. 30, 1930.
Phonograph disc turntables. Weber Machine Corporation. 278,387; Dec. 16; Serial No. 295,284; published Sept. 30, 1930.
Phonograph-record changers and repeaters. Electra Corporation. 278,400; Dec. 16; Serial No. 304,276; published Sept. 30, 1930.

CLASS 37

Book, Blank. Ohio Coupon Company. 278,360; Dec. 16; Serial No. 303,203; published Sept. 30, 1930.
Bookholder. Fixtpage Company. 278,369; Dec. 16; Serial No. 304,192; published Sept. 30, 1930.
Duplicating machines and parts thereof. A. B. Dick Company. 81,205; renewed Mar. 14, 1931.
Paper and envelopes made therefrom, Printing. Paper Mills Company. 278,470; Dec. 16; Serial No. 298,954; published Sept. 30, 1930.
Paper and envelopes, Writing. Montag Bros. Inc. 278,371; Dec. 16; Serial No. 304,566; published Sept. 30, 1930.
Paper and envelopes, Writing. Montag Bros. Inc. 278,373; Dec. 16; Serial No. 304,692; published Sept. 30, 1930.
Paper and stencils, Stencil. L. E. Fuller. 80,310; renewed Dec. 6, 1930.
Paper, Creped waterproof and lining. Crepe-Kraft Company. 278,364; Dec. 16; Serial No. 303,839; published Sept. 30, 1930.
Paper, Stencil. A. B. Dick Company. 81,203; renewed Mar. 14, 1931.
Paper, Tissue. Dunn Sulphite Paper Co. 278,378; Dec. 16; Serial No. 301,602; published Sept. 30, 1930.
Paper to be used for wall coverings and window shades. Sheetpaint Products Corporation. 278,372; Dec. 16; Serial No. 304,587; published Sept. 30, 1930.
Paper, Waterproof. E. A. Hall, jr. 278,370; Dec. 16; Serial No. 304,286; published Sept. 30, 1930.
Papers, Coated. McLaurin-Jones Co. 278,474; Dec. 16; Serial No. 296,230; published Sept. 30, 1930.
Pencils, penholders, and erasing rubbers. Bleistift-Fabrik vorm. Johann Faber. A.-G. 78,677; renewed July 5, 1930.
Stationery. Independent Druggists' Alliance Distributing Co. 278,365; Dec. 16; Serial No. 303,900; published Sept. 30, 1930.

Worsted and woolen fabrics. Holden-Leonard Company. 278,287–8; Dec. 16; Serial Nos. 304,817–18; published Sept. 30, 1930.

CLASS 43

Textile fibres of all kinds, artificial straw, horsehair, etc. Société de la Viscose Suisse. 278,284; Dec. 16; Serial No. 304,892; published Sept. 30, 1930.
Thread, yarns, and filaments of artificial silk. Société de la Viscose Suisse. 278,283; Dec. 16; Serial No. 304,893; published Sept. 30, 1930.
Threads, yarns, and filaments. Société de la Viscose Suisse. 278,285; Dec. 16; Serial No. 304,891; published Sept. 30, 1930.

CLASS 44

Air-purifying apparatus. Domestic Electric Company. 278,339; Dec. 16; Serial No. 303,320; published Oct. 7, 1930.
Atomizers, Perfume and medicinal. Marcel Franck, Inc. 278,334; Dec. 16; Serial No. 303,743; published Oct. 7, 1930.
Bandages, Elastic. Kopf Mfg. Co. 278,329; Dec. 16; Serial No. 304,053; published Oct. 7, 1930.
Calcium preparation. Coe Laboratories, Inc. 278,322; Dec. 16; Serial No. 304,681; published Oct. 7, 1930.
Dentures. Coe Laboratories, Inc. 278,323; Dec. 16; Serial No. 304,680; published Oct. 7, 1930.
Surgical adhesive tape and bandages. Independent Druggists' Alliance Distributing Co. 278,330; Dec. 16; Serial No. 303,903; published Oct. 7, 1930.
Toothpicks, Wooden. C. Forster. 35,326; renewed Oct. 30, 1930.
Toothpicks, Wooden. C. Forster. 35,328; renewed Oct. 30, 1930.
Toothpicks, Wooden. C. Forster. 35,456–7; renewed Nov. 20, 1930.

CLASS 45

Beverage and extract for making soft drinks, Maltless. A. R. Burnside. 278,380; Dec. 16; Serial No. 287,865; published Sept. 10, 1929.
Beverage, Maltless. A. B. Lawless. 278,491; Dec. 16.
Beverages, Maltless. E. J. Petrosemolo. 278,485; Dec. 16.
Beverage, Maltless citrous. Florida Orange Dry Corporation. 278,493; Dec. 16.
Root beer extract. Smith, Kline & French Company. 80,741; renewed Jan. 24, 1931.

CLASS 46

Candies and frozen confections. Eskimo Pie Corporation. 278,312; Dec. 16; Serial No. 303,598; published Oct. 7, 1930.
Candy. Fred W. Amend Co. 278,310; Dec. 16; Serial No. 304,030; published Oct. 7, 1930.
Candy. Bunte Brothers. 278,345; Dec. 16; Serial No. 304,601; published Sept. 30, 1930.
Candy. T. Charles Dusenberg. 80,468; renewed Dec. 27, 1930.
Canned corn. Faribault Canning Company. 278,318; Dec. 16; Serial No. 301,426; published Sept. 30, 1930.
Canned fruits and vegetables, dried fruits, canned fruits for salad. California Co-Operative Producers. 278,452; Dec. 16; Serial No. 290,448; published Oct. 7, 1930.
Canned fruits, canned vegetables, and sauerkraut. Rocky Mountain Packing Corporation. 278,316; Dec. 16; Serial No. 302,479; published Sept. 30, 1930.
Canned tripe, canned squid, canned shrimp, etc., with tomato sauce. P. Rescigno. 278,359; Dec. 16; Serial No. 302,027; published Sept. 30, 1930.
Chili. W. B. King. 278,319; Dec 16; Serial No. 301,270; published Oct. 7, 1930.
Coffee. Charles E. Brown & Co. 80,405; renewed Dec. 20, 1930.
Coffee. Fletcher Coffee & Spice Co. 81,601; renewed Apr. 25, 1931.
Confection, Candy. The Tropical Vitamin Co., Inc. 278,304; Dec. 16; Serial No. 305,005; published Oct. 7, 1930.
Fish, Fresh. Tribuna-Magri Co. 278,355; Dec. 16; Serial No. 303,038; published Sept. 30, 1930.
Flour, Wheat. Bliah Milling Company. 80,638; renewed Jan. 17, 1931.
Flour, Wheat. Carr Milling Company. 80,828; renewed Feb. 7, 1931.
Fruits, dates, grapes, Fresh citrus. A. B. Cliff. 278,303; Dec. 16; Serial No. 305,035; published Oct. 7, 1930.
Fruits, Fresh deciduous. Newbry & Sons. 278,320; Dec. 16; Serial No. 305,053; published Oct. 7, 1930.
Grapefruit, Fresh. E. A. Bailey. 278,467–8; Dec. 16; Serial Nos. 299,176–7; published Sept. 30, 1930.
Grapes, Fresh. A. J. Sturtevant. 278,302; Dec. 16; Serial No. 305,057; published Oct. 7, 1930.
Gum, Chewing. Frank H. Fleer Corporation. 278,305–6; Dec. 16; Serial Nos. 304,761–2; published Oct. 7, 1930.
Gum, Chewing. Honey Chewing Gum Co. 278,314; Dec. 16; Serial No. 303,118; published Oct. 7, 1930.
Peanuts, Salted. G. C. Howell. 278,307; Dec. 16; Serial No. 304,661; published Oct. 7, 1930.
Potatoes. Nix Produce Company. 278,349; Dec. 16; Serial No. 303,751; published Sept. 30, 1930.
Sausage casings. Visking Corporation. 278,352; Dec. 16; Serial No. 303,410; published Sept. 30, 1930.
Sausage casings. Visking Corporation. 278,356; Dec. 16; Serial No. 302,707; published Sept. 30, 1930.
Vegetables, Fresh. Venice, Celery Distributors. 278,301; Dec. 16; Serial No. 305,062; published Oct. 7, 1930.

Class 48

Malt cereal beverage. Mid-City Beverage Company. 278,490; Dec. 16.

CLASS 49

Gin. Tanqueray, Gordon Co. Limited. 35,465; renewed Nov. 20, 1930.

ALPHABETICAL LIST OF LABELS

Antonio Cortina. For Cigars. Antonio Cortina. 38,378; Dec. 16.
Arcturus Radio Tubes. For Radio Tubes. Arcturus Radio Tube Company. 38,373; Dec. 16.
Blue Flag. For Evaporated Prunes. Earl Fruit Company. 38,380; Dec. 16.
Carolina Cleanser. For Cleanser. Champion Fibre Company. 38,377; Dec. 16.

When It's an Exide You Start. For Storage Batteries. Electric Storage Battery Company. 12,858; Dec. 16.
Williams Rayex. For Tonic for Scalp and Hair. J. B. Williams Company. 12,865; Dec. 16.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 16TH DAY OF DECEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

A-B Stove Company. (See Reedy, Alfred F., assignor.)
Abel, Henry W., Brillion, Wis. Animal trap. 1,785,664; Dec. 16.
Aborn, Bertrand L., Belfast, Me. Rotary saw. 1,785,065; Dec. 16.
Adams, Edward C., Washington, D. C. Fluid-conduit device. 1,784,980; Dec. 16.
Adams, Mathias J., assignor of one-fourth to Adams Patent Wheel Co., Turkey River Iowa. Wagon. 1,785,717; Dec. 16.
Adams, Mathias J., and P. P. Adams, Turkey River, Iowa, assignors of one-fourth to Adams Patent Wheel Co., Turkey River, Iowa. Spoke. 1,785,171; Dec. 16.
Adams Patent Wheel Co. (See Adams, Mathias J., assignor.)
Adams Patent Wheel Co. (See Adams, Mathias J. and P. P., assignors.)
Adams, Peter P. (See Adams, Mathias J. and P. P.)
Adams, Peter P., Turkey River, Iowa. Front-wheel guide and brake. 1,785,172; Dec. 16.
Adams, William J., Santa Cruz, assignor to Ball Wagon Grader Company, Stockton, Calif. Scraper-bowl construction. 1,785,106; Dec. 16.
Adler, Howard, and G. A. McDonald, Chicago Heights, assignors to Victor Chemical Works, Chicago, Ill. Seed fungicide and disinfectant. 1,785,472; Dec. 16.
Adler, Howard, and G. A. McDonald, Chicago Heights, Ill., assignors to Victor Chemical Works. Granular calcium phosphate. 1,785,473; Dec. 16.
Advance-Rumely Company. (See Secor, John A., assignor.)
Agnell, Carl L., Chicago, Ill. Flower urn. 1,785,430; Dec. 16.
Aktiebolaget Svenexport. (See Dockl, Johann, assignor.)
Albert, Ruth F., New York, N. Y. Garment. 1,785,066; Dec. 16.
Alden, Milton, Springfield, Mass., assignor, by mesne assignments, to R. S. Allyn, New York, N. Y. Support for vacuum tubes. 1,785,239; Dec. 16.
Aldrich, Alonzo, Beloit, Wis. Stuff pump. 1,785,687; Dec. 16.
Aldrich, Alonzo, Beloit, Wis. Guideway for reciprocating engines, pumps, or the like. 1,785,688; Dec. 16.
Alexander, B. F. (See Cundiff, Kenneth K., assignor.)
Allen, Arthur P., Burlingame, Calif. Treating wood. 1,785,571; Dec. 16.
Allen, Frank B., Lower Merion Township, Montgomery County, Pa., assignor to The Allen-Sherman-Hoff Company. Storing and removing refuse. 1,785,539; Dec. 16.
Allen, John W., Fresno, Calif. Advertising device. 1,785,474; Dec. 16.
Allen, Joseph W., Dayton, Ohio. Electrical thermometer. 1,784,922; Dec. 16.
Allen-Sherman-Hoff Company, The. (See Allen, Frank B., assignor.)
Allied Products Corporation. (See Richard, Clement C., assignor.)
Alligator Company, The. (See Hessler, Arthur, assignor.)
Alling, George E., & Sons. (See Grilley, Ernest M., assignor.)
Allyn, Robert S. (See Alden, Milton, assignor.)
Alma Manufacturing Company, of Baltimore City. (See Frank, Leon, assignor.)
Alma Manufacturing Company of Baltimore City. (See Kerngood, Allen H., assignor.)
Alvey Manufacturing Company. (See Reichle, Carl J., assignor.)
Alvistur, Oscar, Oakland, Calif. Apparatus for releasing glider planes. 1,784,954; Dec. 16.
American Bemberg Corporation. (See Hofmann, Hugo, assignor.)
American Blower Corporation. (See Morse, C. T., and Hogan, assignors.)
American Cyanamid Company. (See Buchanan, Guy H., assignor.)
American Electrical Works. (See Busey, Herbert S., assignor.)
American Flexible Shaft Manufacturing Corporation. (See Hasemann, John L., assignor.)
American Manganese Steel Company. (See Fahrenwald, Frank A., assignor.)
American Metal Company. (See Burkey, H. M., and Ogden, assignors.)
American Patents Corporation. (See Hoge, J. R., and Soubier, assignors.)
American Patents Corporation. (See Soubier, L. D., and Carl, assignors.)
American Rolling Mill Company, The. (See Jacoby, Arthur B., assignor.)
American Sheet and Tin Plate Company. (See McQuiston, Jesse T., assignor.)
American Telephone and Telegraph Company. (See Dean, S. W., and Anderson, assignors.)
American Telephone and Telegraph Company. (See Gary, L. A., and Tasker, assignors.)
American Telephone and Telegraph Company. (See Morency, George H., assignor.)
American Turpentine & Tar Company et al. (See Smith, Eugene B.)
Anderson, Clifford N. (See Dean, S. W., and Anderson.)
Anderson, Earl R. (See Thompson, A. R., and Anderson.)
Anderson, Earl R., Los Angeles, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitter. 1,784,998; Dec. 16.
Anderson, Earl R., Los Angeles, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit-pitting apparatus. 1,784,999; Dec. 16.
Anderson, Rexford O., Seminole; U. S. Rudy, Oklahoma City; and B. M. Gessel, Tulsa, Okla. Cooling tower. 1,785,572; Dec. 16.
Andren, Birger T., assignor to A. O. Smith Corporation, Milwaukee, Wis. Attaching tapped nuts to metal plates. Re17,907; Dec. 16.
Apple, Vincent G., Dayton, Ohio. Dynamo-electric-machine element. 1,784,815; Dec. 16.
Apter, Saul, Cincinnati, Ohio. Traveling case. Des. 82,782; Dec. 16.
Archer, Merton T. (See Zerbe, L. E., and Archer.)
Arentzen, Einar M., assignor to Joy Manufacturing Company, Franklin, Pa. Artificial conveyer. 1,785,402; Dec. 16.
Armstrong, John A., Chicago, assignor to The Herman Nelson Corporation, Moline, Ill. Grille. Des. 82,778; Dec. 16.
Armstrong, John A., Chicago, assignor to The Herman Nelson Corporation, Moline, Ill. Grille. Des. 82,779; Dec. 16.
Armstrong, John A., Chicago, assignor to The Herman Nelson Corporation, Moline, Ill. Grille. Des. 82,780; Dec. 16.
Armstrong, John A., Chicago, assignor to The Herman Nelson Corporation, Moline, Ill. Grille. Des. 82,781; Dec. 16.
Aronson, Peter A., Rivercliffe, Devon, Conn., assignor to Hookless Fastener Company, Meadville, Pa. Separable fastener. 1,785,240; Dec. 16.
Aseltine, Ethan E., St. Albans, Vt. Merchandise carrier. 1,785,665; Dec. 16.
Astrom, Carl P., East Orange, N. J., assignor to M. H. Treadwell Company, New York, N. Y. Hot-metal car. 1,785,292; Dec. 16.
Atlas Powder Company. (See Pratt, Carl D., assignor.)
Automatic Molding Machine Corporation. (See Morris, T. O., and Lawlor, assignors.)
Automobile Radio Corporation. (See Heina, William M., assignor.)
Autostrop Safety Razor Company. (See Gaisman, Henry J., assignor.)
Babb, Edwin, Aultman, Ohio, assignor, by mesne assignments, to National Fireproofing Corporation, Pittsburgh, Pa. Conduit. 1,785,403; Dec. 16.
Babcock & Wilcox Company, The. (See Black, John E., assignor.)
Babcock & Wilcox Company, The. (See Kerr, Howard J., assignor.)
Bachelder, Frank H., Orange, Mass. Tool cabinet. 1,785,666; Dec. 16.
Baender, Fred G., trustee. (See Nelson, O. J., and Baender, assignors.)
Baender, Frederick G. (See Nelson, O. J., and Baender.)
Bailey, William B., Olympia, Wash. Threshold weatherstrip. 1,785,431; Dec. 16.
Baker Oil Tools, Inc. (See Baker, Reuben C., assignor.)
Baker, Perkins, Limited. (See Harris, Richard A., assignor.)
Baker, Reuben C., Coalinga, Calif., assignor to Baker Oil Tools, Inc. Screen plug for core barrels. 1,784,886; Dec. 16.
Ball Wagon Grader Company. (See Adams, William J., assignor.)
Ballard, Howard A., Clarksburg, Calif. Portable irrigation head gate. 1,784,955; Dec. 16.
Barber-Colman Company. (See Colman, Howard D., assignor.)

Barclay, William R., Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe support. 1,784,923; Dec. 16.

Barlow, Lester P., Detroit, Mich. Fuel-feed system for internal-combustion engines of automobiles. 1,785,573; Dec. 16.

Barnes, Carl C., Portland, Oreg. Skimmer. 1,785,689; Dec. 16.

Barrett, Glenn J., Evanston, assignor to Portable Adding Machine Company, Chicago, Ill. Adding machine. 1,784,862; Dec. 16.

Barrett, Harold J., Wilmington, Del., assignor, by mesne assignments, to The Grasselli Chemical Company, Cleveland, Ohio. Soldering flux. 1,785,173; Dec. 16.

Bartholomew, Cassius M., Columbus, Ohio. Toothpick holder. 1,785,107; Dec. 16.

Bassett, Henry L., assignor to Columbus Handle and Tool Corporation, Columbus, Ind. Tool handle. 1,785,608; Dec. 16.

Bastien, Paul, Indianapolis, Ind. Engine. 1,785,108; Dec. 16.

Bates, Mortimer F., assignor, by mesne assignments, to Sperry Gyroscope Company, Inc., Brooklyn, N. Y. Dead-reckoning tracer. 1,785,241; Dec. 16.

Baum, Isaac A., Chicago, Ill. Doorframe. 1,785,174; Dec. 16.

Baum, Seymour L., New Rochelle, N. Y., assignor to General Electric Company. Protective system. 1,785,718; Dec. 16.

Baumann, George, Brooklyn, N. Y. Lady's hand bag. 1,785,609; Dec. 16.

Beatty, Stanley, Highland, N. Y. Brake mechanism. 1,785,432; Dec. 16.

Becker, Arman E., Newark, and R. G. Sloane, Elizabeth, N. J., assignors to Standard Oil Development Company. Reclaiming residues. 1,785,242; Dec. 16.

Beebe, Paul, Los Angeles, Calif., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Treatment for liners. 1,785,667; Dec. 16.

Behle, Joseph, assignor to The Murray Company, Dallas, Tex. Breast lifter for gins. 1,785,109; Dec. 16.

Behrman, Abraham S., Chicago, Ill. Separator plate. 1,784,981; Dec. 16.

Beim, Nels C., Minneapolis, Minn. Lubricant and producing the same. 1,784,809; Dec. 16.

Belden, Edward H., assignor to Belden Patents Incorporated, Toledo, Ohio. Two-cycle V motor. 1,785,175; Dec. 16.

Belden Patents Incorporated. (See Belden, Edward H., assignor.)

Belin, Edouard, Paris, France. Optical recording device for telegraphic signaling. 1,785,610; Dec. 16.

Bell Telephone Laboratories, Incorporated. (See Dudley, Homer W., assignor.)

Bell Telephone Laboratories, Incorporated. (See Elmen, Gustaf W., assignor.)

Bell Telephone Laboratories, Incorporated. (See Flanders, Paul B., assignor.)

Bell Telephone Laboratories, Incorporated. (See Hubbard, Frank A., assignor.)

Bell Telephone Laboratories, Incorporated. (See Keller, Arthur C., assignor.)

Bell Telephone Laboratories, Incorporated. (See Marrison, Warren A., assignor.)

Bell Telephone Laboratories, Incorporated. (See Morrison, Louis A., assignor.)

Bell Telephone Laboratories, Incorporated. (See Peterson, Eugene, assignor.)

Bell Telephone Laboratories, Incorporated. (See Taylor, Hugh S., assignor.)

Bell Telephone Laboratories, Incorporated. (See Wente, Edward C., assignor.)

Bell Telephone Laboratories, Incorporated. (See White, John H., assignor.)

Bell Telephone Laboratories, Incorporated. (See Whittle, Horace, assignor.)

Bell Telephone Laboratories, Incorporated. (See Wiebusch, Charles F., assignor.)

Belz, Charles A., Arcola, Pa. Combined compressed-air hose and air-pressure gauge. 1,785,110; Dec. 16.

Bemis, Albert F., Newton, assignor to Bemis Industries, Inc., Boston, Mass. Building. 1,785,067; Dec. 16.

Bemis Industries, Inc. (See Bemis, Albert F., assignor.)

Benjamin, Edward O., Newark, N. J. Distilling apparatus and method. 1,784,956; Dec. 16.

Berg, Hans, Grand Rapids, Mich. Radiocabinet. Des. 82,783; Dec. 16.

Bergé, Julien, assignor to Raffinerie Tirlemontoise Societe Anonyme, Tirlemont, Belgium. Curing masseculte. 1,784,982; Dec. 16.

Bergquist, Charles H., assignor of one-half to E. A. Locke, Okmulgee, Okla. Counterbalance. 1,785,668; Dec. 16.

Bergquist, Charles H., assignor of one-half to E. A. Locke, Okmulgee, Okla. Counterbalance. 1,785,669; Dec. 16.

Berner, Leo, South Milwaukee, and P. Lohr, Milwaukee, Wis. Internal-combustion engine. 1,785,176; Dec. 16.

Berry, Levi H., Joplin, Mo. Gas-heating manifold. 1,784,924; Dec. 16.

Bethlehem Steel Company. (See Kichline, Frank O., assignor.)

Better Packages, Inc. (See Sutherland, Daniel M., jr., assignor.)

Betts, Philander H., Belmar, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electric wave transmission system. 1,784,957; Dec. 16.

Bewley, Edson P., Santa Cruz, Calif. Brake-testing machine. 1,785,243; Dec. 16.

Bichele, Charles S., assignor to J. Milhening, Inc., Chicago, Ill. Scarfpin. Des. 82,784; Dec. 16.

Bichele, Charles C., assignor to J. Milhening, Inc., Chicago, Ill. Scarfpin. Des. 82,785; Dec. 16.

Bichele, Charles S., assignor to J. Milhening, Inc., Chicago, Ill. Scarfpin. Des. 82,786; Dec. 16.

Bichele, Charles S., assignor to J. Milhening, Inc., Chicago, Ill. Scarfpin. Des. 82,787; Dec. 16.

Bichele, Charles S., assignor to J. Milhening, Inc., Chicago, Ill. Scarfpin. Des. 82,788; Dec. 16.

Bichele, Charles S., assignor to J. Milhening, Inc., Chicago, Ill. Scarfpin. Des. 82,789; Dec. 16.

Bigoney, Thomas W., Philadelphia, Pa. Grater. 1,785,244; Dec. 16.

Bissell, Richard E. (See Miller, C. W., and Bissell.)

Bitner, John S., assignor to Wayne Novelty and Publishing Company, Fort Wayne, Ind. Flagstaff holder. 1,785,509; Dec. 16.

Black, George E., Sewickley, assignor to H. H. Robertson Company, Pittsburgh, Pa. Ventilator. 1,785,540; Dec. 16.

Black, John E., Rumson, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Air heater. 1,785,334; Dec. 16.

Black, William C., Dudley, England, assignor to M. S. Moore, Brussels, Belgium. Coal-cutting machine and the like. 1,785,574; Dec. 16.

Blackinton, George W., assignor to Continental Motors Corporation, Detroit, Mich. Shock absorber. 1,785,510; Dec. 16.

Blackman, Albert E., Mount Vernon, N. Y. Mail box. 1,785,404; Dec. 16.

Blake, Anson S. (See Symmes, Whitman, assignor.)

Blake, David K., Scotia, N. Y., assignor to General Electric Company. Control system. 1,785,611; Dec. 16.

Blake, David K., Scotia, N. Y., assignor to General Electric Company. System of electric distribution. 1,785,612; Dec. 16.

Blake, David K., Scotia, N. Y., assignor to General Electric Company. Automatic control system. 1,785,719; Dec. 16.

Blake, David K., Scotia, N. Y., assignor to General Electric Company. System of electric distribution. 1,785,720; Dec. 16.

Blake, David K., Scotia, N. Y., assignor to General Electric Company. System of electric distribution. 1,785,721; Dec. 16.

Blake, David K., Scotia, N. Y., assignor to General Electric Company. Control system. 1,785,722; Dec. 16.

Bleecker, George W., et al., trustee. (See Martin, Laurence C., assignor.)

Bliven, Charles H., Norfolk, Va. Shut-off valve. 1,785,475; Dec. 16.

Blosser, Herman G., Pittsburgh, and R. A. McCann, assignors to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,784,816; Dec. 16.

Blume, Louis F., Pittsfield, Mass., assignor to General Electric Company. Ratio-adjusting switch. 1,785,575; Dec. 16.

Blumenthal, Julius J., assignor to Lighting Appliance Company, Inc., New York, N. Y. Lighting-fixture bracket or article of similar nature. Des. 82,790; Dec. 16.

Blumer, James, Norwalk, Conn. Saw vise. 1,785,613; Dec. 16.

Boden, George, assignor to Scovill Manufacturing Company, Waterbury, Conn. Paper clip. 1,785,511; Dec. 16.

Body, Joseph J. and R. A., Dante, Va. Mine-car dump-registering means. 1,785,433; Dec. 16.

Body, Rebecca A. (See Body, Joseph J. and R. A.)

Boecher, Elizabeth. (See Lorenz, C., and Boecher.)

Boktlund, Harry A., assignor to Shakespeare Company, Kalamazoo, Mich. Fishing reel. Des. 82,791; Dec. 16.

Bollock, John G., Hastings, Nebr. Safety device for pneumatic hammers. 1,785,177; Dec. 16.

Bonifacio, Harry. (See Campau, Julian G., assignor.)

Bonney, Robert D., Glen Ridge, N. J., and W. Y. Irwin, jr., Moores, Pa., assignors to Congoleum-Nairn, Inc. Floor covering. 1,784,810; Dec. 16.

Borton, George W., New Lisbon, N. J., assignor to Pennsylvania Crusher Company, New York, N. Y. Coal breaker. 1,784,983; Dec. 16.

Bosley, D. W., Company, The. (See Bosley, Maurice E., assignor.)

Bosley, Maurice E., assignor to The D. W. Bosley Company, Chicago, Ill. Weather strip. 1,785,476; Dec. 16.

Both, Tonjes A., Stratford, assignor to The Connecticut Electric Manufacturing Company, Bridgeport, Conn. Electric switch. 1,785,068; Dec. 16.

Boudette, Cornelius G., Claremont, N. H., assignor to Sullivan Machinery Company. Adjustable jack. 1,785,069; Dec. 16.

Bowman, Frederick J., assignor to The Grasselli Chemical Company, Cleveland, Ohio. Wall for reaction towers. 1,785,178; Dec. 16.

Bowman, Kiel B., Massillon, assignor, by mesne assignments, to Republic Steel Corporation, Youngstown, Ohio. Removal of lead coatings from metallic articles. 1,785,245; Dec. 16.

Boyd, Fisher L., Haverford, assignor, by mesne assignments, to National Foam System, Inc., Philadelphia, Pa. Apparatus for producing fire-extinguishing foam. 1,785,723; Dec. 16.

Boye Needle Company, The. (See Carlson, Gustav A., assignor.)

Boyer, Charles A., Tiggard, Oreg. Indicator. 1,785,614; Dec. 16.

Boyle, John, & Company. (See Markert, Frederick E., assignor.)

Braden, Alfred M. (See Bronson, A. E., and Braden.)

Bradley, Milton, Company. (See Wolfson, Harold M., assignor.)

Brandsma, Wiebold F., P. R. Dijksterhuis, G. J. Sizoo, and G. B. Jonas, Eindhoven, Netherlands, assignors to Radio Corporation of America. Magnetic material. 1,785,246; Dec. 16.

Brant, Clyde C., Terre Haute, Ind. Elapsed-time register for airplanes. 1,785,724; Dec. 16.

Bremforder, Ernest G. (See Wozniak, J., and Bremforder.)

Bresler, Louis L., assignor to H. T. Pollan, Chicago, Ill. Lock. 1,785,335; Dec. 16.

Bridgeman, Walter A., assignor to The Wilbur White Chemical Co., Owego, N. Y. Waterproofing of materials. 1,785,434; Dec. 16.

Brigham, Henry M., Brooklyn, assignor to John Chatillon & Sons, New York, N. Y. Spring scale. 1,785,541; Dec. 16.

Bristol Aeroplane Company. (See Frise, Leslie G., assignor.)

British Dyestuffs Corporation Limited. (See Shepherdson, A., and Thornley, assignors.)

Broderick, Frank W. (See Golinick, P. A., and Broderick.)

Brogden, Joab, Melrose Park, assignor to David Lupton's Sons Company, Philadelphia, Pa. Work table. Re17,901; Dec. 16.

Bronson, Adelbert E., Cleveland Heights, assignor to The Dill Manufacturing Company, Cleveland, Ohio. Hand grip and air connecter. 1,784,817; Dec. 16.

Bronson, Albert E., and A. M. Braden, Gibbs, Idaho, assignors to Union Iron Works, Spokane, Wash. Unstacking machine. 1,785,374; Dec. 16.

Brown & Bigelow. (See Fischer, Howard L., assignor.)

Brown, Carl D., assignor to Draper Corporation, Hopedale, Mass. Automatically-threading loom shuttle. 1,785,218; Dec. 16.

Brown, Carl D., assignor to Draper Corporation, Hopedale, Mass. Automatically-threading loom shuttle. 1,785,219; Dec. 16.

Brown, Carl D., assignor to Draper Corporation, Hopedale, Mass. Automatically-threading loom shuttle. 1,785,220; Dec. 16.

Brown, Carl D., assignor to Draper Corporation, Hopedale, Mass. Automatically-threading loom shuttle. 1,785,221; Dec. 16.

Brown, Carl D., assignor to Draper Corporation, Hopedale, Mass. Automatically-threading loom shuttle. 1,785,222; Dec. 16.

Brown Company. (See Richter, George A., assignor.)

Brown, Vere B., Brackenridge, Pa. Silicon steel. 1,784,811; Dec. 16.

Brunette, Joseph W., Fordson, Mich. Syringe attachment. 1,785,293; Dec. 16.

Brysselbout, Henri A., Detroit, Mich., assignor to Copeland Products, Inc. Refrigerating mechanism, 1,785,576; Dec. 16.

Buchanan, Guy H., Westfield, N. J., assignor to American Cyanamid Company, New York, N. Y. Ammonium-phosphate fertilizer composition and making the same. 1,785,375; Dec. 16.

Buckner, Irwin, Spokane, Wash. Orthopedic appliance. 1,785,376; Dec. 16.

Buffum, Thomas B., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Apparatus for and method of testing cords. 1,785,690; Dec. 16.

Bullock, Fred J., assignor to Papec Machine Company, Shortsville, N. Y. Pulverizing mill. 1,785,435; Dec. 16.

Bump, Lewis C., Brandon, Vt. Game. 1,784,818; Dec. 16.

Bunch, Lewis E., Pampa, Tex. Combined mixing and flow device. 1,785,670; Dec. 16.

Burdette, Richard S., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Tire flap. 1,785,691; Dec. 16.

Burgess, C. F., Laboratories, Inc. (See Weiss, Howard F., assignor.)

Burkey, Harvey M., Plainfield, and D. L. Ogden, Woodbridge, N. J., assignors to American Metal Company, Ltd., New York, N. Y. Recovery of metallic elements and alloys. 1,785,247; Dec. 16.

Burkhardt, Jacob, Detroit, Mich., assignor to Third Dimension Pictures, Inc., New York, N. Y. Moving-picture film and method of making. 1,785,330; Dec. 16.

Busey, Herbert S., Providence, assignor to American Electrical Works, Phillipsdale, R. I. Chuck for spooling or reeling machines. 1,785,248; Dec. 16.

Busse, Herbert R., Seattle, Wash. Indoor portable practice putting green. 1,784,863; Dec. 16.

Buttenheim, Harold S., Brooklyn, N. Y. Cleaner for shoe linings. 1,785,512; Dec. 16.

Butz, Walter D., Norristown, Pa. Stocking. Des. 82,792; Dec. 16.

Butz, Walter D., Norristown, Pa. Stocking. Des. 82,793; Dec. 16.

Butz, Walter D., Norristown, Pa. Stocking. Des. 82,794; Dec. 16.

Butz, Walter D., Norristown, Pa. Stocking. Des. 82,795; Dec. 16.

Butz, Walter D., Norristown, Pa. Stocking. Des. 82,796; Dec. 16.

Byer-Rolnick Company. (See Rolnick, Harry, assignor.)

Calcott, William S., Penns Grove, N. J., and I. E. Lee, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Solvent inhibitor for the acid treatment of metals. 1,785,513; Dec. 16.

Calhoon, Tilmon J., Franklin, Ill. Quickly attaching and detaching tractor-wheel cleats or lugs. 1,784,958; Dec. 16.

California Crushed Fruit Corporation. (See Crosby, Harry E., assignor.)

Calvird, Arthur E., Farmington, Mo. Tobacco can. 1,785,294; Dec. 16.

Campau, Emilie J., administratrix. (See Campau, Julian G.)

Campau, Julian G., deceased, assignor of one-fourth to H. Bonifacio, Monroe, Mich.; E. J. Campau, administratrix. Bolt and bushing therefor. 1,785,709; Dec. 16.

Campbell, Alvin R., Seattle, Wash. Pulley block. 1,784,925; Dec. 16.

Campbell, Robert F., Brooklyn, N. Y. Wrist-watch attachment. 1,784,887; Dec. 16.

Campbell, Wallace H., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Rimming press. 1,785,671; Dec. 16.

Candee, Raphael R., McKittrick, and O. F. Harding, Coalinga, Calif. Core-drilling bit. 1,785,405; Dec. 16.

Caproni, Gianni, Rome, Italy. Fuselage fitting. 1,785,615; Dec. 16.

Carbide & Carbon Chemicals Corporation. (See Young, Charles O., assignor.)

Carborundum Company, The. (See Hawke, Clarence E., assignor.)

Carborundum Company, The. (See Walker, P. H., and Kenyon, assignors.)

Cardone, Frank. (See Maccarone, Fred, assignor.)

Carl, Edwin J. (See Soubier, L. D., and Carl.)

Carlin, Bernard, Pensacola, Fla. Equalizing system for four-wheel brakes. 1,785,179; Dec. 16.

Carlson, Gustav A., assignor to The Boye Needle Company, Chicago, Ill. Closure-removing device. 1,785,436; Dec. 16.

Carpenter, Harry B. (See Weaver, Eugene L., assignor.)

Carter, John W., Neillsville, Wis. Automatic weather strip for doors. 1,785,672; Dec. 16.

Carter, William C., Flint, Mich. Carburetor. 1,784,864; Dec. 16.

Case Research Laboratory Incorporated. (See Case, Theodore W., assignor.)

Case, Theodore W., assignor to Case Research Laboratory Incorporated, Auburn, N. Y. Inductive light source. 1,785,070; Dec. 16.

Cashel, John A., Worthington, Minn. Aeroplane. 1,785,295; Dec. 16.

Cattran, Charles, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Printing roller. 1,785,673; Dec. 16.

Caughlan, Walter M. (See Isaacson, F., and Caughlan.)

Chandler, Ernest A., and J. H. McCann, assignors of one-third to I. S. Wampler, Nashville, Tenn. Drop-door oven. 1,785,514; Dec. 16.

Chatillon, John, & Sons. (See Brigham, Henry M., assignor.)

Checker Cab Manufacturing Company, The. (See Johnson, Roy W., assignor.)

Chicago Forging & Manufacturing Co. (See Gilmore, Charles B., assignor.)

Chicago Railway Equipment Company. (See Ekholm, Herbert W., assignor.)

Chicago & Railway Equipment Company. (See Walker, Charles L., assignor.)

Chodorov, Frank, et al. (See Robischon, Ernest W., assignor.)

Christensen, Anders E., Mayfield Heights, Ohio. Line level. 1,785,296; Dec. 16.

Christenson, George, North Plainfield, N. J., assignor to Johns-Manville Corporation, New York, N. Y. Swivel-joint packing. 1,784,926; Dec. 16.

Cinch Manufacturing Corporation. (See Kimbell, Arthur W., assignor.)

Clark, Leon H., and W. S. Sengpiel, assignors to The Sikes Company, Philadelphia, Pa. Chair. 1,785,337; Dec. 16.

Cleveland Folding Machine Company, The. (See Tufts, L. R., and Olson, assignors.)

Clifford, Albert M., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Antioxidant or age resister. 1,785,692; Dec. 16.

Cloud, Wilbur D., New York, assignor to General Railway Signal Company, Rochester, N. Y. Train control. 1,785,693; Dec. 16.

Coates, Wallace R., et al. (See Steele, Carmi J., assignor.)

Coberly, Clarence J., assignor to Kobe, Incorporated, Los Angeles, Calif. Producing taper-slotted pipe. 1,785,071; Dec. 16.

Cochard, Louis, Napa, Calif. Lifeboat. 1,784,819; Dec. 16.

Cochran, Ralf S., assignor to The Surface Combustion Co., Incorporated, Toledo, Ohio. Furnace and conveyer therefor. 1,784,812; Dec. 16.

Cohen, Joseph H., Bridgeport, Conn. Electrical switch. 1,784,820; Dec. 16.
Cohen, Louis, Washington, D. C. Electric signaling. 1,785,297; Dec. 16.
Cole, Samuel I., Brooklyn, N. Y. Condenser casing. Des. 82,797; Dec. 16.
Coleman, George B., Detroit, Mich. Torque-impulse multiplier. 1,785,338; Dec. 16.
Colgate-Palmolive-Peet Company. (See Schwantes, Julius A., assignor.)
Colledge, Edward W., trustee. (See Smith, Eugene B., assignor.)
Colman, Howard D., assignor to Barber-Colman Company, Rockford, Ill. Lacing machine. 1,784,984; Dec. 16.
Colorado Iron Works Company. (See Dickson, Thomas A., assignor.)
Columbia Phonograph Company. (See Hinckley, Frank C., assignor.)
Columbus Handle and Tool Corporation. (See Bassett, Henry L., assignor.)
Commercial Shearing & Stamping Company, The. (See Proctor, Robert V., assignor.)
Congoleum-Nairn, Inc. (See Bonney, R. D., and Irwin, assignors.)
Connecticut Electric Manufacturing Company, The. (See Both, Tonjes A., assignor.)
Continental Motors Corporation. (See Blackinton, George W., assignor.)
Continental Motors Corporation. (See Niven, Archie M., assignor.)
Continental Oil Company. (See Miller, Walter, assignor.)
Coogan Concrete Machinery Company Ltd. (See Coogan, Stephen H., assignor.)
Coogan, Stephen H., assignor to Coogan Concrete Machinery Company Ltd., Elsinore, Calif. Machine for making concrete pipes. 1,785,298; Dec. 16.
Coon, Oscar M., Lubbock, Tex. Fuel burner. 1,784,927; Dec. 16.
Cooney, Thomas F., Las Cruces, N. Mex. Airplane. 1,785,477; Dec. 16.
Cooper, Elisha H. (See Searles, R. R., and Cooper.)
Cooper, James F., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Fabric for breather bags. 1,785,674; Dec. 16.
Cooper, William D., St. Paul, Minn. Telegraphic transmitting instrument. 1,785,072; Dec. 16.
Copeland Products, Inc. (See Brysselbout, Henri A., assignor.)
Copeland Products, Inc. (See Litle, Thomas J., jr., assignor.)
Cornett, Robert M., Kansas City, Mo. Screw-thread cleaner. 1,785,406; Dec. 16.
Corporon, George J., Portland, Me. Table-leg latch. 1,785,616; Dec. 16.
Corson, Harry P., Lakewood, assignor to The Grasselli Chemical Company, Cleveland, Ohio. Flux for use in soldering. 1,785,180; Dec. 16.
Corson, Harry P., Lakewood, and E. S. Ridler, Shaker Heights, assignors to The Grasselli Chemical Company, Cleveland, Ohio. Soft soldering flux. 1,785,181; Dec. 16.
Coulston, Earl V., Shaker Heights, Ohio. Base member for use with cooking vessels. 1,785,182; Dec. 16.
Couture, Marie G., Concord, N. H. Measuring harness. 1,784,888; Dec. 16.
Couture, Marie G., Concord, N. H. Pattern-cutting harness. 1,784,889; Dec. 16.
Cowburn, Frederick C., Gosport, England. Roller bearing. 1,785,617; Dec. 16.
Cox, George D., Philadelphia, Pa. Memorandum ticket for telephone service. 1,784,813; Dec. 16.
Cox, George D., Philadelphia, Pa. Telephone-installer's omnibus number sign card. 1,784,814; Dec. 16.
Crane Co. (See Spring, Laverne W., assignor.)
Crickner, Charles S., assignor to Tridex Corporation, Dallas, Tex. Handle. 1,785,111; Dec. 16.
Cronk, Howard. (See Hoes, J. W., and Cronk.)
Crosby, Harry E., Huntington Park, assignor to California Crushed Fruit Corporation, Los Angeles, Calif. Beverage dispenser. Des. 82,798; Dec. 16.
Cross, Walter M., Kansas City, Mo., assignor, by mesne assignments, to Gasoline Products Company, Inc., Wilmington, Del. Treating petroleum oils. 1,785,073; Dec. 16.
Crowley, John C., Cleveland Heights, assignor to The Dill Manufacturing Company, Cleveland, Ohio. Connecting device for fluid-pressure hose. 1,784,821; Dec. 16.
Crowley, John C., Cleveland Heights, assignor to The Dill Manufacturing Company, Cleveland, Ohio. Air chuck. 1,784,822; Dec. 16.
Crown Stove Works. (See Rogers, Walter F., assignor.)
Cruikshank, Ross T., Minneapolis, Minn. Pump jack. 1,784,823; Dec. 16.
Culin, Alice, New York, N. Y. Ash tray. Des. 82,799; Dec. 16.
Cundiff, Kenneth K., assignor of one-half to B. F. Alexander, Tulsa, Okla. Vacuum cleaner. 1,785,679; Dec. 16.
Currie, William E., Lake Jovita, Fla., and P. de Vries, Detroit, Mich., said P. de Vries assignor to W. E. Currie. Cattle stanchion. 1,784,890; Dec. 16.
Curtin-Howe Corporation. (See Curtin, Leo P., assignor.)
Curtin, Leo P., Freehold, N. J., assignor to Curtin-Howe Corporation. Fungicidal and insecticidal composition and preparing same. 1,785,074; Dec. 16.
Dailey, Roy R., Colorado Springs, Colo. Rock conveyer. 1,785,249; Dec. 16.
Dake, Charles W., assignr to The Pyle-National Company, Chicago, Ill. Brush holder for electrical machines. 1,785,183; Dec. 16.
Dake, Charles W., assignor to The Pyle-National Company, Chicago, Ill. Distribution valve. 1,785,184; Dec. 16.
Daland, Elliot, Torresdale, assignor to Keystone Aircraft Corporation, Bristol, Pa. Shock absorber for landing gears of airplanes. 1,785,339; Dec. 16.
Dalton, Hubert, Stanford, Conn. Smoker's stand. Des. 82,800; Dec. 16.
Damp, Ralph E. (See Shaner, G. A., Damp, and Donovan.)
Danielson, Charles, assignor to Ericson-Nelson Manufacturing Company, Minneapolis, Minn. Folding ironing table. 1,784,959; Dec. 16.
Davies, Caleb, jr., Poland, Ohio. Apparatus for gasifying coal and the like. 1,784,985; Dec. 16.
Davis, Harry A., assignor to Draper Corporation, Hopedale, Mass. Automatically-threading loom shuttle. 1,785,225; Dec. 16.
Davis, Louis E., Seminole, Okla. Well-fishing tool. 1,785,299; Dec. 16.
Day, J. H., Company, The. (See Schiff, Sigmund, assignor.)
Day, J. H., Company, The. (See Tellefsen, Theodore J., assignor.)
Day, James C., South Orange, assignor to The Whitehead and Hoag Company, Newark, N. J. Button receptacle. 1,785,186; Dec. 16.
Day, Jeremiah C., Lexington, Ky. Bunion corrector. 1,785,185; Dec. 16.
Day, Salisbury M., assignor to General Railway Signal Company, Rochester, N. Y. Copper-carbon contact. 1,785,618; Dec. 16.
Day, Salisbury M., Rochester, assignor to General Railway Signal Company, Gates, N. Y. Color-light signal. 1,785,694; Dec. 16.
Deakides, Nicholas, Athens, Ga. Toy. Des. 82,801; Dec. 16.
Dean, Samuel W., Brooklyn, and C. N. Anderson, New York, N. Y., assignors to American Telephone and Telegraph Company. Privacy-signaling system. 1,784,891; Dec. 16.
Dean, Stuart, Indianapolis, Ind. Combination drive and oil pump. 1,785,112; Dec. 16.
De Boer, John H., Syracuse, N. Y. Bed stay. 1,785,075; Dec. 16.
Deere and Company. (See Paul, William L., assignor.)
De Forest, Lee, New York, N. Y., and R. Halpenny, Washington, D. C., assignors, by mesne assignments, to General Talking Pictures Corporation. Loud-speaker. 1,785,377; Dec. 16.
De Freudenreich, Jean. (See Noack, W. G., and de Freudenreich.)
Delaney, Edward L., assignor to I. A. Delaney, Elyria, Ohio. Draftsman's fountain and lettering pen. 1,785,478; Dec. 16.
Delaney, Irene A. (See Delaney, Edward L., assignor.)
De la Torre, Francisco, Chicago, Ill. Combination pencil. 1,785,187; Dec. 16.
De La Tour Castelcicala, Filiberto, Rome, Italy. Rolling apron for airplane wings. 1,785,300; Dec. 16.
De Laval Separator Company, The. (See Wright, Bert R., assignor.)
De Long, Bertha S., Minneapolis, Minn. Garment. 1,784,824; Dec. 16.
De Long, Charles E., assignor to Sangamo Electric Company, Springfield, Ill. Electrically-wound clock. 1,785,301; Dec. 16.
De Mattia, Barthold, Clifton, N. J., assignor, by mesne assignments, to National Rubber Machinery Company, Akron, Ohio. Collapsible core. 1,784,960; Dec. 16.
Depfer, George M. F. (See White, H. E., and Depfer.)
De Vries, Peter. (See Currie, W. E., and de Vries.)
De Yone, Charles M., Dover-Foxcroft, Me. Hilling attachment for cultivators. 1,785,676; Dec. 16.
Dickinson, Joseph H., Winter Park, Fla., and M. H. Dickinson, Seattle, Wash., assignors to Lidgerwood Manufacturing Company, Elizabeth, N. J. Portable cableway. 1,785,340; Dec. 16.
Dickinson, Merian H. (See Dickinson, Joseph H. and M. H.)
Dickson, Thomas A., assignor to Colorado Iron Works Company, Denver, Colo. Ore classifier. 1,785,302; Dec. 16.
Dictaphone Corporation. (See Frykman, Victor L., assignor.)
Dietze, Richard. (See Rupprecht, K., and Dietze.)
Dijksterhuis, Popko R. (See Brandsma, W. F., Dijksterhuis, Sizoo, and Jonas.)
Dill Manufacturing Company, The. (See Bronson, Adelbert E., assignor.)
Dill Manufacturing Company, The. (See Crowley, John C., assignor.)
Disney, Walter E., Los Angeles, Calif. Toy or similar article. Des. 82,802; Dec. 16.
Dockl, Johann, Graz, Austria, assignor to Aktiebolaget Svaeaexport, Stockholm, Sweden. Weighing device for dial balances. 1,785,542; Dec. 16.

Doermann, Albert J., Chicago, Ill. Making abrasive disks. 1,785,437; Dec. 16.
Doheny-Stone Drill Co. (See Stone, Frederick and A. L., assignors.)
Doherty, Henry L. (See Loebell, Henry O., assignor.)
Dolan, Hugh, Pottsville, Pa. Windshield wiper. 1,785,113; Dec. 16.
Donnelly, R. R., & Sons Company. (See Frazier, Philip A., assignor.)
Donovan, George G. (See Shaner, G. A., Damp, and Donovan.)
Dornier, Claudius, assignor of one-half to the firm Dornier-Metallbauten, Gesellschaft mit beschränkter Haftung, Friedrichshafen-on-the-Bodensee, Germany. Metal propeller. 1,785,543; Dec. 16.
Dornier-Metallbauten, Gesellschaft mit beschränkter Haftung. (See Dornier, Claudius, assignor.)
Dorset, Marion, Washington, D. C. Vaccine for hog cholera and manufacturing the same. 1,784,928; Dec. 16.
Douglas, John F. H., assignor of one-half to E. W. Kane, Milwaukee, Wis. Dynamo-electric machine. 1,785,515; Dec. 16.
Dow Chemical Company, The. (See Griswold, Thomas, jr., assignor.)
Doyle, Francis A., and G. A. Lyons, Springfield, Mass. Airplane. 1,785,114; Dec. 16.
Draper, Clare H., assignor to Draper Corporation, Hopedale, Mass. Automatically-threading loom shuttle. 1,785,223; Dec. 16.
Draper Corporation. (See Brown, Carl D., assignor.)
Draper Corporation. (See Davis, Harry A., assignor.)
Draper Corporation. (See Draper, Clare H., assignor.)
Draper Corporation. (See Lindsjo, Verner, assignor.)
Draper Corporation. (See Schmid, Ferdinand A. F., assignor.)
Draper Corporation. (See White, H. E., and Depfer, assignors.)
Dravo Contracting Company, The. (See Edwards, V. B., and Wolfe, assignors.)
Dubilier Condenser Corporation. (See Dubilier, William, assignor.)
Dubilier, William, New Rochelle, assignor to Dubilier Condenser Corporation, New York, N. Y. Process and apparatus for making electric condensers. 1,785,479; Dec. 16.
Ducart, Guillaume, Paris, France. Gas heater for curling irons. 1,785,677; Dec. 16.
Duden, Emil G., Oakmont, Pa., assignor to Wm. B. Scaife & Sons Co. Fluid-treating apparatus. 1,784,892; Dec. 16.
Duden, Emil G., Oakmont, Pa., assignor to Wm. B. Scaife & Sons Company. Water-treating apparatus. 1,784,893; Dec. 16.
Dudley, Homer W., Teaneck, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Speech transmission. 1,784,825; Dec. 16.
Dufford, John R. (See Hough, A., Dufford, and Leonhard.)
Dumont, Frank A., Shelton, Wash. Airplane propeller. 1,784,894; Dec. 16.
Dumper, Thomas H., trustee. (See Haertel, Hans R., assignor.)
Duncan, Arthur L., Oakland, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Apparatus for feeding, trimming, and cutting fruit preparatory to removing the pit therefrom. 1,785,000; Dec. 16.
Duncan, Arthur L., Oakland, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit-treating method and apparatus. 1,785,001; Dec. 16.
Duncan, Arthur L., Oakland, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit-pitting machine. 1,785,022; Dec. 16.
Duncan, Arthur L., Piedmont, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitting and coring apparatus. 1,785,002; Dec. 16.
Duncan, Arthur L., Piedmont, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitting and coring method and apparatus. 1,785,003; Dec. 16.
Duncan, Arthur L., Piedmont, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitting and coring apparatus. 1,785,004; Dec. 16.
Duncan, Arthur L., Piedmont, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitting and coring apparatus. 1,785,005; Dec. 16.
Duncan, Arthur L., Piedmont, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitting and coring method. 1,785,006; Dec. 16.
Duncan, Arthur L., Piedmont, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitting and coring mechanism. 1,785,007; Dec. 16.
Duncan, Arthur L., Piedmont, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Method and apparatus for clearing fruit-pitting machines. 1,784,008; Dec. 16.
Duncan, Arthur L., Piedmont, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit-pitting machine. 1,785,009; Dec. 16.
Duncan, Arthur L., Piedmont, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Pitting and coring machine. 1,785,010; Dec. 16.
Dunham, George W., assignor to Whirldry Corporation, Utica, N. Y. Laundry machine. 1,785,577; Dec. 16.
Dunham, George W., assignor to Whirldry Corporation, Utica, N. Y. Laundry machine. 1,785,578; Dec. 16.
Dunham, George W., New York, assignor to Whirldry Corporation, Utica, N. Y. Pumping mechanism for washing machines. 1,785,579; Dec. 16.
Dunker, Louis H. A., assignor to The Steel-Mesh Road Surface Company, Limited, Birmingham, England. Construction of roads and the like. 1,784,895; Dec. 16.
Dunnican, George W., Bloomfield, N. J., assignor to Dorothy Gray, Inc. Vanity case. 1,785,303; Dec. 16.
Duplate Corporation. (See Sherts, James H., assignor.)
Du Pont, E. I. de Nemours & Company. (See Calcott, W. S., and Lee, assignors.)
Dura Company, The. (See Graff, George, assignor.)
Durdin, Augustus C., jr., Chicago, Ill. Pumping apparatus for sewage and other liquids. 1,785,480; Dec. 16.
Dyke, Francis R., Dartmouth, Nova Scotia, Canada. Ash-dust eliminator. 1,785,481; Dec. 16.
Dykstra, Harry B., Wilmington, Del., assignor, by mesne assignments, to The Grasselli Chemical Company, Cleveland, Ohio. Soldering flux. 1,785,115; Dec. 16.
Eagle Pencil Company. (See Fischer, John H., assignor.)
Eames Company. (See Nielsen, Hans P., assignor.)
Eastern Tool and Manufacturing Company. (See Lorber, Charles, assignor.)
Eastman Kodak Company. (See Webber, C. S., and Staud, assignors.)
Easton, Henry P., jr., Nutley, N. J. Garment and fur steamer. 1,785,619; Dec. 16.
Eberhardt, Stanley L. H., London, England. Method of and apparatus for making tickets. 1,785,250; Dec. 16.
Eckersley, James E., Aberdeen, assignor of one-half to A. Polson, Hoquiam, Wash. Shingle and veneer cutting machine. 1,785,439; Dec. 16.
Eclipse Machine Company. (See Lansing, Raymond P., assignor.)
Eddystone Cement Corporation. (See Wilner, Elias R., assignor.)
Edgerton, Israel V., assignor to Palace Poultry Car Company, Chicago, Ill. Water tank for stock cars. 1,784,826; Dec. 16.
Edlin, Walter F., Union City, N. J. Nursing-bottle heater. 1,785,438; Dec. 16.
Edwards, Vere B., Moon Township, Allegheny County, and G. F. Wolfe, Coraopolis, Pa., assignors to The Dravo Contracting Company. Bridge-building apparatus. 1,785,023; Dec. 16.
Efcolite Corporation. (See von Nessen, Walter, assignor.)
Eisenberg, Semon, Savannah, Ga. Toothbrush. 1,784,986; Dec. 16.
Ekholm, Herbert W., assignor to Chicago Railway Equipment Company, Chicago, Ill. Brake-beam structure. 1,784,896; Dec. 16.
Ekstedt, Gustaf M., Gottenborg, Sweden. Device to be used in teaching music. 1,785,440; Dec. 16.
Ekstrom, Gustaf H., Rockford, assignor to C. P. Parker, trustee, Evanston, Ill. Pad holder for rubbing machines. 1,785,695; Dec. 16.
Electrical Research Products Inc. (See Reynolds, John L., assignor.)
Electro Metallurgical Co. (See Udy, Marvin J., assignor.)
Electrons, Inc. (See Meyer, F., and Spanner, assignors.)
Elias, Albert I., Long Beach, assignor to Wise Shoes, Inc., New York, N. Y. Store front. Des. 82,804; Dec. 16.
Ellis, George H., St. Paul, assignor to The Insulite Company, Minneapolis, Minn. Process and apparatus for disintegrating wood. 1,785,544; Dec. 16.
Ellson, Horace S. (See Hansen, C., and Ellson.)
Elmen, Gustaf W., Leonia, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Magnetic material. 1,784,827; Dec. 16.
Enneking, Joseph J., Fort Thomas, Ky. Electric annunciator. 1,784,961; Dec. 16.
Erdmann, Robert H. M., Jamaica, N. Y. Superheater for boilers. 1,785,441; Dec. 16.
Ericson-Nelson Manufacturing Company. (See Danielson, Charles, assignor.)
Ericsson, Eric W., Brooklyn, N. Y. Safety razor. 1,785,545; Dec. 16.
Erie Malleable Iron Company. (See Metcalf, George R., jr., assignor.)
Ernst, August, Johnstown, N. Y. Tanning chamois, buckskins, or other leather. 1,784,828; Dec. 16.
Estoppey, Georges, Dayton, Ohio. Aerial navigation instrument. 1,784,929; Dec. 16.
Etheridge, Harry, Zelienople, Pa. Support for railway rails. 1,785,251; Dec. 16.
Eufinger, Peter, Frankfort-on-the-Main, assignor to P. Lancier, Munster, Germany. Underground-cable-pulling device. 1,784,829; Dec. 16.
Evans, Thomas D., Phoenixville, Pa. Boiler cleaner. 1,785,024; Dec. 16.
Everett, Edward A., New York, N. Y. Railway signal lamp. 1,785,516; Dec. 16.
F-N Company, The. (See Thompson, Lorenzo D., assignor.)

Fafnir Bearing Company, The. (See Searles, Raymond R., assignor.)
Fafnir Bearing Company, The. (See Searles, R. R., and Cooper, assignors.)
Fafnir Bearing Company, The. (See Smith, John W., assignor.)
Fahrenwald, Frank A., assignor to American Manganese Steel Company, Chicago Heights, Ill. Strain hardening manganese steel. 1,784,865; Dec. 16.
Fahrenwald, Frank A., assignor to American Manganese Steel Company, Chicago, Ill. Strain hardening steel. 1,784,866; Dec. 16.
Farrington, John F., Flushing, assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. 1,784,867; Dec. 16.
Fassinger, Charles, assignor to Oliver Iron & Steel Corporation, Pittsburgh, Pa. Die mechanism. 1,785,116; Dec. 16.
Fehrle, Alfred. (See Streitwolf, K., and Fehrle.)
Felizianetti, Narsete, Los Angeles, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit-pitting machine. 1,785,011; Dec. 16.
Fellroth, Erick O., assignor to Martin Brothers Company, Minneapolis, Minn. Overalls. 1,785,580; Dec. 16.
Fellroth, Erick O., assignor to Martin Brothers Company, Minneapolis, Minn. Overgarment. 1,785,581; Dec. 16.
Felsenthal, Harold, assignor to Guarsteel Safety Stair Co., Chicago, Ill. Square tubing for newel posts. 1,785,025; Dec. 16.
Ferries, William D., assignor to Frantz Manufacturing Co., Sterling, Ill. Latch. Des. 82,805; Dec. 16.
Fesko, Thomas P., Ecorse, via Detroit, Mich. Convertible automobile body. 1,784,962; Dec. 16.
Fischer, Howard L., assignor to Brown & Bigelow, St. Paul, Minn. Perpetual calendar. Des. 82,806; Dec. 16.
Fischer, John H., assignor to Eagle Pencil Company, New York, N. Y. Compass or similar article. Des. 82,807; Dec. 16.
Fisher, Charles, deceased, New York, and C. D. Fisher, Beacon, N. Y.; L. S. Gatter, executor. Educational toy and display device. 1,785,442; Dec. 16.
Fisher, Charles D. (See Fisher, Charles and C. D.)
Fisher, Isaac W., Long Beach, Calif. Weed cutter. 1,785,443; Dec. 16.
Fisher, Robert W., assignor to P. Riess, Chicago, Ill. Luminous sign. 1,785,341; Dec. 16.
Fisher, Wilbur A., Temple, Tex. Condiment holder. Des. 82,808; Dec. 16.
Flanders, Paul B., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Mechanical impedance device. 1,784,830; Dec. 16.
Flett, William, Melrose, Mass., assignor to National Publishing Company, Philadelphia, Pa. Machine for making loose leaves for books. 1,785,546; Dec. 16.
Flintkote Company, The. (See Levin, Harold L., assignor.)
Flood, Leo P., Sunnyside, assignor to Mason Manufacturing Company, New York, N. Y. Duplex feeder for low-pressure heating boilers. 1,785,547; Dec. 16.
Florian, Frank, Chicago, Ill. Track sander for motor vehicles. 1,784,832; Dec. 16.
Flowers, Henry F., Findlay, Ohio. Dump vehicle with actuated doors. 1,785,678; Dec. 16.
Fonferek, Edward, Gillett, Wis. Antiskid chain. 1,785,117; Dec. 16.
Forbes, Kingston, Flint, assignor to General Motors Corporation, Detroit, Mich. Radiator cap. Des. 82,809; Dec. 16.
Fourness Development Corporation, The. (See Fourness, Wilfred, assignor.)
Fourness, Wilfred, Oakland, Calif., assignor to The Fourness Development Corporation, New York, N. Y. Compressor mechanism. 1,785,407; Dec. 16.
Fox Case Corporation. (See Sponable, Earl I., assignor.)
France, Antoine, Brussel, Belgium. Classifying apparatus. 1,785,679; Dec. 16.
Frank, Benjamin M., New York, assignor to Greenpoint Metallic Bed Co., Inc., Brooklyn, N. Y. Folding mattress. 1,785,252; Dec. 16.
Frank, John P., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Cash register. 1,785,378; Dec. 16.
Frank, Leon, assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,810; Dec. 16.
Frank, Leon, assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,811; Dec. 16.
Frank, Leon, assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,812; Dec. 16.
Frank, Leon, assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,813; Dec. 16.
Frank, Leon, assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,814; Dec. 16.
Frank, Leon, assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,815; Dec. 16.
Frank, Leon, assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,816; Dec. 16.
Frank, Leon, assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,817; Dec. 16.
Frank, Leon, assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,818; Dec. 16.
Frank, Leon, assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,819; Dec. 16.
Frank, Leon, assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,820; Dec. 16.
Franklin Simon & Company. (See Long, Dorothy, assignor.)
Frantz Manufacturing Co. (See Ferris, William D., assignor.)
Frazier, Philip A., assignor to R. R. Donnelley & Sons Company, Chicago, Ill. Rotatable indexing table. 1,785,408; Dec. 16.
Freshkoff, Vladimir, New York, N. Y. Brake-band-lining device. 1,785,076; Dec. 16.
Frise, Leslie G., assignor to The Bristol Aeroplane Company, Limited, Bristol, England. Control surface for aircraft, submersibles, and the like. 1,785,620; Dec. 16.
Fritz, Howard E., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Cushioning anchorage device. 1,784,897; Dec. 16.
Fry, John W., Struthers, Ohio. Balancing spring. 1,785,118; Dec. 16.
Frykman, Victor L., assignor to Dictaphone Corporation, Bridgeport, Conn. Record-resurfacing machine. 1,785,409; Dec. 16.
Fulwiler, Arthur W., Highland Park, Mich., assignor to The Gwisdalla Floatless Carburetor Corporation. Carburetor. 1,785,026; Dec. 16.
Funalman, John S., Ashland, Ohio. Humidifying device for internal-combustion engines. 1,784,831; Dec. 16.
Funk, Ernest R. (See Ryan, E., and Funk.)
Furedy, Frank, Penn-Wynne, Pa. Pencil. Des. 82,821; Dec. 16.
G & O Manufacturing Company, The. (See Oppe, Charles, assignor.)
G. and W. Electric Specialty Company. (See Rah, Joseph, assignor.)
Gabor, Joseph, New York, N. Y. Attachable radiating element. 1,785,621; Dec. 16.
Gaisman, Henry J., New York, N. Y., assignor to Autostrop Safety Razor Company, Inc., New York, N. Y. Safety razor. 1,785,077; Dec. 16.
Galion Metallic Vault Company, The. (See Smith, Ralph E., assignor.)
Gammeter, William K., Cadiz, Ohio. Cover for registers and radiators. 1,785,253; Dec. 16.
Ganz, Leo, Chicago, Ill. Water heater. 1,785,304; Dec. 16.
Gary, Laurence A., San Francisco, and H. G. Tasker, Los Angeles, Calif., assignors to American Telephone and Telegraph Company. Circuit switch. 1,784,898; Dec. 16.
Gas Industries Company. (See Levin, Isaac H., assignor.)
Gasoline Products Company. (See Cross, Walter M., assignor.)
Gates, Leroy G. (See Hauk, John W., assignor.)
Gatler, L. Stewart, executor. (See Fisher, Charles and C. D.)
General Aniline Works, Inc. (See Mauthe, G., and Thauss, assignors.)
General Electric Company. (See Baum, Seymour L., assignor.)
General Electric Company. (See Blake, David K., assignor.)
General Electric Company. (See Blume, Louis F., assignor.)
General Electric Company. (See McLachlan, Willard J., assignor.)
General Electric Company. (See Merrill, Wilbur L., assignor.)
General Electric Company. (See Rupprecht, K., and Dietze, assignors.)
General Electric Company. (See Thompson, Louis W., assignor.)
General Electric Company. (See Weiske, P., and Rupprecht, assignors.)
General Electric Company. (See Winter, Fred H., assignor.)
General Motors Corporation. (See Forbes, Kingston, assignor.)
General Motors Corporation. (See Liebermann, Paul B., assignor.)
General Motors Corporation. (See Williams, James F., assignor.)
General Railway Signal Company. (See Cloud, Wilbur D., assignor.)
General Railway Signal Company. (See Day, Salisbury M., assignor.)
General Railway Signal Company. (See Howe, Winthrop K., assignor.)
General Railway Signal Company. (See Osborne, John L., assignor.)
General Railway Signal Company. (See Reichard, Wade H., assignor.)
General Railway Signal Company. (See Ross, Oscar A., assignor.)
General Railway Signal Company. (See Taylor, Herbert B., assignor.)

General Railway Signal Company. (See Wight, Sedgwick N., assignor.)
General Talking Pictures Corporation. (See de Forest, L., and Halpenny, assignors.)
George, Harman A., Petaluma, Calif. Switch. 1,784,930; Dec. 16.
Gephart, Harry F., Chicago, Ill. Fishing rod. 1,785,027; Dec. 16.
Gerber, Ralph, Raymond, Wash. Double end drive reverse clutch. 1,785,548; Dec. 16.
Gerlowski, Anthony, Chicago, Ill., assignor to The Rome Company, Inc. Connecting springs. 1,785,188; Dec. 16.
Gesellschaft für Drahtlose Telegraphie m. b. H. (See Schröter, Fritz, assignor.)
Gessel, Benjamin M. (See Anderson, R. O., Rudy, and Gessel.)
Giampaoli, Joseph G., Elkridge, Md. Automobile radiator shutter. 1,785,482; Dec. 16.
Gibson, Charles J., Greenville, Mich. Device for making shaped pieces of ice. 1,785,078; Dec. 16.
Gilbert, Henry J., assignor to Saginaw Manufacturing Co., Saginaw, Mich. Folding joint for braces and the like. 1,785,342; Dec. 16.
Gilbert, Henry J., assignor to Saginaw Manufacturing Co., Saginaw, Mich. Latch for folding braces. 1,785,343; Dec. 16.
Gilfillan, Dean M., et al. (See Lambert, William C., assignor.)
Gilkerson, Francis M., Beloit, Wis. Cushioned shoe. 1785,410; Dec. 16.
Gilmore, Carl, Oakland, Calif. Sheathing paper. 1,785,379; Dec. 16.
Gilmore, Charles B., assignor to Chicago Forging & Manufacturing Company, Chicago, Ill. Hood latch. 1,784,931; Dec. 16.
Gilson, Robert M., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Apparatus for the control of highway-crossing signals. 1,784,868; Dec. 16.
Gleason, C. Roy, Chicago, Ill. Tank for chromium plating. 1,784,987; Dec. 16.
Goldknopf, Abraham, New York, N. Y. Fountain pen. 1,785,680; Dec. 16.
Golinsk, Paul A., and F. W. Broderick, assignors, by mesne assignments, to Selectograph Company, Chicago, Ill. Recording device for addressing machines. 1,785,517; Dec. 16.
Goodrich, B. F., Company, The. (See Fritz, Howard E., assignor.)
Goodrich, B. F., Company, The. (See Jones, Paul C., assignor.)
Goodwin, Ernest G., Pelham, assignor to Standard Coupler Company, New York, N. Y. Cotter pin. 1,785,622; Dec. 16.
Goodyear Tire & Rubber Company, The. (See Beebe, Paul, assignor.)
Goodyear Tire & Rubber Company, The. (See Buffum, Thomas B., assignor.)
Goodyear Tire & Rubber Company, The. (See Burdette, Richard S., assignor.)
Goodyear Tire & Rubber Company, The. (See Campbell, Wallace H., assignor.)
Goodyear Tire & Rubber Company, The. (See Cattran, Charles, assignor.)
Goodyear Tire & Rubber Company, The. (See Clifford, Albert M., assignor.)
Goodyear Tire & Rubber Company, The. (See Cooper, James F., assignor.)
Goodyear Tire & Rubber Company, The. (See Mallory, Gerald D., assignor.)
Goodyear Tire & Rubber Company, The. (See Sebrell, L. B., and Teppema, assignors.)
Goodyear Tire & Rubber Company, The. (See Shively, Walter E., assignor.)
Goodyear Tire & Rubber Company, The. (See State, Will C., assignor.)
Goranson, David. (See Goranson, Hjalmar and D.)
Goranson, Hjalmar and D., San Jose, assignors, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitter. 1,785,012; Dec. 16.
Gorjan, Elsa, Zagreb, Yugoslavia. Bathing shoe. 1,785,623; Dec. 16.
Gorsuch, Howard F., and A. S. Hughes, assignors to Hughes-Keenan Company, Mansfield, Ohio. Loader. 1,785,119; Dec. 16.
Goudard, Félix, Neuilly sur Seine, France. Carburetor. 1,785,681; Dec. 16.
Graff, George, assignor to The Dura Company, Toledo, Ohio. Motor-vehicle window-regulator handle. Des. 82,822; Dec. 16.
Grapp, Albert E., Minneapolis, Minn. Oven structure. 1,785,079; Dec. 16.
Grasselli Chemical Company, The. (See Barrett, Harold J., assignor.)
Grasselli Chemical Company, The. (See Bowman, Frederick J., assignor.)
Grasselli Chemical Company, The. (See Corson, Harry P., assignor.)
Grasselli Chemical Company, The. (See Corson, H. P., and Ridler, assignors.)
Grasselli Chemical Company, The. (See Dykstra, Harry B., assignor.
Grasselli Chemical Company, The. (See Lutz, George, assignor.)
Grasselli Chemical Company, The. (See McQuaid, Howard S., assignor.)
Grasselli Chemical Company, The. (See Monroe, Hanson H., assignor.)
Grasselli Chemical Company, The. (See Schweitzer, William K., assignor.)
Grasselli Chemical Company, The. (See Taylor, Edward A., assignor.)
Gray, Dorothy, Inc. (See Dunnican, George W., assignor.)
Gray, Frank, assignor to Western Electric Company, Incorporated, New York, N. Y. Rectifier. 1,784,869; Dec. 16.
Graybar Electric Company. (See Hetzner, Arthur E., assignor.)
Green, George, et al. (See Seidel, Morris, assignor.)
Greenpoint Metallic Bed Co. (See Frank, Benjamin M., assignor.)
Greve, Edgar E., Bellevue, assignor, by mesne assignments, to Oil Well Supply Company, Pittsburgh, Pa. Earth-boring rotary. 1,785,254; Dec. 16.
Greve, Edgar E., Bellevue, assignor, by mesne assignments, to Oil Well Supply Company, Pittsburgh, Pa. Crown-block-pulley construction. 1,785,255; Dec. 16.
Greve, Edgar E., Bellevue, assignor, by mesne assignments, to Oil Well Supply Company, Pittsburgh, Pa. Rotary drilling machine. 1,785,256; Dec. 16.
Greve, Edgar E., Bellevue, assignor, by mesne assignments, to Oil Well Supply Company, Pittsburgh, Pa. Control mechanism for rotary drilling apparatus. 1,785,257; Dec. 16.
Griggs, John O., Steubenville, Ohio. Open-hearth regenerative furnace. 1,785,549;; Dec. 16.
Grilley, Ernest M., Waterbury, assignor, by mesne assignments, to George E. Ailing & Sons, Winsted, Conn. Ash tray. 1,785,305; Dec. 16.
Grisard, Paul D., Poughkeepsie, N. Y. Razor. 1,785,189; Dec. 16.
Grisard, Paul D., Poughkeepsie, N. Y. Razor. 1,785,190; Dec. 16.
Griswold, Thomas, jr., assignor to the Dow Chemical Company, Midland, Mich. Apparatus for chemical reactions. 1,785,080; Dec. 16.
Groesbeck, Ernie, Oshkosh, Wis. Rotary pump or engine. 1,785,444; Dec. 16.
Guarsteel Safety Stair Co. (See Felsenthal, Harold, assignor.)
Guillemette, Romeo, Taunton, Mass. Aeroplane-steering apparatus. 1,785,806; Dec. 16.
Gursky, Hyman, and M. Volkes, Brooklyn, N. Y. Folding cot. 1,785,258; Dec. 16.
Gwisdalla Floatless Carburetor Corporation, The. (See Fulwiler, Arthur W., assignor.)
Hacker Manufacturing Company. (See Trotter, Henry E., assignor.)
Hackett, Robert W., Upper Darby, and A. G. Worrall, assignors to L. J. Kolb, trading as Safette Glass Company, Philadelphia, Pa. Border seal for laminated glass. 1,785,696; Dec. 16.
Haertel, Hans R., Wrentham, assignor to T. H. Dumper, trustee, Newton, Mass. Rubber articles and producing the same. 1,785,081; Dec. 16.
Haertel, Hans R., Wrentham, assignor to T. H. Dumper, trustee, Newton, Mass. Rubber article and producing the same. 1,785,082; Dec. 16.
Haertel, Hans R., Wrentham, assignor to T. H. Dumper trustee, Newton, Mass. Producing rubber articles. 1,785,083; Dec. 16.
Haertel, Hans R., Wrentham, assignor to T. H. Dumper trustee, Newton, Mass. Rubber articles and producing the same. 1,785,084; Dec. 16.
Haertel, Hans R., Wrentham, assignor to T. H. Dumper trustee, Newton, Mass. Rubber articles and producing the same. 1,785,085; Dec. 16.
Hagemann, Edwin C., Short Hills, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Toroidal inductance device. 1,784,833; Dec. 16.
Hagen, Berger A. (See Martell, C., and Hagen.)
Hale, Clyde H., Riverside, and H. J. Kleefisch, Oak Park, Ill. Kitchen utensil. 1,785,191; Dec. 16.
Hall, Wesley R., Cincinnati, Ohio. Garage construction. 1,784,870; Dec. 16.
Haller, Ludwig, Stuttgart, Germany. Tooth clamp. 1,785,624; Dec. 16.
Halpenny, Richard. (See de Forest, L., and Halpenny.)
Hamilton Beach Mfg. Co. (See Mross, Edward, assignor.)
Hamilton, William B., Pittsburgh, Pa. Window ventilator. 1,785,682; Dec. 16.
Hamilton, William F., assignor of one-half to F. S. Rollins, New York, N. Y. Ignition system. 1,785,411; Dec. 16.
Hammerly, Herman J., Wallingford, assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Double-throw switch. 1,785,192; Dec. 16.
Hammerly, Herman J., Wallingford, assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Multiple-break switch. 1,785,194; Dec. 16.
Hammond, John H., jr., Glouchester, Mass. System and method of communication. 1,785,307; Dec. 16.
Hancock, Gustavus A., Oak Lane, Pa. Hearth broom. Des. 82,823; Dec. 16.
Handley, George F., Glendale, assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriter machine. 1,785,445; Dec. 16.
Hanner, C. A. (See Kalo, Albert A., assignor.)

Hansen, Charles, and H. S. Ellson, Lakewood, Ohio, assignor to National Carbon Company, Inc. Current-collecting brush. 1,785,483; Dec. 16.

Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Charging device. 1,785,344; Dec. 16.

Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Hose clamp. 1,785,550; Dec. 16.

Hansen, Hans P., Syracuse, N. Y. Mortuary-record container. 1,785,582; Dec. 16.

Hanson, Nathan E., assignor to Union Special Machine Company, Chicago, Ill. Rug-tufting machine. 1,785,625; Dec. 16.

Hanus, Frank, Cleveland, Ohio. Apparatus for manufacturing ice. 1,784,834; Dec. 16.

Hardie, Robert W., Fanwood, N. J. Dividing strip. 1,785,028; Dec. 16.

Harding, Oscar F. (See Candee, R. R., and Harding.)

Harding, Oscar F., Long Beach, Calif. Core by-pass drill. 1,785,120; Dec. 16.

Harris, Ford W. (See Turner, Charles L., assignor.)

Harris, Richard A., assignor to Baker Perkins, Limited, Peterborough, England. Wrapping machine for sweetmeats and the like. 1,784,835; Dec. 16.

Harrison, Henry C., Port Washington, assignor to Western Electric Company, Incorporated, New York, N. Y. Mechanical transmission system. 1,784,871; Dec. 16.

Harrison, John G. (See Hough, A., and Harrison.)

Hart, Hubert C., Unionville, Conn. Safety razor. 1,785,446; Dec. 16.

Hartford-Empire Company. (See Peiler, Karl E., assignor.)

Hartman, Edward, assignor to Sandwich Manufacturing Co., Sandwich, Ill. Portable grain elevator. 1,784,872; Dec. 16.

Hartstoff-Metall Aktiengesellschaft (Hametag). (See Podszus, Emil, assignor.)

Harwick, Henry K., Darby, Pa. Locomotive-boiler support. 1,785,626; Dec. 16.

Hasemann, John L., Caldwell, assignor to American Flexible Shaft Manufacturing Corporation, Newark, N. J. Casing for flexible shafts. 1,785,345; Dec. 16.

Hatch, Charles T., assignor to Union Steel Products Company, Albion, Mich. Separator. 1,785,346; Dec. 16.

Hatfield, Percy W., assignor to Winship, Bolt & Co., Wakefield, Mass. Label-sewing machine. 1,785,412; Dec. 16.

Hauk John W., Whittier, assignor of one-half to L. G. Gates, Bakersfield, Calif. Automatic feed device for rotary drill bits. 1,785,086; Dec. 16.

Havens, Wilson W., Oakland, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitting and coring machine. 1,785,013; Dec. 16.

Hawes, Charles L., assignor of one-half to C. Strassheim, Chicago, Ill. Mechanical radiator ornament. 1,784,988; Dec. 16.

Hawke, Clarence E., Metuchen, N. J., assignor to The Carborundum Company, Niagara Falls, N. Y. Combustion chamber. 1,785,583; Dec. 16.

Hawley, Jesse B., Wilmette, assignor, by mesne assignments, to United Reproducers Corporation, St. Charles, Ill. Amplifier horn. 1,785,193; Dec. 16.

Haywood James B., Hopewell, Va. Copyholder. 1,784,873; Dec. 16.

Hazard, Joseph J., Saratoga Springs, N. Y. Radio. 1,785,627; Dec. 16.

Heath, Walter J., et al. (See Minium, Abram E., assignor.)

Heckert, Fritz, assignor to Kienzle Uhrenfabriken A. G., Schwenningen-on-the-Neckar, Wurttemberg, Germany. Automatic strike-regulating means for clocks. 1,785,551; Dec. 16.

Heimendinger, Bert R., Britt, Iowa. Valve push rod. 1,785,308; Dec. 16.

Heina, William M., Long Island City, N. Y., assignor to Automobile Radio Corporation. Portable radio apparatus. 1,785,552; Dec. 16.

Heinert, Heinrich. (See von Ardenne, M., and Heinert.)

Hellermann, Paul F., Hamburg, Germany. Grip for electric cables. 1,785,628; Dec. 16.

Helms, Harry W., assignor to Highway Trailer Company, Edgerton, Wis. Fifth-wheel construction for semi-trailers. 1,785,697; Dec. 16.

Hemphill Company. (See Lawson, John and R. H., assignors.)

Herrschaft, William, New York, N. Y. Producing theatrical effects. 1,785,347; Dec. 16.

Hess, Edward C., Pittsburgh, Pa. Envelope feeder. 1,784,836; Dec. 16.

Hessler, Arthur, assignor to The Alligator Company, St. Louis, Mo. Apparel coat. 1,785,029; Dec. 16.

Hetzner, Arthur E., East Orange, N. J., assignor to Graybar Electric Company, Inc., New York, N. Y. Multiple push-button unit. 1,785,087; Dec. 16.

Heuser, Herman, Chicago, Ill. Aldehyde-free alcoholic liquids. 1,785,447; Dec. 16.

Hiatt, William F., assignor of one-half to H. D. Skiles, Indianapolis, Ind. Connecting rod and cross-head. 1,784,837; Dec. 16.

Hickerson, Henry P., Anaheim, assignor to E. Koppl, Long Beach, Calif. Valve construction for slush pumps. 1,785,259; Dec. 16.

Hickok Manufacturing Company. (See Shields, Lowell W., assignor.)

Hicks, William W., San Francisco, Calif. Electric renecting heater. 1,785,418; Dec. 16.

Hiering, William C., assignor to J. E. Mergott Company, Newark, N. J. Bag-frame clasp. 1,785,380; Dec. 16.

Higgin, Henry, assignor to The Higgin Manufacturing Company, Newport, Ky. Screen for casment windows. 1,785,584; Dec. 16.

Higgin Manufacturing Company, The. (See Higgin, Henry, assignor.)

Higgins, Grover B., Chicago, Ill. Coiling device. 1,785,518; Dec. 16.

Highberger, John H. (See McLaughlin, G. D., Rockwell, O'Flaherty, and Highberger.)

Highway Trailer Company. (See Helms, Harry W., assignor.)

Hills, Charles F., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Elimination of corona in alternators. 1,784,989; Dec. 16.

Hills, Charles F., Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company. Corona elimination in dynamo-electric machines. 1,784,990; Dec. 16.

Hinckley, F. C., Stratford, assignor to Columbia Phonograph Company, Inc., Bridgeport, Conn. Sound-amplifying means. 1,785,553; Dec. 16.

Hoagland, Frank O., Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Welding drills. 1,784,932; Dec. 16.

Hobé, William W., New York, N. Y. Bottle or similar article. Des. 82,824; Dec. 16.

Hoes, James W., and H. Cronk, assignors to The Wind-Blast Chaffer Company, Sidney, Nebr. Chaffer for thrashing machines and grain harvesters. 1,785,195; Dec. 16.

Hofmann, Hugo, Johnson City, Tenn., assignor to American Bemberg Corporation, New York, N. Y. Tying string for skeins. 1,785,414; Dec. 16.

Hogan, Edward L. (See Morse, C. T., and Hogan.)

Hoge, John R., and L. D. Soubier, Toledo, Ohio, assignor to American Patents Corporation. Game apparatus. 1,785,088; Dec. 16.

Holloway, John H., La Fayette, Ind. Graphophone clock. 1,785,121; Dec. 16.

Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Adjustable jack. 1,784,991; Dec. 16.

Holmes, Morris P., Claremont, N. H., assignor to Sullivan Machinery Company. Mining machine. 1,785,196; Dec. 16.

Holoubek, Joseph, New York, N. Y. Crab trap. 1,785,348; Dec. 16.

Holt, Grover J., and W. Longevin, Crosby, assignors, by mesne assignments, to The Reclamation Company, St. Paul, Minn. Track-shifting apparatus. 1,784,963; Dec. 16.

Holtzman, John, New York, N. Y., assignor to Francis Keil & Son, Inc. Lock. 1,785,381; Dec. 16.

Honey, Alfred E., Ilford, assignor to J. Stone & Company Limited, Deptford, England. Power-transmission gearing for use on railway and other vehicles. 1,785,197; Dec. 16.

Hookless Fastener Company. (See Aronson, Peter A., assignor.)

Hookless Fastener Company. (See Nicholson, Robert H., assignor.)

Hookless Fastener Company. (See Norton, Samuel H., assignor.)

Hookless Fastener Company. (See Sundback, Gideon, assignor.)

Hopkins, George F., Jackson, Mich., W. K. Sagendorph, executor of said George F. Hopkins. Pneumatic engine cylinder and control for lathe chucks and the like. 1,785,349; Dec. 16.

Horiy Shinjiro, Tokyo, Japan. Stencil sheet. 1,785,260; Dec. 16.

Horton, E., & Son Company, The. (See Regan, Joseph C., assignor.)

Hotstream Heater Company. (See Morrow, Clarence H., assignor.)

Hough, Arthur, Summit, J. R. Dufford, Paterson, and W. C. Leonhard, Passaic, N. J. Manufacture of nitrocellulose. 1,785,030; Dec. 16.

Hough, Arthur, Summit, N. J., and J. G. Harrison, New York, N. Y.; said Hough assignor to said Harrison. Method and product for preventing efflorescence in ceramics. 1,785,309; Dec. 16.

Howard, Charles C., Louisville, Ky. Assembling sheets and applying adhesive thereto. 1,785,261; Dec. 16.

Howard, Frank A. (See Loomis, N. E., Tomlinson, and Howard.)

Howe, Winthrop K., assignor to General Railway Signal Company, Rochester, N. Y. Switch machine for railroads. 1,785,698; Dec. 16.

Hubbard, Frank A., Islip, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Control of wave transmission. 1,784,874; Dec. 16.

Huffman, Sherman O., Duquesne, Pa. Leader carrier. 1,784,965; Dec. 16.

Hugershoff, Reinhard, Dresden, assignor to "Ikarus" Internationale Patent-Vertwertungs A. G., Vaduz im Furstentum, Liechtenstein, Stereoscopic measuring instrument. 1,785,448; Dec. 16.

Hughes, Arthur S. (See Gorsuch, H. F., and Hughes.)

Hughes, Arthur S., Mansfield, Ohio. Earth-working attachment for tractors. 1,785,122; Dec. 16.

Hughes-Keenan Company. (See Gorsuch, H. F., and Hughes, assignors.)

Hull, Howard J. (See Keener, Monroe, assignor.)

Humason, Granville A., Houston, Tex. Well packer. 1,785,123; Dec. 16.

Humberstone, Ernest H., and H. R. Welch, assignors to The Marble Cliff Quarries Company, Columbus, Ohio. Hopper-feeding device. 1,785,585; Dec. 16.

Hume, Edward S., Perth, Western Australia, assignor to Hume Steel Limited, Melbourne, Australia. Manufacture or lining of pipes by centrifugal action. 1,785,586; Dec. 16.

Hume Steel Limited. (See Hume, Edward S., assignor.)

Hunter, Walter P., Vancouver, Wash. Take-up device. 1,785,629; Dec. 16.

Hurt, Samuel N., assignor to Toledo Scale Company, Toledo, Ohio. Weighing scale. 1,785,382; Dec. 16.

Ice Cream Cone Machinery Inc. (See Schroeder, C., and Tatosian, assignors.)

"Ikarus" Internationale Patent-Verwertungs A. G. (See Hugershoff, Reinhard, assignor.)

Imerman, Stanley. (See Schlitters, M. J., jr., and Imerman.)

Imerman, Stanley, Detroit, Mich. Compressible packing. 1,784,899; Dec. 16.

Independence Coffee and Spice Company. (See Savageau, Fred L., assignor.)

Independent Pneumatic Tool Company. (See Norling, Reinhold A., assignor.)

Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)

Ingraham, E., Co., The. (See Large, W. J., and Simpson, assignors.)

Ingraham, E., Co., The. (See Simpson, John O., assignor.)

Insulite Company, The. (See Ellis, George H., assignor.)

International Postal Supply Company. (See Pacher, Josef V., assignor.)

Intertype Corporation. (See Willis, Le Roy W., assignor.)

Irgens, Finn T., assignor to Outboard Motors Corporation, Milwaukee, Wis. Underwater exhaust mechanism. 1,785,089; Dec. 16.

Irwin, William Y., jr. (See Bonney, R. D., and Irwin.)

Isaacson, Fred, and W. M. Caughlan, Denver, Colo. Switch-point lock. 1,785,630; Dec. 16.

Jackson, Joseph R., jr., Boston, Mass. Elevator control device. 1,784,933; Dec. 16.

Jacoby, Arthur B., assignor to The American Rolling Mill Company, Middletown, Ohio. Crane. 1,785,090; Dec. 16.

Jaeger, Alphons O., Mount Lebanon, assignor to The Selden Research & Engineering Corporation, Pittsburgh, Pa. Purification of crude anthracene. Re17,902; Dec. 16.

Jamieson, Hugh V., Dallas, Tex. Apparatus for processing film. 1,785,631; Dec. 16.

Jandus, Herbert S. (See Jandus, William and H. S.)

Jandus, William and H. S., East Cleveland, Ohio. Precision gauge. 1,785,383; Dec. 16.

Jeffrey Manufacturing Company, The. (See Levin, Nils D., assignor.)

Jenkins, Alexander F., Baltimore, Md. Cutting and welding torch. 1,784,964; Dec. 16.

Jenkins, Charles F., assignor to Jenkins Laboratories, Washington, D. C. Duplex scanning disk. 1,785,262; Dec. 16.

Jenkins Laboratories. (See Jenkins, Charles F., assignor.)

Jensen, Jedd L., Salt Lake City, Utah. Ventilator. 1,785,263; Dec. 16.

Jeskwein, Adolph J., Kenosha, Wis. Rocking-horse. 1,784,875; Dec. 16.

Jett, George C., assignor of two-fifths to W. H. Stiemke, Milwaukee, Wis. Hauling unit. 1,785,124; Dec. 16.

Johansson, Per W., New York, N. Y. Plectrum holder. 1,784,934; Dec. 16.

Johns-Manville Corporation. (See Christenson, George, assignor.)

Johnson, Ben F., assignor to Walker Manufacturing Company, Racine, Wis. Lifting jack. 1,785,554; Dec. 16.

Johnson, Edward E., St. Paul, Minn. Making coupling members. 1,784,966; Dec. 16.

Johnson, John F., assignor to Weber Costello Company, Chicago Heights, Ill. Ventilated blackboard installation. 1,784,900; Dec. 16.

Johnson, Louis, Chicago, Ill. Artificial fish lure. 1,785,310; Dec. 16.

Johnson, Roy W., Columbus, Ohio, assignor to The Checker Cab Manufacturing Company, Kalamazoo, Mich. Combined tail and stop light for motor vehicles. Des. 82,825; Dec. 16.

Johnson, Samuel W., assignor of one-half to R. I. Springstead, Port Allegany, Pa. Attachment for fretted musical instruments. 1,785,311; Dec. 16.

Johnson, Victor E., assignor of one-half to J. E. Wolcott, Royal Oak, Mich. Door latch. 1,784,935; Dec. 16.

Jonas, Gottfried B. (See Brandsma, W. F., Dijksterhuis, Sizoo, and Jonas.)

Jones, Paul C., Cuyahoga Falls, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Rubber composition and preserving rubber. 1,784,838; Dec. 16.

Jones, R. A., & Company. (See Jones, Ruel A., assignor.)

Jones, Ruel A., Covington, assignor to R. A. Jones & Company, Inc., Covington, Ky. Soap press. 1,785,312; Dec. 16.

Joy Manufacturing Company. (See Arentzen, Einar M., assignor.)

Kahn, Louis E., assignor to Parisian Novelty Co., Chicago, Ill. Display device. 1,785,449; Dec. 16.

Kallus, Joseph L., Brooklyn, N. Y. Advertising doll. Des. 82,826; Dec. 16.

Kalman Steel Company. (See White, William E., assignor.)

Kalo, Albert A., Columbus, assignor of one-half to C. A. Hanner, Canton, Ohio. Multiple wrench. 1,785,125; Dec. 16.

Kane, Edward W. (See Douglas, John F. H., assignor.)

Kasch, Henry J., Dayton, Ohio. Knob. Des. 82,827; Dec. 16.

Kastner, Richard, Steyrermuhl, and H. Schmolka, Vienna, Austria. Treating paperboard and the like. 1,785,484; Dec. 16.

Kaz, Samuel J., assignor to Mohawk Products Company, Chicago, Ill. Table lamp. Des. 82,828; Dec. 16.

Keener, Monroe, Lititz, assignor to H. J. Hull, Lancaster, Pa. Valve for milking machines. 1,785,313; Dec. 16.

Keller, Arthur C., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Sound-reproducing system. 1,784,839; Dec. 16.

Keller Mechanical Engineering Corporation. (See Shaw, John C. and R. D., assignors.)

Kelly, Sidney R., Gem, Idaho. Hose mender. 1,785,314; Dec. 16.

Kelso, Howard F., Houston, Tex. Water-closet bowl. 1,785,198; Dec. 16.

Kendall, Marvin R., Chicago, Ill., assignor, by mesne assignments, to St. Regis Paper Company, New York, N. Y. Bag. 1,785,126; Dec. 16.

Kennedy, Edwin E., North Olmsted, Ohio. Adjusting the rails of conveyers relative to the chains thereof. 1,785,315; Dec. 16.

Kennel, Fritz, assignor to the Firm of Nollescre Werke-Komm.-Ges., Weissenfels O. S., Germany. Lasting machine. 1,785,555; Dec. 16.

Kenyon, Sherman S. (See Walker, P. H., and Kenyon.)

Kerngood, Allen H., assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,829; Dec. 16.

Kerngood, Allen H., assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,830; Dec. 16.

Kerngood, Allen H., assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,831; Dec. 16.

Kerngood, Allen H., assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,832; Dec. 16.

Kerngood, Allen H., assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,833; Dec. 16.

Kerngood, Allen H., assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,834; Dec. 16.

Kerngood, Allen H., assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,835; Dec. 16.

Kerngood, Allen H., assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Apparel buckle. Des. 82,836; Dec. 16.

Kerr, Howard J., Westfield, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Slag screen and wall-cooling means. 1,785,350; Dec. 16.

Keystone Aircraft Corporation. (See Daland, Elliot, assignor.)

Kichline, Frank O., Lebanon, Pa., assignor to Bethlehem Steel Company. Manufacture of low-carbon chrome steel. 1,785,199; Dec. 16.

Kiehlbauch, Henry E., Tyndall, S. Dak. Wheel-hub protector. 1,785,127; Dec. 16.

Kiel, Francis, & Son, Inc. (See Holtzman, John, assignor.)

Kienzle Uhrenfaoriken A. G. (See Heckert, Frits, assignor.)

Kiesel, William F., jr., Altoona, Pa. Locomotive. 1,785,485; Dec. 16.

Kimbell, Arthur W., assignor to Cinch Manufacturing Corporation, Chicago, Ill. Spring catch and like device. 1,784,936; Dec. 16.

Kimmel, Frederick C., Columbus, Ind. Liquid-dispensing device. 1,785,816; Dec. 16.

Kingsley, Charles B., Clairton, Pa., assignor to Mississippi Glass Company. Method of and apparatus for annealing materials. 1,785,264; Dec. 16.

Kinnear Manufacturing Company, The. (See Rush, Albert, assignor.)

Kirn, William, Solomon, Kans. Differential gearing. 1,785,091; Dec. 16.

Kivy, Julius, Brooklyn, N. Y. Toy desk or similar article. Des. 82,837; Dec. 16.

Kiwad, Michael, New York, N. Y., assignor to La Belle Specialty Co., Inc. Lamp base or article of analogous nature. Des. 82,838; Dec. 16.

Klaiber, Walter J., Pittsburgh, Pa., assignor to The Koppers Company. Removal of carbon bisulphide from gas. 1,785,415; Dec. 16.

Kleefisch, Henry J. (See Hale, C. H., and Kleefisch.)

Klima, Stanley P., Odessa, Wash. Carburetor dust cleaner. 1,785,632; Dec. 16.

Klingensmith, Frank L., Detroit, Mich. Railway tie. 1,784,901; Dec. 16.

Klotz, Russell L., Little Falls, N. J. Chair. 1,785,317; Dec. 16.

Knourek, William M., River Forest, Ill. Mortising tool. 1,785,351; Dec. 16.

Kobe, Incorporated. (See Coberly, Clarence J., assignor.)

Koehring Company. (See Lichtenberg, Erich H., assignor.)

Kolb, Louis J. (See Hackett, R. W., and Worall, assignors.)

Koppers Company, The. (See Klaiber, Walter J., assignor.)

Koppers Company. (See Seil, Gilbert E., assignor.)

Koppl, Ernest. (See Hickerson, Henry P., assignor.)

Kornblum, Morris, assignor to Metal Lamp Corporation, Brooklyn, N. Y. Table lamp. Des. 82,839; Dec. 16.

Kovats, John, assignor to Lorraine Metal Manufacturing Company, Bridgeport, Conn. Can opener. 1,785,384; Dec. 16.

Krause, Hermann, assignor to Stout Manufacturing Company, Menomonee Falls, Wis. Can-washing machine. 1,785,352; Dec. 16.

Kreslawsky, Paul, Berlin, Germany. Shoe article. 1,784,937; Dec. 16.

Kronig, Christian. (See Wels, Franz, assignor.)

Kuhlmann, Clemens, Ratibor, assignor to Siemens Planiawerke Aktiengesellschaft für Kohlefabrikate, Berlin-Lichtenberg, Germany. Electrode joint. 1,785,587; Dec. 16.

Kumor, Stefan F., Chicago, Ill. Aircraft. 1,785,633; Dec. 16.

Kurita, Torao. (See Suzuki, T., Tanaka, and Kurita.)

Kursheedt, Edmund B., Daytona Beach, Fla. Piano-lid adjuster. 1,785,486; Dec. 16.

Kurtz, Roberto, Buenos Aires, Argentina. Excavating machine. 1,785,353; Dec. 16.

La Belle Specialty Co. (See Kiwad, Michael, assignor.)

La Bombard, Leon E., Waltham, and M. H. Sidebotham, West Newton, assignors to Specialty Automatic Machine Company, Chelsea, Mass. Box partitioning. 1,785,416; Dec. 16.

Lacy, Walter P., et al. (See Patterson, Edgar W., assignor.)

Lacy, William G., et al. (See Patterson, Edgar W., assignor.)

Lade, Archibald, Northampton, assignor to B. F. Perkins & Son, Inc., Holyoke, Mass. Calender roll. 1,785,265; Dec. 16.

Laffillée, Jacques J., Paris, France. Folding table. 1,785,450; Dec. 16.

La Forge, Guy S., Union Bridge, Md. Manufacturing Portland cement. 1,784,840; Dec. 16.

Lambert, Joseph H., Chicago, Ill., assignor to Standard Oil Company, Whiting, Ind. Insecticide. 1,785,451; Dec. 16.

Lambert, William C., assignor of one-fourth to D. McG. Gilfillan, Ironton, Ohio, and one-fourth to E. Stewart, Washington, D. C. Wing structure for airplanes. 1,785,318; Dec. 16.

Lambie, William. (See Newbrough, Walter F., assignor.)

Lancaster, George W., Richmond, Va. Window-frame construction. 1,784,938; Dec. 16.

Lancer, Peter. (See Eufinger, Peter, assignor.)

Landau, Bernhard, College Point, N. Y. Ventilator construction. 1,784,841; Dec. 16.

Lange, Otto, Chicago, Ill. Ice-cream-cone coater. 1,784,992; Dec. 16.

Lange, William L., New York, N. Y. Neck adjuster for banjos. 1,785,266; Dec. 16.

Lansing, Raymond P., Montclair, N. J., assignor to Eclipse Machine Company, Elmira, N. Y. Engine starter. 1,785,319; Dec. 16.

Lanzetta, Anthony, Bronx, N. Y. Aeroplane. 1,785,128; Dec. 16.

Large, William J., and J. O. Simpson, assignors to The E. Ingraham Co., Bristol, Conn. Regulator for clock movements. 1,785,267; Dec. 16.

Larsson, Ernst A., assignor to The Ohio Brass Company, Mansfield, Ohio. Valve and switch operating means. 1,785,268; Dec. 16.

Larsson, Ernst A., assignor to The Ohio Brass Company, Mansfield, Ohio. Coupling mechanism. 1,785,269; Dec. 16.

Lassen, Grover V. (See White, Ezekiel F., assignor.)

Lauer, George E., Oakland, Calif. Flue damper and latching mechanism. 1,785,385; Dec. 16.

Lavirotte, Francois, Lyon, France, assignor to Standard Oil Development Company. Preparing petrolatum and the like and product obtained thereby. 1,785,270; Dec. 16.

Lawaczeck, Franz, Munich, Germany, assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Hydraulic machine. 1,785,354; Dec. 16.

Lawlor, John J. (See Morris, T. O., and Lawlor.)

Lawrence, Alfred, assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Cylinder lock. 1,785,634; Dec. 16.

Lawser, Charles W., Bala, assignor to Wicaco Machine Corporation, Philadelphia, Pa. Spinning pump. 1,785,355; Dec. 16.

Lawser, Charles W., Bala, assignor to Wicaco Machine Corporation, Philadelphia, Pa. Spinning pump. 1,785,356; Dec. 16.

Lawson, John and R. H., assignors to Hemphill Company, Pawtucket, R. I. Mechanism for controlling knitting needles in plating operations. 1,785,200; Dec. 16.

Lawson, Robert H. (See Lawson, John and R. H.)

Lebedenko, Nikolaus, Berlin-Wilmersdorf, Germany. Manufacture of photographic pictures on chromated gel layers. 1,785,635; Dec. 16.

Leber, Harry S., Crafton, Pa. Combination bathtub and shower. 1,785,636; Dec. 16.

Lee, Ira E. (See Calcott, W. S., and Lee.)

Lehmann, Ernst P., Brandenburg-on-the-Havel, Germany. Connecting tubular members. 1,785,129; Dec. 16.

Lemex, John D., Tulsa, Okla., assignor, by mesne assignments, to Oil Well Supply Company, Pittsburgh, Pa. Back-pressure joint. 1,785,271; Dec. 16.

Lemex, John D., Tulsa, and D. R. Smith, Ardmore, Okla., assignors, by mesne assignments, to Oil Well Supply Company, Pittsburgh, Pa. Sand cap. 1,785,272; Dec. 16.

Lemons, George G., Long Beach, Calif. Mechanical movement. 1,784,842; Dec. 16.

Leonhard, William C. (See Hough, A., Dufford, and Leonhard.)

Levin, Harold L., Worcester, assignor to The Flintkote Company, Boston, Mass. Waterproof fibrous product. 1,785,357; Dec. 16.

Levin, Isaac H., assignor, by mesne assignments, to Gas Industries Company, Pittsburgh, Pa. Method and apparatus for treating fluids with solids. 1,785,273; Dec. 16.

Levin, Nils D., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Coal-loading machine. 1,785,201; Dec. 16.

Lévy, Marcel, assignor of one-half to Prodorite S. A., Geneva, Switzerland. Making road surfaces. 1,785,130; Dec. 16.

Lewin, Walter J., Mathoura, New South Wales, Australia. Attachment for traction wheels. 1,785,452; Dec. 16.

Libbey-Owens-Ford Glass Company. (See Rowley, Clifford A., assignor.)

Libbey-Owens-Ford Glass Company. (See Rowley, C. A., and Reece, assignors.)

Lichtenberg, Erich H., assignor to Koehring Company, Milwaukee, Wis. Direct bucket drive. 1,785,031; Dec. 16.

Lidgerwood Manufacturing Company. (See Dickinson, Joseph H. and M. H., assignors.)

Liebermann, Paul B., Santa Barbara, Calif., assignor to General Motors Corporation, Detroit, Mich. Journal box. 1,785,032; Dec. 16.

Lighting Appliance Company. (See Blumenthal, Julius J., assignor.)

Lindsjo, Verner, assignor to Draper Corporation, Hopedale, Mass. Automatically-threading loom shuttle. 1,785,224; Dec. 16.

Lipper, Clarence, Philadelphia, Pa., assignor to Lipper Manufacturing Co., Inc. Making hats and the product thereof. 1,785,637; Dec. 16.

Lipper Manufacturing Co. (See Lipper, Clarence, assignor.)

Litle, Thomas J., jr., assignor to Copeland Products, Inc., Detroit, Mich. Control for refrigeration mechanism. 1,785,699; Dec. 16.

Locke, Emery A. (See Bergquist, Charles H., assignor.)

Loebell, Henry O., New York, N. Y., assignor to H. L. Doherty. Manufacture of combustible gas. 1,785,519; Dec. 16.

Lohr, Paul. (See Berner, L., and Lohr.)

Long, Dorothy, assignor to Franklin Simon & Company, Inc., New York, N. Y. Coat. Des. 82,840; Dec. 16.

Long, Dorothy, assignor to Franklin Simon & Company, Inc., New York, N. Y. Dress. Des. 82,841; Dec. 16.

Longevin, Wilfred. (See Holt, G. J., and Longevin.)

Longstreet, Fitz R., Gainesville, Ga. Aeroplane, 1,784,939; Dec. 16.

Loomis, Nathaniel E., A. H. Tomlinson, and F. A. Howard, Elizabeth, N. J., assignors to Standard Oil Development Company. Pyrolysis. 1,785,274; Dec. 16.

Lorber, Charles, Louisville, Ky., assignor to Eastern Tool and Manufacturing Company, Bloomfield, N. J. Lawn rake. 1,785,320; Dec. 16.

Lorenz, Curt, and E. Boecher, Pittsfield, Mass. Stocking protector. 1,785,033; Dec. 16.

Lorraine Metal Manufacturing Company. (See Kovats, John, assignor.)

Lösch, Albert, Hamburg, Germany. Double-pin holdfast. 1,784,843; Dec. 16.

Lowenstein, Gothard, Brooklyn, N. Y. Handling vehicles in garages. 1,785,034; Dec. 16.

Lower, Nathan M., Pittsburgh, Pa., assignor by mesne assignments, to The Standard Stoker Company, Inc., New York, N. Y. Heating unit for locomotive tenders. 1,785,275; Dec. 16.

Lubeck, Carl H. O., Stockholm, Sweden. Electric accumulator. 1,785,202; Dec. 16.

Ludwig, Fred, Honolulu, Hawaii. Hose coupling. 1,785,638; Dec. 16.

Lupton's, David Sons Company. (See Brogden, Joah, assignor.)

Lutz, George, Rocky River, assignor to The Grasselli Chemical Company, Cleveland, Ohio. Zinc-chloride-base flux. 1,785,131; Dec. 16.

Lyon Metal Products, Inc. (See Vance, Walter N., assignor.)

Lyons, George A. (See Doyle, F. A., and Lyons.)

Macbeth-Evans Glass Company. (See Sloan, Theodore H., assignor.)

Maccarone, Fred, assignor of one-half to F. Cardone, Brooklyn, N. Y. Turned shoe. 1,785,035; Dec. 16.

MacClatchie, John W., Compton, Calif. Valve. 1,785,278; Dec. 16.

Mack, Patrick H., Bradford, assignor, by mesne assignments, to Oil Well Supply Company, Pittsburgh, Pa. Oil-well packer. 1,785,276; Dec. 16.

Mack, Patrick H., Bradford, assignor, by mesne assignments, to Oil Well Supply Company, Pittsburgh, Pa. Oil-well packer. 1,785,277; Dec. 16.

Mackin, Joseph F., Columbus, Ohio. Device for testing clays and the like. 1,785,521; Dec. 16.

Maggio, Salvator, Pittsburgh, Pa. Picture frame. Des. 82,842; Dec. 16.

Mallory, Gerald D., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Braiding machine. 1,785,683; Dec. 16.

Marble Cliff Quarries Company, The. (See Humberstone, E. H., and Welch, assignors.)

Markert, Frederick E., Bogota, N. J., assignor to John Boyle & Company, Incorporated, New York, N. Y. Awning fixture. 1,785,520; Dec. 16.

Marks, Herbert E., Sewickley, Pa., assignor to United States Gypsum Company, Chicago, Ill. Combined floor and ceiling construction. 1,784,876; Dec. 16.

Marrison, Warren A., Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Constant-frequency-wave source. 1,784,844; Dec. 16.

Marrison, Warren A., Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Oscillation generator. 1,785,036; Dec. 16.

Marsh, Esli A., Chicago, Ill., assignor, by mesne assignments, to St. Regis Paper Company, New York, N. Y. Feeding device. 1,785,132; Dec. 16.

Martell, Charles, Cicero, and B. A. Hagen, Chicago, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for coating cores. 1,785,037; Dec. 16.

Martin Automatic Fishing Reel Company. (See Maury, Alfred D., assignor.)

Martin Brothers Company. (See Fellroth, Erick O., assignor.)

Martin-Copeland Company, a trusteeship. (See Martin, Laurence C., assignor.)

Martin, Edgar W., et al. trustee. (See Martin, Laurence C., assignor).

Martin, Laurence C., assignor to Martin-Copeland Company, a trusteeship consisting of E. W. Martin, Barrington, L. C. Martin, Providence, R. I., and G. W. Bleecker, Chicago, Ill. Nose-guard mounting for spectacles and eyeglasses. 1,785,038; Dec. 16.

Mason, Charles H., East Providence, R. I. Manual-training bench. 1,785,321; Dec. 16.

Mason Manufacturing Company. (See Flood, Leo P., assignor.)

Mason, William H., assignor to Masonite Corporation, Laurel, Miss. Water-resistant fiber product and process of manufacture. 1,784,993; Dec. 16.

Masonite Corporation. (See Mason, William H., assignor.)

Matthes, Samuel S., assignor to The Ohio Brass Company, Mansfield, Ohio. Connecting device. 1,785,522; Dec. 16.

Matthews, Algernon W., Haverhill, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Making shoes. 1,784,940; Dec. 16.

Maurais, Joseph V., Muscatine, Iowa. Power-shaft connection for internal-combustion engines. 1,784,902; Dec. 16.

Maurer, Otto T., New York, N. Y. Package-opening device. 1,785,639; Dec. 16.

Maury, Alfred D., Olion, N. Y., assignor to Martin Automatic Fishing Reel Company, Incorporated. Brake for automatic reels. 1,785,279; Dec. 16.

Mauthe, Gustav, Cologne-Holweide, and A. Thauss, Cologne-Deutz, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Water-soluble product from fatty acids occurring in wool fat. 1,784,941; Dec. 16.

May Seed & Nursery Co. (See Young, Floyd S., assignor.)

McAvoy, Daniel E., Long Island City, N. Y. Stairway guard. 1,785,487; Dec. 16.

McCall, Lottie L., Biloxi, Miss. Doll. Des. 82,843; Dec. 16.

McCann, John H. (See Chandler, E. A., and McCann.)

McCann, Ronald A. (See Blosser, H. G., and McCann.)

McClain, Lee, Knoxville, Tenn. Plant-digging machine. 1,785,588; Dec. 16.

McCorkindale, William P., South Hadley Falls, assignor to Specialty Sales Company, Incorporated, Holyoke, Mass. Napkin fixture. 1,785,039; Dec. 16.

McCready, James P., Berlin, N. H. Valve lifter. 1,785,040; Dec. 16.

McDonald, Donald B., Quitman, Ga. Barrel-head-fastening means. 1,785,133; Dec. 16.

McDonald, Guy A. (See Adler, H., and McDonald.)

McDonald, William, assignor to Swift & Company, Chicago, Ill. Continuous screw press. 1,785,041; Dec. 16.

McDougall, Andrew, Parel, Bombay, India. Casting reel for fishing rods. 1,785,488; Dec. 16.

McElvain, Samuel M., Madison, Wis. Piperidine derivative and producing it. 1,784,903; Dec. 16.

McEvoy, Joseph J., and C. H. Upson, Waterbury, Conn. Paint and varnish remover. 1,785,417; Dec. 16.

McGee, Rupert E., Tampa, Fla., assignor of one-half to D. E. Walters. Spring. 1,785,489; Dec. 16.

McGuinness, William V., Flushing, N. Y., assignor to The Western Union Telegraph Company, New York, N. Y. Single selector relay for pneumatic-tube. 1,784,967; Dec. 16.

McGuinness, William V., Flushing, N. Y., assignor to The Western Union Telegraph Company, New York, N. Y. Pneumatic-tube system. 1,784,968; Dec. 16.

McIntyre, Frederic, Newton, Mass. Metering pump. 1,785,386; Dec. 16.

McKee, Martin E., Cincinnati, Ohio. System for automatically preventing railway-grade-crossing accidents. 1,785,093; Dec. 16.

McLachlan, Willard J., Schenectady, N. Y., assignor to General Electric Company. System of electric distribution. 1,785,710; Dec. 16.

McLachlan, Willard J., Schenectady, N. Y., assignor to General Electric Company. System of electric distribution. 1,785,711; Dec. 16.

McLachlan, Willard J., Schenectady, N. Y., assignor to General Electric Company. System of electric distribution. 1,785,712; Dec. 16.

McLachlan, Willard J., Schenectady, N. Y., assignor to General Electric Company. System of electric distribution. 1,785,713; Dec. 16.

McLachlan, Willard J., Schenectady, N. Y., assignor to General Electric Company. Control system. 1,785,714; Dec. 16.

McLaughlin, George D., G. E. Rockwell, F. O'Flaherty, and J. H. Highberger, Cincinnati, Ohio, assignors to Tanners' Council of the United States of America, New York, N. Y. Unhairing hides or skins. 1,785,092; Dec. 16.

McLeod, Clifford J., Quincy, Mass. Valve-silencing mechanism. 1,785,523; Dec. 16.

McLeod Furniture Company. (See McLeod, Raymond H., assignor.)

McLeod, Raymond H., assignor to McLeod Furniture Company, Laurel, Miss. Top for desks and the like. 1,784,969; Dec. 16.

McMillan Book Company. (See McMillan, John L., assignor.)

McMillan, John L., Syracuse, assignor to McMillan Book Company, Syracuse, N. Y. Loose-leaf binder. 1,785,684; Dec. 16.

McNamara, Edward, Wolsey, S. Dak. Calendar. 1,785,640; Dec. 16.

McQuaid, Howard S., East Chicago, Ind., assignor to The Grasselli Chemical Company, Cleveland, Ohio. Soldering. 1,785,134; Dec. 16.

McQuaid, Howard S., East Chicago, Ind., assignor to The Grasselli Chemical Company, Cleveland, Ohio. Flux for soft soldering. 1,785,135; Dec. 16.

McQuiston, Jesse T., Sharon, assignor to American Sheet and Tin Plate Company, Pittsburgh, Pa. Tin pot. 1,785,322; Dec. 16.

Mead, Earl G., Cleveland Heights, Ohio. Streamline arrow and string-engaging means therefor. 1,785,589; Dec. 16.

Melhus, Irving E., Ames, Iowa. Composition for and process of treating plant wounds. 1,785,641; Dec. 16.

Melton, Bert C., London, England. Attachment for holding pictures against pocket mirrors. 1,784,970; Dec. 16.

Meltzer, Leo A., Seattle, Wash. Combined telephone pad and pencil holder. Des. 82,844; Dec. 16.

Mergott, J. E., Company. (See Hiering, William C., assignor.)

Merkl, Ruppert, Ossining, N. Y. Rodent trap. 1,784,904; Dec. 16.

Merrilles, Floy C., Chicago, Ill. Lady's neck piece. Des. 82,845; Dec. 16.

Merrill, Wilbur L., Schenectady, N. Y., assignor to General Electric Company. Drive for wood-pulp grinders and the like. 1,785,490; Dec. 16.

Messer, Adolf, Frankfort-on-the-Main, Germany. Complete separation of liquid air into oxygen and nitrogen. 1,785,491; Dec. 16.

Metal Lamp Corporation. (See Kornblum, Morris, assignor.)

Metcalf, George R., jr., assignor to Erie Malleable Iron Company, Erie, Pa. Conduit fitting. 1,785,136; Dec. 16.

Meyer, Friedrich, and H. J. Spanner, Berlin Halensee, Germany, assignors, by mesne assignments, to Electrons, Inc. Gas-filled discharge device. 1,784,877; Dec. 16.

Meyer, William, Chicago, Ill. Hair drier. 1,785,418; Dec. 16.

Mohawk Products Company. (See Kaz, Samuel J., assignor.)

Mohler, John J., Peoria, assignor to Wilmoh Manufacturing Corporation, Chicago, Ill. Subterranean check valve. 1,785,138; Dec. 16.

Monroe, Hanson H., Painesville, assignor, by mesne assignments, to The Grasselli Chemical Company, Cleveland, Ohio. Producing metallic cadmium from cadmium-containing material. 1,785,139; Dec. 16.

Moore, Matthew S. (See Black, William C., assignor.)

Moore, Merrill, Creston, Iowa. Luggage carrier for automobiles. 1,784,971; Dec. 16.

Morency, George H., Portland, Oreg., assignor to American Telephone and Telegraph Company. Telephone-exchange system. 1,784,905; Dec. 16.

Morimura Bros. Inc. (See Tomita, Urasaburo, assignor.)

Morris, Fred C., San Francisco, Calif. Brake lining. 1,784,994; Dec. 16.

Morris, Hubert C., Albany, Oreg. Ironing board. 1,785,280; Dec 16.

Morris, Thomas L., Van Nuys, Calif. Rotary fluid pump. 1,785,140; Dec. 16.

Morris, Thomas O., Easton, Pa., and J. J. Lawlor, Plainfield, N. J., assignors to Automatic Molding Machine Corporation, Dover, Del. Molding machine. 1,784,995; Dec. 16.

Morrison, Louis A., Brooklyn, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Phonograph needle. 1,784,845; Dec. 16.

Morrison, Montford, Chicago, Ill. Integrator and recorder. 1,785,525; Dec. 16.

Morrow, Clarence H., assignor to The Hotstream Heater Company, Cleveland, Ohio. Dirt trap for thermostats. 1,785,387; Dec. 16.

Morse, Clark T., and E. L. Hogan, assignors, by mesne assignments, to American Blower Corporation, Detroit, Mich. Dust collection. 1,785,453; Dec. 16.

Morterud, Einar, Torderod, near Moss, Norway. Digester for sulphite wood pulp. 1,785,591; Dec. 16.

Morton, Rolla A., Long Beach, Calif., assignor to Western Wheeled Scraper Company, Aurora, Ill. Elevator. 1,785,141; Dec. 16.

Moss, Roscoe, Los Angeles, Calif., assignor to Roscoe Moss Company. Well-casing perforator. 1,785,419; Dec. 16.

Moss, Roscoe, Company. (See Moss, Roscoe, assignor.)

Motor Wheel Corporation. (See Valjean, Ben, assignor.)

Milcoff, Joseph E., Leetsdale, Pa., assignor to National Electric Products Corporation, New York, N. Y. Switch and outlet box. 1,785,524; Dec. 16.

Milhening, J., Inc. (See Bichele, Charles S., assignor.)

Miller, Clarence W., and R. E. Bissell, assignors to Thompson Products, Inc., Cleveland, Ohio. Composite metal article and making the same. 1,785,137; Dec. 16.

Miller, Harry L., assignor to Pettibone Mulliken Company, Chicago, Ill. Railway switch structure. 1,785,454; Dec. 16.

Miller, Henry, Lincoln, Nebr. Garment and seaming therefor. 1,784,942; Dec. 16.

Miller, Walter, assignor, by mesne assignments, to Continental Oil Company, Ponca City, Okla. Apparatus for cracking hydrocarbons. 1,785,042; Dec. 16.

Miller, William J., Sulphur, La. Automatic resetting spear. 1,785,590; Dec. 16.

Miner, W. H., Inc. (See Zweibel, Charles A., assignor.)

Minium, Abram E., assignor of one-half to G. J. Ornauer, T. E. Syman, and W. J. Heath, Denver, Colo. Brake mechanism. 1,785,203; Dec. 16.

Mississippi Glass Company. (See Kingsley, Charles B., assignor.)

Mross, Edward, assignor to Hamilton Beach Mfg. Co., Racine, Wis. Vacuum-cleaner-handle mounting. 1,785,043; Dec. 16.

Mueller, Herman G., assignor to Skinner Engine Company, Erie, Pa. Steam engine. 1,785,455; Dec. 16.

Müller, Ignaz, Vienna, Austria. Separator for light liquids. 1,784,943; Dec. 16.

Munters, Carl G., Stockholm, Sweden. Refrigeration. 1,785,700; Dec. 16.

Murray Company, The. (See Behle, Joseph, assignor.)

Murray, Norman D., Dartmouth, Nova Scotia, Canada. Blotter holder. 1,785,642; Dec. 16.

Napier Company, The. (See Schuelke, Emil A., assignor.)

Nasmith, John I., Erith, assignor to Vickers Limited, Westminster, England. Cutting and creasing press for paper, cardboard, or the like. 1,785,526; Dec. 16.

National Carbon Company. (See Hansen, C., and Ellson, assignors.)

National Cash Register Company, The. (See Frank, John P., assignor.)

National Electric Products Corporation. (See Milcoff, Joseph E., assignor.)

National Fireproofing Corporation. (See Babb, Edwin, assignor.)

National Foam System, Inc. (See Boyd, Fisher L., assignor.)

National Pneumatic Company. (See Rowntree, Harold, assignor.)

National Publishing Company. (See Flett, William, assignor.)

National Rubber Machinery Company. (See De Mattia, Barthold, assignor.)

National Turpentine Products Company, et al. (See Smith, Eugene B.)

Neilson, Mary D., Minneapolis, Minn. Making garments for women and children. Re17,903; Dec.16.

Nelson, Herman, Corporation. (See Armstrong, John A., assignor.)

Nelson, Oliver J., and F. G. Baender, assignors, by mesne assignments, to F. G. Baender, trustee, Parsons, Kans. Changeable sign. 1,785,204; Dec. 16.

Nerrlich, Richard, Berlin, Germany. Objective shutter. 1785,142; Dec. 16.

Newbrough, Walter F., assignor of one-half to W. Lamble, Wilmington, Calif. Machine for forming screw propellers. 1,784,972; Dec. 16.

New Haven Clock Company, The. (See Whitehead, Richard H., assignor.)

Nicholson, Coleman L., 2d, Syracuse, assignor to Pass & Seymour, Inc. Solvay, N. Y. Lamp receptacle. 1,785,205; Dec. 16.

Nicholson, Robert H., Meadville, Pa., assignor to Hookless Fastener Company. Separable fastener slider and making same. 1,785,420; Dec. 16.

Nickels, James, Silvis, Ill. Universal rafter-framing machine. 1,785,044; Dec. 16.

Nielsen, Hans P., Alameda, assignor to Eames Company, San Francisco, Calif. Brake structure for caster wheels. 1,785,421; Dec. 16.

Nielsen-Klodskov, Niels J., Ringster, Denmark. Highway signal. 1,785,422; Dec. 16.

Niven, Archie M., assignor to Continental Motors Corporation, Detroit, Mich. Internal-combustion engine. 1,785,556; Dec. 16.

Noack, Walter G., and J. de Freudenreich, Baden, Switzerland. Internal-combustion power plant. 1,785,643; Dec. 16.

Nollesche Werke Komm.-Ges. (See Kennel, Fritz, assignor.)

Nollesche Werke Komm.-Ges. (See Wollny, Karl, assignor.)

Nolze, Heinrich F. J., Kaiserslauten, Pfalz, Germany. Electric gas purifier. 1,785,592; Dec. 16.

Nord, Swan E., Seattle, Wash. Self-draining oil can. 1,785,388; Dec. 16.

Nordlund, Ludvig B., San Francisco, Calif. Toilet flusher. 1,784,944; Dec. 16.

Norgaard, Hal W., Burbank, assignor to Pacific Machinery Company, San Francisco, Calif. Fruit pitter. 1,785,014; Dec. 16.

Norling, Reinhold A., Aurora, assignor to Independent Pneumatic Tool Company, Chicago, Ill. Venting means for pneumatic drills. 1,785,527; Dec. 16.

Northern Lignite Coal Company. (See Odell, William W., assignor.)

Northwest Engineering Corporation. (See Orloff, Arthur, assignor.)

Norton, Samuel H., assignor to Hookless Fastener Company, Meadville, Pa. Separable fastener. 1,785,715; Dec. 16.

Novak, Izador J., Bridgeport, Conn., assignor, by mesne assignments, to Raybestos-Manhattan, Inc. Friction element and making the same. 1,785,701; Dec. 16.

O'Bannon, Walter A., Tulsa, Okla., assignor to Walter O'Bannon Co. Slip socket. 1,785,644; Dec. 16.

O'Bannon, Walter, Co. (See O'Bannon, Walter A., assignor.)

Oberdorfer, Jonas L., assignor to M. L. Oberdorfer Brass Company, Syracuse, N. Y. Sump pump. 1,785,557; Dec. 16.

Oberdorfer, M. L., Brass Company. (See Oberdorfer, Jonas L., assignor.)

O'Brien, Falconer, assignor to L. A. Young Spring & Wire Corporation, Detroit, Mich. Spring structure. 1,785,358; Dec. 16.

O'Dell, William W., Minneapolis, Minn., assignor, by mesne assignments, to Northern Lignite Coal Company, Chicago, Ill. Apparatus for carbonizing and distilling carbonaceous materials. 1,785,645; Dec. 16.

Oehm, F. M., et al. (See Shaw, James, assignor.)

O'Flaherty, Frederick. (See McLaughlin, G. D., Rockwell, O'Flaherty, and Highberger.)

Ogden, Daniel L. (See Burkey, H. M., and Ogden.)

Ohio Brass Company, The. (See Larsson, Ernst A., assignor.)

Ohio Brass Company, The. (See Matthes, Samuel S., assignor.)

Oil Well Supply Company. (See Greve, Edgard E., assignor.)

Oil Well Supply Company. (See Lemex, John D., assignor.)

Oil Well Supply Company. (See Lemex, J. D., and Smith, assignors.)

Oil Well Supply Company. (See Mack, Patrick H., assignor.)

Oldham, John M., assignor to L. A. Young Spring & Wire Corporation, Detroit, Mich. Spring structure. 1,785,359; Dec. 16.

Oliver Iron & Steel Corporation. (See Fassinger, Charles, assignor.)

Oliver United Filters Inc. (See Zenthoefer, Joseph V., assignor.)

Olson, Andrew. (See Tufts, L. R., and Olson.)

Olson, Carl G., assignor to Shakeproof Lock Washer Company, Incorporated, Chicago, Ill. Mechanism for forming lock washers 1,785,281; Dec. 16.

Oonk, Harry, Phoenix, Ariz. Knockdown stove. 1,785 143; Dec. 16.

Oppe, Charles, New Haven, assignor to The G & O Manufacturing Company, New Haven, Conn. Engine-cooling radiator. 1,784,878; Dec. 16.

Orloff, Arthur, assignor to Northwest Engineering Corporation, Green Bay, Wis. Back digger. 1,785,942; Dec. 16.

Ornauer, Gustave J., et al. (See Minium, Abram E., assignor.)

O'Rourke, John F., New York, N. Y. Diving apparatus. 1,785,528; Dec. 16.

Ortiz, José A., New York, N. Y. Snow-hauling truck. 1,785,423; Dec. 16.

Osborne, John L., assignor to General Railway Signal Company, Rochester, N. Y. Bearing. 1,785,702; Dec. 16.

Ostro Research Laboratories, Inc. (See Ostromislensky, Iwan, assignor.)

Ostromislensky, Iwan, assignor to Ostro Research Laboratories, Inc., New York, N. Y. Alkyl-phenyl ether. 1,785,327; Dec. 16.

Ousdahl, Adolph, Seattle, Wash. Automatic coal burner. 1,785,456; Dec. 16.

Outboard Motors Corporation. (See Igerns, Finn T., assignor.)

Overton, Antoinette E., Houston, Tex. Musical instrument. 1,785,206; Dec. 16.

Owens-Illinois Glass Company. (See Simonis, Irving, assignor.)

Oxhandler, Leopold, Chicago, Ill. Embossing fiber sheets. 1,784,906; Dec. 16.

Pacher, Josef V., assignor to International Postal Supply Company, Brooklyn, N. Y. Fuel-supply apparatus. 1,785,094; Dec. 16.

Pacific Machinery Company. (See Anderson, Earl R., assignor.)

Pacific Machinery Company. (See Duncan, Arthur L., assignor.)

Pacific Machinery Company. (See Felizianetti, Narsete, assignor.)

Pacific Machinery Company. (See Goranson, Hjalmar and D., assignors.)

Pacific Machinery Company. (See Havens, Wilson W., assignor.)

Pacific Machinery Company. (See Norgaard, Hal W., assignor.)

Pacific Machinery Company. (See Thompson, Albert R., assignor.)

Pacific Machinery Company. (See Thompson, A. R., and Anderson, assignors.)

Pacific Machinery Company. (See Whipple, James B., assignor.)

Page, Stanley H., Los Gatos, Calif. Motor-temperature-controlling means. 1,785,207; Dec. 16.

Paisley, James A., assignor to The Valley Camp Coal Company, Cleveland, Ohio. Apparatus for use in loading mine cars. 1,785,593; Dec. 16.

Paisley, James A., assignor to The Valley Camp Coal Company, Cleveland, Ohio. Method of and apparatus for handling granular material. 1,785,594; Dec. 16.

Palace Poultry Car Company. (See Edgerton, Israel V., assignor.)

Papec Machine Company. (See Bullock, Fred J., assignor.)

Paredes, Evaristo, El Paso, Tex. Mouthpiece for pipes and cigar holders. 1,785,595; Dec. 16.

Parisian Novelty Co. (See Kahn, Louis E., assignor.)

Parker, C. Paul, trustee. (See Edstrom, Gustaf H., assignor.)

Parrella, Joseph A., Washington, D. C. Key case. Des. 82,846; Dec. 16.

Pascoo, Alex, Bronx, N. Y. Baby carriage. 1,785,646; Dec. 16.

Pass & Seymour, Inc. (See Nicholson, Coleman L., 2d., assignor.)

Patrick, Ella, Olathe, Colo. Cooling-fan attachment. 1,784,907; Dec. 16.

Patterson, Edgar W., Los Angeles, Calif, assignor to W. P. Lacy, W. G. Lacy, and C. A. Stiles. Flexible pipe assembly. 1,785,095; Dec. 16.

Paul, William L., Berkeley, Calif., assignor to Deere and Company, Moline, Ill. Disk harrow. 1,785,144; Dec. 16.

Pavloff, Steve, Camas, Wash. Smoker's pipe. 1,785,208; Dec. 16.

Payzant, Henry H., Everett, assignor to Weyerhaeuser Timber Company, Tacoma, Wash. Lumber package. 1,785,360; Dec. 16.

Pedrini, Eugenio, Turin, Italy. Carburetor for internal-combustion engines. 1,785,045; Dec. 16.

Peiler, Karl E., West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Apparatus for gathering glass. 1,785,209; Dec. 16.

Pelster, Edwin W., St. Louis, Mo. Combustion device. 1,785,046; Dec. 16.

Pennsylvania Crusher Company. (See Borton, George W., assignor.)

Perkins, B. F., & Son, Inc. (See Lade, Archibald, assignor.)

Persinger, James F., Lander, Wyo. Nonskid-chain tightener. 1,785,323; Dec. 16.

Peterson, Axel M., Denver, Colo. Anticreeping rail and cooperating tie plate for railways. 1,784,846; Dec. 16.

Peterson, Eugene, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Magnetic modulator circuit. 1,784,879; Dec. 16.

Peterson, Svend, Askov, Minn. Adjustable shim-holder cap. 1,785,596; Dec. 16.

Pettibone Mulliken Company. (See Miller, Harry L., assignor.)

Pfohl, Anthony J., Lockland, Ohio. Apparatus for molding bituminous materials. 1,785,457; Dec. 16.

Phillipson, Ferdinand, New York, N. Y. Combined spoon and clip. 1,784,880; Dec. 16.

Pickard, Frank C., Erie, Pa., assignor to The Standard Stoker Company, Incorporated. Conveyer for stokers. 1,785,282; Dec. 16.

Pieper, Alphonse F., Rochester, N. Y. Universal joint. 1,785,558; Dec. 16.

Piersol, Robert J., Pittsburgh, Pa. Controlling electroplating. 1,785,389; Dec. 16

Pinck, Louis A., Washington, D. C. Nitrating cellulose. 1,784,945; Dec. 16.

Pinneo, Walter R., Marshalltown, Iowa. Tire boot. 1,785,390; Dec. 16.

Pittock, John W. (See Powling, William T., assignor.)

Plainville Stock Company. (See Weisman, Julius, assignor.)

Podszus, Emil, Berlin-Friedrichshagen, assignor to Hartstoff-Metall Aktiengesellschaft (Hametag), Berlin-Copenick, Germany. Producing lamelliform metal powders. 1,785,283; Dec. 16.

Pollan, H. T. (See Bresler, Louis L., assignor.)

Polson, Alexander. (See Eckersley, James E., assignor.)

Ponti, Arthur J., Los Angeles, Calif. Stress and strain compensating joint for rotary well-drilling columns. 1,785,559; Dec. 16.

Portable Adding Machine Company. (See Barrett, Glenn J., assignor.)

Powell, John, Kokomo, Ind. Corn-harvesting machine. 1,785,647; Dec. 16.

Powling, William T., London, England, assignor to J. W. Pittock, Philadelphia, Pa. Apparatus for recovery of fats, oils, or oleaginous substances from materials yielding them. 1,785,361; Dec. 16.

Pratt, Carl D., Tamaqua, Pa., assignor to Atlas Powder Company, Wilmington, Del. Blasting-explosive assembly. 1,785,529; Dec. 16.

Pratt & Whitney Company. (See Hoagland, Frank O., assignor.)

Preston, Robert, Gisborne, New Zealand. Milk measuring and sampling means. 1,784,973; Dec. 16.

Proctor, Robert V., assignor to The Commercial Shearing & Stamping Company, Youngstown, Ohio. Tunnel. 1,785,096; Dec. 16.

Prodorite S. A. (See Lévy, Marcel, assignor.)

Pugh, John W., assignor to Rudge-Whitworth, Limited, Coventry, England. Brake drum. 1,785,424; Dec. 16.

Pugsley, Edwin, New Haven, Conn., assignor, by mesne assignments, to Winchester Repeating Arms Company. Making plated shot. 1,785,493; Dec. 16.

Pyle-National Company, The. (See Dake, Charles W., assignor.)

Quast, Otto K., Spokane, Wash. Pneumatic aircraft-propelling means. 1,785,458; Dec. 16.

Quinby, Edwin J., Yonkers, N. Y., assignor to Radio Corporation of America. Cutting phonograph records. 1,785,047; Dec. 16.

Rabert, José S., Barcelona, Spain. Spinning and twisting machine. 1,785,560; Dec. 16.

Radio Corporation of America. (See Brandsma, W. F., Dijksterhuis, Sizoo, and Jonas, assignors.)

Radio Corporation of America. (See Quinby, Edwin J., assignor.)

Radio Corporation of America. (See von Ardenne, M., and Heinert, assignors.)

Radnor, Jess C. (See Smoot, Jesse C.)

Raffinerie Tirlemontoise Societe Anonyme. (See Bergé, Julien, assignor.)

Rah, Joseph, assignor to G. and W. Electric Specialty Company, Chicago, Ill. Insulating joint. 1,784,881; Dec. 16.

Rassel, Edward C., Mio, Mich. Railroad tie. 1,785,324; Dec. 16.

Ratigan, James P., Los Angeles, Calif. Bearing for pump-operating members. Re17,904; Dec. 16.

Ray, Joshua R. and T., Manistee, Mich. Crystallization. 1,785,530; Dec. 16.

Ray, Thomas. (See Ray, Joshua R. and T.)

Raybestos-Manhattan, Inc. (See Novak, Izador J., assignor.)

Raymond, Fred I., River Forest, Ill. Apparatus for controlling heating systems. 1,785,425; Dec. 16.

Raymond, Fred I., River Forest, Ill. Heating. 1,785,426; Dec. 16.

Raymond, Gwynne, Kansas City, Mo. Dispensing device. 1,785,097; Dec. 16.

Reclamation Company, The. (See Holt, G. J., and Longevin, assignors.)

Reece, Joseph A. (See Rowley, C. A., and Reece.)

Reedy, Alfred J., assignor to A-B Stove Company, Battle Creek, Mich. Gas stove. Des. 82,850; Dec. 16.

Reel, Herbert W., Hinsdale, assignor to The United States Gypsum Company, Chicago, Ill. Tile-forming machine. 1,784,847; Dec. 16.

Regan, Eugene A., Oakland, Calif. Hinge structure. 1,785,362; Dec. 16.

Regan, Joseph C., West Hartford, assignor to The E. Horton & Son Company, Windsor Locks, Conn. Differential chuck. 1,784,908; Dec. 16.

Reichard, Wade H., assignor to General Railway Signal Company, Rochester, N. Y. Automatic train-control system. 1,785,703; Dec. 16.

Reichle, Carl J., Detroit, Mich., assignor to Alvey Manufacturing Company, St. Louis, Mo. Bearing for conveyer rollers. 1,784,848; Dec. 16.
Reinhard, Silas G., Toledo, Iowa. Connecting-rod bearing. 1,785,459; Dec. 16.
Renck, Heinrich, Hamburg, Germany. Production of printing. 1,785,210; Dec. 16.
Repp, Clinton B., Plainfield, N. J. Nutcracker. 1,785,328; Dec. 16.
Republic Steel Corporation. (See Bowman, Kiel B., assignor.)
Revel, Louis, Le Vigan, France. Filter press. 1,785,494; Dec. 16.
Reynolds, John L., Long Island City, N. Y., assignor, by mesne assignments, to Electrical Research Products Inc. System for electrically transmitting and reproducing sound. 1,785,048; Dec. 16.
Rhodes, William T., Mariposa, Calif. Surveying instrument. 1,785,284; Dec. 16.
Rice, Oscar, Chicago, Ill. Concrete anchor. 1,785,648; Dec. 16.
Rich, Cuyler W. (See Rich, Stelmer D., assignor.)
Rich, Stelmer D., assignor of one-half to C. W. Rich, Newport, Me. Air heater. 1,785,649; Dec. 16.
Richard, Clement C., assignor to Allied Products Corporation, Detroit, Mich. Punch and die retainer. 1,785,495; Dec. 16.
Richter, George A., assignor to Brown Company, Berlin, N. H. Pulp making and apparatus therefor. 1,784,849; Dec. 16.
Ridler, Earl S. (See Corson, H. P., and Ridler.)
Riess, Peter. (See Fisher, Robert W., assignor.)
Riker, Samuel M., Chester, N. J. Shoe ornament. Des. 82,847; Dec. 16.
Riker, Samuel M., Chester, N. J. Shoe buckle. Des. 82,848; Dec. 16.
Riker, Samuel M., Chester, N. J. Shoe buckle. Des. 82,849; Dec. 16.
Riley, Eva M., Glenwood City, Wis. Detachable cover for umbrellas. 1,785,561; Dec. 16.
Rimer, Foister S., Washington, D. C. Toy aeroplane. 1,784,946; Dec. 16.
Riviere, Albert S., Evanston, assignor to Union Special Machine Company, Chicago, Ill. Rug-tufting machine. 1,785,650; Dec. 16.
Robertson, H. H., Company. (See Black, George E., assignor.)
Robertson, John H., London, England. Centrifugal governor. 1,785,285; Dec. 16.
Robischon, Ernest W., Mount Vernon, N. Y., assignor of one-half to F. Chodorov and one-half to Step-In-All Underwear Corporation. Underwear garment. 1,785,286; Dec. 16.
Rocks, Harry, jr., Torrance, Calif. Auto thriller and amusement apparatus. 1,785,363; Dec. 16.
Rockwell, George H. (See McLaughlin, G. D., Rockwell, O'Flaherty, and Highberger.)
Rocquin, Camille J., New Orleans, La. Rake. 1,784,947; Dec. 16.
Roesch, Alfred, and J. Roettinger, Rahway, N. J. Weeding tool. 1,785,531; Dec. 16.
Roettinger, John. (See Roesch, A., and Roettinger.)
Rogers, John F., Cleveland Heights, assignor to The Wellman Engineering Company, Cleveland, Ohio. Gas producer. 1,784,882; Dec. 16.
Rogers, Walter F., assignor to Crown Stove Works, Cicero, Ill. Gas stove. Des. 82,851; Dec. 16.
Roll, Edwin B., Los Angeles, Calif. Sign. 1,785,145; Dec. 16.
Rollins, Frank S. (See Hamilton, William F., assignor.)
Rolnick, Harry, assignor of fifty per cent to Byer-Rolnick Company, Dallas, Tex. Hat brim. 1,785,325; Dec. 16.
Rolph, Benjamin M., Dixon, Ill. Cultivating device. 1,784,974; Dec. 16.
Romagnoli, Tito, Bologna, Italy. Sun-heat motor. 1,785,651; Dec. 16.
Rome Company, The. (See Gerlowski, Anthony, assignor.)
Romine, Robert T., Mount Clemens, Mich. Method and apparatus for shipping metal. 1,784,909; Dec. 16.
Rosenblatt, Isidor, New York, N. Y. Lighting fixture or article of similar nature. Des. 82,852; Dec. 16.
Rosman, Aron, Brooklyn, N. Y. Vehicle body. 1,784,975; Dec. 16.
Ross, Oscar A., New York, assignor to General Railway Signal Company, Rochester, N. Y. Check light signal. 1,785,704; Dec. 16.
Rowley, Clifford A., assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Apparatus for cutting sheet glass. 1,785,496; Dec. 16.
Rowley, Clifford A., Chicago, Ill., and J. A. Reece, assignors to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Drawing sheet glass. 1,785,497; Dec. 16.
Rowntree, Bernard, Carmel Highlands, Calif. Sliding-door hanger. 1,784,910; Dec. 16.
Rowntree, Harold, Scarsdale, assignor to National Pneumatic Company, New York, N. Y. Compensating switch. 1,784,883; Dec. 16.
Royal Typewriter Company. (See Handley, George F., assignor.)
Rudd, Harry B., Douglaston, N. Y. Method of and apparatus for utilizing phase-changeable material. 1,785,326; Dec. 16.
Rudge-Whitworth, Limited. (See Pugh, John V., assignor.)
Rudy, Ulysses S. (See Anderson, R. O., Rudy, and Gessel.)
Rupprecht, Konrad. (See Weiske, P., and Rupprecht.)
Rupprecht, Konrad, Berlin, and R. Dietze, Pankow, Germany, assignors to General Electric Company. Motor-control system. 1,785,597; Dec. 16.
Rush, Albert, assignor to The Kinnear Manufacturing Company, Columbus, Ohio. Door for hangars and other structures. 1,784,948; Dec. 16.
Russ Manufacturing Company, The. (See Seitz, Dean C., assignor.)
Russell, John R., Sterling, Ill. Quilting machine. 1,785,049; Dec. 16.
Russell Manufacturing Company, The. (See Russell, Thomas M., assignor.)
Russell, Thomas M., assignor to The Russell Manufacturing Company, Middletown, Conn. Making brake bands and the like. 1,785,391; Dec. 16.
Ryan, Edward, Knox, Ind., and E. R. Funk, Galesburg, Ill., assignors to The Standard Stoker Company, Incorporated, New York, N. Y. Locomotive tender. 1,785,287; Dec. 16.
Safetee Glass Company. (See Hackett, R. W., and Worrall.)
Sagendorph, William K., executor. (See Hopkins, George F.)
Saginaw Manufacturing Co. (See Gilbert, Henry J., assignor.)
St. Regis Paper Company. (See Kendall, Marvin R., assignor.)
St. Regis Paper Company. (See Marsh, Esli A., assignor.)
Sanders, Leon, et al. (See Seidel, Morris, assignor.)
Sandwich Manufacturing Co. (See Hartman, Edward, assignor.)
Sangamo Electric Company. (See De Long, Charles E., assignor.)
Santangelo, Giuseppe, New York, N. Y. Safety means for motor vehicles. 1,785,598; Dec. 16.
Sasser, Edward C., Washington, D. C. Safety razor. 1,785,652; Dec. 16.
Savageau, Fred L., Denver, Colo., assignor to Independence Coffee and Spice Company. Bag closure and support. 1,785,498; Dec. 16.
Sawford, Frank, jr. (See Sawford, Frank, assignor.)
Sawford, Frank, jr. (See Sawford, Frank and F., jr.)
Sawford, Frank, assignor of one-half to F. Sawford, jr., Vancouver, British Columbia, Canada. Apparatus for determining the density of smoke. 1,785,393; Dec. 16.
Sawford, Frank and F., jr., Vancouver, British Columbia, Canada. Device for indicating and recording the quality of smoke. 1,785,392; Dec. 16.
Sayers, Fred, Yonkers, N. Y. Building block. 1,785,499; Dec. 16.
Scaife, Wm. B., & Sons Co. (See Duden, Emil G., assignor.)
Schenkel, Moritz, Berlin-Charlottenburg, Germany, assignor to Westinghouse Electric & Manufacturing Company. Corona elimination in dynamo-electric machines. 1,784,997; Dec. 16.
Schiff, Sigmund, assignor to The J. H. Day Compsny, Cincinnati, Ohio. Differential-speed agitator drive. 1,785,562; Dec. 16.
Schiff, Sigmund, assignor to The J. H. Day Company, Cincinnati, Ohio. Egg whip and the like. 1,785,563; Dec. 16.
Schlitters, Michael J., jr., and S. Imerman, Detroit, Mich. Tool-retaining device. 1,784,911; Dec. 16.
Schlotter, Georg A., Dresden, Germany, assignor of ten per cent to R. Suczek, New York, N. Y. Pump or the like. 1,785,460; Dec. 16.
Schmerler, Joseph J., New York, N. Y. Combined opener and closure for paper milk containers. 1,785,599; Dec. 16.
Schmid, Alfred, Vienna, Austria. Ceiling construction. 1,785,050; Dec. 16.
Schmid, Ferdinand A. F., Rosemary, N. C., assignor to Draper Corporation, Hopedale, Mass. Filling-replenishing loom. 1,785,227; Dec. 16.
Schmidt, Henry F., Lansdowne, Pa., assignor to Westinghouse Electric & Manufacturing Company. Discharge louver. 1,785,228; Dec. 16.
Schmolka, Herbert. (See Kastner, R., and Schmolka.)
Schnabel, Alfred, New York, N. Y. Baby carriage or the like. 1,784,976; Dec. 16.
Schnoor, Raymond D., Park Ridge, Ill. Fuel-signal device. 1,785,329; Dec. 16.
Schoenrock, Otto R., Chicago, Ill. Internal-combustion engine. 1,785,146; Dec. 16.
Schon, Lester. (See Shoenberg, M. H., and Schon.)
Schoonmaker, William J., New York, N. Y. Moving-picture screen for use in connection with sound pictures. 1,785,330; Dec. 16.
Schroeder, Charles, and H. Tatosian, assignors to Ice Cream Cone Machinery Inc., Bridgeport, Conn. Batter-feeding device for pastry-cake machines. 1,785,394; Dec. 16.
Schröter, Fritz, Berlin, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Picture transmission. 1,784,850; Dec. 16.
Schuelke, Emil A., assignor to The Napier Company, Meriden, Conn. Combined desk blotter and box. 1,785,229; Dec. 16.
Schulhoff, Saul, Baltimore, Md. Steel-wool holder. 1,785,653; Dec. 16.

CARNEGIE LIBRARY OF ATLANTA

Schumer, John, Cincinnati, Ohio. Ornamented jewelry. 1,785,364; Dec. 16.
Schwantes, Julius A., Wauwatosa, Wis., assignor to Colgate-Palmolive-Peet Company, Chicago, Ill., Apparatus for producing shredded soap. 1,785,532; Dec. 16.
Schwantes, Julius A., Wauwatosa, Wis., assignor to Colgate-Palmolive-Peet Company, Chicago, Ill. Soap manufacture. 1,785,533; Dec. 16.
Schwartz, Frank, New York, N. Y. Micrometric drawing instrument. 1,785,500; Dec. 16.
Schweigert, Frederick, New York, N. Y. Push-broom-handle bracket. 1,785,564; Dec. 16
Schweitzer, William K., assignor to The Grasselli Chemical Company, Cleveland, Ohio. Sulphonated mineral oils as addition agents to zinc-chloride-base fluxes. 1,785,147; Dec. 16.
Scofield, Theodore J., assignor to The Sparks-Withington Company, Jackson, Mich. Socket sleeve. 1,785,211; Dec. 16.
Scott, Beatrice P., Marblehead, Mass. Stencilling. 1,784,912; Dec. 16.
Scott, Beatrice P., Marblehead, Mass. Reproducing process. 1,784,913; Dec. 16.
Scott and Williams, Inc. (See Swinglehurst, Harry, assignor.)
Scovill Manufacturing Company. (See Boden, George, assignor.)
Searles, Raymond R., assignor to The Fafnir Bearing Company, New Britain, Conn. Antifriction spring connection. 1,785,654; Dec. 16.
Searles, Raymond R., and E. H. Cooper, assignors to The Fafnir Bearing Company, New Britain, Conn. Vehicle-spring bearing. 1,785,655; Dec. 16.
Seaward, Delaska E., Oklahoma City, Okla. Preserving eggs. 1,785,461; Dec. 16.
Sebrell, Lorin B., and J. Teppema, assignors to The Goodyear Tire & Rubber Company, Akron, Ohio. Preparing thiazoles. 1,785,656; Dec. 16.
Secor, John A., assignor to Advance-Rumely Company, La Porte, Ind. Method of and apparatus for reatomizing fuel. 1,785,501; Dec. 16.
Seidel, Morris, Brooklyn, assignor of fifty per cent to L. Sanders, Woodmere, Long Island, and G. Green, Brooklyn, N. Y. Automatic boiler-control and water-heating device. 1,785,098; Dec. 16.
Sell, Gilbert E., Newark, N. J., assignor to Koppers Company, Pittsburgh, Pa. Removal of naphthalene and carbon bisulphide from gases. 1,785,365; Dec. 16.
Seitz, Dean C., assignor to The Russ Manufacturing Company, Cleveland, Ohio. Sirup pump. 1,784,977; Dec. 16.
Selden Research & Engineering Corporation, The. (See Jaeger, Alphons O., assignor.)
Selectograph Company. (See Golinick, P. A., and Broderick, assignors.)
Sengpiel, William S. (See Clark, L. H., and Sengpiel.)
Service Casters & Truck Co., The. (See Zeindler, Werner, assignor.)
Seymour, Charles H., Kansas City, Mo. Metal-bearing member and treating same. 1,785,502; Dec. 16.
Shakeproof Lock Washer Company. (See Olson, Carl G., assignor.)
Shakespeare Company. (See Bokelund, Harry A., assignor.)
Shaner, George A., R. E. Damp, Tulsa, and G. G. Donovan, Seminole, Okla., assignors to Standard Oil Development Company. Method and apparatus for cleaning pipe lines. 1,785,230; Dec. 16.
Shannon, James L., Longmeadow, Mass. Flash-light casing. Des. 82,853; Dec. 16.
Shaw, James, Lodi, Calif., assignor of one-third to C. H. Oehm and F. M. Oehm, Brooklyn, N. Y. Piston-ring peener. 1,785,212; Dec. 16.
Shaw, John C., and R. D. Shaw, assignors to Keller Mechanical Engineering Corporation, Brooklyn, N. Y. Zeroizing scale for work-positioning mechanism for machine tools. 1,785,395; Dec. 16.
Shaw, Robert D. (See Shaw, John C. and R. D.)
Sheffold, Charles, Clinton, Conn. Knee protector for trousers. 1,785,396; Dec. 16.
Shepherdson, Arnold, and S. Thornley, Blackley, Manchester, assignors to British Dyestuffs Corporation, Limited, Manchester, England. Manufacture of pyranthrone derivatives. 1,785,600; Dec. 16.
Shepherdson, Arnold, and S. Thornley, Blackley, Manchester, assignors to British Dyestuffs Corporation, Limited, Manchester, England. Manufacture of pyranthrone derivatives. 1,785,601; Dec. 16.
Sherman, Warren S., Oklahoma City, Okla. Street marker. 1,785,602; Dec. 16.
Sherts, James H., Glenn Ridge, N. J., assignor to Duplate Corporation. Preparing composite glass for sealing. 1,785,099; Dec. 16.
Shields, Lowell W., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Suspender-end top link. Des. 82,854; Dec. 16.
Shively, Walter E., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Pneumatic tire. 1,785,657; Dec. 16.
Shoenberg, Milton H., and L. Schon, San Francisco, Calif.; said Schon assignor to said Shoenberg. Signaling system. 1,785,366; Dec. 16.
Shoenberg, Milton H., and L. Schon, San Francisco, Calif.; said Schon assignor to said Shoenberg. Automobile signaling system. 1,785,397; Dec. 16.
Shotwell, Joseph E., Chowchilla, Calif. Knee pad. 1,785,213; Dec. 16.
Sidebotham, Melvin H. (See La Bombard, L. E., and Sidebotham.)
Siemens Planiawerke Aktiengesellschaft für Kohlefabrikate. (See Kuhlmann, Clemens, assignor.)
Siever, Carl H., Oak Park, Ill. Coating composition and preparing the same. 1,785,367; Dec. 16.
Sikes Company, The. (See Clark, L. H., and Sengpiel, assignors.)
Simmons, Parker T., East Hampton, N. Y. Baseball game and apparatus. 1,785,148; Dec. 16.
Simonis, Irving, assignor to Owens-Illinois Glass Company, Toledo, Ohio. Leer feeder. 1,785,534; Dec. 16.
Simpson, John O. (See Large, W. J., and Simpson.)
Simpson, John O., assignor to The E. Ingraham Co., Bristol, Conn. Metal base for nickel clocks. 1,785,231; Dec. 16.
Sims, Richard J., Ottawa, Ontario, Canada. Milk-bottle holder. 1,785,232; Dec. 16.
Siptrott, Paul, New York, N. Y. Ornamental frame for alarm clocks. 1,785,233; Dec. 16.
Sizoo, Gerardus J. (See Brandsma, W. F., Dijksterhuis, Sizoo, and Jonas.)
Skiles, Henry D. (See Hiatt, William F., assignor.)
Skinner Engine Company. (See Mueller, Herman G., assignor.)
Sloan, Theodore H., Charleroi, Pa., assignor to Macbeth-Evans Glass Company. Forming thin-walled glass articles. 1,785,535; Dec. 16.
Sloane, Reginald G. (See Becker, A. E., and Sloane.)
Smith, A. O., Corporation. (See Andren, Birger, assignor.)
Smith, Arthur E., Los Angeles, Calif. Hypodermic syringe. Re17,906; Dec. 16.
Smith, Dewey R. (See Lemex, J. D., and Smith.)
Smith, Eugene B., assignor to E. W. Colledge, trustee for National Turpentine Products Company, Jacksonville, Fla., and American Turpentine & Tar Company, Ltd., New Orleans, La. Converting turpentine and pine-tar oils into heavier oils. 1,784,949; Dec. 16.
Smith, Harry M., Alameda, Calif. Vehicle stop signal. 1,784,884; Dec. 16.
Smith, James F., assignor to Switlik Manufacturing Company, Inc., Trenton, N. J. Padded upholstery, harness, and pack for aircraft chairs. 1,784,996; Dec. 16.
Smith, John W., assignor to The Fafnir Bearing Company, New Britain, Conn. Spring shackle. 1,785,685; Dec. 16.
Smith, John W., assignor to The Fafnir Bearing Company, New Britain, Conn. Spring-end connection. 1,785,686; Dec. 16.
Smith, Ralph E., assignor to The Gallon Metallic Vault Company, Gallon, Ohio. Grave vault. Des. 82,855; Dec. 16.
Smith, Walter, Harrow-on-the-Hill, England. Feed-water regulator. 1,785,149; Dec. 16.
Smith, William H., Detroit, Mich. Combined ore-reducing and hydrocarbon-refining apparatus. 1,785,427; Dec. 16.
Smith, William H., Detroit, Mich. Producing ore and converting hydrocarbons. 1,785,428; Dec. 16.
Smoot, Jesse C., Lincolnton, N. C., now by judicial change of name J. C. Radnor. Power transmission. 1,785,051; Dec. 16.
Snyder, Frederick T., New Canaan, Conn. Apparatus for distilling solid carbonizable materials. 1,785,565; Dec. 16.
Solodar, David, Ephrata, Pa. Advertising device. 1,785,100; Dec. 16.
Sorensen, Henry, San Francisco, Calif. Tension-holding member for concrete-reenforcement-tensioning devices. 1,785,214; Dec. 16.
Soubier, Leonard D. (See Hoge, J. R., and Soubier.)
Soubier, Leonard D., and E. J. Carl, Toledo, Ohio, assignors to American Patents Corporation. Game apparatus. 1,785,150; Dec. 16.
Spaeth, Frank and T., Hamden, Conn. Dry mop. 1,785,536; Dec. 16.
Spaeth, Tamara. (See Spaeth, Frank, and T.)
Spanner, Hans J. (See Meyer, F., and Spanner.)
Sparks-Withington Company, The. (See Scofield, Theodore J., assignor.)
Specialty Automatic Machine Co. (See La Bombard, L. E., and Sidebotham, assignors.)
Specialty Sales Company. (See McCorkindale, William P., assignor.)
Spencer, George M., St. Louis, Mo. Elastic-fluid dust separating and collecting system. 1,785,331; Dec. 16.
Sperry Gyroscope Company. (See Bates, Mortimer F., assignor.)
Splitdorf Electrical Company. (See Toegel, Herbert J., assignor.)
Sponable, Earl I., assignor to Fox Case Corporation, New York, N. Y. Film punch. 1,785,215; Dec. 16.
Sprague, Charles B., Portland, Oreg. Knife-holding means for chipping machines. 1,785,151; Dec. 16.
Spring, Laverne W., assignor to Crane Co., Chicago, Ill. Apparatus for desulphurizing cast iron. 1,785,503; Dec. 16.
Springstead, Ralph L. (See Johnson, Samuel W., assignor.)
Standard Coupler Company. (See Goodwin, Ernest G., assignor.)

Standard Oil Company. (See Lambert, Joseph H., assignor.)
Standard Oil Development Company. (See Becker, A. E., and Sloane, assignors.)
Standard Oil Development Company. (See Lavirotte, Francois, assignor.)
Standard Oil Development Company. (See Loomis, N. E., Tomlinson, and Howard, assignors.)
Standard Oil Development Company. (See Shaner, G. A., Damp and Donovan, assignors.)
Standard Stoker Company Inc. (See Lower, Nathan M., assignor.)
Standard Stoker Company, The. (See Pickard, Frank C., assignor.)
Standard Stoker Company, The. (See Ryan, E., and Funk, assignors.)
Stanley, Howard and R., Dunbar, W. Va. Valve for air gauges. 1,785,638; Dec. 16.
Stanley, Rufus. (See Stanley, Howard and R.)
State, Will C., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Tire-building machine. 1,785,659; Dec. 16.
Staud, Cyril J. (See Webber, C. S., and Staud.)
Staude, Edwin G., Minneapolis, Minn. Automatic brake control for power-propelled vehicles. 1,785,052; Dec. 16.
Steele, Carmi J., assignor of one-third to R. C. Troeger and one-third to W. R. Coates, Los Angeles, Calif. Bathtub. Des. 82,856; Dec. 16.
Steele, Carmi J., assignor of one-third to R. C. Troege and one-third to W. R. Coates, Los Angeles, Calif. Bathtub. Des. 82,857; Dec. 16.
Steel-Mash Road Surface Company, The. (See Dunker, Louis H. A., assignor.)
Stein, Samuel F., Williamsport, Pa. Operating mechanism for sewing machines. 1,785,462; Dec. 16.
Step-In-All Underwear Corporation. (See Robischon, Ernest W., assignor.)
Stevens, Douglas R., Denver, Colo. Flanging machine. 1,785,537; Dec. 16.
Stewart, Elmer, et al. (See Lambert, William C., assignor.)
Stiemke, Walter H. (See Jett, George C., assignor.)
Stiles, C. A., et al. (See Patterson, Edgar W., assignor.)
Stodder, Clement K., Brookline, Mass. Filling and binding composition. 1,785,053; Dec. 16.
Stodder, Clement K., Brookline, Mass. Producing soap powder from soap stock high in fatty acid. 1,785,054; Dec. 16.
Stone, Albert L. (See Stone, Frederick and A. L.)
Stone, Frederick, Los Angeles, and A. L. Stone, Redondo Beach, assignors to Doheny-Stone Drill Co., Los Angeles, Calif. Overshot. 1,785,152; Dec. 16.
Stone, J., & Company Limited. (See Honey, Alfred E., assignor.)
Steut Manufacturing Company. (See Krause, Hermann, assignor.)
Strand, Nels A., Evanston, Ill. Driving mechanism. 1,785,055; Dec. 16.
Strassheim, Christopher. (See Hawes, Charles L., assignor.)
Streitwolf, Karl, Frankfort-on-the-Main, and A. Fehrle, Bad-Soden-on-the-Taunus, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Thiosemicarbazones of hydroxy arsenobenzenes and preparing the same. 1,785,660; Dec. 16.
Strickland, Silas A., and T. Zimmerman, assignors to Bower Roller Bearing Company, Detroit, Mich. Roller bearing. 1,784,914; Dec. 16.
Strongson, Herman L., New York, N. Y. Duplex receptacle. 1,785,463; Dec. 16.
Studwell, Henry A., Stamford, Conn. Escape tube for submarines. 1,784,915; Dec. 16.
Stuebing, William, jr., Cincinnati, Ohio, assignor, by mesne assignments, to The Yale & Towne Manufacturing Company, Stamford, Conn. Truck. 1,785,368; Dec. 16.
Stuebing, William, jr., Cincinnati, Ohio, assignor, by mesne assignments, to The Yale & Towne Manufacturing Company, Stamford, Conn. Lift truck. 1,785,369; Dec. 16.
Styll, Harry H., Southbridge, Mass. Link bridge for ophthalmic mountings. 1,784,916; Dec. 16.
Suczek, Robert. (See Schlotter, Georg A., assignor.)
Sullivan Machinery Company. (See Boudette, Cornelius G., assignor.)
Sullivan Machinery Company. (See Holmes, Morris P., assignor.)
Sundback, Gideon, assignor to Hookless Fastener Company, Meadville, Pa. Separable fastener. 1,785,234; Dec. 16.
Surface Combustion Co., The. (See Cochran, Ralf S., assignor.)
Sutherland, Daniel M., jr., Morrisville, Pa., assignor, by mesne assignments, to Better Packages, Inc., Shelton, Conn. Porous fibrous material. 1,785,101; Dec. 16.
Suzuki, Tsuneo, H. Tanako, Tokyo, and T. Kurita, Tokyo Prefecture, assignors to Zaidan Hojin Rikagaku Kenkyujo, Tokyo, Japan. Preparing pure alumina. 1,785,464; Dec. 16.
Swanson, John E., Jamaica Plain, Mass. Increaser for lasts. 1,785,153; Dec. 16.
Swarthout, James B., Elmira, N. Y. Golf scoring device. 1,785,288; Dec. 16.
Swift & Company. (See McDonald, William, assignor.)
Swinglehurst, Harry, Orange, N. J., assignor to Scott and Williams, Inc., New York, N. Y. Segmental cam ring. 1,785,603; Dec. 16.
Switlik Manufacturing Company. (See Smith, James F., assignor.)
Syman, Theodore E., et al. (See Minium, Abram E., assignor.)
Symington, T. H., & Son, Inc. (See Symington, Thomas H., assignor.)
Symington, Thomas H., assignor to T. H. Symington & Son, Inc., Baltimore, Md. Railway-car-truck bolster. 1,785,056; Dec. 16.
Symmes, Whitman, San Francisco, assignor to A. S. Blake, Berkeley, Calif. Oil-burning process. 1,785,154; Dec. 16.
Tanaka, Hiroshi. (See Suzuki, T. Tanaka, and Kurita.)
Tanners' Council of the United States of America. (See McLaughlin, G. D., Rockwell, O'Flaherty, and Highberger, assignors.)
Tasker, Homer G. (See Gary, L. A., and Tasker.)
Tatosian, Harry. (See Schroeder, C., and Tatosian.)
Taylor, Edward A., assignor to The Grasselli Chemical Company, Cleveland, Ohio. Zinc-chloride-base flux. 1,785,155; Dec. 16.
Taylor, Herbert B., assignor to General Railway Signal Company, Rochester, N. Y. Circuit controller. 1,785,705; Dec. 16.
Taylor, Herbert B., assignor to General Railway Signal Company, Rochester, N. Y. Train control. 1,785,706; Dec. 16.
Taylor, Hugh S., Jackson Heights, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Testing apparatus. 1,784,978; Dec. 16.
Tellefsen, Theodore J., assignor to The J. H. Day Company, Cincinnati, Ohio. Elevating pulverulent materials. 1,785,604; Dec. 16.
Temple, Floyd L., Terre Haute, Ind. Burial vault. 1,785,156; Dec. 16.
Teppema, Jan. (See Sebrell, L. B., and Teppema.)
Thauss, Alfred. (See Mauthe, G., and Thauss.)
Third Dimension Pictures, Inc. (See Burkhardt, Jacob, assignor.)
Thom, Gustav A., West Allis, Wis. Headlight. 1,785,332; Dec. 16.
Thomas, Edward G., assignor to Toledo Scale Company, Toledo, Ohio. Flow-controlling scale. 1,785,370; Dec. 16.
Thompson, Albert R., San Jose, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitter. 1,785,015; Dec. 16.
Thompson, Albert R., San Jose, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitter. 1,785,016; Dec. 16.
Thompson, Albert R., San Jose, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit-pitting machine. 1,785,017; Dec. 16.
Thompson, Albert R., San Jose, assignor to Pacific Machinery Company, San Francisco, Calif. Fruit-pitting apparatus. 1,785,018; Dec. 16.
Thompson, Albert R., San Jose, and E. R. Anderson, Los Angeles, assignors to Pacific Machinery Company, San Francisco, Calif. Fruit pitter. 1,785,019; Dec. 16.
Thompson, Howard A., Edgewood, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,784,851; Dec. 16.
Thompson, Lorenzo D., assignor to The F-N Company, Chicago, Ill. Liquid-dispensing apparatus. 1,784,852; Dec. 16.
Thompson, Louis W., Schenectady, N. Y., assignor to General Electric Company. Regulator. 1,785,566; Dec. 16.
Thompson Products, Inc. (See Miller, C. W., and Bissell, assignors.)
Thornley, Sidney. (See Shepherdson, A., and Thornley.)
Thornton, Leslie M., Kansas City, Mo. Reversible mop head. 1,785,216; Dec. 16.
Tiffany, Homer A., Clifton, N. J. Oil-burning apparatus. 1,784,853; Dec. 16.
Tilburn, Albert E., Melbourne, Victoria, Australia. Producing and displaying changeable signs for advertising purposes. 1,785,429; Dec. 16.
Toegel, Herbert J., Elizabeth, assignor to Splitdorf Electrical Company, Newark, N. J. Electric pick-up for phonograph records. 1,785,157; Dec. 16.
Toledo Scale Company. (See Hurt, Samuel N., assignor.)
Toledo Scale Company. (See Thomas, Edward G., assignor.)
Tomita, Urasaburo, Astoria, assignor to Morimura Bros. Inc., New York, N. Y. Plate or similar article. Des. 82,858; Dec. 16.
Tomlinson, Albert H. (See Loomis, N. E., Tomlinson, and Howard.)
Tornberg, Isidor, Plainfield, N. J., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Ink-fountain drive. 1,785,158; Dec. 16.
Treadwell, M. H., Company. (See Astrom, Carl P., assignor.)
Trebes, Bruno M. A., Berwyn, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Apparatus for covering cores. 1,785,398; Dec. 16.
Trevert, Henry L. F., Canandaigua, N. Y. Brake mechanism. 1,785,057; Dec. 16.
Trey, Serge, Stamford, Conn. Helicopter. 1,785,333; Dec. 16.
Tridex Corporation. (See Crickmer, Charles S., assignor.)

Troeger, Roy C., et al. (See Steele, Carmi J., assignor.)
Trotter, Henry R., assignor to Hacker Manufacturing Company, Chicago, Ill. Printing press. 1,785,504; Dec. 16.
Trotter, Henry R., assignor to Hacker Manufacturing Company, Chicago, Ill. Printing press. 1,785,505; Dec. 16.
Troy, Seymour, New York, N. Y. Woman's shoe. Des. 82,859; Dec. 16.
Troy, Seymour, New York, N. Y. Woman's shoe. Des. 82,860; Dec. 16.
Trumbull Electric Manufacturing Company, The. (See Hammerly, Herman J., assignor.)
Tucker, John W., Beaumont, Tex. Balanced valve. 1,785,289; Dec. 16.
Tufts, Lesley R., East Cleveland, and A. Olson, assignors to The Cleveland Folding Machine Company, Cleveland, Ohio. Paper deflector. 1,784,854; Dec. 16.
Tufts, Lesley R., and A. Olson, assignors to The Cleveland Folding Machine Company, Cleveland, Ohio. Sheet deflector. 1,784,855; Dec. 16.
Turner, Charles L., assignor of one-half to F. W. Harris, Los Angeles, Calif. Vessel-capping machine. 1,785,235; Dec. 16.
Turner, Dennis H., Seminole, Okla. Burner. 1,785,605; Dec. 16.
Udy, Marvin J., Niagara Falls, N. Y., assignor to Electro Metallurgical Co. Producing chromic acid. 1,784,950; Dec. 16.
Ulman, Herbert G., Tuckahoe, N. Y. Heat-interchange device. 1,785,159; Dec. 16.
Ulmann, Friedrich, Zwickau, Germany. Preliminary treatment of metal plates for the production of printing plates. 1,785,606; Dec. 16.
Union Iron Works. (See Bronson, A. E., and Braden, assignors.)
Union Special Machine Company. (See Hanson, Nathan E., assignor.)
Union Special Machine Company. (See Riviere, Albert S., assignor.)
Union Steel Product Company. (See Hatch, Charles T., assignor.)
Union Switch & Signal Company, The. (See Blosser, H. G., and McCann, assignors.)
Union Switch & Signal Company, The. (See Glison, Robert M., assignor.)
Union Switch & Signal Company, The. (See Thompson, Howard A., assignor.)
Union Tool Company. (See Zerbe, L. E., and Archer, assignors.)
United Reproducers Corporation. (See Hawley, Jesse B., assignors.)
United Shoe Machinery Corporation. (See Barclay, William R., assignor.)
United Shoe Machinery Corporation. (See Matthews, Algernon W., assignor.)
United States Gypsum Company. (See Marks, Herbert E., assignor.)
United States Gypsum Company, The. (See Reel, Herbert W., assignor.)
Upson, Charles H. (See McEvoy, J. J., and Upson.)
Urschel, Bertis H., assignor to Urschel Engineering Company, Bowling Green, Ohio. Axle for self-propelled vehicles. 1,784,856; Dec. 16.
Urschel Engineering Company. (See Urschel, Bertis H., assignor.)
V. D. Limited. (See Vigneron, Jean-Baptiste J. A., assignor.)
Valjean, Ben, assignor to Motor Wheel Corporation, Lansing, Mich. Fuel-feed control. 1,785,160; Dec. 16.
Valley Camp Coal Company, The. (See Paisley, James A., assignor.)
Van-Alstyne, Durlin N., Syracuse, assignor of fifty per cent to J. N. Van Alstyne, Fulton, N. Y. Bottle closure. 1,785,716; Dec. 16.
Van Alstyne, James N. (See Van Alstyne, Durlin N., assignor.)
Vance, Walter N., Chicago Heights, assignor, by mesne assignments, to Lyon Metal Products, Incorporated, Aurora, Ill. Hinge. 1,785,506; Dec. 16.
Varcoe, Earl V., Philadelphia, Pa. Boiler. 1,785,058; Dec. 16.
Venard, William G., Long Beach, Calif. Adjustable skip hoist. 1,785,371; Dec. 16.
Venard, William G., Los Angeles, Calif. Scaffold. 1,785,399; Dec. 16.
Verlinden, Edmond, Milwaukee, Wis. Organ-stop action. 1,784,951; Dec. 16.
Vickers Limited. (See Nasmith, John I., assignor.)
Victor Chemical Works. (See Adler, H., and McDonald, assignors.)
Vigneron, Jean-Baptiste J. A., La Rochelle, France, assignor to V. D. Limited, London, England. Trawling gear. 1,785,236; Dec. 16.
Volk, Joseph A., Norwalk, Conn. Vaporproof lighting unit. 1,785,538; Dec. 16.
Volkes, Morris. (See Gursky, H., and Volkes.)
Von Ardenne, Manfred, and H. Heinert, Berlin, Germany, assignors to Radio Corporation of America. Electron-tube circuits. 1,784,857; Dec. 16.
Von Diersburg, Karl F. R., Graefelfing, near Munich, Germany. Moving lamp for signs and advertisements. 1,785,465; Dec. 16.
Von Nessen, Walter, New York, N. Y., assignor to Efcolite Corporation, Trenton, N. J. Lighting fixture or article of similar nature. Des. 82,861; Dec. 16.
Von Nessen, Walter, New York, N. Y., assignor to Efcolite Corporation, Trenton, N. J. Lighting fixture or article of similar nature. Des. 82,862; Dec. 16.
Wadsworth, George B., Company, The. (See Wadsworth, George E., assignor.)
Wadsworth, George E., Erlanger, Ky., assignor, by mesne assignments, to The George B. Wadsworth Company, Cincinnati, Ohio. Safety electrical device. 1,785,290; Dec. 16.
Walker, Charles I., Los Angeles, Calif., assignor to Chicago Railway Equipment Company, Chicago, Ill. Hangerless brake beam. 1,784,917; Dec. 16.
Walker Manufacturing Company. (See Johnson, Ben F., assignor.)
Walker, Prescott H., and S. S. Kenyon, assignors to The Carborundum Company, Niagara Falls, N. Y. Abrasive or refractory articles and making the same. 1,785,102; Dec. 16.
Walter, Albert U., Baltimore, Md. Antisiphoning system. 1,784,918; Dec. 16.
Walters, D. E. (See McGee, Rupert E., assignor.)
Wampler, Isaac S. (See Chandler, E. A., and McCann, assignors.)
Wangelin, Walter H., St. Louis, Mo. Sand screen. 1,785,161; Dec. 16.
Wargin, Lee M., St. Louis, Mo. Finger ring. 1,785,217; Dec. 16.
Warren, Mahala, Wetumka, Okla. Valentine envelope. Des. 82,863; Dec. 16.
Wasmuth, Augustus F., Huntington, assignor to Wasmuth-Endicott Company, Andrews, Ind. Door with hinge. 1,785,661; Dec. 16.
Wasmuth-Endicott Company. (See Wasmuth, Augustus F., assignor.)
Waterloo, Paul G., Madera, Pa. Temperature-indicating device. 1,785,662; Dec. 16.
Watling, Thomas W. B., Chicago, Ill. Casing for weighing scale. Des. 82,864; Dec. 16.
Watson, Frederick W., Cleveland Heights, Ohio. Batten clamp. 1,785,400; Dec. 16.
Wayne Novelty and Publishing Company. (See Bitner, John S., assignor.)
Weaver, Eugene L., assignor to Harry B. Carpenter, Los Angeles, Calif. Selling booth. Des. 82,865; Dec. 16.
Webber, Charles S., and C. J. Staud, assignors to Eastman Kodak Company, Rochester, N. Y. Manufacture of mixed esters of cellulose. 1,785,466; Dec. 16.
Weber Costello Company. (See Johnson, John F., assignor.)
Weiske, Paul, and K. Rupprecht, Berlin, Germany, assignors to General Electric Company. Motor-control system. 1,785,567; Dec. 16.
Weisman, Julius, Providence, R. I., assignor to Plainville Stock Company, Plainville, Mass. Clasp or fastening device for bracelets. 1,785,059; Dec. 16.
Weiss, Howard F., assignor to C. F. Burgess Laboratories, Inc., Madison, Wis. Facing membrane for sound-absorbing materials. 1,785,507; Dec. 16.
Welch, Harry R. (See Humberstone, E. H., and Welch.)
Wellman Engineering Company. (See Rogers, John F., assignor.)
Wells, Russell D., Pottstown, Pa. Gas range. 1,785,568; Dec. 16.
Wels, Franz, assignor of one-half to C. Kronig, Schloss Harta, near Hohenelbe, Czechoslovakia. Pleasure sled or sleigh. 1,785,467; Dec. 16.
Wente, Edward C., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Sound-recording system. 1,784,858; Dec. 16.
Western Electric Company. (See Betts, Philander H., assignor.)
Western Electric Company. (See Farrington, John F., assignor.)
Western Electric Company. (See Gray, Frank, assignor.)
Western Electric Company. (See Hagemann, Edwin C., assignor.)
Western Electric Company. (See Harrison, Henry C., assignor.)
Western Electric Company. (See Martell, C., and Hagen, assignors.)
Western Electric Company. (See Trebes, Bruno M. A., assignor.)
Western Electric Company. (See Weston, William K., assignor.)
Western Union Telegraph Company, The. (See McGuinness, William V., assignor.)
Western Wheeled Scraper Company. (See Morton, Rolla A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hill, Charles F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Schenkel, Moritz, assignor.)
Westinghouse Electric & Manufacturing Company. (See Schmidt, Henry F., assignor.)
Weston, William K., Sanderstead, England, assignor to Western Electric Company, Incorporated, New York, N. Y. Twisting machine. 1,784,859; Dec. 16.
Weyerhaeuser Timber Company. (See Payzant, Henry H., assignor.)
Whipple, James B., Huntington Park, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Clingstone-fruit pitter. 1,785,020; Dec. 16.
Whipple, James B., Huntington Park, assignor, by mesne assignments, to Pacific Machinery Company, San Francisco, Calif. Fruit pitter. 1,785,021; Dec. 16.

Whirldry Corporation. (See Dunham, George W., assignor.)
White, Ezekiel F., Hartford, assignor to G. V. Lassen, West Hartford, Conn. Liquid-fuel burner. 1,785,707; Dec. 16.
White, Horace E., and G. M. F. Depfer, Baltimore, Md., assignors to Draper Corporation, Hopedale, Mass. Automatically-threading loom shuttle. 1,785,226; Dec. 16.
White, John H., Cranford, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Metallurgical process. 1,785,060; Dec. 16.
White, Jonathan N., New York, N. Y. Alloy. 1,785,372; Dec. 16.
White, Virginia A., Dallas, Tex. Abdominal support or corset. 1,785,162; Dec. 16.
White, Wilbur, Chemical Co., The. (See Bridgeman, Walter A., assignor.)
White, William E., assignor to Kalman Steel Company, Chicago, Ill. Ceiling support. 1,785,061; Dec. 16.
Whitehead and Hoag Company, The. (See Day, James C., assignor.)
Whitehead, Richard H., assignor to The New Haven Clock Company, New Haven, Conn. Clock case. Des. 82,866; Dec. 16.
Whittle, Horace, Maplewood, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Transformer system. 1,785,062; Dec. 16.
Wicaco Machine Corporation. (See Lawser, Charles W., assignor.)
Wiebusch, Charles F., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Sound recorder. 1,784,860; Dec. 16.
Wiedeke, Gustav, assignor to G. Wiedeke Company, Dayton, Ohio. Operating device for tube expanders and the like. 1,785,103; Dec. 16.
Wiedeke, Gustav, Company. (See Wiedeke, Gustav, assignor.)
Wight, Sedgwick N., assignor to General Railway Signal Company, Rochester, N. Y. Train-dispatching system for railroads. 1,785,708; Dec. 16.
Wilde, Francis E. J., Meadowmere Park, N. Y. Electric sign. 1,784,861; Dec. 16.
Wildhaber, Ernest, Brooklyn, N. Y. Transmission. 1,784,919; Dec. 16.
Wildhaber, Ernest, Brooklyn, N. Y. Transmission. 1,784,920; Dec. 16.
Wilkins, Roy, San Francisco, Calif. Well-drilling equipment. 1,785,163; Dec. 16.
Willette, Charles W., Portland, Oreg. Hand-operated lumber trimmer. 1,785,373; Dec. 16.
Williams, James F., Lyndhurst, N. J., assignor to General Motors Corporation, Detroit, Mich. Antifriction bearing. 1,785,063; Dec. 16.
Willis, LeRoy W., Brooklyn, assignor to Intertype Corporation, New York, N. Y. Metal potfor line-casting machines. 1,785,607; Dec. 16.
Wilmoh Manufacturing Corporation. (See Mohler, John J., assignor.)
Wilner, Elias R., assignor to Eddystone Cement Corporation, New York, N. Y. Producing cement. 1,785,508; Dec. 16.
Winchester Repeating Arms Company. (See Pugsley, Edwin, assignor.)
Wind-blast Chaffer Company, The. (See Hoes, J. W., and Cronk, assignors.)
Winship, Bolt & Co. (See Hatfield, Percy W., assignor.)
Winter, Fred H., Schenectady, N. Y., assignor to General Electric Company. Electrical regulator. 1,785,569; Dec. 16.
Winters, Ira C., Norwich, N. Y. Changeable eyes for dolls. 1,784,921; Dec. 16.
Winthrop Chemical Company. (See Streitwolf, K., and Fehrle, assignors.)
Wise Shoes, Inc. (See Elias, Albert I., assignor.)
Witherspoon, Lillian S., San Francisco, Calif. Holder for sifter-top cans or packages. 1,784,979; Dec. 16.
Wittmann, Clarence M., Pittsburgh, Pa. Combination window and screen. 1,785,663; Dec. 16.
Wittmayer, Alexander, Brooklyn, N. Y. Adjustable connection for bracelets and the like. 1,785,104; Dec. 16.
Wolarsky, Isidore, Mount Vernon, N. Y. Lighting-fixture support. 1,784,885; Dec. 16.
Wolcott, Jone E. (See Johnson, Victor E., assignor.)
Wolfe, George F. (See Edwards, V. B., and Wolfe.)
Wolfson, Harold M., New York, N. Y., assignor to Milton Bradley Company, Springfield, Mass. Educational appliance. 1,784,952; Dec. 16.
Wolliny, K., assignor to the firm Nollesche Werke Komm.-Ges., Weissenfels O. S., Germany. Tack-feeding device. 1,785,570; Dec. 16.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Multiple-stereotype-plate-casting machine. 1,785,164; Dec. 16.
Wood Newspaper Machinery Corporation. (See Tornberg, Isidor, assignor.)
Wood Newspaper Machinery Corporation. (See Wood, Henry A. W., assignor.)
Woods, Charles C., Denver, Colo. Process and apparatus for regulation of tone-producing quality of hammers in stringed musical instruments. 1,785,165; Dec. 16.
Worrall, Arthur G. (See Hackett, R. W., and Worrall.)
Worthington Pump and Machinery Corporation. (See Lawaczeck, Franz, assignor.)
Wozniak, Joseph, and E. G. Bremforder, Detroit, Mich. Display device. 1,785,105; Dec. 16.
Wright, Bert R., Poughkeepsie, assignor to The De Laval Separator Company, New York, N. Y. Liquid-flow regulator for centrifuges. 1,784,953; Dec. 16.
Wright, J. T., Company, The. (See Wright, Joseph T., assignor.)
Wright, Joseph T., assignor to The J. T. Wright Company, Cincinnati, Ohio. Lubricating perforator presses. Re17,905; Dec. 16.
Yakunin, Andrew, Calgary, Alberta, Canada. Hermetically-closing-up device for cars. 1,785,291; Dec. 16.
Yale & Towne Manufacturing Company, The. (See Lawrence, Alfred, assignor.)
Yale & Towne Manufacturing Company, The. (See Stuebing, William, jr., assignor.)
Yancey, Archelous B., Pasadena, Calif. Latch. 1,785,468; Dec. 16.
Young, Charles D., Wayne, Pa. Loading and unloading apparatus. 1,785,167; Dec. 16.
Young, Charles D., Wayne, Pa. Loading and unloading apparatus. 1,785,168; Dec. 16.
Young, Charles D., Wayne, Pa. Ramp-rail construction. 1,785,169; Dec. 16.
Young, Charles O., Jackson Heights, N. Y., assignor to Carbide & Carbon Chemicals Corporation. Manufacture of esters from aldehydes. 1,785,166; Dec. 16.
Young, Floyd S., assignor to May Seed & Nursery Co., Shenandoah, Iowa. Tire or similar article. Des. 82,867; Dec. 16.
Young, L. A., Spring & Wire Corporation. (See O'Brien, Falconer, assignor.)
Young, L. A., Spring & Wire Corporation. (See Oldham, John M., assignor.)
Youngblood, David F., San Antonio, Tex. Jail. 1,785,469; Dec. 16.
Youngblood, David F., San Antonio, Tex. Master operating mechanism for cell doors and locks. 1,785,470; Dec. 16.
Youngblood, David F., San Antonio, Tex. Master control system for cell doors and locks. 1,785,471; Dec. 16.
Zaidan Hojin Rikagaku Kenkyujo. (See Suzuki, T., Tanaka, and Kurita, assignors.)
Zeindler, Werner, assignor to The Service Caster & Truck Co., Albion, Mich. Truck. 1,785,064; Dec. 16.
Zell, David H., Brooklyn, N. Y. Vanity case or analogous article. Des. 82,868; Dec. 16.
Zell, David H., Brooklyn, N. Y. Vanity case or analogous article. 82,869; Dec. 16.
Zenthoefer, Joseph V., Hazleton, Pa., assignor, by mesne assignments, to Oliver United Filters Inc., San Francisco, Calif. 1,785,237; Dec. 16.
Zerbe, Lewis E., Moneta, Calif., and M. T. Archer, Pittsburgh, Pa., assignors to Union Tool Company, Torrance, Calif. Apparatus for drilling wells. 1,785,238; Dec. 16.
Zimmerman, Thomas. (See Strickland, S. A., and Zimmerman.)
Zuckerberg, Emanuel, Providence, R. I. Glass ornamentation. 1,785,401; Dec. 16.
Zweibel, Charles A., Louisville, Ky., assignor to W. H. Miner, Inc., Chicago, Ill. Hand brake. 1,785,170; Dec. 16.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 16TH DAY OF DECEMBER, 1930

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abrasive or refractory articles and making the same. P. H. Walker and S. S. Kenyon. 1,785,102; Dec. 16.
Acid, Producing chromic. M. J. Udy. 1,784,950; Dec. 16.
Adding machine. G. J. Barrett. 1,784,862; Dec. 16.
Addressing machines, Recording device for. P. A. Gollnick and F. W. Broderick. 1,785,517; Dec. 16.
Adjustable jack. C. G. Boudette. 1,785,069; Dec. 16.
Adjustable jack. M. P. Holmes. 1,784,991; Dec. 16.
Advertising device. J. W. Allen. 1,785,474; Dec. 16.
Advertising device. D. Solodar. 1,785,100; Dec. 16.
Aerial navigation instrument. G. Estoppey. 1,784,929; Dec. 16.
Aeroplane. J. A. Cashel. 1,785,295; Dec. 16.
Aeroplane. A. Lanzetta. 1,785,128; Dec. 16.
Aeroplane. F. R. Longstreet. 1,784,939; Dec. 16.
Aircraft. S. F. Kumor. 1,785,633; Dec. 16.
Aircraft propelling means, Pneumatic. O. K. Quast. 1,785,458; Dec. 16.
Air heater. J. E. Black. 1,785,334; Dec. 16.
Air heater. S. D. Rich. 1,785,649; Dec. 16.
Air into oxygen and nitrogen, Complete separation of liquid. A. Messer. 1,785,491; Dec. 16.
Airplane. T. F. Cooney. 1,785,477; Dec. 16.
Airplane. F. A. Doyle and G. A. Lyons. 1,785,114; Dec. 16.
Airplane propeller. F. A. Dumont. 1,784,894; Dec. 16.
Airplane wings, Rolling apron for. F. De La Tour Castelcicala. 1,785,300; Dec. 16.
Alkyl-phenyl ether. I. Ostromisiensky. 1,785,327; Dec. 16.
Alloy. J. N. White. 1,785,372; Dec. 16.
Alumina, Preparing pure. T. Suzuki, H. Tanaka, and T. Kurita. 1,785,464; Dec. 16.
Anchor, Concrete. O. Rice. 1,785,648; Dec. 16.
Anchorage device, Cushioning. H. E. Fritz. 1,784,897; Dec. 16.
Animal trap. H. W. Abel. 1,785,664; Dec. 16.
Annunciator, Electric. J. J. Enneking. 1,784,961; Dec. 16.
Anthracene, Purification of crude. A. O. Jaeger. Re17,902; Dec. 16.
Antioxidant or age resister. A. M. Clifford. 1,785,692; Dec. 16.
Antisiphoning system. A. U. Walter. 1,784,918; Dec. 16.
Apparatus for releasing glider planes. O. Alvistur. 1,784,954; Dec. 16.
Apparatus for use in loading mine cars. J. A. Paisley. 1,785,593; Dec. 16.
Ash-dust eliminator. F. R. Dyke. 1,785,481; Dec. 16.
Auto thriller and amusement apparatus. H. Rocks, jr. 1,785,363; Dec. 16.
Automobile body, Convertible. T. P. Fesko. 1,784,962; Dec. 16.
Awning fixture. F. E. Markert. 1,785,520; Dec. 16.
Axle for self-propelled vehicles. B. H. Urschel. 1,784,856; Dec. 16.
Back digger. A. Orloff. 1,785,942; Dec. 16.
Back-pressure joint. J. D. Lemex. 1,785,271; Dec. 16.
Bag: *See*—
Hand bag.
Bag. M. R. Kendall. 1,785,126; Dec. 16.
Bag-frame clasp. W. C. Hiering. 1,785,380; Dec. 16.
Balancing spring. J. W. Fry. 1,785,118; Dec. 16.
Base for nickel clocks, Metal. J. O. Simpson. 1,785,231; Dec. 16.
Base member for use with cooking vessels. E. V. Coulston. 1,785,182; Dec. 16.
Bathtub. C. J. Steele. Des. 82,856–7; Dec. 16.
Bathtub and shower, Combination. H. S. Leber. 1,785,636; Dec. 16.
Batten clamp. F. W. Watson. 1,785,400; Dec. 16.
Bearing. J. L. Osborne. 1,785,702; Dec. 16.
Bearing, Antifriction. J. F. Williams. 1,785,063; Dec. 16.
Bearing, Connecting-rod. S. G. Reinhard. 1,785,459; Dec. 16.
Bearing for conveyer rollers. C. J. Reichle. 1,784,848; Dec. 16.
Bearing for pump-operating members. J. P. Ratigan. Re17,904; Dec. 16.
Bearing, Roller. F. C. Cowburn. 1,785,617; Dec. 16.
Bearing, Roller. S. A. Strickland and T. Zimmerman. 1,784,914; Dec. 16.
Bearing, Vehicle- spring. R. R. Searles and E. H. Cooper. 1,785,655; Dec. 16.
Bed stay. J. H. De Boer. 1,785,075; Dec. 16.
Bench: *See*—
Manual-training bench.
Beverage dispenser. H. E. Crosby. Des. 82,798; Dec. 16.
Binder, Loose-leaf. J. L. McMillan. 1,785,684; Dec. 16.
Bit: *See*—
Drilling bit.
Bituminous materials, Apparatus for molding. A. J. Pfohl. 1,785,457; Dec. 16.
Blackboard installation, Ventilated. J. F. Johnson. 1,784,900; Dec. 16.
Block: *See*—
Building block. Pulley block.
Blotter and box, Combined desk. E. A. Schuelke. 1,785,229; Dec. 16.
Board: *See*—
Ironing board.
Boiler. E. V. Varcoe. 1,785,058; Dec. 16.
Boiler cleaner. T. D. Evans. 1,785,024; Dec. 16.
Boiler-control and water-heating device, Automatic. M. Seidel. 1,785,098; Dec. 16.
Boilers, Duplex feeder for low-pressure heating. L. P. Flood. 1,785,547; Dec. 16.
Boilers, Superheater for. R. H. M. Erdmann. 1,785,441; Dec. 16.
Bolt and bushing therefor. J. G. Campau. 1,785,709; Dec. 16.
Booth, Selling. E. L. Weaver. Des. 82,865; Dec. 16.
Boring rotary, Earth-. E. E. Greve. 1,785,254; Dec. 16.
Bottle heater, Nursing-. W. F. Edlin. 1,785,438; Dec. 16.
Bottle or similar article. W. W. Hobé. Des. 82,824; Dec. 16.
Bowl construction, Scraper. W. J. Adams. 1,785,106; Dec. 16.
Box: *See*—
Journal box. Mail box.
Box partitioning. L. E. La Bombard and M. H. Sidebotham. 1,785,416; Dec. 16.
Bracket: *See*—
Broom-handle bracket.
Bracket or article of similar nature, Lighting-fixture. J. J. Blumenthal. 82,790; Dec. 16.
Braiding machine. G. D. Mallory. 1,785,683; Dec. 16.
Brake: *See*—
Hand brake.
Brake-band-lining device. V. Freshkoff. 1,785,076; Dec. 16.
Brake bands and the like, Making. T. M. Russell. 1,785,391; Dec. 16.
Brake beam, Hangerless. C. I. Walker. 1,784,917; Dec. 16.
Brake-beam structure. H. W. Ekholm. 1,784,896; Dec. 16.
Brake control for power-propelled vehicles, Automatic. E. G. Staude. 1,785,052; Dec. 16.
Brake drum. J. V. Pugh. 1,785,424; Dec. 16.
Brake for automatic reels. A. D. Maury. 1,785,279; Dec. 16.
Brake lining. F. C. Morris. 1,784,994; Dec. 16.
Brake mechanism. S. Bentty. 1,785,432; Dec. 16.
Brake mechanism. A. E. Minium. 1,785,203; Dec. 16.
Brake mechanism. H. L. F. Trevert. 1,785,057; Dec. 16.
Brake structure for caster wheels. H. P. Nielsen. 1,785,421; Dec. 16.
Brake-testing machine. E. P. Bewley. 1,785,243; Dec. 16.
Brakes, Equalizing system for four-wheel. B. Carlin. 1,785,179; Dec. 16.
Breast lifter for gins. J. Behle. 1,785,109; Dec. 16.
Bridge-building apparatus. V. B. Edwards and G. F. Wolfe. 1,785,023; Dec. 16.
Broom handle bracket, Push-. F. Schweigert. 1,785,564; Dec. 16.
Broom, Hearth. G. A. Hancock. Des. 82,823; Dec. 16.
Brush, Current-collecting. C. Hansen and H. S. Ellson. 1,785,483; Dec. 16.
Buckle, Apparel. L. Frank. Des. 82,810–20; Dec. 16.
Buckle, Apparel. A. H. Kerngood. Des. 82,829–36; Dec. 16.
Buckle, Shoe. S. M. Riker. Des. 82,848–9; Dec. 16.
Building. A. F. Bemis. 1,785,067; Dec. 16.
Building block. F. Sayers. 1,785,499; Dec. 16.
Bunion corrector. J. C. Day. 1,785,185; Dec. 16.
Burner: *See*—
Coal burner. Fuel burner.
Burner. D. H. Turner. 1,785,605; Dec. 16.
Cabinet, Tool. F. H. Bachelder. 1,785,666; Dec. 16.
Cable-pulling device, Underground-. P. Eufinger. 1,784,829; Dec. 16.
Cableway, Portable. J. H. and M. H. Dickinson. 1,785,340; Dec. 16.
Cables, Grip for electric. P. F. Hellermann. 1,785,628; Dec. 16.

Cadmium from cadmium-containing material, Producing metallic. H. H. Monroe. 1,785,139; Dec. 16.
Cake machines, Batter-feeding device for pastry-. C. Schroeder and H. Tatosian. 1,785,394; Dec. 16.
Calcium phosphate, Granular. H. Adler and G. A. McDonald. 1,785,473; Dec. 16.
Calendar. E. McNamara. 1,785,640; Dec. 16.
Calendar, Perpetual. H. L. Fischer. Des. 82,806; Dec. 16.
Calender roll. A. Lade. 1,785,265; Dec. 16.
Cam ring, Segmental. H. Swingleburst. 1,785,603; Dec. 16.
Can: *See*—
Oil can. Tobacco can.
Can opener. J. Kovats. 1,785,384; Dec. 16.
Can-washing machine. H. Krause. 1,785,352; Dec. 16.
Car dump-registering means, Mine-. J. J. and R. A. Body. 1,785,433; Dec. 16.
Car, Hot-metal. C. P. Astrom. 1,785,292; Dec. 16.
Cars, Hermetically-closing-up device for. A. Yakunin. 1,785,291; Dec. 16.
Carbon bisulphide from gas, Removal of. W. J. Klaiber. 1,785,415; Dec. 16.
Carbonaceous materials, Apparatus for carbonizing and distilling. W. W. O'Dell. 1,785,645; Dec. 16.
Carburetor. W. C. Carter. 1,784,864; Dec. 16.
Carburetor. A. W. Fulwiler. 1,785,026; Dec. 16.
Carburetor. F. Goudard. 1,785,681; Dec. 16.
Carburetor dust cleaner. S. P. Klima. 1,785,632; Dec. 16.
Carburetor for internal-combustion engines. E. Pedrini. 1,785,045; Dec. 16.
Card, Telephone-installer's omnibus number sign. G. D. Cox. 1,784,814; Dec. 16.
Carriage, Baby. A. Pascoo. 1,785,646; Dec. 16.
Carriage or the like, Baby. A. Schnabel. 1,784,976; Dec. 16.
Carrier: *See*—
Leader carrier. Merchandise carrier.
Carrier for automobiles, Luggage. M. Moore. 1,784,971; Dec. 16.
Case: *See*—
Vanity case.
Cash register. J. P. Frank. 1,785,378; Dec. 16.
Casing, Condenser. S. I. Cole. Des. 82,797; Dec. 16.
Casing, Flash-light. J. L. Shannon. Des. 82,853; Dec. 16.
Casing for flexible shafts. J. L. Hasemann. 1,785,345; Dec. 16.
Casing for weighing scale. T. W. B. Watling. Des. 82,864; Dec. 16.
Ceiling construction. A. Schmid. 1,785,050; Dec. 16.
Cellulose, Nitrating. L. A. Pinck. 1,784,945; Dec. 16.
Cement, Manufacturing Portland. G. S. La Forge. 1,784,840; Dec. 16.
Cement, Producing. E. R. Wilner. 1,785,508; Dec. 16.
Ceramics, Method and product for preventing efflorescence in. A. Hough and J. G. Harrison. 1,785,309; Dec. 16.
Chaffer for thrashing machines and grain harvesters. J. W. Hoes and H. Cronk. 1,785,195; Dec. 16.
Chain, Antiskid. E. Ronferek. 1,785,117; Dec. 16.
Chain tightener, Nonskid-. J. F. Persinger. 1,785,323; Dec. 16.
Chair. L. H. Clark and W. S. Sengpiel. 1,785,337; Dec. 16.
Chair. R. L. Klotz. 1,785,317; Dec. 16.
Chamois, buckskins, or other leather, Tanning. A. Ernst. 1,784,828; Dec. 16.
Charging device. C. C. Hansen. 1,785,344; Dec. 16.
Chemical reactions, Apparatus for. T. Griswold, jr. 1,785,080; Dec. 16.
Chipping machines, Knife-holding means for. C. B. Sprague. 1,785,151; Dec. 16.
Chuck, Air. J. C. Crowley. 1,784,822; Dec. 16.
Chuck, Differential. J. C. Regan. 1,784,908; Dec. 16.
Chuck for spooling or reeling machines. H. S. Busey. 1,785,248; Dec. 16.
Circuit controller. H. B. Taylor. 1,785,705; Dec. 16.
Circuit, Magnetic modulator. E. Peterson. 1,784,879; Dec. 16.
Circuit switch. L. A. Gary. 1,784,898; Dec. 16.
Circuits, Electron-tube. M. von Ardenne and H. Heinert. 1,784,857; Dec. 16.
Clamp: *See*—
Batten clamp. Tooth clamp.
Hose clamp.
Clasp: *See*—
Bag-frame clasp.
Clasp or fastening device for bracelets. J. Weisman. 1,785,059; Dec. 16.
Classifying apparatus. A. France. 1,785,679; Dec. 16.
Clays and the like, Device for testing. J. F. Mackin. 1,785,521; Dec. 16.
Cleaner: *See*—
Boiler cleaner. Screw-thread cleaner.
Carburetor dust cleaner. Vacuum cleaner.
Cleaners for shoe linings. H. S. Buttenheim. 1,785,512; Dec. 16.
Clip: *See*—
Paper clip.
Clock case. R. H. Whitehead. Des. 82,866; Dec. 16.
Clock, Electrically-wound. C. E. de Long. 1,785,301; Dec. 16.
Clock, Graphophone. J. H. Holloway. 1,785,121; Dec. 16.
Clocks, Automatic strike-regulating means for. F. Heckert. 1,785,551; Dec. 16.
Closet bowl, Water-. H. F. Kelso. 1,785,198; Dec. 16.
Closure and support, Bag. F. L. Savageau. 1,785,498; Dec. 16.
Closure, Bottle. D. N. Van Alstyne. 1,785,716; Dec. 16.
Closure-removing device. G. A. Carlson. 1,785,436; Dec. 16.
Clutch, Double-end-drive reverse. R. Gerber. 1,785,548; Dec. 16.
Coal and the like, Apparatus for gasifying. C. Davies, jr. 1,784,985; Dec. 16.
Coal breaker. G. W. Borton. 1,784,983; Dec. 16.
Coal burner, Automatic. A. Ousdahl. 1,785,456; Dec. 16.
Coat. D. Long. Des. 82,840; Dec. 16.
Coat, Apparel. A. Hessler. 1,785,029; Dec. 16.
Coating composition and preparing the same. C. H. Siever. 1,785,307; Dec. 16.
Coiling device. G. B. Higgins. 1,785,518; Dec. 16.
Color-light signal. S. M. Day. 1,785,694; Dec. 16.
Combustion chamber. C. E. Hawks. 1,785,583; Dec. 16.
Combustion device. E. W. Pelster. 1,785,046; Dec. 16.
Communication, System and method of. J. H. Hammond, jr. 1,785,307; Dec. 16.
Compass or similar article. J. H. Fischer. Des. 82,807; Dec. 16.
Compensating switch. H. Rowntree. 1,784,883; Dec. 16.
Compressor mechanism. W. Fourness. 1,785,407; Dec. 16.
Condensers, Process and apparatus for making electric. W. Dubilier. 1,785,479; Dec. 16.
Conduit. E. Babb. 1,785,403; Dec. 16.
Conduit device, Fluid-. E. C. Adams. 1,784,980; Dec. 16.
Conduit fitting. G. R. Metcalf, jr. 1,785,136; Dec. 16.
Connecting device. S. S. Matthes. 1,785,522; Dec. 16.
Connection for bracelets and the like, Adjustable. A. Wittmayer. 1,785,104; Dec. 16.
Connection, Spring-end. J. W. Smith. 1,785,686; Dec. 16.
Container, Mortuary-record. H. P. Hansen. 1,785,582; Dec. 16.
Containers, Combined opener and closure for paper milk. J. J. Schmerler. 1,785,599; Dec. 16.
Control, Fuel-feed. B. Valjean. 1,785,160; Dec. 16.
Control surface for aircraft, submersibles, and the like. L. G. Frise. 1,785,620; Dec. 16.
Control system. D. K. Blake. 1,785,611; Dec. 16.
Control system. D. K. Blake. 1,785,722; Dec. 16.
Control system. W. J. McLachlan. 1,785,714; Dec. 16.
Control system, Automatic. D. K. Blake. 1,785,719; Dec. 16.
Conveyer, Articulated. E. M. Arentzen. 1,785,402; Dec. 16.
Conveyer for stokers. F. C. Pickard. 1,785,282; Dec. 16.
Conveyer, Rock. R. R. Dailey. 1,785,249; Dec. 16.
Conveyers relative to the chains thereof, Adjusting the rails of. E. E. Kennedy. 1,785,315; Dec. 16.
Copper carbon contact. S. M. Day. 1,785,618; Dec. 16.
Copyholder. J. B. Haywood. 1,784,873; Dec. 16.
Cords, Apparatus for and method of testing. T. B. Buffum. 1,785,690; Dec. 16.
Core barrels, Screen plug for. R. C. Baker. 1,784,886; Dec. 16.
Core by-pass drill. O. F. Harding. 1,785,120; Dec. 16.
Core, Collapsible. B. De Mattia. 1,784,960; Dec. 16.
Cores, Apparatus for covering. B. M. A. Trebes. 1,785,398; Dec. 16.
Cores, Method of and apparatus for coating. C. C. Martell and B. A. Hagen. 1,785,037; Dec. 16.
Corona elimination in dynamo-electric machines. C. F. Hill. 1,784,990; Dec. 16.
Corona in alternators, Elimination of. C. F. Hill. 1,784,989; Dec. 16.
Cot, Folding. H. Gursky and M. Volkes. 1,785,258; Dec. 16.
Cotter pin. E. G. Goodwin. 1,785,622; Dec. 16.
Counterbalance. C. H. Bergquist. 1,785,668–9; Dec. 16.
Coupling: *See*—
Hose coupling.
Coupling mechanism. E. A. Larsson. 1,785,269; Dec. 16.
Coupling members, Making. E. E. Johnson. 1,784,966; Dec. 16.
Cover for registers and radiators. W. K. Gammeter. 1,785,253; Dec. 16.
Cover for umbrellas, Detachable. E. M. Riley. 1,785,561; Dec. 16.
Covering, Floor. R. D. Bonney and W. Y. Irwin, jr. 1,784,810; Dec. 16.
Crab trap. J. Holoubek. 1,785,348; Dec. 16.
Crane. A. B. Jacoby. 1,785,090; Dec. 16.
Crystallization. J. R. and T. Ray. 1,785,530; Dec. 16.
Cultivating device. B. M. Rolph. 1,784,974; Dec. 16.
Cultivators, Hilling attachment for. C. M. De Yone. 1,785,676; Dec. 16.
Cutter: *See*—
Weed cutter.
Cutting machine and the like, Coal-. W. C. Black. 1,785,574; Dec. 16.
Cylinder and control for lathe chucks and the like, Pneumatic engine. G. F. Hopkins. 1,785,349; Dec. 16.
Cylinder lock. A. Lawrence. 1,785,634; Dec. 16.
Damper and latching mechanism, Flue. G. E. Lauer. 1,785,385; Dec. 16.
Deflector, Paper. L. R. Tufts and A. Olson. 1,784,854; Dec. 16.

Deflector, Sheet. L. R. Tufts and A. Olson. 1,784,855; Dec. 16.
Desk or similar article, Toy. J. Kivy. Des. 82,837; Dec. 16.
Desks and the like, Top for. R. H. McLeod. 1,784,969; Dec. 16.
Die mechanism. C. Fassinger. 1,785,116; Dec. 16.
Digester for sulphite wood pulp. E. Morterud. 1,785,591; Dec. 16.
Digger: *See*—
Back digger.
Digging machine, Plant-. L. McClain. 1,785,588; Dec. 16.
Disk, Duplex scanning. C. F. Jenkins. 1,785,262; Dec. 16.
Disk harrow. W. L. Paul. 1,785,144; Dec. 16.
Disks, Making abrasive. A. J. Doermann. 1,785,437; Dec. 16.
Dispensing apparatus, Liquid-. L. D. Thompson. 1,784,852; Dec. 16.
Dispensing device. G. Raymond. 1,785,097; Dec. 16.
Dispensing device, Liquid-. F. C. Kimmel. 1,785,316; Dec. 16.
Display device. L. E. Kahn. 1,785,449; Dec. 16.
Display device. J. Wozniak and E. G. Bremforder. 1,785,105; Dec. 16.
Distilling apparatus and method. B. O. Benjamin. 1,784,956; Dec. 16.
Dividing strip. R. W. Hardie. 1,785,028; Dec. 16.
Diving apparatus. J. F. O'Rourke. 1,785,528; Dec. 16.
Doll. L. L. McCall. Des. 82,843; Dec. 16.
Doll, Advertising. J. L. Kallus. Des. 82,826; Dec. 16.
Door for hangars and other structures. A. Rush. 1,784,948; Dec. 16.
Doorframe. I. A. Baum. 1,785,174; Dec. 16.
Door hanger, Sliding-. B. Rowntree. 1,784,910; Dec. 16.
Door with hinge. A. F. Wasmuth. 1,785,661; Dec. 16.
Doors and locks, Master control system for cell. D. F. Youngblood. 1,785,471; Dec. 16.
Doors and locks, Master operating mechanism for cell. D. F. Youngblood. 1,785,470; Dec. 16.
Double-throw switch. H. J. Hammerly. 1,785,192; Dec. 16.
Dress. D. Long. Des. 82,841; Dec. 16.
Drier: *See*—
Hair drier.
Drill: *See*—
Core by-pass drill.
Drill bits, Automatic feed device for rotary. J. W. Hauk. 1,785,086; Dec. 16.
Drilling apparatus, Control mechanism for rotary. E. E. Greve. 1,785,257; Dec. 16.
Drilling bit, Core-. R. R. Candee and O. F. Harding. 1,785,405; Dec. 16.
Drilling machine, Rotary. E. E. Greve. 1,785,256; Dec. 16.
Drills, Venting means for pneumatic. R. A. Norling. 1,785,527; Dec. 16.
Drills, Welding. F. O. Hoagland. 1,784,932; Dec. 16.
Drive and oil pump, Combination. S. Dean. 1,785,112; Dec. 16.
Drive, Direct bucket. E. H. Lichtenberg. 1,785,031; Dec. 16.
Drive for wood-pulp grinders and the like. W. L. Merrill. 1,785,490; Dec. 16.
Driving mechanism. N. A. Strand. 1,785,055; Dec. 16.
Dust collection. C. F. Morse and E. L. Hogan. 1,785,453; Dec. 16.
Dust separating and collecting system, Elastic-fluid. G. M. Spencer. 1,785,331; Dec. 16.
Educational appliance. H. M. Wolfson. 1,784,952; Dec. 16.
Egg whip and the like. S. Schiff. 1,785,563; Dec. 16.
Eggs, Preserving. D. E. Seaward. 1,785,461; Dec. 16.
Electric accumulator. C. H. O. Lubeck. 1,785,202; Dec. 16.
Electric distribution system. D. K. Blake. 1,785,612; Dec. 16.
Electric distribution system. D. K. Blake. 1,785,720–1; Dec. 16.
Electric distribution system. W. J. McLachlan. 1,785,710–13; Dec. 16.
Electric machine, Dynamo-. J. F. H. Douglas. 1,785,515; Dec. 16.
Electric-machine element, Dynamo-. V. G. Apple. 1,784,815; Dec. 16.
Electric machines, Corona elemination in dynamo-. M. Schenkel. 1,784,997; Dec. 16.
Electric reflecting heater. W. W. Hicks. 1,785,413; Dec. 16.
Electric switch. T. A. Both. 1,785,068; Dec. 16.
Electric wave transmission system. P. H. Betts. 1,784,957; Dec. 16.
Electrical device, Safety. G. E. Wadsworth. 1,785,290; Dec. 16.
Electrical regulator. F. H. Winter. 1,785,569; Dec. 16.
Electrical switch. J. H. Cohen. 1,784,820; Dec. 16.
Electrode joint. C. Kuhlmann. 1,785,587; Dec. 16.
Electroplating, Controlling. R. J. Piersol. 1,785,389; Dec. 16.
Elevator: *See*—
Grain elevator.
Elevator. R. A. Morton. 1,785,141; Dec. 16.
Elevator-control device. J. R. Jackson, jr. 1,784,933; Dec. 16.
Engine: *See*—
Internal-combustion engine. Steam engine.
Engine. P. Bastien. 1,785,108; Dec. 16.
Engines, Humidifying device for internal-combustion. J. S. Funalman. 1,784,831; Dec. 16.
Engines, Power-shaft connection for internal-combustion. J. V. Maurais. 1,784,902; Dec. 16.
Engines, pumps, or the like, Guideway for reciprocating. A. Aldrich. 1,785,688; Dec. 16.
Envelope feeder. E. C. Hess. 1,784,836; Dec. 16.
Envelope, Valentine. M. Warren. Des. 82,863; Dec. 16.
Esters from aldehydes, Manufacture of. C. O. Young. 1,785,166; Dec. 16.
Esters of cellulose, Manufacture of mixed. C. S. Webber and C. J. Staud. 1,785,466; Dec. 16.
Excavating machine. R. Kurtz. 1,785,353; Dec. 16.
Exhaust mechanism, Underwater. F. T. Irgens. 1,785,089; Dec. 16.
Explosive assembly, Blasting-. C. D. Pratt. 1,785,529; Dec. 16.
Eyes for dolls, Changeable. I. C. Winters. 1,784,921; Dec. 16.
Fabric for breather bags. J. F. Cooper. 1,785,674; Dec. 16.
Fan attachment, Cooling-. E. Patrick. 1,784,907; Dec. 16.
Fastener, Separable. P. A. Aronson. 1,785,240; Dec. 16.
Fastener, Separable. S. H. Norton. 1,785,715; Dec. 16.
Fastener, Separable. G. Sundback. 1,785,234; Dec. 16.
Fastener slider and making same, Separable. R. H. Nicholson. 1,785,420; Dec. 16.
Fastening means, Barrel-head-. D. B. McDonald. 1,785,133; Dec. 16.
Fats, oils, or oleaginous substances from materials yielding them, Apparatus for recovery of. W. T. Powling. 1,785,361; Dec. 16.
Feed-water regulator. W. Smith. 1,785,149; Dec. 16.
Feeding device. E. A. Marsh. 1,785,132; Dec. 16.
Fertilizer composition and making the same, Ammonium-phosphate. G. H. Buchanan. 1,785,375; Dec. 16.
Fiber product and process of manufacture, Water-resistant. W. H. Mason. 1,784,993; Dec. 16.
Fiber sheets, Embossing. L. Oxhandler. 1,784,906; Dec. 16.
Fibrous material, Porous. D. M. Sutherland, jr. 1,785,101; Dec. 16.
Filling and binding composition. C. K. Stodder. 1,785,053; Dec. 16.
Film and making, Moving-picture. J. Burkhardt. 1,785,336; Dec. 16.
Film, Apparatus for processing. H. V. Jamieson. 1,785,631; Dec. 16.
Filter-cake discharger. J. V. Zenthoefer. 1,785,237; Dec. 16.
Filter press. L. Revel. 1,785,494; Dec. 16.
Finger ring. L. M. Wargin. 1,785,217; Dec. 16.
Fire-extinguishing foam, Apparatus for producing. F. L. Boyd. 1,785,723; Dec. 16.
Fish lure, Artificial. L. Johnson. 1,785,310; Dec. 16.
Fishing reel. H. A. Bokelund. Des. 82,791; Dec. 16.
Fishing rod. H. F. Gephart. 1,785,027; Dec. 16.
Flanging machine. D. E. Stevens. 1,785,537; Dec. 16.
Floor and ceiling construction, Combined. H. E. Marks. 1,784,876; Dec. 16.
Fluid-treating apparatus. E. G. Duden. 1,784,892; Dec. 16.
Fluids with solids, Method and apparatus for treating. I. H. Levin. 1,785,273; Dec. 16.
Flux for soft soldering. H. S. McQuaid. 1,785,135; Dec. 16.
Flux for use in soldering. H. P. Corson. 1,785,180; Dec. 16.
Flux, Soft soldering. H. P. Corson and E. S. Ridler. 1,785,181; Dec. 16.
Flux, Soldering. H. J. Barrett. 1,785,173; Dec. 16.
Flux, Soldering. H. B. Dykstra. 1,785,115; Dec. 16.
Flux, Zinc-chloride-base. G. Lutz. 1,785,131; Dec. 16.
Flux, Zinc-chloride-base. E. A. Taylor. 1,785,155; Dec. 16.
Folding table. J. J. Lafillée. 1,785,450; Dec. 16.
Frame construction, Window-. G. W. Lancaster. 1,784,938; Dec. 16.
Frame for alarm clocks, Ornamental. P. Siptrott. 1,785,233; Dec. 16.
Friction element and making same. I. J. Novak. 1,785,701; Dec. 16.
Fruit pitter. E. R. Anderson. 1,784,998; Dec. 16.
Fruit pitter. H. and D. Goranson. 1,785,012; Dec. 16.
Fruit pitter. H. W. Norgaard. 1,785,014; Dec. 16.
Fruit pitter. A. R. Thompson. 1,785,015–16; Dec. 16.
Fruit pitter. A. R. Thompson and E. R. Anderson. 1,785,019; Dec. 16.
Fruit pitter. J. B. Whipple. 1,785,021; Dec. 16.
Fruit pitter, Clingstone. J. B. Whipple. 1,785,020; Dec. 16.
Fruit pitting and coring apparatus. A. L. Duncan. 1,785,002; Dec. 16.
Fruit pitting and coring apparatus. A. L. Duncan. 1,785,004–5; Dec. 16.
Fruit pitting and coring machine. W. W. Havens. 1,785,013; Dec. 16.
Fruit pitting and coring mechanism. A. L. Duncan. 1,785,007; Dec. 16.

Fruit pitting and coring method. A. L. Duncan. 1,785,006; Dec. 16.
Fruit pitting and coring method and apparatus. A. L. Duncan. 1,785,003; Dec. 16.
Fruit-pitting apparatus. E. R. Anderson. 1,784,999; Dec. 16.
Fruit-pitting apparatus. A. R. Thompson. 1,785,018; Dec. 16.
Fruit-pitting machine. A. L. Duncan. 1,785,009; Dec. 16.
Fruit-pitting machine. A. L. Duncan. 1,785,022; Dec. 16.
Fruit-pitting machine. N. Felizianetti. 1,785,011; Dec. 16.
Fruit-pitting machine. A. R. Thompson. 1,785,017; Dec. 16.
Fruit-pitting machines, Method and apparatus for clearing. A. L. Duncan. 1,784,008; Dec. 16.
Fruit preparatory to removing the pit therefrom, Apparatus for feeding, trimming, and cutting. A. L. Duncan. 1,785,000; Dec. 16.
Fruit-treating method and apparatus. A. L. Duncan. 1,785,001; Dec. 16.
Fuel burner. O. M. Coon. 1,784,927; Dec. 16.
Fuel burner, Liquid-. E. F. White. 1,785,707; Dec. 16.
Fuel-feed system for internal-combustion engines of automobiles. L. P. Barlow. 1,785,573; Dec. 16.
Fuel, Method of and apparatus for reatomizing. J. A. Secor. 1,785,501; Dec. 16.
Fuel-supply apparatus. J. V. Pacher. 1,785,094; Dec. 16.
Fungicidal and insecticidal composition and preparing same. L. P. Curtin. 1,785,074; Dec. 16.
Fungicide and disinfectant, Seed. H. Adler and G. A. McDonald. 1,785,472; Dec. 16.
Furnace: *See*—
Regenerative furnace.
Furnace and conveyer therefor. R. S. Cochran. 1,734,812; Dec. 16.
Fuselage fitting. G. Caproni. 1,785,615; Dec. 16.
Game. L. C. Bump. 1,784,818; Dec. 16.
Game and apparatus, Baseball. P. T. Simmons. 1,785,148; Dec. 16.
Game apparatus. J. R. Hoge and L. D. Soubier. 1,785,088; Dec. 16.
Game apparatus. L. D. Soubier and E. J. Carl. 1,785,150; Dec. 16.
Garage construction. W. R. Hall. 1,784,870; Dec. 16.
Garment. R. F. Albert. 1,785,066; Dec. 16.
Garment. B. S. De Long. 1,784,824; Dec. 16.
Garment and fur steamer. H. P. Easton, jr. 1,785,619; Dec. 16.
Garment and seaming therefor. H. Miller. 1,784,942; Dec. 16.
Garments for women and children, Making. M. D. Neilson. Re17,903; Dec. 16.
Gas-filled discharge device. F. Meyer and H. J. Spanner. 1,784,877; Dec. 16.
Gas, Manufacture of combustible. H. O. Loebell. 1,785,519; Dec. 16.
Gas producer. J. F. Rogers. 1,784,882; Dec. 16.
Gas purifier, Electric. H. F. J. Nolze. 1,785,592; Dec. 16.
Gate: *See*—
Head gate.
Gauge: *See*—
Precision gauge.
Gear, Trawling. J-B. J. A. Vigneron. 1,785,236; Dec. 16.
Gearing, Differential. W. Kirn. 1,785,091; Dec. 16.
Generator: *See*—
Oscillation generator.
Glass, Apparatus for cutting sheet. C. A. Rowley. 1,785,496; Dec. 16.
Glass, Apparatus for gathering. K. E. Peiler. 1,785,209; Dec. 16.
Glass articles, Forming thin-walled. T. H. Sloan. 1,785,535; Dec. 16.
Glass, Drawing sheet. C. A. Rowley and J. A. Reece. 1,785,497; Dec. 16.
Glass for sealing, Preparing composite. J. H. Sherts. 1,785,099; Dec. 16.
Golf-scoring device. J. E. Swarthout. 1,785,288; Dec. 16.
Governor, Centrifugal. J. H. Robertson. 1,785,285; Dec. 16.
Grain elevator, Portable. E. Hartman. 1,784,872; Dec. 16.
Granular material, Method of and apparatus for handling. J. A. Paisley. 1,785,594; Dec. 16.
Grater. T. W. Bigoney. 1,785,244; Dec. 16.
Grille. J. A. Armstrong. Des. 82,778–81; Dec. 16.
Guide and brake, Front-wheel. P. P. Adams. 1,785,172; Dec. 16.
Hair drier. W. Meyer. 1,785,418; Dec. 16.
Hammers, Safety device for pneumatic. J. G. Bollock. 1,785,177; Dec. 16.
Hand bag, Lady's. G. Baumann. 1,785,609; Dec. 16.
Hand brake. C. A. Zweibel. 1,785,170; Dec. 16.
Hand grip and air connecter. A. E. Bronson. 1,784,817; Dec. 16.
Handle: *See*—
Tool handle.
Handle. C. S. Crickmer. 1,785,111; Dec. 16.
Handle, Motor-vehicle window-regulator. G. Graff. Des. 82,822; Dec. 16.
Hanger: *See*—
Door hanger.

Knee pad. J. E. Shotwell. 1,785,213; Dec. 16.
Knob. H. J. Kasch. Des. 82,827; Dec. 16.
Lacing machine. H. D. Colman. 1,784,984; Dec. 16.
Laminated glass, Border seal for. R. W. Hackett and A. G. Worrall. 1,785,696; Dec. 16.
Lamp base or article of analogous nature. M. Kiwad. Des. 82,838; Dec. 16.

Lamp for signs and advertisements, Moving. K. F. R. von Diersburg. 1,785,465; Dec. 16.
Lamp, Railway signal. E. A. Everett. 1,785,516; Dec. 16.
Lamp, Table. S. J. Kaz. Des. 82,828; Dec. 16.
Lamp, Table. M. Kornbium. Des. 82,839; Dec. 16.
Lasting machine. F. Kennel. 1,785,555; Dec. 16.
Lasts, Increaser for. J. E. Swanson. 1,785,153; Dec. 16.
Latch. W. D. Ferries. Des. 82,805; Dec. 16.
Latch. A. B. Yancey. 1,785,468; Dec. 16.
Latch, Door. V. E. Johnson. 1,784,935; Dec. 16.
Latch for folding braces. H. J. Gilbert. 1,785,343; Dec. 16.
Latch, Hood. C. B. Gilmore. 1,784,931; Dec. 16.
Latch, Table-leg. G. J. Corporon. 1,785,616; Dec. 16.
Laundry machine. G. W. Dunham. 1,785,577–8; Dec. 16.
Lawn rake. C. Lorber. 1,785,320; Dec. 16.
Lead castings from metallic articles, Removal of. K. B. Bowman. 1,785,245; Dec. 16.
Leader carrier. S. O. Huffman. 1,784,965; Dec. 16.
Leer feeder. I. Simonis. 1,785,534; Dec. 16.
Lid adjuster, Piano-. E. B. Kursheedt. 1,785,486; Dec. 16.
Lifeboat. L. Cochard. 1,784,819; Dec. 16.
Lifter: *See*—
Valve lifter.
Lifting jack. B. F. Johnson. 1,785,554; Dec. 16.
Light for motor vehicles, Combined tail and stop. R. W. Johnson. Des. 82,825; Dec. 16.
Light signal, Check. O. A. Ross. 1,785,704; Dec. 16.
Light source, Inductive. T. W. Case. 1,785,070; Dec. 16.
Lighting fixture or article of similar nature. I. Rosenblatt. Des. 82,852; Dec. 16.
Lighting fixture or article of similar nature. W. von Nessen. Des. 82,861–2; Dec. 16.
Lighting unit, Vaporproof. J. A. Volk. 1,785,538; Dec. 16.
Line level. A. E. Christensen. 1,785,296; Dec. 16.
Liquids, Aldehyde-free, alcoholic. H. Heuser. 1,785,447; Dec. 16.
Loader. H. F. Gorsuch and A. S. Hughes. 1,785,119; Dec. 16.
Loading and unloading apparatus. C. D. Young. 1,785,167–8; Dec. 16.
Loading machine, Coal-. N. D. Levin. 1,785,201; Dec. 16.
Lock: *See*—
Cylinder lock. Switch-point lock.
Lock. L. L. Bresler. 1,785,335; Dec. 16.
Lock. J. Holtzman. 1,785,381; Dec. 16.
Lock washers, Mechanism for forming. C. G. Olson. 1,785,281; Dec. 16.
Locomotive. W. F. Kiesel, jr. 1,785,485; Dec. 16.
Locomotive tender. E. Ryan and E. R. Funk. 1,785,287; Dec. 16.
Loom, Filling-replenishing. F. A. F. Schmid. 1,785,227; Dec. 16.
Loud-speaker. L. de Forest and R. Halpenny. 1,785,377; Dec. 16.
Louver, Discharge. H. F. Schmidt. 1,785,228; Dec. 16.
Lubricant and producing the same. N. C. Beim. 1,784,809; Dec. 16.
Lumber package. H. H. Payzant. 1,785,360; Dec. 16.
Lumber trimmer, Hand-operated. C. W. Willette. 1,785,373; Dec. 16.
Machine for forming screw propellers. W. F. Newbrough. 1,784,972; Dec. 16.
Machine for making concrete pipes. S. H. Coogan. 1,785,298; Dec. 16.
Machine for making loose leaves for books. W. Flett. 1,785,546; Dec. 16.
Magnetic material. W. F. Brandsma, R. Dijksterhuis, G. J. Sizoo, and G. B. Jonas. 1,785,246; Dec. 16.
Magnetic material. G. W. Elmen. 1,784,827; Dec. 16.
Mail box. A. E. Blackman. 1,785,404; Dec. 16.
Manganese steel, Strain hardening. F. A. Fahrenwald. 1,784,865; Dec. 16.
Manifold, Gas heating. L. H. Berry. 1,784,924; Dec. 16.
Manual-training bench. C. H. Mason. 1,785,321; Dec. 16.
Marker, Street. W. S. Sherman. 1,785,602; Dec. 16.
Massecuite, Curing. J. Berge. 1,784,982; Dec. 16.
Material, Method of and apparatus for utilizing phase changeable. H. B. Rudd. 1,785,326; Dec. 16.
Materials, Apparatus for distilling solid carbonizable. F. T. Snyder. 1,785,565; Dec. 16.
Materials, Method of and apparatus for annealing. C. B. Kingsley. 1,785,264; Dec. 16.
Mattress, Folding. B. M. Frank. 1,785,252; Dec. 16.
Measuring and sampling means, Milk. R. Preston. 1,784,973; Dec. 16.
Mechanical movement. G. G. Lemons. 1,784,842; Dec. 16.
Mechanism for controlling knitting needles in plating operations. J. and R. H. Lawson. 1,785,200; Dec. 16.
Merchandise carrier. E. E. Aseltine. 1,785,665; Dec. 16.
Metal article and making the same, Composite. C. W. Miller and R. E. Bissell. 1,785,137; Dec. 16.
Metal bearing member and treating same. C. H. Seymour. 1,785,502; Dec. 16.
Metal plates for the production of printing plates, Preliminary treatment of. F. Ullmann. 1,785,606; Dec. 16.
Metal powders, Producing lamelliform. E. Podszus. 1,785,283; Dec. 16.
Metallic elements and alloys, Recovery of. H. M. Burkey and D. L. Ogden. 1,785,247; Dec. 16.
Metallurgical process. J. H. White. 1,785,060; Dec. 16.
Metals, Solvent inhibitor for the acid treatment of. W. S. Calcott and I. E. Lee. 1,785,513; Dec. 16.
Micrometric drawing instrument. F. Schwartz.
Mill: *See*—
Pulverizing mill.
Mining machine. M. P. Holmes. 1,785,196; Dec. 16.
1,78,,500; Dec. 16.
Mixing and flow device, Combined. L. E. Bunch. 1,785,670; Dec. 16.
Molding machine. T. O. Morris and J. J. Lawlor. 1,784,995; Dec. 16.
Mop, Dry. F. and T. Spaeth. 1,785,536; Dec. 16.
Mop head, Reversible. L. M. Thornton. 1,785,216; Dec. 16.
Motor: *See*—
Sun-heat motor. Two-cycle V motor.
Motor-control system. K. Rupprecht and R. Dietze. 1,785,597; Dec. 16.
Motor-control system. P. Weiske and K. Rupprecht. 1,785,567; Dec. 16.
Mounting for spectacles and eye-glasses, Nose-guard. L. C. Martin. 1,785,038; Dec. 16.
Mounting, Vacuum-cleaner-handle. E. Mross. 1,785,043; Dec. 16.
Mouthpiece for pipes and cigar holders. E. Paredes. 1,785,595; Dec. 16.
Multiple-break switch. H. J. Hammerly. 1,785,194; Dec. 16.
Multiple wrench. A. A. Kalo. 1,785,125; Dec. 16.
Music, Device to be used in teaching. G. M. Ekstedt. 1,785,440; Dec. 16.
Musical instrument. A. E. Overton. 1,785,206; Dec. 16.
Musical instruments, Attachment for fretted. S. W. Johnson. 1,785,311; Dec. 16.
Musical instruments, Process and apparatus for regulation of tone-producing quality of hammers in stringed. C. C. Woods. 1,785,165; Dec. 16.
Naphthalene and carbon bisulphide from gases, Removal of. G. E. Seil. 1,785,365; Dec. 16.
Napkin fixture. W. P. McCorkindale. 1,785,039; Dec. 16.
Neck adjuster for banjo-. W. L. Lange. 1,785,266; Dec. 16.
Neckpiece, Lady's. F. C. Merrilles. Des. 82,845; Dec. 16.
Nitrocellulose, Manufacture of. A. Hough, J. R. Dufford and W. C. Leonhard. 1,785,030; Dec. 16.
Nut cracker. C. B. Repp. 1,785,328; Dec. 16.
Nuts to metal plates, Attaching tapped. B. T. Andren. Re17,907; Dec. 16.
Oil-burning apparatus. H. A. Tiffany. 1,784,853; Dec. 16.
Oil-burning process. W. Symmes. 1,785,154; Dec. 16.
Oil can, Self-draining. S. E. Nord. 1,785,388; Dec. 16.
Oil-well packer. P. H. Mack. 1,785,276–7; Dec. 16.
Oils as addition agents to zinc-chloride-base fluxes, Sulphonated mineral. W. K. Schweitzer. 1,785,147; Dec. 16.
Oils, Treating petroleum. W. M. Cross. 1,785,073; Dec. 16.
Ophthalmic mountings, Link bridge for. H. H. Styll. 1,784,916; Dec. 16.
Ore and converting hydrocarbons, Reducing. W. H. Smith. 1,785,428; Dec. 16.
Ore classifier. T. A. Dickson. 1,785,302; Dec. 16.
Ore-reducing and hydrocarbon-refining apparatus, Combined. W. H. Smith. 1,785,427; Dec. 16.
Organ-stop action. E. Verlinden. 1,784,951; Dec. 16.
Ornament, Mechanical radiator. C. L. Hawes. 1,784,988; Dec. 16.
Ornament, Shoe. S. M. Riker. Des. 82,847; Dec. 16.
Ornamentation, Glass. E. Zuckerberg. 1,785,401; Dec. 16.
Orthopedic appliance. I. Buckner. 1,785,376; Dec. 16.
Oscillation generator. W. A. Marrison. 1,785,036; Dec. 16.
Oven, Drop-door. E. A. Chandler and J. H. McCann. 1,785,514; Dec. 16.
Oven structure. A. E. Grapp. 1,785,079; Dec. 16.
Overall. E. O. Fellroth. 1,785,580; Dec. 16.
Overgarment. E. O. Fellroth. 1,785,581; Dec. 16.
Overshot. F. and A. L. Stone. 1,785,152; Dec. 16.
Package-opening device. O. T. Maurer. 1,785,639; Dec. 16.
Packing, Compressible. S. Imermann. 1,784,899; Dec. 16.
Packing, Swivel-joint. G. Christenson. 1,784,926; Dec. 16.
Pad: *See*—
Knee pad.
Pad and pencil holder, Combined telephone. L. A. Meltzer. Des. 82,844; Dec. 16.
Paint and varnish remover. J. J. McEvoy and C. H. Upson. 1,785,417; Dec. 16.
Paperboard and the like, Treating. R. Kastner and H. Schmolka. 1,785,484; Dec. 16.
Paper clip. G. Boden. 1,785,511; Dec. 16.
Paper, Sheathing. C. Gilmore. 1,785,379; Dec. 16.
Pen, Draftman's fountain and lettering. E. L. Delaney. 1,785,478; Dec. 16.
Pen, Fountain. A. Goldknopf. 1,785,680; Dec. 16.
Pencil. F. Furedy. Des. 82,821; Dec. 16.
Pencil, Combination. F. de la Torre. 1,785,187; Dec. 16.
Petrolatum and the like and product obtained thereby, Preparing. F. Lavirotte. 1,785,270; Dec. 16.
